KILMADAN, or KILMODAN, a parish in Argyleshire, 12 m. long, and not a ½ m. broad, being chiefly a long narrow glen surrounded by high hills. The extent of sea-coast is about 3 m., and the shore is flat and sandy, with sunk rocks. The river Ruel falls into the head of Loch-Ridan. The tide ebbs at the head of this loch above 2 m. Pop. in 1841, 567.

KILMADOCK,—frequently named, after its kirktown and principal village, DOUNE,—a parish near the middle of the S verge of Perthshire. Its entire area is computed to be 64 sq. m. The Forth runs in serpentine folds along the S boundary. The Teith runs diagonally from NW to SE, through nearly its broadest part, 5 m. in a direct line within the boundaries, bisecting the p. into nearly equal parts. From almost every eminence in the p. are seen superb views of the rich valley of the Forth, the varied aspect of a well-cultivated and extensive tract of country, Stirling-castle, and the bold grand encincturing of the Lomond and other hills. The old castle and the v. of Doune are noticed in a separate article. See DOUNE. About ¾ m. NW of Doune are the continuous hamlets of Buchany and Burn-of-Cambus. Still nearer Doune, but on the opposite bank of the Teith, and communicating with it by a bridge, is Deanston, the seat of extensive cotton-works, which give employment or support to about one-third of the large pop. of the p. Pop. in 1841, 4,055.

KILMAGANNY, a parish and village in co. Kilkenny. Area 7,454 acres. Pop. in 1831, 2,107; in 1841, 2,635.—The v. stands on the road from Thomastown to Carrick-on-Suir, 7 m. NNE of Carrick. Pop. in 1831, 514; in 1841, 593.

KILMAHON, a parish 4½ m. SE of Cloyne, co. Cork. Area 2,849 acres. Pop. in 1841, 1,785.

KILMAIN, a parish 3 m. SSE of Roscommon, co. Roscommon. Area 8,966 acres, of which 964 acres are in Lough Ree. Pop. in 1831, 2,678; in 1841, 3,194.—Also a village in the p. of Kilmainmore, co. Mayo, on the road from Ballinrobe to Galway, 5 m. SE of Ballinrobe. Pop. 421.

KILMAINBEG, a parish 1½ m. E by S of the v. of Kilmain, co. Mayo. Area 3,613 acres. Pop. 1,491.

KILMAINHAM, a western suburb of the city of Dublin, in the p. of St. James, co. Dublin, situated immediately without the limits of the city, and between the river Liffey and the Grand canal, and strictly continuous with St. James street. Its bulk or importance as a suburb is comparatively trivial; almost its whole interest rests on its antiquity, its royal hospital, and its jail for the co. of Dublin.

KILMAINHAMWOOD, a parish and village in co. Meath. Area 3,716 acres. Pop. in 1831, 1,454; in 1841, 1,412. The v. of K. stands 3 m. NW of Nobber. Pop. in 1831, 147; in 1841, 137.

KILMAINMORE, a parish 5 m. SE of Ballinrobe, co. Mayo. Area 13,792 acres. Pop. in 1841, 4,877.

KILMAKEA, a parish of co. Wexford, 6 m. S by W of New Ross. Area 3,420 acres. Pop. 1,220.

KILMALCOLM, a parish in Renfrewshire, bounded on the N by Port-Glasgow and the river Clyde. Area 19,800 acres. A great part, particularly on the S and W sides, is moorish land, rising to a considerable height, and very bleak and barren. Pop. in 1831, 1,613; in 1841, 1,616, of whom 377 were in the v. of K., which is 4 m. from Port-Glasgow.

KILMALEERY, a parish 1½ m. SW of Newmarket, co. Clare. Area 2,266 acres. Pop. 737.

KILMALIE, a very extensive parish in the cos. of Argyle and Inverness. It is of an irregular figure, and intersected by three arms of the sea. The extreme points from NW to SE are 60 m. distant from each other; and its breadth from NE to SW is not less than 30 m. Its superficies has been estimated at 589 sq. m., or nearly 376,960 acres, measured in straight lines; but, adding the surface of hills and valleys, the extent will be at least one-third more. The greater part of the p. consists of high mountains and hills, covered with heath, but affording excellent pasture for numerous flocks of sheep. Amongst the mountains is Bennevis. In several of the valleys are extensive lakes, of which Loch-Archaig and Loch-Lochy are the chief. From these two lakes issue the rivers Archaig and Lochy, which, with the Nevis, are the principal streams in the p. About 14,000

acres are covered with plantations. Fort-William, and the adjoining v. of Maryburgh, are situated in this p. Pop. in 1831, 5,566; in 1841, 5,397.

KILMALLOCK, a parish and town in co. Limerick. Area 4,074 acres. Pop. in 1831, 2,833; in 1841, 3,126. The surface is drained by two of the earliest head-streams of the Maig.—The town, formerly a parl. borough, and a place of note, stands on the rivulet Cammogue, at the junction of the Cashel and Limerick roads to Charleville, 4¼ m. S by W of Bruff, and 16 m. S of Limerick. It has been styled the Baalbec of Ireland; and if understood to be an assemblage of mere ruins, once interesting, wholly Irish, and quite destitute of the peculiar magnificence of oriental architecture, it may, within certain limitations, be allowed to bear the name. The ancient houses of the town were built of hewn stone, and apparently on a uniform plan; they were generally of three stories, ornamented with an embattlement and tasteful stone mouldings; and their window-frames, mullions, and large fire-places, were all of boldly and massively carved limestone. The older of two existing ecclesiastical ruins stands on the town-bank of the Cammogue, and within the town-walls; and claims to have been the church of an abbey.—The Dominican abbey, situated on the bank of the Cammogue exterior to the town, was founded in 1291. The church exhibits a sternness and loneliness of appearance more sublime than picturesque. — The only trade or commerce of K., consists in the business of the markets and fairs, and in retail supply to the farmers and peasantry of the neighbourhood. The town of K. is one of the most ancient in Ireland. Pop. in 1831, 1,213; in 1841, 1,408. It may be regarded as having been practically refounded by the Fitzgeralds, and was for a long period the chief scene of their power and splendour. When the earl of Ormond was vested with the military command of Munster, and charged with instructions to crush his powerful opponent, the contest which ensued was conducted "with all the vindictive bitterness of a personal quarrel," and one of its earliest results was the almost total destruction of K., by order of the earl of Ormond's brother.

KILMALOG, a parish 5 m. SE by S of Enniscorthy, co. Wexford. Area 4,093 acres. Pop. 1,408.

KILMALOODA, a parish 5¼ m. SSW of Bandon, co. Cork. Area 7,347 acres. Pop. in 1841, 3,281.

KILMALY, a parish 5 m. WSW of Ennis, co. Clare. Area 23,936 acres. Pop. in 1841, 4,908.

KILMANAGH, a parish, containing a village of the same name, 4¼ m. N of Callan, co. Kilkenny. Area 5,620 acres. Pop. in 1841, 1,950.

KILMANAGHAN, a parish, partly in co. Westmeath, partly in King's co. Area of the Westmeath section 1,633 acres; of the King's co. section 6,563 acres. Pop. in 1831, 3,414; in 1841, 3,526.

KILMANAHEEN, a parish in co. Clare, containing the town of Ennistymon, and part of the v. of Lehinch. Area 8,177 acres. Pop. in 1841, 6,436.

KILMANIVAIG, a parish in Inverness-shire, about 60 m. in length, and in greatest breadth 25 m. Superficies 300,000 acres. Its surface is much diversified with ranges of lofty mountains, intersected by extensive glens and rapid rivers, most of which empty themselves into the Lochy. In this district is the ancient castle of Inverlochy, and the famous parallel road of Glenroy. Pop. in 1841, 2,791.

KILMANLOE, or KILROE, a parish in co. Cork. Area 919 acres. Pop. in 1831, 1,291; in 1841, 1,798.

KILMANMAN, a parish in Queen's co., containing the v. of Clonaslee. Area 16,848 acres, of which 96 acres are in Lough Annagh. Pop. in 1841, 4,565.

KILMANNAN, a parish 8 m. SW of Wexford, co. Wexford. Area 4,251 acres. Pop. 1,127.

KILMANY, a parish in Fifeshire, 5 m. NNE of Cupar. The hamlet of K. is near the parish-church; the other, Rathillet, is farther W. Pop. in 1831, 707; in 1841, 659. The cultivated land in the p. extends to about 3,550 acres.

KILMAOGUE, or KILMAGUE, a parish in co. Kildare. Area 10,881 acres. Pop. in 1841, 3,496.

KILMARNOCK, a parish in the district of Cunningham, Ayrshire, bounded on the N by Fenwick, on the S by the river Irvine. Area about 5,900 Scottish acres. It is traversed in its western divison by K. water. The surface is in general flat, with a gentle declivity to the S. Besides the town of K., this p. has several collier villages and hamlets, containing aggregately a pop. of about 1,000. The K. and Troon railway, which runs off W from the W side of the town, is of great value for the exportation of coal, and the importation of lime, slates, timber, grain, and other commodities. A branch-line to the Glasgow, Paisley, and Ayr railroad, was opened in March 1843. It joins the main line at the end of the 23d m. from Glasgow, thereby rendering the distance by railroad to the latter city nearly 34 m.—The length of the branch-line is 10½ m. Pop. in 1801, 8,079; in 1831, 18,093; in 1841, 19,956.—K. water, over most part of its course, flows in two head-waters, both of which rise in the SE corner of Renfrewshire, and pursue a course respectively of 9 and 10 m., in a direction W of S, till they unite at Dean-castle. The united stream has a course of only 2 m., flows past the town of K., and falls into the Irvine 3 furl. below Riccarton.—The parl. burgh of K. occupies a low site, amidst flat and tame though agriculturally rich scenery, on both sides of K. water immediately above its point of confluence with the Irvine; 9½ m. from Mauchline, and 28 m. from Largs. The town as a whole has a pleasing and airy aspect, and exhibits a fair display of public buildings. About 100 years ago, three or four individuals conducted the principal trade, buying serges and other woollen articles from private manufacturers, and exporting them to Holland. The demand for woollen goods afterwards increasing, a company was formed, and laid the foundation of the modern and hitherto uniformly flourishing productiveness of the place, by the erection of a woollen factory. About the same time was introduced the trade for which K., Ayr, and Irvine continue to be noted,—the making of shoes and boots. Some fifteen years before the close of the cent., spinning-jennies for cotton, and a carding and spinning machine for coarse wool, were erected. Since that date the town has boldly and rapidly advanced in all the ancient departments of its manufacture, and has made very important additions in the articles of printed shawls, gauzes, and muslins of the finest texture, and some small addition likewise in the department of silk fabrics. The carpet-manufactory may, amidst conflicting claims, be regarded as now the staple of K. Three chief classes of carpets are manufactured, all of which are woven with harness,—Brussels carpets, of the kinds called 'points' and 'combers,'—Wilton carpets, woven exactly like the former except that the brass wires are groved, and that the rib is cut open with a sharp knife after it has been fastened,—and Scotch carpets of three qualities. The annual manufacture of bonnets now exceeds 18,000 dozens in number, and amounts to about £12,000 in value. The manufacture of boots and shoes was estimated, as to the annual worth of the produce, in 1837, at about £50,000. The manufacture of leather in the same year was set down in value at £45,000. K. unites with Dumbarton, Port-Glasgow, Renfrew, and Rutherglen, in sending a member to parliament. Pop. in 1841, 17,844; in 1851, 19,398. Electors in 1846, 630.

KILMARNOCK, a township of Piscataquis co., in the state of Maine, U. S., 104 m. NE of Augusta, watered by Piscataquis river and a tributary the outlet of Otter Pond. Pop. in 1840, 319.—Also a village of Lancaster co., in the state of Virginia, 90 m. E of Richmond, on Chesapeake bay, at the mouth of a small creek. Pop. about 140.

KILMARONOCK, a parish at the S end of Loch-Lomond, Dumbartonshire, skirted along the NE boundary 5 m. in a direct line by the river Endrick. Pop. in 1831, 999; in 1841, 931.

KILMARTIN, a parish in Argyleshire, containing 18,000 acres, lying on the W coast and bounded on the E for 6 m. by Loch-Awe. Pop. in 1841, 1,233.

KILMASTULLA, a parish 3 m. N by E of Newport-Tip., co. Tipperary. Area 4,805 acres. Pop. in 1831, 2,834; in 1841, 2,046. A considerable proportion of the surface is mountainous ground within the group of the Keeper mountain; the remainder consists for the most part of middle-rate land.

KILMAURS, a parish in the district of Cunningham, Ayrshire, stretching NE from Irvine water. Area about 5,000 acres. Pop. in 1831, 2,130; in 1841, 2,617.—The village of K. stands on the r. bank of Carmel water, 2 m. from Kilmarnock. Pop. about 1,200.

KILMEADEN, a parish in co. Waterford. Area 9,242 acres. Pop. in 1841, 2,620.—The village of K. stands on the road from Waterford to Carrick-on-Suir, 3 m. ESE of Portlaw. Pop. in 1831, 194.

KILMEEDY, a parish and village in co. Limerick. Area 9,037 acres. Pop. in 1841, 4,739.—The village is 5 m. ESE of Newcastle. Pop. in 1841, 222.

KILMEEN, a parish 3 m. WSW of Newmarket, partly in co. Kerry, but chiefly in co. Cork, containing the village of Boherboy. Area 36,710 acres. Pop. in 1831, 8,322; in 1841, 10,380.—Also a parish 3½ m. NNW of Clonakilty, co. Cork. Area 8,667 acres. Pop. in 1831, 3,980; in 1841, 3,736.—Also a parish 3½ m. W by N of Loughrea, co. Galway. Area 3,808 acres. Pop. in 1831, 852; in 1841, 980.

KILMEGAN, a parish in co. Down, containing the town of Castlewellan. Area 7,775 acres. Pop. in 1831, 6,921; in 1841, 7,467. The surface lies along the W side of Dundrum bay. The highest ground, Slieve-Roob proper, is situated on the N boundary, and has an alt. of 1,755 ft.

KILMELCHEDOR, a parish 2¾ m. NNW of Dingle, co. Kerry. Area 5,900 acres. Pop. in 1831, 2,288; in 1841, 2,333.

KILMENAN, a parish 2¾ m. N of Ballyragget, co. Kilkenny. Area 1,008 acres. Pop. in 1841, 319.

KILMERSDON, a parish in Somersetshire, 6 m. NW of Frome. Area 3,560 acres. Pop. 2,143.

KILMESSAN, a parish and village 5 m. E of Trim, co. Meath. Area 3,337 acres. Pop. 773.

KILMESTON, a parish in Hants, 4 m. S of New Alresford. Area 1,740 acres. Pop. in 1841, 256.

KILMICHAEL, a parish and hamlet 8¼ m. WNW of Kildysert, co. Clare. Area of p. 18,772 acres. Pop. in 1831, 3,794; in 1841, 5,080; of whom in v. 118.—Also a parish 5¼ m. SSW of Macroom, co. Cork. Area 20,869 acres. Pop. in 1831, 6,166; in 1841, 6,250.—Also a village in the p. of Kilnamanagh, co. Cork. Pop. 140.—Also a headland in co. Wexford, 4¾ m. S of the mouth of the Ovoca.

KILMICKLIN, a parish 3½ m. N of Tipperary, co. Tipperary. Area 588 acres. Pop. in 1841, 161.

KILMINA, a parish 2½ m. N by W of Westport, co. Mayo, containing the village of Knockaunyeveen. Area 10,762 acres. Pop. in 1841, 7,876.

KILMINGTON, a parish in Devon, 2 m. W of Axminster. Area 1,940 acres. Pop. in 1831, 540; in 1841, 495.—Also a parish in Somersetshire, 5½ m. E by N of Bruton. Area 2,750 acres. Pop. 635.

KILMOCAHILL, a parish 2½ m. N of the town of Gowran, co. Kilkenny. Area 4,593 acres. Pop. in 1831, 1,391; in 1841, 1,552.

KILMOCAR, a parish 3¼ m. SW of Castle-Comer, co. Kilkenny. Area 4,815 acres. Pop. in 1841, 1,997.

KILMOCREE, a parish 4¼ m. S of Wexford, co. Wexford. Area 1,112 acres. Pop. 218.

KILMODUM, a parish 4¼ m. S of Castle-Comer, co. Kilkenny. Area 3,425 acres. Pop. in 1841, 1,119.

KILMODUMOGE, a parish 5¼ m. S by W of Castle-Comer, co. Kilkenny. Area 1,726 acres. Pop. in 1841, 551.

KILMOE, a parish in co. Cork, lying between Crookhaven harbour and Dunmanus bay. Area 13,974 acres. Pop. in 1831, 6,889; in 1841, 7,234. The surface, exclusive of some unimportant islands, consists of a coarse, mountainous, and comparatively barren peninsula, extending SW from the base of Mount Gabriel.

KILMOILY, a parish 3 m. N by W of Ardfert, co. Kerry. Area 7,750 acres. Pop. in 1841, 4,459.

KILMOLARA, a parish 2¾ m. S of Ballinrobe, co. Mayo. Area 3,961 acres. Pop. in 1841, 1,296.

KILMOLASH, a parish 3¾ m. SSE of Cappoquin, co. Waterford. Area 3,689 acres. Pop. in 1841, 1,491.

KILMOLERAN, a parish in co. Waterford, containing Carrick-on-Suir suburb of Carrickbeg. Area 1,937 acres. Pop. in 1831, 2,896; in 1841, 3,113.

KILMONEY, a parish 3¾ m. W of Carrigaline, co Cork. Area 1,431 acres. Pop. in 1841, 771.

KILMONOGUE, a parish 1½ m. E of Kinsale, co. Cork, containing the village of Balgoly. Area 3,061 acres. Pop. in 1831, 1,217; in 1841, 1,178.

KILMOON, a parish 4 m. NNW of Kilfenora, co. Clare. Pop. in 1831, 1,088; in 1841, 1,239. Area 6,461 acres. One summit on the W border has an elevation of 1,109 ft. above sea-level; and two adjacent to it, and on the W boundary, have altitudes of respectively 1,004 and 1,134 ft.—Also a parish 3½ m. N of Ratoath, co. Meath. Area 1,834 acres. Pop. 639.

KILMORACK, a parish of Inverness-shire, comprising the v. of Beauly. Pop. in 1831, 2,709; in 1841, 2,694. It has an extent of 65 m. from E to W. Its breadth varies from 8 to 15 m. The W division of the p. is very wild and alpine in character, and branches into three distinct glens, namely Strathglass, Glenstrathfarrar, and Glencannich, from which respectively the Glass, Farrar, and Cannich descend, to compose the river Beauly. On the muir of Ord, a little to the E of Beauly, is held the most important cattle-fair in the N of Scotland.

KILMORE, a parish in Argyleshire, to which that of Kilbride is united, situated in the district of Lorn, and comprehending the island of Kerera. The form of the continental part is nearly circular, about 6¼ m. in diam. There are three ferries, viz. Connel-ferry, over Loch-Etive; Port-Kerera, between the mainland and that island; and Mullferry, between the latter and the island of Mull. Pop. in 1841, 2,773.

KILMORE, a parish and village in co. Cavan. Area of p. 16,885. Pop. in 1831, 7,295; in 1841, 7,250.—The village of K. stands on the road from Cavan to Crossdoney. Its church, or cathedral, is an ancient and very plain edifice. The vicarages of K. and Ballintemple, and the sinecure rectory of Keadue, constitute the benefice of K.—The diocese of K. is partly in the provs. of Leinster and Connaught, but chiefly in Ulster. Area 648,036 acres. This see was founded in the 13th cent. From 1629 till 1641-2, it was held jointly with Ardagh by the celebrated Bedell, the translator of the Bible into Irish. The act of 1833 permanently annexed K. to Elphin. The average gross income of the see during three years ending in 1831 was £7,477.—Also a parish in co. Armagh, containing the town of Rich-

hill. Area 17,273 acres. Pop of the whole. in 1831, 14,034; in 1841, 14,256.—Also a parish 4 m. E by S of Ballinahinch, co. Down. Area 12,853 acres. Pop. in 1831, 6,602; in 1841, 6,277.—Also a parish 3¼ m. ESE of Summerhill, co. Meath. Area 6,607 acres. Pop. in 1841, 1,274.—Also a parish in co. Monaghan, 2½ m. W by N of Monaghan. Area 8,689 acres. Pop. in 1831, 5,095; in 1841, 5,121.—Also a parish on the E border of co. Roscommon, lying along the Shannon opposite the towns of Drumsna and Jamestown. Area 9,316 acres. Pop. in 1831, 5,086; in 1841, 5,164.—Also a parish 2½ m. NNW of Golden, co. Tipperary. Area 2,004 acres. Pop. in 1831, 1,029; in 1841, 1,162.—Also a parish 4 m. S of Nenagh, co. Tipperary. Area 13,535 acres. Pop. in 1831, 4,717; in 1841, 5,138.—Also a parish and village 5¾ m. WSW of Broadway, co. Wexford. Area 4,233 acres. Pop. in 1831, 1,749; in 1841, 1,865.—Also a parish 2 m. W of Castle-Carbery, co. Kildare. Area 1,908 acres. Pop. in 1841, 457.

KILMORE-ERRIS, a parish in co. Mayo. Area 29,492 acres. Pop. in 1831, 9,159; in 1841, 9,428. The mainland comprises the whole of the peninsula called the Mullet. The insular district comprises most of the islands belonging to the barony of Erris, the chief of which are North and South Inniskea, Devillan, and Innisglora.

KILMOREMOY, a parish partly in co. Mayo, and partly in co. Sligo. Area of the Mayo section, 4,338 acres; of the Sligo section, 7,992 acres. Pop. of the whole, in 1831, 14,586; in 1841, 13,129.

KILMORGAN, a parish 2½ m. NE of Ballymote, co. Sligo. Area 5,768 acres. Pop. in 1841, 2,343.

KILMORY, a parish in the co. of Bute, and isle of Arran, extending 24 m. in length, and comprehending the SW and NW sides of the island. It is separated from Kintyre on the mainland by Kilbrandon sound. Loch-Iorsa, or Earsay, nearly in the centre of the island, is about 1 m. in length. Loch-Tanna is nearly 2 m. in length. There is a small harbour at the Blackwater-foot, whence communication is kept up with Campbelton by means of a packet-boat. Pop. in 1841, 3,435.

KILMOVEE, a parish 4 m. W by S of Ballaghadireen, co. Mayo. Area 20,756 acres. Pop. 5,844.

KILMOYLAN, a parish 5½ m. S by E of Tuam, co. Galway. Area 8,567 acres. Pop. in 1831, 1,788; in 1841, 1,903.—Also a parish in co. Limerick. Area 15,091 acres. Pop. in 1841, 3,350.

KILMUCKRIDGE, a parish 4½ m. ENE of Oulart, co. Wexford, Leinster. Area 3,898 acres. Pop. in 1831, 1,380; in 1841, 1,602.

KILMUD, a parish 2¼ m. NNW of Killinchy, co. Down. Area 4,634 acres. Pop. in 1841, 2,154.

KILMUIR, a parish of Inverness-shire, forming the N extremity of the isle of Skye. It is 16 m. in length, and 8 m. in breadth. The inhabited part, along the coast, is flat with gently rising eminences; but the interior is mountainous, and covered with heath. The extent of sea-coast is upwards of 30 m. Pop. in 1801, 2,555; in 1831, 3,415; in 1841, 3,625.

KILMUIR EASTER, a parish situated partly in the co. of Ross, and partly in that of Cromarty, on the frith of Cromarty. There are three villages in the p., viz., Milntown, Bartaraville, and Portlich. Of these Milntown, the principal, has a pop. of about 200. Pop. of p. in 1831, 1,551; in 1841, 1,486.

KILMUN, a pleasing little village at the head of the Holy loch, in the district of Cowal, Argyleshire.

KILMURRY, a parish 6 m. SE of Macroom, co. Cork. Area 9,109 acres. Pop. in 1841, 3,742.—Also a parish 2½ m. ESE of Limerick, co. Limerick. Area 3,570 acres. Pop. in 1831, 1,803; in 1841, 1,708.—Also a parish 3 m. WNW of Carrick-on-Suir, co. Tipperary. Area 7,275 acres. Pop. 2,478.

KILMURRY-CLONDERALAW, a parish in co. Clare. Area 10,457 acres. Pop. in 1841, 4,332. The surface extends along the W of Clonderalaw bay.

KILMURRY-ELY, a parish 1½ m. NNW of Shinrone, King's co. Area 5,385 acres. Pop. 1,655.

KILMURRY-IBRICKANE, a parish 2¾ m. W by S of Milltown-Malbay, co. Clare. Area 25,887 acres, of which 331 acres are in Lough Doo. Pop. in 1831, 8,433; in 1841, 10,747. Slieve-Callan on the E boundary has an alt. of 1,282 ft.

KILMURRY-NEGAUL, a parish and village in co. Clare. Area of p. 2,917 acres. Pop. in 1831, 628; in 1841, 699; of whom 137 were in the v., which is 2½ m. N by W of Six-Mile-Bridge.

KILNABRONOGUE, a parish 2½ m. N of Eyrecourt, co. Galway. Area 3,552 acres. Pop. 1,126.

KILNAGARIFF, a parish 2 m. SE of Castle-Connell, co. Limerick. Area 4,455 acres. Pop. 2,724.

KILNAGLORY, a parish 4¾ m. WSW of Cork, in co. Cork. Area 3,942 acres. Pop. 1,080.

KILNAGROSS, a parish 1¾ m. NNE of Clonakilty, co. Cork. Area 3,764 acres. Pop. in 1841, 2,060.

KILNALECK, a village in the p. of Kildrumferton, co. Cavan, 3¼ m. NW of Mount-Nugent. Pop. in 1841, 327.

KILNAMANAGH, a parish 2½ m. NE of Frenchpark, co. Roscommon. Area 7,621 acres, of which 746 acres are in Lough Gara. Pop. in 1831, 2,815; in 1841, 2,900.—Also a cluster of bogs in co. Roscommon, lying chiefly S and E of Breeogue bridge. Area 3,792 acres.—Also a parish 9 m. SW of Castletown-Berehaven, co. Cork. Area 13,810 acres. Pop. in 1831, 5,612; in 1841, 5,861.—Also a parish 1¼ m. NE of Oulart, co. Wexford. Area 2,678 acres. Pop. in 1831, 759; in 1841, 870.

KILNAMARTRY, a parish 3½ m. SW by W of Macroom, co. Cork. Area 11,680 acres. Pop. in 1831, 2,604; in 1841, 2,782.

KILNANEAVE, or KILLANEAFE, a parish 4¼ m. SE by S of Nenagh, co. Tipperary. Area 6,607 acres. Pop. in 1831, 2,136; in 1841, 2,021.

KILNASOOLAGH, a parish ¾ m. W of Newmarket-on-Fergus, co. Clare. Area 5,138 acres. Pop. in 1831, 1,319; in 1841, 1,158. The surface forms the E screen of the upper part of the Fergus estuary.

KILNAUGHTEN, a parish in co. Kerry, containing the town of Tarbert. Area 9,164 acres. Pop. in 1831, 4,371; in 1841, 5,102.

KILNEBOY, a parish in co. Clare. Area 17,967 acres. Pop. in 1831, 3,678; in 1841, 4,102.

KILNEHUE, or LAMOGUE, a parish 3½ m. NW by W of Gorey, co. Wexford. Area 15,360 acres. Pop. in 1831, 3,393; in 1841, 3,596.

KILNEMONA, a parish 3¾ m. WNW of Ennis, co. Clare. Area 5,418 acres. Pop. in 1841, 1,758.

KILNERATH, a parish 2 m. NW by N of Newport-Tip., co. Tipperary. Area 10,449 acres. Pop. in 1831, 2,749; in 1841, 2,970.

KILNINIAN AND KILMORE, a parish in Argyleshire, forming a peninsula in the NW extremity of the island of Mull, extending 12 m. in length, and nearly of the same breadth. Pop. in 1841, 4,335.

KILNINVER, a parish in Lorn, in Argyleshire, united with the parish of Kilmelfort, and forming together nearly a square of 12 m. bounded on the W by the sound of Mull. Pop. in 1841, 896.

KILNOE, a parish 3¾ m. SW by W of Scariff, co. Clare. Area 10,512 acres. Pop. in 1841, 3,482.

KILNSAY, a hamlet in the chapelry of Coniston-with-Kilnsay, p. of Burnsall, W. R. of Yorkshire, 11 m. E of Settle.

KILNSEA WITH SPURN, a parish in the E. R. of Yorkshire, 24 m. ESE of Hull, on a projecting point of land between the North sea and the mouth of the Humber. Area 1,130 acres. Pop in 1831,

158; in 1841, 140. The promontory of Spurn-head or Spurn-point, the S point of Holderness, is in this parish. On it are two lighthouses, in 53° 34′ 44″ N lat., 0° 7′ E long.; relative position NW ½ N, 540 ft. There is also a light vessel off Spurn-point in 53° 34′ N lat., 0° 13′ E long. Several towns formerly stood on this coast, which have all been long ago swallowed up by the sea. The celebrated port of Ravenspur, situated near Spurnhead, has likewise shared the same fate.

KILNWICK, a parish in the E. R. of Yorkshire, 6 m. SSW of Great Driffield. Area 3,990 acres. Pop. in 1831, 217; in 1841, 627.

KILNWICK-PERCY, a parish in the E. R. of Yorkshire, 2 m. ENE of Pocklington. Area 1,610 acres. Pop. in 1831, 49; in 1841, 58.

KILPATRICK (East), a parish partly in Dumbartonshire and partly in Stirlingshire. Area 13,440 acres. The Forth and Clyde canal traverses the parish near its S boundary, from Kelvin bridge 4 m. W. The N corner of the p. is occupied by part of the range of heights called the Kilpatrick hills or braes, which run from Strathblane W to Dumbuck, and the loftiest of which here rises about 1,200 ft. above sea-level. The parish contains the large manufacturing village of Milngavie. Of several hamlets, the only noticeable one is New Kirk, or New K., 5½ m. NW of Glasgow. Pop. in 1841, 3,457.

KILPATRICK (West), a parish in Dumbartonshire, stretching along the Clyde, 7¾ m. Superficial area about 18 or 20 sq. m. One-half or rather more of the area from the N boundary downwards, is occupied by the range of the Kilpatrick hills, which terminate in Dumbuck, coming down in a rapid declivity almost to the very edge of the Clyde. The p. is remarkable for the number of its villages, and the extent and variety of its manufactures, existing in the absence of anything which can with propriety be called a town. The villages are: Old K., Duntocher, Faifley, Miltonfield, Hardgate, Yoker, Dalmuir-shore, Dalmuir, Bowling, Little-Mill, Dumbuck, and Milton; and contain, with the exception of a mere fraction, the whole of its large pop. Duntocher, Faifley, Miltonfield, and Hardgate, all situated within the range of a mile on the average, 9 m. W of Glasgow, and from ¾ to 1½ m. W of the E boundary of the parish, contain upwards of 3,000 inhabitants. Some of the other villages are mere hamlets as to pop., yet possess importance as seats of manufacture. Pop. in 1801, 2,844; in 1831, 5,879; in 1841, 7,020.

KILPATRICK, a parish 3 m. SSW of Crosshaven, co. Cork. Pop. in 1831, 1,145; in 1841, 1,081. —Also a parish 5 m. NNE of Tipperary, co. Tipperary. Area 2,785 acres. Pop. in 1831, 1,483; in 1841, 1,734.—Also a parish 3¾ m. SE of Castle-Pollard, co. Westmeath. Area 1,892 acres. Pop. in 1831, 416; in 1841, 447. — Also a parish 4 m. NNW of Wexford, co. Wexford. Area 2,739 acres. Pop. in 1831, 852; in 1841, 879.—Also a village in the parish of Brinny, co. Cork. Pop. in 1831, 182. —Also a parish 2¾ m. S by E of Castle-Carbery, co. Kildare. Area 7,076 acres. Pop. in 1831, 1,227; in 1841, 1,080.

KILPEACON, a parish 4½ m. S of Limerick, co. Limerick. Area of the Pobblebrien section 1,154 acres. Pop. in 1831, 578; in 1841, 424.

KILPHELAN, a parish 1¼ m. SSE of Mitchellstown, co. Cork. Area 524 acres. Pop. in 1841, 201.

KILPIN, a township in the p. of Howden, E. R. of Yorkshire, 2 m. SE of Howden. Pop. 393.

KILPIPE, a parish 8 m. W of Arklow, partly in co. Wexford, but chiefly in co. Wicklow. Area of the Wexford section, 3,477 acres; of the Wicklow section, 12,153 acres. Pop. in 1831, 3,368; in 1841, 3,400. Mount Annagh, on the S boundary, has an alt. of 1,498 ft.

KILPOOLE, a parish on the coast of co. Wicklow. Area 3,028 acres. Pop. in 1841, 2,977.

KILQUANE, a parish in co. Clare, 2 m. N of Limerick. Area 3,894 acres. Pop. in 1831, 2,028; in 1841, 2,081. — Also a parish 3¼ m. WSW of Loughrea, co. Galway. Area 6,858 acres. Pop. in 1831, 1,674; in 1841, 1,960.—Also a parish 4½ m. NNW of Dingle, co. Kerry. Area 9,709 acres. Pop. in 1831, 1,674; in 1841, 1,760.

KILRAGHTIS, a parish 3½ m. NNE of Ennis, co. Clare. Area 5,587 acres. Pop. in 1841, 1,995.

KILRANE, a parish 2 m. NE of Broadway, co. Wexford. Area 2,047 acres. Pop. in 1841, 720.

KILRANELAGH, a parish 3 m. E of Baltinglass, co. Wicklow. Area 4,470 acres. Pop. in 1831, 1,831; in 1841, 1,800. The highest ground in the interior has an alt. of 1,252 ft.; Mount Keadeen, on the NE boundary, has an alt. of 2,143 ft.

KILRAUGHTS, a parish 4 m. E by S of Ballymoney, co. Antrim. Area 5,132 acres. Pop. in 1831, 1,837; in 1841, 1,542.

KILREE, a parish 3 m. NW of Knocktopher, co. Kilkenny. Area 1,947 acres. Pop. in 1831, 652; in 1841, 720.—Also a parish partly in co. Londonderry, but chiefly in Ulster. Area of the Coleraine section, 1,061 acres; of the Loughinsholin section, 5,252 acres. Pop. in 1831, 4,262; in 1841, 4,277.—The market-town of K. is 8 m. N by W of Portglenone. Pop. in 1841, 1,191.

KILRENNY, a parish in co. Kildare, 3½ m. NNW of Castle-Carbery. Area 2,617 acres. Pop. in 1831, 608; in 1841, 638.

KILRENNY, a parish and burgh in Fifeshire, upon the coast of the frith of Forth. Pop. in 1831, 1,705; in 1841, 2,039.—The burgh of K. consists of two villages: Nether-K. or Cellardykes, which is on the sea-coast, divided from Anstruther-Easter only by a small burn, and forming with it and Anstruther-Wester apparently one long town; and Upper K., situated about a ½ m. inland. By the reform bill it was conjoined with Cupar, St. Andrews, Crail, Anstruther-Easter and Wester, and Pittenweem, in sending one member to parl. Constituency in 1840, 51; in 1848, 53. Nether-K., or Cellardykes, is a fishing-station of considerable importance.

KIL-RHEDDYN, a parish partly in Carmarthenshire, and partly in Pembrokeshire, 4 m. SW of Newcastle-Emlyn. Pop. in 1841, 1,108.

KILRICKILL, a parish 4½ m. ENE of Loughrea, co. Galway. Area 5,947 acres. Pop. in 1841, 1,737.

KILROAN, a parish 3½ m. S of Kinsale, co. Cork. Area 1,140 acres. Pop. in 1831, 641; in 1841, 731.

KILRONAN, a parish 8 m. N by W of Carrick-on-Shannon, forming the N extremity of co. Roscommon. Area 16,356 acres, of which 1,315 acres are part of Lough Allen, and 313 acres are in Lough Meelagh. Pop. in 1831, 6,940; in 1841, 7,085. The highest ground is on the W border, and has an alt. of 1,098 ft. In addition to coal and metal mining operations in the p., considerable employment exists in the manufacture of sandstone and limestone flags for tombstones.—Also a parish in co. Waterford, 3½ m. SW by S of Clonmel. Area 16,701 acres. Pop. in 1831, 3,914; in 1841, 4,772.—Also a parish 3½ m. SW of Waterford, co. Waterford. Area 546 acres. Pop. in 1831, 112; in 1841, 126.

KILROOT, a parish 2½ m. NE by E of Carrickfergus, co. Antrim. Area 2,418 acres. Pop. in 1831, 536; in 1841, 735.

KILROSS, a parish 2¼ m. E by N of Coloony, co. Sligo. Area 3,932 acres. Pop. in 1841, 1,633.

KILROSSANTY, a parish 3¾ m. WSW of Kilmacthomas, co. Waterford. Area 17,416 acres. Pop.

in 1831, 3,019; in 1841, 3,615. The whole of the N district of the p., and part of the W district, are portions of the Monavoulagh mountains. The two principal summits in the N have alts. of 2,180 and 2,387 ft.; and the two principal on the W of 1,321 and 1,952 ft.; but the loftiest is the monarch-summit, Seafin, on the NW boundary.

KILRUANE, a parish 3¼ m. NE of Nenagh, co. Tipperary. Area of the Lower Ormond section, 1,029 acres; of the Upper Ormond section, 2,881 acres. Pop. in 1831, 1,384; in 1841, 1,444.

KILRUSH, a parish and town on the S coast of co. Clare. Area of p. 15,658 acres. Pop. in 1831, 9,732; in 1841, 11,385. The bay of Poolnasherry forms part of the W boundary; and the estuary of the Shannon bounds the whole of the S.—The seaport stands at the head of the creek of K., 1⅜ m. NNE of Inniscattery, and 27 m. SW of Ennis. The principal parts of the town are a spacious central square, and two spacious streets running parallel with each other. The market-house, in the centre of the square, is a handsome structure. The custom-house is a neat modern building. The bridewell is the largest building of its class in the co. The creek or natural harbour is dry at low water; admits only small craft even with the tide; and is provided with two small quays and a patent slip. The fishing trade of the town, as to both capture and sale, is somewhat extensive. About 20 small hookers, employing about 200 persons, belong strictly to itself; and are engaged in fishing and in dredging for oysters; and numerous fishing-craft have their rendezvous and market at K., and are employed in both the herring and the general fishery. Enormous quantities of turf are sent from K., and from the bay of Poolnasherry, to the city of Limerick, and are supplied from a tract of 24,000 acres of turbary, which commences in the immediate vicinity of the town, and extends to Moore bay and Dunbeg on the Atlantic. It is thought that the value of the turf sent off annually amounts to upwards of £10,000. The facility of conveyance by steam between Limerick and K. has very greatly increased the latter's prosperity.—The manufactures are chiefly for home-consumption, and consist of frieze, flannel, stockings, shoes, nails, strong sheeting, and a narrow and serviceable kind of linen called bandlecloth.—Pop. in 1831, 3,996; in 1841, 5,071.—Also a parish 5¼ m. S by E of Kildare, co. Kildare. Area 4,076 acres. Pop. in 1841, 577.—Also a parish 1½ m. W by S of Freshford, co. Kilkenny. Pop. in 1831, 752.—Also a parish ¾ m. WNW of Dungarvan, co. Waterford. Area 1,522 acres. Pop. in 1831, 724; in 1841, 723.—Also a parish 2¾ m. E by S of Newtownbarry, co. Wexford. Area 11,385 acres. Pop. in 1831, 2,731; in 1841, 3,158.

KILSALLAGHAN, a parish 3½ m. W by N of Swords, co. Dublin. Area 2,730 acres. Pop. in 1831, 581; in 1841, 548.

KILSARAN, a parish 1 m. S of Castle-Bellingham, co. Louth. Area 3,393 acres. Pop. 2,098.

KILSCANLAN, a parish 4½ m. SE of New Ross, co. Wexford. Area 1,154 acres. Pop. in 1841, 404.

KILSCANNEL, a parish 2¼ m. WSW of Rathkeale, co. Limerick. Area 3,203 acres. Pop. in 1831, 1,031; in 1841, 1,049.

KILSCORAN, a parish 1½ m. N by E of Broadway, co. Wexford. Area 2,151 acres. Pop. in 1831, 616; in 1841, 666.

KILSEILY, a parish in co. Clare. Area 11,102 acres. Pop. in 1831, 4,227; in 1841, 4,469. The summit of Knockaplunta, nearly in the centre of the p., has an alt. of 843 ft.; another summit, 1½ m. to the W of it, has an alt. of 1,018 ft.

KILSHALVEE, a parish 4¾ m. S of Ballymote, co. Sligo. Area 5,505 acres. Pop. in 1831, 2,034; in 1841, 2,411.

KILSHANE, a parish 2¼ m. ESE of Tipperary, co. Tipperary. Area 1,424 acres. Pop. in 1841, 615.

KILSHANIG, a parish 3 m. SW of Mallow, co. Cork. Area 27,595 acres. Pop. in 1841, 9,348.

KILSHANNY, a parish 2½ m. N of Ennistymon, co. Clare. Area 5,805 acres. Pop. in 1841, 2,114.

KILSHARVAN, a parish 3 m. S of Drogheda, co. Meath. Area of the Lower Duleek section 1,528 acres; of the Upper Duleek section 568 acres. Pop. in 1831, 487; in 1841, 440.

KILSHEELAN, a parish 4¾ m. W by N of Carrick-on-Suir, partly in co. Tipperary, partly in co. Waterford. Area 8,977¼ acres. Pop. in 1831, 1,570; in 1841, 1,936. The v. of K. stands on the l. bank of the Suir. Pop. in 1831, 290; in 1841, 435.

KILSHINANE, a parish 5½ m. S by E of Listowel, co. Kerry. Area 13,478 acres. Pop. in 1841, 2,271.

KILSHINE, a parish 4½ m. S of Nobber, co. Meath. Area 1,543 acres. Pop. in 1841, 609.

KILSILLAGH, a parish 5½ m. ESE of Clonakilty, co. Cork. Area 245 acres. Pop. in 1841, 188.

KILSKEERY, a parish in co. Tyrone, containing the town of Trillick. Area 20,438 acres. Pop. 9,352.

KILSKYRE, a parish in co. Meath, containing the town of Crossakeel. Area 11,724 acres. Pop. in 1831, 4,537; in 1841, 5,014. The hamlet of K. is 1½ m. SSE of Crossakeel.

KILSPINDIE, a parish in the eastern part of Perthshire. A considerable number of the pop. are linen-weavers, in the employ of the manufacturers of Dundee. About a ½ m. from the E angle of the p. is the v. of Rait. Pop. in 1831, 760; in 1841, 709.

KILSYTH, a parish in Stirlingshire. Area 24 sq. m., or about 15,000 acres. The S district of the p., or nearly one-half of the whole area, is the highest part of that strath which runs W from the carse of Falkirk, and is traversed by the Forth and Clyde canal. The p. is singularly rich in both the number and the utility of its minerals. Coal is very abundant, stretching in thick seams from 4 to 16 fath. beneath the surface, and probably existing in other and equally rich seams at a greater depth. Limestone, consisting of a conglomeration of small shells of all sizes, from an inch in diam. till they become invisible to the naked eye, and containing the greatest proportion of calcareous earth and the least proportion of sand of probably any limestone in Scotland, is extensively worked, and in great request. Freestone of a beautiful white colour offers an abundant supply to demands at a distance for the materials of ornamental masonry. Iron-stone has, for three-fourths of a century, been worked here by the Carron company, and occurs in a variety of forms. Balls or round masses, uniform in shape, and having the outline of a flat-topped loaf or apple-pudding, were long considered the richest form in which it occurred. A large vein of blackband iron-stone has recently been discovered. A seam of stone, from 20 to 30 ft. in thickness, has furnished an annual supply of many thousand tons for paving the streets of Glasgow. A vein of copper was wrought during last century. Pop. in 1801, 1,762; in 1831, 4,297; in 1841, 5,613.—The town of K. is ¾ m. N of the Forth and Clyde canal, 5½ m. from Cumbernauld, and 12½ m. from Glasgow. Pop. in 1841, 4,106.

KILTALE, a parish 4½ m. WNW of Dunshaughlin, co. Meath. Area 1,018 acres. Pop. in 1841, 419.

KILTALLA, a parish in co. Kerry, containing the town of Castlemain. Area 4,757 acres. Pop. 1,303.

KILTAMAGH, a village in the p. of Killeden, co. Mayo, 5¼ m. NE of Balla.

KILTARLITY, a large and mountainous parish in Inverness-shire, formed by the union of the par-

ishes of K. and Conveth. It is, including the mission of Strathglass, 40 m. in length, and about 8 m. in breadth. Pop. in 1831, 2,715; in 1841, 2,869.

KILTARTAN, a parish in co. Galway, containing part of the town of Gort. Area 5,725 acres. Pop. in 1831, 2,930; in 1841, 2,462.

KILTEAL, a parish 2¾ m. NW of the town of Stradbally, Queen's co. Area of the Stradbally section 1,561 acres; of the Maryborough section 1,991 acres. Pop. of the whole in 1841, 1,067.

KILTEARN, a parish in Ross-shire, on the N side of the frith of Cromarty. Benwyvis is in this p. Pop. in 1831, 1,605; in 1841, 1,436.

KILTEEL, or Eadestown, a parish and village of co. Kildare, 5¼ m. E by N of Naas. Area 3,435 acres. Pop. in 1831, 755; in 1841, 797. The E district contains Cupidstown hill. Alt. above sea-level 1,248 ft. The v. of K. stands on the road from Ballymore-Eustace to Rathcoole, 6½ m. NNE of Ballymore-Eustace. Pop. in 1841, 168.

KILTEELY, or Listeely, a parish 2 m. SW by S of Pallas-Green, co. Limerick. Area of the Coonagh section 1,655 acres; of the Small County section 1,529 acres. Pop. in 1841, 2,049.

KILTEEVAN, a parish 3 m. E of Roscommon, co. Roscommon. Area 8,411 acres, of which 959 acres are in Lough Ree. Pop. in 1841, 2,818.

KILTEEVOCK, a parish 5¼ m. W by N of Stranorlar, co. Donegal. Area 41,131 acres. Pop. 4,864.

KILTEGAN, a parish 3 m. NW of Hacketstown, partly in co. Carlow, but chiefly in co. Wicklow. Area of the Rathvilly section 815 acres; of the Talbotstown section 10,931 acres; of the Ballinacor section 4,203 acres. Pop. in 1831, 3,823; in 1841, 3,969. Ballinabarny Gap, on the E road from Donard to Hacketstown, has an alt. of 1,178 ft.; Slieveragh, on the N boundary, has an alt. of 1,560 ft.; and Carrig, in the interior, has an alt. of 1,845 ft.—Also a parish 1½ m. NW of Clonmel, co. Tipperary. Area 1,069 acres. Pop. in 1831, 190; in 1841, 283.

KILTENNEL, a parish 3½ m. E by N of Borris, co. Carlow. Area 11,170 acres. Pop. in 1831, 3,206; in 1841, 3,544. Mount Leinster, near the NE extremity, has an alt. of 2,610 ft.; Knockroe, on the E border, 1,746 ft.; Tomduff, on the N boundary, 1,308 ft.; the mountain of the Nine Stones, on the N boundary, 1,726 ft.—Also a parish on the coast of co. Wexford, 2¾ m. E of Gorey. Area 4,125 acres. Pop. in 1831, 1,137; in 1841, 1,279.

KILTERNAN, a parish 3½ m. SSE of Dundrum, co. Dublin. Area 3,165 acres. Pop. in 1831, 913; in 1841, 1,019. A mountain on the W border has an alt. of 1,618 ft.; and Prince William's Seat, on the S boundary, has an alt. of 1,825 ft.

KILTESKILL, a parish in co. Galway, 3¼ m. SE of Loughrea. Area of the Loughrea section 1,716 acres; of the Leitrim section 2,979 acres. Pop. 802.

KILTESKIN, a parish 2½ m. SSW of Cloyne, co. Cork. Area 1,145 acres. Pop. in 1841, 703.

KILTEYNAN, a parish 2½ m. SE of Fethard, co. Tipperary. Area 5,102 acres. Pop. in 1841, 1,296.

KILTHOMAS, a parish 3¾ m. NE of Gort, co. Galway. Area of the Loughrea section 7,125 acres; of the Kiltartan section 4,584 acres. Pop. 3,278.

KILTOGHART, a parish in co. Leitrim, containing the villages of K., Leitrim, Drumshambo, and Jamestown, and the greater part of the town of Carrick-on-Shannon. Area 30,494 acres, of which 1,717 acres are in Lough Allen. Pop. in 1831, 16,434; in 1841, 17,581. The N district is mountainous and waste, and attains in the summit of Slieve-an-Erin an extreme alt. of 1,922 ft.

KILTON, a parish in Somersetshire, 10½ m. NW by W of Bridgewater, on the Bristol channel. Area 1,560 acres. Pop. in 1831, 141; in 1841, 161.—Also a township in the p. of Brotton, N. R. of Yorkshire, 6 m. NE of Guisborough. Pop. 86.

KILTONANLEA, or Doonass, a parish in co. Clare, 3¼ m. S by W of O'Brien's Bridge, containing the v. of Cloonlara. Area 7,627 acres. Pop. 4,016.

KILTOOM, a parish 4¼ m. NNW of Athlone, co. Roscommon. Area 13,246 acres, of which 2,757 acres are in Lough Ree. Pop. in 1841, 4,150.

KILTOOMY, a parish 8½ m. SW of Listowel, co. Kerry. Area 5,866 acres. Pop. in 1841, 2,043.

KILTORA, a parish 4½ m. ESE of Tubbercurry, partly in co. Mayo, partly in co. Sligo. Area of the Mayo section 3,645 acres; of the Sligo section 3,238 acres. Pop. in 1831, 2,481; in 1841, 2,613.

KILTORAGHT, a parish 2¾ m. SE of Kilfenora, co. Clare. Area 3,091 acres. Pop. in 1841, 1,074.

KILTORMER, a parish and village 5½ m. WNW of Eyrecourt, co. Galway. Area 6,898 acres. Pop. in 1831, 2,133; in 1841, 2,089.

KILTRELLIG, a village in the p. of Kilballyhone, co. Clare, at the head of Kilbaha bay, 3 m. E by N of Loop-head. Pop. 304.

KILTRISK, a parish 5 m. NE of Oulart, co. Wexford. Area 3,684 acres. Pop. in 1841, 757.

KILTRUSTAN, a parish in co. Roscommon, containing on its S border a part of the town of Strokestown. Area 6,339 acres. Pop. in 1841, 3,938.

KILTUBRID, a parish 3 m. ESE of Drumshambo, co. Leitrim, containing the v. of Keshcarrigan. Area 15,608 acres. Pop. in 1831, 6,508; in 1841, 7,228. Slieve-an-Erin, on the NW border, has an alt. of 1,922 ft.

KILTULLAGH, a parish 4½ m. E by S of Athenry, co. Galway. Area of the Kilconnel section 1,171 acres; of the Athenry section 7,776 acres. Pop. in 1831, 3,069; in 1841, 3,244.—Also a parish 5¼ m. WSW of the town of Castlerea, co. Roscommon. Area 24,713 acres, of which 373 acres are in Lough O'Flyn. Pop. in 1831, 7,110; in 1841, 7,664.

KILTURK, a parish 5¼ m. WSW of Broadway, co. Wexford. Area 2,206 acres. Pop. in 1841, 912.

KILTYCLOGHER, a village in the p. of Cloonclare, co. Leitrim, 2½ m. NW of the head of Upper Lough Macnean. Pop. in 1841, 244.

KILVARNET, a parish 3¼ m. NW of Ballymote, co. Sligo. Area 6,696 acres. Pop. in 1831, 2,360; in 1841, 2,352. The principal hamlet is Ballinacarrow.

KILVE, a parish in Somersetshire, 11½ m. NW by W of Bridgewater. Area 1,680 acres. Pop. 240.

KILVEMNON, a parish 7 m. ENE of Fethard, co. Tipperary. Area 10,551 acres. Pop. in 1831, 4,530; in 1841, 4,983. The highest ground on the S boundary has an alt. of 1,088 ft. above sea-level.

KILVERSTONE, a parish in Norfolk, 1¾ m. ENE of Thetford, in the vale of the Thet. Area 2,540 acres. Pop. in 1831, 36; in 1841, 47.

KILVINE, a parish and village 6½ m. ESE of Claremorris, co. Mayo. Area 5,426 acres. Pop. 2,236.

KILVINGTON, a parish in Nottinghamshire, 7 m. S of Newark-upon-Trent. Area 900 acres. Pop. 56.

KILVINGTON (South), a parish in the N. R. of Yorkshire, 1 m. NNW of Thirsk. The township of South K. is included within the boundaries of the parl. borough of Thirsk. Area 2,610 acres. Pop. 402.

KILVOLANE, a parish in co. Tipperary, containing the town of Newport-Tip. Area 8,678 acres. Pop. in 1831, 3,656; in 1841, 4,254.

KILWATERMOY, a parish 2½ m. NE of Tallow, co. Waterford. Area 6,556 acres. Pop. 2,400.

KILWAUGHTER, a parish 1½ m. WSW of Larne, co. Antrim. Area 9,803 acres. Pop. in 1831, 2,016; in 1841, 2,164. Agnew's hill, in the W, a long range of precipitous basalt, has an extreme alt. of 1,556 ft. above sea-level.

KILWEILAGH, a parish 2½ m. SW of Castletowndelvin, co. Westmeath. Area 8,145 acres. Pop. in 1831, 1,315; in 1841, 1,229.

KILWHELAN, a parish 1½ m. S by E of Mitchelstown, co. Cork. Area 524 acres. Pop. 201.

KILWINNING, a parish and town in the district of Cunningham, Ayrshire. Area of p. 17½ sq. m. Garnock and Lugton waters intersect the p., the former SE and the latter SW, making a confluence about a mile below Eglinton-castle. Pop. in 1801, 2,700; in 1831, 3,772; in 1841, 5,251.—The town of K. is pleasantly situated on a gentle rising ground on the r. bank of the Garnock, 2½ m. from the nearest part of the frith of Clyde, and 2¾ m. NW of Irvine. It consists principally of one street, winged by some lanes, and of some rows of modern houses. With the exception of a few families, the whole pop., not only of the town, but of the landward part of the p., are of the working-classes, principally hand-loom weavers, shopkeepers, labourers, and colliers.

KILWORTH, a parish and town in co. Cork. Area of p. 5,458 acres. Pop. in 1831, 3,038; in 1841, 3,246.—The town of K. stands on the Dublin and Cork mail-road, near the l. bank of the Funcheon, and at the base of the Kilworth mountains, 2¼ m. NNE of Fermoy. It consists principally of one long street, and has some good houses. Pop. 1,772.

KILWORTH, a village in the township of Delaware, in Upper Canada, on the river Thames, 5 m. from Delaware. Pop. 160.

KILWORTH (North), or Kilworth-Abbas, a parish in Leicestershire, 5 m. E by S of Lutterworth. Area 2,230 acres. Pop. in 1831, 390; in 1841, 422.

KILWORTH (South), a parish in Leicestershire, 4½ m. ESE of Lutterworth, on the river Avon. Area 1,470 acres. Pop. in 1831, 437; in 1841, 478.

KIL-Y-BEBILL, or Cil-y-Bebill (Lower and Upper), a parish in Glamorganshire, 5 m. NNW of Neath, on the river Tawe. Pop. in 1841, 731.

KIL-Y-MAENLLWYD, or Cil-y-Maenllwyd, a parish partly in the co. of Pembroke, but chiefly in the co. of Carmarthen, 6½ m. NNE of Narberth. Pop. in 1831, 607; in 1841, 520.

KIM, or Keem, a river of Hindostan, in the prov. of Gujerat, and district of Baroch. It has its source in the mountains about 20 m. S of Naundode; runs WSW; and after a course of about 75 m. throws itself into the gulf of Cambaye, a little to the S of the mouth of the Nerbudda. Its embouchure is large, but is much impeded by sand-banks.

KIMADO, a town of the island of Celebes, on the W side of Tolo bay.

KIMANIS, a port of Borneo, in Borneo Proper, in N lat. 5° 8′, on a small river, 10 m. from its mouth, at the foot of a beautiful range of hills inhabited by Orang-Idan. It was ceded to the English by the sultan of Sulo, with the country extending from this point to Cape Kaniongan on the straits of Macassar. Cinnamon and cassia are abundantly produced in the vicinity.

KIMBERLEY, a parish and village of Norfolk, 3 m. NW of Wymondham, near the source of the Yare. Area 1,460 acres. Pop. in 1831, 138; in 1841, 148.—Also a hamlet in the p. of Greasley, Nottinghamshire, 6 m. NW by W of Nottingham. Pop. in 1831, 1,700; in 1841, 1,778.

KIMBERTON, a village of East Pikeland township, Chester co., in the state of Pennsylvania, U. S., 75 m. ESE of Harrisburg.

KIMBERWORTH, a township in the p. and 1½ m. W by N of Rotherham, W. R. of Yorkshire, in the line of the Sheffield and Rotherham railway. Area 2,940 acres. Pop. in 1831, 4,031; in 1841, 5,066.

KIMBLE, a township of Athens co., in the state of Ohio, U. S. Pop. in 1840, 762.

KIMBLE (Great and Little), two parishes in Buckinghamshire, distant respectively from Wendover 3½ and 3 m. WSW. Area of former, 2,570 acres. Pop. 489. Area of latter, 750 acres. Pop. 177.

KIMBOLTON, a parish of Herefordshire, 2½ m. NE of Leominster. Area 4,640 acres. Pop. in 1831, 719; in 1841, 715.—Also a parish and market-town 10 m. W by S of Huntingdon, and 63 m. NNW of London, on the Kym. Area 6,200 acres. Pop. in 1831, 1,584; in 1841, 1,634.

KIMCOTE, or Kilncote, a parish in Leicestershire, 3¼ m. NE by E of Lutterworth. Area 1,710 acres. Pop. in 1831, 490; in 1841, 552.

KIMEDY, a town of Hindostan, in the presidency of Madras, and prov. of the Northern Circars, dist. and 84 m. SSW of Gangam.

KIMERIDGE, or Kommeridge, a parish and village of Dorsetshire, in the island of Purbeck, 3½ m. SW by W of Corfe-Castle. Area 1,570 acres. Pop. in 1831, 124; in 1841, 154.

KIMELISZKI, a town of Russia in Europe, in the gov. and 29 m. ENE of Vilna, district and 27 m. SSW of Swieciany.

KIMITO, an island of Russia in Europe, in the Baltic, off the W coast of Finland, in the gov. of Abo, in N lat. 60° 24′, E long. 22° 10′. It is 12 m. in length from N to S, and 9 m. in medium breadth. It is granitic, with superstrata of limestone, and contains some iron. It contains several villages, one of the same name; and, inclusive of the adjacent islets, possesses about 6,500 inhabitants.

KIMMAGE, a hamlet in co. Dublin, 2 m. SW of Dublin castle.

KIMMAR'S PORT, a creek in Ardglass harbour, co. Down.

KIMMOLI. See Argentiera.

KIMO, a town of Senegambia, in the kingdom of Kasson, 35 m. SE of Kuniakary, on an affluent of the Senegal.

KIMPINA, a town of Turkey in Europe, in Lower Wallachia, in the district of Prahova, 23 m. NE of Tergovist, and 51 m. N of Bucharest, on the r. bank of the Rahova. It has several churches, a convent, and a custom-house; and is the entrepot for all the goods from Cronstadt. In the vicinity are extensive salt-mines, which furnish annually 150,000 quintals of that article. Bitumen is also found in large quantities in the locality.

KIMPOLUNG, a town of Turkey in Europe, in Upper Wallachia, capital of the district of Muscel, 36 m. ENE of Rimnik, in a fine valley, 6 m. S of the pass of Tarzburg. Pop. 4,000, chiefly Greeks. It covers a large area, and contains several Greek churches, a Catholic church and convent, two Greek convents, and a district school. It possesses an active trade, and has a large annual fair. It was formerly a place of great manufacturing importance. In the vicinity are the ruins of the Tselatia niagra or Black fortress.

KIMPOLUNG (Moldauisch), a town of Austria in Gallicia, in the circle and 60 m. SSW of Tschernowitz, and 32 m. ENE of Suczawa, on the r. bank of the Moldawa. Pop. 2,623.

KIMPTON, a parish in Hertfordshire, 4 m. WNW of Welwyn. Area 3,700 acres. Pop. in 1831, 944; in 1841, 945.—Also a parish in Southampton, 6 m. W by N of Andover. Area 1,810 acres. Pop. 391.

KIMPULNYAK, a village of Transylvania, in the comitat of Hunyad, to the W of the Vulkan-pass.

KIN, an island of Russia in Europe, in the gulf and near the coast of Livonia, 25 m. SW of Pernau, in N lat. 58° 6′, E long. 43° 45′. It is 8 m. in length, and about 4 m. in breadth.

KIN, a small river in China, in the prov. of Che-Keang, which flows into the inlet in which the town

of Ning-po is situated.—Also a river in the prov. of Kwang-tung, which has its source in the prov. of Kwang-si; runs SW; passes a town of the same name, and after a course of about 90 m. discharges itself into the gulf of Tonquin.

KINABATANGAN, the third most considerable river in Borneo, intersecting the N part of the island, and flowing by several mouths into the Sulo sea. It is said to be navigable to a greater distance than the Banjarmassing.

KINARA, a town of Persia, in Farsistan, 25 m. NE of Shiraz. In its vicinity are the ruins of the ancient Persepolis.

KINARAGHIRD, a village of Persia, in the prov. of Irak, 22 m. S by W of Tehran. A tract of arid salt desert, 20 m. in breadth, lies to the S of this place.

KINATSURO, a town of Japan, in the island of Nifon, prov. of Bitsiu, 135 m. W of Meaco.

KINAWLEY, a parish, partly in co. Cavan, but chiefly in co. Fermanagh. Area of the Cavan section, 15,346 acres. Pop. in 1831, 3,384; in 1841, 3,593. The summit of Legavragra in the E of this section has an alt. above sea-level of 1,279 ft.; of Cratty, in the centre, of 1,215 ft.; of Cuilcagh, toward the W, 2,188 ft.—The Fermanagh section has an area of 35,656 acres, of which 2,688 acres are in Upper Lough Erne. Pop. in 1831, 12,741; in 1841, 13,262. The principal islands belonging to K. in Lough Erne, named from the head of the lake downward, are Inisherk, Coney, Trasna, Rockan, Inishcrevan, Aghenisch, Inislaght, Inishlirroo, Doocarn, and Creaghnarourk. The hamlet of K. is 6 m. S by W of Enniskillen.

KINBOURN, a fortress of Russia in Europe, in the gov. of Taurida, district and 66 m. W of Alechki, on a narrow tongue of land, at the mouth of the Dnieper, opposite Otchakov. Its peninsular situation renders it a place of considerable strength; but the locality labours under the disadvantage of having no fresh water, and the nearest source of supply is Otchakov, at the distance of 11 m. Below the fortress are several houses occupied by fishermen and Russian peasants.. The adjacent anchovy and herring fisheries are highly productive. K. was ceded with the Crimea to Russia; but it has since been repeatedly attacked with success by the Turks. In 1787 it was the scene of one of Suvarov's memorable victories.

KINCARDINE, a parish in the cos. of Ross and Cromarty, above 35 m. in length, and from 5 to 20 m. in breadth. It consists of a number of straths or glens, in which run several rivulets, and of mountains covered with fine soft heath, and affording excellent sheep-walks. The coast along the frith of Dornoch, which bounds the p. on the N and E, is flat and sandy. The v. of K. is situated on the coast, with a small harbour, about 14 m. W of Tain. Pop. in 1831, 1,887; in 1841, 2,108.—Also a parish in the district of Menteith, about the middle of the S verge of Perthshire. It consists of two parts, both bounded on the S by the river Forth, and detached from each other, at the average distance of 2½ m., by the S part of the p. of Kilmadock. The surface of the p. consists, over two-thirds of its extent which stretch upwards from the Forth, of carse-lands, and is almost everywhere nearly a dead level. Pop. in 1831, 2,456; in 1841, 2,232.—Also a considerable village and seaport on the N shore of the frith of Forth, in the p. of Tulliallan, in the S detached part of Perthshire, 5 m. E from Alloa. The trade of the port extends to the shores of the Baltic, to those of the Mediterranean, and to the West Indies and America; but it consists chiefly in the exportation of coals to places not far distant, and in the importation of Russian and Swedish produce. Steam-vessels ply across the frith. Pop. in 1841, 2,875.—Also a decayed village in the p. of Fordoun, in Kincardineshire, anciently the cap. of the co. to which it gives its name.

KINCARDINESHIRE, — usually called the MEARNS,—a county on the NE coast of Scotland; bounded on the N by Aberdeenshire, from which in a great measure it is divided by the river Dee; on the E by the German ocean; and on the S and W by Forfarshire, from which it is divided by the N. Esk. The coast-boundary extends south-westward for 32 m., being the greatest length of the co.; and its greatest breadth from E to W is 24 m. Square area 243,444 acres, of which 1,280 are covered with water; 120,000 consist of cultivated land, woodland, improveable moor, &c.; and the remainder of mountains, hills, and general waste.

General divisions.] The co. is locally divided into 4 districts,—the Grampian, the Dee-side, the valley or howe of the Mearns, and the Coast-side. The Grampian or mountain-district consists of the eastern termination of what is popularly called the lower chain of that mighty rampart of ancient independence, the Grampian range, a sterile, rugged, dreary region, stretching from W to E through the whole breadth of the co.—The Dee-side district extends from the sea W along the S bank of the Dee for about 13 m., and then along both banks 9 or 10 m. further, comprehending also the valley of the Feugh.—The Howe district is a low, champaign, and highly cultivated country, constituting the E termination of the great strath or valley of Strathmore, and presenting a square area of about 32,000 acres.

Rivers.] Besides the Dee and the North Esk,—although they can scarcely with propriety be said to belong to this co.,—no streams meriting the name of rivers have their course through K. The principal streams falling into the German ocean are the Cowie, the Carron, and the Bervie. Those falling into the Dee are the Sheeoch and the Aven. The only considerable stream falling into the North Esk within this co. is the Luther.

Minerals and soils.] The mineral treasures of the co. are of no great value. Over the whole Grampian district granite is the prevalent stone. Sandstone is the chief quarry in the Howe district. Part of the granite exported from Aberdeen is taken from the hill of Nigg in this co. At Whistleberry millstones of excellent quality are made from the pudding-rock found on the coast. Native iron has been found. The Scottish topaz, or Cairngorm, is sometimes found amongst the Grampian streams; and some of the caverns on the coast near Stonehouse abound with stalactites.—The soils are very various. The Grampian district may in general be said to be as devoid of soil as of vegetation. N of the Dee the soil consists chiefly of decomposed granite mixed with a portion of moss, and is not naturally very productive.—The average heat on the E coast, in N lat. 56° 58′, and 150 ft. above sea-level, between the years 1805 and 1816, was 43° 8′; the average greatest heat 64° 4′. The average number of fair days in the year was 212.

Agriculture.] Agriculture in this co. has made rapid progress during the present cent. The most approved systems of husbandry are adopted, and the soil is cultivated in a style equal to any in Scotland. The greater part of the arable land produces wheat, barley, bere, oats, pease, beans, clover, turnips, and mangel-wurzel. The stock of cattle some years since was estimated at about 25,000 head, a fourth part of which were milch cows, and nearly as many calves. The sheep, fed principally in the extensive pasturages of the mountain-districts, are generally of the black-faced species.—There are upwards of 80

separate estates in this co.: some of the largest of these have long been in the same families. Two or three of them are valued at a rental of more than £5,000 per annum; nine or ten from £3,000 to £5,000; about twenty from £1,000 to £3,000; twenty-three from £500 to £1,000; and the remainder at less than £500. Cultivated farms are in general about 200 acres in extent, but many are far smaller. On the contrary, pasturage farms in the hilly districts are, as usual, much larger.

Manufactures.] The manufactures of K. are not very extensive. Duck and dowlas linen-weaving is carried on at Bervie for merchants in Aberdeen, Dundee, and Arbroath: there are two flax spinning-mills in Bervie. About 230 hands are employed in the linen manufacture in Benholme; and at Auchinblae flax is spun into yarn, and manufactured into brown linen: about 60 hands are employed at the spinning-mill, and annually turn out 70,000 spindles of spun yarn, value £10,000. At Laurencekirk the well-known snuff-boxes are still manufactured. Kelp is produced on the coast; and in the dairies, butter and cheese are made to a considerable extent beyond what the home supply requires. The principal exports are grain, potatoes, cattle, pork, butter, eggs, whisky, ale, herrings, &c.: imports,—lime, coals, timber, slates, and salt. Foreign produce is principally supplied through Aberdeen, and grain is chiefly exported through Montrose, but also at Stonehaven and Gourdon.

Statistics.] There are 18 parishes, and parts of 3 others, in this co. The number of its parochial schools in 1846 was 22, conducted by 22 teachers, and attended by a maximum of 1,230 scholars; of its non-parochial, 85, conducted by 86 teachers, and attended by a maximum of 2,418 scholars. Pop. in 1801, 26,349; in 1811, 27,439; in 1821, 29,118; in 1831, 31,431; in 1841, 33,075; in 1851, 34.743. There are 7 or 8 small towns in the co., besides a few inland villages, and 13 or 14 fishing-villages, scattered along the coast. The towns are Stonehaven, the co. town, Bervie or Inverbervie, a small borough—the only royalty in the co.—John'shaven, Laurencekirk, Fettercairn, Fordoun, Auchinblae, &c., Drumlithie, Marykirk, and St. Cyrus, are the other principal villages inland. Of the fishing-villages Findon is the most noted.—Previous to the Union this co. returned 2 members to parliament; it now returns 1 member. Constituency in 1840, 922; in 1848, 875. Bervie unites with Montrose, Aberdeen, Brechin, and Aberbrothwick, in also returning 1 member to parliament.

KINCARDINE-O'NEIL, a parish in Aberdeenshire, bounded on the S by the Dee. Area 30 sq. m. Pop. in 1831, 1,936; in 1841, 1,857.

KIN-CHENG, a small port of Corea, in the prov. of Keang-guan, 105 m. E of Han-yang, on the Yellow sea.

KINCHI-KAREM, or Beshi, a town of Chinese Turkestan, 30 m. NE of Kashgar, on one of the head-streams of an affluent of the river of that name.

KINCHIN-JUNGA, or Kunchin-jinga, the loftiest known summit in the Himalaya, on the N frontier of Sikhim, in about N lat. 27° 43′, E long. 88° 11′. Alt. 28,177 ft. It forms the point of divergence whence a spur of the Himalaya, known as the Singalelah ridge, shoots out to the southward from the main chain, dividing the upper basin of the Rungit, an important affluent of the Tista, on the E, from that of the Tambur, on the W. It is about 30 m. direct distance SE of the Kanglachan pass; and 25 m. SSW of the Lachen pass.

KIN-CHU, a district and town of China, in the prov. of Kwang-tung, div. and 39 m. WNW of Leenchu-fu, in N lat. 21° 58′, E long. 109°, on the r. bank of the Kin-keang.—Also a district and town in the prov. of Leaou-tung or Shing-king. It is one of the 8 cities of the prov.

KINCLAVEN, a parish of Perthshire, in the district of Stormont, comprising an area 4¾ m. in extreme length, and 3 m. in extreme breadth, circled in upwards of one-half of its entire frontier by the Tay. Pop. in 1831, 890; in 1841, 880.

KINCON, a village in the p. of Kilfian, co. Mayo. Area 5 acres. Pop. in 1841, 125.

KIND, a haerad of Sweden, in the S part of the prefecture of Elfsborg, containing 33 parishes. Ullasioe is one of its chief places.—Also a haerad in the E part of the prefecture of Linkoeping.

KINDACHA, or Kenducha, a town of Sudan, in Bornou, 80 m. S of Kouka. Pop. 20,000.

KINDBERG, a town of Styria, in the circle and 12 m. NE of Bruck, on the r. bank of the Mürz. Pop. 650. It has a castle, and possesses numerous iron-works.

KINDELBRUCK, a town of Prussia, in the prov. of Saxony, regency and 21 m. N of Erfurt, circle and 5 m. NE of Weissensee, on the r. bank of the Wipper. Pop. in 1837, 1,666. It has a paper-mill and several tanneries.

KINDER, a hamlet in the p. of Glossop, Derbyshire, 4½ m. N of Chapel-en-le-Frith. Pop. in 1831, 104; in 1841, 130.—Also a lake in the SE part of the p. of New-Abbey, Kirkcudbrightshire, 1¼ m. S of the v. of New-Abbey.

KINDERHOOK, a central county in the state of Missouri, U. S., comprising an area of 520 sq. m., bounded on the N by Osage river. Its capital is Oregon.—Also a township of Columbia co., in the state of New York, U. S., 19 m. S of Albany. Its surface is diversified, and is drained by a creek of the same name, an affluent of Hudson river. The soil, consisting of sandy loam and clay, is fertile and well-cultivated. Pop. in 1840, 3,512. The village is in a plain 5 m. E of Hudson river. Pop. 1,400.

KINDERTON with HULME, a township in the p. and 2 m. E of Middlewich, co. of Chester. Area 1,510 acres. Pop. in 1831, 495; in 1841, 555.

KINDING, a town of Bavaria, in the circle of the Ober-Pfalz, presidial and 5 m. SW of Beilngries, and 34 m. W of Ratisbon, at the foot of a mountain of the same name, on the l. bank of the Altmühl. Pop. 540.

KINDUR. See Gwydir.

KINEAGH, a parish partly in the co. of Kildare, and partly in that of Carlow, 3 m. W by S of Rathvilly. Area 6,297 acres. Pop. in 1841, 1,580.

KINE-BALLU, or Keeney-Ballo, a mountain of Borneo, near the N extremity of the island, in a district of the same name, in N lat. 6° 10′, and E long. 116° 40′.

KINEL, a river of Russia in Europe, in the gov. of Orenburg, which has its source in the district and 81 m. E of Bogoroslave, runs W past that town, and, after a course of 180 m., enters the gov. of Simbirsk, and joins the Samara, on the r. bank, near Alexieievsk. It is remarkable for the limpidity of its waters.

KINELLAR, a parish in the district of Mar, Aberdeenshire, comprising an area of 4,000 acres, bounded on the N by the Don. Pop. in 1841, 483.

KINESHMA, a town of Russia in Europe, capital of a district in the gov. and 56 m. ESE of Kostroma, and 40 m. WNW of Iourievetz-Povolskoï, on the r. bank of the Volga. Pop. 2,000. It has 5 churches, and possesses extensive manufactories of fine linen, sail-cloth, paper, &c. A fair is held once a-year.

KINETON, or Kington, a parish and market-town in Warwickshire, 9 m. SSE of Warwick, and

83 m. NW of London, on the Arrow. Area 3,810 acres. Pop. in 1831, 1,102; in 1841, 1,248.

KINFARE, or KINVER, a parish and village in Staffordshire, 4½ m. NNE of Kidderminster, on the Stour, and intersected by the Staffordshire and Worcestershire canal. Area 8,790 acres. Pop. in 1831, 1,831; in 1841, 2,207.

KINFAUNS, a parish at the W extremity of the Carse of Gowrie, Perthshire, 5 m. in length, and from 2 to 3 m. in breadth, bounded on the S and W by the Tay. Pop. in 1831, 732; in 1841, 720.

KING, a township of Upper Canada, in the Home district, intersected by Holland river, and bordered by a considerable extent of swamp. It is to some extent hilly, but possesses some fine farms. Pop. in 1842, 2,625.

KING, a district and town of China, in the prov. of Gan-hwuy, div. of Ning-kwo-fu, in N lat. 30° 46′, and E long. 118° 22′.—Also a river which has its source in the prov. of Kan-suh, to the W of Ping-leang, runs first E, then SE, enters the prov. of Shen-se, and, after a course of about 210 m., joins the Hoei-ho, or Wei-ho, on the l. bank, 24 m. ENE of Segan-fu. Its principal affluent is the Ma-lien.

KING, a county of New South Wales, bounded on the N by Bathurst co., from which it is separated by the Lachlan river; on the NE by the co. of Georgina, from which it is divided by the rivers Lachlan and Crookwell; on the E it is bounded by the co. of Argyle; and on the S it is separated from the co. of Murray by Gundaroo creek and Yass river; its W boundary is formed by Bowning hill and Boorowa river. It comprises a total area of 1,781 sq. m., or 1,159,840 acres; and had a pop. in 1846 of 1,665 individuals. The Cullarin range runs along its E frontier, and it is intersected by numerous hills, the principal summits of which are Mounts Darling, Narrawa, Dixon, Chatou, and Mundonen. Besides the rivers already mentioned, it is watered by the Narrawa, an affluent of the Lachlan. The stock of the county is estimated at 1,339 horses, 15,792 cattle, 107,509 sheep, and 792 pigs. In conjunction with the counties of Georgina and Murray, K. returns one member to the legislative assembly.—Also an inlet of Australia Felix, in the district of Gipp's Land. It receives Thomson, Riley, and M'Arthur rivers.—Also a river of Van Diemen's Land, which flows W into Macquarie harbour.—Also a river of W. Australia, in the co. of Plantagenet, which flows E into Oyster harbour, King George sound.—Also a river in Australia Felix, in the district of Murray, which has its source in the Australian Alps, runs NW, and joins the Ovens or Burwang river, an affluent of Murray river.—Also a bay of Van Diemen's Land, in the co. of Glamorgan. It forms a branch of Oyster bay, and opens on the N into Great Swan port.

KING, a mountain of Australia Felix, 20 m. NE of Melbourne.

KING AND QUEEN, a county of the state of Virginia, U. S., comprising an area of 335 sq. m., between Piankatank river on the NE and Mattapony river on the SW. Pop. in 1840, 10,862, of whom 5,937 were slaves. Its capital, which bears the same name, is in a plain ¾ of a mile from Mattapony river. Pop. 60.

KINGBORO, a parish in the hundred of Hobart-town, county of Buckingham, Van Diemen's Land, bounded on the E by the river Derwent, and deeply indented in the S by North-West Bay.

KINGARTH, a parish in the co. and island of Bute, 6½ m. in length, and 2½ m. in average breadth, and comprising an area of 8,400 acres. Pop. 931.

KING CHARLES' SOUTH LAND. See EASTERN TIERRA DEL FUEGO.

KING-CHU, a district and town of China, in the prov. of Chih-le, div. and 57 m. S of Hokeën-fu, in N lat. 37° 46′ 15″, and E long. 116° 22′. It contains 3 triumphal arches, 1 pagoda 3 stories in height, and an ancient tower.

KING-CHU-FU, a division and town of China, in the prov. of Kan-suh. The div. comprises 3 districts. The town is 216 m. ESE of Lan-chu, on the r. bank of the King-ho, in N lat. 36° 3′, and E long. 107° 44′ 30″.—Also a division and town in the prov. of Hu-pih. The div. comprises 8 districts. The town is 148 m. W of Wu-chang-fu, on the l. bank of the Yang-tse-keang, in N lat. 30° 26′ 40″, and E long. 112° 3′ 50″. It is large and flourishing, and well-built. It is divided into two parts, one of which is occupied by Tartars.

KINGCOMBE (OVER and NETHER), a tything in the p. of Toller Porcurum, Dorsetshire, 5 m. E by S of Beaminster. Area 1,120 acres. Pop. 95.

KING EDWARD, or KENEDAR, a parish in Aberdeenshire, comprising an area of about 28 sq. m., bounded on the NW by Banff, and on the W by Alvah, from which it is partly divided by the Deveron. Pop. in 1831, 1,967; in 1841, 2,492.

KING-FU, a district and town of China, in the prov. of Sze-chuen, div. of Seu-chu-fu.

KINGERBY, a parish and village in the co. of Lincoln, 4 m. NW of Market-Raisen, on a branch of the Ancholme. Area 1,510 acres. Pop. 106.

KINGFIELD, a township of Franklin co., in the state of Maine, U. S., 59 m. NNW of Augusta, watered by Seven Mile river. Pop. in 1840, 671.

KING GEORGE, a county of the state of Virginia, U. S., comprising an area, generally hilly, of 254 sq. m., bordered on the NE by the Potomac, and on the SW by the Rappahannock. It possesses considerable diversity of soil. Pop. in 1840, 5,927, of whom 3,382 were slaves. Its capital, which bears the same name, is 82 m. NNE of Richmond. Pop. 60.

KING GEORGE, a saddle-shaped mountain in New South Wales, in Cook co., at the head of Grose river, 55 m. from Sydney, from which it is visible in a WNW direction.—Also a group of rocks off the NE coast of Dorset co., Van Diemen's Land, in N lat. 40° 58′, E long. 148° 27′ 30″.

KING GEORGE'S ISLANDS, a group of islands, two in number, in the Low archipelago, South Pacific, in S lat. 14° 30′, W long. 146° 30′. They exhibit considerable fertility, and abound with trees, particularly the cocoa-palm. The coasts are covered with coral, and afford pearl-oysters of the largest size. The natives live in low huts covered with branches of the cocoa-palm; and the fruit of that tree forms their chief nutriment. They construct canoes 32 ft. in length, and use sails in navigating them. These islands were discovered by Byron in 1765, and were again visited by Cook in 1773.

KING GEORGE'S SOUND, an arm of Norfolk bay, Van Diemen's Land, on the W side of Forrestier's peninsula. It receives a river of the same name.

KING GEORGE'S SOUND, or PORT OF KING GEORGE THE THIRD, an extensive inlet on the S coast of Western Australia, in the co. of Plantagenet, extending between Cape Vancouver on the N, and Bald Head on the SW. It is a good road-stead; but, with the exception of that afforded by Michaelmas and Breaksea islands, possesses little shelter towards the E. It contains, however, two harbours, both land-locked, Oyster bay on the N, and Princess Royal bay on the NW. The former receives the Kalagan and King rivers; and its shores are fertile, and to some extent cultivated. The town of Albany is situated on the former, but its environs possess little depth of soil. The soil along the greater extent of the country

around the sound consists of a calcareous crust with a substratum of granite, and except near the sea exhibits little fertility. The trees almost all belong to the eucalyptus. Kangaroos and lizards are common, and the shores abound with fish. The inhabitants resemble in almost every particular those of the E part of the continent.

KING GEORGE THE THIRD (Archipelago of), or Sitka Islands, a group of islands in the North Pacific, off the W coast of North America, and towards the SE of Russian America, extending between 56° 9′ and 58° 18′ N lat., and between 134° 21′ and 136° 18′ W long. It is separated from the continent on the N by Cross sound; and by Chatham sound on the E from the Admiralty islands. The islands of which it consists are divided from one another by only narrow channels, and they consequently present but little discontinuity. The principal of the group are Sitka on the N, on which is the Russian establishment of New Archangel and Baranov. Their greatest breadth, which is towards the N, is 54 m. They were first explored by Vancouver, and were named by him after George the Third.

KINGHAM, a river of Lower Canada, an affluent of the Ottawa.

KINGHAM, a parish in Oxfordshire, 4 m. WSW of Chipping-Norton, on the Evenlode, by which it is divided on the W from Gloucestershire. Area 1,540 acres. Pop. in 1831, 504; in 1841, 555.

KINGHORN, a parish in Fifeshire, on the shore of the frith of Forth, about 4½ m. in length from SE to NW. Pop. in 1801, 2,308; in 1831, 2,579; in 1841, 2,935.—The ancient royal burgh of K. occupies the face of a sloping ground directly opposite Leith, 3 m. S of Kirkcaldy. It possesses a small and not very good harbour, and though nominally enjoying the importance of being the seat of a ferry across the frith of Forth to Leith and Newhaven, all boats engaged in this thoroughfare land at Pettycur, a hamlet, with a more accessible port, lying about a ½ m. to the W. The trade of K. is chiefly connected with the spinning and preparation of lint for the linen manufacturers of Fifeshire. The town possesses two large lint-mills and spinning establishments. The annual revenue of the burgh is about £670.—The burgh joins with Kirkcaldy, Dysart, and Burntisland, in electing a member of parliament. Parl. constituency, in 1840, 34; in 1848, 32. Pop. in 1821, 1,500; in 1851, 1,568.

KING-KI, a district and town of China, in the prov. of Keang-su, div. of Chang-chu-fu.

KING-KI, or King-ki-tao, a prov. of the Corea, near the centre of the peninsula. Its capital is Han-yang.

KING-KWEI JIN, or Kon-kinin, a town of China, on the W coast of the island of Great Luchu, in the archipelago of that name, in the prov. of Shan-pi, and 33 m. NNE of Zienly. Its port is capable of receiving small vessels only.

KINGLASSIE, a parish in Fifeshire, 5 m. in length, and 2 m. in average breadth, bounded on the N by the Leven. Pop. in 1831, 958; in 1841, 1,155.

KINGMAVAR, or Kungawar, a town of Persia, capital of a district in Kurdistan, 60 m. ENE of Kermanshah, on a hill in a fine valley watered by a river of the same name, an affluent of the Kherkah. Pop. 1,200. The houses are built of mud or brick. This town is supposed to occupy the site of the ancient *Concobar*, and contains the ruins of a magnificent temple dedicated to Diana.

KINGMOOR, an extra-parochial liberty in Cumberland, 2 m. NNW of Carlisle, on the Eden. Area 1,110 acres. Pop. in 1831, 426; in 1841, 412.

KING-MUN-CHU, a division and town of China, in the prov. of Hu-pih. The div. comprises 2 districts. The town is 138 m. WNW of Wu-chang, on an affluent of the Han-keang, in N lat. 31° 5′, and E long. 112° 5′.

KING-NING, a district and town of China, in the prov. of Che-keang, div. of Chu-chu-fu, in N lat. 27° 56′, and E long. 119° 40′.

KINGOLDRUM, a parish in the SE extremity of the Grampian district of Forfarshire. The surface on the N is mountainous, rising in Catlaw, to an alt. of 2,264 ft. above the level of the sea. On Cromby-burn, 4 m. W of Kirriemuir, stands the hamlet of K. Pop. in 1831, 444; in 1841, 440.

KINGROAD, a roadstead on the coast of Somersetshire, below the mouth of the Avon.

KINGS, a county in the state of New York, U. S., in the W extremity of Long Island, comprising an area of 76 sq. m. It is intersected from E to W by a range of hills, and possesses a rich and well-cultivated soil. It is crossed by Long Island railroad, and has, in the S, Gravesend and Jamaica bays. Pop. in 1840, 47,613. Its capital is Brooklyn.

KINGSBARNS, a parish in Fifeshire, comprising an area of about 3,057 Scots acres, bounded on the E by the German ocean. Pop. in 1841, 968.

KINGSBOROUGH, a village of Johnstown township, Fulton co., in the state of New York, U. S., 50 m. NW of Albany. Pop. in 1840, 300.

KINGSBRIDGE, a parish and market-town of Devonshire, 33 m. SSW of Exeter, and 208 m. WSW of London. Area of p. 150 acres. Pop. in 1831, 1,586; in 1841, 1,564. The town is on Salcombe-haven, an inlet of the English channel, navigable for vessels of 70 tons burthen.

KING'S BRIDGE, a village of New York co., in the state of New York, 13 m. N of City Hall, N. Y., at the N end of New York or Manhattan island, near Spuyten-Duyvel creek, which is here crossed by a bridge.

KINGSBURY, a parish in Middlesex, 8½ m. NW by W of London, on the Brent, and on the London and Birmingham railway. Area 1,700 acres. Pop. in 1831, 463; in 1841, 536.—Also a parish in Warwickshire, 5 m. N by E of Coleshill, on the Tame, and intersected by the Bristol and Derby railway. Area 9,070 acres. Pop. in 1831, 1,314; in 1841, 1,322.

KINGSBURY, a township of Piscataquis co., in the state of Maine, U. S. Pop. in 1840, 227.—Also a township of Washington co., in the state of New York, 58 m. N of Albany. It has a generally level surface, bordered on the SW by Hudson river, and drained by a branch of Wood creek. Its soil consists of sandy loam and clay. Pop. 2,773. The village, at the above date, consisted of about 20 dwellings.

KINGSBURY-EPISCOPI, or East Kingsbury, a parish in Somerset, 6 m. E by S of Langport, on the Carey. Area 3,890 acres. Pop. in 1841, 1,779.

KING'S CAPLE, a parish of Herefordshire, 4 m. NW by N of Ross, and nearly encircled by the Wye. Area 1,720 acres. Pop. in 1831, 280; in 1841, 299.

KINGSCLERE, a parish and market-town in Hants, 31 m. NNE of Southampton. Area 17,240 acres. Pop. in 1831, 3,151; in 1841, 3,389. The town is on the edge of a ridge of hills near the N extremity of the county.

KING'S CLIFFE, a parish in Northamptonshire, 6 m. NNW of Oundle. Area 4,460 acres. Pop. 1,278.

KINGSCOTE, a parish of Gloucestershire, 5 m. NW by W of Tetbury. Area 1,990 acres. Pop. in 1831, 276; in 1841, 295.

KINGSCOTE, a town of Kangaroo island, South Australia, on a tongue of land between the Bay of Shoals and Seals' bay. It has a good harbour, and

is the principal settlement of the South Australian company.

KING'S COUNTY, an inland county on the W side of the middle division of the Irish prov. of Leinster; bounded on the N by co. Westmeath; on the NE by cos. Meath and Kildare; on the E by co. Kildare; on the S by Queen's co. and co. Tipperary; and on the W by cos. Tipperary, Galway, and Roscommon. Its general outline is that of a very slender and compressed oblong, extending from E to W, and of a projection to SSW, which extends 17 m. in a somewhat tapering manner almost to a point. The greatest length of the co., from the most E point of the p. of Monasteroris, to the Shannon a ½ m. below Shannon-bridge, is 35½ m. Its breadth, from the junction point of cos. Meath and Westmeath, and King's co., to the S boundary SSW of Portarlington, is 11½ m. Its area comprises 337,256 acres of arable land, 145,836 of uncultivated land, 8,258 of continuous plantations, 902 of towns, and 1,733 of water.—The aggregate surface of King's co. closely resembles that of Kildare. King's co., however, cannot boast any such rich and beauteous valley as that of the Liffey. The W declivities of the Devil-Bit mountains, which extend along the E margin of the S part of the great SSW projection, have a very slender breadth within King's co., and nowhere present a higher summit than that of Knockbane, 555 ft. above sea-level. The W lateral half of the range of the Slievebloom, situated within King's co., extends 9½ m. NNE; with a mean breadth of only about 2¼ m. Its principal summits, named in a series from S to N, are one of 757 ft. of alt. above sea-level; one of 1,332 ft.; Farbreague of 1,411 ft.; Arderin 1,733 ft.; Carrole-hill 1,584 ft.; one of 1,691 ft.; one of 1,602 ft.; Black Gap of 1,293 ft.; and Spink of 1,087 ft. The only passages through the Slievebloom range are the Black Gap and the Gap of Glandine. Excepting the small aggregate proportion of the W declivities of the Slievebloom mountains, very nearly the whole of the enormous surface of 145,836 acres of uncultivated land within the co. consists of unreclaimed bogs.

Waters.] The Shannon, over the whole course of its connection with the co., is navigable, and offers valuable facilities of communication N to the great lakes of its upper basin, and S to Limerick and the ocean. The Blackwater drains a district of bogs in the extreme NW, and pursues a WSW course to the Shannon, 1½ m. below Shannon-bridge. The Brosna comes in from Westmeath, and runs about 14 m. SW and WSW through King's co. to the Shannon at Shannon harbour. The Clara, the Clodagh, the Silver river, the Little Brosna, the Borris-o'-Kane, are all within the basin of the Shannon in this co. The principal streams of the Boyne district are the Boyne itself on the NE boundary, and its Mengagh and Yellow river affluents; and the principal streams of the Barrow district are the Barrow itself on the S boundary, the Little Barrow chiefly on the E boundary, and the Feagile S through the interior.—The principal lakes within the co. are Lough Boora of 107 acres in area; Lough Annaghmore of 111 acres; Lough Pallas of 82 acres; Lough Fin of 186 acres; Lough Nashade of 16 acres.—The Grand canal traverses the co. W from end to end; comes in from co. Kildare at an elevation of 261 ft. above sea-level, and descends to the Shannon at the embouchure of the Brosna; sends off a small branch to Edenderry, and a longer one toward Kilbeggan; touches the towns of Philipstown and Tullamore; and affords to all the central and N districts of the co. its facilities of communication E to Dublin, and W to the Shannon and to Ballinasloe.

Minerals.] A formation of clay slate and greywacke slate occupies the summit and higher declivities of the Slievebloom mountains. A formation of yellow sandstone constitutes all the King's co. section of the Devil-Bit mountains, and also all the surface parts of the Slievebloom mountains not occupied by the clay slate. Granular limestone, of the quality of marble, occurs in the p. of Clonmacnoise. Flœtz limestone, part of the vast central flœtz limestone field of Ireland, occupies all the great remainder of the co., forming the substratum of all the bogs, and directly or indirectly constituting both the soil and the subsoil of the cultivated lands.—The prevailing soil of the arable parts of the vast limestone district, is either a shallow gravelly loam or a deep moorish gravel. Bogs reclaimed with the profuse application of limestone gravel are remarkably luxuriant; yet they are two or three weeks later than the other lands in maturing cereal crops.

Climate.] The configuration of surface, and distance from the sea, occasion the climate of this co. to be much less moist than that of many other districts in Ireland. The average narrowness of most of the county from N to S, and the occupancy of much of the broad part with the Slievebloom mountains, prevent any perceptible variation among different districts in seed-time and harvest.

Agriculture.] The baronies of Upper and Lower Philipstown may in most respects be regarded as a fair agricultural specimen of all parts of the co. except the mountains and the SSW low grounds which they flank. The farms of these baronies average about 24 English acres; and pay a rent of from 15s. to £2 2s. per Irish acre. The produce of wheat on the poorest lands which produce it is 7 barrels of 20 stones per Irish acre; on good lands it averages 12 barrels. The small farmers choose to remain quite ignorant of any means of improvement; and many of them never saw any implements of husbandry except the rudest, or heard the name of many useful plants commonly cultivated by good farmers. They keep each from one to six sheep; and the women spin the wool into yarn, and pay 1s. per yard for the manufacturing of it into a kind of frieze which they use for clothing. In 1841, the number of farms of from 1 to 5 acres in extent within the rural districts of the co., was 5,657; of from 5 to 15 acres, 4,502; of from 15 to 30 acres, 1,374; and of upwards of 30 acres, 1,213. The number of acres under crop in 1848 was 137,565: viz., wheat, 23,251; oats, 35,646; barley, bere, and rye, 8,273; pease and beans, 891; potatoes, 20,000; turnips, 8,737; mangel-wurzel, carrots, and cabbage, 1,178; flax, 101; meadow and clover, 39,487.—Most of the black cattle are of the Irish long-horned breed; but English or half-bred short-horned bulls are very common. In 1841, the live stock, with their respective estimated value, consisted of 13,165 horses and mules, £105,320; 3,560 asses, £3,560; 33,916 cattle, £220,454; 66,247 sheep, £72,817; 23,374 pigs, £29,218; and 201,295 poultry, £5,032. Total estimated value, £436,455.—In 1841, the continuous woods within the co. consisted of 8,258 acres. The total number of detached trees was equivalent to 2,927 acres.

Trade and manufactures.] The average annual aggregate of sales of grain at the principal market-towns within the co. during the 10 years terminating in 1836, was as follows—counting 26 stones to the barrel of wheat, and 16 to the barrel of barley and of oats:—at Tullamore, 45,000 barrels of wheat, 35,000 of oats, and 20,000 of barley; at Philipstown, 100 of wheat, 9,000 of oats, and 6,000 of barley; at Clara, 16,000 of wheat, and 16,600 of oats; at Ferbane, 60,000 of wheat, 30,000 of oats, and 300 of barley; at Cloghan, 5,800 of wheat, and 300 of oats; at Banagher, 25,000 of wheat, 40,000 of oats, and 1,000 of barley; at Birr, 5,600 of wheat, 15,100 of

oats, and 13,000 of barley; and at Edenderry, 20,000 of wheat, 30,000 of oats, and 25,000 of barley.—In 1841, there were in the county 121 millers, 12 brewers, 11 distillers, 55 pig-jobbers, 283 huxters and provision-dealers, 5 tobacconists, 13 flax-dressers, 68 carders, 927 flax-spinners, 2 cotton-spinners, 105 wool-spinners, 2,619 spinners of unspecified classes, 480 weavers of unspecified classes, 10 tanners, 163 brogue-makers, 780 boot and shoe makers, 17 mill-wrights, 456 blacksmiths, 10 gunsmiths, 23 coach and car makers, 29 saddlers, 21 chandlers and soap-boilers, and 5 tobacco-pipe makers.—We have already noticed the advantages enjoyed in connection with the transit of the Grand canal from end to end of the co. The co. surveyor had under his charge, in 1842, 729 m. of road.

Statistics.] Pop. in 1792, 74,500; in 1813, 113,226; in 1821, 131,088; in 1831, 144,225; in 1841, 146,857; in 1851, 112,875, showing a decrease of 23 per cent. since 1841. The following statistics are all of 1841. Families, 26,683. Houses inhabited, 24,534. Families residing in first-class houses, 757; in second-class houses, 6,083. Families employed chiefly in agriculture, 17,582; in manufactures and trade, 4,461; dependent chiefly on property and professions, 1,086; on the directing of labour, 8,103; on their own manual labour, 16,738. Clergymen of the Established church, 35; Roman Catholic clergymen, 50. In 1824 the number of schools in the co. was 254; of scholars, 10,139. At the close of 1842, the National Board had in operation within the co. 46 schools, attended by 2,630 male and 2,838 female scholars. In Sept. 1848 there were 67 National schools in operation, attended by 7,558 scholars. The number of persons committed for public offences, in 1842, was 559; in 1848, 1,037. The constabulary force consists of 329 men. There are 3 stipendiary magistrates. The county-gaol is at Tullamore, and a bridewell is at Birr. The assizes are held at Tullamore; quarter-sessions at Tullamore, Birr, and Philipstown. The annual amount of property valued for the poor-rate is £241,221.—The only boroughs which ever existed in the co. are Philipstown and Banagher; and both were disfranchised at the Legislative union. The co. sends 2 members to the imperial parliament. Constituency, in 1841, 1,078; in 1849, 1,130.

Divisions and towns.] King's co. is divided into the baronies of Warrenstown, Coolestown, Lower Philipstown, and Upper Philipstown, in the E of the main body; Geashill, Ballyboy, Ballycowan, and Kilcoursey, in the centre and partly in the W of the main body; Garrycastle on the W of the main body; and Eglish, Ballybrit, and Clonlisk, in the SSW projection. These baronies are subdivided into 51 parishes.—The principal towns are Tullamore, Birr or Parsonstown, Banagher, and Portarlington.—The co. is ecclesiastically divided amongst the dioceses of Kildare, Meath, Killaloe, and Ossory.

History.] This county, in the most ancient history of Ireland, was a part of that territory denominated Hy Falgia, in which district the counties of East and West Meath, Dublin, and Kildare were also included. Great tracts of this co. were early in the hands of various proprietors, and at length these several principalities were united into one kingdom, under the title of the kingdom of Ophaly, which included with this a part of the co. of Kildare. It held this title for several centuries after the landing of the English, in the reign of Henry II.; and in the history of the wars which succeeded, between the English and the natives, it is often recognised as such. Ophaly lay on the W borders of the pale, and in 1557 was confiscated to the Crown, under the title of Western Glenmallery; at the same time was Queen's co. also forfeited, under the title of Eastern Glenmallery. This country was the scene of wars for a length of time. The O'Connors, who were the ancient chiefs, kept up constant skirmishes with the royal forces, and were very long troublesome neighbours to the English pale. The scenes of the principal and almost only noticeable events during the wars of 1641, and the Revolution, were Birr and Tullamore. The forfeitures consequent on both wars were very extensive.

KING'S COUNTY, a division of Nova Scotia; bounded on the N by the bay of Fundy; on the E by Mines or Minas bay; on the S by the cos. of Hants and Lunenburg; and on the W by the co. of Annapolis. It comprises 4 townships, and contained in 1837, 10,208 inhabitants. Towards the N it is mountainous, but well-wooded. In other parts, although marshy, it possesses considerable fertility. The principal rivers by which it is watered are the Annapolis, an affluent of the bay of Fundy, and the Gaspereaux, which issues from a considerable lake in the SW of the co., and flows NE to Mines bay. Its capital is Cornwallis.—Also a co. of New Brunswick; bounded on the NW by Queen's co.; on the NE by Westmoreland; on the S and SE by St. John's co.; and on the W by Charlotte co. It comprises an area of 1,335 sq. m., and is divided into 7 parishes. It is intersected by the Kennebecasis and other streams, and produces grain in great abundance. It affords also excellent pasturage. — Also a co. of Prince Edward's island; bounded on the N and E by the gulf of St. Lawrence; on the S by Northumberland strait; and on the W by Queen's co., from which it is separated by Hillsboro river. It comprises an area of 412,000 acres, divided into 4 parishes, and containing 21 townships. It is thickly settled, and contains many excellent farms. Its capital is Georgetown.

KINGSCOURT, a market-town of co. Cavan, 5 m. SW of Carrickmacross. Pop. 1,614.

KINGSDON, a parish in Somerset, 2 m. SE by S of Somerton. Area 1,780 acres. Pop. in 1841, 553.

KINGSDOWN, a parish in Kent, 7 m. SSE of Dartford. Area 3,060 acres. Pop. in 1831, 431; in 1841, 466.—Also a small fishing hamlet in the p. of Ringwold, on the coast of Kent.

KINGSDOWN, or KINGSTON, a parish in Kent, 6¼ m. WSW of Faversham. Area 1,040 acres. Pop. in 1831, 94; in 1841, 104.

KINGSESSING, a township of Philadelphia co., in the state of Pennsylvania, U. S., 7 m. SW of Philadelphia. It has a level surface, bounded on the SE by Delaware river, on the E by Schuylkill river, and on the W by Darby creek. Its soil is chiefly alluvial. Pop. in 1840, 1,339.

KINGSEY, a parish in Buckinghamshire, 3 m. E by N of Thame. Area 1,350 acres. Pop. in 1841, 237.

KINGSEY, a township of Lower Canada, co. of Drummond, on the E bank of the St. Francis, and watered by several branches of the Nicolet river. It is partly low and swampy, but contains large quantities of excellent timber. Pop. 306.

KING'S FERRY, a hamlet in the p. of Iwade, isle of Sheppy, Kent.

KING'S FERRY, a village of Genoa township, Cayuga co, in the state of New York, U. S., 173 m. W of Albany, consisting in 1840 of about 30 dwellings.

KINGSFORD, a hamlet in the p. of Wolverley, Worcestershire, 2 m. NNW of Kidderminster.—Also a hamlet, partly in the p. of Church-Bickenhill, and partly in that of Solyhull, Warwickshire.

KING'S INCH, an eminence in the neighbourhood of the burgh of Renfrew, sometimes denominated Castlehill. It lies on the Clyde, and was formerly insulated by an arm of that river.

KING'S ISLAND, an island in the W part of Bass's strait, between New Holland and Van Diemen's Land, in S lat. 39° 50′, E long. 139° 40′, about 66 m. S of Cape Otway, and 69 m. NW of Ma-an-die point, the NW extremity of Van Diemen's Land. The channel by which it is separated from the former is named Nelson channel. The greatest length

of the island from N to S is 35 m., and its breadth about 13 m. Its N and S extremities have received the appellations of Capes d'Anville and Bonpland; those of the E and W are named Capes Cowper and Palmer. The W coast is lined in almost its entire extent with rocks, and, with the exception of the little afforded on the W coast by Sea Elephant bay and Bay of Seals, is destitute of shelter. The surface of the island is generally low. Towards the N are several sandy hills, but its highest elevation does not exceed 700 ft. It possesses over a granitic base a thick bed of vegetable mould, towards the interior densely covered with wood, and along the shore adorned with ferns and the richest verdure. Rain and mists are of frequent occurrence, and render the climate damp and cold, the temperature rarely rising above 15° Reaum. Springs and streams are abundant, and in the interior is a large lake. The S wind blows often with great violence. The principal mineral productions of the island are porphyry, asbestos, crystal, jasper, iron, and salt. Its more remarkable animals are the kangaroo, of which two kinds have been observed here by Peron, the dasyurus, the wombat, the sea-elephant and the sea-dog. This island was discovered in 1799 by Captain Head, and two years after was visited by Captain Black, from whom it received its present appellation. It is uninhabited.

KING'S ISLAND, or Okiben, an island in Behring's strait, N. Pacific, in N lat. 64° 55′, E long. 168°.

KING'S ISLAND, an island in the archipelago of Mergui or Tanasserim, in the Indian ocean, opposite the mouths of the Tanasserim, in N lat. 12° 45′, and E long. 98° 30′, separated by a narrow channel from Fig-tree island on the E, and by the distance of about 20 m. from the continent.

KING'S KEYS, a group of islets, in the Caribbean sea, off the coast of Mosquitia, in N lat. 14° 46′, and W long. 82° 30′.

KINGSLAND, a parish and village in Herefordshire, 3½ m. WNW of Leominster. Area 4,650 acres. Pop. in 1831, 1,074; in 1841, 1,088. The village is neat and well-built. The battle of Mortimer's-cross was fought, in 1461, on Kingsland-field, a level plain near Mortimer's-cross, between K. and Aymestrey.—Also a hamlet partly in the parish of Hackney, and partly in that of Islington, Middlesex, 2½ m. NNE of St. Paul's, intersected by the London and Cambridge railway, and the Regent's canal.

KING'S LANGLEY, a parish in Hertfordshire, 4½ m. NW by N of Watford, intersected by the Grand Junction canal and the London and Birmingham railway. Area 3,400 acres. Pop. 1,629.

KINGSLEY, or Kingsby, a township in the p. of Frodsham, co.-palatine of Chester, 3¼ m. SE by E of Frodsham. Area 3,220 acres. Pop. in 1831, 934; in 1841, 1,007.—Also a parish in Southamptonshire, 4 m. ESE of Alton. Area 1,640 acres. Pop. in 1831, 345; in 1841, 359.—Also a parish and village in Staffordshire, 2½ m. N by W of Cheadle, on the river Churnet, and in the line of the Uttoxeter canal, and the Manchester and Derby railway. Area 5,290 acres. Pop. in 1831, 1,416; in 1841, 1,554. Coal-mines are wrought in this p.

KING'S LYNN. See Lynn Regis.

KING'S MEABURN, a township in the p. of Morland, Westmoreland, 4 m. WNW of Appleby, on the Lynemut. Pop. in 1831, 203; in 1841, 200.

KINGSMILL ISLANDS, a group of 15 islands, of coral-formation, in the Pacific, extending from about 4° N lat. to 6° S lat., and from 172° to 178° E long. Some of the smaller islands are bare of trees; but others are covered with thick forests and underbrush. They are densely peopled. Their native names are Maraki, Makin, Apia, Tarawa, Maiana, Apamama, Kuria, Nanuki, Nanuti, Taputeouea, Peru, Nukunua, Arurai, Tamana, and Onutu.

KING'S NORTH, a parish in Kent, 2½ m. SSW of Ashford, on the South-Eastern railway. Area 3,300 acres. Pop. in 1831, 386; in 1841, 416.

KING'S NORTON, a parish of Worcestershire, 5 m. SSW of Birmingham, intersected by the Birmingham and Gloucester railway. Area 11,970 acres. Pop. in 1831, 3,977; in 1841, 5,505.

KING'S PLAINS, a plateau of New South Wales, in the co. of Bathurst, 20 m. SW of the town of that name.

KINGSPORT, a village of Sullivan co., in the state of Tennessee, U. S., 273 m. E by N of Nashville, on the point above the junction of the N and S forks of Holston river.

KING'S POSTS, an extensive tract of Lower Canada, extending from Cape Cormoran upwards of 140 leagues along the St. Lawrence, and N to the frontier of the Hudson's bay territory.

KING'S PYON, a parish of Herefordshire, 2½ m. SE by E of Weobly. Area 1,980 acres. Pop. 424.

KING-SHAN, a district and town of China, in the prov. of Hu-pih, div. of Gan-lu-fu, in N lat. 31° 5′, E long. 113° 3′.

KING'S SOMBOURN, a parish in Hants, 3 m. S of Stockbridge, intersected by the Andover canal. Area 7,100 acres. Pop. in 1841, 1,125.

KING'S TABLE-LAND, an extensive plateau of New South Wales, in the co. of Cook, in the Blue mountains, at an alt. of 2,727 ft. above sea-level.

KINGSTEIGNTON, a parish in the co. of Devon, 2 m. NNE of Newton-Bushel, on the river Teign. Area 4,110 acres. Pop. in 1831, 1,288; in 1841, 1,498.

KINGSTHORPE, a parish in the co. of Northampton, 2 m. N by W of Northampton, on a branch of the Nen. Area 1,800 acres. Pop. in 1831, 1,344; in 1841, 1,467. Here are quarries of considerable extent. The stone is of a soft texture, hardens by exposure to the air, and is of a delicately white tint.

KINGSTON, a parish in Cambridgeshire, 3½ m. SSE of Caxton. Area 1,807 acres. Pop. in 1831, 293; in 1841, 307.—Also a parish in Devonshire, 3 m. SSW of Modbury, on the English channel, near Bigbury bay. Area 2,420 acres. Pop. in 1831, 504; in 1841, 529.—Also a chapelry in the parish of Canford-Magna, Dorset, 6 m. NE by N of Poole, on the Stour. Area 4,390 acres. Pop. in 1831, 775; in 1841, 846.—Also a parish in Somersetshire, 3½ m. NNW of Taunton. Area 3,470 acres. Pop. in 1831, 902; in 1841, 921.—Also a parish in Somersetshire, 1½ m. ESE of Ilminster. Area 830 acres. Pop. in 1831, 292; in 1841, 301.—Also a parish in the isle of Wight, 5½ m. SSW of Newport. Area 650 acres. Pop. in 1831, 83; in 1841, 73.—Also a parish in Staffordshire, 3 m. SW by S of Uttoxeter. Area 1,950 acres. Pop. in 1831, 368; in 1841, 339.—Also a parish in Sussex, 3¾ m. W by S of Worthing, on the English channel. The church was long ago destroyed by the sea, and Kingston is now a constituent of the p. of Ferring, as regards ecclesiastical matters. Area 490 acres. Pop. in 1831, 61; in 1841, 45.—Also a parish in Herefordshire, 6 m. WSW of Hereford. Area 1,620 acres. Pop. in 1831, 492; in 1841, 501.—Also a parish in Kent, 5¼ m. SE by S of Canterbury. Area 1,650 acres. Pop. in 1831, 282; in 1841, 310.

KINGSTON, a sea-port town, the actual though not the legislative capital of the island of Jamaica, is situated on the S coast of the island, in the co. of Surrey, on the N side of a bay in which vessels of the largest burden may anchor in safety, in N lat. 17° 56′ 6″, W long. 76° 53′ 15″, 13 m. E of Spanish-Town, with which it is now connected by a railway. It was founded in 1693, after the destruction of

Port-Royal by an earthquake in the preceding year; was constituted a city in 1802; and has a pop. of about 35,000, of whom 10,000 are whites. The town, according to the original plan, was to be built in the form of a parallelogram, 1 m. in length, by a ½ m. in breadth; but it has greatly extended beyond this limit. It is situated on a gentle slope of about 1 m. in length, which is bounded on the S by a spacious basin. The extended inclined plane, on the verge of which K. stands, is enclosed on the N by the beautiful mountain-range termed Liguanea hills, which, forming a semicircle, terminate in the E at the narrow defile of Rock fort; from thence a long neck of land called the palisades stretches far away to Port Royal, forming the S shore of a beautiful haven. The vast harbourage in front of the town, upwards of 25 m. in circumf., having the luxuriant grass-fields of Saltpond hills on the W, and bounded on the E by the Palisades, and on the S by the hills of Healthshire, affords space where the assembled navies of Europe might safely ride. The town is built, after a regular plan, in the form of a parallelogram, with the streets and lanes at right angles, and extends for about a mile either way, having the harbour for its S boundary. Eastward, 2 m., is the romantic spring and reservoir of Rochefort; W, 6 m., is the Ferry morass, famous for its eel and mullet; whilst N, towards the Liguanea mountains, 6 m. distant, extends the beautiful plain of the same name, with the noble barracks called Up-Park camp, the residence of the naval commander-in-chief, called the Admiral's Pen, and country houses, studded all over, commanding the most extensive mountain and sea views. The English and Scotch churches are elegant structures; particularly the former, which is built on a picturesque spot, commanding a splendid view. A theatre, a free-school established in 1729, a poor-house, a public-hospital, and an Athenæum are among the other public buildings. In the lower part of the town is the market-place, which is plentifully supplied with butcher-meat, poultry, fish, fruits, and vegetables. From its situation on a plain, which rises with a gradual ascent to the foot of the Liguanea mountains, a distance of about 6 m., K. enjoys the full benefit of the sea-breezes which blow regularly the greatest part of the year, and temper the heat of the climate during the day; while during the night a land-wind arises to cool the air. The therm. ranges between 96° and 76°.—K. engrosses by far the larger portion of the commerce of the island. See article JAMAICA. It is governed by a mayor, 12 aldermen, 12 common councilmen, and a recorder; and returns 3 members to the house of assembly.

KINGSTON, the capital of the island of St. Vincent's, and the seat of the government, situated at the head of a bay of the same name, on the SW shore of the island, in N lat. 13° 6′, W long. 81°. Pop. in 1844, 4,769; in 1848, 6,123. It is a neat and regularly built town.

KINGSTON, a town of Upper Canada, in the Midland district, very advantageously seated on the N side of the river St. Lawrence, or rather at the NE extremity of Lake Ontario, 177 m. ENE of Toronto by road, and 199 m. from Montreal, on ground formerly occupied by Fort Frontenac, an old French post. It was founded in 1784; and in 1846 had a pop. of 6,123. On the union of the two provinces, K. was for a time made the seat of government in 1841. The streets are regularly planned, and 66 ft. in width; and run at right angles with each other. The houses are chiefly built of dark freestone. Along the low shore of the lake, and the bank of the Great Cataraque river, the town presents a front of 1 m. in length. The higher portion of the town is beautifully laid out on a plateau of rock. The public buildings are a government-house, a court-house, a market-house regarded as the finest and most substantial building in Canada, a jail and hospital, besides the garrison, government-magazines and stores. There are 3 Episcopal, 2 Catholic, 2 Methodist, a Presbyterian, a Baptist, and an Irvingite chapel. The Presbyterians have a collegiate institution called Queen's college. Five newspapers are published weekly in the town. It is the main entrepot between Montreal and all the settlements along the lakes to the westward. The harbour is well-sheltered and convenient, accessible to ships not requiring more than three fathoms water, with good anchorage close to the north-eastern extremity of the town: the entrance to it is defended by a battery on Mississaga-point, and another on Point Frederick, which, with the shoal stretching from the former, with only 5 ft. of water upon it, are quite sufficient for its protection. K. possesses one of the best harbours on the lake; and is the naval arsenal of Great Britain in this quarter, where ships of war, even of the first rate, have been constructed. It is the rendezvous of the government steamers, and of those employed on the Rideau canal, those from Toronto, and those plying to Prescot, Oswego, and the bay of Quinté. A bridge 600 yds. in length, running across Cataraque bay, or the mouth of the Rideau canal, connects the town with Fort Henry. As a military position, K. is the key of the central St. Lawrence.

KINGSTON, a township of Rockingham co., in the state of New Hampshire, U. S., 33 m. SSE of Concord. The surface is hilly, and is watered by two considerable ponds and their outlets, affluents of the Merrimac. The soil is loamy and fertile. Pop. in 1840, 1,032.—Also a township of Plymouth co., in the state of Massachusetts, 34 m. from Boston, on a branch of Plymouth Harbour. The surface is level, but its soil is shallow and unproductive. Pop. 1,440. —Also a village of South Kingston township, Washington co., Rhode island, 32 m. S by W of Providence.—Also a township of Ulster co., in the state of New York, 57 m. S by W of Albany. The surface is hilly, but fertile; and is bordered on the E by Hudson river, on the SE by Rondout creek, and watered by Esopus creek. Pop. 5,824. The village is on Esopus creek, 3 m. W of the Hudson river. Pop. 2,300.—Also a village partly in Middlesex co., in the state of New Jersey, 14 m. NE of Trenton, and partly in Somerset co., on Millstone river, consisting in 1840 of about 40 dwellings.—Also a township of Lucerne co., in the state of Pennsylvania, 127 m. NE of Harrisburg, bounded on the SE by the Susquehanna. It is hilly, but generally fertile. Pop. 2,004. The village, formerly called Wyoming, contains about 60 dwellings. —Also a village of Greene township, Ross co., in the state of Ohio, 55 m. S of Columbus. Pop. 350.—Also a township of Delaware co., in the same state. Pop. 657.—Also a village of Roane co., in the state of Tennessee, 143 m. E by S of Nashville, on the point formed by the junction of Clinch and Tennessee rivers. Pop. 500. —Also a village of Adams co., in the state of Massachusetts, 119 m. SW of Jackson.—Also a village of Antanga co., in the state of Alabama, 86 m. from Tuscaloosa, on the W side of Antanga creek.—Also a village of Lenoir co., in the state of North Carolina, 80 m. SE by E of Raleigh, on the N side of Neuse river.

KINGSTON (EAST), a township of Rockingham co., in the state of New Hampshire, U. S., 36 m. SE of Concord. It is watered by Powow, and is generally fertile. Pop. in 1840, 551.

KINGSTON (NORTH), a township of Washington co., in the state of Rhode island, U. S., 21 m. S of Providence, on the W side of Narraganset bay. It

has a hilly surface; but its soil, consisting of gravelly loam, possesses considerable fertility. Pop. 2,909.

KINGSTON (South), a township of the state of Rhode island, U. S., cap. of the co. of Washington, and 30 m. SW of Providence, bounded on the E by Narraganset bay, and on the S by the Atlantic. It is generally hilly, and contains a salt and numerous fresh-water ponds. One of the latter covers an area of nearly 4,000 acres. The soil consists of gravelly loam, and is very productive. Pop. in 1840, 3,717. Near its centre is a village named North Kingston, consisting of about 30 dwellings.

KINGSTON-BAGPUZE, a parish in Berks, 6 m. W of Abingdon. Area 1,180 acres. Pop. in 1831, 306; in 1841, 290.

KINGSTON-DEVERILL, a parish in Wilts, 3½ m. NW of Mere. Area 2,060 acres. Pop. 440.

KINGSTON-LISLE, a chapelry in the p. of Sparsholt, Berks, 4½ m. W of Wantage, in the line of the Wilts and Berks canal, and of the Great Western railway. Area 2,060 acres. Pop. 253.

KINGSTON-SEYMOUR, a parish in Somerset, 8 m. NNW of Axbridge, on the Bristol channel. Area 2,790 acres. Pop. in 1831, 368; in 1841, 375.

KINGSTON-UPON-HULL. See Hull.

KINGSTON-UPON-RAILWAY, or New Kingston, a town in Surrey, a little to the S of Kingston-upon-Thames, on the line of the South-Western railway, 10 m. SW of London. Nothing in the history of railway improvements has been more extraordinary than the creation of this singular and beautiful town. On the spot where in 1838 a large crop of oats was reaped, now stand rows of handsome houses, terraces, villas, Swiss and other ornamental cottages, assembly, billiard, and coffee-rooms, and other useful and ornamental buildings, an Episcopal church, a Wesleyan Methodist chapel, a corn-exchange, cattle and hay market, and a general market for retail goods.

KINGSTON-BY-SEA, or Kingston-Bowsey, a parish in Sussex, 1½ m. E of New Shoreham. Area 610 acres. Pop. in 1831, 60; in 1841, 46.

KINGSTON-UPON-SOAR, a parish in Nottinghamshire, 9 m. SW of Nottingham, on the river Soar, near its junction with the Trent, and intersected by the Midland Counties railway. Area 1,200 acres. Pop. in 1831, 175; in 1841, 181.

KINGSTON-UPON-THAMES, a parish and market-town in Surrey, 20 m. NE by N of Guildford, and 10 m. by railway WSW of London, on the SE bank of the river Thames, over which there is here a bridge, and on the line of the South-western railway. The parish includes the hamlets of Ham, Ham-with-Hatch, and Hook. Area 7,300 acres. Pop. in 1801, 3,793; in 1831, 7,257; in 1841, 9,760. The town extends about a ½ m. along the Thames. The hamlet of Surbiton is continuous with the town on the S, and that of Hampton-wick immediately adjoins it on the opposite bank of the river. The present bridge across the Thames here is a structure of 5 elliptical arches, 382 ft. in length by 27 ft. in width. The principal trade of the town consists in malting. There are also some oil and flax mills. The church is a spacious cruciform structure, the work of different periods, with a square tower rising between the nave and chancel. K. is a polling-place for the co. members.

KINGSTOWN—formerly Dunleary—a sea-port town, in co. Dublin, on the S shore of Dublin bay, SE of the city of Dublin, respectively 5½ m. by road, and 5 m. by railway. A portion of the town is compact and urban; a portion is regularly dispersed; and a portion alternately straggles and compresses amid the accompaniments of a marketing-place and a busy port. On the whole, K. appears to be not very strictly a distinct and well-aligned town, but rather the least rural or most proximately urban portion of the long, broad, and continuous belt of human habitations which lines the whole S shore of Dublin bay. The older parts of the town are badly and inconveniently built: in many of the modern parts, however, as also in the streets now in progress, elegance, uniformity, and comfort have been attended to.

Railways.] The railway from Dublin to Kingstown has already been fully noticed in our article on the city of Dublin. The atmospheric railway, connecting K. with Dalkey, the protergon of its class,—at once the first example and the model of all atmospheric railways which may exist,—is constructed on an old tram railroad, which was used for conveying stones to K. harbour. The line is 1¾ m. in length, and rises 71½ ft. toward Dalkey, making a gradient of 1 in 115 ft. The main pipe between the rails, which is 15 inches internal diameter, commences at K. station, and is continued to within 500 yds. of Dalkey Starting from K., for more than half the distance it is a succession of sharp curves, three of which are little more than 500 ft. radius, whilst the ascent to Dalkey in that short distance is 71½ ft. perpendicular,—the small portion of this distance, which is unaffected by stopping, or starting, is uniformly passed over at a rate exceeding 40 m. per hour, the inclination being 1 in 115. A train of six carriages, crammed with passengers, has been occasionally permitted to travel at between 50 and 60 m. per hour. It works satisfactorily, and to the advantage of the parent-line; and, although not a direct source of profit, still the increased number of passengers that are in consequence brought over the Dublin and K. railway, has given an ample return for the capital invested. Transverse sleepers, about 12 inches wide, and 6 inches deep, support the air-pipe in the centre, and the longitudinal timbers on each side to which the rails and their chairs are fixed. The permanent road is 12 ft. wide at the bottom, including a small drain on each side of it. The rails, of which there is only a single line, weigh about 48 lbs. to the yd. If the line were level, a second steam-engine would have been required at the other terminus; but as it rises almost the whole way from K. to Dalkey, the latter being 72 ft. higher than the former, atmospheric power is only required for propelling the trains up this ascent, whilst on their way back they return by the force of gravity. The road is remarkably winding. The sharpest curves are one having a radius of 580 ft. bending to the right, about 750 ft. from the K. station, one having a radius of 570 ft., bending to the left soon after, and one having a radius of 700 ft., also bending to the left. In December 1848 a portion of the stationary engine gave way, and after an inspection of the line by one of the government officials, permission was given for the temporary use of locomotives, and atmospheric agency was shortly afterwards resumed.

Harbour.] The small original fishery pier of Dunleary is included within the present magnificent works; and together with its former tide-harbour, is now crossed by the Dublin and K. railway. The present harbour, designed by Mr. Rennie, was commenced in 1817, and is now very nearly completed. It consists of two piers, the one commencing at Dunleary, the other about 6 statute furlongs farther E; both extending for about half their length NE, or in the direction of Howth-head; and then making three successive angular deflections toward each other, so as to leave an entrance of 850 ft. in width between their ends, and to enclose an area of 251 statute acres. The E pier is 3,500 ft. in total length; and the W pier is 4,950 ft. The piers are 310 ft. in breadth at the base, and 53 ft. at the summit; and the foundations are laid at the depth of 20 ft. under low-water. A quay, 40 ft. wide, has been carried along the piers; and a wharf 500 ft. in length has been erected along the breast of the harbour opposite the entrance. At the end of the E pier is a revolving light. The depth of water, at the lowest ebb of spring-tides, close to the pier-head, is 24 ft.; so that the harbour will admit, at the lowest ebb, a frigate of 36 guns or an Indiaman of 800 tons, and, at two hours' flood, a 74 man-of-war. The cost of the works was estimated, before commencement, at £505,000; but in 1846 it amounted to £652,367, and was estimated at an additional £20[illegible],000 to effect the harbour's completion. In the Admiralty charts the entrance to K. harbour is laid down in N lat. 53° 18′, W long. 6° 8′. In 1835 the fishing-craft belonging to the port consisted of only 12 decked vessels, of aggregately 480 tons, and worked by 48 men. K. is the Royal Mail Packet station for communication with Holyhead and Liverpool. From the former of these ports it lies in a WNW direction, 54 m. distant from the buoy of the Outer Platters. Captain Beechey, in a report made to the Admiralty in 1846, describes the harbour in point of size "one of the most splendid artificial ports in the United Kingdom;" but owing to the width and erroneous position of its entrance, the anchorage is so exposed that vessels in E gales cannot hold on, and as a harbour it has disappointed expectation. The income of the port, in 1843, amounted to £3,621, derived chiefly from tonnage and ballast dues, anchorage, and slippage, and a toll on steamers. The expenditure for the same period was £9,328, the excess over the income being provided for by parliamentary grant, and of which £6,316 was laid out in the erection of a commercial wharf wall, and repair of the piers. The num

ber of vessels that entered the harbour during the year 1845 was 2,214, of the aggregate burden of 229,433 tons, exclusive of men-of-war, cruisers, and mail-packets; and of which 1,117 were vessels trading to or from the port of Dublin, waiting for wind or tide.

K. is the landing-place of passengers by merchant-steamers in states of the tide impracticable for sailing up the bay; and serves, in a considerable degree, as an entrepot to Dublin, and may become, in a very brief period, the grand emporium of at once the metropolis and a great extent of circumjacent country. Pop. in 1831, 5,736; in 1841, 7,229.

KINGSTREE, a village of Williamsburg district, in the state of South Carolina, 105 m. ESE of Columbia on Black river.

KINGSVILLE, a township of Ashtabula co., in the state of Ohio, U. S., 213 m. NE of Columbus. Pop. in 1840, 1,418.

KING'S WALDEN, a parish in Hertfordshire, 4 m. SSW of Hitchen. Area 4,180 acres. Pop. 1,034.

KINGSWEAR, a parish in Devonshire, 3½ m. SW by S of Brixham, on the E side of Dartmouth harbour. Area 120 acres. Pop. in 1841, 270.

KINGSWOOD, a hamlet in the p. of Ludgershall and Tetchworth, Buckinghamshire, 8½ m. WNW of Aylesbury. Area 150 acres. Pop. in 1831, 56; in 1841, 66.—Also a township in the p. of Spotwick, co. of Chester, 6 m. NW by N of Chester, on the Dee. Area 100 acres. Pop. in 1821, 44; in 1841, 103.—Also a township partly in the p. of Lapworth, and partly in that of Rowington, Warwickshire, 5 m. NE by N of Henley in Arden.—Also a liberty in the p. of Ewell, Surrey, 2½ m. NNW of Gatton. Area 1,760 acres. Pop. in 1831, 221; in 1841, 245.—Also a parish and village in the co. of Wilts, 1 m. SW of Wotton-under-Edge. Area 2,320 acres. Pop. 1,321.

KINGSWOOD, or Kingswood-Hill, a village partly in the p. of St. George, Bristol, and partly in that of Ritton, Gloucestershire, and intersected by the Bristol and Gloucester railway.

KING'S WORTHY, a parish in Hants, 2 m. NNE of Winchester, intersected by the Southampton and London railway. Area 2,190 acres. Pop. 349.

KING-TE-CHING, a city of China, in the prov. of Keang-se, district of Faou-chu-fu, or Yao-chu, 102 m. ENE of Nan-king, on a fine navigable river, an affluent of lake Pho-yang, in N lat. 29° 16′, E long. 117° 4′. It consists of a close line of houses extending about 4½ m. along the river, and is enclosed by a lofty semi-circular range of mountains. The number of its inhabitants is estimated at upwards of a million. It is celebrated for its manufacture of china. Five hundred ovens are in constant activity, and give to the locality, by the volumes of flame and smoke which they emit, the appearance during the night of a lake of fire. The porcelain of this town is esteemed the best in China. It is made of two different species of stone, one of which, named Pe-tun-tsze, is of a greenish hue; and the other is white, and is called Kaou-lin. After being pulverised and refined and kneaded into a compact paste, the material passes into the hands of the potter. Previous to colouring, the surface is covered with *pih-yew*, a white mineral oil, for the purpose of enhancing the transparency of the ware.—In the vicinity of the town is a port consisting of a basin 3 m. in circumf., and capable of receiving a large number of vessels. Porcelain forms its chief article of export. Commodities of all kinds are extremely dear, and labour in equal proportion, the locality yielding little of the necessaries of life. Wood has to be brought a distance of upwards of 300 m. The police regulations are extremely strict. Foreigners are not allowed to remain on shore during the night.

KINGTON, a parish and market-town in Herefordshire, 18 m. NW of Hereford, on the river Arrow. The parish includes the townships of Barton, Bradnor and Rustrock, Chickward, Pembers-Oak and Lilwal, and Both Hergests. Area 8,130 acres. Pop. in 1831, 3,111; in 1841, 3,131.—The town—which is of considerable antiquity—is well-built, and consists of two spacious streets intersecting each other at right angles. Glove-making is carried on here; and there is a large iron-foundry and nail manufactory.—Also a parish in Worcestershire, 8½ m. E of Worcester, on a branch of the Avon. Area 1,000 acres. Pop. in 1831, 153; in 1841, 151.

KINGTON-MAGNA, a parish in Dorsetshire, 6 m. W of Shaftesbury, on the river Cale. Area 1,910 acres. Pop. in 1831, 539; in 1841, 616.

KINGTON-ST.-MICHAEL, originally Kington-Monachorum, or Kington-Moine, a parish in Wilts, 3 m. NNW of Chippenham, on the line of the Great Western railway. Area 3,950 acres. Pop. in 1831, 1,091; in 1841, 1,173. The parish comprises the tythings of Kington-St.-Michael, Langley, and Easton Percy.

KINGTON (West), a parish in Wilts, 8 m. NW by W of Chippenham. Area 2,320 acres. Pop. 349.

KING-TUNG, a district and town of China, in the prov. and 135 m. WSW of Yun-nan, on the Papien-keang, in N lat. 24° 30′ 40″, E long. 101° 4′. The inhabitants exhibit resemblance in many of their habits to those of Hindostan, and employ the Burmese method of writing. The surrounding country is mountainous, and is said to contain mines of silver. Rice is extensively cultivated in the environs.

KINGUSSIE, a parish of Inverness-shire, 23 m. ESE of Fort Augustus. Pop. in 1841, 2,047.

KINGWATER, a township in the parish of Lanercost, Cumberland, 14 m. NE by E of Carlisle, on the river Irthing. Pop. in 1831, 365; in 1841, 390.

KINGWESTON, a parish in Somersetshire, 3 m. NE of Somerton. Area 1,220 acres. Pop. 128.

KING WILLIAM, a county of the state of Virginia, U. S., comprising an area of 270 sq. m. It lies between Mattapony river on the NE and Pamunky river on the SW, and is watered by their branches. Pop. in 1840, 9,258, of whom 5,780 were slaves. Its cap., which bears the same name, is 38 m. NE by E of Richmond. Pop. 75.

KING WILLIAM'S CATARACT, a fine fall of one of the head-streams of the Essequibo river, in British Guayana, 5 m. SSE of Murray's cataract, in N lat. 3° 14′ 35″. E long. 57° 44′.

KING WILLIAM'S ISLAND, an island of the Asiatic archipelago, in Dampier's strait, to the S of the island of Waygion, in S lat. 0° 30′, E long. 135° 50′.

KING WILLIAM'S TOWN, a village of co. Cork, in the mountain vale of the Blackwater, 19 m. NE by E of Killarney. It was recently built by government.

KINGWOOD, a township in Hunterdon co., in New Jersey, U. S., 29 m. NW of Trenton. Pop. 2,947.—Also the cap. of Preston co., in Virginia, 284 m. NW of Richmond. Pop. 180.

KING-YANG-FU, a division and town of China, in the prov. of Kan-suh. The div. comprises 5 districts. The town is 234 m. E of Lan-chu-fu, on the Ma-lien, at the confluence of another river, in N lat. 36° 3′, E long. 107° 42′ 30″. It is one of the border fortresses, and is strongly defended with bastions and ditches. It carries on an active trade. In the vicinity are two salt marshes.

KING-YUEN, a district and town of China, in the prov. of Chi-keang, div. of Chu-chu-fu, in N lat. 27° 42′, E long. 119° 4′.—Also a town of the Corea, in the prov. of King-ki, 66 m. E of Han-yang.

KING-YUEN-FU, a division and town of China, in the prov. of Kwan-se. The div. comprises 5 dis-

tricts. The town is 138 m. WSW of Kwei-lin-fu, in N lat. 24° 26′ 24″, E long. 108° 24′ 30″, near the Lieu-keang. It is surrounded by steep mountains, inhabited by an independent people.

KING-YUN, a district and town of China, in the prov. of Chi-li, div. of Teën-tsin-fu. It was formerly comprised in the div. of Ho-keën.

KIN-HEANG-HEEN, a district and town of China, in the prov. of Shan-tung, div. of Tsi-ning-chu, in N lat. 35° 11′, E long. 116° 35′.

KIN-HEEN, a district and town of China, in the prov. of Chi-Keang, div. of Ning-po-fu.—Also a district and town in the prov. of Leaou-Tung or Shing-king, div. of Kin-chu-fu.—Also a district and town in the prov. of Kan-suh, div. of Lan-chu-fu, in N lat. 35° 55′, E long. 101° 48′.

KINHEIM, a village of Prussia, in the reg. of Trier, circle of Wittlich, on the Moselle. Pop. 708.

KIN-KE, a district and town of China, in the prov. of Keang-se, div. of Fu-chu-fu, in N lat. 27° 52′, E long. 116° 53′.

KIN-KE-HEEN, a district and town of China, in the prov. of Kwan-se, div. of Wu-chu-fu.

KINLET, a parish in Salop, 8 m. SSW of Bridgenorth. Area 6,550 acres. Pop. in 1841, 480.

KINLOSS, a parish in Morayshire, bounded on the N by the Moray frith, and on the W by the bay of Findhorn, at the head of which it is situated. It is about 3½ m. sq. The v. of K. is situated at the SE extremity of the bay or lake formed by the river Findhorn. Pop. in 1831, 1,121; in 1841, 1,202.

KIN-MEN-SO, an island of China, in the prov. of Fo-keën. 132 m. SSW of Fu-chu, at the mouth of a bay, in N lat. 24° 26′ 24″, and E long. 118° 38′ 10″.

KINNAIL (Lough), a lake, partly in co. Cavan, but chiefly in the cos. of Westmeath and Longford, formed or traversed by the river Inny. Its length is 3 m.; its breadth 2 m.; its area is 564 acres. Surface elevation above sea-level 212 ft.

KINNAIRD, a parish in the district of Gowrie, Perthshire, about midway between Perth and Dundee. Pop. in 1831, 461; in 1841, 458.

KINNAIRD'S-HEAD, a high promontory on the coast of Buchan, Aberdeenshire, supposed to be the *Promontorium Taixalium* of Ptolemy. From this point the coast trends due W on the one hand, and on the other curves to the SE, forming the bay of Fraserburgh. On the top of the promontory is the castle of Kinnaird's-head, occupied as a lighthouse, in lat. 57° 42′, long. 2° 1′ W of London. The lantern is 120 ft. above the level of high water. The light is fixed, and is seen at the distance of 15 nautical m. in clear weather.

KINNARD, a parish 2¾ m. ESE of Dingle, co. Kerry. Area 5,002 acres. Pop. in 1841, 1,283.

KINNEFF, a parish in Kincardineshire, 6 m. S of Stonehaven. Area 6,408 acres. Pop. in 1831, 1,006; in 1841, 1,029. The coast is bold and rocky, containing only two small creeks for boats, at the fishing-hamlets of Gaphill and Caterline. The spirited wife of a minister of K., with her servant-girl, succeeded in conveying the regalia of Scotland out of Dunottar-castle while besieged, and hid them under the pulpit in the church of K.

KINNEGAD, a market and post-town in co. Cork, on a streamlet called the K. river, 6¾ m. ESE of Mullingar. Pop. in 1831, 670; in 1841, 715.

KINNEIGH, a parish and village in co. Cork. Area 15,104 acres. Pop. in 1841, 6,093.

KINNEL, a considerable rivulet of Annandale, in Dumfries-shire, which rises between Auldman-hill and Harestane's-craig, within 3 furl. of the source of one of the highest head-waters of the Daer, or more properly the Clyde, and running S, and SE, it joins the Annan at Broomhill. Its entire length of course is about 19 m.

KINNELL, a parish in the maritime district of Forfarshire. Pop. in 1831, 786; in 1841, 853.

KINNERLEY, a parish in Salop, 6½ m. SE by S of Owestry. Area 8,070 acres. Pop. 1,286.

KINNERSLEY, a parish in Herefordshire, 4 m. WSW of Weobly. Area 1,940 acres. Pop. in 1831, 351; in 1841, 281.—Also a parish in Salop, 4 m. NNE of Wellington. Area 1,710 acres. Pop. 295.

KINNERTON (Higher), a township in the p. of Doddleston, Flintshire, 8 m. N of Wrexham. Pop. in 1831, 450; in 1841, 455.

KINNERTON (Lower), a township in the p. of Doddleston, Chester, 4½ m. SW of Chester. Area 580 acres. Pop. in 1831, 104; in 1841, 73.

KINNESSWOOD, a sequestered village in Kinross-shire, in the p. of Portmoak, 5 m. E of Kinross, containing about 320 inhabitants.

KINNETTLES, a parish on the frontier-line of the Strathmore and the Sidlaw districts of Forfarshire. Douglastown, a stirring little v., stands on the Arity, at the W verge of the p., 3½ m. SW of Forfar. About a ½ m. SE of Douglastown stands the neat though small v. of K. Pop. in 1841, 437.

KINNEYSIDE, a township in the p. of St. Bees, Cumberland, 2 m. NW of Egremont. Here is a lead-mine. Pop. in 1831, 227; in 1841, 223.

KINNITTY, a parish and town in King's co. Area 13,894 acres. Pop. in 1831, 2,567; in 1841, 2,562. The SE boundary is part of the water-shed of the Slievebloom mountains, and contains Glendine-Gap, and two summits of respectively 1,691 and 1,733 ft. Carroll's hill has an alt. of 1,564 ft.; Black Gap of 1,293 ft; and the isolated Knocknaman of 1,113 ft.

KINNOUL, a parish adjacent to the town of Perth, on the l. bank of the river Tay, Perthshire. Close on the bank of the Tay, stretching chiefly along in one street line, diverging at right angles on both sides from the end of Perth bridge, stands the v. of Bridgend, strictly a suburb of Perth, and containing a pop. of about 2,000. Pop. in 1831, 2,957; in 1841, 2,879. K. gives the title of Earl, in the Scottish peerage, to a branch of the ancient and noble family of Hay.

KINNURE, a parish 5 m. ESE of Kinsale, co. Cork. Area 1,988 acres. Pop. in 1831, 1,095; in 1841, 1,121. Oyster haven forms the W boundary.

KINOULTON, a parish in Nottinghamshire, 8½ m. SE of Nottingham. Area 2,500 acres. Pop. 388.

KIN-PING-HEEN, a district and town of China, in the prov. of Kwei-chu, div. and NE of Le-ping-fu.

KINPIRNIE, one of the Sidlaw hills, in the extreme E of Forfarshire, 3 m. SE of Meigle. On its summit, which rises 1,151 ft. above the level of the sea, is a tower which serves as a land-mark.

KINROSS, a parish and town in the co. of the same name, containing 5,600 acres. The surface is flat, in no quarter rising 100 ft. above the surface-level of Loch-Leven. It is watered by the N. and S. Quiech, and the Gairney, which pour their streams into the lake. Pop. of the town and p. in 1801, 2,124; in 1831, 2,927; in 1841, 2,822.—The town of K., the co.-town of the shire, is 16 m. S of Perth, and 27 m. NW of Edinburgh. Pop. in 1831, 2,200; in 1841, 2,062. It is situated at the W end of Loch-Leven, and is intersected throughout its length by the great road from Edinburgh to Perth. The people are mostly employed in weaving cotton goods, such as ginghams, pullicates, checks, and tartan shawls.

KINROSS-SHIRE, the smallest county in Scotland; bounded on the SE, E, and S, by Fifeshire, from which co. it was politically disjoined in 1426;

and on the W and NW by Perthshire. The range of the Ochills separate it from Strathearn on the N; while the Lomond hills, Benarty, and the hills of Cleish, separate it from the surrounding parts of Fifeshire. It is in length, from Auchmure-bridge over the Leven, to Fossaway-kirk near the Devon, 11¼ m.; and in breadth 9½ m.; and contains about 45,000 acres. The middle part is occupied by the beautiful expanse of Loch-Leven [which see], the bed of which is about 360 ft. above sea-level. From its banks the ground rises towards the N with a very gentle acclivity; but towards the S the rise is more rapid, though by no means abrupt and rugged. The soil on the low grounds is inclined to clay; on the more elevated parts it is light and sandy; in the hilly district moorish and barren. The face of the country has a rich and cultivated appearance. At least three-fifths of the surface are under the plough, and about 3,000 acres are in wood. Limestone, coal, and ironstone are met with. The hills are mostly composed of coarse whinstone, in some of the fissures of which occur small veins of lead ore. It contains the town of Kinross, which is the co.-town, and the large v. of Milnathort; and is divided into the 4 parishes of Kinross, Portmoak, Cleish, and Orwell. Pop. in 1801, 6,725; in 1831, 9,072; in 1841, 8,763; in 1851, 8,913. Clackmannanshire and K. were united into one sheriffdom in 1807. These two shires now unite in returning a member to parliament. Parl. constituency of K. in 1840, 528; in 1848, 408.

KINSALE, a parish and town in co. Cork. Area 379 acres. Pop. of p. in 1831, 6,897; in 1841, 6,182. —The seaport and parl. borough of K. stands on the river Bandon, at the head of that river's small estuary, 2 m. N of the entrance of Kinsale harbour from the Atlantic, and 10 m. S by W of Cork. The Bandon, varying in breadth from 250 to 1,000 yds., and averaging about 600 or 650, sweeps past the town and its vicinity in so serpentine a course as nearly to return upon its own path, and as to form two peninsulæ, the one of 6 by 5 furl. projecting on the l. bank to the S, and the other of 1,000 by 280 yds. projecting on the r. bank to the ENE; the bend of the river between these peninsulæ sends off to the N a creek or basin, which forms the inner harbour of K. The suburban v. of Scilly, situated within the borough boundaries, occupies a little peninsula between the Bandon and the NE horn of the inner harbour. The old fort of K. is situated 2½ furl. in a straight line S of Scilly. The v. of Cove extends along the l. bank of the Bandon, ¾ m. SE of Scilly, and the battery, barracks, and fortifications of Charles-fort, closely overhang the Bandon, ¼ m. S of Cove. The first appearance of the town is at once unusual and imposing Its lines and sheets of building are interesting from their peculiar arrangement, and from their curious combinations of slender and prolonged lowness of site with bulkiness and clustering of altitude. Many of the houses are so ancient and peculiar as amply to compensate the curious examiner for the fatigue he must endure in climbing the narrow streets to visit them; a considerable number exhibit the large bay windows, connected in the upper stories by balconies, which indicate the ancient admiration of the Irish for Spain and Spanish manners. The church is a structure of apparently the 14th cent., and may be regarded as a rare and curious yet rude specimen of the architecture of the period. The Roman Catholic chapel is remarkable rather for great spaciousness than for any architectural feature. K. harbour, in the large and popular sense of the word, includes all the estuary of the Bandon from the town down to the Atlantic, and is therefore 2 m. in length, and about 800 yds. in mean breadth. A small offshoot of it at the densest part of the town is partially quayed, and looks up one of the spacious streets, called the Long quay.— K. was formerly an important naval depot; but its stores were, a number of years ago, transferred to Cork. An excellent beach, a salubrious atmosphere, suitable hot and cold salt-water baths, airy and comfortable lodgings, and the advantageous site of the suburban marine villages of Scilly and Cove, occasion a great influx of summer visitors for sea-bathing, and a consequent succedaneum of some value for productive industry.—The borough sends 1 member to parliament. Constituency in 1836, 270. Pop. of the town in 1831, 7,312; in 1841, 6,918.

History.] K. has in modern times been often but very improperly written Kingsale. In the 12th cent., De Courcey here defeated MacCarthy More, with great slaughter of the Irish. In 1380, some French and Spanish galleys, which had greatly infested the English coast, were driven for shelter into K. harbour, and were captured with the loss of 400 men. On Sept. 23, 1601, a strong Spanish force, under Don Juan D'Aquila, landed at K., and took possession of the town in name of the Irish or Roman Catholic party, then in rebellion under the earl of Tyrone. On Oct. 17, an English force arrived before the town, closely invested it, and commenced the prosecution of a vigorous siege. But Irish forces under Tyrone and O'Donnel advanced in considerable numbers to the aid of the besieged, and drawing round the besieging army, threatened it with destruction. On Dec. 23, the Spanish commander having prevailed on Tyrone to quit his favourable position, and to hazard an engagement, the united forces of Tyrone and O'Donnel were completely discomfited by the English; and on Dec. 28, the Spanish commander, imagining himself to have been betrayed by his allies, surrendered the town rather through indignation than from necessity. In the war of the Revolution it was seized by the Jacobites, and held for James II. by a combined French and Irish garrison; and towards the end of 1690, it sustained a siege of 24 days from Brigadier-general Churchill, afterwards duke of Marlborough, and was so stoutly and gallantly defended, that, on surrendering to the besiegers, its garrison of about 1,200 men were allowed to march out with arms and baggage. K. gives the title of Baron, in the peerage of Ireland, to the ancient and noble family of De Courcey. Lord Kinsale is the premier baron of Ireland; and enjoys the hereditary privilege of wearing his hat in the royal presence.

KINSALE (Old Head of), a cape on the coast of co. Cork, situated 4½ m. S by W of the entrance of Kinsale harbour, and 8 m. WNW of the Seven Heads. The peninsula which it terminates runs 2¾ m. SSE from the mainland, with a mean breadth of only a ½ m. A lighthouse on the E side of the Old Head exhibits a fixed light.

KINSALEBEG, a parish in co. Waterford. Its S end partly rests on Whiting and Youghal bays, and is partly separated from the town of Youghal and co. Cork by Youghal harbour. Area 5,789 acres. Pop. in 1831, 2,780; in 1841, 3,250.

KINSEALY, a parish 1¾ m. SSW of Malahide, co. Dublin. Area 2,129 acres. Pop. in 1841, 718.

KIN-SHA-KIANG, the name borne by the great river of China, the Yang-tse-kiang, in the upper part of its course, to its junction with the Min-kiang or Ta-kiang. The K. rises in the western part of Koko-nor or Tsing-hae, near the confines of Tibet. Its sources have not yet been ascertained, but are supposed to be in the W extremity of the Bassa-dougram mountains, in about 35° 30′ N lat., and between 89° and 90° E long. For upwards of 400 m. it forms, under the names of Katsi-oulan-mouren, Muh-lu-su or Murus-ussu, the line of separation between the country of the Koko-nor and Tibet. On reaching the lofty range of the Bain-khara-ula, it bends SE into Tibet, and in its course through that country receives the appellation of Bourcitchu or Picholiatchou; thence, after running for some distance along the frontier, it enters China in N lat. 26° 40′; crosses the N extremity of the prov. of Yun-nan; and on the confines of Sze-chuen, where it is joined by the Ya-long-kiang, takes the name of Kin-sha, signifying golden sand or dust, probably from the quantity of that metal which is found in its deposits. After describing a considerable curve in the southern part of the prov., it directs its course first N, then ENE, to the confluence of the Yang-keang, at Su-chu, 25 m. below Ma-hu-fu, the first large town on its banks. Proceeding in

the same direction, it is joined, in N lat. 29° 48′, E long. 106° 40′, near Chung-king-fu, by the Kia-ling-kiang or Ta-kiang, and thence assumes the appellation of Yang-tse-kiang, by which it is distinguished throughout the remainder of its course. See YANG-TSE-KIANG.

KINSHAM, a parish in Herefordshire, 3½ m. E by N of Presteign. Area 1,090 acres. Pop. in 1831, 109; in 1841, 97.

KIN-SHAN, a district and town of China, in the prov. of Keang-su, div. of Sung-keang-fu.

KINSMAN, a township in Trumbull co., in Ohio, U. S., 193 m. NE of Columbus. Pop. 953.

KINTAIL, a parish on the W coast of Ross-shire; 18 m. long, and in general about 6 m. broad; comprehending the three districts of Croe, Glenelchaig, and Glassletter; and intersected by the two arms of Loch-Alsh called Loch-Loung and Loch-Duich. The principal rivers are the Croe and the Elchaig, flowing through the glens of these names. The fall of the Glomach occurs in this parish. The surface is wild and mountainous. Pop. in 1841, 1,168.

KIN-TANG, a district and town of China, in the prov. of Sze-chuen, div. of Ching-tu-fu, in N lat. 30° 52′, E long. 104° 22′.—Also an island between the islands of Chu-chan and Ning-po-fu, in N lat. 30°, E long. 120° 50′.

KIN-TAN-HEEN, a district and town of China, in the prov. of Keang-su, div. of Chin-keang-fu, in N lat. 31° 50′, E long. 119° 35′.

KINTBURY, a parish and village in Berks, 3½ m. E by S of Hungerford, on the river Kennet. Area of p. 7,410 acres. Pop. in 1841, 1,881.

KIN-TE, a town of the Corea, in the prov. of Chu-sin, 150 m. SSW of Han-yang.

KINTEN, a village of Prussia, in the reg. of Gumbinnen, circle of Heidekrug. Pop. 224.

KIN-THEOU-CHAN, a mountain of China, in the E extremity of the prov. of Sze-Chuen, in N lat. 31° 37′, E long. 109° 52′. It is covered with perpetual snow.

KINTORE, a parish and borough in Aberdeenshire. Area of p. about 7,000 acres, exclusive of the large common between it and Kinellar. Pop. in 1831, 1,184; in 1841, 1,299. The parish is intersected along the course of the Don by the canal between Aberdeen and Inverury, which runs through the town.—The royal burgh of K. is situated near the Don, 12 m. NW of Aberdeen, and 4 m. SE of Inverury. It is a town of small size—containing only 84 houses—but of great antiquity, claiming priority to Aberdeen as a burgh. It unites with Banff, Cullen, Elgin, and Inverury, in electing a member of parliament. Constituency, in 1848, 35. The pop. of the town, chiefly agricultural, scarcely exceeds 400. K. gives the title of Earl to the younger branch of the Keith family.

KIN-TSIN-HO, a river of China, which has its source in Shen-se, on the S side of the T-cin-ling mountains; runs ESE; crosses the N extremity of the prov. of Hu-pih, into Ho-nan; bends S; and, re-entering Hu-pih, joins the Han-keang on the l. bank, 50 m. ESE of Yun-yang-fu. Its principal affluent is the Han-ho, which it receives on the confines of Ho-nan.

KINTYRE, the southern division of Argyleshire. It is a peninsula lying between the frith of Clyde and the Atlantic ocean, and joined to Knapdale by the narrow isthmus of Tarbert. It extends about 40 m. from N to S, and is about 6½ m. in average breadth, consisting partly of low and partly of high land; and embraces the parishes of Campbellton, Gigha, Cara, Kilberry, Kilcalmonell, Killean, Kilchenzie, Saddle, Skipness, and Southend: see these articles. Pop. in 1811, 18,285; in 1831, 20,632; in 1841, 19,318. It contains several villages; but the only town of consequence is the burgh of Campbellton. This district has, singularly enough, up to the 17th cent., been reckoned among the South isles; and its history is mixed up with theirs: see article HEBRIDES. The origin of this was a stratagem of Magnus Barefoot, king of Norway, who, having conquered the Isles, made an agreement with Malcolm Canmore, by which the latter was to leave Magnus and his successors in peaceable possession of all the isles which could be circumnavigated. Magnus had himself drawn across the narrow isthmus between K. and Knapdale in a galley by which, it was allowed in these simple times, he had succeeded in adding K. to the possessions accorded him by the treaty.

KINTYRE (MULL OF), the SW point of the peninsula of Kintyre, in N lat. 55° 19′, W long. 5° 40′. It has a lighthouse, elevated 297 ft. above high water, situated on the rocks called the Merchants. The light is fixed, and is seen at 22 m. distance in clear weather. The point of Corsewall bears SSE from this, 26 m.; Portpatrick light, S by E 37 m.; the Maiden rocks, S by W ½ W, distant 20 m.; Copeland light, S by W ½ W, distant 38 m.

KINTZHEIM, a village of France, in the dep. of Bas-Rhin, cant. and 3 m. W of Schelestadt. Pop. 1,120.

KINVARRA, a bay on the coast of co. Galway, opening from the head of Galway bay, nearly opposite to Elaneddy, and penetrating the land 2¾ m. in the direction of S by E. Its width at the entrance is only a ½ m.; but it speedily expands to 2 m.—Also a sea-port town, in the p. of Duras-Kinvarra, co. Galway, at the head of K. bay, 7¼ m. NW of Gort. Pop. in 1831, 824; in 1841, 959.

KINWARTON, a parish in Warwickshire, 1½ m. NE of Alcester. Area 480 acres. Pop. in 1841, 67.

KIN-WEI, a district and town of China, in the prov. of Keang-su, div. of Chang-chu-fu.

KIN-WHA-FU, a division and town of China, in the prov. of Che-keang. The div. comprises 7 districts. The town is 84 m. S of Hang-chu-fu, on an affluent of the Tcheng-tang-chiang, in N lat. 29° 10′ 48″, E long. 119° 50′ 57″. It is populous, and has an extensive trade in hams, prunes, brandy, and rice. This town was formerly extremely flourishing, but suffered much, after a gallant resistance, from the Mantchus.

KIN-WHA-HEEN, a district and town of China, in the prov. of Chi-keang, div. of Kin-wha-fu.

KIN-YANG, a district and town of China, in the prov. of Shen-si, div. of Se-gan-fu, in N lat. 34° 30′, E long. 108° 45′.

KINYTAKOURO, a town of Senegambia, 45 m. WSW of Kamalia.

KINZENBACH, a village of Prussia, in the reg. of Coblenz, circle of Witzlar. Pop. 393.

KINZIG, a river of Germany, which rises in the Black forest, in the W part of Würtemberg, 3 m. SSE of Freudenstadt; runs SW; enters the duchy of Baden, and flows through it in a W and NW course; and falls into the Rhine opposite Strasburg, after a course of 50 m.—It gave name to an administrative division now comprised in the circle of the Middle Rhine.

KINZUA, a village in Warren co., in the state of Pennsylvania, 223 m. NW of Harrisburg. Pop. 237.

KIOG-TEPE, or GHOK-TEPE ('Green Hill'), a summit of Khiva, in the country of the Yamuts, near the shore of the Caspian sea, in N lat. 38° 30′.

KIOGE, a town of Denmark, in the diocese and on the E coast of the island of Sieland, bail. and 24 m. SW of Copenhagen, on a bay and at the mouth of a small river of the same name, in N lat. 55° 27′ 22″, and E long. 12° 13′ 19″. Pop. 2,300. It has a church, an hospital, and a large market-place. Agriculture, navigation, and the manufacture of carpets, form the chief branches of local industry. The port

is small, but the road-stead is good and commodious. The latter is noted as the scene of the signal victory gained by Riels Juel over the Swedish fleet in 1677. The bay of K. forms an embrasure 21 m. in breadth, and 15 m. in depth.

KIOLEN, or KJÖLEN. See DOVRE-FIELD.

KIONG, a parish of Denmark, in the island of Fünen, to the E of Assens. Pop. 1,000.

KIOSTEBEK, or KESTEBEK, a town of Turkey in Asia, in Anatolia, in the sanj. of Sultan-Oghi, near the source of the Bolade, an affluent of the Sakaria, and 40 m. ENE of Shughut.

KIOUKTALUM, a town of Burmah, in the district of Mranma, 25 m. W of Ava, on the l. bank of the Irawadi. It is finely situated, and possesses a magnificent temple, dedicated to Godama.

KIOU-LONG-KEANG, a name by which the Meinam-kong, or Mekon, is distinguished in its passage through the Chinese prov. of Yun-nan.

KIOUMIS, a tribe of Indians, in Russian North America, who inhabit the peninsula between the gulf of Kotzebue on the N, and the bays of Chactoole and Norton on the S.

KIOUNSAY, or KYAONSAIK, a town of Burmah, in the district of Talain, 69 m. WNW of Pegu, on the r. bank of the Irawadi. It is well and substantially built on piles, and contains several fine temples. It possesses several cotton-factories and extensive indigo-works.

KIOU-SIOU, or XIMO, an island of Japan, extending between 31° and 34° N lat., and between 129° 20′ and 132° E long. It is separated from the island of Nifon, on the N, by a strait about 1½ m. in breadth; and from that of Sitkokf by the Boungo channel. On the NW it is bathed by the strait of Corea, and on other sides by the ocean. Its length, from N to S, is about 240 m., and its medium breadth 60 m., comprising a total superficies of about 9,000 m. Numerous islands are scattered around its coasts; of these, on the W, the principal are Firando, Timoura, Golto, and Amakousa, and, on the S, Tanega-Sima, from which it is divided by Dieman strait. The shores are studded with rocks, and extremely sinuous in their outline. On the E are Capes Cochrane, D'Anville, and Nagaev; on the S, forming the S extremity of the island, is Cape Tchichagov; on the W, Kankosima, Salsouma, Simabara, and Oomoura bays; and at the S extremity of the peninsula of Oomoura, Cape Nomo. The island presents a generally mountainous surface, and contains several volcanoes. It is watered by numerous streams, the largest of which is the Kusnajava; and abounds in mineral springs. The soil is fertile, and exhibits, even to the highest summits, the most luxuriant cultivation. Earthquakes are of occasional occurrence. The last took place in 1826, and was followed by an eruption of the volcano of Illigigama, by which a large number of persons were destroyed. The island of K. is divided into 9 provinces, viz. Tsikouzen, Bousen, Boungo, Fiouga, Ousoumi, Satsouma, Figo, Tsikovgo, and Fisen. Its capital, Nagasaki, is the only port open to foreigners.

KIPCHAK, a village of Independent Tartary, in the khanate and 85 m. NE of Khiva, at some distance from the l. bank of the Oxus. It contains about 200 houses, and is surrounded by a wall, now much dilapidated.—Also a people of Turkish origin, who inhabit the SE part of Independent Tartary.

KIPFENBERG, a town of Bavaria, capital of a seignory of the same name, in the circle of Middle Franconia, on the Altmuhl, 33 m. W of Ratisbon. Pop. 729. It contains 2 churches and a school, and the remains of a Roman fort, and has a distillery of brandy, several large breweries, and a brick-kiln. Pop. of seignory 7,066.

KIPLIN, a township in the p., and 3 m. E by S of Caterick, N. R. of Yorkshire, on the Swale, and on the Great North of England railway. Area 250 acres. Pop. in 1831, 103; in 1841, 114.

KIPOKIPO, a bay on the NW coast of the island of Mâoui, in the group of the Sandwich islands. It is safe and commodious.

KIPPAX, a parish and township in the W. R. of Yorkshire, 7½ m. E by S of Leeds, and 18 m. SSW of York. Area 3,400 acres. Pop. in 1841, 2,232.

KIPPEN, a parish partly in Perthshire, and partly in Stirlingshire, on the S side of the Forth, comprising a superficial area of about 21 sq. m. Pop. in 1831, 2,085; in 1841, 1,922. It contains a village of the same name, 9½ m. W of Stirling. Pop. in 1831, 600; in 1841, 397.

KIPPENHEIM, a town of Baden, in the circle of the Upper Rhine, bail. and 4 m. N of Ettenheim, and 11 m. SSE of Strasburg. Pop. 1,917. It contains 2 churches, a Catholic and a Lutheran, and a synagogue. It has 2 annual fairs and a weekly market. The environs afford good wine, and large quantities of fruit.

KIPPURE, a mountain on the confines of the counties of Dublin and Wicklow, 11 m. SSW of Dublin. It rises to the height of 2,473 ft. above sea-level.

KIRALY (SZABAD ST.), a town of Hungary, in the comitat of Baranga, 18 m. NW of Siklos, and 54 m. NNE of Posega.

KIRALY-DAROCZ, a town of Hungary, in the comitat and 17 m. SSW of Szathmar, on the Kraszna. Its inhabitants are chiefly Hungarians and Wallachians.

KIRALY-HEGY. See KÖNIGSBERG.

KIRALY-HELYMECZ, a town of Hungary, in the comitat and 8 m. E of Templin. It has 2 churches, a Catholic and a Reformed.

KIRATAS, KIRAUTS, or KICHACKS, a people of Hindostan, in Nepal, who inhabit the valleys of the Himalaya mountains to the N and NE of Nepal properly so called. They claim a Rajput descent, but their features distinctly mark them as of Tartarian origin. They live in huts, and bestow some attention upon agriculture. Polygamy is common amongst them. The Nagari character is used by the K. in writing, but they are said to have once had a character of their own. Large numbers of this people are found scattered over the N parts of Bengal and Bahar, pursuing the nomadic habits and vocations of gypsies. They appear to have always been a warlike people, and to have formerly extended their conquests into the plains of Kamrup and Matsya, now composing the Bengal districts of Dinajpur and Rungpur. They adhere to Bhuddism.

KIRATZA, a town of Abyssinia, on the E side of the lake of Dembea, containing about 1,500 inhabitants. Its houses, each enclosed in its own thorn fence, exhibit a neatness little known in other parts of Abyssinia. Cotton is manufactured to a considerable extent here; its smiths produce iron ploughshares, knives, razors, and sword-blades, all of superior quality; and shields, book-covers, and other articles in leather, are elegantly made.

KIRAUEA. See KILAUAEA.

KIRBERG, a town of the duchy and 15 m. E of Nassau, bail. and 8 m. SE of Limburg. Pop. 1,100.

KIRBY, a township of Caledonia co., in the state of Vermont, U. S., 36 m. NE of Montpelier. It is generally mountainous, and is crossed in the S by Moose river. Pop. in 1840, 520.

KIRBY, a parish in Essex, 10 m. SE of Manningtree, on an inlet of the North sea, opposite Horsey island. Area 3,530 acres. Pop. in 1841, 924.

KIRBY. See KIRKBY.

KIRBY (COLD), a parish in the N. R. of Yorkshire, 7 m. ENE of Thirsk. Area 2,100 acres. Pop. in 1831, 185; in 1841, 182.

KIRBY (MONKS), a parish in the co. of Warwick, 7 m. NNW of Rugby, in the line of the Midland counties railway. The p. includes the hamlets of

Copston-Magna, Easenhall, Paitten, and Stretton-under-Foss, with Newbold-Revel. Area 9,640 acres. Pop. in 1831, 1,637; in 1841, 1,861. The church is an ancient Gothic building.

KIRBY-BEDON, a parish and village in Norfolk, 3½ m. SE by E of Norwich. The v. is situated on an acclivity overlooking the vale of the Wentsum. Area 1,120 acres. Pop. in 1831, 245; in 1841, 265.

KIRBY-CANE, a parish in Norfolk, 4½ m. NW of Beccles. Area 1,290 acres. Pop. in 1841, 458.

KIRBY-GRINDALYTH, a parish and township in the E. R. of Yorkshire, 8 m. ESE of New Malton. The p. includes the townships of Duggleby, K., and Thirkleby. Area 7,970 acres. Pop. in 1841, 474.

KIRBY-KNOWLE, a parish and township in the N. R. of Yorkshire, 4 m. NE by N of Thirsk. The p. includes the chapelry of Bagby, and the townships of Balk and K. Area 3,550 acres. Pop. 553.

KIRBY-UNDERDALE, a parish in the E. R. of Yorkshire, 6½ m. N of Pocklington. Area 5,060 acres. Pop. in 1831, 293; in 1841, 324.

KIRBY-WHARFE. See KIRKBY-WHARFE.

KIRCHBERG, a town of Prussia, in the prov. of the Rhine, reg. and 29 m. SSW of Coblenz, circle and 6 m. WSW of Simmern. Pop. 1,523. It has a castle, and 2 churches,—a Catholic and a Reformed. Linen forms the chief article of local manufacture.—Also a town of Saxony, in the circle of the Zwickau, bail. and 2 m. SW of Wiesenburg. Pop. 4,149. It has manufactories of hosiery, lace, woollen fabrics, and paper.—Also a village of Nassau, SE of Mensfelden.—Also a town of Würtemberg, in the circle of the Jaxt, bail. and 4 m. SE of Gerabronn, and 21 m. N of Ellwangen, on the l. bank of the Jaxt, which is here crossed by a fine bridge, and at an alt. of 1,102 ft. above sea-level. Pop. in 1840, 1,250. It is well-built, and has a castle belonging to the prince of Hohenlohe-Kirchberg.—Also a village of Switzerland, in the cant. of Aargau, district and 1½ m. NNE of Aargau, near the l. bank of the Aar. See also KILCHBERG.

KIRCHBERG (OBER), a village of Würtemberg, in the circle of the Danube, on the Iller, S of Ulm. Pop. 520.

KIRCHBERG-AM-WAGRAM, a town of Austria, in the country below the Ens, circle of Korneuburg. Pop. 407.

KIRCHBERG-AM-WALDE, a town of Austria, in the country below the Ens, 48 m. SSW of Vienna, on the Wechsel. Pop. 791. It has a manufactory of chemical substances.

KIRCHBERG-AM-WECHSEL, a town of Austria, in the country below the Ens, circle of Vienna, on the Otterbach. Pop. 570.

KIRCHBROMBACH, a town of Hesse-Darmstadt, in the prov. of Starkenburg, 10 m. from Breuberg. Pop. 904. It has a manufactory of cloth.

KIRCHBUHEL, a village of the Tyrol, on the Inn, SW of Kufstein.

KIRCHDITMOLD, a village of Hesse-Cassel, in the prov. of Lower Hesse, circle and near Cassel, on the Habichtwald. Pop. 732.

KIRCHDORF, a town of the archd. of Austria, in the circle of the Traun, 18 m. SW of Steier, on the r. bank of the Krems.—Also a town of Hanover, in the co. of Hoya, 6 m. NNW of Uchte. Pop. 360.—Also a parish and village of Switzerland, in the cant. of Aargau, 3 m. WNW of Baden, near the r. bank of the Limmat. Pop. 1,357.—Also a village of the grand-duchy of Hesse, NE of Geisen. Pop. 1,240.

KIRCHDRAUF, or SZEPES-VARALLYA, a town of Hungary, in the com. of Zips, 6 m. ESE of Leutschau. Pop. 2,850, of whom about 800 are Lutherans.

KIRCHEIB, a village of Prussia, in the prov. of the Rhine, and reg. of Coblenz, NW of Altenkirchen. Pop. 210.

KIRCHEN, a village of Baden, in the circle of the See, SE of Donaueschingen.—Also a village in the circle of the Upper Rhine, NW of Lorrach. Pop. 815.

KIRCHENKIRNBERG, a village of Würtemberg, in the circle of the Jaxt, NW of Gschwend. Pop. 300.

KIRCHHAIN, a circle and town of Hesse-Cassel, in the prov. of Upper Hesse. The circle or administrative subdivision consists of three detached portions of territory, comprising a total area of 140 sq m., of which nearly one-half are arable or covered with wood. Pop. in 1840, 34,289, of whom 700 were Jews. Agriculture forms the chief branch of local industry. Grain is raised in large quantities, and lint for local consumption. The number of domestic animals reared in the locality averages 1,800 horses, 2,000 oxen, 9,600 cows, 27,700 sheep, 4,600 pigs, and 1,500 goats. The circle is divided into 4 justiz-amt, and contains 7 towns and 38 villages.—The capital, which bears the same name, is 9 m. E of Marburg, and 45 m. SW of Cassel, at the confluence of the Ohm and Wohra. Pop. 1,850. It is enclosed by walls.—Also a town of Prussia, in the prov. of Brandenburg, reg. and 66 m. SE of Frankfort, circle and 14 m. SSW of Luckau, on the Little Elsler. Pop. 2,135. It has several manufactories of woollen fabrics.

KIRCHHAUSEN, a village of Würtemberg, in the circle of the Neckar, bail. and 4 m. NW of Heilbronn, and 27 m. N of Stuttgard. Pop. 1,100.

KIRCHHEILINGEN, a village of Prussia, in Saxony, reg. of Erfurt, circle of Langensalza, N of Tennstadt. Pop. 685.

KIRCHHEIM, a town of Bavaria, in Suabia, 25 m. SW of Augsburg, on the Mindel. Pop. 700. It has a castle.—Also an oberamt or bailliage and town of Würtemberg, in the circle of the Danube, 12 m. WSW of Goppingen, and 33 m. NW of Ulm, in a fine valley, on the Lauter. Pop. 5,256. It is well-built, and is surrounded by boulevards planted with rows of trees. It has a castle, built by the duke Ulrich in 1538, and two churches. It possesses manufactories of cotton and linen fabrics, ribbons, flannel, thread, sealing-wax, turnery, and musical instruments; and carries on an active trade in cattle and wool. Pop. of bail. 23,754.—Also a village in the circle of the Neckar, on the river of that name, bail. and 4 m. NW of Heilbronn, and 27 m. N of Stuttgard. Pop. 1,630. Wine is cultivated in the environs.—Also a village of Prussia, in the reg. of Cöln, circle of Rheinbach. Pop. 742.—Also a village in the reg. and circle of Erfurt, on the Wipper. Pop. 518.

KIRCHHEIM-BOLAND, a town of Bavaria, in the circle of Pfalz, district and 18 m. NE of Kaiserslautern, and 33 m. NW of Spire, near the Donnersberg. Pop. 3,120. It has a castle, a church containing the mausoleum of the dukes of Nassau, a custom-house, and a classical school. It possesses a large salt-magazine, and several manufactories of musical instruments. In the vicinity are mines of iron, copper, mercury, and cinnabar.

KIRCHHELLEN, a village of Prussia, in the reg. of Munster, circle of Recklinhausen. Pop. 400.

KIRCHHOLM, a town of Russia in Europe, in the gov. of Livonia, district and 15 m. SSE of Riga, on the r. bank of the Dvina. It has a castle and a church. The date of its foundation is carried back to the year 1167.

KIRCHHORDE, a village of Prussia, in the reg. of Arnsberg, circle of Dortmund. Pop. 282.

KIRCHHOVEN, a village of Prussia, in the prov. of the Rhine, reg. and 21 m. N of Aix-la-Chapelle, circle and 2 m. NW of Heinsburg. Pop. 205. Weav-

ing, brewing, and distillation from the potato, form the chief branches of local industry.

KIRCHHUNDEM, a village of Prussia, in the reg. of Arnsberg, circle of Olpe. Pop. 272.

KIRCHIEHANSKAIA, a fortress of Russia in Europe, in the gov. of Perm, district and 66 m. ENE of Krasno-Oufimsk, built in the reign of Elizabeth to repress the incursions of the Bachkirs. In the vicinity are several villages.

KIRCHLAMITZ, or KIRCHENLAMITZ, a landgericht-bezirk or presidial, and town of Bavaria, in the circle of Upper Franconia, 26 m. NE of Bayreuth, on the r. bank of the Lamitz. Pop. 1,400. It has manufactories of cotton and linen fabrics, and of machinery. Pop. of presidial 12,716.

KIRCHLAUTER, a village of Bavaria, in the circle of Lower Franconia, NW of Bamberg. Pop. 354.

KIRCHLEERAN, a village of Switzerland, in the cant. of Aargau, district and 6 m. E of Zofingen, and 9 m. S of Aargau. Pop. of parish 961.

KIRCHSCHEIDUNG, a village of Prussia, in the reg. of Merseburg, circle of Querfurt. Pop. 385.

KIRCHSCHLAG, a town of the archduchy of Austria, in the country below the Ens, and lower circle of the Wienerwalde, 23 m. S of Neustadt, and 56 m. S of Vienna, on a mountain near the Gunz. Pop. 650. It has a castle.—Also a village in the circle of the Muhl, W of Neumarkt.

KIRCHVEISCHEDE, a village of Prussia, in the reg. of Arensberg, circle of Olpe. Pop. 310.

KIRCHWARDER, a parish in the territory of the Vier-Lande, depending upon the towns of Hamburg and Lubeck, in an island of the Elbe, 11 m. SE of Hamburg. Pop. 2,700. An important custom-house stands near its S extremity.

KIRCHWEILER, a village of Prussia, in the reg. of Trier, circle of Daun. Pop. 259.

KIRCHWORBIS, a village of Prussia, in the prov. of Saxony, and reg. of Erfurt, S of Bleicherode. Pop. 800.

KIRCHZARTEN, a town of the duchy of Baden, in the circle of the Upper Rhine, bail. and 4 m. ESE of Freyburg, in a valley of the same name, at the foot of the Schwartzenberg. Pop. 640.

KIRDFORD, a parish in Sussex, 4½ m. NE of Petworth, on a branch of the Arun. Area, including Hasfold, Shipburn, and Pallingham, 14,950 acres. Pop. in 1831, 1,653; in 1841, 1,973. Here are excellent quarries of the Sussex or Petworth marble. This limestone is of various shades of bluish grey, mottled with green, and ochraceous yellow, and is composed of the remains of fresh-water univalves, formed by a calcareous cement into a beautiful compact marble. It bears a high polish, and is elegantly marked by the sections of the shells which it contains. There is historical proof of its having been known to the Romans; and in the early Norman centuries it was much sought after, and—as the Purbeck marble was—cut into small insulated shafts of pillars which were placed in the *triforia* or upper arcades of cathedral churches, as at Canterbury and Chichester.

KIRENGHA, a river of Russia in Asia, in the gov. of Irkutsk, which has its source 180 m. NE of Irkutsk; runs N; and joins the Lena, on the r. bank, a little below Kirensk, and after a course of upwards of 300 m.

KIRENSK, a district and town of Russia in Asia, in the gov. of Irkutsk. The district occupies the N part of the gov., and is in some parts marshy, but is to a great extent covered with wood. The goitre is common amongst its inhabitants. The town is 465 m. NNE of Irkutsk, on the Lena, a little above the confluence of the Kirengha, in a plain surrounded with rocks. It contains 3 churches, and a large assemblage of houses. Hunting and the fur trade form the chief employments of the inhabitants. The surrounding district is fertile, and, notwithstanding the rigour of the climate, is very productive. The sturgeons and sterlets fished in the streams here are considered the best in Russia. The town of K. was founded in 1655.

KIRGHIZ-KAZAKS (STEPPES OF THE), or NORTHERN TURKESTAN, an extensive tract of Western Asia; bounded by the N part of the Caspian sea, and the Ural or Yaik river on the W; the Ural-Tau on the W and NW; the Ula-Tau and the Algydim-Shalo range on the N and NE; by Sungaria or the country of the Eluths on the E; and the Aral-Nor, the lower course of the Syr, and the dominions of the khan of Khokan on the S. Beyond the Algydim-Shalo mountains, the steppe of Issim, a barren region watered by the Issim and Irtish, is usually included in the K. territory, the boundaries of which may be more generally described as consisting of Asiatic Russia on the NW, N, and NE, from the river Ural to the Irtish; Chinese Tartary on the SE; Turkestan, Khiva, Bokhara, and the Turkoman hordes on the S; and the Caspian on the W.--The K. are divided into three hordes,—the Little, the Middle, and the Great. The first occupies the steppe between the Yaik, the sea of Aral, and the S frontiers of the Russian gov. of Orenburg; the second wanders alongst the N side of the Aral-Nor as far as the Sarasu on the SE, and over the Issim steppe beyond the Algydim - Shalo; the third has been nominally at least subjected to the authority of the khan of Khokan, and occupies the N part of that khanat. In addition to these hordes, Mr. Eversman, in 1828, visited another horde, called the Bucaic, from the name of its khan Buki, a chief, it would seem, of the Little horde, who, after the departure of the Torgaut Eluths for Sungaria, obtained permission from the Russian government to occupy the steppe between the Wolga and the Yaik. About the commencement of the present cent., Buki arrived with a great number of K. from beyond the Yaik, and submitted himself entirely to the Russian authority. This horde is at present in a very prosperous state, and contains 12,000 *kibitkis* or tents; and the pop. of these is estimated at 60,000 males. Supposing the females to be equally numerous, this would give 10 to a kibitka on an average. The wealth of this horde consists, like that of other pastoral tribes, in cattle; and amounted, Eversman was told, to 4,000,000 sheep, 1,000,000 horses, 500,000 camels, and 200,000 horned cattle. There was probably considerable exaggeration, however, in this estimate. According to Dr. Bolshoi's account—who spent 18 months amongst the K. of the Middle horde, as a prisoner and a slave, in 1803 and 1804—these people, at least that portion of them who dwell at the mouth of the Syr, are poor, ignorant, cruel, and frequently subjected to great misery for want of food in their inhospitable deserts. The khan of the tribe with whom he sojourned had only 8 ewes, 2 cows, 4 camels, and 1 horse; and Bolshoi himself was reduced to such a degree of hunger amongst them that he would often tear a piece of horse-flesh from a dog, as they gave him no other food than bran and water or sour milk, and sometimes chaff and water. The country to the N of the Syr is called the desert of Barsuk; and contains nothing but saline plants and salt ponds. From the Syr N to the large and bitter lake of Szor-Bulak, the whole country is called Shiyek-Kum, or 'Border of the desert;' and beyond this is the Portshakum, abounding in plants bearing small juicy berries. Beyond this is the desert of Karakum or 'Black sand.' In the W part of this desert are many lakes containing salt; and to the E is the large lake of Aksulbarbii.—The Great K.

horde, which is more powerful and possesses more pastures than all the other hordes put together, possesses all the tract E of the Sarasu, which divides them from the Middle horde, to the frontiers of Sungaria and Khashghar. They not only possess the whole W face of the great buttress of Central Asia to the N of the Jasper mountains, with their lateral ranges and intermediate valleys, but they also pasture their flocks on both sides of the lofty Kynder-Tau, from its W termination to where it joins the Kichuk-Tagh and the Alakula; whilst to the S of Khokan the slopes of the Jasper mountains are pastured also by the same horde; and to the E of the same khanat, beyond Ush and Uzkend, their flocks, tents, and camps are to be found all the way up the N and S branches of the Syr, to their remotest sources in the crest of the Belur or Tsungling, and even beyond it, to within three days' journey of Khashghar. Whilst the E parts of this extensive pastoral region are abundantly supplied with wood, grass, and water, except toward the crest of the great range which is beyond the limit of vegetation, the western part is as sterile and desert as that to the W of the Sarasu. To the E of the Sarasu is the desert of Jity-Kongur, so called from the sandy hillocks thrown up by the wind. This desert extends 8 caravan journeys E to the Tchui, a river which issues from the W angle of the great lake of Issi-Kul, denominated by the Eluths Temsurtu-Nor, or 'the Lake of iron.' It directs its course first to the NW; and receives a considerable number of small streams. In this direction it runs as far as 46° N lat., when it turns to the W, forming a succession of lakes, and ends by discharging its waters into the Kaban-Kulak, also called Khoki-Kol, or Beile-Kol. The upper part of the Tchui, as given in many modern maps, is not that river, but the Adji-Bak-Bulan, or Khar-Khaitui. From the Tchui to the district of Turkestan there is only a succession of dry and sandy deserts. Farther E, towards the mountains, fertile lands and excellent meadows, dense forests and wooded hills, present themselves; but as this extensive region has never been explored by European travellers, we cannot pretend to describe it. Whilst the Little and Middle hordes are now to be regarded as dependent on Russia, or mainly under Russian influence, the Great horde has been usually regarded as tributary to China ever since the conquest of the Eluths in 1759; but the khan of Khokan is, as we have said, their most influential neighbour, if not their ruler. Izzet Oollah says, that all the K. to the E of Khokan and towards Khashghar are subject to the khan of Khokan. It is known that the K. tribes, amongst whom the rebel chief of Khashghar took refuge in 1827, after his defeat by the Chinese troops, were compelled to deliver him up to the Chinese government.

Respecting the name, origin, and history of this erratic nation little can be said; nomadic tribes have no annals. The K. in the time of Jenghis-khan dwelt far to the E of their present seats, for they then wandered on the banks of the Jenisei. They belong to the great Turkish race, and speak a dialect of their language; but have become mingled more or less with Mongolian blood. They have black hair, a dark sun-burnt complexion, and small lively eyes between strongly-projecting lids. Though they are commonly called Kirghiz or Kirghissians in our modern works, and are so called by Abulghazi, yet they denominate themselves Kazaks, *i. e.* 'robbers,' and Sara-Kaisaks, *i. e.* 'Robbers of the desert.' The Usbecs, to distinguish them from the Cossacks of the Yaik and Wolga, call these latter Kuzzak Urus, or 'Russian Kuzzaks;' yet modern writers make the Kazaks, Kaisaks, or Kuzzaks a different tribe or horde from the Kirghiz, and the Buruts, who dwell farther E. In old maps they are denominated *Kosacci Horda*, and Kasatschai Horda, and sometimes simply Kassats; but their more modern name is Kirghiz Kaisaks. According to Klaproth they are called Kanak by the Chinese, in the great geographical work of the Dai-syn-y-tundshi, whilst he himself calls them Buruts. That work divides them into two great divisions; 'the Kanak of the right,' or the Eastern Buruts, who inhabit the mountains of the Kynder-Tau to the NE of the Syr; and 'the Kanak of the left,' or the Western Buruts, who inhabit the mountains of the Khashghar-Divan, or the Jasper mountains to the S of Khokan. Like the other K. the Great horde are Mahommedans, but they have neither korans, mollahs, nor mosques. Respecting the numbers of the Great horde, we have no information; but considering the great range of mountain-pasture they possess, extending eight degrees from N to S, and at least as many from E to W, including level steppes, it must be numerous for a nation of nomades. For 350 m. of his road from Khashghar to Ush, the frontier of Khokan, Izzet Oollah continually met K. encampments. On these grounds, and considering that their pasture-grounds are much better and far more extensive than those of the other two hordes put together, their numbers cannot be less than 1,000,000. M. Levchine carries their numbers to even 2,000,000, or 400,000 tents each containing 5 or 6 individuals: assigning 75,000 tents to the Great horde; 165,000 to the Middle; and 160,000 to the Little horde. The three hordes are connected together only by affinity of race, language, and the intermarriages of their chiefs: their political and social ties are very feeble. They pay but a precarious submission even to their own chiefs; and their characters are described by M. Levchine as crafty, fickle, cruel, and selfish. They are the chief slave-catchers of the steppes, and supply Bokhara, Khiva, and other Turkoman states, with almost all their Russian slaves. Sometimes the eldest son, on the death of the father, gets rid in this way of his sisters, the support of whom would otherwise devolve upon him. The dignity of khan was abolished among all the hordes, as far as Russian influence could abolish it, several years ago; but they have hitherto defeated all efforts of the Russian government to fix them in towns, or teach them the arts of civilized life.

KIRIA, or KERRIA, a town of Chinese Turkestan, in N lat. 37°, E long. 82° 54′, 180 m. ESE of Khotan, on the W bank of a small river of the same name. It carries on an active trade with Yarkand in gold dust from mines in the vicinity, silk, and raisins; and imports from the Russian frontier, cloth, brocades, furs, and steel, in exchange for tea, rhubarb, and sal-ammoniac. The river descends from the Kouenloun mountains on the N confines of Tibet, and after a NE course of about 70 m. falls into the Yechil-Kul or Green lake 30 m. NE of Kiria.

KIRIAKI, a village of Turkey in Europe, in Albania, in the sanjak and S of Jamna.

KIRICALTA, a village of Turkey in Europe, in Albania, in the sanjak and NE of Scutari.

KIRIKOAS, a people of New Grenada, who inhabit the district between the rivers Meta and Vichada.

KIRIKOVKA, a town of Russia in Europe, in the gov. and 57 m. WNW of Kharkov, district and 11 m. NE of Akhtirka.

KIRILOV, a town of Russia in Europe, cap. of a district in the gov. and 285 m. ENE of Novgorod, and 27 m. ESE of Bielozersk, on a small river, and in the vicinity of three lakes. Pop. 2,163. It has a cathedral, numerous churches, a library, and a convent founded in 1398 by the Kiril, and from which

the town takes its name. The manufacture of images for the Greek church forms the chief branch of local industry. In the vicinity is a canal recently constructed for the junction of the navigation of the Volga and North Dwina.

KIRIN, a district of Mantshuria, bounded on the N by the Sagalien; on the E and SE by the sea of Japan; on the S by the province of Leau-tung and the Corea; and on the W by Mongolia. It presents a generally flat surface, in some parts densely covered with wood and presenting but little to benefit the agriculturist. It is intersected by the Ousouri and Songari, both navigable rivers, and by numerous smaller streams, all of which discharge themselves into the sea of Japan. A considerable sheet of water, named Kin-ka or Hin-ka lake, forms one of the chief sources of the Ousouri. The principal summits are the Sihata mountains near the coast, the Amba-Chanyan-Alin range on the frontier of the Corea, and Chanyen mountain to the NE of the capital. Ginseng forms its chief production. The pop., which is estimated at 307,781, is of the most miserable description. The towns, which are only three in number, consist of a few ill-built dwellings enclosed by a mud wall. The principal of these, Kirin-ula-hotun is on the l. bank of the Songari, in N lat. 43° 46′, and 10° 24′ E long. of Peking. It is the residence of a Mantchoo general or viceroy, and is venerated as the ancient burying-place of the imperial family of China. Its inhabitants are chiefly exiles.

KIRINA, a village of Central Africa, between Somu and Cougalia. It contains a pop. of between 500 and 600, who are chiefly supported by making ropes of hemp, of the bark of trees, and of the leaves of a plant called ronnier, which they sell to caravans passing to Jenné.

KIRINJI, a town of Asiatic Russia, in the gov. of Irkutsk, on an island formed by one of the branches of the Lena. It contains about 200 houses, with 4 churches, and a monastery. Immense quantities of potatoes, cabbages, carrots, onions, beet-root, and other vegetables, are sent down the Lena, in boat-loads, from this place, as far as Yakutsk, a distance of 1,500 versts.

KIRJATCH, a town of Russia in Europe, in the gov. and 66 m. W of Vladimir, district and 23 m. NW of Pokrov, on the r. bank of a river of the same name. Pop. 800. It has 5 annual fairs. This place formerly bore the name of Selivanova-gora. It was erected into a town in 1788.—The river K. has its source in the district of Alexandrov, runs S, passes the town of the same name, and joins the Kliazma, on the l. bank, 6 m. SW of Pokrov, and after a course of about 60 m.

KIRKAGATCH, a town of Asia Minor, in Anatolia, in the sanjak of Sarukhan, 21 m. NW of Akhissar, and 55 m. NE of Smyrna, near the l. bank of the Grimakli. It is large and populous; and carries on an active trade in cotton, chiefly of local produce. Besides its cotton, the district is famous for its honey, which is of the consistence of butter, and is largely exported packed up in drums like figs. The Greeks, who form nearly a half of the pop., have a richly ornamented church here.

KIRK-ANDREWS-UPON-EDEN, a parish in Cumberland, 3¼ m. WNW of Carlisle, on the river Eden, and intersected by the canal from the Solway to Carlisle. Area 1,050 acres. Pop. in 1841, 142.

KIRK-ANDREWS-UPON-ESK, a parish and township in Cumberland, 2¾ m. NNE of Longtown. Here are two stone-bridges across the Sark; also a cast-iron one at Garristown across the Esk. In this p. is Solway-moss. Area 21,630 acres. Pop. 1,932.

KIRK-ANDREWS (Middle), a township in the p. of Kirk-Andrews-upon-Esk, Cumberland. Pop. in 1831, 491; in 1841, 458.

KIRK-ANDREWS (Nether), a township in the p. of Kirk-Andrews-upon-Esk, Cumberland. Pop. in 1831, 485; in 1841, 444.

KIRK-ARBORY, a parish in the Isle of Man, 2½ m. NW of Castletown. Pop. in 1841, 1,615.

KIRKBEAN, a parish at the SE extremity of the stewartry of Kirkcudbrightshire, occupying a peninsular place between the estuary of the Nith and the body of the Solway frith. The tides flow here 5 hours, and ebb 7; and, owing to their rapidity, occasionally upset vessels. The coast is low and sleachy, and slowly gains accessions of excellent salt pasture from the recession of the sea. On Southerness-point, the most southerly land, running ¾ m. into the sea, stands a tower, erected as a landmark for vessels. Carse or Carsethorn bay, near the N extremity of the parish, and 11 m. S of Dumfries, is a safe anchoring place. On the N boundary of the p. rises the imposing form of the far-seen Criffel, sending its summit 1,895 ft. above the level of the sea, at a distance of 1¾ m. from the margin of the Nith, the SE termination of a ridge which runs 10 m. inland, and the monarch-mountain of all the country lying S of the southern highlands. Pop. 891.

KIRKBOST, an island of the Hebrides, about 1 m. long, and very narrow, lying off the W coast of N. Uist. It is insulated only at high water. It was at one time a tract of considerable value; but being composed of fine sand, a great part has been literally blown away.

KIRK-BRIDE, a parish in Cumberland, 5½ m. NNW of Wigton, on the river Wampool. Area 1,750 acres. Pop. in 1831, 383; in 1841, 372.

KIRK-BRIDE. See Bride's-Kirk.

KIRK-BURN, a parish and township in the E. R. of Yorkshire, 4 m. SW of Great Driffield. The church exhibits one of the most perfect specimens of Anglo-Norman architecture in the kingdom. Area 6,320 acres. Pop. in 1831, 489; in 1841, 508.

KIRK-BURTON, a parish and township in the W. R. of Yorkshire, 5 m. SE of Huddersfield. The p. includes the townships of Cartworth, Cumberworth-Half, Foulston, Hepworth, K., Shelley, Shepley, Thurstonland, Wooldale, and the chapelry of Holmfirth. The woollen manufacture is extensively carried on in these townships. Area 15,990 acres. Pop. in 1831, 15,731; in 1841, 18,452.

KIRKBY, a chapelry in the parish of Walton-on-the-Hill, Lancashire, 4½ m. NW by N of Prescot. Area 4,010 acres. Pop. in 1841, 1,476.

KIRKBY-WITH-NETHERBY, a township in the p. of Kirkby-Overblows, W. R. of Yorkshire, 5 m. WNW of Wetherby. Area 1,180 acres, Pop. 226.

KIRKBY-IN-ASHFIELD, a parish in Nottinghamshire, 4½ m. SW of Mansfield, intersected by the Mansfield and Pinxton railway. Area 5,590 acres. Pop. in 1831, 2,032; in 1841, 2,143.

KIRKBY-ON-BAIN, a parish in the co. of Lincoln, 4¾ m. SSW of Horncastle, on the river Bain. Area 5,110 acres. Pop. in 1831, 596; in 1841, 680.

KIRKBY-BELLARS, a parish in Leicestershire, 2½ m. WSW of Melton-Mowbray, on the river Wreak, and intersected by the Melton canal. Area 2,590 acres. Pop. in 1831, 227; in 1841, 236.

KIRKBY-IN-CLEVELAND, a parish and township in the N. R. of Yorkshire, 2¼ m. SSE of Stokesley. It includes the townships of Great and Little Broughton and K. Area 5,020 acres. Pop. 712.

KIRKBY (East), a parish in Lincolnshire, 5 m. WSW of Spilsby. Area 1,670 acres. Pop. 436.

KIRKBY-FLEETHAM, a parish in the N. R. of Yorkshire, 4 m. SE by S of Catterick, on the river Swale. Area 2,950 acres. Pop. in 1841, 657.

KIRKBY-GREEN, a parish in Lincolnshire, 7 m. N of Sleaford. Area 680 acres. Pop. in 1841, 87.

KIRKBY-ON-THE-HILL, a township in the parish of Kirkby-Ravensworth, N. R. of Yorkshire, 5 m. NNW of Richmond. Area 1,110 acres. Pop. in 1831, 118; in 1841, 109.

KIRKBY-IRELETH, a parish in Lancashire, 4½ m. NW of Ulverstone, on the river Duddon. It includes the townships of Dunnerdale, Low-Quarter, Middle-Quarter, and Woodland and Heathwaite, and the chapelries of Broughton and Leathwaite. Area 22,220 acres. Pop. in 1841, 3,489. Here are extensive quarries of excellent dark blue slate.

KIRKBY-KENDAL. See KENDAL.

KIRKBY-LONSDALE, a parish and market-town in Westmoreland, 11 m. SE of Kirkby-Kendal, on the river Lune, over which there is here a stone-bridge of great antiquity, consisting of three ribbed arches. The p. includes the townships of Casterton, K., and Lupton, and the chapelries of Barbon, Firbank, Hutton-Roof, Killington, Mansergh, and Middleton. Area 23,760 acres. Pop. in 1831, 3,949; in 1841, 4,178. The church is a noble structure, with a square tower.—The town of K. is situated in a beautiful valley, watered by the Lune; and consists of several handsome streets, with numerous cross streets, running chiefly E and W from the principal one, through which the high road from Settle to Kendal passes. The houses are built of polished freestone, and have a neat appearance. The pop. in 1841 was 1,285. The manufacture of knit stockings, for which this place was formerly noted, has greatly declined. The weaving of carpets and blankets is now carried on; and several mills for grinding bark and grain are driven by water-power derived from the Lune. The family of Lowther derive the title of earl from this place. K. is one of the polling places for the election of the county-members.

KIRKBY-IN-MALHAM-DALE, a parish and township in the W. R. of Yorkshire, 4½ m. ESE of Settle, at the source of the Aire. The p. includes the townships of Airton, Calton, Hanlith, K., Malham, Malham-moor, Otterburn, and Scosthorpe. Area of p. 22,040 acres. Pop. in 1841, 947.

KIRKBY-MALLORY, a parish in Leicestershire, 4½ m. NNW of Hinckley, on a branch of the Soar. It includes the chapelry of Earl Shilton. Area 3,110 acres. Pop. in 1831, 2,261; in 1841, 2,479.

KIRKBY-MALZEARD, a parish and market-town in the W. R. of Yorkshire, 6 m. WNW of Ripon. The p. includes the townships of Cozenley, Fountain's Earth, Gravelthorpe, K., Laverton, Stonebeck Upper and Lower, and the chapelries of Middlemoor, and Hartwith-with-Winsley. Area 53,530 acres. Pop. in 1831, 4,707; in 1841, 5,180.

KIRKBY-MISPERTON, a parish and township in the N. R. of Yorkshire, 3¼ m. SSW of Pickering. It includes the townships of Barugh-Ambe, Great and Little Habton, K., and Ryton. Area of the p. 7,130 acres. Pop. in 1831, 864; in 1841, 905.

KIRKBY-ON-THE-MOOR, or KIRBY, a parish and township in the N. R. of Yorkshire, 1 m. NNW of Boroughbridge, on the river Ouse. The p. includes the townships of Humberton-with-Milby, Langthorp, and K. Area of p. 2,200 acres. Pop. 655.

KIRKBY-MOORSIDE, a parish and market-town in the N. R. of Yorkshire, 24 m. N by E of York. The parish includes the townships of Fadmore, Farndale, Low-Quarter, Gillimoor, and K. Area 13,700 acres. Pop. in 1831, 2,324; in 1841, 2,758. —The town contains some good houses, but is irregularly built. A considerable quantity of malt is made here, and there are several corn-mills, and in the vicinity limestone and freestone quarries and coal mines.

KIRKBY-MUXLOE, a chapelry in the parish of Glenfield, Leicestershire, 4½ m. W of Leicester. Area 2,230 acres. Pop. in 1831, 275; in 1841, 321.

KIRKBY-OVERBLOWS, a parish and township in the W. R. of Yorkshire, 5¼ m. W by N of Wetherby. The parish includes the townships of Kirkby-with-Netherby, K., Rigton, Sicklinghall, part of Swindon, and the chapelry of Stainburn. Area 10,730 acres. Pop. in 1831, 1,528; in 1841, 1,625.

KIRKBY-RAVENSWORTH, a parish and township in the N. R. of Yorkshire, 4½ m. NW of Richmond, on a branch of the Swale. The parish includes the townships of Dalton, Gayles, Kirkby-on-the-Hill, New Forest, Newsham, Ravensworth, and Whashton. Area 14,070 acres. Pop. in 1841, 1,451.

KIRKBY (SOUTH), a parish and township in the W. R. of Yorkshire, 8 m. S of Pontefract. The parish includes the townships of N. and S. Elmsall, K., and the chapelry of Shelbrooke. Area 6,390 acres. Pop. in 1831, 1,478; in 1841, 1,528.

KIRKBY-STEPHEN, a parish and market-town in Westmoreland, 22 m. SE of Penrith, on the river Eden. The p. includes the townships of Hartley, Kaber, K., Nateby, Smardale, Waitby, Wharton, and Winton, and the chapelries of Mallerstang and Soulby. Area 31,870 acres. Pop. in 1831, 2,798; in 1841, 2,850. The town is pleasantly situated on the W bank of the Eden, at the foot of Ash-Fell. It consists chiefly of one street. The woollen manufacture is carried on here, and many of the inhabitants are employed in stocking-knitting. A silk factory has also been established. The p. contains mines of lead, copper, and coal. K. is one of the polling-places for the election of the county members.

KIRKBY-THORE, a parish and township in Westmoreland, 4½ m. NNW of Appleby, on the rivers Eden and Troutbeck. The p. includes the township of K., and the chapelries of Milburn with Milburn-Grange, and Temple-Sowerby. Area 11,030 acres. Pop. in 1831, 1,231; in 1841, 1,171.

KIRKBY-LE-THORPE, or KIRKBY-LAYTHORPE, a parish in Lincolnshire, 2 m. E by N of Sleaford. Area 1,570 acres. Pop. in 1831, 170; in 1841, 213.

KIRKBY-UNDERWOOD, a parish in Lincolnshire, 5 m. NNW of Bourne. Area 1,340 acres. Pop. in 1831, 162; in 1841, 192.

KIRKBY-WHARFE, a parish and township in the W. R. of Yorkshire, 2 m. SSE of Tadcaster, on the river Wharfe, and intersected by the North Midland railway. The parish includes the townships of Grimston, K. with Milford, and Ulleskelf. Area 3,050 acres. Pop. in 1831, 492; in 1841, 744.

KIRKBY-WISK, a parish and township in the N. R. of Yorkshire, 4 m. W by N of Thirsk. The p. includes the townships of K., Maunby, Newby-Wisk, and Newsham with Breckenbrough. Area 5,070 acres. Pop. in 1831, 872; in 1841, 905.

KIRKCALDY, a parish and town of Fifeshire, situated on the shore of a bay of the frith of Forth, 18 m. SW of Cupar, and 10 m. directly N of Edinburgh. Pop. of the p. in 1801, 3,248; in 1831, 5,034; in 1841, 5,275. The town is a populous and thriving sea-port, and also a royal burgh. Pop. in 1851, 5,797. It consists chiefly of one street running on the low ground near the sea-shore, about 1 m. in length; and several cross streets and lanes, partly running from it towards the sea, and partly ascending the high bank to the N, where there is another street running parallel to the principal one. The principal public building in the town is the town-house and jail, a building in the Norman style, having the town-hall and public offices in front, and the jail behind.—The harbour of K. is situated near the E end of the burgh. It is large, and has good stone-piers; but has the disadvantage

of being dry at low-water, even at the ebb of neap-tides, so that large vessels can only enter at or near the stream. It enjoys a considerable coasting trade; and also a trade with the Continent and the Baltic. The gross receipts of the custom-house, in 1840, were £4,207; in 1850, £9,179. In 1831, K., with its immediate creeks, possessed 95 vessels, measuring 10,610 tons; in 1850, 70 = 9,805 tons. The manufactures of K. consist almost exclusively of coarse linen, and coarse cotton goods; chiefly ticks, dowlas, checks, and sailcloth. These are woven partly by power-looms, and partly by hand-loom. The spinning and preparation of flax is also a considerable branch of manufacture. The income of the burgh, in 1838–9, amounted to £1,942 sterling. Previous to the Union, K. sent a member to the Scottish parliament; and K., in conjunction with the neighbouring burghs of Dysart, Kinghorn, and Burntisland, sends a member to parliament. Constituency, in 1840, 298; in 1848, 476. It is also one of the polling-places for the county.

KIRK-CHRIST, a parish in the Isle of Man, 2 m. WSW of Ramsey. Pop. in 1841, 3,044.

KIRKCOLM, a parish occupying the N extremity of the Rhinns of Galloway, Wigtonshire. Area 11,650 acres. The only village is Stewarton. Pop. in 1831, 1,896; in 1841, 1,973.

KIRKCONNEL, a parish at the NW extremity of Dumfries-shire, occupying the N corner of the district of Nithsdale. Area about 26,500 acres. Two-thirds of the whole area is hill-pasture; about 6,100 acres are arable; and about 180 acres are under wood. On Crawick water, near its confluence with the Nith, stands the small v. of Whitehill, compact with that of Crawick-Mill, in the p. of Sanquhar. On the l. bank of the Nith, 3¼ m. NW of Sanquhar, stands the pleasant v. of Kirkconnel. Pop. in 1841, 1,130.

KIRKCOWAN, a parish in Wigtonshire, bounded on the N by Ayrshire, and on the S by Kirkinner and Mochram. Its area is computed to be about 31,600 acres. The surface is naturally a series of bleak moors. On the Tarf, 1½ m. S of the Dumfries and Portpatrick turnpike, stands the village of K. Pop. in 1831, 1,374; in 1841, 1,423.

KIRKCUBBIN, a small town in the p. of Inishargy, co. Down, on the E shore of Lough Strangford, 3 m. S by E of Grey-Abbey. Pop. in 1831, 537; in 1841, 623.

KIRKCUDBRIGHT, a parish and town at the middle of the S extremity of Kirkcudbrightshire. Area about 22½ sq. m. The surface is, for the most part, hilly. Pop. in 1831, 3,511; in 1841, 3,525. —The sea-port and royal burgh of K., the county-town of Kirkcudbrightshire, is pleasantly seated on the l. bank of the Dee, 6 m. N of the point where the river becomes lost in the sea, and 28 m. from Dumfries. It is a regular, neat, clean town, and contains a large proportion of recently built houses. The harbour is much the best on the S coast of Scotland; though, owing to the almost complete recess of the peculiar tide of the Solway, it is fully suitable for such vessels only as can take the ground. The rise of the tide being 20 ft., vessels of 200 tons have facility for sailing 2 m. beyond the town to Tongueland, where a natural barrier terminates the navigation. K. unites with Dumfries, Annan, Sanquhar, and Lochmaben, in sending a member to parliament. Constituency, in 1832, 111; in 1848, 90. Pop. in 1831, 2,690; in 1841, 2,588; in 1851, 2,774.

KIRKCUDBRIGHTSHIRE,—prescriptively called a stewartry, but, in every practical point of view, a sheriffdom, shire, or county,—in the W division of the S border of Scotland, constituting the E part, and very nearly two-thirds of the whole extent of the prov. of Galloway. It is bounded on the NW and N by Ayrshire; on the NE and E by Dumfries-shire; on the S by the Solway frith and the Irish sea; and on the W by Wigtonshire. Its outline is irregular, but approaches the figure of a trapezoid. It lies between 54° 44′ 35″ and 55° 19′ N lat.; and between 3° 33′ and 4° 35′ W long.; and measures in extreme length, from NW to SE, 44 m.; in extreme breadth 31 m., and in superficial area 855 sq. m., or 547,200 statute acres. These are the measurements given in Chalmers' *Caledonia;* but those brought out in a survey by Mr. Ainslie, and adopted in the Rev. Samuel Smith's *Agricultural View of Galloway*, assign to it a somewhat larger area, comprehending 882·57 sq. m., or 449,313 Scottish acres.

Surface.] The highland or NW district comprehends about two-thirds of the whole area, and is, for the most part, mountainous. Blacklarg, at the point where the stewartry meets with Dumfries-shire, ascends to the height of 2,890 ft. above sea-level; and it is nearly equalled by numerous other summits. The heights, all along the boundary, and for some way into the interior on the N, are part of what is often termed the southern highlands, or that broad alpine belt which stretches across the middle of the Scottish lowlands. They ascend, in the aggregate, to elevations little inferior to those of any other part of that great belt; and, extending themselves down to the sea on the W, and parallel to Dumfries-shire on the E, form, in their highest summits, a vast semicircle, whence broad and lessening spurs run off into the interior. The straths spread out by the streams of the region, as they recede from the higher grounds, and accumulate into rivers, form an inconsiderable proportion, probably not one-tenth of the whole district. The SE is a comparatively champaign division of the county. So gentle is its ascent from the sea, that the Dee, a long way up the strath, on the highland side of the dividing line, is only 150 ft. above the level of the sea. Yet about one-fourth of its whole area is either roughly hilly, or, in a secondary sense, mountainous. On the SE the conspicuous Criffel rises up almost from the margin of the Nith to a height of 1,895 ft. above sea-level, and sends off a ridge 8 or 9 m. W, and a second low ridge SW. In the neighbourhood of Dumfries, and the strath of Nithsdale, stretches a smooth and level tract, possessing facilities of cultivation and improvement beyond any other part of the co. A large part of the Glenkens exhibits highland scenery in such green garb as characteristically distinguishes Tweeddale. But with these exceptions, the far-stretching district is in general carpeted with heath and 'flows,' and presents a weary and almost desolate waste.

Waters and coasts.] K. sends out a few very trivial rills as head-waters of the Ayrshire or Carrick rivers, and receives some equally unimportant contributions in return; but, with these exceptions, it is a continuation of the great basin of Dumfries-shire. What Eskdale is to Dumfries-shire on the E, K., in the sweep of its mountain-chain to near the coast beyond the Dee, is on the W; all the vast intervening territory is a semicircular area, with an arc of highland ridges sweeping round it from one end to nearly the other of the N side of its chord, and pouring down all its waters to the S. Apart from the Nith, the Cairn and the Cree, which belong only to its boundaries, its chief streams are the Urr, the Ken, the Dee, and the Fleet, each of which is separately described in the present work. Lakes are very numerous; but, excepting Doon on the boundary, and Ken and Kinder in the interior, are individually inconsiderable in size. The Solway frith, becoming identified on the W with the Irish sea, sweeps round, from the head of the estuary of the Nith to the head of Wigton-bay, in an ample semi-

circular coast-line of 50 m., exclusive of sinuosities. The coast on the E is flat; but elsewhere it is, in general, bold and rocky. Along the whole a permanent recession of the sea has taken place. Considerable natural harbours run up into the country in the form of bays or small estuaries. The principal are Rough frith, at the mouth of the Urr; Heston bay, and Auchencairn bay, at the mouth of rivulets a little to the E; Kirkcudbright bay, at the mouth of the Dee; and Fleet bay, at the mouth of the Fleet.

Geology.] The most prevalent rock is what Dr. Hutton calls schistus, including schistus proper and greywacke. Much of the mountainous part consists entirely of granite. Limestone, sandstone, and other secondary strata, occasionally intermixed with plum-pudding-stone, appear E of Kirkcudbright, but do not extend far into the country. The district in the neighbourhood of Dumfries lies on sandstone. Shell-marl of the finest quality has been everywhere found at intervals, in lakes and mosses, within 12 m. of the sea. Ironstone seems to abound in Kells, Urr, Carsphairn, Buittle, Rerwick, and Colvend. A stratum of lead-ore runs through the country from Minigaff on the Cree, in a NE direction, to Wanlockhead and Leadhills. A vein of lead exists also in the p. of Anworth.

Agriculture.] In early times the stewartry appears to have been covered with woods; even at a comparatively recent period it had several extensive forests; but it retains only scanty portions of its natural woodlands, and these chiefly along the banks of the rivers. Modern agricultural improvement commenced early in the 18th cent. Farms, in the highland district, usually vary in size from 6 to 12 sq. m.; in the arable or cultivated grounds, they sometimes extend to 500 or 600 acres, but probably average about 200. The breeding and rearing of cattle has long been a favourite object of the farmers. The entire stock of K. in 1814 was estimated at 50,000. —In the moor and mountainous districts, sheep-husbandry has long been sedulously plied. The number of sheep in the stewartry, in 1814, was estimated at 178,000. Great attention here, as in Dumfries-shire, is paid to the produce of pork, chiefly for the Dumfries market. Bees are much attended to in Twynholm, Borgue, Tongueland, and Kirkcudbright. Few districts in Scotland, except the Highlands, are more abundant than K., both in number and variety of game.

Manufactures.] The manufactures and commerce of the stewartry are very inconsiderable. Soap, leather, and paper, are manufactured to aggregately a small amount. The woollen manufacture, though seriously attempted, never had success. Commerce is almost wholly confined to the exportation of grain, wool, sheep, and black cattle, and the importation of coals, lime, wood, groceries, and soft goods.—K., considering the highland complexion of the greater part of its surface, is not behind any part of Scotland in the important accommodation of roads.

Towns, &c.] K. has two royal boroughs, Kirkcudbright and New Galloway, and several considerable villages,—Maxwelltown, Gatehouse-of-Fleet, Creetown, Dalbeattie, Castle-Douglas, and Dalry. It sends 1 member to parliament. Constituency in 1839, 1,331; in 1848, 1,291. Annual value of the real property as assessed in 1815, £213,308; in 1842-3, £193,801. Pop. in 1801, 29,211; in 1811, 33,684; in 1821, 38,903; in 1831, 40,590; in 1841, 41,119; in 1851, 43,310, being an increase per cent. of ·79 within 50 years from 1801 to 1851.

History.] The civil history of K. is rapidly sketched in the article Galloway. In 1455, when on the forfeiture of the Douglases the lordship of Galloway reverted to the Crown, the steward of K. became again the steward of the king. Though for a long time the territory continued to be nominally viewed as in some respects comprehended in Dumfries-shire, the steward was quite as independent as the sheriff, and within his own territory regularly executed in discharge of his office the writs of the king and the ordinances of parliament, Before the commencement of the civil wars under Charles I., all trace of jurisdictional connection in any form whatever with Dumfries-shire had disappeared. But from 1488 till the abolition of heritable jurisdictions in 1747, the stewartry was enthralled by the imposition of a baronial or feudal character upon its supreme office.

KIRKDALE, a township in the p. of Walton-on-the-Hill, co.-palatine of Lancaster, 2 m. N of the exchange, Liverpool, intersected by the Leeds and Liverpool canal, and pleasantly situated on the declivity of a hill. Area 740 acres. Pop. in 1831, 2,591; in 1841, 4,268. The county-jail and house-of-correction is situated in this township, on an elevated spot, within a quarter of a mile of the Mersey. The area of the prison, which is laid out as a garden, with fish-pond and shrubbery, is nearly a square, containing 5 acres, 3 roods, and 27 poles. The prison-buildings consist of two detached wings of semi-circular form, with square projections at each angle, and comprise 400 cells, 21 wards, 84 day and work-rooms, and 10 tread-wheel houses. The governor's house is on the N; and a handsome sessions-house, built of stone, in the Ionic order, fronts the S.—Also a parish in the N. R. of Yorkshire, 2 m. SW of Kirby-Moorside, on the river Dove. It includes the townships of Beadlam, Bransdale W side, Muscoates with E. Ness, Nawton, N. Holme, Skiplaw, Welburn, and Wombleton. Area 10,030 acres. Pop. in 1831, 1,107; in 1841, 1,059. In the summer of 1820, a remarkable cavern, which had been discovered here in a bank about 60 ft. above the bottom of a small valley, was explored by Professor Buckland, whose papers on the subject attracted the attention of the whole scientific world.

KIRKDEN, a parish in the Sidlaw district of Forfarshire. Area about 4,000 acres. Manufactures, in connexion with Dundee, and in the linen staple, engage a large part of the pop. Their chief local seat is the modern v. of Friockheim, situated in the NE corner of the p., on the bank of the Lunan, and near the Arbroath and Forfar railway. Pop. 1,483.

KIRKERSVILLE, a village of Harrison township, Licking co., in the state of Ohio, U. S., 22 m. E of Columbus. Pop. in 1840, about 179.

KIRK-GERMAN, a parish in the isle of Man, 2 m. E of Peel-town. Pop. in 1841, 1,896.

KIRKGUNZEON, a parish in the SE division of Kirkcudbrightshire. Pop. in 1841, 638.

KIRKHAM, a parish and market-town in the co.-palatine of Lancaster, 20 m. SSW of Lancaster, intersected by the Preston and Wyre railway. The p. includes the townships of Bryning-with-Kellasnergh, Clifton-with-Salwick, Eccleston-with-Larbrick, Freckleton, Newsham, Greenalgh-with-Thistleton, K., Medlar-with-Plumptons, and Whittingham, and the chapelries of Goosnargh, Hambleton, Ribby-with-Wrea, Singleton, and Warton. Area 41,850 acres. Pop. in 1831, 11,630; in 1841, 11,604.—K. is a small but well-built town, and is regarded as the capital of a surrounding district called the Fylde country. The pop. in 1831 was 2,469; in 1841, 2,903. The principal manufactures carried on in it are sail-cloth, sacking, and cordage. The cotton manufacture has also been introduced, and gives employment to a considerable number of the inhabitants. Baltic produce has been brought up the Wyre, and landed at Wardless, on the NE bank of the river, where the principal manufacturers of K. erected large warehouses; but the establishment of the new port and town of Fleetwood-on-Wyre, and the opening of the Preston and Wyre railway, afford greater facilities for the transport of the K. traffic.

KIRKHAMMERTON, a parish in the W. R. of Yorkshire, 8 m. SE by E of Aldborough. Area 2,190 acres. Pop. in 1831, 382; in 1841, 341.

KIRKHAUGH, a parish in Northumberland, 18 m. WSW of Hexham. Area 5,940 acres. Pop. 221.

KIRK-HEATON, a chapelry in the p. of Kirkharle, Northumberland, 9½ m. NE by N of Hexham. Area 1,760 acres. Pop. in 1841, 164.

KIRKHILL, a parish in Inverness-shire, stretching along the Moray frith. Pop. in 1831, 1,715; in 1841, 1,829.—Also a village in the p. of Pennycuick, Edinburghshire, on the l. bank of the N. Esk, a ½ m. NE of Pennicuick, inhabited chiefly by paper-makers and weavers. Pop. 500.

KIRKI, a town of Bokhara, 120 m. SSE of Bokhara, on the l. bank of the Amu.

KIRKINJE, a considerable Greek village of 300 houses, in Asiatic Turkey, in the sanj. of Ismir, near Ephesus.

KIRKINNER, a parish in the SE of Wigtonshire, skirted on the E by Wigton bay, which divides it from Kirkmabreck in Kirkcudbrightshire. Pop. in 1831, 1,514; in 1841, 1,769.

KIRKINRIOLA, a parish in co. Antrim, containing on its S border the town of Ballymena. Area 6,390 acres. Pop. in 1831, 7,358; in 1841, 8,843.

KIRKINTILLOCH, a parish in Dumbartonshire, forming the W half of the detached part of that co., and lying 4¾ m. E of the nearest point of its main body. It is bounded on the N by Stirlingshire; on the S and W by Lanarkshire; and contains an area of about 10,700 acres. The Forth and Clyde canal extends through it from E to W, a little inward from the N boundary. The Monkland and K. railway comes in from the S to the canal near the town; and the Edinburgh and Glasgow railway runs through the whole length of the p., and sends off a short branch to the town of K. Pop. in 1801, 3,210; in 1831, 5,888; in 1841, 6,698.—The town of K. stands on Luggie-water, immediately above its confluence with the Kelvin, 3 m. SE of Campsie, and 7 m. N of Glasgow. Two distilleries, a silk hat-manufactory, an iron-foundery, a calico-printfield, and a variety of handicrafts, common to every town, employ a considerable number of the inhabitants; but the weaving of cotton fabrics, principally lappets, affords the chief employment. The number of hand-looms was, in 1838, 1,963. Pop. in 1841, 6,698.

KIRK-KILISSIA, a sanjak and town of Turkey in Europe, in the E part of Rumelia. The sanj., which lies between 41° 20′ and 42° 36′ N lat., and between 26° 35′ and 28° 8′ E long., is bounded on the N by the sanj. of Silistria; on the E by the Black sea; on the S by the sanjaks of Gallipoli and Viza; and on the W by the sanj. of Tchirmen and the territory of Adrianople. Its length, from NE to SW, is about 90 m., and its medium breadth, from NW to SE, 39 m. The Stanches-dagh, or Kutchuk-Balkan, runs through it in a SE direction, and divides it into two distinct regions. That to the E towards the Black sea is watered by the Fakih, Kanara-dere, and Aïa-Paoli. The other side, belonging to the basin of the archipelago, has the Maritza-Erkene, Sals-dere, and Teke-dere. The coast presents a series of indentations and lofty promontories. Of the former, the principal are the gulf of Burgas and Port Aïnada. The mountains are covered to the summit with forests in which the pine, oak, chestnut, and cypress are found of the largest size. The rearing of sheep and cattle form the chief objects of rural industry, little attention being paid to the culture of the soil. The town is 33 m. ENE of Adrianople, and 117 m. NW of Constantinople, on the S side of a branch of the Stanches-dagh, and between the Cavacti-dere and Buïuk-dere. The pop., consisting of Turks, Greeks, Armenians, and Jews, is variously estimated at from 16,000 to 28,000. It is enclosed by a wall, and has a fortress, numerous mosques, several public baths, a bazaar, and a large khan. The streets are narrow, and the houses low and built of wood. It has some manufactories. Butter, cheese, corn, and wine, form its only articles of trade. The surrounding district possesses a stony soil, but produces considerable quantities of fruit, vegetables, and wine. The castle of K. was taken by Amurath II. in 1436.

KIRKLAND, a village in Fifeshire, in the parish of Wemyss, 1 m. W of Leven. Here is an extensive flax spinning-mill. Pop. in 1836, 543.—Also a village in the p. of Lesmahagow, 1 m. W of the town of Lanark.—Also a parish and township in Cumberland, 9 m. E by N of Penrith, including the chapelry of Culgaith, and the townships of K. and Skirwith. Area 12,150 acres. Pop. in 1831, 765; in 1841, 887.—Also a township in the p. of Garstang, co.-palatine of Lancaster, 1 m. SW of Garstang, on the W bank of the Wyre. Area 1,050 acres. Pop. in 1831, 458; in 1841, 408.—Also a township in the p. of Kendal, in Westmoreland, adjoining the town of Kendal. Pop. in 1831, 1,250; in 1841, 1,222.

KIRKLAND, a township of Penobscot co., in the state of Maine, U. S., 84 m. NE of Augusta, watered by affluents of Pushaw lake. Pop. in 1840, 351.—Also a township of Oneida co., in the state of New York, 100 m. WNW of Albany. It has a diversified surface, and is watered by Oriskany creek. The soil, consisting of calcareous loam, is generally fertile. Pop. 2,984.

KIRK-LEATHAM, a parish and township in the N. R. of Yorkshire, 4¼ m. NNW of Guisborough, at the N extremity of the county, between the North sea and the mouth of the Tees. The parish includes the township of K., and the chapelry of Wilton. Area 8,030 acres. Pop. in 1841, 1,075.

KIRKLEY, a township in the p. of Ponteland, Northumberland, 10½ m. NW of Newcastle-upon-Tyne, on the river Blyth. Pop. in 1831, 165; in 1841, 168.—Also a parish in Suffolk, 2 m. SW of Lowestoft, on the coast of the North sea. Area 1,320 acres. Pop. in 1831, 374; in 1841, 1,320.

KIRKLINGTON, a parish in the co. of Nottingham, 3 m. NNW of Southwell, on the river Greet. Area 1,940 acres. Pop. in 1831, 243; in 1841, 280.—Also a parish and township in the N. R. of Yorkshire, 5½ m. SE of Bedale. Area 3,800 acres. Pop. in 1841, 486.

KIRK-LINTON, or KIRK-LEVINGTON, a parish in Cumberland, 3½ m. E by S of Longtown. It includes the townships of Hethersgill, Middle Quarter, and West Linton. Area 11,290 acres. Pop. in 1831, 1,892; in 1841, 1,902.

KIRKLY, an island in Spencer's gulf, in S. Australia, in S lat. 34° 32′, E long. 136° 11′.

KIRKMABRECK, a parish at the SW extremity of Kirkcudbrightshire, bounded on the SW by Wigton bay, or more properly the estuary of the Cree. On Wigton bay stands the little burgh of Creetown. Pop. in 1831, 1,779; in 1841, 1,854. The parish is famous for a beautiful granite, with which it abounds; and it contains small veins of coarse limestone, and some lead ore.

KIRKMAHOE, a parish in Nithsdale, Dumfriesshire. Area 9,545 Scottish acres. The village of K. is a small place, 4 m. N of Dumfries. Quarrelwood, 1¾ m. farther N, was once of some note in the surrounding country as the cradle of Cameronianism. Pop. in 1831, 1,601; in 1841, 1,568.

KIRKMAIDEN, a parish occupying the S part of the Rhinns of Galloway, in Wigtonshire, and terminating in the Mull of Galloway. Area between

23 and 24 sq. m. The bays of East Tarbet and West Tarbet are mutually opposite, and narrow the connection of the Mull of Galloway with the body of the p. to an isthmus 2½ furls. broad. Portnessock and Clanyard bay, each running 1 m. inward from the general coast-line, both on the W side, the former 1¾ m., and the latter 3½ m. at its head or centre from the N boundary, are the deepest indentations made by the sea. The coast, particularly toward the Mull, is rocky and bold; and along the W, it is curiously perforated with caves and caverns, and rent and contorted with fissures. Two-thirds of the surface consists partly of a broad but not high mountainous belt, extending from sea to sea, and partly of congeries of heights, many of which, though not lofty, are bleak and wild, while others are slightly tufted with plantation. About one-eighth of the whole area is rocky or mossy moorland; and between a fourth and a third of the whole is arable. Two villages—Drummore with 300 inhabitants, and Port-Logan with 180—stand at the heads respectively of the bays of Drummore and Portnessock. Pop. in 1831, 2,051; in 1841, 2,202.

KIRKMICHAEL, a parish and village in Carrick, Ayrshire. Area of p. 36 sq. m. Pop. in 1831, 2,758; in 1841, 2,933.—The village of K. straggles picturesquely along both sides of the Girvan, 3¼ m. E of Maybole. Crosshill is situated 1½ m. to the SW. Both vs. are chiefly inhabited by hand-loom weavers. The fabrics woven are mulls and jaconets, pullicates, and imitation Thibets. The pop. of Kirkmichael, in 1836, was 570; and of Crosshill 989.—Also a parish in Annandale, Dumfries-shire. Area 13,323 Scottish acres. A little more than one-third of the whole area is arable. Pop. in 1831, 1,226; in 1841, 1,108.—Also a parish at the NE extremity of Perthshire. Area about 100 sq. m. Its SW division consists of the greater part of Strathardle, watered by the Ardle, and screened on both sides by mountain-ranges. Its N and central division, considerably the larger district, consists of the whole of Glenshee, watered by the Shee, with its broad belts of mountain screens, and the smaller glens which converge into it on the N. Pop. in 1831, 1,568; in 1841, 1,412.—Also a large parish in Banffshire, occupying the whole of the inland or SW extremity of the co. Area 29,500 acres. Pop. in 1831, 1,741; in 1841, 1,576. The parish consists chiefly of the great wild strath or vale of the Aven, which intersects it from its source in Loch-Aven, near Cairngorm, to its confluence with the Spey.—Also a parish and village in the Isle of Man, 8 m. NNE of Peel. Bishop's-court, the residence of the bishop of Sodor and Man, is about 1 m. distant. The bishop has here an extensive domain of 600 acres. Pop. in 1841, 1,376.

KIRKMICHAEL, or Resolis, a parish in the cos. of Ross and Cromarty, stretching along the S coast of the frith of Cromarty. Pop. in 1841, 1,549.

KIRK-NEWTON, a parish and township in Northumberland, 5 m. WNW of Wooler, on the river Glen. Area 34,010 acres. Pop. in 1831, 1,674; in 1841, 1,726.

KIRKNEWTON, a parish in the W part of Edinburghshire, bordering on the NW on Linlithgowshire. The village of K. stands 11 m. W of Edinburgh; but the principal v. is East Calder. Pop. in 1841, 1,441.

KIRKOSWALD, a parish in Carrick, Ayrshire, stretching along the coast 6 m. Area 11,000 acres.—The village of K. is 4 m. SW of Maybole. Pop. of the p. in 1831, 1,951; in 1841, 2,030. On the coast, 3 m. S of Colzean castle, are vestiges of the ancient castle of Turnberry; and 2¼ m. N of the village of K., are the stately ruins of Crossraguel Abbey.—Also a parish and market-town in Cumberland, 8 m. NNE of Penrith. Area 9,390 acres. Pop. in 1831, 1,033; in 1841, 948. The town is pleasantly situated in the vale of the Eden. About 3 m. from Kirk-Oswald is the famous Druidical circle, called 'Long Meg and her daughters.'

KIRK-PATRICK, a parish in the Isle of Man, 2½ m. S of Peel. Pop. in 1831, 2,195; in 1841, 2,768.

KIRKPATRICK-DURHAM, a parish in Kirkcudbrightshire. Area about 38 sq. m. The village of K., with a pop., in 1836, of 512, stands 1¾ m. N of the Bridge of Urr. It is altogether modern, having been commenced only about the year 1785. Pop. of the p. in 1831, 1,487; in 1841, 1,484.

KIRKPATRICK-FLEMING, a parish in the district intermediate between Annandale and Eskdale, in Dumfries-shire. The p. has no village, yet counts among its pop. between 100 and 200 cotton-weavers, employed by manufacturers in Carlisle. Pop. in 1831, 1,666; in 1841, 1,692.

KIRKPATRICK-IRONGRAY, a parish in the NE of Kirkcudbrightshire, 6 m. WNW of Dumfries. Pop. in 1831, 912; in 1841, 927.

KIRKPATRICK-JUXTA, a parish in the north of Annandale, Dumfries-shire. Area 15,430 Scottish acres. A belt of land lying along the bank of the Annan, is the most valuable district of the p. A broad range of mountains occupies all the area westward, and sends up the towering summit of Queensberry, 2,140 ft. above the level of the sea. One-third of the whole parish is in tillage; two-thirds are pastoral or waste. Pop. in 1841, 934.

KIRK-ST.-ANNE, a parish in the Isle of Man, 5 m. NE of Castletown. Pop. in 1831, 798; in 1841, 769.

KIRKSTALL, a hamlet in the parish of St. Peter, W. R. of Yorkshire, 3 m. WNW of Leeds, on the river Aire. The village of K. possesses large cloth manufactories, employing numerous hands, and is rapidly advancing in pop. and importance. There is here a handsome church erected in 1829; and in the vicinity are the beautiful ruins of a noble abbey founded in 1152.

KIRKSTEAD, a parish in Lincolnshire, 7 m. SW by S of Horncastle, on the river Witham. Area 1,540 acres. Pop. in 1831, 179; in 1841, 160.

KIRKTON, or Kirton, a parish in Nottinghamshire, 3 m. NE by E of Ollerton. Area 1,090 acres. Pop. in 1831, 247; in 1841, 269.

KIRKTOUN, a parish in Roxburghshire, 3 m. ESE of Hawick. Pop. in 1831, 294; in 1841, 313.

KIRKURD, a parish in Peebles-shire, 8 m. WNW of Peebles. Area 6,620 acres. A chain of heights stretches along the whole of the S and SW frontier, and sends up, among other summits, that of Pyked-Stane or Hell's Cleuch, 2,100 ft. above the level of the sea. Pop. in 1831, 318; in 1841, 6,620.

KIRKVILLE, a village of Onondaga co., in the state of New York, U. S., 130 m. W by N of Albany. Pop. 150.

KIRKWALL-AND-ST.-OLA, two united parishes on the mainland of Orkney. The tract of land which stretches around Kirkwall, and which forms the country-parish, under the name of St. Ola, was in all probability a parish before the town was built, and derived that name from Olaus or Olave, a saint and also a king of Norway. The mean length and breadth of the p. is about 5 m. Pop. in 1801, 2,621; in 1831, 3,721; in 1841, 3,599. Near the centre of the parish stands the ancient burgh of Kirkwall, built in a narrow strath which extends from the harbour of K. on the N to the bay of Scalpa on the S, in N lat. 58° 50′ 2″, W long. 2° 57′ 2″. It is washed on its N extremity by the sea, which here forms the deep bay of K.; and on the W side by a pleasant inlet of the sea, called the Ouyce or Piery sea, which flows by the back of the gardens at high-water. It is nearly 1 m. in length from N to S; but its breadth is very inconsiderable; and it has only

one principal street. Pop. of the burgh in 1831, 3,056; in 1841, 2,206; in 1851, 3,331. Many of the houses bear marks of old age; the doors and windows are small, the walls thick, and the apartments narrow, gloomy, and irregular. To this form, however, there are also many exceptions. The cathedral of St. Magnus, the King's castle, and the Bishop's and Earl's palaces, are the only buildings here that are in anywise remarkable. The length of this stately fabric, on the outside, is 226 ft.; its breadth 56 ft.; height of the main roof, 71 ft. The roof is supported by a row of 14 pillars on each side. The choir is kept with much care.—Opposite to the cathedral, on the W side of the street, stood the King's castle. Time and the ravages of war have long since laid it in ruins. This fortress seems to have been a place of no inconsiderable strength in the days of Patrick Stewart, son of Robert Stewart, natural son of James V., who, in 1581, was created Earl of Orkney. The same earl built an extensive and elegant mansion on the east side of the town, known by the name of the Earl's palace.—Almost adjoining to this, stands the ruin denominated the Bishop's palace, of much greater antiquity.—The commerce of this place, though it can by no means be called flourishing, is rather in an improving condition. The principal articles exported are beef, pork, butter, tallow, hides, calf-skins, rabbit-skins, salt fish, oil, feathers, linen yarn, and coarse linen cloth, kelp, and, in years of fruitfulness, corn in considerable quantity. The manufacture of linen-yarn was introduced in 1747. The manufacture of kelp was for a long series of years more fortunate than that of linen-yarn. This manufacture, however, has been extinguished here, as elsewhere, by the introduction of foreign barilla. The amount of customs duty on imports in 1850 was £652. The revenue of the burgh is about £100. It joins with Wick, Dornoch, Dingwall, and Tain, in electing a member of parliament. Registered electors in 1848, 111.

KIRK-WHELPINGTON, a parish in Northumberland, 14 m. WSW of Morpeth. Area 12,420 acres. Pop. in 1831, 789; in 1841, 705.

KIRKWOOD, a township of Belmont co., in the state of Ohio, U. S. Pop. in 1840, 2,279.

KIRK-YETHOLM, a village on the r. bank of Beaumont water, opposite the village of Town-Yetholm, near the centre of Yetholm parish, 1¼ m. from the English border, and 8 m. SE of Kelso, in Roxburghshire.

KIRLIBABA, a village of Austria, in the circle of Czernowitz, on the Bistriza. In the vicinity is a rich mine of argentiferous lead.

KIRMAN, or Kerman, a province of Persia, bounded by Khorassan on the N; by Sistan and by Beluchistan on the E: by the Indian ocean on the S; and by Laristan and Fars on the W; and comprised between the parallels of 25° 20′ and 31° 20′ N, and the meridians of 54° 20′ and 60° 22′ E. Its general outline is triangular, having its base resting on the S desert-frontier of Khorassan, and its apex on the Persian gulf. Its length from N to S, measured along the meridian of 58°, is about 335 m.; its breadth, along the parallel of 30°, is 290 m. Its square area may be taken at 65,000 sq. m. Little is known of the interior, with the exception of the district traversed by the route from Shiraz E to Kirman, the central city and cap. of the prov.; and thence ESE to Bunpur in Beluchistan. It is, however, generally represented as a mountainous tract towards the S of the city of K., intersected by the Jebel Abad, which runs across it from E to W, and sends off numerous ramifications southwards towards the coast; while a second range takes a WNW direction, from the frontiers of Beluchistan, passes the city of K., and enters the prov. of Fars. To the N of this chain, the face of the country is a dreary waste, intersected by two routes, one leading from K. directly N to Yezd; and the other NNE to Khubhes. The extreme S point of the prov. is called the Mogosthan, and presents much rich cultivation. The chief towns in this quarter are Bunder Abbas, Minab, Serik, and Jask. The coast of K. and of the adjoining julga of Lar is lined with a chain of rocky precipitous islets, apparently of volcanic origin; and, with the exception of that of Kenn, all strikingly arid and barren. The E extremity of this chain is the once flourishing Hormuz or Ormuz.—The Rud-Shuir, or Div-Rud is the only large river. It rises to the S of the district of Nurmansher, on the W skirts of the desert of Bunpur, in Beluchistan; runs in a SSW direction through the S part of the prov.; and falls into the Persian gulf opposite the large island of Kishm. The Minnow, a small stream, intersects the narrow prolongation of the Mogosthan, in a SSW course.—The climate is unhealthy. The elevated districts are extremely cold, even in summer; while the long narrow valleys which wind among the mountains are oppressively hot.—Wheat, maize, barley, cotton, tobacco, saffron, madder, and silk, are the principal agricultural productions. Dates, oranges, lemons, grapes, almonds, and pistachios, with all the fruits of Southern Europe, are abundantly grown; and the produce of assafœtida, galbanum, sandàric, tragacanth, and other gum-bearing plants, is very considerable.—The breed of sheep, kept in this prov. in considerable numbers, is small and short-legged, with a long bushy tail, and fine wool. Camels and goats are likewise reared in considerable numbers; but oxen and horses are not numerous. Wild cats and bears are numerous in the forests.—Iron, copper, sulphur, and rock-salt are wrought.—The principal manufactures are fine woollen fabrics, carpets, shawls of goats' and camels' hair, coarse linens, cutlery and matchlocks.—The pop. has been estimated at 600,000 Persians, Arabs, and Beluchis.—The gov. is vested in a beglerbeg; and the prov. is administratively divided into 9 districts, each of which is under a hakim.—The richest and most fertile part of the prov., the coast-district and Mogosthan, pays tribute to the imam of Muscat.—This prov. was the *Carmania* of the ancients. Its S portion, embracing Laristan, formed the chief part of the Homyaritic kingdom of Hormuz.

Kirman, the capital of the above prov., is situated on the W side of a spacious plain, in N lat. 29° 56′, E long. 56°; 230 m. E of Shiraz, and 340 m. SE of Ispahan. It is surrounded by a high mud wall, pierced with 4 gates, and defended by 19 towers and bastions, and flanked outside by a dry ditch, 20 yds. wide, and 10 yds. deep. On the S side of the town is a citadel. Its bazaar is extensive, and well-supplied with shawls, musnuds, carpets, wool, gums, fruits, and matchlocks; besides silk, tea, coffee, furs, copper utensils, and other articles, imported chiefly from Bokhara. The shawls of K. are of coarser quality than those of Cashmere; but generally resemble them in appearance. Immense quantities of a common kind, about 2 yds. square, and very low in price, are exported to Turkey, and worn by all classes in W. Asia. Pottinger estimated the pop. of K. at 30,000. Domestic and foreign wars have long since put an end to its prosperity, and it is not likely ever to attain its former commercial importance.

KIRMANSHAW, or Kermanshah, a city of Persia, of comparatively recent growth, the cap. of Kurdistan, situated on the r. bank of the Kerkha or Karasu, near the SW extremity of a fine plain, in N lat. 34° 26′, E long. 47° 15′, on the line of the great

caravan route from Bagdad to Central Persia. It is surrounded by a substantial brick wall, nearly 3 m. in extent, and a deep ditch; and has a strong citadel. Its streets are narrow, but are well-diversified with gardens, mosques, and bazaars. Its principal manufactures are carpets, swords, and cutlery. The pop. has been estimated at 30,000. The surrounding tract of country is picturesque, and bounded by a range of rugged limestone mountains.

KIRMINGTON, a parish and village of Lincolnshire, 6 m. NNW of Caistor. Area 2,210 acres. Pop. in 1831, 310; in 1841, 367.

KIRMOND-LE-MIRE, a parish in Lincolnshire, 6 m. NE by E of Market-Raisin. Area 1,290 acres. Pop. in 1831, 74; in 1841, 69.

KIRN, a town of Prussia, in the prov. of the Rhine, reg. and 42 m. S of Coblenz, circle and 21 m. W of Kreutznach, on the l. bank of the Nahe, at the confluence of the Stahrebachs. Pop. 1,750. It has 2 churches, a Catholic and a Lutheran. Its fortifications are in ruins, as well as the fortress by which it is commanded. It possesses an alum-refinery, a paper and an oil-mill, and several tanneries. In the environs are mines of copper, coal, and alum.

KIRNBACH, or KURNBACH, a town of Baden, in the circle of the Middle Rhine, on the confines of the kingdom of Würtemberg, 23 m. ENE of Carlsruhe, and at an equal distance NW of Louisburg. Pop. 500.

KIRONG. See KHERON.

KIRPEH, a village of Turkey in Asia, in Anatolia, in the sanj. of Kodja-Ili, on the shore of the Black sea, 39 m. NNE of Iznid, at the mouth of a small river, the ancient *Calpe*, and to the SE of a cape of the same name. The Argonauts are said to have here effected their landing. Cape Kirpeh, the ancient *Calpe*, is in N lat. 41° 13′ 36″, E long. 30° 15′ 50″.

KIRPILI, a river of Russia in Europe, in the prov. of the Caucasus. It has its source in the steppes in the E part of the district of Stavropol; enters the country of the Cossacks of the Black sea; and loses itself in a marshy lake near the sea of Azof, after a course, in a generally WNW direction, of about 120 m.

KIRRIEMUIR, a parish, borough of barony, and town of Forfarshire. The p. consists of two detached parts, 2¼ m. asunder, in the Grampians and Strathmore. Total area 18,000 acres. Pop. in 1831, 6,425; in 1841, 7,085. The town is 5 m. NW of Forfar, and 58 m. from Edinburgh. Pop. 3,067.

KIRSANOV, a district and town of Russia in Europe, in the gov. of Tambov. The district lies in the E part of the gov., and is traversed longitudinally by the Vorona. The town is 45 m. E of Tambov, near the r. bank of the Vorona, and on a small affluent of that river. Pop. 3,000, chiefly agriculturists. It is surrounded by steppes.

KIRSCHENTHEUER, a village of Austria, in Illyria, in the circle and S of Klagenfurt, on the Drave.

KIRSCHKAU, a village of the principality of Reuss, to the E of Schleiz. It has a castle.

KIR-SHEHR, a sanjak and town of Turkey in Asia, in the N part of Caramania. The sanj. is bounded on the N by the pash. of Sivas; on the E by the sanj. of Kasaria; on the SE by that of Nigdeh; on the SW by the sanj. of Ak-shehr; and on the NW by Anatolia. It comprises an area, generally fertile and well-cultivated, 90 m. in length from NW to SE, and 60 m. in breadth. It is traversed from S to N by the Kizil-Irmak. Greeks form a large proportion of its inhabitants. This sanj. comprises portions of the ancient provs. of Galatia, Cappadocia, and Phrygia.—The town is 90 m. NW of Kasaria, and 129 m. NNE of Konia, in a plain near the r. bank of the Kizil-Irmak. Pop. about 4,000. It is surrounded by gardens, the culture of which forms the chief employment of the inhabitants. It is the ancient *Andrapa*. In the vicinity are several saline springs.

KIRSTEAD, a parish in Norfolk, 6 m. NNW of Bungay. Area 1,250 acres. Pop. in 1841, 249.

KIRTA, one of the smaller Hebrides, near the W coast of Lewis.

KIRTHIPUR, a town of Hindostan, in Nepal, 6 m. SW of Kathmandu, in the valley of the Bogmotty. It was formerly the capital of an independent principality. In 1768 it was taken by and suffered much from the cruelties perpetrated by the rajah of Nepal. Since that period it has much declined in importance, and at present does not contain more than 6,000 inhabitants.

KIRTLE, a stream in Dumfries-shire, which has its source on the N confines of the p. of Middlebie, and enters the Solway frith at Kirtle-foot, in the p. of Gretna.

KIRTLING, a parish in Cambridgeshire, 4½ m. SSE of Newmarket. Area 3,016 acres. Pop. 803.

KIRTLINGTON, a parish in Oxfordshire, 4 m. ENE of Woodstock, on the Cherwell. Area 2,500 acres. Pop. in 1831, 687; in 1841, 846.

KIRTON, a parish in Lincolnshire, 4 m. SSW of Boston. Area 10,550 acres. Pop. in 1831, 2,147; in 1841, 2,092.—Also a parish in Suffolk, 8½ m. SE by E of Ipswich, on the Deben. Area 1,830 acres. Pop. in 1831, 624; in 1841, 607.

KIRTON-IN-LINDSEY, a parish and market-town in Lincolnshire, 7 m. SW by S of Glanford-Brigg, and 17 m. N by W of Lincoln. Area 4,210 acres. Pop. in 1831, 1,542; in 1841, 1,335.

KIRTORF, a landraths-bezirk or bailliage and town of the grand-duchy of Hesse-Darmstadt, and prov. of Upper Hesse. The town is 27 m. NE of Geissen, and 19 m. ESE of Marburg, in a plain, on the Kleinbach. Pop. 1,276, of whom about 50 are Jews.

KIRUCHA, or KRUCHA, a river of Turkey in Europe, in Servia, in the sanj. of Semendria, which has its source in a branch of Mount Zubov; flows SE; and joins the Western Morava 15 m. E of the frontier of Bosnia.

KIRWANNY, a town of Senegambia, in the state of Dentilla, 10 m. W of Baniseraile. The environs present considerable cultivation.

KIRWEILER, a village of Bavaria, in the circle of the Pfalz, district and 13 m. WSW of Spire, cant. and 4 m. S of Neustadt. Pop. 1,500. It possesses the ancient castle of Marienburg. Wine is cultivated in the environs.

KIRZAWET, or REDONDO, the smallest of the Kuria-Muria group, bearing 6¾ m. NE of Hullaniyah. It is composed of 4 rocks of red granite, and rises 230 ft. above sea-level.

KIS, a Hungarian word, signifying little. Names of which it is a prefix, not found amongst the following, are to be sought for under their respective letters.

KISAMOS, a district, town, and port of the island of Candia. The district occupies the NW extremity of the island, and is very fertile, producing oil, wine, cotton, and fruit in great abundance. It affords also excellent pasturage, and has a quarry of gypsum. The town is in the sanj. and 20 m. W of Canea, at the head of a bay of the same name, on the N coast. It is the capital of a small district, and the residence of a Greek bishop. It is surrounded with walls, and defended by a fortress. To the E of the town are the ruins of the ancient *Cysamus*.—The gulf of K. is between Capes Buso and Spada. It is about 12 m. in depth.

KI-SAN, or QUE-SAN, a small group of islands in the Eastern sea, off the coast of the Chinese prov. of

Chi-keang, in N lat. 29° 30′, E long. 122°. The largest is about 9 m. in circumf.

KISANLY, a village of Turkey in Europe, in Bulgaria, in the sanj. of Silistria, SE of Hirsova.

KI-SAN-SU, a bay of China, formed by the Yellow sea, on the NE coast of the prov. of Shan-tung, in N lat. 37° 35′, E long. 121° 28′. It is about 18 m. in breadth, and 15 m. in depth, and affords good anchorage. Its shores are sandy on the W and S, but to the N steep and rocky.

KISARIAH, a town of Syria, in the pash. and 30 m. SSW of Acre, 57 m. NW of Jerusalem, on the Mediterranean. It is the *Cesarea* of antiquity, and still contains extensive remains, many in a good state of preservation, of its ancient magnificence; but it is now almost entirely abandoned. It received its name in honour of Augustus, B.C. 22, and after the junction of Palestine to the Roman empire, became the capital of the prov. It was ruined during the crusades.

KIS-BER, a town of Hungary, in the comitat and 20 m. NNE of Komorn, and 32 m. NNE of Wesprim. Pop. 1,684. It has manufactories of earthenware and linen.

KISBI, a town of the Sahara, in the country of the Tibbus, on the road from Fezzan to Bornu, 50 m. N of Bilma, in the Wady-Kawas. It is the residence of a sultan, who exacts transit-money from all merchants and caravans.

KIS-CZEG, a village of Transylvania, in the comitat and 36 m. E of Klausenburg. It has a mineral spring.

KISELIAC, a village of Turkey in Europe, in Bosnia, and sanj. of Trawnik, between the town of that name and Bosna-seraï, on an affluent of the Bosna. It has a mineral spring.

KISHAN, a village of Beluchistan, in the prov. of Sarawan, 18 m. NE of Kelat, on the road thence to Beebee-Nanee. Pop. about 100.

KISHENAGUR, or KRISHNA-NAGARA, a town of Hindostan, in the prov. of Bengal, and district of Nuddea, on the l. bank of the Jellinghy, 62 m. NE of Calcutta. Cotton fabrics are extensively manufactured here.

KISHENGHUR, or KRISHNA-NAGARA, a town of Hindostan, in the prov. of Ajmir, about 19 m. NNE of the town of that name. It is surrounded by substantial walls, and has on a lofty eminence a castle with gardens fenced with the prickly pear. It is the capital of a small Rajput state, and is the residence of the rajah, whose palace is a large rudely built fort. The state yields an annual revenue of about 400,000 rupees. Its inhabitants are for the most part Jats, and find their chief employment in the cultivation of the soil. It was admitted into alliance with the British in 1818.

KISHENGHUR, or KISSENGHUR, a small town and pass of Hindostan, in the prov. of Allahabad, 33 m. SE of Chatterpur.

KISHENPUR, a small town of Hindostan, in the prov. and 110 m. NNE of Lahore.—Also a town in the prov. of Malwa, 130 m. WSW of Ougein.

KISHENGUNGA, or HASORA, a town of Hindostan, in the prov. of Bengal, district and 39 m. NE of Purneah, near the Sidanny. Pop. 2,500.—Also a river in the Punjab, which has its source in the mountains to the N of Cashmere; sweeps along the N frontier of that valley; and, after a total course of 120 m., joins the Jelum, a little below Muzeffarabad, where it was formerly crossed by a bridge of ropes.

KISHLAUGH, a village of Persia, in the prov. of Irak, district of Khaur, 20 m. E of Eywanekaif. The surrounding territory is well-cultivated.

KISHM, KICHMICH, KISHMEE, or DJESSEN, an island at the entrance of the Persian gulf, separated from the gulf by a channel varying from 5 to 15 m. in breadth. Pop. 15,000. It is about 73 m. in length from NE to SW, and 12 m. in medium breadth, and is surrounded by coral reefs. Its soil is extremely fertile, and produces corn, dhourra, dates, and other fruit, vegetables, and cotton, in great abundance. It is particularly noted for its grapes, which are without stones. The island is destitute of springs, but is supplied with water by means of cisterns. Sheep and cattle are reared in great numbers in its pastures. On the coasts, abounding with fish, are several pearl-fisheries. Cotton fabrics, the productions of the soil, and fish, form its chief articles of trade. The island is governed by a sheik, under the imaum of Muscat, who pays a tribute of 1,000 tomans to the governor of Shiraz.—The chief town, named also Kishm, is at the E extremity of the island. It is open to the N, but enclosed on the S by a wall. Pop., chiefly Arabs, 4,000. The houses—some of which are very neat—are built of stone and mud, and surmounted with terraces. Water is obtained by means of conduits from 2 cisterns $\frac{3}{4}$ of a mile distant. It has well-stocked markets, and carries on an active coasting-trade. The harbour is well-sheltered, but possesses little depth. It is defended by a square fort of European structure.

KISHMIR-DAGH, a range of mountains in Turkey in Asia, in the S part of the pash. of Erzerum, in the angle formed by the North and South branches of the Euphrates.

KISHON, or KISON, a river of Turkey in Asia, in Syria, which has its source on the SE frontier of the pash. of Acre; flows NW through the plain of Esdraelon; and enters the Mediterranean to the N of Mount Carmel, and 6 m. SSW of Acre.

KISHPUR, a town of Russia in Europe, in the gov. of Simbirsk, district and 6 m. S of Syzran, on the r. bank of the Volga. Pop. 1,200. It has 3 churches, and the remains of several towers and bastions.

KISHTAWAR, a small town of Hindostan, in the Punjab, 129 m. NE of Lahore, in a plain on the S slope of the Himalayas, near the l. bank of the Chenab, and at an alt. of 5,000 ft. above sea-level. It has a small bazaar and fort. The houses are flat-roofed and ill-built; and the people, who have suffered much from the oppression of the Sikhs, extremely poor. Surrounding it is a small territory of the same name.

KISIA, or KSIA, a river of Asia, in Georgia, which rises in the mountains of Kodian, and flows ESE through the circle of Tiflis, to the Kur, which it joins on the r. bank opposite Kiskala.

KISIELICE. See FREYSTADT.

KISIELIN, a town of Russia in Europe, in the gov. of Volhynia, district and 23 m. ESE of Vladimir.

KIS-IKLOD, a village of Transylvania, in the S part of the comitat of Doboka.

KISILSKAJA, a small fortress on the borders of European and Asiatic Russia, 150 m. NE of Orenburg, on the Ural river, opposite the mouth of the Kisilsk, a small stream flowing W to the l. bank of the Ural.

KISKA, one of the principal islands in the Andreanov group, North Pacific, in N lat. 52° 20′, and E long. 176° 50′. It is covered with lofty mountains, especially towards the W. It is but thinly populated.

KISKIMINETAS, a township of Armstrong co., in the state of Pennsylvania, U. S., 187 m. WNW of Harrisburg, bordered on the SW by Conemaugh or K. river, and intersected by the Pennsylvanian canal. Pop. in 1840, 2,287.

KISKILIES, a small island in the Archipelago, near the SW coast of Asia Minor, to the S of the island of Symi, and NW of Rhodes. It is about 3 m. in length, and 1½ m. in breadth.

KIS-KUNSAG. See KUMANIA.

KISLEG, a town of Würtemberg, in the circle of the Danube, bail. and 8 m. NE of Wangen, and 45 m. S of Ulm, at an alt. of 2,030 ft. above sea-level. Pop. in 1840, 421. It contains the castles of the princes of Waldburg-Waldsee and of Waldburg-Wurzach.

KISLINGBURG, a parish in the co. and 3½ m. W of Northampton. Area 2,170 acres. Pop. 686.

KISLOVODSK, or KISLAVODSKY, a fortress of Russia in Europe, in the N part of Western Circassia, on the confines of the prov. of Caucasus, 18 m. SW of Constantinogorsk, and 90 m. SSW of Stavropol, in a secluded valley on the r. bank of the Elkuchan. It was erected for the defence of the invalids by whom the local mineral baths are frequented.

KIS-MARTON. See EISENSTADT.

KISSER, or MAKISSER, an island of the Asiatic archipelago, in the group of the Sunda islands, to the NE of the island of Timor, in N lat. 8° 10′, E long. 127° 5′. It is about 18 m. in circumf., and is composed of a number of hills of from 300 to 800 ft. in height. Its principal productions are rice, sago, sandal-wood, wax, sugar-cane, tobacco, cotton, and edible birds'-nests. The inhabitants, between 7,000 and 8,000 in number, seem to be an intermediate race between the Malays and Papous. They are a well-made race, and speak a dialect of the Malay language. They are governed by several petty chiefs, under a rajah. About 1,700 of the inhabitants are Christians of the Dutch Protestant creed, and have their own rajah.

KISSI, a town of Upper Guinea, on the Sierra Leone coast, 60 m. NE of Freetown, on a small stream of the same name. Pop. 1,000.—Also a district of Central Africa, 9 days' journey S of Kankan. Its surface is diversified with mountains, and its soil is reputed to be fertile.

KISSING, a village of Bavaria, 6 m. SE of Augsburg. Pop. 520.

KISSINGEN, a town of Bavaria, in the circle of Lower Franconia, on the l. bank of the Saale, 32 m. N of Wurzburg. Pop. 1,200. It is celebrated for its saline springs and baths, and great Artesian salt-spring. The valley in which K. is seated has an elevation of 650 ft. above the level of the Baltic. The boring implements first went through 1,240 ft. of variegated sandstone; then through 350 ft. of sandstone of the Vosges formation; next through 150 ft. of magnesian limestone; and lastly through 138½ ft. of rock salt; thus reaching a total depth of 1,878½ ft. In the latter or rock salt stratum—which is presumed to be 1,000 ft. thick—a pure saline source is formed by solution of the rock salt in water. This solution has been found to hold not less than 27¼ per cent. of salt, and as there is little likelihood that it will be possible to penetrate into the rock beyond 30 ft. deeper, to that extent the perforation is to be pushed, and the well completed. At present the supply of water is at the rate of 100 cubic ft. per minute; and the force with which this quantity is ejected to the height of 58 ft. is due to a source of almost entirely pure carbonic acid gas, which having been met with at the depth of 1,680 ft. from the surface, (at the junction of the gypsum and zechstein,) escaped with prodigious force into the Artesian borehole, propelling the superincumbent column of water into the air. In the course of the boring operations two distinct salt wells were gone through, at 222 and 1,240 ft. depths, with the respective temps. of 50° and 66°, and 1¼ and 2½ per cent. of salt. It was under both these wells, at the depth of 1,680 ft., that the great carbonic acid gas stratum was first tapped. This stratum of gas would seem to be equally spread under and throughout the breadth of the valley, imparting its peculiarly piquant and pleasant character to the several mineral springs of this spa. When the entire work shall have been completed, 3¾ cubic ft. of brine per minute, free from iron and all other impurities, capable of yielding 50 lbs. of crystallized salt, will, it is anticipated, be conveyed to the boiling-house for crystallization, carrying with it a temp. of 92°, which it will bring up from a depth of 1,900 ft. It is, however, intended to limit the whole annual produce of salt from this source to 6,000,000 lbs., which, at the current market price, will add to the revenue of the Crown of Bavaria 300,000 florins after deducting 60,000 fl. for yearly expenses of work, fuel, and management. The whole cost of this great work, from first to last, will amount to 80,000 fl. or £6,666, including all the requisite pumps, pipes, and pavilion to be erected. It was begun in the shaft of an old well called the Schönborn, in 1832, from which time, and during a period of 11 years, 800 ft. only were bored through the rocks, the operation being often interrupted, and even suspended. But in 1843 the government resumed operations, which have never since then been interrupted, and are now about to be completed.

KISSLAU, a village of Baden, in the circle of the Middle Rhine, NE of Bruchsal. It has a castle, now used as a state prison.

KISSOVA, a mountain of Turkey in Europe, in Thessaly, in the sanj. of Trikali, 17 m. NE of Larissa. It is the ancient *Ossa*. To the E of this mountain, projecting into the mouth of the gulf of Salonica, is a cape of the same name.

KISSUNA, a town of Japan, on the E side of the island of Kiou-siou, and prov. of Fizen, 60 m. N of Nagasaki.

KIS-SZEBEN. See ZEBEN.

KIST, a village of Bavaria, in the circle of Upper Franconia, SW of Würzburg. Pop. 550.

KISTAGNE, a town of Dalmatia, in the circle and 27 m. E of Zara, and 18 m. WSW of Knin. In the environs are three remarkable natural arches of large size.

KISTIMITZIS, a people of Russia in Europe, who inhabit the SW part of Eastern Circassia. Their principal village is Khamhoï

KISTNAGHERRY, or KRISHNA-GIRI, a town and fortress of Hindostan, in the presidency of Bombay, and district of Barramahal, 11 m. N of Caverypatam, and 114 m. E of Seringapatam, on a rock 700 ft. in perpendicular height. In 1791 the British forces were repulsed from it with great loss, but the following year it was ceded to England with the rest of the province. Its fortifications have since been destroyed.

KISTNAPATAM, a town of Hindostan, in the prov. of the Carnatic, and district of Nellore, on the gulf of Bengal, at the mouth of the Candelair, and 99 m. N of Madras. It has a roadstead and possesses some trade.

KISTNARAJPUR, a town of Hindostan, in the prov. of Mysore, on the l. bank of the Cavery, 18 m. WNW of Seringapatam.

KISTRAND, a village of Norway, in Finmark, on the W coast of the Parsanger-Fiord.

KISZETEN, a village of Hungary, in the comitat of Temes, and E of Temeswar.

KISZKOWO, KISZOKOWO, or KISCHKOWO, a town of Prussia, in the prov. and 21 m. NE of Posen, circle and 15 m. ENE of Gnesen. Pop. 400. It has 2 Catholic churches.

KISZUCZA, a river of Hungary, in the comitat of Trentschin, which has its source at the junction of the E and W branches of the Carpathian chain

runs first ENE, then SE and SSW, and joins the Waag, on the r. bank, opposite Zsolna, after a course of about 42 m. Its principal affluent is the Bisztricza, which it receives on the l. Csacza and Ober-Neustädtl are the chief towns on its banks.

KITAIGOROD, a town of Russia in Europe, in the gov. of Kiev, district and 29 m. E of Lipoviec and 12 m. NNE of Gaïsin.

KITCHIGHINA, a village and fort of Russia in Europe, in the gov. of Orenburg, district and 38 m. NW of Troïtzk, on the l. bank of the Ouvelka. It contains about 100 houses, inhabited chiefly by Cossacks and old soldiers.

KITCHORU (Point), a rocky point on the W coast of Africa, 1¾ m. E of the mouth of the river Apam.

KITGONES, a tribe of Indians who inhabit the NW part of Russian America, to the N of the gulf of Kotzebue, and along the shores of the Arctic ocean.

KITID, a village of Transylvania, in the NE part of the comitat of Hunyad.

KITLEY, a township of Upper Canada, in the Johnstown district. Pop. in 1842, 2,964, chiefly Britons.

KITOVICHKI (Novo), a town of Russia in Europe, in the gov. and 24 m. WNW of Vilna, district and 12 m. W of Novo-Troki.

KITRIAI, or Cytriae, a village of Greece, in the Morea, nomarchy of Laconia, on a bay of the gulf of Coron, in a fertile valley 23 m. NNW of Ariopolis. It contains about 500 houses.

KITRO (Cape), a headland of Turkey in Europe, in the sanj. of Trikali, 15 m. NE of Kitrin, on the W side of the gulf of Salonica.

KITSEKY, a small island of Japan, near the W coast of the island of Kiou-siou, and to the N of the island of Fernando. It is well-cultivated.

KITSIK, a village of Turkey in Asia, in Anatolia, in the sanj. of Khodavenkiar, near Brusa. The environs are noted for their ruins of Alcyonium.

KITSIK-KARATCHA, a chain of mountains in Independent Tartary, in the NW part of the country of the Kirghiz, between the basins of the Tobol and Ural rivers. It has a total length of about 210 m., and attaches itself on the NW to the Ural mountains.

KITSIK-URLU, or Ketsiburlu, a town of Turkey in Asia, in Anatolia, in the sanj. of Hamid-ile, 21 m. N of Hamid, and 45 m. SSE of Afium-Karahissar. The manufacture of a species of cloth, locally known as bogassins, forms the chief branch of local industry.

KITSIN, a river of Independent Tartary, in the khanate of Khiva, to the NW of the steppe of Manguichlak. It has a total course, in a WSW direction, of about 105 m., and discharges itself into the gulf of Alexander, on the E side of the Caspian sea.

KITTAM, a district of Senegambia, on the Sierra Leone coast, between Gallinas river on the E and Sherboro river. Its S part is intersected by a considerable river of the same name.

KITTAN, an island of the Indian ocean, in the group of the Lacadive islands, in N lat. 11° 25′, and E long. 73° 32′.

KITTANING, a township of Armstrong co., in the state of Pennsylvania, U. S., 182 m. WNW of Harrisburg. It has a hilly surface, but its soil, consisting of gravelly loam, is generally fertile. Pop. in 1840, 1,323. The town is on the Alleghany river. Pop. about 600.

KITTATINNY MOUNTAINS, a branch of the Alleghany chain, extending through the N part of the state of New Jersey, across the Delaware river, and through the state of Pennsylvania and the W part of Maryland, into Virginia.

KITTERY, a township of York co., in the state of Maine, 100 m. SW of Augusta, on the NE bank of Piscataqua river, and bounded on the E and S by the Atlantic. Pop. in 1840, 2,435. It has a small but good harbour.

KITTESFORD, a parish in Somerset, 3½ m. WNW of Wellington. Area 1,080 acres. Pop. in 1831, 171; in 1841, 152.

KITT'S (Saint). See Christopher's (Saint).

KITTSEE, or Köposeny, a town of Hungary, in the comitat of Weiselburg, 2 m. SSW of Presburg, and 35 m. ESE of Vienna, in a fine locality. Pop. 3,100, of whom about 789 are Jews. It contains a castle, belonging to the princes of Esterhazy, a Catholic church, and a synagogue.

KITTUR, a town of Hindostan, in the prov. and 108 m. SW of Bejapur and district of Gunduk. The environs are extremely fertile.

KITZBICHL, or Kitzbuchel, a town of Austria, in the Tyrol, ldgb. and 50 m. ENE of Innsbruck and circle of Schwatz, on the r. bank of the Great Achen. Pop. 1,334. In the environs are mines of iron, copper, and silver.

KITZINGEN, a town of Bavaria, in the circle of Lower Franconia, 11 m. ESE of Wurtzburg, on the r. bank of the Main, which is here crossed by a bridge 1,000 ft. in length, and by which it is united with its suburb, Etwashausen. Pop. 5,170. It is enclosed with walls flanked with towers and with ditches, and is well-built. It has three public squares, a townhouse, a Lutheran, and an Ursuline convent, a gymnasium, two infirmaries, and an hospital. It possesses calico printing-works, and distilleries of brandy and of vinegar; and has an active trade in the wine grown in its environs.

KIVALUR, a town of Hindostan, in the district of Tanjore, in the Carnatic, 5 m. W of Negapatam.

KIWAIWONA, or Kewenaw (Point), a tongue of land stretching NNE into Lake Superior, in the Chippeway territory, U. S., to the SE of the Isle Royale, and nearly insulated from the continent by Portage river. It terminates in a narrow extremity, the highest point of which, Rocky hill, is 270 ft. above the level of the lake. To the S of the promontory is a bay of the same name, which receives at its head a river also bearing the same appellation.

KIYUL, a river of India, in Bhagulpur, which rises in the Rhamgur district, and flows NW to the l. bank of the Ganges, which it joins near Suryagharha.

KIZ, a town of Independent Tartary, 290 m. NW of Samarcand.—Also a village of Asiatic Turkey, in the pash. of Caramania, 38 m. NE of Erekli.

KIZDERWE'NT, or Kys-Derbend [*i. e.* 'the Pass of the Maidens'], a small town of Asiatic Turkey, in the sanjak of Kodja-Ili, on the road from Hersek on the S side of the gulf of Ismid, to Isnik, at the E extremity of the lake of Isnik, near the sources of the river Dill, near a mountain-gorge from which it takes its name. It contains about 100 houses. The inhabitants are all Bulgarians.

KIZIL-AGATCH, a town on a deep gulf of the same name, in the Russian prov. of Shirvan, in the khanat of Talyshin, on the W coast of the Caspian.—Also a village of Asiatic Turkey, in the pash. and 10 m. W of Mush.

KIZIL-DAGH, a mountain-range of Asiatic Turkey, in the SE of the pash. of Kars, between the Magasbert and the Aras.

KIZILDJEH-MOUSSA-DAGH, a mountain-ridge in Anatolia, connected with Mount Tartali on the W, and Mount Birki on the E.

KIZIL-HIZAR, a village of Syria, 8 m. E of Aintab.

KIZIL-IRMAK, or Halys, the largest river of

Asia Minor. It is composed of two main branches, one from the E, the other from the S. The eastern branch rises to the N of Sivas, on the S slope of the range of Paryadres, which separates the ancient *Cappadocia* from *Pontus*. The southern branch rises on the N slope of Mount Taurus, near Erekli. Both D'Anville and Rennel concur in fixing the sources of the eastern and southern Halys, in accordance with Pliny, yet Kinnier in his map fixes the source of the southern branch at the NW foot of the Kauler-Dagh, to the SE of El-Bostan, and places that city on its banks. The southern Halys flows through the sanjak of Nigdeh, and the ancient districts of *Cataonia*, *Tyanitis*, and *Garsauritis* in a NW direction; whilst the northern flows to its junction in a direction S of W. The two streams unite 20 m. to the SE of Kir-Shehr, and then flow NW about 30 m., after which the united stream bends to the NNE, and flows prevailingly in that direction to the Black sea, separating the pash. of Anatolia on the W from that of Rum or Sivas on the E. The whole course of the Halys exceeds 400 m., exclusive of windings. It separates the ancient *Cappadocia* from *Phrygia*, and *Pontus* from *Paphlagonia*; and enters the Euxine in 41° 32′ 52″ N lat., and 36° 11′ 45″ E long.

KIZIL-KAN, a small town of Diarbekir, in Asiatic Turkey, 12 m. W of Merdin.

KIZIL-KIAHIA, a town of Asiatic Turkey, in the sanjak of Tekeli, near the r. bank of the Duden, 32 m. N of Sataliah.

KIZIL-KUM, a vast stretch of sandy desert in Independent Tartary, to the SE of the sea of Aral, between the rivers Jelum and Sihun, and Mount Kukertli.

KIZIL-OZEN, a Persian stream, the *Gozan* of Scripture, and the *Mardus* or *Amardus* of Ptolemy. It originates in the mountains of Ardelan or Persian Kurdistan, the *Mardiana* of the ancients, in the vicinity of Senna, in that elevated upland where the rivers rise in opposite directions and run to different seas. The course of the K. is generally to the E of N, its upper valley being bounded on the W by the range of the Kaplan-Dagh or Koflan-Koh, which separates it from Azerdbijan. About 10 m. NE of Gultuppeh it receives the large stream of the Bulunli, coming SW from the mountains of Sahund. The channel of the K. is generally 200 yds. wide above the junction. From hence it flows E to the ford of Paras, where a pass leads over the Koflan-Koh into the fine district of Khalkhal in Azerdbijan. From the ford of Paras the range of the Koflan-Koh leaves the N bank of the stream, and runs NE to the Talish mountains. After a direct course of more than 100 m. farther, it pierces the Elburz range, and, after a farther course of 50 m., enters the Caspian sea a few m. to the E of Enzelly. At its mouth, when collected into one channel, it is 200 yds. broad, deep, rapid, turbid, and agitated violently from shore to shore. In most places it is not satisfied with one channel, but, spreading itself over a wide space, it tears away the banks, forms islands and gravelly beds that seem to be constantly shifting, often dividing into two or three streams, anon re-uniting, and again separating, according to the nature of the obstacles which impede its progress. With so much force does its current propel itself into the sea that it is perceptible to a considerable distance. The whole course of the river, including sinuosities, is 400 m. It derives the name of Kizil, or 'red,' from the reddish tinge of its waters. It is also called Shah-Rud, or 'the Royal river;' Suffid-Rud, or 'the White river,' from its foaming course through the mountains to the sea; and Ispe or Aspa-Rud, or 'the River of horses.' It is the *Asprudus* of Patricius, on the banks of which Narses, the Persian monarch, was compelled to sign a treaty with the Romans, by which Azerdbijan was ceded to Tiridates, the Armenian king, and that river made the Persian boundary.

KIZIL-ROBAT, or Kizil-Abud, a village of Asiatic Turkey, in Irak-Arabi, 10 m. NNE of Shehrban.

KIZLAR, a fortified town of Russia, in the government of Caucasus, situated on the l. bank of the Terek, 50 m. W of the point where it falls into the Caspian. It was built in 1736, and is always garrisoned by two battalions, composed of the tribes who wander over the immense steppe between K. and Astrakhan, chiefly Nogays and Kalmuks. Its trade is considerable, being a sort of entrepot for the commerce of Astrakhan with Persia and the interior of Caucasus. Wine, brandy, and silk are exported from it in considerable quantity, also oil of sesame.

KLAARWATER. See Griqua-town.

KLAASWAAL, a town of Holland, in the prov. of S. Holland, 6 m. WSW of Dordrecht. Pop. 1,200.

KLADNO, a village of Bohemia, in the circle and 15 m. ENE of Rakonitz. Pop. 600.

KLADOVA. See Gladova.

KLADRAU, a village of Bohemia, in the circle and 17 m. W of Pilsen, on the Beranka. Pop. 700.

KLAFFELSTRAETE, a commune of Belgium, in the prov. of E. Flanders, dep. of Overmeire. Pop. 116.

KLAGENFURT, a circle and town of Austria, in Carinthia, in the ldgb. or gov. of Laibach. The circle or administrative subdivision comprises an area of 1,888 sq. m., and is bounded on the N and E by Styria; on the S by the circle of Laibach; and on the W by that of Villach. Pop., consisting chiefly of Germans and Wendes, in 1837, 178,523. It is generally mountainous, and is intersected by numerous streams, the principal of which are the Drave and its affluents, the Glan, Gurk, Lavant, Fella, and Mics. Near the town of K. is a considerable lake of the same name. The slopes of the mountains are covered with wood. The valleys are extremely fertile; and produce corn, legumes, lint, and fruit in great abundance. They afford pasture also to large herds of cattle and to a fine breed of horses. Mineral springs are numerous. Mines of silver, copper, lead, and iron are successfully wrought in the locality; and it furnishes also alum, mercury, anthracite, and marble. It possesses extensive iron-works, and several manufactories of iron ware, wire, nails, and guns.—The town is 49 m. NNE of Laibach, 65 m. SW of Gratz, and 75 m. NNW of Trieste, on the Glan, 6 m. from the l. bank of the Drave, 1½ m. E of Lake K. or Worth, with which it is connected by a canal, and at an alt. of 1,410 ft. above sea-level. Pop. in 1846, 14,200. It has 4 suburbs, and the same number of gates. The streets are broad, and regularly laid out, and the houses generally well-built. The principal buildings are the imperial castle, the government-house, and the cathedral. There are besides several churches, an Ursuline convent, a lyceum, a library, museums of painting and sculpture, and of natural history, a gymnasium, several schools, an orphans' asylum, and several hospitals. In one of the squares are an equestrian statue of Leopold I., and a statue in bronze of Maria Theresa. The industry of the town consists chiefly in the manufacture of white-lead, fine cloth, silk fabrics, ribbon, and muslin. The transit-trade is considerable. In the environs are extensive ruins, supposed to be those of the ancient *Tiburnia*. In 1797, and again in 1809, K. fell into the hands of the French. At the latter period its fortifications were destroyed.

KLAIRHAGE, a commune of Belgium, in the prov. of E. Flanders, dep. of Meldert. Pop. 342.

KLAMATH, or Klamet, a river of Oregon, which rises in several small lakes near the head-stream of the Rio Sacramento; and after flowing in a SSW course, and entering Upper California, bends round to the NW, and flows into the Pacific, to the N of Cape San Sebastian. It is 1 m. wide at its mouth, which is easy of access, and for 40 m. up the stream there is no interruption to steam-boat navigation. In the low stage of water, however, only vessels of light draught can go up much beyond the site of the town of K., which is 1 m. from the ocean. The junction of the Salmon river is 90 m. above this site. Midway between these points the river is impeded by rocks, so that boats cannot pass; but after leaving these there is no obstacle up to the falls at the mouth of Salmon river. About 20 m. above the Salmon, the Trinity river comes into the K. The land around these rivers is, with little exception, favourable to agricultural purposes; but at present the gold deposits on the K. and its tributaries are engrossing attention. Gold has been found for 50 m. along the K.

KLANA, a town of Austrian Illyria, in Carniola, 30 m. ESE of Trieste.

KLANDORF (Klein), a village of Transylvania, in the com. of Hunyad, 9 m. SSE of Deva.

KLANYECZ, a town of Croatia, in the com. of Warasdin, 27 m. ESE of Cilli, near the Styrian frontier.

KLAPPA (Pulo), a small low island covered with cocoa-nut trees, near the entrance of the strait which divides Prince's island from the mainland of Java.

KLAPSTRAET, a commune of Belgium, in the prov. of E. Flanders, dep. of Deurle. Pop. 390.

KLAR, or Clara, a river which rises from Lake Faemund, in Norway, under the name of the Trysild; enters Sweden, when it assumes the name of K., and flows into the Wener lake, by three arms, near Carlstad, after a SSE course of 200 m.

KLARENHOUCK, a commune of Belgium, in the prov. of E. Flanders, dep. of Marcke. Pop. 160.

KLARENTZA. See Glarentza.

KLARITZA, a town of Turkey in Europe, in the sanjak of Trikali, 22 m. NE of Larissa, on the gulf of Salonica, on which it has a port.

KLATTAU, a circle and town in the S of Bohemia. The circle has an area of 870 sq. m.—The town, 68 m. SW of Prague, is well built, and has extensive woollen manufactures. In the neighbourhood are marble quarries, silver mines, and a celebrated mineral spring. Pop. 6,564.

KLAUSEN. See Chiusa-di-Beressanone.

KLAUSENBERG, Kolos, Kolosch, or Kolos-Varmegye, an administrative prov. of Transylvania, comprising an area of 91·8 German sq. m; extending between the comitats of Kraszna and Doboka on the N: those of Thorenburg and Lower Weissenburg on the E and S; and Hungary on the W. Pop. in 1837, 147,021. It contains numerous mountain-ranges, especially towards the E and W. The central part consists of extensive tracts of heath, and is intersected by the Kis-Szamos, the principal river in the country. The Sebes-Koros runs through the W part of the comitat, and the opposite extremity is watered by several affluents of the Maros. The principal productions of the soil are grain and wine. Cattle and horses are reared in great numbers in some of its districts. The comitat is divided into 2 circles, Upper and Lower, and each of these contains 6 jaras or marches. Besides the capital, which bears the same name, it contains 5 towns.—The town, which is also called Kolosvar and Klusch, is 51 m. N of Carlsburg, and 375 m. SE of Vienna, in N lat. 46° 44′, E long. 21° 34′ 28″. Pop. in 1837, 16,500; in 1846, 22,000, chiefly Hungarians. It lies on the r. bank of the Szamos, in a beautiful valley, enclosed on all sides by lofty mountains. It has 5 suburbs, but is of little extent. It is surrounded with a wall and ditch, and commanded by an ancient fortress, which stands on the summit of an adjacent eminence. It consists of an old and new town, and possesses several handsome though unpaved streets, a large square, and fine promenades. It contains several palaces, many handsome private dwellings, a cathedral, numerous churches, a convent, a town-hall, 3 hospitals, a lyceum and public library, a gymnasium, several colleges and schools, a workhouse, a theatre, and several printing establishments. It is the seat of the Transylvanian diets. It has manufactories of cloth, hats, and china. A fair for horses is held once a-year. This town is much resorted to in winter. It is noted as the birth-place of Mathias Corvin. The environs are fertile, and adorned with numerous gardens. The old town of K. was fortified by the Romans, and formed the 6th colony of the emperor Trajan. In 1798 it was to a great extent destroyed by fire.

KLAUSENTHAL, a fort in Tyrol, in the circle of the Lower Innthal, 18 m. NE of Inspruck, on the E bank of Lake Achen.

KLAUSTHAL, a district of Hanover, comprising the greater portion of the Upper Harz, and divided into the three bailiwicks of Andreasberg, K., and Zellerfeld.—Its cap., of the same name, is 27 m. E of Gottingen, in N lat. 51° 48′, E long. 10° 20′, at an alt. of 1,740 ft. above sea-level. It has considerable manufactories of lace and linen; and is the seat of the superior administration of the mines.

KLEBRONN, a village of Würtemberg, in the circle of the Neckar, 20 m. NNW of Stuttgard. Pop. 1,100.

KLECHOUTE, a commune of Belgium, in the prov. of E. Flanders, dep. of Dickelvenne. Pop. 295.

KLECK, a small town of Russian Lithuania, in the gov. of Minsk, 24 m. WNW of Slutzk.—Also a mountain in Croatia, at the point of divergence of the Julian and Dinaric Alps.

KLECKO, a town of Prussian Poland, 12 m. WNW of Gnesna. Pop. 900.

KLECZEWO, a small town of Poland, 42 m. N of Kalisch. Pop. 1,200.

KLEEBERG, or Cleeburg, a small town of France, in the dep. of Bas-Rhin, cant. and 6 m. SW of Weissemburg, in the principality of Deux Ponts. Pop. 850, chiefly Calvinists.

KLEEMPOEL, a commune of Belgium, in the prov. of Brabant, dep. of Sempst. Pop. 185.

KLEIN, a word signifying in German 'little,' and prefixed to a great number of names of towns and villages in that country, most of which will be found under the latter word. Thus Klein-Laufenburg. See Laufenburg.

KLEINENBERG, a town of Prussia, in the reg. and 40 m. S of Minden. Pop. 850.

KLEIN-MAL, a commune of Belgium, in the prov. of Limburg, dep. of Mall. Pop. 159.

KLEMENS, a village of Denmark, in the island of Bornholm, 6 m. NE of Rönne. Pop. 1,270.

KLENOCZ, a village of Hungary, in the com. of Gömör, 6 m. SSW of Tiszcolz.

KLESCZEL, a small town of European Russia, in the prov. of Bialystock, 12 m. E by S of Bielsk. Pop. 1,100.

KLETTERBOSCH - ET - BRANDSTRAET, a commune of Belgium, in the prov. of E. Flanders, dep. of Saint Nicolas. Pop. 100.

KLEUTSCH, a village of Anhalt-Dessau, 6 m. N of Raguhn, near the r. bank of the Mulde.

KLEVAN, a river of Russia, in the gov. of Kursk, which runs from NE to SW, and joins the Sem, on the r. bank, 14 m. W of Pontiol, after a course of 90 m.

KLEVE-BERG. See Cleves.

KLEY, a commune of Belgium, in the prov. of Brabant, dep. of Borgt-Lombeke. Pop. 128.

KLEYNDERBEECK, a commune of Belgium, in the prov. of E. Flanders, dep. of Nieuwerkerken. Pop. 150.

KLEYNEN-STEENWEY, a commune of Belgium, in the prov. of E. Flanders, dep. of Erondegem. Pop. 214.

KLEYN-LAER, a commune of Belgium, in the prov. of E. Flanders, dep. of Vracene. Pop. 553.

KLEYN-PEUTHY, a commune of Belgium, in the prov. of Brabant, dep. of Peuthy. Pop. 195.

KLEYN-ET-GROOT-REES, a commune of Belgium, in the prov. of Antwerp, dep. of Casterlé. Pop. 202.

KLEYN-SOTTEGEM, a commune of Belgium, in the prov. of E. Flanders, dep. of Letterhauten. Pop. 166.

KLEYSERKOG, a village of Denmark, in the duchy of Sleswick, 14 m. SSW of Tondern. Pop. of v. and p. 2,365.

KLIASMA, a river of Russia, which rises near Klin, in the gov. of Moscow; flows SSE, then NE, and then E, 350 m.; and joins the Oka, on the l. bank, at Gorbatov. It passes the towns of Vladimir, Kovrov, Viazniki, and Gorokhovetz. Its principal affluents are the Tcherna, Peksha, Uvot, Teza, and Lukh, on the l.; and the Sudugda on the r.

KLICZEV, a town of Russia, in the gov. of Minsk, 30 m. NNE of Bobrinsk, on the r. bank of the Olfsa.

KLIMONTOW, a small town of Poland, 13 m. W by S of Sendomir. Pop. 550.

KLIMOVITCHI, a small town of Russia, in the gov. of Mohilev, 24 m. ENE of Tcherikof. Pop. 1,000.

KLIN, a small town of European Russia, in the gov. and 56 m. N by W of Moscow. Pop. 2,400.

KLINGEN, a village of Schwarzburg-Sondershausen, 12 m. SW of Frankenhausen, near the l. bank of the Helbi. Pop. 729.

KLINGENBERG, a town of Bavaria, in the circle of Lower Franconia, on the Main, 15 m. S of Aschaffenburg. Pop. 1,007.

KLINGENMUNSTER, a small town of Bavaria, in the Lower palatinate, 3 m. NNE of Bergzaborn.

KLINGENTHAL, a village of Saxony, in the Vogtland, 12 m. E of Oelsnitz. The inhabitants, amounting to 1,000, are chiefly employed in making musical instruments.—Also a village of France, in Alsace, on the small river Ehu, 15 m. NNW of Schelestadt. Here is an extensive manufacture of sabres, sword blades, and other arms.

KLINGNAIR, a town of Switzerland, in the cant. of Aargau, 16 m. NE of Aarau. Pop. 1,500.

KLINKAERT (Den), a commune of Belgium, in the prov. of E. Flanders, dep. of Oordegem. Pop. 162.

KLINKHEIT, a town of Prussia, in the prov. of the Rhine, near Burscheid.

KLINTZY, a town of Russia, in the gov. of Chernigov, 17 m. S of Suraj. Pop. 3,200.

KLISSA. See Clissa.

KLISSENHACK, a commune of Belgium, in the prov. of Antwerp, dep. of Vorsselaer. Pop. 426.

KLISSURA, a strong fort of Turkey, in Albania, 58 m. N by W of Janina.

KLIUTCHEVSK. See Kamtchatka.

KLOBAUK, a small town of Austria, 21 m. ENE of Hradisch. Pop. 2,896.—Also a town in the circle of Brunn, 12 m. S of Austerlitz. Pop. 1,500.

KLOBUCKO, a small town of Poland, 72 m. NNW of Cracow. Pop. 1,800.

KLOBUK, a fort of Turkey, in the sanj. of Herzegovina, 30 m. N of Cattaro, on the r. bank of the Tribinichitza.

KLODAWA, a small town of Poland, in the prov. and 90 m. W of Warsaw. Pop. 2,300.

KLOETZE, a small town of Prussian Saxony, 48 m. E of Zelle. Pop. 1,550.

KLONOWA, a town of Poland, 30 m. SSE of Kalisch. Pop. 500.

KLOOSTERWYCK, a commune of Belgium, in the prov. of E. Flanders, dep. of Melle. Pop. 362.

KLOPPENBURG, a small town of the grand-duchy of Oldenburg, situated on the Söste, 60 m. NNE of Munster. Pop. 883.

KLOSSE, a commune of Belgium, in the prov. of E. Flanders, dep. of Swynaerde or Zwynaerde. Pop. 314.

KLOSTER (Alt and Neu), two villages of Hanover, in the gov. of Stade, on the l. bank of the Este.

KLOSTERGRAB, a village of Bohemia, in the circle of Leitmeritz, 22 m. NNE of Saatz. Pop. 400.

KLOSTER-KUHHORN, or Znio-Varallya, a town of Hungary, in the com. of Thurocz, 20 m. NNW of Cremnitz.

KLOSTERLE, a small but well-built town of Bohemia, on the Egra, 15 m. NE of Carlsbad. Pop. 1,600. It has manufactures of lace, earthenware, and cutlery.

KLOSTER-NEUBURG, a small town of Lower Austria, on the r. side of the Danube, 6 m. N of Vienna. Pop. 380. It takes its name from a monastery of the order of St. Augustine, founded here in 1114. Its buildings of that date are extensive, but are now no longer used, a new monastery having been erected in 1730. The library of the monastery contains 25,000 printed volumes, with several Hebrew, Arabic, and Latin manuscripts. The town is of great antiquity. In 1683, the lower town was burnt by the Turks, who were besieging Vienna; but the upper town baffled all their efforts. Here is a dockyard for the construction of light-armed vessels, for protecting the navigation of the Danube; also a large manufacture of arms for government.

KLOSTERS, a village of Switzerland, in the cant. of the Grisons, 18 m. E of Coire, on the Landquart river. Pop. 1,000.

KLOTEN, a small town of Switzerland, 5 m. N by E of Zurich. Pop. 1,600. It has a fine church.

KLOTZE, a town of Prussia, in the prov. of Saxony, circle and 12 m. NW of Gardeleben. Pop. 1,530.

KLUNDERT, a small but strong town of Holland, in N. Brabant, with a strong fortress, 5 m. ENE of Williamstadt. It was taken by the French under Dumourier in 1793. Pop. 700.

KLUS, a hamlet of Switzerland, in the cant. of Soleure, 1 m. S of Ballstall. Pop. 150.

KLUTCHI, a village of Kamtchatka, at the junction of a small stream of the same name with the Kamtchatka river, at the base of the great volcanic mountain of Kliutchevsk, 20 versts above Kammina. It consists of from 15 to 20 houses, and a church.

KNÆRED, a parish and village of Sweden, 21 m. SE of Halmstad, on the r. bank of the Laga.

KNAITH, a parish in Lincolnshire, 3 m. S by E of Gainsborough, on the E bank of the Trent. Area 1,640 acres. Pop. in 1831, 63; in 1841, 72.

KNAPDALE, a division of Argyleshire, between the isthmus of Crinan and that of Tarbert, about 20 m. in length, and 16 m. in breadth. It is divided into the two parishes of North and South K. Pop. of former, in 1831, 2,583; in 1841, 2,170; of South K., in 1831, 2,137; in 1841, 2,223.

KNAPTOFT, a parish in the co. of Leicester, 11 m. SSE of Leicester, including the chapelries of Mowsley and Shearsby, and the hamlet of Walton. Area 4,940 acres. Pop. in 1831, 924; in 1841, 936.

KNAPTON, a parish 3 m. NNE of North Walsham. Area 1,410 acres. Pop. in 1831, 327; in

1841, 348.—Also a township in the parish of Acomb, E. R. of Yorkshire, 3 m. E of York. Area 880 acres. Pop. in 1831, 120; in 1841, 98.—Also a chapelry in the p. of Wintringham, E. R. of Yorkshire, 7 m. NE by E of New Malton, on the York and North Midland railway. Area 2,740 acres. Pop. in 1841, 264.

KNAPWELL, a parish in Cambridgeshire, 8½ m. WNW of Cambridge. Area 2,000 acres. Pop. in 1831, 128; in 1841, 155.

KNARESBOROUGH, a parish and parliamentary borough in the W. R. of Yorkshire, 3 m. E of Harrogate, and 16 m. W by N of York, on the river Nidd. The p. includes the chapelries of Arkendale, and Bilton and Harrogate, and the townships of Brearton, and Scriven with Tentergate. Area of p. 11,970 acres. Pop. in 1801, 5,761; in 1831, 10,214; in 1841, 9,947. The town is finely situated on the NE bank of the river Nidd. It is large and handsome, and the houses are well-built. It seems well-situated for the carrying on of manufactures, the river Nidd being rapid, deep, and serviceable for turning the wheels of mills and machinery. The manufacture of linen has been long established here; the manufacture of cotton has also been introduced. The chief goods manufactured are low ginghams, low bedding-ticks, and sheetings. K. has sent two members to parliament since 1553. Electors registered in 1837, 227; in 1848, 245. Pop of parl. borough, in 1831, 5,296; in 1841, 5,382.—On a rocky height, at the SW side of the town, near the river, are the remains of the ancient castle of K., erected soon after the conquest.—In the parish are four mineral springs, one of which, the famous dropping-well of K., rises at the foot of a limestone rock, about 40 yds. from the bank of the river.

KNARESDALE, a parish in Tindale ward, Northumberland, 16 m. WSW of Hexham, on the South Tyne. Area 8,940 acres. Pop. in 1841, 491.

KNAVENSTOWN, a parish in co. Kildare, 2¾ m. WNW of Kildare. Area 618 acres. Pop. in 1831, 124; in 1841, 65.

KNAYTON WITH BRAWITH, a township in the p. of Leek, N. R. of Yorkshire, 4 m. NNE of Thirsk. Area 1,390 acres. Pop. in 1831, 336; in 1841, 404.

KNEBWORTH, a parish in Hertfordshire, 8½ m. WNW of Hertford. Area 2,740 acres. Pop. in 1831, 259; in 1841, 253.

KNEDLINGTON, a township in the parish of Howden, E. R. of York, 1 m. WSW of Howden, on the river Ouse. Pop. in 1831, 123; in 1841, 142.

KNEESALL, a parish in the co. of Nottingham, 4 m. SE by E of Ollerton. It includes the hamlet of Kersall, and the township of Ompton. Area 3,360 acres. Pop. in 1831, 613; in 1841, 596.

KNEESWORTH, a hamlet in the p. of Bassingbourn, Cambridgeshire, 2½ m. NNW of Royston. Area 960 acres. Pop. in 1841, 191.

KNELSTON, a parish in Glamorganshire, 11 m. SW of Swansea. Pop. in 1831, 125; in 1841, 113.

KNESBECK, a village of Hanover, in the gov. and 48 m. SSE of Luneburg. Pop. 575.

KNESHINE, a town of Turkey in Europe, in Bosnia, in the sanjak of Trawnik, 20 m. ENE of Bosnaserai, on the l. bank of the Krivaja.

KNESSCLAERE, a department and village of Belgium, in the prov. of East Flanders, arrond. and 17 m. WNW of Gand. Pop. of dep. 4,120; of v. 839.

KNETTISHALL, a parish in Suffolk, 7 m. E by S of Thetford. Area 1,120 acres. Pop. in 1841, 79.

KNEVETON, or KNEETON, a parish in Nottinghamshire, 7½ m. SW by S of Newark, on the E bank of the Trent. Area 990 acres. Pop. 109.

KNIAGININ, a district and town of Russia in Europe, in the gov. of Novgorod. Pop. of district 100,000.—The town is 59 m. ESE of Nijni-Novgorod. Pop. 1,600. It has several tanneries, and holds fairs several times a-year.

KNIAJOE, a town of Russia in Europe, in the gov. and 99 m. NE of Tchernigov, dist. and 10 m. S of Starodub.

KNIAZ, or ZYD, a lake of Russia in Europe, in the gov. of Minsk, dist. and 54 m. NW of Mozouir. It is 15 m. in length, and 5 m. in medium breadth.

KNIAZYCE, a town of Russia in Europe, in the gov. and dist. and 13 m. WNW of Mohilev, on the Likhva. It has 2 convents.

KNIEBIS, a defile of the Schwarzwald, in the circle of the Middle Rhine, grand-duchy of Baden, near Freudenstadt. Its highest point is 2,560 ft. above sea-level.—Also a village of Würtemburg, in the circle of the Schwarzwald, on the confines of Baden.

KNIEGNITZ (GRON), a village of Prussia, in the reg. of Breslau, circle of Nimptsch. Pop. 868.—Klein K., in the same circle, has a pop. of 634.

KNIEGNITZ (POLNESCH), a village of Prussia, in the reg. and circle of Breslau. Pop. 222.

KNIELINGEN, a village of the grand-duchy of Baden, in the circle of the Middle Rhine, and 3 m. WNW of Carlsruhe, near the Rhine. Pop. 1,410.

KNIESEN, GNEZDA, or GNAZDA, a royal and free-town of Hungary, in the comitat of Zips, 15 m. NE of Käsmarkt, on the l. bank of the Poprad. Pop. 1,300.

KNIFE, a river of the state of Missouri, U. S., which joins the Missouri on the r. bank, a little to the S of the Mandan villages, after a N and W course of about 120 m.

KNIGH, a parish in co. Tipperary, 3 m. N by W of Nenagh. Area 4,514 acres. Pop. 1,572.

KNIGHT'S CANAL, an inlet of the Pacific, on the W coast of North America, in N lat. 50° 45′, extending in an E and NE direction about 50 m.

KNIGHT'S ISLAND, a small island in Behring's bay, situated to the NW of Eleanor's sound, and separated from the continent of America by a narrow channel, in N lat. 59° 45′.—Also an island in Prince William's sound, in N lat. 60° 24′, about 30 m. in length from N to S, and from 2 to 5 m. broad.—Also a small island in Hudson's bay, in N lat. 61° 50′, W long. 93° 30′.—Also an island in the Pacific, the largest of those called the Snares by Vancouver. Its S point is situated in S lat. 48° 15′, E long. 166° 44′.

KNIGHTON, or TREF-Y-CLAWDD, a parish and market-town, in the co. of Radnor, 10 m. NNW of New-Radnor. Pop. in 1831, 1,259; in 1841, 1,404.—The town, which is pleasantly situated on rising ground near the margin of the river Teme, consists of two streets, intersecting each other at right angles. K. unites with New Radnor in returning a member to parliament.—Also a chapelry in the parish of St. Margaret, Leicestershire, 2 m. SSE of Leicester, on the river Soar, intersected by the Midland Counties railway. Area 1,020 acres. Pop. in 1831, 402; in 1841, 552.—Also a township in the p. of Mucklestone, Staffordshire, 12 m. W by N of Stafford. Pop. in 1831, 156; in 1841, 465.

KNIGHTON-UPON-TEAME, a chapelry in the p. of Lindridge, Worcestershire, 3 m. ENE of Tenbury. Pop. in 1831, 553; in 1841, 552.

KNIGHTON (WEST), a parish in Dorsetshire, 3 m. SE of Dorchester. Area 1,920 acres. Pop. 268.

KNIGHTSBRIDGE, a hamlet, partly in the p. of St. Margaret, Westminster, and partly in those of Kensington, Chelsea, and St. George, Middlesex, 3 m. W by S of St. Paul's. K. extends from Hyde-Park corner to Kensington-Gore, and consists of one long street, on the line of the Great Western road from the metropolis. Many of the houses are new and handsome. On the N side, adjoining Hyde-

Park, are extensive barracks for cavalry; and on the opposite side, nearer Hyde-Park, are barracks for the foot-guards.

KNIGHTSTOWN, a village in Henry co., in the state of Iowa, U. S., 33 m. E of Indianapolis. Pop. 467.

KNIGHTWICK, a parish and village in Worcestershire, 9 m. W of Worcester, on the river Teme. Area 820 acres. Pop. in 1831, 169; in 1841, 157.

KNILL, a parish in Herefordshire, 2½ m. NNW of Knighton. Area 550 acres. Pop. in 1841, 75.

KNIN, a town of Austria, in Dalmatia, cap. of a district, in the circle and 45 m. E of Zara, on the r. bank of the Kerka, and at the foot of a steep mountain. Pop. 950. It is surrounded with walls, but consists of only a few miserable houses. On the adjacent mountain, at an alt. of 900 ft. above sea-level, is a fortress founded by the Turks, but subsequently enlarged by the Venetians.

KNIN (New), a town of Bohemia, in the circle and 17 m. ESE of Beraun, and 24 m. SSW of Prague, on the l. bank of the Koizaba. Pop. 800. In the environs are mines of gold.

KNIPHAUSEN, or Kniphuizen, a herrschaft or sovereign seignory of Germany, in the grand-duchy of Oldenburg, on the gulf of Jahde. It comprises an area of about 17 sq. m., and contains 3 parishes. Pop. 3,000. In 1810 it was included in the French dep. of Eastern Ems. In 1813 it was re-united to the grand-duchy of Oldenburg. The castle, which is its chief place, is 7 m. ESE of Jever.

KNIPTON, a parish in Leicestershire, 8 m. NNE of Melton-Mowbray. Area 1,430 acres. Pop. 363.

KNISTENEAUX, a tribe of Indians, who chiefly reside in the British possessions, north of Lake Superior, although some bands reside on streams running into Red river. They are of a moderate stature, well proportioned, and of great activity. Their complexion is of a copper colour, and their hair black. Their eyes are black, keen, and penetrating, and their countenances open and agreeable. Mackenzie mentions that their women are the most comely of all the Indian tribes he had seen on the American continent.

KNITTELFELD, a town of Austria, in Styria, in the circle and 8 m. NE of Judenburg, on the l. bank of the Mur. Pop. 2,000. It has extensive manufactories of iron and steel ware, and saltpetre.

KNITTLINGEN, a town of Wurtemburg, in the circle of the Neckar, bail. and 3 m. WNW of Maulbronn, on the frontier of Baden. Pop. 2,362. It is the reputed birth-place of Dr. Faust.

KNIVETON, a parish, township, and village in Derbyshire, 3½ m. NE of Ashbourne. Area 2,240 acres. Pop. in 1831, 342; in 1841, 326.

KNOB (Cape), a headland of Western Australia, in the co. of Kent, on the W side of Dillon bay, in S lat. 34° 35′ 20″, E long. 119° 14′ 45″.

KNOBEN, a small island of Denmark, in the Cattegat, to the E of Anholt.

KNOCK, a village in the p. of Kilmurry-Clonderalaw, co. Clare, on the NW shore of Clonderalaw bay, 5½ m. E of Kilrush. Pop. in 1831, 180; in 1841, 115.—Also a mountain of Scotland, in Banffshire, about 8 m. W by S of Portsoy. It has an alt. of about 1,600 ft. above sea-level.—Also a parish, 4¾ m. NE by N of Claremorris, co. Mayo. Area 11,704 acres. Pop. in 1831, 3,036; in 1841, 3,374. The surface is exceedingly bleak. Lough Cullentragh, on the SE boundary, has a surface elevation of 280 ft.—Also a parish 3¾ m. SSE of Nobber, co. Meath. Area 975 acres. Pop. 602.

KNOCK, the Irish term for a hill, mountain, or commanding eminence. The principal *knocks* in Ireland are the following:—

KNOCK, a hill in the parish of Ballyboy, 1¾ m. SE of Frankford, King's co. Though it attains an alt. above sea-level of only 490 ft., it forms a conspicuous feature in the flat country which extends NW from the base of the Slievebloom mountains.

KNOCKACLEEVAN, a hill 2½ m. NNE of Foxford, co. Mayo. It forms the W termination of the Lurgan or Slieve-Dauh range, and has an alt. of 912 ft.

KNOCKADUFF, a hill on the E side of Broadhaven, 2½ m. S of Benwee-head, co. Mayo. Alt. 519 ft.

KNOCKAGALISKY, a mountain 7½ m. SSW of Cahirciveen, co. Kerry, in the peninsula between the bays of Ballinskelligs and St. Finnan. Alt. 1,351 ft.

KNOCKAHA, a hill in Queen's co., 3½ m. W of Rathdowney. Alt. 659 ft.

KNOCKALONGY, a mountain 5½ m. W by N of Coolaney, co. Sligo. Alt. 1,778 ft.

KNOCKANAFRIAN, a mountain in co. Waterford, 6 m. SE of Clonmel, one of the chief summits of the great Cummeragh or Monavoulagh range. Alt. 2,469 ft.

KNOCKANARD, a mountain in the p. of Shanrahan, co. Tipperary, one of the Knockmeledown range, 2½ m. SE of Ballyporeen. Alt. 1,337 ft.

KNOCKANARE, one of the Knockmeledown mountains, on the boundary between co. Tipperary and co. Waterford, 1½ m. E of Knockmeledown proper, and 4½ m. NNW of Cappoquin. Alt. 2,149 ft.

KNOCKANISS, a mountain in co. Clare, 9 m. WNW of Scariff. Alt. 1,306 ft.

KNOCKAVRANE, a mountain in the peninsula between the bays of Bantry and Dunmanus, 9 m. SW by W of Bantry, co. Cork.

KNOCKBRACK, a mountain 4½ m. S of Kanturk, co. Cork.—Also one of the Cummeragh mountains, 6 m. NW of Kilmacthomas, co. Waterford.

KNOCKDUAGH, or Borroughaun, a conspicuous hill amidst a moorish and monotonous country, 2¾ m. NE of the head of Cashleh bay, co. Galway. Alt. 541 ft.

KNOCKEVEN, a mountain 2¾ m. NNW of Mount-Shannon, co. Galway. Alt. 1,242 ft.

KNOCKEYON, a hill in the p. of Faughalstown, co. Westmeath, on the NE side of Lough Dereveragh. Alt. 707 ft.

KNOCKFEERENA, or Knockfeerin, a hill 2 m. E of Ballingarry, and 4 m. SW by W of Croom, co. Limerick. Alt. 951 ft.

KNOCKFENNEL, the highest of the group of hills, around Lough Gur, in co Limerick.

KNOCKGARRAN, a mountain on the left side of the Kenmare river, and 5½ m. SW of Kenmare, co. Kerry.

KNOCKICLASHY, a hill in the barony of Clonmeen, co. Cork, possessing considerable interest as the scene of a battle fought on July 26, 1651, between the English under Lord Broghill, and the Irish under Lord Muskerry. In consequence of this battle Limerick surrendered to Ireton.

KNOCKINOSS, a hill and a battle-field 4 m. E of Kanturk, in co. Cork. The action for which the place is distinguished was fought on Nov. 13, 1647, between the parliamentarian forces under Lord Inchiquin, and the Irish forces under Lord Taaffe, and terminated in the complete route of the latter.

KNOCKINSKEA, a mountain 4 m. SSE of Castletownroche, co. Cork. Alt. 1,388 ft.

KNOCKLADE, a mountain in co. Antrim, 2¾ m. S of Ballycastle. Alt. above sea-level, 1,695 ft. It possesses a hemispherical or dome-like outline, and presents the same phasis to every point of the compass. Its skirts and lower declivities are disposed in corn-fields, and its higher regions, up to its very summit, are clothed with verdure. Its geognostic composition is successively schistose, calcareous, and basaltic; and the last has a thickness of 930 ft.

KNOCKLETTERAGH, a mountain on the N side of Coraan-Achill, co. Mayo. Alt. 1,509 ft.

KNOCKLETTERCASS, a mountain 3½ m. E of the head of Tulloghaan bay, co. Mayo. Alt. 1,208 ft.

KNOCKMADDEN, a mountain in the peninsula between Crookhaven and Dunmanus bay, co Cork, 4½ m. NE of Mizenhead. Alt. 1,029 ft.

KNOCKMORE, a mountain 5½ m. ENE of Newport, co. Mayo. Alt 1,259 ft.

KNOCKMOREDOWN, a mountain 7½ m. ESE of Ballinahinch, co. Galway. Alt. 1,163 ft.

KNOCKNADOBER, a mountain of Dingle, 4 m. NNE of Cahirciveen, co. Kerry.

KNOCKNADURAVE, a hill 2 m. W by N of Ballycastle, co. Mayo. Alt. 667 ft.

KNOCKNAFALLIA, a mountain of co. Waterford, one of the Knockmeledown range, 2 m. E by S of Knockmeledown proper. Alt. 2,199 ft.

KNOCKNALECKA, a hill in the p. of Kilnoe, co. Clare. Alt. 818 ft.

KNOCKNALOUGH, one of the W summits of the Knockmeledown mountains, in co. Waterford, 3 m. NW of Ballyduff. Alt. 1,028 ft.

KNOCKNALOWER, a hill 6¾ m. E of Belmullet, co. Mayo. Alt. 615 ft.

KNOCKNAMULREE, a mountain and a bog in the p. of Kilgeever, co. Mayo. The mountain—often called simply Muiree—overhangs the N side of Killery-harbour. Its alt. is 2,688 ft. The bog extends away from the N base of the mountain; and has an area of 1,623 acres.

KNOCKNANASK, a mountain in the p. of Lismore and Macollop, co. Waterford, in the W end of the Knockmeledown range, 3 m. E by S of Knockmeledown proper. Alt. 1,591 ft.

KNOCKNARA, a mountain in co. Sligo, on the E shore of Ardnaglass harbour, 3½ m. W by S of Sligo. Its alt. is 1,078 ft.

KNOCKNASHEEGAUN, a mountain 7½ m. W by N of Tubbercurry, co. Sligo. Alt. 1,168 ft.

KNOCKNASTERKIN, one of the Knockmeledown mountains, 5 m. N of Lismore. Alt. 2,084 ft.

KNOCKONHIGGIN, a mountain in co. Galway, on the N side of the Binabola group. Alt. 1,536 ft.

KNOCKOURA, a mountain on the W side of the peninsula and barony of Bere, 5 m. W of Castletown-Berehaven, co Cork.

KNOCKPATRICK, a hill 3 m. ENE of Castle-Dermot, co. Kildare. Alt. 851 ft.

KNOCKRAWER, a mountain on the N side of the Stracashel river, 8 m. NE of Ardara, co. Donegal. Alt. 1,475 ft.

KNOCKREAGH, a mountain 3 m. NW of Rathdrum, co. Wicklow. Alt. 1,559 ft.—Also a hill 1½ m. ESE of the town of Rathvilly, co. Carlow. Alt. 593 ft.

KNOCKSHANAHULLION, a mountain 2 m. S by W of Clogheen, co. Tipperary. Alt. 2,150 ft.

KNOCKSHEGOUNA, a hill in co. Tipperary, 5 m. SW of Birr.

KNOCKWARDER, a mountain 7½ m. E of Ballina, co. Mayo. Alt. 1,338 ft.

KNOCK (Le), a hamlet of Belgium, in the prov. of W. Flanders, dep. of Aelbeke. Pop. 165.

KNOCKACAPPLE, a village in the p. of Killaha, co. Kerry, 8½ m. E of Killarney.

KNOCKADERRY, a village in the p. of Clonelty, co. Limerick, 3½ m. ENE of Newcastle. Pop. 366.

KNOCKANDO, a parish in Morayshire, separated by the river Spey from the p. of Cromdale on the W. Pop. in 1831, 1,497; in 1841, 1,676. It contains the v. of Archiestown, on the moor of Ballintomb.

KNOCKANE, a parish in co. Kerry, 6 m. W by N of Killarney. Area 57,993 acres. Pop. in 1831, 4,678; in 1841, 5,191. It extends from the river Laune on the N, to the head-streams of the Blackwater on the S; and from the Lower lake of Killarney on the E, to Glencare on the W. Eight-ninths of the surface are barren mountain. It probably excels every p. both in Ireland and in England for the number, the variety, the magnificence, the stupendousness, and the beauty of its grand and romantic landscapes. The Toomies and the Purple mountains in the E, the MacGillicuddy's Reeks, including Carran-Tual and the Sugarloaf in the centre, and the mountains around Blackstones and along the r. side of Glencare on the W, all belong to the p., and are unsurpassed for sublimity by any heights in Ireland.

KNOCKANURE, a parish 3 m. E by N of Listowel, co. Kerry. Area 5,950 acres. Pop. 1,358.

KNOCKAUNGEVEEN, a village in the p. of Kilmina, co. Mayo, 2½ m. N by E of Westport. Pop. 129.

KNOCKAVILLY, a parish in co. Cork. Area 6,200 acres. Pop. in 1831, 2,184; in 1841, 2,078. The surface lies partly astride of the watershed between the Bandon and the Bride, and partly around the sources and head-streams of the Annabuoy.

KNOCKBAIN, a parish of Ross-shire, lying on both sides of the bay of Munlochy. Pop. 2,565.

KNOCKBREDA, a parish in co. Down. It contains the town of Ballymacarret and the v. of Newtownbreda. Area 8,098 acres. Pop. in 1841, 10,627.

KNOCKBRIDE, a parish 4½ m. N by W of Bailieborough, co. Cavan. Area 18,693 acres. Pop. in 1831, 9,746; in 1841, 10,603.

KNOCKCOMMON, a parish 2¼ m. SE of Slane, co. Meath. Area 3,500 acres. Pop. in 1841, 1,000.

KNOCKCROGHERY, a village in the p. of Killenovy, co. Roscommon, 4¾ m. SE of Roscommon. It has some local celebrity for the manufacture of a humble kind of tobacco-pipe, short in the stem, small in the bowl, and peculiarly adapted to the economizing of tobacco. About eight kilns are in requisition, and they produce on the average about 500 gross of pipes per week, of the value of 1s. per gross. The clay for the manufacture is carried from a distance of 2 m. Pop. in 1841, 263.

KNOCKGARRA, a village in the p. of Duras-Kinvarra, co. Galway, between the bays of Kinvarra and Aughinish, 2¾ m. NW by W of Kinvarra. Pop. in 1841, 297.

KNOCKGRAFFON, a parish 4¼ m. S of Cashel, co. Tipperary, containing the v. of New-Inn. Area 9,873 acres. Pop. in 1831, 3,520; in 1841, 3,296.

KNOCKIN, a parish in Salop, 5 m. SE by S of Oswestry. Area 450 acres. Pop. in 1841, 271.

KNOCKMAHON, a village in the parish of Monksland, co. Waterford, within a ¼ m. of the coast, and about a ½ m. ENE of Bonmahon. Pop. in 1841, 255.—The Knockmahon copper mines are situated in the vicinity. These mines belong to the Mining company of Ireland, and are now the most profitable and prosperous in the kingdom. They were originally worked about a century ago. Copper is the principal produce; but lead, in considerable quantities, is raised. According to an official return in 1836, the annual produce in copper amounted to between 4,000 and 5,000 tons, worth £9 per ton. The ore is shipped at the mines in boats, which carry it to vessels riding at anchor at some distance from the land; and supplies of timber and iron are brought on cars to the mines from Waterford, and are imported to the latter place, the timber from Norway, and the iron from Wales. The number of persons employed by the mines, exclusive of carriers and of other classes not statedly on the spot, is about 1,000.

KNOCKMARK, a parish 2 m. W of Dunshaughlin, co. Meath. Area 2,876 acres. Pop. in 1831, 714; in 1841, 630.

KNOCKMELEDOWN, a range of mountains on the mutual frontier of the cos. of Tipperary and Waterford. It commences 8 m. SW by S of Clonmel, and extends 12 m. due W to the boundary with co. Cork, or rather is continued 4½ m. into the interior of Cork under the local name of the Kilworth mountains. The range has a mean breadth of about 4½ m.; and is bounded by the vale of the rivulet Tar on the N, and by the valley of the Blackwater and the vale of the Phineas rivulet on the S. Its principal summits within co. Waterford, together with their several alts. above sea-level, are Knocknanask, 1,591 ft.,—Knocknafallia, 2,199,—Deyrick, 1,297,—Knocknalough, 1,028,—Crow-Hill, 1,003.—and six others, respectively 1,096, 1,668, 1,086, 1,031, 1,164, and 1,066 ft. The principal summits on the boundary between the two counties are Knockanare, 2,149,—Knocknasterkin, 1,084,—Sugarloaf, 2,144,—Knockmeledown proper, 2,690,—and two others respectively 2,069, and 2,101 ft. Those within co. Tipperary are West Crohan, 1,718 ft.,—Knockshanahullion, 2,150,—Farbreaga, 1,603.—Knockanard, 1,337,—and Carran-Hill, 1,189 ft. Knockmeledown proper is situated 4½ m. N by W of Lismore, and, in a straight line, 9 m. SW of Clonmel. Its N face is rapidly declivitous.

KNOCKMOURNE, a parish 4½ m. E of Castle-Lyons, co. Cork. Area 8,836 acres. Pop. of the whole, in 1831, 3,142; in 1841, 3,376.

KNOCKNEGAUL, a parish 4 m. S by W of Limerick, co. Limerick. Area 2,172 acres. Pop. in 1831, 1,381; in 1841, 1,230.

KNOCKRATH, a parish 3 m. NW of Rathdrum, co. Wicklow. Area 18,845 acres. Pop. in 1831, 2,081; in 1841, 2,331. The surface descends from Table mountain at the head of Glenmalure, down the l. side of the river Avonbeg to within 2¾ m. of 'the Meeting of the Waters.' Table mountain, at the head of Glenmalure, has an alt. of 2,341 ft. above sea-level; the Gap, immediately below it, of 2,266 ft.; the Avonbeg river, immediately above the waterfall, of 1,428 ft.

KNOCKTEMPLE, or Mullowny, a parish 3 m. WNW of Liscarrol, co. Cork, containing the village of Freemount. Area 4,618 acres. Pop. in 1831, 1,801; in 1841, 2,245.

KNOCKTOPHER, a parish and town in co. Kilkenny. Area 4,722 acres. Pop. in 1831, 1,700; in

1841, 1,968.—The town of K. is situated 1¾ m. ENE of Newmarket. Though dignified with the name of a town, it is, in point of fact, a mere village. Pop. in 1831, 475; in 1841, 467.

KNODISHALL, a parish in Suffolk, 3 m. ESE of Saxmundham. Area 1,710 acres. Pop. 397.

KNONAU, a parish and village of Switzerland, in the cant. of Zurich, district of Affoltern. Pop. 594.

KNOOK, a parish in Wilts, 5 m. ESE of Warminster, on the river Wiley. Area 1,440 acres. Pop. in 1831, 282; in 1841, 255.

KNORCKE, a commune and village of Belgium, in the prov. of W. Flanders, cant. of Bruges. Pop. 1,108.

KNOSSINGTON, a parish in Leicestershire, 8 m. SSE of Melton-Mowbray. Area 1,370 acres. Pop. in 1831, 240; in 1841, 252.

KNOTTING, a parish in Bedfordshire, 4½ m. SE by S of Higham-Ferrers. Area 1,270 acres. Pop. in 1831, 165; in 1841, 175.

KNOTTINGLEY, a chapelry in the p. of Pontefract, W. R. of Yorkshire, 2½ m. E by N of Pontefract, on the S bank of the river Aire, and intersected by the Knottingley and Goole canal. It contains an active commercial pop., attracted to it by its extensive lime-quarries, its canal, and its position on the banks of the navigable Aire. It is included within the parl. boundaries of the borough of Pontefract. Area 1,536 acres. Pop. in 1841, 4,304.

KNOWLE, or KNOLL, a chapelry in the p. of Hampton-in-Arden, Warwickshire, 9½ m. NW by N of Warwick, intersected by the Birmingham and Warwick canal. Pop. in 1831, 1,120; in 1841, 1,208.

KNOWLE (ST. GILES), a parish in Somersetshire, 2 m. S by E of Ilminster, crossed by the Chard canal. Area 760 acres. Pop. in 1831, 108; in 1841, 99.

KNOWL-END, a township in the p. of Audley, Stafford, 4 m. NW of Newcastle-under-Lyne. Pop. in 1831, 282; in 1841, 270.

KNOWLESVILLE, a village of Ridgeway township, Orleans co., in the state of New York, U. S., 256 m. W by N of Albany, on the Erie canal. Pop. in 1840, 450.

KNOWLTON, a township of Warren co., in the state of New Jersey, U. S., 66 m. N by W of Trenton, bounded on the N by Blue mountain. It has a hilly surface, and is drained by Paulin's kill, Beaver brook, and Shawpocussing creek. The soil in the valleys consists of calcareous loam. Pop. 2,307.

KNOWLTON, a parish in Kent, 8¼ m. ESE of Canterbury. Area 550 acres. Pop. in 1841, 27.

KNOWSLEY, a township in the p. of Huyton, co.-palatine of Lancaster, 3 m. WNW of Prescot. Area 4,750 acres. Pop. 1,502.—K. park, the seat of the earl of Derby, is nearly 6 m. in circumf. It is adorned with a profusion of fine old timber, and has a lake in the centre about a ½ m. in length. The mansion occupies an elevated part of the park.

KNOWSTONE, a parish in Devon, 9¼ m. W by N of Bampton, in a valley between the rivers Yeo and Sturcomb. Area 4,440 acres. Pop. 578.

KNOYLE (EAST), a parish in Wilts, 2½ m. SW by S of Hindon. Area 5,320 acres. Pop. in 1831, 1,028; in 1841, 1,038. The celebrated architect and mathematician, Sir Christopher Wren, was born here.

KNOYLE (WEST), a parish in Wilts, 3 m. E by N of Mere. Area 2,390 acres. Pop. in 1841, 206.

KNOX, a central county of the state of Tennesse, U. S., comprising an area, generally mountainous, of 864 sq. m. It is watered by Holston and French Broad rivers, and by Beaver creek. The soil on the streams is extremely fertile. Pop. in 1840, 15,485; in 1850, 18,769. Its capital is Knoxville.—Also a co. in the state of Kentucky, containing a superficies of 495 sq. m., watered by Cumberland river and its branches. Pop. in 1840, 5,722; in 1850, 7,109. Its capital is Barbourville.—Also a central co. in the state of Ohio, containing an area of 618 sq. m., watered by Vernon river and its tributaries. Towards the W the surface is level, and the soil extremely rich. Pop. in 1840, 29,579; in 1850, 28,792. Its capital is Mount Vernon.—Also a co. in the SW part of the state of Indiana, comprising an area of 540 sq. m.; bordered by White river on the S; by the W. fork of White river on the E; and by Wabash river on the W. It has a fertile soil, covered to a great extent with timber and prairie. Pop. in 1840, 10,657; in 1850, 11,086. Its capital is Vincennes.—Also a co. in the NW part of the state of Illinois, containing a superficies of 792 sq. m., watered by Henderson and Spoon rivers and their tributaries. It has extensive prairies, with timber on the streams, and possesses a generally fertile soil. Pop. in 1840, 7,060; in 1850, 13,280. Its capital is Knoxville.—Also a township in Waldo co., in the state of Maine, 35 m. NE by E of Augusta. Pop. 897.—Also a township of Albany co., in the state of New York, 21 m. W of Albany. Its surface, which is hilly, is drained by Bozra kill, and a tributary of Fox's creek. Pop. 2,143.—Also a township of Guernsey co., in the state of Ohio. Pop. 538.—Also a township of Holmes co., in the same state. Pop. 1,180.—Also a township of Jefferson co., in the same state. Pop. 1,529.

KNOXVILLE, a village of Knox township, Jefferson co., in the state of Ohio, U. S., E of Columbus, 4 m. from the Ohio. Pop. in 1840, 200.—Also a v. of Crawford co., in the state of Georgia, 55 m. SW by W of Milledgeville, 4 m. E of Flint river. It contained in 1840 about 20 dwellings.—Also a town, capital of Knox co., in the state of Tennessee, 183 m. E by S of Nashville, on the N bank of Holston river, 4 m. below the junction of French Broad river. Pop. 1,500.—Also a village of Knox co., in the state of Illinois, 100 m. WNW of Springfield, near Haw creek. Pop. 250.

KNURROW, or KNURROWA, a village of Prussia, in the reg. of Oppeln, circle of Nybnitz. Pop. 506.

KNUTSFORD, a parish and market-town in the co. of Chester, 24 m. ENE of Chester. The Grand Junction railway passes 9 m. E of the town, and the Grand Trunk canal 6 m. W of it. It is 6 m. W of the Cheeford station of the Manchester and Crewe railway. The p. includes the townships of Bexton, Ollerton, Toft, and Nether and Over K. Area 4,300 acres. Pop. in 1831, 3,599; in 1841, 4,006. The town—which is pleasantly situated in a fertile part of the co., on a branch of the river Birkin, which divides it into two parts, Nether and Over K.—is of great antiquity. The houses are in general well-built. The principal manufactures are those of cotton-spinning and weaving, sewing-thread, which formerly employed many hands, worsted, and tanned leather. Races are held annually in the vicinity on the last Tuesday in July, and continue for two days. The Midsummer and Michaelmas quarter-sessions for the co. are held in this town. A large and convenient prison for the co., in the front of which is a commodious sessions'-house, is situated here.

KNUTWYL, a village of Switzerland, in the cant. and 15 m. NW of Lucerne. Pop. in 1850, 1,316, all Catholics.

KNYNO, a river of Pembrokeshire, which falls into the Tivy, about 5 m. below Cardigan.

KNYSZYN, a town of Russia, in the prov. and 18 m. NNW of Bialystok. Pop. 1,700.—Also a village of Prussia, in the reg. and circle of Posen. Pop. 208.

KOADJUTHEN, a village of Prussia, in the reg. of Gumbinnen, circle of Tilsit. Pop. 322.

KOAMEROO (CAPE), the SE projection of land at the entrance of Queen Charlotte's sound, on the

W side of Cook's strait, in the Middle island of New Zealand, in N lat. 41° 4′.

KOBA-TENDA, a village of Senegambia, 360 m. SE of St. Louis.

KOBBA. See Cobbeh.

KOBBELBUDE, a village of Prussia, in the reg. of Königsberg, circle of Preuss-Eylau. Pop. 265.

KOBEL (Mack), a town of Hesse-Cassel, in the prov. and circle of Hanau, bail. of Wendesken. Pop. 1,214.

KOBELAU, a village of Prussia, in the reg. of Breslau, circle of Nimptsch. Pop. 283.

KOBELN, a village of Prussia, in the reg. of Liegnitz, circle of Rothenburg. Pop. 262.

KOBELNITZ, a village of Prussia, in the reg. of Breslau, circle of Neumarkt. Pop. 224.

KOBELWALD, a parish and village of Switzerland, in the cant. of St. Gall, circle of the Upper Rhinethal. Pop. in 1850, with Ruthi, 1,500, Catholics.

KOBEN, a town of Prussia, in the reg. of Breslau, circle of Steinau, on the l. bank of the Oder. Pop. 1,107.—Also a village of Prussia, in the same circle. Pop. 230.

KOBERSDORF, or Kabold, a town of Hungary, in the com. and 12 m. WSW of Oedenburg. Pop. 1,050.

KOBERSHAYN, a village of Prussia, in the reg. of Merseburg, circle of Torgau. Pop. 260.

KOBERWITZ, a village of Prussia, in the reg. of Oppeln, circle of Ratibor. Pop. 824.—Also a v. in the reg. and circle of Breslau. Pop. 268.

KOBI. See Gobi.

KOBIELITZ, a village of Prussia, in the reg. of Oppeln, circle of Pless. Pop. 403.

KOBILLA, a village of Prussia, in the reg. of Danzig, circle of Berent. Pop. 160.

KOBLAU, or Koblow, a village of Prussia, in the reg. of Oppeln, circle of Ratibor. Pop. 361.

KOBLEN, a village of Prussia, in the reg. of Königsberg, circle of Heilsberg. Pop. 265.

KOBLENZ, a commune of Switzerland, in the cant. of Aargau, district of Zurzach. Pop. 709, Catholics.

KOBLENZ. See Coblenz.

KOBLER, a village of Prussia, in the reg. of Oppeln, circle of Pless. Pop. 523.

KOBNITZ, or Chobinice, a village of Prussia, in the reg. of Posen, circle of Bomst. Pop. 527.

KOBOLO, a town of China, in the Khalkha territory, in N lat. 48° 8′, E long. 90° 4′.

KOBOSOAT, an island of the Moluccas, in the Arm group, to the S of Valham, in S lat. 5° 50′, E long. 135° 21′.

KOBRIN, a town of Russian Poland, 100 m. SE of Grodno. Pop. 4,300.

KOBUILIANSKAIA, a town of Russia, in the territory of the Don Cossacks, 12 m. S of Nijni-Tchirskaia, on the r. bank of the Don.

KOBURG. See Coburg.

KOBYLAGORA, a village of Prussia, in the reg. of Posen, circle of Schildberg. Pop. 319.

KOBYLANKA, a village of Austria, in Galicia, in the gov. of Lemberg, circle of Jaslo, on the river Ropa. It is a celebrated place of pilgrimage for Catholic devotees.

KOBYLIAKI, a town of Russia, in the gov. and 28 m. S of Poltava, on the r. bank of the Vorskla. Pop. 7,000.

KOBYLLA, a village of Prussia, in the reg. of Oppeln, circle of Ratibor. Pop. 226.

KOBYLLNO, a village of Prussia, in the reg. and circle of Oppeln. Pop. 250.

KOBYSTCHA, a town of Russia, in the gov. and 48 m. SSE of Tchernigov.

KOCANOWO, a village of Prussia, in the reg. of Posen, circle of Schroda. Pop. 167.

KOCHANOWITZ, a village of Prussia, in the reg. of Oppeln, circle of Lublinitz. Pop. 698.

KOCHBERG (Gross), a village of the duchy of Saxe-Altenburg, 12 m. W of Kahla. Pop. 190.

KOCHELSDORF, a village of Prussia, in the reg. of Oppeln, circle of Crewzburg. Pop. 306.

KOCHEN (Ober and Unter), two villages of Würtemberg, in the Jaxt circle, bail. of Aalen. Pop. of Ober K. 1,035; of Unter K. 922.

KOCHENDORF, a large village of Wurtemberg, at the junction of the Kocher and Neckar.—Also a village of Prussia, in the reg. of Breslau, circle of Ohlau. Pop. 415.

KOCHER, a river of Wurtemberg, formed by two streams, called respectively the Red and Black K., which falls into the Neckar at Kochendorf, between Heilbronn and Wimpfen, after a course of 64 m. Its principal affluents are the Lein, the Roth, the Brettach, and the Bühler.

KOCHERN, a village of Prussia, in the reg. of Breslau, circle of Ohlau. Pop. 211.

KOCHHEIM, a town of Prussia, in the prov. of the Rhine, in the reg. and 28 m. SW of Coblenz, on the Moselle. Pop. 2,462.

KOCHLOW, a village of Prussia, in the reg. of Posen, circle of Scheldberg. Pop. 245.

KOCHLOWITZ, a village of Prussia, in the reg. of Oppeln, circle of Beuthen. Pop. 536.

KOCHZUTZ, a village of Prussia, in the reg. of Oppeln, circle of Lublinitz. Pop. 1,007.

KOCK, a small town of Poland, on the Wieprz, 31 m. N of Lublin. Pop. 900.

KOCKEL (Great), Kokel, or Nagy-Kukullo, a river of Transylvania, which has its source in the Carpathian mountains, towards the NE extremity of the jurisdiction of Udvarhely; traverses that district, the comitat of Kockelburg, and the jurisdiction of Schasburg and Mediasch; flows along the confines of Lower Weissenburg, and near Balas-Falva receives the Little K. It thence takes the name of K.; and after running an additional distance of 12 m., joins the Maros, on the l. bank, 11 m. NE of Carlsburg. It has a general course from E to W of about 105 m.; and passes Schasburg, Elizabethstadt, and Mediasch.—The Kis-Kukullo, or Little Kockel takes its rise also in the Carpathian mountains, in the N part of the jurisdiction of Udvarhely; traverses the E part of the jurisdiction of Maros and the comitat of Kockelburg, and, after a course of about 90 m., joins the Great Kockel, on the r. bank.

KOCKELBURG, Kukullo, Kukullo-Varmegye, or Kokelburger, a gespanschaft or administrative province of Transylvania, bounded on the N by the jurisdiction of Maros, and by the comitat of Thorenburg; on the E by the jurisdiction of Udvarhely; on the S by the jurisdiction of Schasburg and Mediasch; and on the W by the comitat of Lower Weissenburg. Its surface is generally hilly, and is watered by the Great and Little Kockel and Maros. Pop. in 1837, 82,258. The soil is fertile, and produces corn and wine in great abundance. Cattle are reared in large numbers in its pastures. —This comitat is divided into 2 circles, the Upper and Lower, each of which is subdivided into 3 jaras. It contains, besides the cap., Dicso-Szent-Marton, 1 town and 116 villages.

KOCKELBURG, Kukullovar, Kukelburg, or Cseta'tye-de-Balte, a town of Transylvania, in the gsp. of Küküllo, 11 m. WNW of Mediasch, and 50 m. SE of Klausenburg, on the l. bank of the Little Kockel. It is of small extent, and its houses are old and generally ill-built. On the opposite bank of the river, in the midst of a fine park, is a

castle of the same name, belonging to the counts of Bethlew.

KOCKEL-SEE, a lake of Bavaria, in the circle of Upper Bavaria, to the E of the Staffel-see. It is 4½ m. in length, and 3 m. in breadth, and is at an alt. of 1,700 ft. above sea-level. The Loisach flows through it.

KOCKENDORF (Alt and Neu), two villages of Prussia, in the reg. of Königsberg, circle of Allenstein. Pop. of Alt K. 181; of Neu K. 253.

KODEN, a town of Poland, on the Bug, 23 m. ESE of Biala. Pop. 2,506.

KODERSDORF, a village of Prussia, in the reg. of Liegnitz, circle of Rothenburg. Pop. 573.

KODIAK. See Kadiak.

KODI-HISSAR, a town of Asiatic Turkey, 18 m. NE of Sivas.—Also a town of Asiatic Turkey, 18 m. N of Kiangari.

KODJA-HISAR, a small town of Diarbekir, in Asiatic Turkey, 10 m. S of Merdin.

KODJA-SHEHR, a village of Asiatic Turkey, 12 m. N of Kiutaiah.

KODLEWE, a village of Prussia, in the reg. of Breslau, circle of Nulitsch. Pop. 411.

KOEENA, a walled village of Fuladu, in Western Africa, 110 m. W of Kamalia.

KOENISMACKER, a village of France, in the dep. of Moselle, cant. of Metzervisse, on the r. bank of the Kaner, 6 m. NE of Thionville. Pop. 1,352.

KOERMOND, a town of Hungary, in the com. of Eisenburg, 24 m. S of Guns. Pop. 3,400.

KOETCH, a town of Japan, on the W coast of the island of Firando, 60 m. NW of Nagasaki.

KOETZING, a town of Bavaria, 33 m. E by N of Ratisbon. Pop. 900.

KŒUR-LA-PETITE, a village of France in the dep. of Meuse, cant. and 6 m. ESE of Pierrefitte. Pop. 1,500.

KOF, a town of Nifon, in Japan, 27 m. SE of Nigata.

KOFLACH, a town of Styria, in the circle and 18 m. W of Grätz.

KO-FUNG-CHU, a district and town of China, in the prov. of Shan-se, division of Tab-yuen-fu.

KOGENHEIM, a commune and village of France, in the dep. of Bas-Rhin, 7 m. NNE of Schelestadt, on the l. bank of the Ill. Pop. 1,324.

KOGETEIN, a town of Moravia, on the Blata, 34 m. S by E of Brunn. Pop. 3,050.

KOGONG, a village of Western Africa, in the territory of Sierra Leone, in N lat. 10° 45′.

KOHAT. See Cohat.

KOH-DUD, or Phu-Kok, a large island on the E coast of the gulf of Siam, 34 m. in length, and rising 700 or 800 ft. above sea-level. A few spots only on the coast are inhabited; the greater part of the island being covered with a dense forest, containing deer, hogs, wild buffaloes, and oxen. Its most valuable produce is lignum aloes. Its inhabitants are estimated at from 4,000 to 5,000, all Cochin-Chinese, and chiefly fishermen. They grow no species of corn, but import rice from Kang-kao, which lies opposite. Their husbandry is confined to a few coarse fruits and esculent vegetables.

KOHHEL, a village of Yemen, in Arabia, 10 m. N of Debin.

KOH-I-BABA, a mountain-range at the SW extremity of the Hindu-kush, in Afghanistan, extending between the meridians of 67½° and 68½° E, nearly along the parallel of 34½° N. Its average alt. may probably be 16,000 ft. above sea-level.

KOH-I-DAMAN, an elevated upland of Afghanistan, to the N of Cabul, stretching about 20 m. along the E declivity of the Pughman range. Its average alt. above sea-level is about 7,000 ft.

KOHKELAN, a district of Hindostan, prov. of Lahore, situated between the 33d and 34th degrees of N lat., on the W side of the river Jelum. It is a mountainous and poor country, possessed by petty chiefs, who are tributary either to the Sikhs or Afghans.

KOHLENDAMMERKOG, a parish and village of Denmark, in the duchy of Sleswick, 12 m. S of Tondem. Pop. 5,200.

KOHREN, a town of Saxony, in the circle and 24 m. SSE of Leipzig, on the Sprottau. Pop. 1,033.

KOH-SI-CHANG, a harbour, and the name borne by the group of small islands which form it, in N lat. 13° 12′, E long. 100° 55′, 36 m. SE from the mouth of the river of Bankok, on the coast of Siam. The islands are 7 or 8 in number; but, with the exception of the two largest, called by the Siamese Koh-si-chang and Koh-cram, they are small and unimportant. Koh-si-chang, the largest of the cluster, is about 7 m. long, and 3 m. broad; and is composed of hills of considerable height clothed to the water's edge with trees. The varieties of wood are numerous, and some of the descriptions, such as maple and sisso, are well-suited for fine work. The trees are not, however, found of sufficient height or dimensions for ships' masts or yards. On this island there is no cultivation. Koh-cram is about one-fourth the size of the large island, and has a small village on one end of it occupied by Siamese fishermen, by whose industry a considerable portion of the island has been cleared of wood, and brought into cultivation, and produces abundance of maize, and such vegetables as are common on the continent. These islands are famous for some rare and beautiful varieties of the wild pigeon. The most remarkable are a large white species with the tips of the wings and tail black, found on most of the islands in the gulf, but unknown on the continent; a beautiful brown and purple-coloured description which is very rare; and one or two varieties of the small green pigeon. There is a large root found close to the sea on the small islands, which seems to be a new species in the list of plants. In appearance it has a close resemblance to the *Dioscorea bulbifera*, or common yam; but it has little or no taste, and grows to an enormous size. We have seen a specimen of this root which measured 10 ft. in circumf., and weighed 474 lbs. The natives use it as medicine: cutting it into thin slices, and drying it in the sun, after which it is pounded or ground into a powder, which is administered in cases of fever, ague, &c. Land-crabs are numerous in several spots throughout the islands. The Cochin-Chinese, who visit the harbour of K. on their voyages to Siam, have erected a temple on the large island. It is a small white building, conspicuous on an eminence at the SW end. Their traders touch here regularly for supplies of water and fire-wood. The latter is easily procured, and is taken away in large quantities by them on their return to Cochin-China, in some parts of which country wood is a scarce article. The shores afford the edible birds' nests so much in request amongst the Chinese; but they are of inferior quality, probably owing to their being suffered to remain on the rocks from season to season. Rock-oysters are very abundant, and a few sea slug, or *beche-de-mer*, are found, but not in sufficient quantity to be worth collecting. Stone-ballast for the use of ships is obtained with ease, and without danger to the boats. The harbour, which is formed by the two large islands, is well-sheltered, and affords anchorage for almost any number of vessels, and protection from the wind and sea in every direction except the N: though from this quarter the sea cannot affect it much, on

account of its vicinity to the shoals at the head of the gulf. The best entrance is from this quarter; there is also a passage to the S between the islands. The holding-ground is tolerably good, but it will always be necessary for ships to ride with chain-cables owing to the roughness of the bottom. The rise and fall of water is considerable, being about 10 ft. at spring-tide, and the tide runs strong through the harbour.—In Hamilton's account of Siam this cluster is called 'The Dutch isles,' from the circumstance of its having been usual for ships of that nation to frequent them in the early period of their commerce with Siam. He says it was the custom for large ships to wait here "for cargoes from Siam." At present all vessels above 200 tons burthen trading to Siam, lie off the bar, in an open and much exposed roadstead, 16 m. from the mouth of the river, until their cargoes are brought out to them in the native lighters or junks. The detention which vessels meet with in obtaining cargoes renders their stay in this situation expensive and inconvenient, if not even dangerous. They have no means of procuring water, wood, or ballast, but from Bankok, and this is attended with trouble and expense. But the whole of these articles can be obtained with the utmost facility at K., where a vessel lies in a safe harbour in which her cargo can be taken on board at any time. As a station for an enemy meditating hostile measures against Siam, no place can be better adapted than this harbour. A very small fleet in possession of these islands would effectually blockade the port of Bankok, at which nearly the whole trade of the Siamese empire is concentrated; and thus dictate terms to the monarch of Siam, without further exertion than the seizure and detention of the numerous junks which trade to Bankok from various quarters.—*Singapore Chronicle.*

KOIDAKI (Novo), a town of Russia, in the gov. and 3 m. WNW of Yekaterinoslav, on the r. bank of the Dnieper.

KOIRVIRAH, a village of Persian Armenia, 18 m. S of Erivan.

KOISJU, a town of Ximo, in Japan, 26 m. W of Naku.

KOISU, a river of Georgia, which rises on the N flank of Caucasus; flows E, and N, along the frontiers of N. Daghestan; then turns E, and flowing past Kostek, divides into two branches, one of which flows into the Caspian under the name of the Sumak, the other into the gulf of Agrakhansk. Its chief affluents are the Khozriak and the Atala.

KOJA-KIZ, a town of Independent Tartary, near the Aral lake, 18 m. NE of Urkonje.

KOJAR, a small town of Azerdbijan, in Persia, 75 m. W of Tabriz.

KOJEND. See Khokan.

KOJETEM, a town of Moravia, circle and 10 m. SW of Preram. Pop. 2,836.

KOJUK PASS, a pass of Afghanistan, in N lat. 30° 45′, E long. 66° 30′, leading from the valley of Peshin on the E, across the Amran range, into the plains of Candahar on the W. Its summit has an elevation of 7,449 ft. above sea-level. It was forced by a British army in 1839 and 1842.

KOKABONI, a town of Nigritia, in the kingdom of Bornu, 110 m. W of Kuka. Pop. 5,000.

KOKAN. See Khokan.

KOKCHAGA (Bolchaia), a river of Russia, which rises in the SW of the gov. of Viatka, and joins the Volga, on the l. bank, 20 m. E of Tchehoksa, in the gov. of Kasan, after a course from N to S of about 100 m.

KOKCHAGA (Malaia), a river of Russia, which rises in the gov. of Viatka, and pursuing a course nearly parallel to the Bolchaia K., falls into the Volga a little below that river, after a course of 90 m. from N to S.

KOKCHAISKOE, a town of Russia, in the gov. of Kazan, at the confluence of the Bolchaia Kokchaga with the Volga. Pop. 900.

KOKEL. See Kochel.

KOKELAY, a town of Ceylon, on the E coast, in N lat. 8° 58′.

KOKFARA, a town of Abyssinia, in the NW part of the prov. of Gedem, a day's journey S of Ephrata.

KOKINO, a town on the E coast of the island of Lemnoz, 9 m. N of Cape Stala.

KOKKAAT, a river of Hindostan, which rises in the Western Ghauts, 12 m. NE of Montana; waters the districts of Kurk and Cherical; and flows into the sea of Oman, 9 m. NW of Cananore, after a course from E to W of 60 m.

KOKO-NOR, a large lake of Tartary, near the borders of China. It is more than 70 m. long, and nearly 30 m. in breadth; and lies immediately to the W of Sining-chu, in Shen-si, between 36° and 37° N lat. Its W extremity is 17° W of Pekin. The surrounding country is mountainous throughout. We know that the musk-deer and the yak abound in this region—animals which cannot exist but in cold mountainous regions. The district is famed for its rhubarb, the best in the world, which is produced in the Swe-shan, or 'Snowy mountains,' in the vicinity of Sining, and Su-chu, the Succur of Marco Polo. There are no towns in this region, as it is merely a pastoral region for wandering Tartars, who dwell in tents but never build cities. The Koshoti Kalmucks are divided into eight tribes. under as many *taidshas* or chiefs, all of whom submitted to China after the defeat and death of Kaldan Pojukhti, supreme prince of the Sungari Eluths. See Sifan.

KOKORO, or Bali, a river of Western Africa, which rises in the Mandingo territory, not far from the Niger, and flowing through Fuladu, enters Bruko, where it receives the Ba-Wulima. On entering Kajaaga it falls into the Bafing or Senegal, 80 m. E of Gallam. It is a rapid river, and flows through a rocky and picturesque country, in a course from SE to N of about 250 m.

KOLA, or Kolkoe-Ostrog, a port of Russian Lapland, in the gov. of Archangel, 540 m. N of Petersburg, at the confluence of the Tuloma with the Kola, in N lat. 68° 52′, on a river of the same name, which rises in Lake Kolozero, and runs W and N 30 m. to the Arctic ocean. It was fortified by Peter the Great, who made it the cap. of Russian Lapland. In 1854 it was destroyed by the English frigate Miranda, which ascended the river of narrow and intricate navigation, and took up a position within 500 yds. of the town and batteries.

KOLAAS, a mountain of Norway, in the vicinity of Christiania. Alt. 1,157 Paris ft. above sea-level.

KOLACHI, a town and district of E. Afghanistan, on the W side of the Indus; lying between Tak on the N, and Dera-Ismail-khan on the E and SE. It is about 27 m. in length, and 20 m. in width. In 1847–8 there were 18,250 acres under cultivation in this district; and the average produce was valued at 175,304 rupees.—The town in 1848 was a complete wreck; but contained 250 Hindu shops, whose occupants chiefly dealt in grain, which they exchanged with the Viziris for iron and timber. It is situated on the l. bank of the Luni or Gomul, and is built entirely of mud.—*Edwardes.*

KOLACZYCE, a small town of Austrian Poland, in Galicia, in the circle and 4 m. NNE of Jaslo. Pop. 1,459.

KOLAH, a village of Anatolia, 36 m. NE of Alah-Shehr, near the l. bank of the Sarabut.

KOLAPUR, a district and town of Hindostan, in the prov. of Bejapur.—The town is situated in N lat. 16° 19′, E long. 74° 19′.

KOLAR, a town of Servia, 23 m. SE of Belgrade.

KOLAR, a town of Bursalum, in Western Africa, near the coast of the Atlantic, in N lat. 13° 50′.

KOLAUTSHEN, a town of Bohemia, in the circle of Klattau. Pop. 860.

KOLBERG. See COLBERG.

KOLBIEL, a town of Poland, in the gov. of Masovia, on the Swider, 18 m. SSW of Stanislawow.

KOLBUSZOW, a town of Galicia, in the circle and 50 m. ENE of Tarnow, on the r. bank of the Laka.

KOLDING, a port of Denmark, in N. Jutland, 30 m. ENE of Ribe, at the entrance of a small stream of the same name, into a bay of the Little Belt. Pop. 2,600.

KOLDITZ, a town of Saxony, in the circle and 24 m. SE of Leipzig, on the r. bank of the Zwickauer-Mulde. Pop. 3,246.

KOLESNIKI, a town of Russia, in the gov. of Grodno, 24 m. NNW of Leda, on the r. bank of the Versaka.

KOLIASIN, a town of Russia, in the gov. and 80 m. ENE of Tver, situated on the Volga, at the confluence of the Jabnia. It contains 3,500 inhabitants, and trades in corn, flax, butter, salt meat, and tallow.

KOLIN (NEW), a town of Bohemia, in the circle of Kaurzun, 38 m. E of Prague on the Elbe. Pop. 5,753.

KOLLA, a district of Abyssinia, at the N base of Simen. It is covered with dense forests, and forms the favourite retreat of wild animals of all kinds. It is a pestilential region, and generally uninhabited; but there are hills in it which, rising above the level of the noxious atmosphere, are crowned with villages.

KOLLA. See COLLO.

KOLLSCHHAUSEN, a village of Prussia, in the reg. of Coblenz, circle of Wetzlar. Pop. 329.

KOLLUM, a small town of Holland, in the prov. of Friesland, 8 m. SE of Dokkum. Pop. 1,000.

KOLLUVI, a tribe of the African people called Tuarick, who inhabit the tracts which intervene between Fezzan and Asben, and carry on most of the trade between these two countries.

KOLMCHEN, a village of Prussia, in the reg. of Liegnitz, circle of Freistadt. Pop. 573.

KOLN. See COLOGNE.

KOLN (ALT and NEU), two villages of Prussia, in the reg. of Breslau, circle of Brieg. Pop. of Alt K. 567; of Neu K. 151.—Also a v. in the reg. of Danzig, circle of Neustadt. Pop. 869.—Also a v. in the reg. of Marienwerder, circle of Culm. Pop. 180.

KOLNO, a town of Poland, in the gov. of Augustow, 60 m. SW of Lanza. Pop. 200.

KOLO, a town of Poland, in the gov. of Kalisch, 16 m. E of Konus, on an island in the Warta. Pop. 3,000.

KOLOCSA. See KALOCSA.

KOLOKYTHIA, a small sea-port of Greece, in the S of the Morea, on a gulf of the same name, in N lat. 36° 47′. This is the ancient *Gythium*, the sea-port of Sparta, though fully 25 m. SE of that city.

KOLOMEA, or KOLOMYA, a town of Austrian Galicia, on the Pruth, 112 m. SE of Lemberg. Pop. 8,680, of whom 4,000 are Jews.—The circle of K. has an area of 83·6 German sq. m. Pop. in 1837, 205,459.

KOLOMNA, a town of Russia, in the gov. of Moscow, situated on the Oka, near the influx of the Moskwa, 58 m. SSE of Moscow. Pop. 13,100. The chief traffic consists in corn, tallow, and salted beef. It is the see of a bishop, and contains a number of churches and chapels. The cathedral is a large building, roofed with iron.

KOLOR, a considerable town of Wulli, in Western Africa, near the Gambia.

KOLPAKOUSKOI, a fortress of Asiatic Russia, on the Ural, 124 m. E of Orenburg.

KOLSA, a village of Prussia, in the reg. of Merseburg, circle of Delitsch. Pop. 282.

KOLTSCH, a village of Prussia, in the reg. of Liegnitz, circle of Freistadt. Pop. 548.

KOLTSCHEN, a village of Prussia, in the reg. of Breslau, circle of Reichenbach. Pop. 385.—Also a v. in the reg. of Frankfort, circle of Stemberg. Pop. 753.

KOLURI, a village on the W side of the island of Salamis, adjacent to the coast of Attica.

KOLYMA′, or KOVYMA, a considerable river of Asiatic Russia, which rises in the high mountains which border the coast of Okhotzk, and flowing N, falls into the Frozen ocean, after a course of 700 m., in N lat. 70° 5′, E long. 61° 30′. It receives the waters of several large tributary streams, of which the Omolon, and the Great and Little Aniuy are the most important. It is generally covered with a solid crust of ice early in September, and as the frost continues without interruption till May, several weeks of warm weather are requisite to thaw the ice-bound stream. Its banks are inhabited by Yukagires, Lamuts, Tungusians, Shuvantzes, Koriaks, and Yakuts, who rely chiefly on fishing for subsistence.—There are three towns, or villages rather, on this river, known as Verkhni-Kolymsk, Sredni-Kolymsk, and Nishni-Kolymsk, or Upper, Middle, and Lower Kolymsk. Of these, the last, though consisting only of a church, a wooden fortress, and some 50 houses and huts, is by far the largest. It is situated in N lat. 68° 31′, E long. 160° 35′. Sredni K. contains only a church and 13 houses. Verkhni K., the most southern of the three, contains only 15 houses. These towns are generally abandoned by the whole pop. as soon as the winter breaks up, that they may pursue the chase and the fisheries, on which they depend for their support throughout the year. To the W of Nishni K. lies a naked boundless *tundra* or heath; towards the N, the Arctic ocean covered with perpetual ice. The average temp. of the year is only 14°; and in December, January, and February, the therm. frequently falls to 58° below zero. "The vegetation of summer," says Wrangel, "is scarcely more than a struggle for existence. In the latter end of May the stunted willow-bushes put out little wrinkled leaves, and those banks which slope towards the S become clothed with a semi-verdant hue. In June the temp. at noon attains 72°; the flowers show themselves, and the berry-bearing plants blossom, when sometimes an icy blast from the sea turns the verdure yellow, and destroys the bloom. The air is clearest in July, and the temp. is usually mild. But, as if to embitter to the inhabitants of this dreary region this semblance of summer, and to cause them to wish for winter again, millions of musquitoes darken the air, and oblige every one to take refuge in the thick and pungent smoke of the *dymokuries*, [large heaps of fallen leaves, moss, and damp wood; the thick smoke which comes from them drives away the musquitoes; they are placed both in the pastures and near the houses,] which affords protection from these tormentors. But as every thing in nature has a beneficent purpose, and all disadvantages are compensated by some good, these insects render an essential service to the inhabitants, by forcing the rein-deer to leave the forests, and to take refuge in the cold open plains near the sea. This they com-

monly do in troops of many hundreds, or even thousands; the hunters then lie in wait for them, especially as they cross the rivers and lakes, and kill numbers without difficulty. The musquitoes render also another service in preventing the horses from straying away in the vast plains, where they feed without keepers. Their natural instinct teaches them to keep near the dymokuries, which protect them from their enemies. One sees them grazing on the lee-side of these glimmering heaps, in the cover of the smoke. When the pasture is fed off, the smoke-heaps are established in a fresh place. They are generally enclosed by a slight fence, to prevent the horses from coming too near the fire. In summer the rolling of thunder-storms can be heard in the mountains, but they have little influence on the great plains. Winter, properly so called, prevails during nine months of the year. In October the cold is somewhat mitigated by thick fogs, and by the vapour rising from the freezing sea; but in November the great cold begins, and in January increases to 65°. Then breathing becomes difficult; the wild rein-deer, that citizen of the polar region, withdraws to the deepest thicket of the forest, and stands there motionless, as if deprived of life. The night of 52 revolutions of the earth is relieved by the strong refraction, and by the whitened surface of the snow, as well as by frequent auroras. On the 28th of December a pale twilight begins to be visible at noon, but is not sufficient to dim the stars. As the sun returns, the cold becomes even more sensible, and the intensity of frost, which accompanies the rising of the sun in February and March, is especially penetrating. Perfectly clear days are extremely rare in winter, because the sea-winds, which always prevail, bring with them continual vapours and fogs, which are sometimes so intense as wholly to conceal the stars of the deep blue polar sky. These thick fogs are called *morrok*. They prevail least in September. There is a remarkable phenomenon known here by the name of *teplot weter* ['the warm wind'], blowing from the SE by S; it sometimes begins suddenly, when the sky is quite clear, and in the middle of winter raises the temp., in a short time, from — 47° to + 35°; so that the plates of ice, which are the substitute for glass in the windows, begin to melt; in the valleys of the Aniuj, the warm wind is frequently felt; its influence does not extend to the W of Cape Tschukotskoj. It is seldom of longer continuance than twenty-four hours. Though, from all that has been said, the climate is one of the most severe and unkindly; yet it must be owned that it is not, on the whole, prejudicial to health. The poverty of vegetation is strongly contrasted with the rich abundance of animal life. Countless herds of rein-deer, elks, black bears, foxes, sables, and grey squirrels, fill the upland forests; stone foxes and wolves roam over the low grounds. Enormous flights of swans, geese, and ducks, arrive in spring, and seek deserts where they may moult and build their nests in safety. Eagles, owls, and gulls pursue their prey along the sea-coast: ptarmigan run in troops amongst the bushes; little snipes are busy along the brooks, and in the morasses: the social crows seek the neighbourhood of men's habitations; and, when the sun shines in spring, one may even sometimes hear the cheerful note of the finch, and in autumn, that of the thrush. Yet all this manifold life cannot alleviate the dreariness of the desert, or repress the thought, that here is the limit of the animated world. The animals either visit or inhabit these icy deserts in obedience to the unerring laws of instinct; they have no choice to exercise. Nothing definite is known concerning the inhabitants even at the not very remote epoch of the conquest of Siberia by the Russians. I have indeed heard an obscure saying, 'That there were once more hearths of the Omoki on the shores of the K., than there are stars in the clear sky;' there are also remains of forts, formed of trunks of trees, and tumuli; the latter especially near the Indigirka; both may be supposed to have belonged to these Omoki, who have now disappeared. From the little I could gather on the subject, it would seem that the Omoki were a numerous and powerful people; that they were not nomades, but lived in settlements along the rivers, and supported themselves by fishing and hunting. Another numerous tribe, the Tschukotschi, or Tschuktschi, appear to have wandered over the *tundra* with their herds of rein-deer; they have left their names to features of the country; as, for example, the Malaja, and Bolschaja Tschukotscha, the greater and the lesser Tschuktschi rivers. Both races have disappeared; the Omoki have probably perished by want and sickness, and the Tschuktachi have partly wandered away, and partly become confounded amongst new arrivals, and form with them the present scanty population of the country. In the whole K. circle there are now 325 Russian peasants, citizens, and Cossacks, 1,034 Jakuti, 1,139 Jukahiri, and other races; in all, 2,498 males, of whom 2,173 pay jassak. The *jassak*, or tribute, consists of 803 foxes and 28 sables (which may be estimated at 6,704 roubles), and 10,847 roubles in money, making on an average about eight roubles to be paid by every male of the Jakuti, and other tribes."

KOLYVA'N, a district of Asiatic Russia, in the gov. of Tomsk, situated on the river Bielaya, or the upper part of the course of the Obi, in the very centre of the Altai. It is chiefly distinguished by the extensive copper-mines situated within its limits, containing a considerable proportion of silver, and a small quantity of gold. They were discovered in 1727, by M. Demidoff, who began to work them in 1730. According to the accounts of the board of mines, these works, from 1725 to 1786, produced about 3,500,000 lbs. of silver, and 48,000 lbs. of gold. The mines of K. were once the most considerable in the Altai, but they have of late much declined, in consequence of the exhaustion of the neighbouring forests, and the difficulty of conveying timber through a mountainous country. A line of forts was built in 1745, to defend these mines from the incursions of the Tartars. It consists of 23 small forts, scattered along a line of above 300 m., from Ourst Kamenogorsk to Biisk. In consequence of the subsequent extension of the empire, the whole of this line is now within its frontier, notwithstanding which the fortifications are still kept up.—The town of K. is small, situated on the r. bank of the Berda, near its junction with the Bielaya, in N lat. 54° 48′. There is a government fabrique here for working ornamental vases, columns, and other objects of art, in the porphyry, agate, jasper, granite, and marble, which abound in the vicinity.

KOLZIG, a village of Prussia, in the reg. of Frankfurt, circle of Arnswalde. Pop. 295.—Also a v. in the same reg., circle of Sorau. Pop. 391.

KOMADI, a market-town of Hungary, in the comitat of Bihar, 22 m. W of Gr. Wardein.

KOMAN, a town of Turkey in Europe, in Upper Wallachia, on the l. bank of the Ketniste, 18 m. S of Bucharest.

KOMANOVA, a town of Turkey in Europe, in Macedonia, in the sanj. and 18 m. NE of Uskup, on the l. bank of an affluent of the Pepentz.

KOMARNIK, a town of Hungary, in the comitat of Saros, 25 m. NE of Bartfeld, at the S base of the Carpathian mountains, and on one of the head-streams of the Olyka.

KOMARNO, a town of Austria, in Galicia, in the circle and 25 m. ENE of Sambor, on the W side of the Wereszyca. It has some manufactures.

KOMARONI (Kis), a town of Hungary, in the com. of Szala, 10 m. SSW of Lake Balaton or Platten.

KOMAROWKA, a town of Poland, in the gov. and 45 m. NE of Lublin, and 37 m. SE of Lukow.

KOMBURG, a hamlet of Würtemberg, in the circle of the Jaxt, bail. and 1½ m. ESE of Hale, and 21 m. NW of Ellwangen. It has a royal castle, formerly a Benedictine convent, and now used as a military hospital.

KOMEIN, or Chumeen, a town of Persia, in the prov. of Irak-Ajemi, 50 m. SE of Hamadan.

KOMIA, a town of Upper Guinea, in the kingdom of Koranko, on the Rokelee, 39 m. SW of Falaba, and 90 m. SW of Timbo.

KOMIS, a district of Persia, in the NW part of the prov. of Khorassan. It forms the greater part of the beglerbeglik of Damghán, and nearly occupies the place of the ancient *Comisena*. It contains the ruins of an ancient town of the same name.

KOMISANG, or Volcano Island, an island in the Lu-chu archipelago, 54 m. WNW of the S extremity of the Great Lu-chu, in N lat. 26° 15′, E long. 127° 29′.

KOMISH, a summit of Persia, in Khorassan; 100 m. WSW of Mushed, to the N of the Pulabrishim.

KOMJATHI, a town of Hungary, in the comitat and 12 m. S of Neutra, and 54 m. E of Presburg, on the r. bank of the Vitra.

KOMLOS, a market-town of Hungary, in the comitat of Toronthal, NE of Kikinde. Pop. 4,950. Cattle are extensively reared in the environs.

KOMMOTAN, a town of Bohemia, in the circle and 12 m. NW of Saatz, and 34 m. W of Leitmeritz, on a small stream. Pop. 3,725. It is enclosed by a wall, is well-built, and contains 3 churches, a convent, and a gymnasium. It possesses several manufactories of woollen fabrics, a calico-printing mill, and several breweries. In the environs are several quarries, and an extensive alum-manufactory.

KOMODO, or Komobo. See Comodo.

KOMOL (Point), a headland of Nubia, on the Red sea, NW of Cape Gidid, in N lat. 22° 40′.

KOMORN, or Koma′rom-Varmegye, an administrative province of Hungary; bounded on the N by the coms. of Neutra and Bars; on the E by Grau; on the S by Stuhl-Weissenburg; on the SW by Wesprim; and on the W by Raab and Presburg. It has a superficial area of 1,127 sq. m. Pop. in 1837, 146,784, chiefly Hungarians. Its surface is in general flat and marshy, but well-cultivated, and highly productive in grain, cattle, and wine. It is subdivided into the 4 *marches* of Csalloköz, Gesztes, Tata, and Udvard; and comprises 1 royal town, 6 burghs, and 81 villages.

Komorn, the capital of the above prov., and one of the strongest fortresses in the world, is situated at the E extremity of the island of Schütt, on the l. bank of the Danube, at the confluence of the Waag, 48 m. WNW of Buda, in N lat. 47° 45′, E long. 18° 8′. Pop. in 1840, 18,143, of whom 8,000 were Catholics, and 10,111 Greek Christians. Pop. in 1845, 20,320. It has an active trade in grain, wood, fish, and wine, by means of the two great rivers on which it stands. Its streets are dark and narrow, but its shops are good; and the river, where it washes the walls, is seldom bare of shipping. It contains 4 Roman Catholic and 3 Protestant churches, a Roman Catholic and a Protestant gymnasium, a town-house, theatres, a casino, and an excellent market-place. This fortress, which held out in the late Hungarian revolution to the last, and only yielded to honourable terms of capitulation, was thus described by an eye-witness of the investment of the place: "At right angles with the Danube, the Waag comes from the Carpathians, that is to say, from the N to the S; but before its junction with the Great Danube, it falls into the Little Danube [which diverges from the main stream a little below Presburg] to the N of the island of Schütt, and both conjointly flow into the Great Danube, under the walls of K. The fortress which the united Austrian and Russian forces are now blockading is situated on the E tip of the island of Schütt, on ground which is in the form of the head of a fish when drawn on paper, or an acute angle one side of which is formed by the Great Danube, another by the united Waag and Little Danube, while the base of the triangle is a very strong line of fortifications carried right across from one river to the other. The only side, therefore, on which K. can be entered by storm is from the island of Schütt. At the tip or apex of the triangle is the citadel; further W, where the island of Schütt is broader, is the town; while between the town and the outer fortifications are meadows on which a portion of the 1,700 oxen which the garrison possess graze in security. Two bridges then connect the citadel on the N across the Waag with the *tête-de-pont* on the l. bank of that river, and on the S with another *tête-de-pont* on the r. bank of the Danube. These *têtes-de-pont* are not mere field-works, but are of masonry, with a central fort in each, and surrounded by bastions. To open trenches from the island of Schütt is difficult, on account of the marshy ground in front of the so-called palatinal fortifications, 18,000 ft. in length; and even the possession of the *têtes-de-pont* still leaves the breadth of the Danube and the Waag between the besiegers and the defenders. Even these outworks would be very difficult to take, for outside the one, over the Great Danube, is a fortified camp on two hills—one called the Sandberg, the other the Schwarzberg—which the Imperialists attempted to take from Georgey in July, not only without success, but with the loss of so many men that in some places the dead had scarcely room to fall without being on the top of each other. This was commonly called the battle of Acs, the bloodiest in the whole war, in consequence of the strong position that Georgey held, with K. at his back to retreat to in case of a reverse. As I stated in my last, 5,000 Hungarians at this moment occupy the intrenched camp that crowns these heights. Two islands, one in the Great Danube, and another in the Waag, are also occupied by the Hungarians, which places at their disposition a considerable amount of meadow-land for the pasture of their oxen, in addition to the 'Meadow of the Gypsies,' as it is called, within the fortifications on the island of Schütt. You will, therefore, easily understand that K. is beyond all comparison the strongest fortress of the Austrian monarchy, for although the defensive capacity of Mantua is equal to it, K., as a centre of offensive operations, is much more formidable; and although Mantua is so difficult to take, it is also easy to invest. Now, in K. the investing circle must be considerable, and from these strong *têtes-de-pont* the force within can at will break out in any direction they choose."—K. was first fortified by Mathias Corvinus. It was taken in 1543 by Soliman, and again pillaged by the Turks in 1594, and by the Imperialists in 1597. In 1767 and 1768 it suffered dreadfully from fire. In 1805 its fortifications were enlarged and completed.

KOMORN (Klein), a market-town of Hungary, in the comitat of Szala, SW of Keszthely.

KOMORNIKI, a village of Prussia, in the prov. and SW of Posen.

KOMOTAPUR, a town of Hindostan, in the prov.

of Bengal, district of Rungpur, near the r. bank of the Dhorlah, and intersected by the Singimari. It now consists of little more than a mass of ruins, covering an area of about 19 m. in circumf., extending 5 m. along the Dhorlah, and enclosed on other sides by an immense bank of earth and double ditch. It was built by Raja Nilawaja, and after a 12 years' siege and blockade, was taken in 1496 by the Mahommedans.

KOMOTOVO, a town of Russia in Europe, in the gov. and district and 12 m. SE of Grodno, on the r. bank of the Niemen.

KOMUNO, a town of Japan, in the island of Nifon, and prov. of Mino, 9 m. NE of Ixo, and 150 m. WSW of Jedo.

KOMYCHNIA, a town of Russia in Europe, in the gov. of Podolia, district and 20 m. N of Mirgorod, and 21 m. SW of Gadiatch. It has three markets annually for cattle and sheep.

KONAPUR, a town of Hindostan, in the presidency of Bombay, prov. and 57 m. SW of Bejapur, and district of Gunduk, on the l. bank of the Malpurba.

KONBOZERO, a lake of Russia in Europe, in the gov. of Archangel, 9 m. from the gulf of Kandalask, with which it is connected by the Oumba. It is 36 m. in length, and about 8 m. in breadth.

KONCHEE, or KUNCHEE, a town of Afghanistan, in the prov. and 69 m. SSW of Candahar.

KONCZEWITZ, a village of Prussia, in the reg. of Marienwerder, circle of Thorn. Pop. 154.

KONDA, a river of Russia in Asia, in the gov. of Tobolsk, which has its source in the N part of the district of Turinsk; makes an extensive sweep towards the district of Tobolsk; and joins the Irtish, on the l. bank, 165 m. NNE of Tobolsk, in N lat. 60° 20′, E long. 69° 25′. It has a total course of about 360 m., and receives numerous affluents, of which the principal are the Tapa and Yakhva, which it receives on the l., and the Kuma.

KONDRISTCHI, or KONTRISTCHI, a town of Turkey in Asia, in the district of Gurrieh, on the shore of the Black sea, 20 m. N of Batumi, and about 10 m. from the Russian frontier.

KONEGEN, a village of Prussia, in the reg. of Königsberg, circle of Heilsberg. Pop. 312.

KONELLO (CAPE), a headland of Greece, on the W coast of the Morea, in the nomarchy of Triphylia, at the S extremity of the gulf of Arcadia, and 6 m. WSW of the town of that name, in N lat. 37° 11′ 40″, E long. 21° 36′ 30″. It is the ancient *Aspidaghia*.

KONER-TAKHA, a village of Persia, in Farsistan, on the road from Kazerun to Bushehr, and 27 m. W of the former town. It has a fine caravanserai, and a custom-house.

KONG, a chain of mountains in Western Africa, extending along the confines of Upper Guinea, from the Niger on the E, by which it is separated from the Kamar or Kumar chain, to the Atlantic, on which it terminates in a series of promontories, the principal of which are capes Sierra Leone and Verga. The average height of its summits towards the E is about 2,500 ft.; that of Mount Loma, on the SW frontier of Sudan, and the supposed source of the Niger, does not exceed 1,600 ft. above sea-level, but at some points it is believed to reach the line of perpetual snow. This chain separates the upper part of the basin of the Niger from streams which flow into the Atlantic. Of the latter the principal are the Caramanca, St. Paul's river, and the Volta. The Koundoungouri, a range which runs along the confines of Ashantee, is considered a branch of the K. chain. — Also a kingdom in the SW part of Sudan, and NW of Upper Guinea, to the SW of the kingdom of Kaybi, and W of Ashantee. It is covered with the mountains of the same name, and watered in the N by the Bagoe or White river, and Kouraba rivers. Little is known of the interior, but it is said to be a state of considerable importance. The inhabitants profess Mahommedanism, and speak a language which appears to be a corruption of the Bambarra dialect. The lance and bow and arrow form their chief weapons of warfare.—The chief town, which bears the same name, is at the base of Mount Tulilesina, a summit of the K. mountains, 285 m. N of Kumassi, and about 510 m. SW of Timbuctu. It consists of earth-built houses, two stories in height, and flat-roofed, and has an active trade with the Fulah tribes along the coast. The inhabitants are Mussulmans. They are addicted to the practice of colouring the eye-lids and eye-brows with a species of blue dye. The environs are populous, and are said to abound in elephants and horses.

KONG-ELF, a town of Sweden, 10 m. N of Gottenburg, on the r. bank of the N arm of the Goetaelf, in N lat. 57° 51′ 45″. Pop. 900.

KONGEN, a town of Würtemberg, on the l. bank of the Neckar, 5 m. SE of Esslingen. Pop. 2,039.

KONG-KARRU-KABBA, a river of Senegambia, which has its source in the territory of Firia; runs along the SE frontiers of the states of Futa-Jallon, Timisso, Tombuchi, which it separates from the states of Sulimana and Limba; enters the territory of the Timmanis; and joins the Kotungtang; whence, taking the name of Great Scarcies river, it flows W to the Atlantic, which it enters in N lat. 8° 50′, and about 20 m. N of the embouchure of the Sierra Leone. It is named Mungo river in the upper part of its course.

KONGSBACHA, a small town of Sweden, 13 m. S of Gottenburg. Pop. 400.

KONGSBERG, a considerable town of Norway, in the gov. of Aggerhuus, 40 m. WSW of Christiania, situated on both sides of the river Lowe or Lauven, in N lat. 59° 40′, at an alt. of 564 ft. above sea-level. In the mountains in the vicinity there are silver-mines, which are at present productive. Gold is occasionally found in these mountains, and the town contains a royal mint, also a seminary for the education of youth in metallurgy and branches connected with it. Pop. 3,900, mostly Germans, employed in the mines.

KONGSVINGER, a fortress of Norway, in the gov. of Aggerhuus, 45 m. ENE of Christiania, on the r. bank of the Glommen, in N lat. 60° 12′ 11″. Pop. 370.

KONI, a village of Imiritia, 30 m. SW of Kotatis.

KONIAUT (BIG and LITTLE), two inconsiderable lakes of the United States, the one in Erie co., the other in Crawford co., Pennsylvania.

KONIBAR, a small island in the Eastern seas, about 3 m. in circumf., and 200 ft. high, situated to the N of Waigiou. The inhabitants cultivate yams, potatoes, and sugar-canes.

KONIECPOL, a town of Poland, 50 m. N of Cracow, on the l. bank of the Pilica. Pop. 1,000.

KONIEH, or KONIYEH, called also COGNI, the ancient *Iconium*, a city of Caramania, in Asia Minor, 27 m. E by S of Smyrna, in N lat. 37° 54′, E long. 32° 40′. It is mentioned by the Greek and Roman writers, but never became a place of any high importance till the accession of the Seljuk dynasty of Turkish sultans, who rebuilt the walls and embellished the city. Under Bajazet, K. was permanently annexed to the dominions of the sultan. Since that time, having lost its character of a metropolitan city, it has greatly declined, and now exhibits all the marks of decay: its stately edifices are crumbling into ruins, whilst the houses are mostly mere huts of sun-dried bricks. It contains 7 khans; but has little or no trade, and the greater part of the adjacent terri-

tory is permitted to lie waste. The only manufactures are carpets, and yellow leather. Its chief interest is derived from the ancient Mussulman structures, particularly the mosques, of which there are said to be 12 large, and upwards of 100 small. Those of Sultan Selim and Sheik Ibrahim are large and magnificent, and the beauty of their interior is much admired. The *madressas* or colleges are also numerous, and some of them have marble gates, adorned with fretwork in a singularly beautiful style. The present pop. is about 20,000. Mountains covered with snow rise on every side of the town except towards the E, where a plain, as flat as the deserts of Arabia, and the largest in Asia Minor, extends beyond the reach of the eye. The vicinity supplies grain and flax in great abundance.—On the 21st of December 1832, Ibrahim Pasha defeated Reschid Pasha at this place.

KONIG, a town of Hesse-Darmstadt, in the prov. of Starkenburg, 24 m. SE of Darmstadt, near the r. bank of the Mümling. Pop. 1,200.

KONIGHEIM, a small town of Baden, 3 m. WSW of Bischoffsheim. Pop. 1,800.

KONIGINGRATZ, or Kralowny, a circle and town of Bohemia. The circle lies contiguous to Silesia, the co. of Glatz, and Moravia. It has a superficial extent of 1,300 sq. m. Pop. in 1837, 337,246. The N and E parts of the circle contain a number of mountains, some of them of considerable height, forming part of the Riesengebirge; towards the interior are found a number of valleys of great fertility. The chief river is the Elbe, which here receives the Aupa, the Metau, and the Adler. Its chief productions are wheat, lint, and cattle. Its principal manufactures are cotton and woollen stuffs, and linen. —The town is situated on the Elbe, 64 m. E by N of Prague. It is the cap. of the preceding circle, and the see of a bishop; is neatly built, and is a place of some strength. Pop. 4,610. It has an elegant cathedral, and a Jesuits' college, an episcopal seminary, and a public school. The chief manufacture is of woollens. In 1758 this place was taken by the Prussians; and in 1762, a Prussian and Cossack corps having rushed at the same time into the town, it was set on fire in the conflict by the blowing up of the government magazine.

KONIGRODE, a village of Prussia, in the reg. of Merseburg, circle of Mansfeld. Pop. 736.

KONIGSAAL, a town of Bohemia, in the circle and 15 m. E of Beraun, at the confluence of the Beranka and the Moldau.

KONIGSANE, a village of Prussia, in the reg. of Magdeburg, circle of Aschersleben. Pop. 802.

KONIGSBACH, a town of Baden, 10 m. SE of Carlsruhe, on the Rembach. Pop. 1,700.

KONIGSBERG, a government of the Prussian states, comprising the N and W parts of the prov. of E. Prussia, and corresponding nearly to E. Prussia proper. Its area is 8,960 sq. m., of which the Kurische-haff occupies 620 sq. m.; and the Frische-haff upwards of 500 sq. m. The soil is light and sandy, but yields good crops of rye and barley. It is subdivided into 20 circles. Pop. in 1826, 683,925; in 1837, 746,462; in 1846, 847,952, of whom 671,100 were Protestants, 171,294 Catholics, 5,251 Jews. Pop. in 1849, 847,533.

Königsberg, in Polish Krolewiecz, in Lithuanian Karalanczus, a considerable city, the capital of East Prussia, situated in N lat. 54° 42′ 8″, E long. 20° 30′ 2″, on the Pregel, which falls into the NE angle of the great inlet called the Frische-haff, at the distance of only 4 m. The river, flowing from E to W, approaches the city in two arms, which join and form a small oblong island called Kneiphof, in size about the third of a sq. m. On this island is built a part of K., the houses having their foundations on piles, as at Venice and Amsterdam. Opposite to this island, and on the N bank of the river, stands the rest of the city, consisting of the Altstadt, or Old town, and a quarter to the E called Löbenicht. The circumf. of these three quarters, which form properly the city, hardly exceeds 2 m.; but the suburbs are widely spread; and the wall that encloses the whole is 9 m. in circuit. More than half the space enclosed, however, consists of gardens and corn-fields.—The streets of K. are long and narrow, and lined by lofty old-fashioned houses. There are 270 streets and lanes altogether, and 4 large open squares. The Old town contains several public buildings, viz. the town-house rebuilt in 1774, an anatomical theatre, an hospital for the widows and orphans of citizens, and large warehouses for the use of the merchants. The Löbenicht, or quarter to the E of the Old town, stands partly on a hill, and contains a large hospital on the river-side, a mint, a theatre, and an orphan-house. Here also is the royal palace, a large quadrangular edifice, now forming the government-house, the great hall of which is 274 ft. long, and 60 ft. broad, but only 19 ft. high. The tower of this palace is of great height, and commands from its top an extensive and delightful prospect. The Kneiphof, or insulated part of the town, contains a council-house, an exchange, and the university buildings. Its orphan-house is also a conspicuous edifice; but none of these equal the cathedral, which, besides its architecture and ornaments, is remarkable for its organ, erected in 1721, and containing 5,000 pipes. Of the ground on which K. stands, part is dry from its elevation, but other parts are damp from their lowness and the vicinity of the river. There are 7 bridges over the arms of the Pregel. Of the suburbs, the one that is largest and nearest the city is called Lastadie; the others are scattered and irregular. The Pregel, having united its two branches at the city, flows with a wide channel and full current to the sea; but a bar at its mouth prevents the passage of vessels of more than 8 ft. draught of water.—K. was one of the Hanse towns. Its trade arises from its communication with the interior, partly by a canal, but chiefly by the Pregel. Its exports consist of wheat, chiefly from Polish Prussia, rye, hemp, flax, and lint-seed; also tallow, wax, oil, oil-cake, hides, feathers, and bristles. The principal article of export is wheat, the value of which in 1846 was £181,207; in 1849, £115,447. About 50,000 cwt. of oil-cake is annually exported to Great Britain. The total exports in 1846 amounted to £638,824; in 1848, to 522,784; in 1849, to £395,052. Its port is Pillau, about 22 m. to the W. A considerable trade is carried on in the manufactories of the place, which chiefly consist of woollens, linens, leather, soap, and tobacco; and there are breweries and distilleries on a large scale.—The university of K. was founded in 1544. It is attended by about 450 students of law, medicine, the classical languages, and philosophy. Its library contains 60,000 vols. Connected with the university are several literary societies, a botanic garden, a zoological museum, and an observatory; and an institution for the education of schoolmasters. Besides the university, there is a number of good schools. The total number of churches is 26. Pop. in 1837, 64,200; in 1846, 72,400. The majority of the inhabitants are Germans and Lutherans: there are, however, a good many Calvinists and Roman Catholics, each of whom have their churches: the Jews amount to the number of 8,000. The first class of citizens are the merchants and brewers; the second artists, manufacturers, and mechanics.—The town, though fortified, is not capable of making any serious resistance. K. is understood to have been founded

in 1255. Frederick III., who was a native of K., was crowned king of Prussia in this city, with great pomp, on 28th Jan., 1701. In 1709, K. was ravaged by the plague. In the arduous contest of Prussia against the great coalition formed by Maria Theresa, East Prussia was overrun by the Russians, and continued in their hands for several years. K. was taken possession of by the French; but since the overthrow of Bonaparte's government it has been under the dominion of Prussia. A railway to K., from the Stargard and Posen railway, by Bremberg, Dorschau, Elburg, and Braunsberg, has been projected.

KONIGSBERG, a town of Hungary, in the com. of Bars, on the r. bank of the Gran, 70 m. E by N of Presburg. Pop. 3,700.—Also a mountain of Hungary, in the Carpathian range, 21 m. SW of Kaysmark, where several counties meet. It is 10,600 ft. high.—Also a small town of Bavaria, 14 m. NW of Bamberg.—Also a small town of Bohemia, on the Elbe, 6 m. NE of Egra, on the r. bank of the Eger. Pop. 3,800.—Also a town of Hesse-Darmstadt, 8 m. WNW of Giessen. Pop. 500.—Also a village of Moravia, in the circle and 15 m. E of Troppau. Pop. 900.—Also a town of Prussia, in the prov. of Brandenburg, reg. and circle, and 42 m. N of Frankfort, on the Norike, an affluent of the Oder. It has a gymnasium, and an hospital, and 2 churches. Pop. 5,200.—Also a town of Saxe-Meiningen, 21 m. NW of Bamberg, near the r. bank of the Maine. Pop. 800.—Also a village of Prussia, in the reg. of Potsdam, circle of East Priegnitz. Pop. 376.

KONIGSBORN, a village of Prussia, in the reg. of Aremberg, circle of Hamm, near the Unna. There are salt-works here.—Also a village in the reg. of Magdeburg, circle of Jerichow.

KONIGSBRONN, a town of Würtemberg, in the circle of Jaxt, 15 m. S of Ellwangen. Pop. 1,300.

KONIGSBRUCK, a town of Saxony, 18 m. NNE of Dresden, on the L bank of the Plaulsnitz, at an alt. of 550 ft. above sea-level. Pop. 1,100. It has manufactories of woollens and linens, and of pottery.—Also a village of Prussia, in the reg. of Breslau, circle of Guhrau. Pop. 206.

KONIGSDORF (Preussisch), a village of Prussia, in the reg. of Danzig, circle of Marienburg. Pop. 281.—Also a v. in the reg. of Königsberg, circle of Mohrungen. Pop. 344.—Also a v. in the reg. of Marienwerder, circle of Flatow. Pop. 316.

KONIGSDORF (Gross and Klein), two villages of Prussia, both in the regency and circle of Köln. Pop. of Gross K., 314; of Klein K., 269.

KONIGSECK, a town of Bohemia, in the circle and 30 m. SE of Tabor. Pop. 1,000.

KONIGSFELD, a village of Prussia, in the reg. of Coblenz, circle of Ahrweiler. Pop. 387.

KONIGSFELDE, a village of Prussia, in the reg. of Gumbinnen, circle of Darkehmen. Pop. 256.—Also a v. in the reg. of Stettin, circle of Uckermünde. Pop. 258.

KONIGSGNADE, a village of Prussia, in the reg. of Marienwerder, circle of Mark-Friedland. Pop. 207.

KONIGSGUT, or Krolikowo, a village of Prussia, in the reg. of Königsberg, circle of Osterode. Pop. 250.

KONIGSHAIN, a town of Prussia, in the reg. of Liegnitz, circle and 4 m. WNW of Görlitz. Pop. 1,232.—Also a group of 4 hamlets in the reg. of Breslau, circle of Glatz. Pop. 935.—Also a town of Saxony, in the bail. and 12 m. NE of Zittau. Pop. 1,200.

KONIGSHOF, or Nowy-Dwur, a town of Bohemia, in the circle and 15 m. N of Koniggratz, on the l. bank of the Elbe. Pop. 3,000. It has manufactories of cotton, and several tanneries.

KONIGSHOFEN, a town of Baden, in the bail. of Gerlachsheim, 12 m. SE of Wertheim, at the confluence of the Tauber and the Umpfer. Pop. 1,400.—Also a walled town of Bavaria, 42 m. NE of Wurtzburg, on the Saale. Pop. 1,300.

KONIGSHOVEN, a town of Prussia in the reg. of Köln, circle and 6 m. NW of Bergheim. Pop. 1,235.

KONIGSHULD, or Lossource, a village of Prussia, in the reg. and circle of Oppeln, on the r. bank of the Malapane. Pop. 288. It has iron and steel works.

KONIGSHUTTE, a mining village of Hanover, 15 m. SE of Klausthal.—Also a mining village of Prussian Silesia, in the reg. and 56 m. ESE of Oppeln. Pop. 689. It is on the line of the Silesian railway.

KONIGSLUTTER, a town in the duchy of Brunswick, 14 m. NW of Schöningen, near the l. bank of the Schunter. It has two churches, one of which contains the tomb of Lothaire II. There are several breweries, distilleries of brandy, and tobacco works in the town. Pop. 2,950.

KONIGSSEE, a lake of Bavaria, 64 m. SE of Munich. It is about 6 m. in length, and 3 m. in breadth, and abounds in fish.—Also a town in the principality of Schwarzburg-Rudolstadt, 12 m. WSW of Rudolstadt, on the Ronne. Pop. 1,800. It has manufactories of liqueurs, potash, lampblack, and other chemical works.

KONIGSTADTL, a town of Bohemia, in the circle of Bidschow, 9 m. WSW of New Bidschow. Pop. 1,300.

KONIGSTEELE, a village of Prussia, in the reg. of Arnsberg, circle of Bochum. Pop. 334.

KONIGSTEIN, a village of Bavaria, in the circle of Regen, 9 m. NW of Sulzbach. Pop. 620.—Also a town in the duchy of Nassau, 12 m. WNW of Frankfort-sur-le-Maine. Pop. 1,000.—Also a town of Saxony, in the circle of Misnia, 6 m. SE of Pirna, on the l. bank of the Elbe, at the foot of a hill surmounted by a strong fortress. Pop. 1,300. Its chief trade arises from its breweries and distilleries. The castle of K. occupies the summit of a lofty isolated eminence. It is a place of great strength. Within its cincture is a well 600 ft. in depth.

KONIGSWALDE, a town of Prussia, in the reg. of Frankfort, circle and 18 m. NNE of Sternberg, between two small lakes. Pop. 1,085. It has manufactories of woollens, paper, and alum.—Also a group of hamlets in the reg. of Breslau, circle and 15 m. NNW of Glatz. Pop. 800.

KONIGSWART, or Kunczwart, a town of Bohemia, in the circle and 14 m. S of Elnbogen. Pop. 600.

KONIGSWILLE, a village of Prussia, in the reg. of Breslau, circle of Wartenberg. Pop. 138.—Also a v. in the reg. of Oppeln, circle of Rosenberg. Pop. 100.

KONINGSWINTER, a town of Prussia, in the reg. and 20 m. SSE of Köln, on the r. bank of the Rhine. Pop. 1,715. Wine is largely grown in the environs.

KONIN, a town of Poland, capital of an obwod of the same name, in the gov. and 35 m. N of Kalisch, and 129 m. W of Warsaw, on the l. bank of the Warta. Pop. 4,600, of whom a large proportion are Jews. It has a castle, 2 churches, a synagogue, and a large convent; and possesses manufactories of cloth, hats, hosiery, and linen, and several tanneries.—Also a village of Prussia, in the reg. of Posen, circle of Samter. Pop. 267.

KONINGSHAVN, a port of the Faroe islands, Atlantic ocean, on the SW coast of the island of Osteroe, in N lat. 62° 12′, W long. 6° 45′.

KONINGS-HOYCKT, a canton and town of Belgium, in the prov. of Antwerp. Pop. 1,996.

KONINO, a village of Prussia, in the reg. of Posen, circle of Buk. Pop. 370.

KONINSKA-WOLA, a town of Poland, in the gov. and obwod and 27 m. NW of Lublin, and 41 m. E of Radom, near the r. bank of the Vistula. Pop. 1,100. It has a fine cemetery.

KONITZ, or KONICE, a market-town of Moravia, in the circle and 19 m. WSW of Olmutz, near the Jessenitz. Pop. 1,773.

KONITZ, or KONIZ, a village of Switzerland, in the cant. and bail. and 3 m. SW of Berne, in a valley of the same name, at the foot of Mount Gurten. Pop. in 1850, 5,984, Protestants. It has a castle of Teutonic architecture. Agriculture and the rearing of cattle form important branches of local industry.

KONITZ, or CHOYNICA, a town of Prussia, in the prov. of Prussia, capital of a circle of the same name, in the reg. and 336 m. W of Marienwerder. Pop. in 1837, 3,334.

KONITZA, a town of Turkey in Europe, in Albania, in the sanj. and 30 m. N of Janina, at the foot of Mount Himnadi, and near the source of the Botina.

KONIZ, or KONITZ, a village of the principality of Schwarzburg-Rudolstadt, in the seignory of Rudolstadt, 8 m. NNE of Leutenberg, and 5 m. SW of Poseneck. Pop. 450.

KONKODU, a country of Western Africa, situated between the upper part of the parallel courses of the Faleme and the Senegal; bounded by Bambuk on the N; Gadu on the E; Jallonkadu on the S; and Satadu on the W. By Golberry it is considered as a district of Bambuk. The surface is covered with steep mountains, composed of a coarse species of red granite. The streams descending from these mountains impregnate the sand and earth with gold-dust, which the natives separate by a mechanical process. The mountains of K. are cultivated to the very summit; and the villages, built in delightful glens, appeared to Park the most romantic he ever saw. The principal are Dondiku, Konkroma, and Fankia.

KONKOLEWA, a village of Prussia, in the reg. of Posen, circle of Buk. Pop. 207.

KONKROMA, a town of Senegambia, in the kingdom of Konkodu, on the Senegal, 21 m. E of Fajemmia, and 105 m. W of Koina.

KONNERN, a town of Prussia, in the prov. of Saxony, reg. of Merseburg, and circle of Saal, 17 m. NW of Halle. Pop. 3,650. It is enclosed by walls, and contains a church and an hospital. In the environs are quarries of mill-stone.

KONNO, a town of Japan, in the island of Nifon, and prov. of Imaba, 31 m. NNE of Tomanri, and 90 m. WNW of Meaco.

KONOJAD (GROSS), a village of Prussia, in the reg. of Marienwerder, circle of Strasburg. Pop. 233.

KONOKAN-AAR, or KOMENE, a river of Ceylon, which has its source in the mountains to the E of Badulla; runs SE; and flows into the sea at Coemene, on the SE coast, and 10 m. E of Kattregam.

KONOLFINGEN, a village of Switzerland, in an amt or bail. of the same name, in the cant. and 10 m. ESE of Berne. Pop. 443. The bail. is in a fine valley extending between the Aar and Emmenthal. It contains 8 parishes, and possesses about 21,477 inhabitants.

KONOPKEN (GROSS and KLEIN), two villages of Prussia, in the reg. of Gumbinnen, circle of Lotzen. Pop. of Gross K. 292; of Klein K. 136.

KONOTOP, a district and town of Russia in Europe, in the gov. of Tchernigov. The district occupies the SE extremity of the gov. It is very fertile, producing grain, hops, and tobacco, and pasturing large herds of cattle. The town is 102 m. W of Tchernigov, on the l. bank of the Ezoutcha, in a low and marshy country. Pop. 3,000. It is surrounded by an earthen wall and a ditch, and contains 6 churches.

KONOVITZ, a small island of Russia in Europe, in Finland, in the gov. of Viborg, and district of Soedra-Kexholm, 21 m. SE of Kexholm, in the W part of Lake Ladoga. It is covered with wood, and has a monastery.

KONRAD, a town of Independent Tartary, in the khanat, and 120 m. NNW of Khiva, near the l. bank of the Jihon. It is surrounded by an extensive mud wall, and contains numerous mosques and huts. The latter are built of earth, and are only inhabited during the winter season. It is now in a ruinous condition.

KONRADSDORF, a village of Prussia, in the reg. of Liegnitz, circle of Goldberg-Haynau. Pop. 442.

KONRADSHAMMER, a village of Prussia, in the reg. of Danzig, to the E of Oliva. Pop. 100.

KONRADSREUTH, a village of Bavaria, in the circle of Upper Franconia, presidial and 4 m. S of Hof, and 27 m. NE of Bayreuth. Pop. 1,073. It has 2 castles.

KONRADSTHAL, a village of Prussia, in the reg. of Breslau, circle of Waldenburg. Pop. 313.

KONRADSWALDAU, a village of Prussia, in the reg. of Breslau, circle of Brieg. Pop. 718.—Also a v. in the same reg., circle of Guhrau. Pop. 319.—Also a v. in the same reg., circle of Schweidnitz. Pop. 476.—Also a v. in the same reg., circle of Trebnitz. Pop. 416.—Also a v. in the reg. of Liegnitz, circle of Schönau. Pop. 858.

KONRADSWALDE, a village of Prussia, in the reg. of Breslau, circle of Havelschwerd. Pop. 729. Also a v. in the reg. and circle of Königsberg. Pop. 208.

KONRADSWARDAN (MITTEL and OBER), two villages of Prussia, in the reg. of Liegnitz, circle of Landshut. Pop. of Mittel K. 675; of Ober K. 268.

KONSAH, a town of Senegambia, in the N part of Irnanke, near the source of the Nunez, and 100 m. E of Kakendy.

KONSKAIA, a river of Russia in Europe, in the gov. of Yekaterinoslav.

KONSKAWOLA, a town of Poland, in the gov. and obwod. of Lublin. Pop. 1,628.

KONSKIE, a town of Poland, capital of the obwod. and 14 m. SSE of Opoczno, in the gov. of Sandomir, 39 m. WSW of Radom. Pop. 4,000. It contains the fine palace belonging to the counts of Malachowski, and has manufactories of iron and copper utensils, and several paper mills.

KONSTADT, a town of Prussia, in the prov. of Silesia, reg. and 26 m. N of Oppeln, circle and 9 m. NW of Kreutzburg. Pop. 1,320.

KONSTANTINOGORSK. See CONSTANTINOGORSK.

KONSTANTINOGRAD, a district and town of Russia, in the gov. of Poltova. The district occupies the SE part of the gov. It is covered with heath. The town is 63 m. SW of Kharkov, on the r. bank of the Berestovaia. Pop. 1,200. It was formerly named Belevskaia-Krepost, and made part of the Ukraine line, commenced in the reign of the empress Anne, to protect the frontier against the incursions of the Tartars of Ormica. It is still surrounded with a mud wall. Fairs are held 3 times a-year.

KONSTANTINOV, a town of Russia in Europe, in the gov. of Poltova, district and 23 m. NE of Romen, and 10 m. WNW of Nedrigailov, on the r. bank of the Soula.

KONSTANTINOVKA, a Greek colony in Russi

in Europe, in the gov. of Yekaterinoslav, district and 69 m. NNW of Mariopol, on the l. bank of the Voltchiïa. It consists of about 200 families.

KONSTANTINOW, a town of Russia in Europe, in the gov. of Vilna, district and 30 m. N of Poniewicz, and 39 m. ENE of Chavli.—Also a town in the same gov., district and 24 m. SE of Swieciany, and 48 m. NE of Vilna.

KONSTANTINOW (Nowy), a town of Russia in Europe, in the gov. of Podolia, district and 23 m. NW of Lityn, on the r. bank of the Boug.

KONSTANTINOW (Staro), a district and town of Russia in Europe, in the gov. of Volhynia, 81 m. SW of Jitomir, on the l. bank of the Stucz. Pop. 4,032, of whom a large proportion are Jews.

KONSTANZ. See Constanz.

KONTOPP, a town of Prussia, in the prov. of Silesia, reg. and 56 m. NNW of Liegnitz, circle and 18 m. E of Gruneberg. Pop. 410. It has a castle and 2 churches,—a Catholic and a Lutheran.

KONTOURA, a town of Greece, in the hypodioc of Megaris, and 10 m. NNE of Megara.

KONTWIG, a village of Bavaria, in the circle of the Rhine, district and 3 m. E of Deux-Ponts, on the r. bank of the Blies. Pop. 1,500. It has a manufactory of steel.

KONZ, or Konsarbrucken, a village of Prussia, in the prov. of the Rhine, reg. and circle and 5 m. SW of Treves, at the confluence of the Sarre and Moselle. Pop. 453.

KOPAHN, a village of Prussia, in the reg. of Cöslin, circle of Schlawe. Pop. 216.

KOPAL, a town and fortress of Hindostan, prov. of Bejapore, district of Guginderghur, in N lat. 15° 28′, E long. 76° 6′. This place, belonging to the Nizam, is reckoned one of the strongest in the S of India, being a sugar-loaf mountain, surrounded by three lines of fortification. The magazines, storehouses, &c., are excavated out of the solid rock. In 1790 it was taken from Tippu Sultan by the Mahrattas, after a siege of six months.

KOPANOVSKAIA, a town of Russia, in the gov. of Astrakhan, on the r. bank of the Volga. Pop. 900.

KOPATKIEVICZE, a town of Russia, in the gov. of Minsk, 26 m. NW of Mozyr, on the r. bank of the Pticz.

KOPCZCOWITZ, a village of Prussia, in the reg. of Oppeln, circle of Pless. Pop. 237.

KOPENICK, or Cöpnick, a town of Prussia, in the reg. of Potsdam, on an island formed by the Spree and the Dahme, 8 m. SE of Berlin, on the line of railway to Frankfort. Pop. 2,300. It has manufactures of woollens and silks.—Also a village in the reg. of Cöslin, circle of Schlawe. Pop. 157.

KOPERBERG, a village of Prussia, in the reg. of Potsdam, circle of West Priegnitz. Pop. 470.

KOPIELSKAIA, or Kopyl, a small Cossack town in the gov. of Caucasus, on the l. bank of the Kuban, 48 m. WNW of Yekaterinodar. Before the Russian conquest it was the residence of the seraskier of the Kuban.

KOPILI, a river of India, beyond the Ganges, in the district of Cachar, which joins the Jumna on the confines of Lower Assam, and after a circuitous course of 150 m.

KOPING, a town of Sweden, in the gov. of Westeraas, 18 m. W by N of Westeraas, at the W extremity of the Moelar lake. Pop. 1,300.

KOPITLNO, a town of Bohemia, in the circle of Bidschow, 18 m. ESE of Jung-Bunzlau. Pop. 500.

KOPITZ, a town of Prussia, in the reg. of Stettin, circle of Cammin. Pop. 743.

KOPNITZ, or Kopanica, a town of Prussia, in the reg. of Posen, circle of Bomst, on the Obra. Pop. 788.

KOPOTSHAK, a town of Kohwa, on the l. bank of the Jelum, 65 m. NNW of Khiva. Pop. 1,500.

KOPOTZANI, a town of Wallachia, 12 m. S of Bukharest, on the l. bank of the Aroljish.

KOPP, a village of Prussia, in the reg. of Trier, circle of Prum. Pop. 171.

KOPPAND, a town of Transylvania, in the com. of Thorenburg, 15 m. SSE of Klausenberg.

KOPPEN, a village of Prussia, in the reg. of Breslau, circle of Brieg. Pop. 273.

KOPPENBERG, a village of Belgium, in the prov. of E. Flanders, cant. of Melden. Pop. 187.

KOPPERNITZ, a village of Prussia, in the reg. of Oppeln, circle of Neisse. Pop. 658.

KOPPIGEN, a town of Switzerland, in the cant. and 15 m. NNE of Berne. Pop. 1,500.

KOPREINITZ, a town of Croatia, 76 m. NE of Carlstadt, on the l. bank of the Kapronczca. Pop. 3,600. It has a strong castle.

KOPRILI, or Keuprili, a town of Turkey, on the Vardar, 23 m. S of Uskup. Pop. 4,000.

KOPRZYNICA, a town of Poland, in the obwod. of Sandomir, on the Wrona, an affluent of the Vistula, 9 m. SW of Sandomir. Pop. 1,200.

KOPURTHELLA, a town of the Punjab, in N lat. 31° 24′, 10 m. from the l. bank of the Beas.

KOPYCZYNCE, a town of Galicia, in the circle and 30 m. SSE of Tarnopol, on the r. bank of the Niczlawa, an affluent of the Dniester.

KOPYL, a town of Russian Lithuania, in the gov. of Minsk, 16 m. NW of Slutzk. Pop. 1,000.

KOPYS, a town of Russia, in the gov. of Mohilev, on the Dnieper, 30 m. N of Mohilev. Pop. 1,200.

KOR. See Kur.

KORACHI. See Kurachi.

KORAH, a town of Scinde, 15 m. S of Khyrpur, in N lat. 27° 12′.—Also a town of Hindostan, in the prov. of Allahabad, 16 m. S of Pattiallah, on the r. bank of the Rinde, in N lat. 26° 6′.

KORAKILEV, a town of Hindostan, in the prov. of Malabar, 21 m. NW of Calicut.

KORAMBAH, a town of Hindostan, in the prov. of Bahar, near the l. bank of the Coyle, and 16 m. NW of Deesah.

KORANA, a river of Croatia, which rises in Lake Plittvicza, on the E flank of the Little Kapella; and, after flowing from S to N 60 m., falls into the Kulpa, on the r. bank, near Carlstadt.

KORANAS, Kora Hottentots, or Koraquas, a tribe of Hottentots chiefly located upon the upper part of the Orange river, and on the Klaarwater, to the S of the Bosjesmans, and E of the Namaquas.

KORANKP, a town of Persia, on the road from Sennah to Kirmanshaw, 23 m. NE of Sennah.

KORANZA. See Coransah.

KORASH-DAG, a steep mountain of Armenia, near Gemishkana, on the road from Trebisond to Erzerum.

KORASSAN. See Khorassan.

KORB, a large village of Würtemberg, 3 m. ENE of Waiblingen. Pop. 1,200.

KORBA, a village of Prussia, in the reg. of Merseburg, circle of Schweinitz. Pop. 171.

KORBITZ, a village of Prussia, in the reg. of Potsdam, circle of Jüterbogk. Pop. 159.

KORDOFAN, a country of Africa, lying between Darfur on the W, and Sennaar on the E. Its N frontier extends a little beyond the parallel of 15° N. On the S it is bounded by a chain of volcanic mountains inhabited by Nubas, one point in which is said to smoke continually and emit ashes. Its dimensions from SSW to ENE are about 250 m.; its average breadth from E to W, 150 m. It is one of the most southern provs. under the government of the viceroy of Egypt, and is divided into five districts. The surface is rather flat than mountainous, and

the soil sandy throughout; though, on the whole, very fertile; for, to use the words of Pallme, "with the commencement of the rainy season, vegetation springs up from the earth as if by magic, and Nature then shows herself in her full vigour and pomp; balsamic odours, which act almost intoxicatingly on the senses, are everywhere breathed forth, and the traveller might imagine himself transplanted into the fairy gardens of the 'Arabian Nights Tales.'" K. has no flowing rivers, and only a few lakes or large ponds, which abound in leeches; but in the vicinity of the Haraza mountains in the N, pure and fresh water is found on the summit of a mountain during the whole year. The climate is very unhealthy, and in the rainy season disease is prevalent, which, however, disappears on the return of dry weather; but then the fierceness of the sun's scorching rays renders it impossible for any breathing creature to remain in the open air, especially in the months of April and May. Hurricanes occasionally devastate whatever may lie in their course.—The chief productions are gold, cattle, rice, cotton, tobacco, *dohu* —a sort of wheat with a long straw—water-melons, beans, figs, grapes, dates, and most kinds of garden-vegetables known in Europe. In the woods large quantities of gum are found; and the cotton is of good quality but small in quantity. The monopoly enjoyed by the Egyptian government in this prov. precludes trade in general. The chief articles of commerce are not only all bought by the authorities, who are protected by a law prohibiting any private person from bringing them into the market, but every one is forced to sell to the government at its own price: a species of the most arbitrary monopoly preventing the cultivation of many articles which would yield an immense profit both to the administration and private persons, for the soil requires but slight cultivation. In the countries bordering on K. the gum rots every year, because the pasha makes no use of it, and is too avaricious to allow any other person to derive benefit from it. He also monopolizes the trade in ivory and ox-hides, and consigns them to Egypt. Horned cattle form one of the chief exports. They are transported by the government to Egypt, in large droves, of which more than the half perish on the road from want of proper care. —The principal routes through this country are from Khartum SSW to El Obeid, and thence E to Darfur, or S to the Nuba territories and Dar Fertit; also from El Obeid E to the Bahr-el-Abiad, W to Darfur, and N, through Bara, to the Nile below Dongola.—The dwelling-places in K. are extremely simple in their construction, being built of a kind of basket-work, in a circular form, and covered with millet-straw. Each hut has a single entrance, which answers the purpose of door, window, and chimney, and is just large enough for a man to creep in at whilst stooping. The habits of the people are simple, and their labour is restricted to the most necessary employments. Every man, be his means ever so small, endeavours to purchase a slave, and this poor wretch must do the work, in order that his master may lie all day long in the shade indulging in idleness. The dress of both men and women is as primitive as their manners, for all the tribes, except the Dongolavi, the wealthiest, go nearly naked, wearing only a cotton cloth round their loins, of which one end is thrown over one shoulder. There are, properly speaking, three distinct races of men in this territory—namely, the Negroes, or aborigines; the Arabs or free people, to which class the Bakkara belong; and those who have emigrated from Dongola. The Negroes generally profess Islamism, and occupy themselves with agriculture. The Arabs, or free people—to which the Bakkara and other nomadic tribes belong—differ totally from the aborigines; they breed camels and other cattle, and engage but little in agricultural pursuits. The Dongolavi—a race of people distributed, under different denominations, over a great part of Africa—are men of athletic build. They are the most opulent inhabitants of K., and nearly the whole of the export trade by caravan is in their hands. Several tribes of the Bakkara inhabit the districts towards the S, SE, and SW of Lobeid. Each tribe is governed by a sheikh, and a few under-sheikhs. Their occupation consists in breeding horned cattle, horses, and camels. They are a warlike race, and steal slaves from the bordering countries. The Kubbabish Arabs inhabit the country to the E of the Bahr-Abiad, and employ themselves in effecting the transports which the government sends to Dongola and Sennaar. The Darhammer is a branch of the same tribe, but their occupation consists in rearing camels and in agriculture. They are possessed of the finest 'ships of the desert,' or camels, in K.; they do not, however, undertake transports like the Kubbabish, but merely trade in these animals which they sell to the Djelabi, Kubbabish, and neighbouring tribes. The Darhammer do not differ in their domestic habits from the other inhabitants of K., and are, on the whole, one of the most amiable class of people in this prov. There are many other tribes bordering on K., amongst whom the Shilluks and Denki are easily distinguished, for they have oblong heads, and want the 4 lower incisor teeth, which are extracted when they are ten or twelve years of age. They are of muscular build, but of a treacherous disposition. Mehemed Ali, who formed his first regiment of foot entirely of Negroes, latterly gave orders not to enlist any more recruits from these tribes, for their excessive stupidity was likely to lead to ulterior consequences.

In 1821, Mehemet Ali sent his son-in-law, Defturdar, with a powerful army, to subject this country. After a doubtful and bloody battle, the Kordofanese were put to flight, and Defturdar entered El Obeid or Lobeid, the capital, with his victorious army, where he found a large amount of treasure, which he plundered and appropriated to himself. The country was soon brought to the lowest state of degradation by the tyranny of its ruthless conqueror. Dr. Ferlini, during a twelvemonths' sojourn in K., convinced himself that the Egyptian government could not reap any considerable profit from this prov. or that of Darfur. "These people," he says, "are bound to supply more than 400,000 lbs. of gum-arabic to the viceroy of Egypt annually, for which they are paid in the ratio of a crown Spanish —5 francs, 35 c.—per quintal: the expense of transporting this produce to Cairo is about 1½ crown per quintal. The same may be said of elephants' teeth, for which the government pay 10 crowns per quintal. The gum of this country is the finest, and the most celebrated for its rosy-white colour; it is infinitely superior to that of Mecca and Sennaar. There is also a trade in ostrich-feathers, but they are subject to an exorbitant duty. A giraffe may be purchased for 15 or 20 crowns. In these deserts there are tribes called Bagarih [Baggarah], which means 'herdsmen:' they are a wandering people, and only remain with their droves of cattle where they find stagnant water or ponds. When the waters are exhausted, the tribes travel on in search of withered grass. The people of these tribes never eat the flesh of cattle; but they drink the milk, and make butter, which they exchange for corn; they likewise use the butter to rub over their bodies. The Bagarih who pay tribute to the viceroy are not liable to be captured; but those who refuse to pay their imposts, lose the protection of the government, and have their cattle

hunted. Spies, paid by the government, give information of the pasturages where the droves are collected; 300 regular soldiers and 100 *mag-rabins* march in pursuit of the shepherds, whom they reach in about a month. The soldiers endeavour to effect a surprise, generally at day-break. The light cavalry break down the strong fences raised by the herdsmen to protect their beasts from the lions at night. The whole tribe, dispersed by the firing of guns, find safety in flight, not daring to offer the least resistance so great is their fear of fire-arms. These hunts bring the Egyptian government at least 4,000 oxen every year, which are distributed through the different villages under the power of the Turks, and then sent in small droves to Cairo; but as there is no water in the desert of Débbéb, more than half of these animals perish of thirst. Being one day at the house of the colonel, Rustam Bey, where a chief of a free tribe of Bagarih was staying, I asked how it happened that the tribe possessed so large a number of horned cattle, and so small a population. Rustam Bey assured me, that the chief then present did not possess fewer than 100,000 head. The government of Cairo sell these oxen to the peasantry of Upper and Lower Egypt. The war carried on against the unfortunate Africans is accompanied with circumstances of such barbarity and cruelty, that the blacks will not permit any white person to penetrate into the interior of their country for fear of being taken as slaves. The mountains of this solitude [on the skirts of Darfur and K.] are far divided. The blacks have chosen the tops of them to build their villages on, in consequence of the springs of pure water, which are as abundant there as on the declivity of the hills and the high interior plains. The inhabitants of these countries are always naked; they are idolators; and are constantly at war with one another. Each mountain has a different language. They also choose the heights as their abodes, in order the better to defend themselves from the arms of their powerful white neighbours, the Téckétihs, the Darfuhrs, the Solucks, and the Tinckahs. In the caves there exists an anthropophagous tribe, who lead a wandering life in search of captives, who then become the prey of these cannibals. The Egyptian government hunt these ferocious people thrice every year, in the following manner. A body of 2,000 soldiers is collected, and followed by 7,000 camels, laden with water, provisions, and ammunition. Arrived at the foot of the mountains, the first operation is to seize and surround the springs. This expedient always succeeds; for if they attempted, in the first place, to drag them from their caverns, it would be more easy to massacre them than to carry them away; while, driven by thirst, they deliver themselves up to their enemies. The prisoners are then marked on the left arm with a heated iron brand bearing the cipher of the viceroy of Egypt; this is to distinguish them from other slaves which do not belong to the government. When dealers buy these captives, to take them to Cairo or Mecca, they are marked afresh. More than forty mountains have been depopulated by order of the viceroy. The young men fitted for military service are incorporated with the Egyptian troops, and replace old or invalided soldiers; and as 12 years had elapsed since the first regiment stationed in K. had been completed by the Egyptians, it had happened that it was composed of at least two-thirds of these blacks, and fear was momentarily entertained that they would take up arms against the whites. These provinces pay imposts, consisting of cotton-cloth, butter, corn, but very little money. The troops that occupy the peninsula are always at war with the inhabitants of the mountains which bound Abyssinia beyond Phassogli; but the government hardly cares to disturb the Abyssinians; first, by reason of the inaccessible mountains to be traversed, and next, on account of the inhabitants being armed with firelocks. It has, however, attacked the tribes of Tinckah [Denki] and Soluck [Shilluk], but with very little success; for these people, who dread slavery, know how to defend themselves to the last extremity."

KORENI, a town of Russia, in the gov. of Minsk, 48 m. W of Rzeczyca, on the r. bank of the Ipsa.

KORENICZA, a river of Austrian Illyria, which rises in the Little Kapella; runs from S to E; at Ponor sinks under ground, and flows under a mountain, and appears again on the other side, under the name of the Klokst, and falls into the Unna, on the l. bank, in Bosnia, 5 m. SW of Ostrosalz.

KORGO, or CHUERI, an island in the Persian gulf, off the coast of Farsistan, a little to the N of Kharak. It is about 3 m. in length, but is uninhabited.

KORI, the most eastern deltoid arm of the Indus, dividing Sind from Cutch. Its mouth is in N lat. 23° 30′, E long. 68° 25′, and it is navigable 20 m. to Kotasir.

KORIAKOV, a fortress of Asiatic Russia, in the gov. of Omsk, on the r. bank of the Irtisch, 240 m. SE of Omsk, near a lake of the same name, which yields a considerable amount of salt.

KORIAKS, or KORYATS, a tribe of Asiatic Russia, who inhabit the E part of the prov. of Yakutsk, the district of Okhotsk, and the isthmus and N part of the peninsula of Kamtchatka. Their numbers probably do not exceed 2,000. Though the language of the K. is very different from that of the Kamtchadales, they do not differ from them very much either in their features or their manners, and their clothing is nearly the same. The K. live in conical huts, the skeletons of which consist of long poles, and over them are stretched the skins of rein-deer, with the hair still upon them. In the inside of the hut, divisions are made with the skins of rein-deer, which have an opening on the side towards the fire; but this can at any time be closed by a skin which draws over the opening like a curtain. Their drink consists for the greater part of the year of snow and ice, which is melted in a kettle kept constantly hanging over the fire for this purpose. The assertion of many physicians that the goitres, so prevalent in the Swiss cantons and the Tyrol, arise from the use of snow-water, is rendered doubtful by this circumstance, since no such thing as a goitre is to be seen among the K.; yet even in summer-time, as they withdraw with their rein-deer into the mountains, snow-water is still almost their only drink. The business of the men consists in hunting the sable, the wild rein-deer, and the argalis or wild sheep. They have besides the care of cattle, which feed about the houses, and of the numerous flocks of tame rein-deer. As soon as the moss about the habitations is all eaten up, a migration takes place; the people with their rein-deer proceed some versts farther till they find good food. In this way they traverse every year a considerable extent of country from N to S, that is, from the neighbourhood of Ischiga to the middle of Kamtchatka near Itschi, supplying by the way almost the whole W side of the peninsula with reindeer's flesh. The K. live in a state of constant enmity with the Tschutski, their northern neighbours, and unite themselves rather with the Russians, from whom they procure many articles of the first utility, without danger of any unpleasant consequences. Their weapons consist chiefly in bows and arrows."

KORINCHI, a valley in the island of Sumatra, at the back of the range of mountains by which the districts of Anak, Sungei, and Indrapur are bounded. This valley is considerably elevated above sea-level, and contains one of the beautiful lakes so common among the mountains in the interior of Sumatra.

KORITSCHAN, a small town of Austria, in Moravia, 27 m. E by S of Brunn. Pop. 1,200. There are glass-works and brass-foundries here.

KORJIHAAK, a town of Hindostan, on the W side of the river Jelum, in N lat. 32° 40′.

KORK, a village of Baden, 3 m. E of Kehl, between two arms of the Kinzig. Pop. 960.

KORKENHAGEN, a village of Prussia, in the reg. of Stettin, circle of Naugard, on the Pogrim lake. Pop. 104.

KORKOL, a town of Nubia, 60 m. NNW of Sennaar.

KORKURTZ, a village of Prussia, in the reg. of Oppeln, circle of Neisse. Pop. 191.

KORMA, a town of Russia, in the gov. of Mohilev, 30 m. E of Rogaczev.

KORMOND, a town of Hungary, in the com. of Eisenburg, at the confluence of the Pinka and Raab. Pop. 2,900.

KORMUDSEH, a town of Persia, in Farsistan, 100 m. SW of Schiraz.

KORNAH, or KURNAH, a flourishing village of Irak-Arabi, situated at the junction of the Euphrates and Tigris. It contains about 800 houses on the r. bank of the Tigris and the l. of the Euphrates, on the supposed site of the ancient *Apamea*. It is enriched by its traffic with Bassorah, which is 39½ m. by the river SE of K. Sir John Malcolm recommended it to the British government as a post which, if occupied and duly fortified, might keep the Arabs in check, and command the navigation of both rivers.

KORNATY, a village of Prussia, in the reg. of Posen, circle of Wreschen. Pop. 154.

KORNAU, a village of Hanover, in the co. of Diepholz, on the Hunte. Pop. 262.

KORNBURG, a town of Bavaria, 4 m. NE of Schwabach.

KORNEGALLE, a village and military station in the island of Ceylon, 30 m. NW of Kandy, at an alt. of 360 ft. above sea-level. The surrounding country is flat and marshy, and principally under rice cultivation.

KORNELISMUNSTER, a town of Prussia, in the reg. and 5 m. SE of Aix-la-Chapelle, on the Inde. Pop. 800.

KORNER, a small town of Saxe-Gotha, on the r. bank of the Notter, 15 m. SW of Sondershausen. Pop. 980.

KORNHAUS, a small town of Bohemia, 21 m. W by N of Prague.—Also a town in the circle and 10 m. NE of Rakonitz.

KORNICA, a town of Russia, in the gov. of Volhynia, 15 m. WSW of Zaslaw.

KORNICZEL, a town of Hungary, in the com. of Bihar, 30 m. E of Gross-Wardein.

KORNITZ, or KORNICA, a village of Prussia, in the reg. of Oppeln, circle of Ratibor. Pop. 265.

KORN-NEUBURG, a town of Lower Austria, on the l. bank of the Danube, 10 m. N of Vienna, in N lat. 48° 21′ 22″. Pop. 1,858.

KORNPRAG, a town of Hindostan, in Gurwhal, 30 m. ENE of Sirinagur.

KORNWESTHEIM, a town of Würtemberg, in the Neckar circle, 1½ m. S of Ludwigsburg. Pop. 1,340.

KOROGRA (CAPE), a headland on the S coast of Cephalonia, in N lat. 38° 4′, E long. 20° 49′.

KOROLEN, a town of Russia, in the gov. of Livonia, 54 m. S of Dorpat.

KOROLEVETZ, a town of Russia, in the gov. of Tchernigov, on the Dobiye-body. Pop. 1,300.

KOROLOWKA, a town of Galicia, in the circle and 21 m. SSE of Czortkow, on the r. bank of the Niczlawa, an affluent of the Dniester.

KORON, KORONE, or KORONIS, a port of Greece, on the W coast of the gulf of the same name, in the nomarchy of Triphylia. Pop. 600. It exports wheat, oil, honey, and wax. The plain of K. is about 8 m. in length, and 3 m. wide. It was formerly covered with olives, but the Egyptian army in the late war cut and burned down nearly the whole, and ruined the town, which was one of the best in the Morea. K. occupies the site of the ancient *Colonides*.

KORONOWO, a small town of Prussian Poland, on the Nahe, in the circle of Bromberg. Pop. 435.

KOROP, a small town of Russia, gov. of Chernigov, on the Desna, 20 m. W of Korolevetz. Pop. 1,000.

KOROS, or KÖRÖSCH, a river of Hungary, which rises in Transylvania, 20 m. W of Klausenburg; enters the com. of Bihar; receives the White K., also coming from Transylvania; enters the palatinate of Bekesch; and falls into the Theiss, on the l. bank, near Czongrad, after a course of about 80 m. A third river, called the Fekete K. or Black K., rises in the palatinate of Bihar, and joins the two others near the town of Bekesch.

KOROS (KIS), a town of Hungary, in the com. of Pest, 15 m. ENE of Kalocsa.

KOROS (NAGY), a town of Hungary, in the com. and 50 m. NE of Pest.

KOROSKO, a village of Nubia, situated at that point of the Nile where the river bends W to Deir, forming an abrupt angle, apparently closed in on all sides by lofty hills. A military road is forming from this place through the Eastern desert, to Novgrat, by which all the upper cataracts of the Nile will be avoided, and the distance diminished above one-half.

KOROSTYCHEV, a town of Russia, in the gov. and 60 m. W of Kiev, on the l. bank of the Teterev.

KOROTAYA, a river of India, which rises in the district of Rongpur, and flowing SE forms the boundary between the zillahs of Rongpur and Dinajpur, and joins the Tista, after a course of 45 m.

KOROTOIAK, a town of Russia, in the gov and 50 m. S of Voronetz, on the r. bank of the Don. Pop. 2,400.

KOROTSCHA. See KAROTSHA.

KOROU, or HEHRUD, a town of Persia, in Irak-Ajemi, 30 m. S of Kashan. Pop. 400.

KOROUND, a town of Hindostan, prov. of Oude, 27 m. NW of Lucknow, near the r. bank of the Gumti.

KORPITZ, or KUROPRASCZ, a village of Prussia, in the reg. of Oppeln, circle of Falkenberg. Pop. 200.

KORPO, one of the numerous group of islands which form the archipelago of Abo, on the W coast of Finland, in N lat. 60° 5′, E long. 21° 30′. It is of an oval form, 20 m. in circumf., and contains a small town of the same name, and several villages.

KORRAH. See KORAH.

KORREGONG. See CORREGAUM.

KORRENZIG, a village of the Prussian territory, on the Rhine, duchy of Juliers, near Linnich. Pop. 800.

KORS, a village of Azerdbijan, in Persia, 80 m. SSE of Erivan.

KORSABAD, KHORSABAD, or KHOUROUSTABAZ, a village of a few houses in the Turkish pash. of Mosul, on the l. bank of the Khauser, 14 m. NNE of Mosul. Its environs are marshy and insalubrious. In 1844, the French archæologist, Botta, discovered in the mound on which this v. is built the first Assyrian sculptures which had ever been brought to Europe, having with immense perseverance succeeded in transporting them by the Tigris to Bassora, whence they were conveyed to Paris in 1846. The low ground, in the middle of which K. is situated, is open completely to the W only, in which direction the eye wanders over the plain watered by the Tigris, bounded in the distance by the mountains of the Yezidis. To the N stretches a chain of hills through which the small river Khauser makes its way; on the E rises a calcareous chain of hills separating the basin of the Tigris from the valley of Gomel; on the S, the view is terminated by the elevation of the plain. Two roads lead from Mosul to K., one passing N, the other S of Kuyunjik. Besides the mound itself, Botta traced the walls of an enclosure, two sides of which are 5,750 ft., and the other two 5,400 ft. in length.

KORSCHENBROICH, a village of Prussia, on the Rhine, in the reg. of Dusseldorf, 6 m. E of Gladbach, near the v. of Mylendonk. The two vs. together, contain 2,200 inhabitants.

KORSCHLITZ, a village of Prussia, in the reg. of Breslau, circle of Oels. Pop. 414.

KORSENS, a village of Prussia, in the reg. of Breslau, circle of Nulitsch. Pop. 522.

KORSEWELAN, a small island in the Eastern seas, in S lat. 7° 39′, E long. 128° 40′.

KORSUN, a town of Russia, in the gov. of Kiev, 21 m. ESE of Bugoslav, on the r. bank of the Ros.

KORTCHEVA, a town of Russia, in the gov. of Tver, on the r. bank of the Volga, 50 m. E of Tver. Pop. 450.

KORTEBOCKEN, a commune and village of Belgium, in the prov. of E. Flanders, dep. of Somergem. Pop. 273.

KORTEKEER, a commune and village of Belgium, in the prov. of W. Flanders, dep. of Ruddervoorde. Pop. 216.

KORTENBECK, a village of Prussia, in the reg. of Magdeburg, circle of Salzwedel. Pop. 138.

KORTENHOEK, a commune of Belgium, in the prov. of E. Flanders, dep. of Hofstadt. Pop. 163.

KORTENHOGEN, a village of Prussia, in the reg. of Stettin, circle of Greifenhagen. Pop. 281.

KORTI, a town of Dongola, in Africa, on the l. bank of the Nile. The caravans from Egypt to Sennaar here quit the river, and proceed directly across the desert of Bahiouda, to Shendy.

KORTMEDIEN, a village of Prussia, in the reg. of Konigsberg, circle of Wehlau. Pop. 238.

KORTRIGHT, a township of Delaware co., in the state of New York, U. S., 15 m. N of Delhi. Pop. 2,441.

KORUL, a town of Hindostan, in Gujerat, on the r. bank of the Nerbudda, 18 m. NE of Baroach.

KORUMABAD, or KHORUMABAD, a town of Persia, in the prov. of Khuzistan, on the l. bank of the Kerkah, 120 m. NNW of Shuster.—Also a town in the W part of the Persian prov. of Mazanderan, 80 m. N of Teheran.

KORYCZEN, a town of Russia, in the prov. of Bialystok, 21 m. WNW of Sokolka.

KORYTA, a village of Prussia, in the reg. of Posen, circle of Krotoszyn. Pop. 388.

KORYTNICA, a town of Russia, in the gov. of Volhynia, 15 m. NW of Vladimir.

KORYTRICE, a village of Prussia, in the reg. of Posen, circle of Krotoszyn. Pop. 408.

KORZEC, a town of Russia, in the gov. of Volhynia, 20 m. W of Neograd-Wolynsk.

KOS-ADJI (CAPE), a cape on the E coast of the Caspian, in N lat. 42°.

KOSAH-NAG, a small lake of Cashmere, on the N side of the Futi-Panjal, in N lat. 33° 26′, E long. 74° 45′, at an alt. of about 12,000 ft. above sea-level. It is ¾ m. long, and 500 yds. broad; and is chiefly supplied by the melted snow from the adjacent heights. It forms the source of the Veshan, a principal feeder of the Jelum.

KOSCHEINEN, a village of Prussia, in the reg. of Königsberg, circle of Mohrungen. Pop. 209.

KOSCHEN, a village of Prussia, in the reg. of Frankfort, circle of Guben. Pop. 166.

KOSCHEN (GROSS and KLEIN), two villages of Prussia, in the reg. of Frankfort, circle of Kalau. Pop. of Gross K. 270; of Klein K. 137.

KOSCHENTIN, a village of Prussia, in the reg. of Oppeln, circle of Lublinitz. Pop. of p. 1,454.

KOSCHING, a town of Bavaria, 6 m. NE of Ingolstadt. Pop. 500.

KOSCHLAU (GROSS), a village of Prussia, in the reg. of Königsberg, circle of Neidenburg. Pop. 243.

KOSCHMIEDER, a village of Prussia, in the reg. of Oppeln, circle and 4 m. W of Lublinitz. Pop. 506.

KOSCHMIN, a village of Prussia, in the reg. of Danzig, circle of Bereut. Pop. 183.

KOSCHNORVE, a village of Prussia, in the reg. of Breslau, circle of Trebnitz. Pop. 190.

KOSCHPENDORF, a village of Prussia, in the reg. of Oppeln, circle of Grottkau, near Munsterberg. Pop. 213.

KOSCHURALSKOI, a fortress of Russia, in the gov. of Caucasus, on the Ural, 24 m. S of Uralsk.

KOSCIELEC, a village of Prussia, in the reg. of Branburg, circle of Inavraclaw, near Pakose. Pop. 238.

KOSCIELSKIE, a village of Prussia, in the reg. of Posen, circle of Kröben. Pop. 163.

KOSCIERZYN (GROSS and KLEIN), two villages of Prussia, in the reg. of Bromberg, circle of Wirsitz, near Lobsens. Pop. of Gross K. 323; of Klein K. 127.

KOSCIUSKO, a county towards the N part of the state of Iowa, U. S. Area 527 sq. m. It is watered by the Tippecanoe. Pop. in 1840, 4,170; in 1850, 4,822. Its cap. is Warsaw.—Also the cap. of Attala co., in Mississippi, 67 m. NE of Jackson, on the Yockonockony.—Also a mountain in the Australian Alps, at the head of the Murray river. Alt. 6,500 ft.

KOSCYTOW, a village of Prussia, in the reg. of Oppeln, circle of Pless, near Dziedzkowitz. Pop. 291.

KOSEL, a town of Prussia, in Silesia, on the Oder, 73 m. SE of Breslau, 16 m. NE of Leobschütz. Pop. 3,600. It is strongly fortified.—Also a v. in the reg. of Liegnitz, circle of Bunzlau. Pop. 212.—Also a village in the same reg., circle of Glogau, near Klopschen. Pop. 469.

KOSEL (GROSS and KLEIN), two villages of Prussia, in the reg. of Breslau, circle of Würtemberg. Pop. of Gross K. 369; of Klein K. 394.

KOSEL (NIEDER and OBER), two villages of Prussia, in the reg. of Liegnitz, circle of Rothenburg, near Niesky. Pop. of Nieder K. 247; of Ober K. 144.

KOSELEZ, a town of Russia, in the gov. of Chernigov, 45 m. S of Chernigov. Pop. 2,000.

KOSELSK, a town of Russia, in the gov. and 42 m. SSW of Kaluga. Pop. 2,900.

KOSELWITZ, or KOZLOWICE, a village of Prussia, in the reg. of Oppeln, circle of Rosenburg, near Landsborg. Pop. 375.

KOSEN, a village of Prussia, in the reg. of Merseburg, circle and 3 m. W of Naumburg, on the Saale. Pop. 698. Salt is largely made here.

KOSFELD, a town of Prussia, in the reg. of Munster, 21 m. W of Munster, on the Berkel. Pop. 5,532.

KOSHAB, a town in the Punjab, 120 m. NW of Lahore, on the r. bank of the Jelum.

KOSHANIA, a town of Great Bukharia, 30 m. W of Samarcand.

KOSHENICUT, a village of Sistan, 110 m. NE of Bost.

KOSI. See COSI.

KOSIA, a town of Wallachia, 12 m. NNW of Rimnik, on the r. bank of the Aluta.

KO-SI-CHANG. See KOH-SI-CHANG.

KOSICHINSKOI, a fortress of Russia, in the gov. of Caucasus, on the Volga, 48 m. NNW of Astrakhan.

KOSIE, a considerable kingdom of Western Africa, on the E bank of the river Lagos, about 60 m. from its mouth. Its capital, of the same name, commands the trade of the river.

KOSILA, a river of Hindostan, rising near Kontuli in Kumaon; and flowing considerably S, WSW, and SSW, to the Ramganga, which it joins on the l. bank, 9 m. below Rampur.

KOSIMA. See COOSIMA.

KOSKANUADEGO, a river of Pennsylvania, which runs into the Alleghany, in N lat. 41° 52′.

KOSKE, a village of Prussia, in the reg. of Oppeln, circle of Kosel, near Ober-Glogau. Pop. 352.

KOSL, a village of Arabia, in the prov. of Yemen, 18 m. WNW of Chamir.

KOSLIN. See Coslin.

KOSLITZ, a village of Prussia, in the reg. of Liegnitz, circle of Görlitz. Pop. 255.

KOSMANOS, a town of Bohemia, in the circle of Bunzlau, 9 m. NE of Jung-Bunzlau. Pop. 850.

KOSMINEK, a town of Prussian Poland, 6 m. W of Kalisch. Pop. 660.

KOSPUR. See Cospur.

KOSSEIR. See Cosseir.

KOSSENBLATT, a village of Prussia, in the reg. of Frankfort, circle of Lubben, near Trebatsch. Pop. 502.

KOSSERY, a village of Nigritia, in the territory of Loggun, on the l. bank of the Shary, 160 m. SE of Kuka.

KOSSOGOL, a lake in the Khalkhas territory, 80 m. WSW of Lake Baikal. It gives rise to the Ĕghe, which flows into the Selenga.

KOSSOVA, or Cassovia, a town of Turkey, in Servia, in the sanjak and 9 m. N of Pristina. The plain of K. has been the grand theatre of many decisive battles since the days of Philip of Macedon. It is about 10 leagues in length; and, beheld from any of the surrounding heights, bears the form of an oblong basin. The soil is alluvial, and of immense depth, and is everywhere fertile and cultivated, though situated at an alt. of nearly 2,000 ft. above sea-level. "The prospect from this place," says Spencer, "is extremely beautiful. There is the vast amphitheatre of the mighty Kopaonik, rising to a height of 6,000 ft.; the pinnacled cliffs of the Bosman mountains; the Arnoutska Planina in Upper Albania; the lower heights in Bulgaria and Macedonia; and, perhaps not the least interesting, the gigantic Scardus."

KOSTANICSZA, a town of Austrian Croatia, on the Unna, 52 m. E by S of Carlstadt, in N lat. 45′ 13′ 57″. Pop. 3,200.

KOSTANIE, a pass in the Rocky mountains, near the sources of the Columbia; at its W extremity is a fort within the limits of Oregon. The Hudson Bay company have the use of this pass, and of the navigation of the Columbia, for goods and despatches, secured by treaty; but will probably gradually prefer the more northern or Athabasca passage, and open it to the head of Fraser's river.

KOSTEL, a small town of Moravia, 6 m. SSE of Auspitz, on the l. bank of the Taya. Pop. 1,500.—Also a small town of Austrian Illyria, in Lower Carniola, near the river Kulpa, 5 m. S of Gottsche. Pop. 400.

KOSTELETZ, a town of Bohemia, 16 m. SE of Königingratz, on the r. bank of the Wildon-Alder.—Also a town of Moravia, 7 m. SW of Olmutz. Pop. 1,100.—Also a small town of Bohemia, 21 m. E by S of Prague. Pop. 900.

KOSTEN, a small town of Prussian Poland, on the l. bank of the river Obra, 26 m. SSW of Posen. Pop. 1,760.

KOSTENBLUT, a town of Prussia, in the reg. of Breslau, circle of Neumarkt. Pop. 900.

KOSTENDIL. See Gustendil.

KOSTENDJE, or Kostanitza, a town of Turkey, in the sanj. and 48 m. SE of Sophia, at the foot of Mount Rilo.

KOSTENIEVICZE, a town of Russia, in the gov. of Minsk, on the r. bank of the Sewetch.

KOSTHEIM, a town of Hesse-Darmstadt, in the prov. of Rhein-Hessen, on the r. bank of the Rhine. Pop. 1,272.

KOSTIANSK, a town of Russia, in the gov. and 21 m. SSW of Voronetsch, on the r. bank of the Don.

KOSTIOUKOVICZE, a town of Russia, in the gov. of Mohilev, 21 m. S of Klonivoicze.

KOSTLARN, a town of Bavaria, in the presidial and 9 m. SW of Griesbach, on the r. bank of the Rothal. Pop. 500.

KOSTRITZ, a town of Germany, in the principality of Reuss-Ebersdorf, bail. and 5 m. NW of Gera, on the l. bank of the Esler. Pop. 1,200. It has breweries and distilleries.

KOSTROMA, one of the largest provinces or governments of European Russia, lying between 56° 45′ and 59° 13′ N lat., and 40° 27′ and 48° E long.; and bounded on the N by Vologda; on the E by Viatka; on the S by Nizni-Novgorod, and Vladimir; and on the W by Jaroslav. It is in the latitude of Scotland, but considerably larger, its territorial extent being 38,400 sq. m. Pop. in 1838, 958,000; in 1846, 1,054,600. It lies wholly within the basin of the Volga; and is watered by the Volga, the Vetluga, the Unja, and the Kostroma, and has also several lakes. The surface is in general an undulating plain. The soil varies, being bleak in the N, dry in the S, in many places covered with heath, and in others with forests. The habits of the inhabitants are chiefly pastoral. Their exports are hides, tallow, lint, and iron.—It is subdivided into 12 circles.

Kostroma, a considerable town of European Russia, and the cap. of the above gov., is situated on the l. bank of the Wolga, near the influx of the river K., in N lat. 57° 45′ 40″. It had a pop. of 12,149 in 1833, and is the see of a bishop. Its manufactures consist of Russia leather, linen, Prussian blue, salt, wax, and soap, and it has also a trade in corn and wine.

KOSTROMA, a navigable river of European Russia, which rises in the NE of the gov. of the same name; runs NNW to Solgalitch; then turns SW, receives the Veksa and the Vioksa, and falls into the Volga, on the l. bank, at the town of K., after a course of 140 m.

KOSTRZYN, a town of Prussia, in the reg. and 12 m. E of Posen. Pop. 1,178.

KOSTUR, a town of Turkey, in Bosnia, 7 m. N of Zvornik, near the l. bank of the Drin.

KOSULITZA, a town of Turkey, in Bosnia, in the sanj. and 60 m. ESE of Trawnik, on the l. bank of the Krijava.

KOSUMA, a town of Nifon, in Japan, 60 m. WSW of Meaco.

KOSVA, a river of Russia, in the gov. of Perm, which descends from the Ural chain, and flowing SW joins the Kama, on the l. bank, at Chermosk, after a course of 160 m.

KOSWIK, or Coswig, a walled town of Anhalt-Bernburg, 6 m. WNW of Wittenberg, near the r. bank of the Elbe. Pop. 2,800. It has oil-mills and breweries, and manufactories of woollens and tobacco.

KOT, a town and fort of the Punjab, 35 m. ENE of Attock.

KOTA, a small island in the N. Pacific, in the group of the Caroline islands, in N lat. 7° 15′, and E long. 149° 50′.

KOTABOVA, a large village in Ceylon, in the district of Vellasi, 54 m. E of Kandy, in a plain. It is the chief military post in the district.

KOTACUT, a maritime town of Hindostan, in the prov. of Malabar, district of Cartinaad, at the mouth of a small river, 12 m. SSE of Mahé, and 30 m. NNW of Calicut.

KOTAH, or Cata, a petty state and town of Hindostan, in the Rajput territory, and chiefly in the prov. of Ajmir. The state composed an area of 5,500 sq. m., bounded on the N and NW by the states of Bundi and Jeypur, and on the NE by the intermixed possessions of Sindia and Holkar. Though generally mountainous it is to a great extent fertile and well-watered. Its principal rivers are the Chumbul and Kalli-Sind. This state is subsidiary to the British government, and is one of the most flourishing in India. It is governed by a Rajput rajah. In 1819 its gross revenue amounted to 47 lacs of rupees. The principal fortresses are Kotah, also the chief town, Shahabad, Gagrun, Sheaghur, and Narghur.—The town is on the E bank of the Chumbul, 150 m. SE of Ajmir, and 18 m. S of Bundi, in N lat. 25° 12′, and E long. 75° 45′. It is an irregular shaped but large place, and is surrounded with stone walls, defended by bastions, and with ditches cut out of the solid rock. The entrances are protected by double gateways. It possesses several handsome and well-stocked bazaars, numerous temples, and other public edifices, and a large proportion of private houses substantially built of stone and brick. The most remarkable edifice is the rajah's palace, a massive structure with lofty white turrets, and enclosed within a separate fortification. Its inhabitants are chiefly Rajputs. The manufactures of the town are chiefly articles for local use, but a considerable trade is carried on with other parts of the country. In the vicinity, in the centre of a lake, is the superb temple of Jugmandul.

KOTA-KOLI, a town of Nigritia, near the bank of the Joliba, to the E of the state of Komba.

KOTAMA, an island in the Red sea, in N lat. 15° 41′, E long. 42° 21′, 21 m. W of Loheia. It is 3 m. in length from N to S, and 1½ m. in breadth.

KOTANA, a village of the Punjab, about 8 m. from the E bank of the Indus, and 40 m. S of Leia.

KOTAR, a town of Hindostan, in the prov. of Travancore, 12 m. NNW of Cape Comorin, and 42 m. ESE of Trivanderum, on the Manacondi.

KOTARRA, a town of Hindostan, in the prov. of Cutch and district of Kanta, 40 m. NW of Mandivi.

KOTAS, a town and fort of the island of Borneo, in the kingdom of Benjarmasseen, on the Varche, an affluent of the bay of Benjarmasseen.

KOTA-TANGA, a town of the island of Sumatra, in the kingdom and 240 m. SE of Acheen, on the Sinkel.

KOT-BUXADA, a village of the Punjab, about 4 m. from the W bank of the Sutledge, and 100 m. E of Multan.

KOTCHANIA, a town of Turkey in Europe, in Servia, in the sanj. and 40 m. SE of Semendria.

KOTE, a fort of Afghanistan, on an affluent of the Cabul, 25 m. SE of Jelalabad.—Also a village in the Punjab, on the W bank of the Chenab, 22 m. NE of Multan.—Also a town in Hindostan, in the prov. of Gujerat, 12 m. SW of Dholka.

KOTE-BELOCHWALA, a village in the Punjab, about 10 m. ESE of Dera-Ismail-khan.

KOTE-BHAT, a village of the Punjab, near the E bank of the Jelum, and 120 m. NW of Lahore.

KOTEGHUR, Kotgur, or Cataghara, a chiefship, fortress, and town of Northern India. The chiefship or lordship is situated between the Sutledge and Jumna, and is bounded on the NW by Kumharsein, on the E by Pundur and Jubul, on the S by Bulsun, and on the SW by Burowli. It is intersected by numerous ravines, forming so many natural and almost impenetrable fastnesses. The pop. is scanty.—The town is on the foot of the Whartu mountain, near the l. bank of the Sutledge, above the level of that river, and at an alt. of 6,634 ft. above sea-level, in N lat. 31° 18′, and E long. 77° 28′. It is the residence of the rajah, and is a place of considerable strength. The climate in summer is delightful, and the environs are extremely fertile, producing grain, fruit, including peaches, apricots, filberts, walnuts, &c., legumes, turmeric, and ginger. The locality is noted for its opium, and it affords also considerable quantities of pitch and turpentine, and of a species of bamboo, used by the natives for a great variety of purposes.

KOTE-ISASHAH, a village of the Punjab, near the E bank of the Jelum, and 50 m. SSW of Kote-Bhat.

KOTE-KANGRAH. See Kangrah.

KOTELA, or Kote, a small town of Hindostan, in the prov. of Agra, 24 m. SSE of Nornol, and 45 m. NNW of Machery.

KOTELNITCH, a district and town of Europe, in the gov. of Viatka. The district is situated on the E part of the gov., and is bordered on the E by the Viatka. The soil is in some parts well-cultivated, but the greater extent is covered with wood. The rearing of cattle forms an important branch of local industry.—The town is 54 m. SW of Viatka, on the r. bank of the river of that name. It contains about 3,200 inhabitants, of whom the greater number are engaged in agriculture. This town occupies the site of the ancient fortress of Kokcherev, which was destroyed by the inhabitants of Novgorod towards the end of the 12th century.

KOTELNOI, or Kettle Island, an island of Russia in Asia, in the Arctic ocean, the largest and most westerly of the 4 principal islands in the Liakhov archipelago. It extends between 74° 30′ and 76° 15′ N lat., and 138° 20′ and 141° 50′ E long, and is 132 m. in length from N to S, and about 72 m. in breadth. It terminates on the N in Cape St. Anisia, and in Cape Medvegi, or Bear cape, in the S., and consists of an assemblage of sterile mountains and rocks. In the SE is a considerable bay, into which the chief river in the island discharges itself. The island is only frequented by hunters.

KOTELVA, a town of Russia in Europe, in the gov. and 62 m. W of Kharkov, district and 19 m. S of Akhtirka, on the l. bank of a river of the same name, an affluent of the Vorskla.

KOTERAH, or Kotri, a town of Hindostan, in the prov. of Malwa and state of Bhopal, 7 m. NE of Ashta, and 40 m. WSW of Bhopal, near the Parbutty. It contained in 1820 about 800 houses.

KOTERI, or Kahteri, a town of Hindostan, in the prov. of Malwa and state of Bhopal, 30 m. W of Bhopal.

KOTH, or Kotti, a town in the Punjab, 70 m. SW of Sirinagur, near the l. bank of the Pir Panjal river, and on the road from Lahore to Cashmir, through the Punch pass. It contains about 150 houses, and is a customs station.

KOTHAUR, a lordship in Northern Hindostan, in the W part of the territory of Sirmur, between the Jumna and Sutledge. It consists chiefly of a level strip of land generally well-cultivated, stretching along the l. bank of the Gumbher, between Keonthul and Mahlogh. In 1804 this territory fell, with the other hill-states, under Gorkha domination, but in the war of 1814 they sided with the English. It contains a small town of the same name 36 m. NNW of Nahan.

KOTHEN. See Anhalt.

KOTI, a town and port of Borneo, in the state of Koti-Lama, on a river of the same name, an affluent of the Guti. It is defended by a fortification formed with trunks of palm trees. It possesses a considerable trade.

KOTIAKOV, a town of Russia in Europe, in the

gov. and 75 m. W of Simbirsk, district and 13 m. WNW of Karsun, on the r. bank of the Soura. Pop. 220.

KOTI-LAMA, a territory in the E part of the island of Borneo, to the N of the state of Benjarmassin. It is intersected by a range of mountains which in some parts approach the coast. The principal river is the Guti. The coast consists chiefly of swamps, and the climate generally is extremely unhealthy. It produces rice in great abundance, benzoin, aloes, musk, pepper, cassia, nutmegs, honey, wax, camphor, gums of different kinds, and gold, and carries on an active trade in these articles. The inhabitants are chiefly Malays, and profess Islamism. The territory is divided into several chiefships, of which that of Passir is the most powerful.

KOTILLA, a town of Hindostan, in the prov. of and 54 m. SSW of Delhi, on the W bank of a lake.

KOTKABU, a village in the Punjab, on the E bank of the Chenab, 120 m. NE of Multan.

KOTKI, a village of Afghanistan, on the N bank of the Gomul, and in the Gomul Pass, 80 m. W of Dera-Ismail-khan.

KOTLA, or KOTELA, a sanjak and town of Turkey in Asia, towards the centre of the pash., and 35 m. ESE of Akalzike. It has a castle of the same name.

KOTLEWE, or KADLEWE, a village of Prussia, in the reg. of Breslau, circle of Woplau, near Hermstadt. Pop. 169.

KOTLI, a town in the Punjab, 30 m. N of Lahore, on the road from Vazirabad to Umritsir.

KOTLIN, a village of Prussia, in the reg. of Posen, circle of Pleschen. Pop. 582.

KOTLISCHOWITZ, a village of Prussia, in the reg. of Oppeln, circle of Tost. Pop. 296.

KOTLOW, a village of Prussia, in the reg. of Posen, circle of Schildberg. Pop. 319.

KOTNAR, a village of Turkey in Europe, in Moldavia, in the district and 3 m. S of Harleu, and 36 m. NW of Jassy. It is noted for its wine.

KOTOCHE, or GAGRY, a village of Abasia, on the shore of the Black sea, 15 m. NW of Pitzunda, between the mouth of the Gagrypsche and the Sheuadse-Reptoa.

KOTONKORA, a territory of Sudan, in Houssa, between the state of Guari on the NE, and Yaouri on the SW, by which it is separated from the Niger. It is intersected by the Mayarrow, and by the line of route from Boussa to Kano.

KOTORI, or KOTTORI, a town of Hungary, in the comitat of Szala, 15 m. N of Kopreinitz, and 23 m. ENE of Warasdin, on the r. bank of the Mur.

KOTOROST, a river of Russia in Europe, in the gov. of Yaroslav, which issues from Lake Neto, in the district of Rostov; runs NNE into the district of Yaroslav; and joins the Volga, on the r. bank, at the town of that name, after a navigable course of 90 m. Its principal affluents are the Ousta on the l., and the Lakhost.

KOTORSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, and district of Khoper, 5 m. ENE of Dobrinskaia, on the l. bank of the Khoper.

KOTORSKO, a market-town of Turkey in Europe, in Bosnia, in the sanj. and 54 m. NNE of Trawnik, on the l. bank of the Bosna. It is defended by a strong tower.

KOTOVTZY, a people of Russia in Asia, who inhabit the S part of the gov. of Yeniseisk, near the E bank of the Yenisei. They are of indolent habits, and miserably poor. Some of them profess Christianity, but they are chiefly Shamans. They pay to Russia a small tribute in furs.

KOTRA, a town of Hindostan, in the prov. of Allahabad, and district of Bundelcund, 84 m. ESE of Gualior, on the r. bank of the Betwa.—Also a large town in the prov. of Malwah, on the Gunjan, 17 m. N by E of Hindia.

KOTRDEE, a village of Sind, 90 m. N of Hyderabad, on the road thence to Bukkur.

KOTRI, a village of Sind, 90 m. NNE of Hyderabad, on the road thence to Khyerpur.—Also a v. in Sind, on the r. bank of the Kori mouth of the Indus, 8 m. NW of Lucput, on the line of route into Cutch.—Also a town in Beluchistan, in Cutch-Gundava, in a plain, about 10 m. SW of Gundava, and at an alt. of 600 ft. above sea-level. It is a large place, and has a good bazaar, and a fort.—Also a village of Sind, on the r. bank of the Indus, in N lat. 25° 22′.—Also a town of Sudan, in Houssa, 15 m. N of Zimri, and 100 m. E of Saccatu, on the r. bank of the Quarrama.

KOTRU, a town and port of Upper Guinea, on the Ivory coast, 45 m. W of Grand Lahou.

KOTSCHAU, a village of Prussia, in the circle and 7 m. SE of Merseburg, on the Saale. Pop. 720. It has a saline spring.—Also a v. in Silesia, in the reg. and 48 m. E of Oppeln, circle and 15 m. ESE of Lublinitz. Pop. 160. It has large iron-works.—Also a v. in the duchy of Saxe-Weimar, E of Weimar. Pop. 111.

KOTSCHENBRODA, a town of Saxony, in the circle of Meissen, bail. and 7 m. NW of Dresden, on the r. bank of the Elbe. Pop. 700. It is well-built.

KOTTARIA, a town of Hindostan, in the prov of Cutch, 36 m. E of Andjar, in N lat. 23° 5′.

KOTTBUS, a town of Prussia, in the prov. of Brandenburg, reg. of Frankfort, 70 m. SE of Berlin, on the r. bank of the Spree, at an alt. of 328 ft. above sea-level. Pop. in 1837, 8,216. It has manufactories of woollens, hosiery, and tobacco, several breweries and distilleries, and a considerable transit-trade. It had an evangelical gymnasium with 6 professors, in 1836, and 163 pupils.

KOTTER, one of the Faroe group, SW of Stromöe, and NW of Sandöe, in N lat. 61° 57′. It is about 3 m. in length.

KOTTIAAR, a town of Ceylon, on the S side of the inner harbour of Trincomalee, 12½ m. from Tamblegam, chiefly inhabited by Malabars. The country around is well-cultivated.—The district of K. extends from the N bank of the Virgal-Ganga to the frontiers of Tamblegam, 27 m. from NE to SW, and 15 m. from E to W; and contains about 30 villages.—The K. river is one of the outlets into which the Mahavelle disembogues itself, 25 m. S of the bay of the same name, into which it falls.

KOTTIS, a town of the archd. of Austria, in the upper circle of Manhartsberg, 15 m. W of Krems, on the Krems river.

KOTTISINA, a town of Dalmatia, in the circle and 3 m. SSE of Macarsca. Pop. 1,700. It is the see of a bishop; and has an active trade in salt, oil, and figs, with the Bosniaques.

KOTTIVAR. See KATTIWAR.

KOTTOR, a town of Bosnia, in the sanj. and 36 m. NW of Trawnik, on the l. bank of the Verbanitza.

KOTTSHAK-KULTIUK, or KOCHAK-KULTUK, a gulf on the E coast of the Caspian, intersected by the parallel of 44° 30′ N, the extreme limits of which may be taken from the promontory of Tuk-Karagan on the SW, to the Kolpina islets on the NE, or more narrowly to Cape Kochak, nearly on the same parallel as Tuk-Karagan. Its S coast stretches along the N base of the Mangishlak mountains, which sometimes give name to the gulf itself. It contains several islands, among the largest of which is Podgornoi.

KOTUNTANG, a river of Senegambia, which has its source in the state of Futa-Jallon; runs SW along the frontiers of Timisso-Tombuchi; and entering the

territory of the Timmanis, joins the Kong-Karru-Kabba, about 30 m. E of the entrance of their united waters into the Atlantic.

KOTUR, a river which has its source in the mountains near the E frontier of Turkey in Asia; makes a considerable circuit into the Persian prov. of Azerdbijan, passing in its course a town of the same name, and a little to the S of Khoi; and after running a total distance of about 60 m., joins the Kuk-kana at Mikrican. The valley through which it runs, and which bears the same name, is of little width, and terminates in a narrow defile.

KOTYANA, a town of Hindostan, in the prov. of Gujerat, 36 m. WNW of Janaghur, near the r. bank of the Bhador.

KOTYE. a town of Hindostan, on the coast of Malabar, 33 m. SSE of Calicut.

KOTYS, a nomadic tribe in Hindostan, who inhabit the prov. of Coimbatur.

KOTZAU (Ober), a market-town of Bavaria, in the circle of Upper Franconia, S of Hof. Pop. 1,100. It has a castle.

KOTZEBUE'S SOUND, an extensive indentation of the NW coast of Russian America, to the NE of Behring's strait, situated between Cape Krusentern on the N, and Cape Espenberg on the S. It extends about 60 m. inland, and is 69 m. in width from N to S. Towards the entrance it contracts to a breadth of about 36 m. It encloses on the E Eschholtz and Hotham inlet; opposite the former is Chemisso island. On the W side are the bay of Good Hope and Cape Deception. Several groups of mountains rise near its shores. The Kitgocies and Kioumis are the principal tribes in its vicinity. This gulf is almost constantly blocked up with ice.

KOTZENAU (Gross), a village of Prussia, in Silesia, in the reg. of Liegnitz. Pop. 477.

KOTZENAU (Klein), a village of Prussia, in Silesia, in the reg. and 18 m. NW of Liegnitz, circle and 12 m. NW of Lüben. Pop. 450. It has a fine castle, and a Lutheran church.

KOTZLING, a market-town of Bavaria, in the prov. of Lower Bavaria, on the r. bank of the Regen, 42 m. ENE of Ratisbon. Pop. 1,300. It has 2 castles, 3 churches, a school, and an hospital; and possesses several breweries, an oil and a tan-mill, and a brick-kiln.

KOUCHIBOUGUACK, a river of New Brunswick, which flows into the gulf of St. Lawrence, 20 m. S of Miramichi bay, after a course of 50 m. It has a lagune at its mouth which forms a good harbour.

KOUCHIBOUGUACKSIS, a river of New Brunswick, which takes its rise in a lake upwards of 50 m. in the interior, and empties itself into the gulf of St. Lawrence, 36 m. S of the Miramichi.

KOVALERKA, a town of Russia, in the gov. of Poltava, 21 m. ENE of Mirgorod.

KOVAR, a district of Transylvania, bounded on the N by Hungary, on the E, S, and W, by Szolnok. The Szamos, which skirts it on the S and NW, is the principal river. The Lepos, one of the principal affluents of the Szamos, traverses the interior. The surface is mountainous, and in great part covered with forests. The principal commerce consists in cattle and charcoal. It is subdivided into 4 *marches*, viz.: Berkes, Bunn, Nagy-Somkert, and Vaad.

KOVASAKI, a town of Japan, in the island of Nifon, on a small stream, near Jedo.

KOVASZNA, a town of Transylvania, in the Szeklers country, march of Zabola, 32 m. NE of Cronstadt.

KOVERECTAN, a town of Persia, in the prov. Laristan, 60 m. E of Lar.

KOVESD (Mezö), a town of Hungary, in the com. of Borsod, 12 m. ESE of Erlau.

KOVI, a village of Hungary, in the com. of Gömör, 6 m. ESE of Ratko, on the l. bank of the Turcsek.

KOVJA, a river of Russia, which rises in Lake Kovjskoe, in the S part of the gov. of Olonetz; runs S; enters the gov. of Novgorod; and flows into Lake Bielo, on the NW side, after a course of 60 m.

KOVODOZERO, a lake of Russia, in the gov. of Archangel, 6 m. W of the gulf of Kandalask, and 8 m. NE of Lake Plavozero. It communicates with the gulf of Kandalask by the Kovda.

KOVROV, a town of Russia, in the gov. and 52 m. NE of Vladimir, on the r. bank of the Kliasma. Pop. 400.

KOWAL, a town of Poland, in the obwodie of Kujavie, 15 m. SE of Brzesc. Pop. 1,342.

KOWALLWO, or Schönsee, a town of Prussia, in the reg. of Marienwerder, circle and 15 m. NE of Thorn. Pop. 500.

KOWALSIR, a village of Afghanistan, near the E entrance of the Khyber pass, in N lat. 34°.

KOWARSK, a town of Russia, in the gov. and 60 m. NNW of Wilna, on the r. bank of the Swieta.

KOWEL, a town of Russia, in the gov. of Volhynia, 32 m. NNE of Wladzimiers, on the l. bank of the Turia. Pop. 1,000.

KOWIE, or Kowiec, a rver of S. Africa, which rises in the Zwartwater mountains, a little to the S of Graham's Town, and flows SE by S, through the central district of Albany to the sea, into which it falls at Port Francis, 9 m. SSE of Bathurst, and 35 m. from Graham's Town. Its estuary does not afford a secure seaport, and goods for the interior are chiefly landed at Port Elizabeth, distant 96 m. Its chief tributary is the Torrens, which it receives on the l. bank, at a point 5 m. W by N of Bathurst.

KOWLAS, a town and district of Hindostan, in the prov. of Hyderabad. The town is in N lat. 18° 14′, 80 m. NW of Hyderabad. The Manjera river bounds the district on three sides.

KOWNO, a town of Russia, in the gov. of Wilna, at the junction of the Niemen and the Wilna, 62 m. WNW of Wilna. It has an imposing appearance from a distance, but consists, with the exception of a few convents and churches, of ill-built houses. Pop. 4,500. The trade is brisk, this town being a kind of mart for goods carried from Lithuania to Prussia, and in particular for corn, honey, and wax. In the memorable campaign of 1812, the French army marched through K. in high order and vast numbers on 24th of June: in the middle of December, after their disastrous retreat of more than 600 m. from Moscow, they again made their way through it in a state of great disorder.

KOWROWA, a village on the W coast of the island of Hawaii or Owhyhee, in Karakakua bay, where Cook was killed in Feb. 1779.

KOZACZYNA, a town of Russia, in the gov. of Wilna, 18 m. W of Widzy.

KOZAR, or Racskozar, a small town of Hungary, in the com. of Baranya, 18 m. N of Pecs.

KOZARATZ, a town of Bosnia, in the sanj. and 24 m. NW of Bagna-Luka, on the r. bank of the Sanna.

KOZELETZ, a small town of Russia, in the gov. of Tchernigov, on the r. bank of the Ostra, 45 m. NNE of Kiev. Pop. 2,000.

KOZELSK, a town of Russia, in the gov. and 40 m. SSW of Kaluga, at the confluence of the Dragunka and the Gizdra. It was destroyed by fire in 1777; and has been handsomely rebuilt. Pop. 3,000.

KOZIANY, a town of Russia, in the gov. of Minsk, 9 m. SE of Vindzy, on the l. bank of the Disna.

KOZIEEVKA, a town of Russia, in the gov. and 52 m. W of Kharkov.

KOZIEGŁOW, a town of Poland, 52 m. NW of Cracow. Pop. 1,300.

KOZIENICE, a town of Poland, near the Vistula, 48 m. SSE of Warsaw. It has an ancient castle. Pop. 1,600.

KOZLAU, a town of Bohemia, in the circle and 12 m. WSW of Rakonitz.

KOZLI, a small town of Persia, on the road from Sultanieh to Sennah, 90 m. NNE of Sennah.

KOZLOV, a town of Russia, in the gov. of Tambov, on the r. bank of the Lesnoï-Voronej, 48 m. WNW of Tambov. Pop. 6,800. Its chief trade is derived from the surrounding country, and consists in horned cattle, which are sold to the Don Cossacks, and in tallow and salt meat, which are forwarded to Moscow.

KOZMIN, a town of Prussian Poland, 28 m. WNW of Kalisch, on the Orla. Pop. 2,193.

KOZMODEMIANSK, a town of Russia, in the gov. of Kasan, 30 m. WNW of Cheboskar, on the r. bank of the Volga. It has an active trade, by the river, in timber, mats, and articles of wooden turnery.

KRABBEN, a small island in the Atlantic, near the coast of Guayana, in N lat. 0° 10′.

KRAC. See KARAK.

KRACHOVO, a mountain-ridge of Turkey, between Romelia and Thessaly, making part of the water-shed between the basins of the Salembria and the Venetico, and connected on the E with Mount Volutza.

KRACK, a commune of Belgium, in the prov. of E. Flanders, dep. of Basel. Pop. 226.

KRAEY, a commune of Belgium, in the prov. of E. Flanders, dep. of Basel. Pop. 247.

KRAGEROE, a small maritime town of Norway, in the bail. of Bradsberg, 92 m. SSW of Christiania, on the coast of the Skager-Rack, in N lat. 58° 51′ 35″.

KRAGOJEVATZ, a town of Servia, in the sanj. and 60 m. S of Semendria, on the r. bank of the Lepenitza.

KRAHENHEIMSTETTEN, a small town of Baden, 8 m. W of Sigmaringen.

KRAIBURG, a town of Bavaria, on the r. bank of the Inn, 10 m. SW of Muhldorf. Pop. 700.

KRAIN. See CARNIOLA.

KRAINBURG, or CRAIN, a small town of Austrian Illyria, in Carniola, on the Save, 20 m. W of Laibach, at the confluence of the Kauker with the Save. Pop. 1,400.

KRAJOVA, KRAYOWA, or CRAIOVA, a town of European Turkey, the capital of Little Wallachia, in N lat. 44° 19′, 40 geog. m. direct distance NE by E of Widin, and 90 m. W by S of Bucharest. It is situated nearly in the centre of Little Wallachia, within 3 m. of the l. bank of the Schyl, which flows into the Danube nearly opposite Rahova, at a point 35 m. direct distance S by E of Krajova. It is a large and well-built town, with a pop. of about 8,000.

KRAKATOA, an island in the straits of Sunda, in S lat. 6° 6′, midway between Sumatra and Java.

KRAKOW, a small town of the grand-duchy of Mecklenburg-Schwerin, 9 m. SSE of Güstrow, near a small lake of the same name. Pop. 800.

KRAKOWIEC, a town of Galicia, in the circle and 21 m. NE of Przemysl.

KRALIEWA-VELIKA, a small town of Slavonia, on an island formed by the Pakra, 156 m. S of Vienna.

KRALINGEN, a village of Holland, in the prov. of S. Holland, 3 m. NE of Rotterdam. Pop. 2,080.

KRALITZ, or KRALICE, a village of Moravia, in the circle of Olmutz, 4 m. NNW of Tovitschau. Pop. 900.

KRALOWITZ, a small town of Bohemia, 15 m. SW of Rakonitz, on the Sztrela. Pop. 1,600.

KRALUP, a town of Bohemia, in the circle and 12 m. WNW of Saatz, on the Saubach. Pop. 500.

KRAMARICH, a town of Bosnia, in the sanj. and 60 m. ESE of Trawnik.

KRANENBURG, a town of Prussia, in the reg. of Dusseldorf, 7 m. W of Cleves. Pop. 1,200. It has breweries, tanneries, and paper-mills.

KRANICHFELD, a town of Germany, on the river Ilm, in N lat. 50° 51′ 55″, appertaining partly to the duchy of Saxe-Weimar, partly to that of Saxe-Meiningen. Pop. of the former portion 620; of the latter 1,350.

KRANOWITZ, a town of Prussia, in the reg. and 48 m. S of Oppeln. Pop. 660.

KRANZBERG, a town of Bavaria, 8 m. NW of Fiersing, on the r. bank of the Amper. Pop. 300.

KRAPAKS. See CARPATHIAN MOUNTAINS.

KRAPENDORF, a town in the grand-duchy and 21 m. SW of Oldenburg, on the l. bank of the Soeste. Pop. 780.

KRAPINA, a river of Croatia, which rises in the com. and 15 m. SW of Warasdin, and flows from NE to SW to the Save, which it joins on the l. bank, 9 m. W of Agram, after a course of 45 m. Its principal affluent is the Krapinchicza.—Also a town of Croatia, 18 m. S of Pettau, on the l. bank of the Krapinchicza, in N lat. 46° 9′ 52″. There are hot mineral springs in the vicinity.

KRAPIVNA, a town of Russia, in the gov. and 27 m. SW of Tula, at the confluence of the Plova and the Oupa. Pop. 1,100.

KRAPIWNA, a small town of Prussian Silesia, on the Oder, 9 m. NE of Ober-Glogau.

KRAPPITZ, a town of Prussia, in the reg. and 13 m. S of Oppeln, on the l. bank of the Oder. Pop. 1,610.

KRASICZYN, a town of Galicia, in the circle and 6 m. WSW of Przemysl, on the r. bank of the San.

KRASNA, a small town of Moravia, in the circle of Prerau, NW of Gross-Mesentsch, of which it forms a suburb, on the other side of the Betschwa. Pop. 1,800.—Also a town of Galicia, in the circle and 15 m. NE of Brzezany, on the l. bank of the Stripa.

KRASNABROD, a small town of Hungary, in the palatinate of Semplin, 35 m. NE of Eperies.—Also a small town of Poland, on the Wieprz, 28 m. W of Belcz. Pop. 400.

KRASNE, a town of Russia, in the gov. of Podolia, 52 m. N of Jampol.

KRASNEUKAIA, a town of Russia, in the gov. of Voronetz, 6 m. WNW of Novo-Khophersk, on the l. bank of the Savala.

KRASNIEWICE, a village of Poland, in the obwodie and 18 m. SW of Gostynin. Pop. 450.

KRASNIK, a village of Poland, in the obwodie and 52 m. WNW of Zamosz.

KRASNOBORSK, a town of Russia, in the gov. of Vologda, 30 m. WNW of Solvytchegodsk, on the l. bank of the Dvina. Pop. 600.

KRASNOGORSKAIA, a fort of Russia, in the gov. of Tobolsk, 36 m. SSW of Yalutorusk, on the r. bank of the Iset.—Also a fort of Russia, in the gov. and 45 m. ESE of Orenburg, on the r. bank of the Ural.

KRASNOI, a village of Russia, in the gov. and 30 m. SW of Smolensk, on a small affluent of the Dnieper. Pop. 500. In the disastrous retreat of the French from Moscow, they were attacked here by the Russians, and suffered great loss. Pop. 450.—Also a town in the gov. of Minsk, 21 m. S of Vilcyka.

KRASNOIAR, a town of Russia, in the gov. of Astrakhan, 36 m. NNE of Astrakhan, on an island

formed by arms of the Volga. Pop. 1,970, who employ themselves chiefly in fishing.

KRASNOIARSK, a town of Asiatic Russia, in the gov. of Yeniseisk, on a small river which falls into the Yenisei, in N lat. 56° 1′, E long. 92° 57′. Pop. 5,162 in 1833. The great road from Tomsk to Irkutsk, and generally the overland route between Western Siberia and the Trans-Balkalian provs., passes through this town, which occasions a considerable transit of commodities for the trade with China and Eastern Siberia. The surrounding country is of remarkable fertility.

KRASNOIARSKAIA, a town of Russia, in the gov. and 105 m. ESE of Simbirsk, on the l. bank of the Sok.

KRASNOI-JAROVKA, a German settlement in the Russian gov. of Saratov, 15 m. E of Saratov, on the l. bank of the Volga.

KRASNOI-KHOHN, a town of Russia, in the gov. and 99 m. NNE of Tver. Pop. 1,800.

KRASNOI-SELO, a large and well-built village of Russia, about 20 m. from St. Petersburg.—Also a village in the gov. of Perm, with a rich botanical garden.

KRASNO-KUTSK, a small town of Russia, in the gov. of Kharkov, on the r. bank of the Merlo, 40 m. WSW of Kharkov.

KRASNOLUKI, a town of Russia, in the gov. of Minsk, 36 m. NE of Borisov.

KRASNOPOL, a town of Poland, in the obwodie and 9 m. W of Seyny. Pop. 560.—Also a town of Russia, in the gov. of Volhynia, 52 m. SW of Jitomir.

KRASNOPOLE, a town of Russia, in the gov. and 72 m. NW of Kharkov.—Also a town of Russia, in the gov. of Mohilev, on the r. bank of the Paluj.

KRASNO-POLIE′, a German settlement, in the gov. and 52 m. SSE of Saratov, on the r. bank of the Volga. Pop. 500.

KRASNO-SLOBODSK, a town of Russia, in the gov. of Penza, on the river Mokscha, 30 m. ESE of Temnikov. Pop. 4,650.

KRASNO-UFIMSK, a town of Russia, in the gov. of Perm, 70 m. SE of Kungur, on the r. bank of the Ufa. Pop. 5,000. Iron and copper are extensively wrought in the vicinity.

KRASNYSTAW, a small town of Poland, in the palatinate of Lublin, on the river of Wieprz, 26 m. SSW of Chelm. Pop. 3,000.

KRASNOVODSK, a mountain-chain of Tartary, which runs from N to S along the E coast of the Caspian, between the bay of Karaboghaz and the gulf of Balkan.

KRASSOVA, Krasso, or Kraschow, an extensive palatinate in the SE of Hungary; bounded on the N by the com. of Arad, from which it is separated by the Marös; on the NE by Transylvania; on the E and S by the Banat; and on the W by the com. of Temesch. It has an area of 108·8 German sq. m. Pop. in 1837, 228,602. It is a mountainous district; but its valleys are fertile in grain, particularly maize; and it has some extensive plains in its W part. It is watered by the Marös, the Ternes, and the Bega, on the N; and by the Nera on the S. Iron, copper, and lead, are extensively wrought.—It is subdivided into 5 *jaras* or *marches*, viz.: Bulcs, Kalponas, K., Lugos, and Oravicza.

KRASZNA, a county in the NW of Transylvania, in the Hungarian country, watered by the Berettyo and the K. It is covered in great part with forests. Area 19·8 German sq. m. Pop. in 1837, 19,555, Magyars and Wallachians.—The town of K., which gives name to the above-mentioned palatinate, is 6 m. SSE of Somlyo.

KRASZNA-HORKA, a small town of Hungary, in the palatinate of Gömör, 3 m. E of Ratko. Near it are rich mines of quicksilver and cinnabar.

KRATOVO, a town of Turkey, in the prov. of Romelia, sanj. and 15 m. E of Uskup, on the l. bank of the Psigna.—Also a town of Servia, in the sanj. and 40 m. S of Kruchovatz.

KRATTOK, a village of Java, near the S coast of the island, about 15 m. S of Djoejocarta.

KRATZAU, a small town of Bohemia, in the circle of Bunzlau, 9 m. SSW of Friedland. Pop. 1,210, chiefly cotton and linen-weavers.—Also a town of Bohemia, in the circle of Königingratz. Pop. 1,200.

KRAUPEN, or Graupen, a town of Bohemia, in the circle and 18 m. NW of Leitmeritz. Pop. 1,600. It has large vitriol-works. In the vicinity copper, tin, and silver are mined.

KRAUTA, or Krautheim, a town of Baden, 3 m. S of Boxberg, on the river Jaxt. Pop. 700.

KRAUTERGERSHEIM, a village of France, in the dep. of Bas-Rhin, cant. and 4 m. ENE of Obernay. Pop. 1,000.

KRAUTHAUSEN, a town of Prussia, in the reg. and 18 m. ENE of Aix-la-Chapelle, on the r. bank of the Roër.

KREBEN, a town of Prussian Poland, 32 m. S of Posen.

KRECHEVO, a town of Bosnia, in the sanj. and 30 m. E of Trawnik. Pop. 2,000.

KREFELD, or Crefelt, a town of Prussia, in the reg. and 12 m. NW of Dusseldorf, 3 m. from the l. bank of the Rhine, in N lat. 51° 20′, E long. 6° 32′. It is a well-built town, and surrounded with walls and ditches. Pop. in 1831, 18,738; in 1837, 23,008. It contains a Roman Catholic church, two Protestant churches, a synagogue, and other places of worship; an orphan-asylum, a deaf and dumb asylum, and a house-of-correction. Its manufactures are extensive, consisting of silks, velvets, yarns, kerseymeres, flannels, gloves, threads, staves, iron and copper wares, and soap. The annual produce of its looms amounts to 4,000,000 dollars.

KREIBITZ, a town of Bohemia, in the circle of Leitmeritz. Pop. 1,100.

KREICH, a river of Baden, which rises in the Black forest, near Keinbach; runs NW, and then SW; and joins the Rhine, on the r. bank, near Spires, after a course of 36 m.

KREIDERSVILLE, a village of Northampton co., in the state of Pennsylvania, U. S., 183 m. NE of Harrisburg.

KREIGA, a town of Nigritia, in Kordofan, 15 m. W of El Obeid.

KREMENETZ, or Krzemieniec, a town of Russian Poland, in the gov. of Volhynia, 130 m. S of Jitomir, at the foot of a mountain whose summit is occupied by a castle, which forms the citadel of the town. Pop. 5,760. The vicinity is fertile in fruit, hemp, and tobacco.

KREMENNAIA, a town of Russia, in the gov. of Kharkov, 60 m. SSE of Kupiansk.

KREMENSKAIA, a town of Russia, in the Don Cossacks' territory, 6 m. NE of Perekopskaia, on the r. bank of the Don.

KREMENTSCHUG, a town of Russia, in the gov. and 64 m. SW of Poltava, at the confluence of the Kagumlik and the Dnieper, in N lat. 49° 3′ 28″, E long. 33° 28′ 46″. It is surrounded by earthen ramparts. Its houses are chiefly built of wood. It has manufactories of sugar, saltpetre, soap, and army-supplies. Pop. in 1838, 17,087.

KREMMEN, a town of Prussia, in the reg. of Potsdam, circle of Ost-Havelland, 22 m. NW of Berlin, on the lake of Luch. Pop. 2,162.

KREMNITZ, or Körmöcz-Banya, a town of Hun-

gary, in the com. of Bacs, in a deep valley, 10 m. W of Neusohl, and 18 m. N of Schemnitz, in N lat. 48° 42′, E long. 18° 54′, at an alt. of 623 yds. above sea-level. It comprises a castle, a mint, a Catholic and a Lutheran church, a gymnasium, a normal school, an infirmary, and extensive mining-offices, besides large scattered faubourgs. Pop. 5,480. The mines in the vicinity of K. are still worked for gold and silver, but the richest veins are in a great degree exhausted. They produce about 15,000 marks of silver, and 250 marks of gold annually. Private companies hold the richest and best mines. K. has also a vitriol-work, paper-mills, and potteries.

KREMPE, a town of Denmark, in the duchy of Holstein, 4 m. NE of Glückstadt. Pop. 1,850.

KREMS, a town of Lower Austria, on the l. bank of the Danube, near the confluence of a small stream of the same name, 38 m. WNW of Vienna, in N lat. 48° 21′ 30″. It is surrounded by old walls, and has a piarist college, a gymnasium, an agricultural school, and large infantry barracks. Its manufactures consist of vinegar, saltpetre, metal buttons, alum, and mustard. Pop. 4,437.—The K. rises near Martinsberg, and flows first ENE, and then SSW, a distance of 30 m.—Also a river of Austria, in the Traun circle, which rises near Georgen, and flows in a NNE course, passing Kremsmunster and Kremsdorf, to the Traun, which it joins on the r. bank, at Ebelsberd, after a course of 40 m.

KREMSBRUCK, a town of Illyria, in the gov. of Laibach, circle and 26 m. NNW of Villach, on the l. bank of the Liser. Iron is wrought in the vicinity.

KREMSIER, or Kromieriz, a town of Moravia, in the circle of Prerau, on the r. bank of the March, 12 m. SW of Prerau. Pop. 5,267. It has a gymnasium, and a military school, and a fine chateau, the summer residence of the bishop of Olmütz, with a library of 30,000 vols.

KREMSMUNSTER, a town of Austria, in the circle of France, on the l. bank of the Krems, at the foot of a hill the summit of which is occupied by a celebrated Benedictine abbey, 9 m. SE of Wels, in N lat. 48° 3′, E long. 14° 7′. It is a neat well-built town, and has a lyceum. The abbey possesses an observatory, several museums of natural history, a noble library of 50,000 vols., and a spacious and beautiful church.

KRESLAVL, a town of Russia, in the gov. of Vitebsk, on the r. bank of the Southern Dwina, 27 m. E of Dwinaburg. It is well and regularly built. Pop. 1,200.

KRESTOVSKIR, a group of islands in the Arctic ocean, near the embouchure of the Kolyma. They are rocky, and covered chiefly with moss, and are only occasionally visited by fur-hunters.

KRESTZI, a town of Russia, in the gov. and 54 m. ESE of Novgorod, on the Khalova. Pop. 1,900.

KREUTH, a large watering-place in the Bavarian Tyrol, at an alt. of 2,911 ft. above sea-level. It forms a kind of half-way house between Munich and Innsbruck. The water is saline. The surrounding scenery is beautiful and grand.

KREUTZ, a town of Transylvania, in the Szeklers country, 12 m. W of Udvarhely, on the r. bank of the Grand-Kockel.

KREUTZ, or Körös, a county of Croatia; bounded on the N by the Drave, which separates it from Hungary; on the E by the regimental districts of K. and of St. George; on the SE by Slavonia; on the S and W by Agram, from which it is separated for some distance by the Longa; and on the NW by Warasdin. A chain of mountains divides it into two physical regions, that on the N sloping towards the Drave, and watered by the Bednya and the Grabulin; and that on the S belonging to the basin of the Save, and watered by the Lonya and the Glogovnicza. A large portion of the surface is covered with forests. The total area is 30·2 German sq. m. Pop. in 1837, 101,036, chiefly Catholic Croatians. It is subdivided into the marches of K. and of Kopreinitz.—Its chief town, of the same name, lies on the r. bank of the Glogovnicza, in N lat. 46° 1′ 16″, 21 m. SSE of Warasdin. Pop. 2,800.

KREUTZ, or Körös, a district of Military Croatia, in the generalat of Warasdin; bounded on the W and N by the civil division of the same name; on the E by the regimental district of St. George; and on the S by Slavonia. It has an area of 29·6 German sq. m. Pop. in 1837, 58,862. Its surface is generally mountainous, except towards the centre, where some marshy plains occur, near the banks of the Chasma and the Glogovnicza. Its chief towns are Ivanich, Chasma, and Belovar.

KREUTZBERG, the highest summit of the Rhonegebirge, in Bavaria, 48 m. N of Würtzburg. It has an elevation of 700 toises or 1,492 yds. above sea-level.

KREUTZBERG-PHILIPPSTHAL, a town of Hesse-Cassel, in the prov. of Fulda, on the r. bank of the Werra. Pop. 900.

KREUTZEN, a town of the archd. of Austria, in the Mühl circle, 4 m. NW of Grein.

KREUZBURG, a town of Prussian Silesia, in the reg. and 28 m. NNE of Oppeln, on the Stober. Pop. 3,394.—Also a town of Prussia, in the reg. and 18 m. S of Königsberg. Pop. 1,678.—Also a town of Saxe-Weimar, on the l. bank of the Werra, 6 m. NNW of Eisenach. Pop. 1,890.

KREUZNACH, a town of Prussia, in the reg. and 36 m. SSE of Cologne, on the Nahe, at an alt. of 328 ft. above sea-level. Pop. 7,833. It is a well-built town, and is defended by a castle. It has manufactories of leather, soap, tobacco, woollens, extensive salt-works, and distilleries; and conducts an active commerce in wine, brandy, grain, and potash. In the vicinity are the ruined castles of Rheingrafenstein and Ebernburg.

KREYLITZ, a town of Bohemia, in the circle and 30 m. NE of Leitmeritz. It has a crystal manufactory. Pop. 1,100.

KREZIN, a town of Bohemia, in the circle and 15 m. NE of Königingratz, on the Mettau.

KRIEBLOWITZ, a village of Prussia, in the reg. and circle of Breslau, near Canth. Pop. 220.

KRIEBSTEIN, a village of Saxony, in the circle and 36 m. SE of Leipsic.

KRIEGEM, a village of Bohemia, in the circle and 12 m. SSW of Saatz, on the l. bank of the Goldbach. Pop. 500.

KRIEGSTETTEN, a village of Switzerland, in the cant. and 2 m. SE of Soleure. Pop. in 1850, 186.

KRIEKO, a river of Senegambia, which rises on the frontiers of Kaarta, and, flowing from E to W, joins the Senegal on the r. bank, after a course of 90 m.

KRIENS, a parish and village of Switzerland, in the cant. and 1 m. SW of Lucerne. Pop. of p. in 1850, 2,693, Catholics.

KRIEWEN, a town of Prussia, in the reg. of Posen, circle and 10 m. SE of Kosten, on the l. bank of the Obra. Pop. 675.

KRIMEA. See Crimea.

KRIOUKOV, a town of Russia, in the gov. of Khersom, 27 m. NNE of Alexandria, on the r. bank of the Dnieper. Pop. 1,000.

KRISEI, a small island belonging to the Andreanov group, in the Aleutian archipelago, between Kiska and Amtchatka.

KRISHNA, or Kistnah, a river of Hindostan which rises on the E flanks of the Western Ghauts,

a little to the N of Mahabillysir, in the NW of Bijapur; skirts the Sattara territory; enters the territories of the Nizam; separates Bijapur and Hyderabad, and Hyderabad from the Balaghat and the Northern Circars; and flows into the gulf of Bengal, between Masulipatam and Nizampatan, by several mouths, of which the two principal are those which respectively pass Divy and Verdaporam. Its total course is about 650 m., generally in a direction from W to E, and between the parallels of 16° and 17° N. Its principal affluents on the r. are the Warner, Golpurba, Malpurba, and Tumbudra; and on the l. the Yairla, the Bimah, the Mossy, and the Over. Owing to the large accumulation of sand at its mouth, it is not navigable; and during the dry season a large portion of its bed is without water.

KRISHNAGURH, a fort in the Punjab, on the route from the Dub pass to Cashmere, 10 m. E of the Indus.

KRISUVILK, a village of Iceland, on the S coast of the district of Guldbringe, 18 m. S of Reykiavik.

KRIVAJA, a river of Bosnia, in the sanj. of Trawnik, which joins the Bosna on the r. bank, near Maglai, after a course from SE to NW of 68 m.

KRIVAN, a summit of the Carpathians, on the frontiers of Galicia and Hungary, 15 m. WNW of Kaysmark, in E long. 20° 12′. It has an alt. of 8,034 ft. See article CARPATHIANS.

KRIVIANSKAIA, a town of Russia, in the territory of the Don Cossacks, 3 m. SE of Novo-Cherkask.

KRIVICZE, a town of Russia, in the gov. of Minsk, 15 m. NNE of Vilcyka, on the r. bank of the Sewetch.

KRIVOCHIN, a town of Russia, in the gov. and 120 m. SE of Grodno.

KRIVOROGLIA, a town of Russia, in the territory of the Don Cossacks, 48 m. NNE of Kamenskaia, on the l. bank of the Kalitva.

KROBEN, a town of Prussia, in the reg. and 44 m. S of Posen. Pop. 985.

KROCZYCE, a town of Poland, in the obwodie and 21 m. N of Olkusz. Pop. 400.

KRŒPELIN, a town of Mecklenburg-Schwerin, 22 m. NE of Wismar. Pop. 1,200.

KROJANKE, a town of Prussian Poland, 24 m. SSW of Friedland, on the river Ghemin. Pop. 1,800. It has extensive breweries and distilleries.

KROKI, a town of Russia, in the gov. of Vilna, 50 m. N of Korono.

KROMAU, a town of Moravia, 18 m. NE of Znaym, on the l. bank of the Rokitna. Pop. 1,300. Potash is made here, and coal is wrought in the vicinity.

KROMBACH, a village of Bavarian Franconia, 42 m. NW of Wurzburg. Pop. 910.

KROMMENIE, a village of Holland, in N. Holland, 9 m. NNE of Haerlem. Pop. 1,700.

KROMMESTRAET, a commune of Belgium, in the prov. of W. Flanders, dep. of Steenhuyze-Wynhuyze. Pop. 154.

KROMOLOV, a town of Poland, in the obwodie and 15 m. N of Olkusz. Pop. 600.

KROMPACH, a town of Hungary, in the com. of Zips, 15 m. SE of Leutschau, on the r. bank of the Hornath.

KROMY, a small town of Russia, in the gov. and 16 m. S of Orel, on the Kroma. Pop. 2,000.

KRONACH, a town of Bavaria, 24 m. NNW of Baireuth, near the r. bank of the Rodach, at the foot of a mountain on which the castle of Rosenberg is built. It is surrounded by walls and ditches. Pop. 3,100. It has bleaching-fields, breweries, and iron-works.

KRONBERG, a town of Nassau, in the bail. of Konigstein, on the flank of the Taunus, at an alt. of 739 ft. Pop. 2,030. There are mineral springs here.

KRONBORG. See ELSINORE.

KRONE (DEUTSCH), a town of Prussia, in the reg. and 106 m. WSW of Marienwerder. Pop. 2,973. It has woollen factories, breweries, and distilleries.

KRONE (POLNISCH), a town of Prussia, in the prov. of Posen, circle and 12 m. N of Bromberg, on the Brahe. Pop. 2,233.

KRONECK, a strong castle of Styria, in the circle and 27 m. ESE of Grätz. It is finely situated, and contains many curious military relics.

KRONENBERG, a town of Prussia, in the reg. of Dusseldorf, 4 m. NE of Solingen. Pop. 578.

KRONENBURG, a town of Prussia, in the prov. of Bas-Rhin, reg. and 30 m. SE of Aix-la-Chapelle. Pop. 1,037.

KRONOEREN, an island in the gulf of Bothnia, off the E coast of Sweden, in N lat. 63° 26′. It is 6 m. in length, and 2½ m. in breadth.

KRONOTZKOE, a lake of Kamtchatka, 120 m. SW of Nijni Kamtchatka. It is about 20 m. in length, and 10 m. in breadth.

KRON PRIUS, an island off the W coast of Greenland, between Drico isle and Cape Chidley, in N lat. 68° 45′.

KRONSHAGEN, a village of Denmark, in the duchy of Holstein, to the W of Kiel.

KRONSTADT. See CRONSTADT.

KRONY, a town of Russia, in the gov. and 45 m. W of Vilna.

KROPELIN, a town of Mechlenburg-Schwerin, 18 m. NE of Wismar. Pop. 1,975. It has distilleries, breweries, pipe-manufactories, and tanneries.

KROPP, a large manufacturing village of Austrian Illyria, in Carniola, in the circle and 27 m. NW of Laibach, on a river of the same name, an affluent of the Save.

KROPPSTAD, a town of Prussia, in the reg. of Merseberg, 8 m. NE of Wittenberg. Pop. 752.

KROSNO, a town of Galicia, in the circle and 15 m. ESE of Jaslo, on the l. bank of the Wislok. Pop. 5,000. It is an entrepot for the wines of Hungary.

KROSSEN, an old town of Austrian Poland, in Galicia, in the circle of Jaslo, between the Wisloca and the Insiolda, 90 m. W of Lemberg.

KROTOSCHYN, a town of Prussian Poland, in the reg. of Posen, near the borders of Silesia, 28 m. W of Kalisch. It has manufactories of tobacco, leather, and linen, and a large trade in wool. Among its public edifices are a castle, a Catholic and a Lutheran church, and a synagogue. Pop. 6,750, of whom 1,500 are Jews.

KROTZINGEN, a large village of Baden, 9 m. SW of Freiburg, on the railway to Basle. Pop. 1,311.

In 1739, a battle was fought here between the Imperialists, commanded by Von Wallis, and the Turks, in which the Imperialists lost 5,700 men. At the same time a battle was fought between the flotillas of the two contending powers on the Danube, within a small distance from the town.

KROYA. See CROIA.

KRUCHAVATZ. See ALAJAH-HISSAR.

KRUDENBURG, a town of Prussia, in the reg. and 30 m. ESE of Cleves. Pop. 1,811.

KRUDOSEL, a village of Gilan, in Persia, 12 m. SE of Reshd.

KRUIMAU, a town of the archduchy of Austria, 12 m. SW of Horn, on the l. bank of the Kamp. Pop. 300.

KRUININGEN, a village of Holland, in the prov of Sieland, 6 m. ESE of Go'rs. Pop. 900.

KRULICH, or GRULICH, a small town of Bohemia, 82 m. E of Prague. Pop. 2,000.

KRUMAN, or KURUMANA, a river of S. Africa, which rises in the mountains of Magaaga to the SW of Lataku; and flows W; but appears to be lost in the sands.

KRUMBACH, a town of Bavaria, on a small river of the same name, 56 m. W of Munich. Pop. 850.—Also a town of the archd. of Austria, 21 m. S of Neustadt.

KRUMLAU, or KRUMAU, a town of Bohemia, on the Mulda, 12 m. NNW of Rosenberg. It is well-built and fortified, and has manufactories of woollen, paper, and saltpetre. It communicates with the Danube by a canal. Pop. 5,195. In the neighbourhood are the baths of Umlowitz.

KRUMMENAU, a large village of Switzerland, in the cant. of St. Gall, circle of Upper Toggemberg. Pop. with Ennetbuhl and New St. Johann, in 1850, 1,563, of whom 1,184 were Protestants.

KRUMMENDORF, a village of Prussia, in the reg. of Breslau, circle of Strehlen. Pop. 340.—Also a village in the reg. of Frankfort, circle of Zullichan. Pop. 319.—Also a village in the reg. of Gumbinnen, circle of Sensburg. Pop. 279.

KRUMMENSEE, a village of Prussia, in the reg. of Potsdam, circle of Nieder-Bornim. Pop. 169.—Also a village in the reg. of Marienwerder, circle of Schlochau. Pop. 280.

KRUMMENWALDE, or KRZYWYLAS, a village of Prussia, in the reg. of Posen, circle of Buk, near Pinne. Pop. 123.

KRUMMFLIETZ, a village of Prussia, in the reg. of Marienwerder, circle of Deutsch Krome, near Schneidemuhl. Pop. 421.—Also a village in the same reg., circle of Flatow. Pop. 293.

KRUMMHUBEL, a village of Prussia, in the reg. of Liegnitz, circle of Hirschborg, near Schmiedeborg. Pop. 525.

KRUMMLINDE, a village of Prussia, in the reg. of Liegnitz, circle of Luben. Pop. 215.

KRUMPACH, a village of Prussia, in the reg. of Breslau, circle of Trebnitz. Pop. 221.

KRUMWOHLAU, a village of Prussia, in the reg. of Breslau, circle of Wohlau. Pop. 469.

KRUPOCZYN, a village of Prussia, in the reg. of Marienwerder, circle of Schwetz. Pop. 173.

KRUPPINEN, a village of Prussia, in the reg. of Gumbinnen, circle of Lyk. Pop. 342.

KRUSCH, a village of Prussia, in the reg. of Marienwerder, circle of Schwetz. Pop. 231.

KRUSCHWITZ, a village of Prussia, in the reg. and 36 m. SE of Bromberg, on the W bank of Lake Goplo. Pop. 192.

KRUSENSTERN (CAPE), a headland on the NW coast of Russian America, in N lat. 67° 5′.

KRUSENSTERN ISLANDS, a group in the Mulgrave archipelago, in N lat. 10° 20′, E long. 169° 50′. They are small, and thinly inhabited. The two principal are Ailu and Capenuir.—Also a group in the Dangerous archipelago, in S lat. 15°.

KRUTE, a town of Russia, in the prov. or Podolia, 15 m. W of Balta.

KRUYENBERG, a commune of Belgium, in the prov. of W. Flanders, dep. of Berlaere. Pop. 198.

KRUYHERY, a commune of Belgium, in the prov. of Brabant, dep. of Wuestwuezel. Pop. 300.

KRUYSABEEL, a commune of Belgium, in the prov. of W. Flanders, dep. of Moorselle. Pop. 243.

KRUYSTRAET, a commune of Belgium, in the prov. of W. Flanders, dep. of Baesrode. Pop. 234.—Also a com. in the prov. of Antwerp, dep. of Calmpthout. Pop. 346.—Also a com. in the prov. of W. Flanders, dep. of Handzaeme. Pop. 145.—Also a com. in the prov. of W. Flanders, dep. of Wercken. Pop. 414.

KRYCZEV, a town of Russia, in the gov. and 57 m. ESE of Mohilev, on the r. bank of the Soj.

KRYLOV, a town of Russia, in the gov. of Kherson, 27 m. NNE of Alexandria, at the confluence of the Tiasmin and the Dnieper. Pop. 2,200.

KRYNKI, a town of Russia, in the gov. and 30 m. S of Grodno.

KRYSTIANPOL, a town of Galicia, in the circle and 24 m. NNE of Zolkiev, on the r. bank of the Zolokia.

KRZANOW, a town of Poland, 27 m. W of Cracow. Pop. 1,200.

KRZEPICE, a town of Poland, in the obwodie and 18 m. SSE of Wielun. Pop. 900.

KRZESSOWICE, a town of Poland, 15 m. WNW of Cracow, on the l. bank of the Rudawa. Pop. 3,000. It has mineral baths.

KRZESZOW, a town of Poland, in the obwodie and 50 m. SW of Zamosc. Pop. 1,000.

KRZINETZ, a town of Bohemia, in the circle of Bunzlau, 15 m. SE of Jung-Bunzlau. Pop. 600.

KRZIWSAUDOW, a town of Bohemia, in the circle and 24 m. SW of Czaslau. Pop. 450.

KRZIZANOWITZ, a town of Prussia, in the reg. and 48 m. SSE of Oppeln. It has iron-works.

KRZVZANAU, a town of Moravia, in the circle and 24 m. E of Iglau. Pop. 1,180. It has manufactories of fine woollens.

KRZYLOW, a town of Poland, in the obwodie and 12 m. SSE of Rubieszow, on the l. bank of the Bug. Pop. 800.

KRZYWCE, a town of Galicia, in the circle and 12 m. WNW of Przemysl, on the l. bank of the Sau.

KRZYWOCE, a town of Galicia, in the circle and 27 m. SE of Czortkow, on the l. bank of the Gygaula.

KSCHIONS, or XIONS, a town of Poland, in the reg. and 8 m. ESE of Posen, near the Warthe. Pop. 1,050.

KSIAZ, a town of Poland, in the gov. of Kielce, obwod. of Miechow. Pop. 860.

KSOJAMMA, a town of Japan, in the island of Nifon, 140 m. WSW of Jedo. Pop. 1,000.

KTIMA, a village in the island of Cyprus, sanj. of Baffa, near the town of Baffa. It was formerly a flourishing and important place, but does not now contain above 250 families.

KUARA, or GEZYRA, a prov. in the SE part of Nubia, extending, between the Rahad and Dender, to the frontier of Abyssinia. It is generally mountainous, but is unhealthy. The Shangallas and other neighbouring tribes carry on here a considerable trade in gold and other articles.

KUA-TU-CHAN, a mountain of the Corea, in the N part of the prov. of Hoang-hai, and to the E of Han-chu.

KUBA, a town of Russia in Asia, cap. of a khanate, in Southern Daghestan, 60 m. SSE of Derbend, on the r. bank of the Kudialchai. Pop. in 1844, 4,200. It is enclosed by a wall flanked with towers, and contains a castle, a bazaar, and 3 mosques. It is to a great extent new, and built in the Russian style, with straight streets. The inhabitants are chiefly Turkomans, and extremely poor. On the opposite side of the river is a large suburb named Kulgat, inhabited by Jews, estimated at 4,000 in number, and in the environs are numerous dwellings occupied by Armenians.—The khanate is bounded on the E by the Caspian sea, and extends SW to the Caucasus. It contains several mineral and thermal springs, and mines of lead and saltpetre. The climate is mild, and the pop., consisting of about 4,000 families, live chiefly by agriculture.—Also a town of Senegambia, in the state of Kullo, 45 m. E of Satadu.

KUBAD, a district of Persia, in the NW part of Farsistan. It has been little visited, the ferocity of the tribe Memessani or Khogilou, by whom it is inhabited, rendering it dangerous of approach. In the SE it encloses the delicious plain of Shaab-Bevan, celebrated by the orientals as one of the four terrestrial paradises. Its chief place is Kala-i-Sefid.

KUBAN, or Kubanskoi-liman, a bay on the NE side of the Black sea, enclosed by the Russian gov. of Caucasus, the district of Akbasia, and the Turkish territory of Anapa. It derives its name from the river which flows into it in the NE. It is 27 m. in length from NW to SE, and 9 m. in breadth, and opens to the Black sea by a narrow channel, at the N extremity of the tongue of land by which it is enclosed on the W.—The river K. or Psisshé has its source on the N slope of the Caucasus, near Mount Elbrouz; runs NNW through Circassia; then bends first NW, then W, along the frontier of the country of the Russian prov. of Caucasus; and, after a course of about 390 m., discharges itself into the bay of the same name, 24 m. E of Tmutarakan. In the lower parts of its course it divides into several branches, some of which flow directly into the Black sea, while others fall into the great basin of the Andeniskoi-liman. Its principal affluents are the Great and Little Zelenchuk, Ourup, Laba, Chagouta, and Kara-Kuban or Afips. This river in the upper part of its course is extremely rapid, but in the level country through which it passes, towards its mouth, its bed is choked with reeds, and spreads itself into extensive marshes, which in summer become extremely noxious. Its waters abound with fish of excellent quality. Numerous fortresses have been established by the Russians on the r. bank of the K., for their defence against the warlike tribes who inhabit its opposite side. Yekaterinodar is the chief place on its banks. The K. is the *Hypanis* of Strabo, and the *Vardanes* of Ptolemy.

KUBBANY, or Cubbany, a river of Hindostan, which has its source in the E side of the Western Ghauts, in the prov. of Malabar; flows thence into the prov. of Mysore; and after a total course, in a generally NE direction, of about 90 m., joins the Cavery, on the r. bank, a little below Sosilla, and 21 m. SE of Seringapatam.

KUBBES, Khubbes, or Kabis, a town of Persia, in the prov. and 170 m. NE of Kirman, and 140 m. ESE of Yezd, on the road from Kirman, and 18 days' travelling distance thence to Herat. It is situated in an oasis of the desert of Kirman, and was formerly very flourishing, but is now inhabited chiefly by exiles and brigands who find their subsistence in plundering the caravans in the desert.

KUBBET-CHEIAR, a town of Arabia, in Yemen, in the district of Kobail, 110 m. NNW of Sana.

KUBBUR-JABBAR, a village of Afghanistan, 30 m. ESE of Cabul.

KUBDO, a town of Mongolia, in the E part of the country of the Khalkas, on the E bank of Lake Buyanti, and 20 m. W of the Ike-Aral-nor, in N lat. 48° 8′, E long. 90° 2′.

KUBETCHI, a town of Russia in Europe, capital of a district, in the N part of Daghestan, in the khanate of Otemich, 33 m. WNW of Derbent, in a narrow valley. Pop. 6,000. The houses are embattled; each has an outer stair, and they all communicate with one another by means of narrow alleys. It contains 12 mosques, and possesses manufactories of cloth, shawls, and arms, and an active trade. The inhabitants are Mahommedans. They are supposed to be of German extraction, and their language, manners, and dress, appear to confirm that supposition. Their origin has, however, been attributed to a Persian colony.

KUBI, a village and fort of Russia in Asia, in the gov. of Georgia, district of Khevi, 45 m. NNE of Gori, and 66 m. NNW of Tiflis, in the range of the Caucasus mountains. It is inhabited by Ossetes.

KUBILYAK, a village of Croatia, in the comitat and 11 m. W of Agram, and 4 m. NE of Szamobor. In the vicinity is a mountain of the same name, containing mines of coal.

KUBIN, a village of Hungary, in the Banat-gränze, 27 m. ESE of Belgrade, and 2 m. from the l. bank of the Danube. Pop. 1,970. It has a Catholic and a Greek church, and carries on a considerable trade with Turkey.

KUBIN (Unter), a town of Hungary, chief town of the gsp. of Arva, 35 m. NNW of Briesen, and 40 m. WNW of Neumarkt, on the l. bank of the Waag.

KUBINA, a river of Russia in Europe, in the W part of the gov. of Vologda. It has its source in a small lake, in the district and 72 m. WSW of Velsk; runs first SE, then SW; and enters by two branches into Lake Kubinskoé, in the district and 30 m. WNW of Kadnikov, after a course of about 180 m.

KUBINSKOE′, a lake of Russia in Europe, near the SW extremity of the gov. of Vologda, between the districts of Vologda and Kadnikov, and a little to the NW of Vologda. Its length from NW to SE is about 45 m., and its breadth 8 m. It receives several rivers, of which the largest is the Kubina, and gives rise to the Sukhona, which unites with the Jug and forms the N. Dwina. It contains several islands, is very deep, and abounds in fish.

KUBKABEA, a town of Darfur, 38 m. SW of Cobbe.

KUBLICZ, a town of Russia in Europe, in the gov. of Podolia, district and 15 m. SE of Gaisin.

KUBLUCZI, a town of Russia in Europe, in the gov. and 78 m. W of Vitebsk, district and 30 m. NW of Lepel.

KUBORU, a town of Upper Guinea, in the state of Inta, Ashantee territory, 180 m. NE of Cumassi.

KUBOTA, a town of Japan, in the island of Nifon, and prov. of Dewa, 120 m. W of Nambu, and 285 m. N of Jedo.

KUBREC, a village in Sind, 90 m. SW of Umercote, and 8 m. from the Run or Salt desert of Cutch.

KUBRYN, a town of Russia in Europe, in the gov. and 114 m. S of Grodno, and 32 m. ENE of Brzesc-Litevski, on the l. bank of the Muchavica. It has a Greek abbey.

KUBSHARY, or Kabshary, a town of Sudan, in Bornu, 90 m. WNW of Kouka, on the l. bank of the Yeou, and about 100 m. WSW of Lake Tchad. The houses are more substantially built than those of Kuka, and are divided within by mats neatly wrought by the women. The doors are formed of plaited straw, set in a frame-work of wood. The dwellings of the richer inhabitants are surrounded with enclosures of matwork, and sometimes enclose a separate house for the women.

KUBUELIANSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, 14 m. S of Nijni-Tchirskaïa, on the r. bank of the Don.

KUBULA, a village in the Punjab, 90 m. E of Multan, and 8 m. from the r. bank of the Ghara.

KUBURMACH, a village of Afghanistan, in the prov. and 54 m. NNE of Herat, in the valley of the Huzareh mountains, and near the r. bank of the Kysar.

KUCHARKI, a village of Prussia, in Posen, SE of Pleszew. Pop. 150.

KU-CHE, a district and town of China, in the prov. of Ho-nan, div. of Kwang-chu.

KUCHEL, a town of the archduchy of Austria, in the country above the Ens, circle and 14 m. SSE of Salzburg, on the r. bank of the Salza. Pop. 560.

KUCHEN, a village of Würtemberg, in the circle of the Danube, on the Fils, SE of Göppingen. Pop. 1,050.—Also a village in the circle of the Jaxt, on the Egge, W of Neresheim. Pop. 430.

KUCHEN, a village of Afghanistan, 120 m. WNW of Nushky.

KUCHEN-ABAD, a small town of Persia, in Farsistan, district of Larsistan, 27 m. SW of Seid-Abad, near the confines of Kirman.

KUCHERETLI, a town of Hindostan, in the prov. of Allahabad, and district of Bundelcund, 39 m. SSW of Kallinger, near the source of the Marasson. It belongs to a petty chief, who is tributary to the English.

KUCHIMOCHI, a town of Japan, in the island of Kiou-siou, 180 m. E of Nagasaki.

KU-CHING, a district and town of China, in the prov. of Chih-le, div. of Ho-keën-fu, in N lat. 37° 29′, E long. 116° 16′.—Also a district and town in Chih-le, div. of Shun-teen-fu.

KUCHIRI, a village in Sind, 18 m. W of Tatta.

KUCHLAK, a town of Afghanistan, in the Pishin valley, 11 m. N of Shawl. It is a small place, and mud built.

KU-CHU-TING, a district and town of China, in the prov. of Kwei-chu, div. of Le-ping-fu.

KUCHVA, a river of Russia in Asia, in the gov. of Perm and district of Verkhoturie, which descends from the E side of the Ural mountains, traverses a small lake, and joins the Tura, on the r. at Turinsk, 54 m. SW of Verkhoturie, and after a course of about 18 m. Gold, platina, osmium, and iridium, are found in considerable quantities in its channel.

KUCHVINSK, a town of Russia in Asia, in the gov. of Perm, district and 57 m. SW of Verkhotourie, on the r. bank of the Kuchva, at the place where it issues from a small lake. Pop. 1,600. It has a large iron-work belonging to the crown.

KUD, a town of Turkey in Asia, in the pash. and 90 m. NW of Bosna, on the r. bank of the Euphrates. Rice is extensively cultivated in the environs.

KUDARINSK, a village and fortress—now in ruins—of Russia in Asia, in the gov. and 225 m. SE of Irkutsk, district and 72 m. SSE of Selinginsk, on the Chinese frontier, and on the r. bank of the Tchikoï.

KUDDAUNA, a town of Hindostan, in the prov. of Gujerat, 54 m. ENE of Ahmedabad, on the l. bank of the Mhye.

KUDDE (Gross and Klein), two villages in Prussia, in Pomerania, E of Neu-Stettin, containing respectively 600 and 300 inhabitants.

KUDDIN, a village in Sind, on a branch of the Indus, and on the road from Hyderabad to Cutch.

KUDDON, a river of Prussia, in the regency of Marienwerder, an affluent of the Netz.

KUDEKERKE, a village of Holland, in the prov. of Sieland, arrond. and 8 m. WNW of Zierikzi, and 15 m. NNE of Middelborg, in the island of Schonwen. Pop. 1,200.

KUDELSTAART, a village of Holland, in the N part of the prov. of Holland, 11 m. SSW of Amsterdam. Pop. 2,013.

KUDESSI, a town of Turkey in Europe, in the sanj. and 14 m. N of Valona, near the r. bank of the Voïotza, near the ruins of Apollonia, and 3 m. from the shore of the Adriatic.

KUDESSI-GREOTES, a small town of Turkey in Europe, in the sanj. and 11 m. ESE of Valona, on the l. bank of the Suchitza.

KUDIA, a headland and bay on the S coast of the island of Lemnos.—Also a village of Tripoli, on the shore of the Great Syrtis.

KUDJUR, a district of Persia, in the W part of the prov. of Mazenderan, on the S bank of the Caspian sea.

KUDOWA, a village of Prussia, in Silesia, in the circle of Breslau, W of Glatz. Pop. 280. It has several iron-works and mineral springs.

KUDRYNCE, a town of Galicia, in the circle and 36 m. SE of Czortkow, and 27 m. NNE of Tschernowitz, on the r. bank of the Niczlawa.

KUDSBURG, a town of Senegambia, in the kingdom of Bondo, on the Nerico, 45 m. SW of Kursan, and 405 m. ESE of St. Louis.

KUDZBORK, a town of Poland, in the gov. of Plock, obwod and 40 m. NNE of Mlawa, on the Przelipmia.

KUEIK, Koweik, or Khoick, a river of Asiatic Turkey, in the pash. of Aleppo, which rises near Aintab, passes Aleppo, and loses itself in the marshes of El-Melak, after a course of 90 m. from NE to SW. It is the *Chalus* of Xenophon.

KUERGAELA, a well on the Asiatic side of the gulf of Suez, at the foot of a hill 2 m. SE of Suez. Its waters are slightly brackish, but never fail; and the spring has formed a basin 30 ft. in circumf. at its mouth. At the distance of 1½ m. are 15 other springs of brackish water in the vicinity of each other, and known as 'the fountains of Moses.'—*Rochet.*

KUEYT, Koete, Grane, or Quade, a town and port of Arabia, on a bay near the NW extremity of the Persian gulf, 96 m. S of Bosra, and 330 m. NNE of Derraya, on the border of an extensive plain. Pop. about 10,000. It is enclosed by a wall, and defended by an old fortress. It possesses extensive manufactories of a species of handkerchief named *abbas*, and carries on an active trade with Persia and India. The harbour comprises an embrasure of about 60 m., and affords good and safe anchorage. Overland despatches to India are received here for transmission to their destination.

KUFA, a ruined city of Asiatic Turkey, in Irak-Arabi, once large and populous, founded by Omar after the ruin of Ctesiphon, and the residence of the caliphs till the seat of government was removed to Bagdad. It is 4 m. N of Meshed-Ali.

KUFSTEIN, a small town in the Tyrol, on the r. bank of the Inn, 43 m. ENE of Inspruck. Pop. 1,406.

KUFT, or Koft, an ancient city of Upper Egypt, anciently called *Coptos*, near the E bank of the Nile, in N lat. 25° 50′. During the time of the Ptolemies, C. was the great emporium of Egyptian commerce. The productions of Lower Egypt and of Europe being brought up the Nile, were here landed, and conveyed by land to Berenice on the coast of the Red sea. It became still more flourishing under the Roman empire, when an extensive communication with India was opened by this channel. In the early ages of Christianity, C. was distinguished by the number of its convents. It thus incurred the resentment of Diocletian, and raising the standard of rebellion, was taken and reduced to ashes. The original city was never afterwards inhabited, but an Arab town was built in its immediate vicinity, adjacent to which a modern village has since been erected. The ruins of the ancient city destroyed by Diocletian, remain nearly in the same state in which they were left by the fire. They exhibit splendid fragments of porphyry and granite columns, the art of which, however, is not equal to the materials. The Arab town is surrounded with a wall of unbaked bricks. To the E of the old town are two large basins, which appear to have been reservoirs of water.

KUG, a village of Holland, in the prov. of North Holland, and district of Zaandam, 8 m. NNW of Amsterdam, on the l. bank of the Zaan. Pop. 1,700

KUH-CHING, a district and town of China, in

the prov. of Hu-pih, div. and 30 m. NW of Siang-yang-fu, on the r. bank of the Han-keang, in N lat. 32° 18′, and E long. 111° 40′.

KUHEBACH, a town of Bavaria, 18 m. NE of Augsburg, near the Paar. Pop. 512.

KUHLSHEIM, a village of Baden, in the bail. and 6 m. NW of Bischoffsheim. Pop. 1,900.

KUHNA, a town of Prussia, in the reg. and 60 m. W of Liegnitz, circle of Görlitz. Pop. 1,000.

KUHNEIDE, a village of Saxony, in the bail. and 10 m. ESE of Wolkenstein.

KUIALNIK (Great), a river of Russia, in the gov. of Kherson, which rises to the E of Kyroposka; runs SSE; and flows into a lake of the same name communicating with the Black sea, after a course of 60 m.

KUIALNIK (Middle), a river of Russia, in the gov. of Kherson, which rises nearly parallel to the Great K.; receives a stream known as the Little K.; and flows into Lake Gadjibeyskoi, after a course of 54 m.

KUIK, a town of Holland, in the prov. of N. Brabant, 24 m. E of Bois-le-Duc, on the l. bank of the Meuse. Pop. 1,150.

KUILENBURG, or Kulenburg, a town of Holland, in Guelderland, 9 m. NW of Thiel, on the l. bank of the Lech. It has important manufactories of arms and of silk ribbands.

KUINDER, a river of Holland, which rises in Friesland; runs WSW, and receives the Linde in the prov. of Overyssel; and throws itself into the Zuyder-Zee, at the town of Kuinder, after a course of 36 m.—Also a town of Holland, in the prov. of Overyssel, 9 m. NNW of Wollenhoven. Pop. 650.

KUINUC, a village of Asiatic Turkey, 20 m. N of Eskishehr.

KUJANOSKI, a town of Japan, in the island of Kiou-siou, 90 m. NE of Nagasaki.

KUJAR, a town of Western Africa, on the frontier of Wulli, 54 m. E of Medina.

KUKA, a large town of Bornu, in Central Africa, in N lat. 12° 55′, E long. 13° 22′, at an alt. of 900 ft. above sea-level, and 50 ft. above Lake Tsad or Chad, according to Vogel who visited it in 1853.

KUKA. See Dar-Kuka.

KUKERPEH, a town of Asiatic Turkey, 32 m. W of Boli.

KUKHVA, a river of Russia, which rises near Liutsyn, in the gov. of Vitebsk, and flows NE to the Velikaia, which it joins on the l. bank, 9 m. W of Ostrov.

KUKIWARI, the principal mouth of the great eastern deltoid branch of the Indus, in N lat. 24° 2′, E long. 67° 32′.

KUKIZOW, a town of Galicia, in the circle and 15 m. SE of Zolkiew.

KUKU, a country of Central Africa, reported as great and flourishing by the Arabian geographers of the 11th and 12th cents. They describe it as placed in the position or immediately to the E of the modern kingdom of Bornu.

KUKUFU, a town of Upper Guinea, 18 m. S of Cumassie.

KUKULLO. See Kockelburg.

KUKUS, a town of Bohemia, in the circle and 12 m. NNE of Königingratz, on the l. bank of the Elbe.

KULA, a town of Hungary, in the com. of Bacs, on the Francis canal. Pop. 7,330.

KULAIRI, a branch of the Indus, in Sind, which takes its departure from the main stream at a point 3 m. E of Tatta, and flows first N, then W, and then S; and probably rejoins the Indus below Tatta.

KULAL, an island of the Caspian sea, to the NW of the Sviatoi isles, near the mouth of the gulf of Kottshak-Kultiuk. It is 20 m. in length from N to S, and about 3 m. in breadth.

KULAN-KOHE, a fort of Sind, near the r. bank of the Buggar, in N lat. 24° 42′, E long. 67° 56′.

KULASSIAH, a small low island in the Sulu archipelago.

KULATI, an island in the sea of Marmora, to the NW of Rabbi, attached to the sanjak of Bega. It is about 3 m. in length, and inhabited by Greek fishermen.

KULAZKOWCE, a town of Galicia, in the circle and 9 m. ENE of Kolomea, on an affluent of the Pruth.

KULE, a town of Russia, in the gov. of Wilna, 24 m. WSW of Telsze.

KULEI-HISSAR, a large and flourishing town of Turkey in Asia, in the pash. and 80 m. NE of Sivas, in the sanjak and 35 m. W of Kara-hissar, on the Khelki, at the foot of a steep mountain which is crowned by a fort. It contains numerous fountains. In the environs are numerous villages and hamlets, interspersed with vineyards and gardens.

KULER, a village of Van Buren co., in the state of Michigan, U. S. Pop. 126.

KULI-DERIA, a great salt lake in the desert of Khaurism, in Independent Tartary, connected with the gulf of Kara-Boghaz in the Caspian. It is intersected by the parallel of 41° 20′ N.

KULÍ-DRÚG, a town of Hindostan, in the prov. of Mysore, 12 m. SE of Bednore. Pop. 1,800.

KULIGAM, a town of Cashmere, near the l. bank of the Jelum, in N lat. 33° 37′.—Also a village of Cashmere, at the head of the Lolab, a tributary of the Jelum, in N lat. 34° 30′.

KULIKONO, a town of Bambarra, on the Niger, 130 m. SW of Sego.

KULIKOVO-POLE, a vast plain of Russia, in the gov. of Tula, extending from the sources of the Upa and the Zucha to the Don, and traversed by the Nepriadoa.

KULIKOW, a town of Galicia, in the circle and 7 m. SE of Zolkiew.

KULKUNDA, a small town of Hindostan, in the prov. of Agra, 17 m. S of Jalun.

KULLA. See Dar-kulla.

KULLEMOYE, a commune of Belgium, in the prov. of E. Flanders, dep. of Nazareth. Pop. 164.

KULLSTADT, a town of Prussian Saxony, in the reg. of Erfurt, circle and 9 m. NW of Mulhausen. Pop. 1,750.

KULM, or Chlum, a town of Bohemia, in the circle and 18 m. NW of Leitmeritz. Pop. 620. A fierce battle was fought here on 30th August 1813, between the Allied forces and the French.

KULM. See Culm.

KULM (Unter), a village of Switzerland, in the cant. of Aargau, 6 m. SSE of Arau. Pop. 1,740.

KULMBACH. See Culmbach.

KULMINGE, a group of islands at the entrance of the gulf of Bothnia, off the W coast of Finland, in N lat. 60° 16′.

KULMSEE, a town of Prussia, in the reg. of Marienwerder, circle of Thorn, upon the small lake of Kulm. Pop. 1,372.

KULON-NOR, or Dalai, a lake of Chinese Tartary, into which the Kerlon and Khalka rivers run, and out of which issues the Argun. It extends from 48° 45′ to 49° 26′ N lat.; and is about 46 m. long from SW to NE, by one-half in breadth. Towards the NE it is hidden for much the greater part by mountains, so that Gerbillon only saw its SW extremity, where it was "so shallow that one might wade 4 Chinese furlongs and not find above 3 ft. water." The shores of the lake at the SW end are barren and sandy, without herbage, except a species of tufty

herb, of which the camels are very fond. The K. is called by the Tartars Argun-Dalai, or 'the sea of the Argun.' The Western or Mahommedan historians, from ignorance of the Mongolian language, in which the term *nor* or *noor* signifies 'a lake,' identifying this word with *nauir* or *nahar*, 'a river,' in the Hebrew, Arabic, and other kindred languages, have converted the Kulon-Nor into Collanawer, and the Piur Nor into Biurnawer, thus making them both rivers instead of lakes. In this way the lake of K. has been confounded with the Tula by the authors of the *Modern Universal History*. The nomadic hordes who encamped on the borders of these two lakes and the streams nigh or connected with them, were denominated the Su Mongols and Water Tartars, by the Western historians, in opposition to those who wandered in the dry and thirsty plains of the Shamo.

KULPA. See CULPA.

KULPSVILLE, a village in Montgomery co., in Pennsylvania, U. S., 95 m. E of Harrisburg.

KULSHEIM, a village of Baden, in the bail. and 8 m. NW of Bischofsheim, on the Tomber. Pop. 2,046.

KULTE, a town of the German principality of Waldeck, 12 m. N of Waldeck, on the l. bank of the Twiste. Pop. 7,440.

KULUBAL, a creek of New South Wales, intersecting the Australian Agricultural company's estate in Liverpool plains.

KUM, or CHOANA, a city of Persia, in the prov. of Irak-Ajemi, 120 m. NNW of Ispahan, on the r. bank of the Kumrud. It was formerly a very flourishing place, but was sacked by the Afghans in 1722, and has never recovered its ancient prosperity. Its pop., however, has been estimated at 15,000.

KUMA, or TEREK, a river of Russia, which rises in the Kuban range, in N lat. 43° 45′, 15 m. SW of the fortress of Ashantuk, near the centre of Circassia; runs NE and then E, passing Georgievsk, where it receives the Podkumok, a larger stream than itself; again turns NE to Sviatago-Kresta, where, in about N lat. 44° 50′, it bends E; and after skirting the S frontier of the gov. of Astrakhan, which it divides from the steppes of the Kara-Nogaies, flows into the Caspian by three embouchures, after a course of 250 m.

KUMADE, a town of Japan, on the island of Nifon, 21 m. NNE of Muko.

KUM-ADIYEH, a town of Central Egypt, in the prov. and 15 m. N of Benisuef, on the l. bank of the Nile.

KUMAKAIMALONG, a district of Upper Guinea, on the Gabon coast, between the Munda and the Ogowaa, in about 4° N lat., and 14° 20′ E long.

KUMANIEN (GROSS), or NAGY-KUNSAG, an administrative and privileged district of Hungary, composed of three separate portions, the largest of which lies between the com. of Heves, and those of Bekesch and Szabolcz, and whose united area amounts to 20 German sq. m. Pop. in 1837, 54,726, of whom five-sixths are Calvinists. Its chief town is Felegyhaza.

KUMANIEN (KLEIN), or KIS-KUNSAG, an administrative and privileged district of Hungary, composed of five separate portions, the largest of which lies between the coms. of Czongrad, Bacs, and Pesth. It has an area of 47·8 German sq. m. Pop. in 1837, 70,855, of whom one-half are Catholics. Its cap. is Jasz-Bereny.

KUMANO, a town of Japan, on the island of Nifon, 90 m. WNW of Meaco.

KUMAON, or KEMAON, a district of Northern Hindostan, lying between the parallels of 29° and 31° N, and the meridians of 78° and 81°; and having the Himalaya range on the NE; Nepal on the SE; the prov. of Delhi on the SW; and Independent Gurwhal on the NE. As regulated since the British conquest, in 1815, this district comprehends the whole tract of country between the Alaknanda head-stream of the Ganges on the W, and the Kali or Sarda on the E, from the Tarai or plains to the highest pinnacles of the Himalayas: forming a four-sided figure, extending about 90 m. in each direction, and the surface of which ascends from the SW frontier to the extreme NE, where, on the ridge of the Himalaya, it attains an alt. of 26,000 ft. above sea-level. As a British possession it forms an integral part of the prov. of Delhi. It is important as commanding some of the best passes across the Himalaya; and it contains mines of copper, and probably other metals. From the Ganges at Hurdwar, or, eastward, but bending a little to the S in the middle, to the Kali branch of the Gogra, a distance of about 100 m., may be considered as the termination of the plains of the Rohilcund district of Delhi; and from this line the ground begins to ascend, and is covered with thick brushwood, at first interspersed with marshes. After a little ascent, the trees are of larger size, though still of the same species with those that are found on the plain. As the ascent is continued, tropical vegetation begins to disappear; the rhododendron and its associates become the bushes; the oak and the pine the trees; the flowering plants and scandent epidendra give place to ferns, mosses, and lichens; and the brakes are filled with wild raspberries, barberries, brambles, thorns, and briars, intermixed with hollies, willows, wild pears, and mulberries, according to the nature of the soil. The larger annual plants are various kinds of nettles and thistles; and the whole has much of the character of a tangled wild in Europe. This begins to be the prominent character at an elevation of between 2,000 and 3,000 ft.; and above 3,000 ft. it is general for a limited height. Those trees at last become few, and the prevailing class is the pine, of which there are several species. As the ascent continues, the pines become fewer, and are found only in straggling clumps, and of stunted dimensions; while, just as we would expect upon the mountains of Norway or Scotland, the birch, gradually changing to the dwarf species, is the last tree, and moss and lichen the only vegetation near the snow. The tiger is mentioned as being abundant in this upland country, and found even near the snow; but the probability is, that the animal taken for the tiger may have been some other of the feline race better adapted to the rigour of the climate. Wheat and other dry grains are grown, and a little rice. The cultivation of wheat is extended to an alt. of 11,000 ft. above sea-level in the valleys that lie between the great snowy peaks and the watershed behind them; but on the ranges to the S of these, it is not carried above 8,000 ft., and seldom above 5,000 ft. Hemp is raised in large quantities, and a little cotton is produced. The breed of cattle is small. Camels are kept, but goats and sheep are largely used for the carrying of goods.—Copper, iron, and lead are wrought.—The chief manufactures are blankets, coarse hempen cloth and cottons, and bamboo mats and baskets. A large proportion of the pop. find employment in transporting, either as merchants or mere carriers, the iron, copper, ginger, turmeric, and drugs of the higher districts of Hindostan into the lower; and exchanging the products of India for the musk, wax, incense, drugs, borax, salt, and gold-dust of Tibet and Tartary.—The whole region of K. is but thinly peopled. Nine-tenths are Khasiyas, speaking a Hindu dialect, and in their general manners and customs strongly assimilating to Hindus. The N skirts of the country are inhabited by Bhotiyas of Tibetan origin.—Its cap. is Almorah.

Tea culture.] Considerable hopes are entertained that the tea plant will be found capable of successful cultivation in this region of India, where it is thought the climate will be found perfectly suited to the habits of this plant. In 1836 a beginning was made by the formation of tea plantations, on a small scale, at Hawalbagh. At the end of 1838 some of the plants flowered and ripened their seeds, which were both sown, and cuttings made, so that the plantations were much extended. In 1842, some Chinese tea-manufacturers who had been in Assam were sent to K.; and in the autumn of that year some tea was prepared by them from the above plants. This tea was considered in Calcutta worth 2s. 6d. per lb., and in London was pronounced to be of the "Oolong souchong kind, fine flavoured and strong, equal to the superior black teas generally sent as presents." The culture and manufacture have since then been carried on with energy and judgment by the present superintendent, Dr. Jameson, who in 1844 had 100,000 plants growing in the nurseries. In 1846 these had been extended to 176 acres, and the plant was thriving over 4° of lat. and 3° of long., at elevations varying from 2,500 to 6,500 ft. In 1848 the cultivation covered 1,000 acres, and was extended to the Beas valley and the hilly country near Kangra, that is, in the newly-acquired Sikh territories. The subject was warmly taken up by Lord Hardinge, and the Indian government authorized an outlay to the extent of £10,000 a-year. The manufacture continued to be carried on, and the tea sold on the spot in 1847 for 9-4 rupees to 10 8 rupees a seer, that is above 9s. and 10s. a lb. for the green; and the black at from 4s. to 7s. a lb. Since then the sales have continued to be nearly as good, the inferior qualities being taken across the passes of the frontier into Tibet, that is into territories under the dominion of the Chinese, where it successfully contends with the teas which are brought there from China; and if the importation of British tea be not prohibited by the Chinese government, the markets of Ladakh and Gurtokh will ere long be supplied from our provinces! When the price of this tea falls —as it assuredly will do the moment the plantations yield a sufficiently large quantity—to 2 rupees or 3 rupees per seer, the article must in a great measure supersede that from China; and when the hill-plantations, instead of consisting of thousands of acres, are increased to hundreds of thousands, the price will reach its minimum, as the expense of cultivation is trifling when compared to the manufacture, and labour is cheap in this country.

KUMBALIA, KHUMMALEA, or SURYA, a town of Hindostan, in the prov. of Gujerat, district of Hallar, 36 m. WSW of Noanagur, 45 m. E of Dwaraca, and about 6 m. from the S bank of the gulf of Cutch, in N lat. 22° 12′, E long. 69° 46′. It is defended by ramparts with bastions, and is well-built. A small but navigable river runs through it, and affords considerable facilities for trade. The inhabitants, who are numerous, are chiefly Gogla Brahmins.

KUMBANDI, a town of Senegambia, in the kingdom of Fuladu, 12 m. E of Kouna.

KUMBAY, a district of Upper Guinea, on the Gabun coast, near the mouth of the river Danger.

KUMBHAURI, a town of Hindostan, in the prov. and 66 m. W of Aurungabad, district and 60 m. NNE of Singamnere, on the l. bank of the Godvery.

KUMBIYAT, a station and well in Tartary, near the S confines of the desert of Gorlentse, and about 12 m. NE of the confluence of the Jan Daria with the sea of Aral.

KUMBUR, a town of Sind, 12 m. W of Larkhana, and on the road thence to Gundava. It is of considerable extent, and is well supplied with water.

KUMBURGAS, a populous village of Turkey in Europe, in Rumelia, in the sanj. of Gallipoli, 27 m. W of Constantinople, on the shore of the sea of Marmara.

KUMCHATSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, 102 m. ENE of Novo-Tcherkask, on the r. bank of the Don.

KUME′, a town of Japan, in the island of Sikoko, prov. of Ijo, 108 m. SW of Ava.

KUMI, a bay of Greece, on the E coast of the island of Negropont, to the S of Cape Kili. It is about 26 m. in breadth. On its shore is a village of the same name, at the mouth of a river, also called Kumi, which descends from the SE side of Mount Delphi, and has a total course of about 20 m.—Also a town of Senegambia, near the E confines of the state of Manding, and 25 m. NW of Bammaku.

KUMI, or KOUNE, an island in the N. Pacific, in the group of the Majicosimah islands, 96 m. from the E coast of the island of Formosa, in N lat. 24° 25′, E long. 122° 50′. It is represented by La Perouse as populous and well-cultivated, especially towards the W. The inhabitants appear to be a mongrel race between the Chinese and Japanese. Their dress consists of calico drawers, and a species of smock. They roll up the hair on the top of the head, and fasten it with a long pin. A poniard forms a constant appurtenance to the person. They construct canoes, but exhibit little dexterity in their management.

KUMIKUMI, a town of Senegambia, in the state of Manding, 30 m. NW of Bammaku.

KUMLA, a haerad of Sweden, in the S part of the prefecture of Œrebro. It contains a parish and village of the same name.

KUMLA GURH, or FOOL'S FORTRESS, a range of strongholds in the Punjab, in N lat. 31° 41′, E long. 76° 37′, on the r. bank of the Beas. They stand on the peaked summits of a mountain-range, about 8 m. long, and 5 m. broad, and are surrounded by ravines which descend perpendicularly to the depth of from 80 to 150 ft. The principal fortress is on an isolated rock, rising 150 ft. above the neighbouring peaks, and 1,500 ft. above the level of the Beas.

KUMLIKOI, a village of Turkey in Europe, in Macedonia, in the sanj. of Salonica, on the Vardar, NE of Vodina.

KUMLINGE, an island of the Baltic, to the E of the Aland islands.

KUMMARA, a village in Bhawlpur, 70 m. NE of the town of that name, on the l. bank of the Gharra.

KUMMER, a village of Bohemia, in the circle of Bunzlau, 17 m. NNW of Jung-Bunzlau, on the S side of a lake of the same name. It has some iron-works. The lake is 14 m. N of Saatz. It is 2 m. in length, and about 1½ m. in breadth.—Also a village of Afghanistan, 40 m. SE of Peshawur, on the r. bank of the Indus.

KUMMEROW, a village of Prussia, in Pomerania, on the confines of the duchy of Mecklenburg. Pop. 300.

KUMMISA-KA-GOTE, a village in Sind, 6 m. W of Subzulcote, on the road thence to Shikarpur, and about 7 m. from the l. bank of the Indus.

KUMO, a river of Russia in Europe, in Finland, in the gov. of Abo. It issues from the S extremity of Lake Kulovasi; runs first S, then W; waters the N part of the district of Wemo; and, after a total course of about 102 m., throws itself into the gulf of Bothnia, by an estuary 15 m. in length, and 5 m. in medium breadth. On its l. bank, 27 m. SE of Biorneborg, and 60 m. N of Abo, is a v. of the same name.

KUMPULUSANY, a village of Turkey in Europe, in Upper Wallachia, S of Tergovist.

KUMRI (JEBEL EL), MOUNTAINS OF DONGA, or MOUNTAINS OF THE MOON, a chain of mountains in Central Africa, to the SE of Nigritia, to the S of Darfur and of Donga, extending from the Joliba on the W, by which it is separated from the Kong mountains, to the mountains of Abyssinia on the E. Their highest summits are said to rise above the snow-line. Numerous streams have their source in this chain, and considerable evidence now appears that the Bahr-el-Abiad or White Nile is amongst that number. This chain was known to the ancients, and is noticed by Ptolemy, under the appellation, Mountain of the Moon, a translation of the Arabian Jebel-el-Kumri or Gebel-el-Quamar. It is said to abound in iron. Gold is found in the streams which descend from its sides.

KUMRUD, a river of Persia, in Irak-Ajemi, which issues from the E side of the Karaghaz mountains.

KUMSHAH, a town of Persia, in Irak-Ajemi, 50 m. SSE of Ispahan, and 170 m. NNW of Shiraz, in a valley, commanded on the S by Mount Domla.

Pop. 4,000. It is enclosed with embattled walls of rectangular outline, and contains several watercourses. It has some shops, but its bazaars have been allowed to fall into decay, and the entire place presents little more than a scene of desolation. K. is supposed to occupy the site of the *Obroatis* of Ptolemy. Before the invasion of the Afghans it was a town of considerable importance.

KUMUKS, a people of Tartar origin, who inhabit the N part of Daghestan, and a portion of Eastern Circassia, extending between the Terek and Koisu. They carry on trade to some extent with the Armenians.

KUMULNERE, a fortress of Hindostan, in the prov. of Ajmir, 42 m. NW of Odeypur.

KUMUR, a village of Afghanistan, 18 m. SW of Kala-Bagh, on the road thence to Dera Ismail Khan, on a branch of and 3 m. from the W bank of the Indus.

KUMYLJENSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, and district of Khoper, 17 m. SSE of Fedosierevskaia, on the l. bank of the Konouilga.

KUNASHIR, an island of the N. Pacific, in the group of the Kurile islands, to the NE of the island of Jesso, and SW of that of Iturup, from which it is separated by the strait of St. Anthony's peak. It is 78 m. in length from NE to SW, and 18 m. in breadth, and comprises a superficies of 330 m. On its SW side is Treason bay, which forms an excellent port, and on which is the largest establishment belonging to the Japanese in the Kurile archipelago. The centre of the island is covered with woody mountains, of which the loftiest is Anthony's peak, towards the N. Amid these mountains are some fine level tracts, watered by streams and lakes of the purest water, and abounding with fish. Otters, black bears, and foxes are numerous; and on the S coast are extensive pearl-oyster beds. The Russians have also a fort on the island. The total number of its inhabitants does not exceed 200.

KUNAWUR, or KURPA, a district of Northern Hindostan, which lies on both banks of the Sutledge, from 31° 15′ to 32° 4′ N lat., and from 77° 50′ to 78° 50′ E long. It stretches in a NE and SW direction; and is terminated on the NW and N by mountains covered with perpetual snow, and rising from 18,000 to 20,000 ft. above sea-level, separating it from Ladak; on the E it is divided from Chinese Tartary by a lofty ridge through which are several passes; on the S it has a lofty range of the Himalaya, almost equal in height to that on the N; and on the W lies Dusow, one of the divisions of Besahur. It is a secluded region, rugged and mountainous to such a degree that its habitable portion seldom exceeds 8 m. in breadth, and elevated from 10,000 to 20,000 ft. above sea-level. Its area, calculating from the crest of the snowy range, appears to be about 2,100 sq. m.; and its pop. has been estimated at about 10,000. "The upper parts of K.," says Captain Gerard, "especially Hungrung, together with Chinese Tartary and Ladak, are arid in the extreme, and present a scene of desolation scarcely to be credited, unless by a person who has visited the country. The mountains are either granite, limestone, or clay slate of a crumbling nature, forming gradual swellings of gravel, and very rarely ending in peaks. What a striking contrast there is between this extraordinary country and the lower tracts! Here seems to reign perpetual solitude, never disturbed by the crash of falling rocks. There is no stupendous scenery to attract the eye of the traveller; no bold crags, nor dusky woods of waving pines; no finely shaded grottoes, nor romantic valleys flanked by mural ramparts of granite, and scarcely a vestige of culture;—all is a frightful extent of barrenness, with no interesting object to diversify the scene. Elevated plains and undulating hills extend as far as the eye can reach; and in Tartary a person may travel for many days without meeting with a habitation. A solitary village, with a few scanty fields of wheat, barley, and ooa, fenced with gooseberries, and some poplars that are planted for the sake of their leaves, which are given to cattle; or, what is more common, an encampment of Tartar shepherds, with their black tents and flocks, but seldom interrupts the prospect; all else is a dreary waste, without a single tree, or even bush above a few inches in height. Beds of several sorts of prickly shrubs, like furze, vegetate here and there, which give some parts of the country the appearance of a Highland heath, and strongly remind a Scotchman of his native land. In summer, the yellow bloom of the furze partially enlivens the view; but in October every particle of vegetation is parched up, the leaves of the plants are reduced to powder, and the naked stalks, which are perfectly black, look as having been burnt with fire; the earth is often rent into small fissures, and no verdure is seen. In some places, 3,000 and 4,000 ft. above the beds of rivers, the face of the country has the appearance of having been under water; there are heaps of rubble, decomposed felspar, and pebbles embedded in clay and limestone. I never met with shells of any kind, but found ammonites at 16,300 ft." The valleys which extend into the Himalaya are, however, particularly beautiful; and the scenery of the valley of the Sutledge is magnificent, and often highly picturesque. Here, in the vicinity of Ridung, the surface is clothed with smiling fields and flourishing vineyards.

The climate is very variable,—ranging from the heat of the torrid zone to the temp. of a Lapland winter. Captain Gerard once experienced a transition from 33° to 109° in a distance of 13 or 14 m., and nearly at the same hour of the day in both places. March, April, and May are the spring months; June, July, and August form part of summer. The latter end of August, September, and October are the autumnal months. Snow falls in September, and lies generally till April. At the greatest altitudes there is scarcely either spring or summer. July and August are considered to be the hottest months; during this season the mean temp. at 16,000 ft. is 44° or 45°. The month of October is dreaded by travellers in the higher regions, as at this time chilling winds blow with irresistible fury over the bleak mountains, and often freeze to death those who cannot find shelter from their influence. "In the interior, at 9,000 and 10,000 ft., snow is scarcely ever above a foot in depth; and at 12,000, it is very rarely 2 ft.; although, nearer the outer range, 4 or 5 ft. are usual at heights of 7,000 or 8,000 ft. When Hindostan is deluged for three months, the upper parts of K. are refreshed by partial light showers; and, with the exception of the valley of the Buspa, the periodical rains do not extend farther to the E than long. 77°. In these months, the few clouds that pass over the Himalaya are attracted by the lofty mountains, and form a pretty regular belt at 16,000 and 18,000 ft., above which the chain of snowy summits protrudes its sharp points. In summer, from the reverberation of the solar rays, the heat in the bed of the Sutluj, and other large streams, is oppressive, and quite sufficient to bring to maturity grapes of a delicious flavour, of which raisins, and two kinds of spirituous liquor, are made. In July and August, even at the highest places, the sun's force is powerful; at 16,000 and 18,000 ft. we always found an umbrella necessary; and at Neebrung pass, the thermometer, lying on the ground for a few minutes, rose to 105° in the sun, although the temp. of the wind at the same

time was only 33°." At heights of 16,000 ft. the winds were always from the W or SW. The enclosures for the cattle, erected of loose stones, have always the W side highest. At this season the wind is perfectly devoid of moisture, and its extreme aridity is such that it parches up every thing exposed to it.

The only land fitted for agricultural purposes, with the exception of the strip along the Sutledge, is found in narrow slips along the brink of the mountain. The grain-crops are scanty and precarious; and horse-chestnuts dried and ground into flour are often used as a substitute. Apricots and walnuts likewise constitute important articles of subsistence. The domestic animals are horses, cows, sheep, goats, asses, mules, hogs, dogs, and cats. In the higher regions, cows are rare; but their place is supplied by yaks, and by a cross-breed between them and the cow. The dogs are of a large ferocious breed, and are covered with a black wool, which in fineness is almost equal to shawl-wool. There is a species of animal resembling a dog, called *chungku* or *mangsa*, which hunts in packs the deer and flocks, and commits great destruction.

The natives of K. are generally of dark complexion but good-looking. They are represented as being frank, active, generous, hospitable, and highly honourable in their dealings. They are, however, by no means cleanly in their habits. Their dress is a frock of white blanket reaching to the knees and having sleeves; they also wear trousers and a girdle made of the same material. A steel for striking fire, ornamented with brass, is carried suspended from the side. The dress of the women is somewhat similar. The Kunawuris trade principally in sheep. Hinduism appears to be the religion of the great mass of the inhabitants of this country. A few of them profess the Lama religion, but this properly belongs to the Tartars. The Tartars of K. are not so stout as those farther to the castward, and have less of the Chinese features; the others are muscular, well-made, and tall. Gerard saw few under 5 ft. 10 in., and many were 6 ft. or more. Their countenance is ruddy, and they have small oblong eyes, high cheek-bones, and thin eye-brows; few have either mustachios or beards. Many of them, especially from 12 to 18 years old, are extremely handsome, of a very prepossessing appearance, and fine specimens of the Tartar youth.

K. is subdivided into 7 districts. The construction of a grand road from Simla into K., and thence northward to Ladak, if permission can be obtained to push it so far, is understood to be contemplated by the East Indian government. The route from the plains of Hindostan to Simla is now being improved by the formation of a road 16 ft. wide, and of an ascent never exceeding 3 in 100. This will increase the distance from 42 m. to about 60 m.; but will effect a great saving to government by the substitution of camel and cart carriage instead of human porterage; and this road will probably be pushed forward to China in K., 140 m. NE of Simla, where the governor-general has a summer-retreat.

KUNCH, a town of Hindostan, in the prov. of Agra, 60 m. E by S of Gwalior.

KUND, a river of Hindostan, in the Balaghaut, rising in Ghazipur, and flowing by a course of 90 m. from NNW to SSE, to the Pennar, which it joins on the l. bank 15 m. NW of Cuddapah.

KUNDAH, a town of Hindostan, in the prov. of Delhi, 9 m. NE of Kumal.

KUNDAL, a town of Hindostan, in the district of Tipperah, 74 m. SW of Ducca. The adjacent country is almost a forest, abounding with all sorts of wild animals particularly elephants.

KUNDAPUR, a sea-port town of India, in the prov. of Canara, 55 m. NNW of Mangalore. It is situated near the mouth of a river which forms the boundary between the two Canaras, in N lat. 13° 33′. On the N side of the river, Tippu had a dock for ships; but as the water on the bar does not even in spring-tides rise above 14 ft., it was never favourable for careening or repairing vessels of any size. The town consists of about 300 houses.

KUNDRALITZ, a village of Bohemia, in the circle and 24 m. W of Kamzun.

KUNDUL, a village of Afghanistan, in the Daman, in N lat. 32° 34′.

KUNDUT, a village of Kunduz, 40 m. E by N of Ish-Kashm, in the valley of the Upper Oxus, which, from Ish-Kashm to K., varies from a few hundred yards to 1 m. in breadth. The river here divides into several channels, flowing over a sandy bed, and forming numberless islets which are thickly covered with an undergrowth of red willows. "The houses at K.," says Lieut. Wood, "are clustered about the fort like so many cells in a bee-hive. We discovered that the holes in the roofs, besides giving vent to the smoke, perform the office of sun-dials, and, when the sun is shining, indicate the hour of the day. Before the housewife begins to prepare the family-meal, she looks not up at a clock, but round the walls, or upon the floor, for the spot on which his golden light is streaming. The seasons, also, are marked by the same means; for when the sun's rays, through this aperture, reach one particular point, it is seed-time."

KUNDUZ, an independent Uzbek khanate, in Budakshan, to the N of the Hindu-Kush. Its capital of the same name lies in N lat. 36° 44′, E long. 69° 14′, in the angle formed by the junction of the Gori and the Banghi, the head-streams of the Aksurrai. It is a poor place, consisting of 500 or 600 mud-hovels and a rude fortress. Its present ruler is able to bring together 15,000 horsemen, and manages to control the rude chieftains by whom he is surrounded. The climate of this region is insalubrious; while the heat in summer is excessive, the snow lies for three months during winter; and the greater part of the valley in which the town of K. is situated, and extending from E to W about 30 m., is so marshy that the roads are formed on piles of wood. Rice is raised in such places as are not entirely inundated; and on the drier ground wheat and barley are grown. The fruits consist of apricots, plums, cherries, and mulberries. The hills which bound the valley of K. on either side do not exceed 1,000 ft. above the plain; and are long ridgy highlands, covered only with grass, and affording excellent pasture. The adjacent districts do not, it is said, partake of the unhealthiness of K. They are Khulum, Heibuk, Gori, Inderab, Talighan or Talikshan, and Huzrut-Imam.

KUNEON, a mountain-peak in N. Hindostan, in N lat. 30° 2′, E long. 79° 3′, 22 m. SE of Sirinagur. Alt. 6,277 ft. above sea-level.

KUNG, a district and town of China, in the prov. of Sze-chuen, div. and 30 m. S of Seu-chu-fu, in N lat. 28° 15′, E long. 104° 12′.—Also a district and town in the prov. of Ho-nan, div. of Ho-nan-fu, in N lat. 34° 53′, E long. 113° 6′.—Also a district and town in the prov. of Hu-pih, div. of King-chu-fu.

KUNG-CHANG-FU, a division and town of China, in the prov. of Kan-suh. The div. comprises 9 districts. The town is 102 m. SE of Lan-chu-fu, near the source of the Hoeï-ho, in N lat. 34° 56′ 24″, E long. 104° 43′ 30″. It possesses considerable trade. In a lofty mountain in the vicinity is a tomb, which the Chinese consider that of Fô.

KUNG-CHING-CHU, a district and town of

China, in the prov. of Kwan-se, div. of Ping-lo-fu, in N lat. 24° 33′, E long. 110° 46′.

KUNGUR, a considerable town of European Russia, in the gov. of Perm, between the rivers Suilva and Iren, 40 m. S of Perm, and at an alt. of 500 ft. above sea-level. Pop. 6,500. In the neighbourhood are mines of iron and copper.

KUNJPURAH, a walled town of Hindostan, in the prov. of Delhi, 24 m. NNE of Pampot, in N lat. 29° 41′.

KUNKA, a district of Hindostan, in the prov. of Orissa, on the sea-coast, near Point Palmyras. Being much intersected by rivers, the rajah of this district maintained his independence against the Mahrattas. In 1805 he submitted to British authority.

KUNKAGUR, the capital of the above district, situated on the coast, in N lat. 20° 50′.

KUNKHUL, a town of Hindostan, on the Ganges, 2 m. below Hurdwur. It consists principally of one broad handsome street, lined with houses the outsides of which are ornamented with paintings. A fine avenue of trees connects it with Hurdwur.

KUNO, a fortress of Nifon, in Japan, 60 m. WSW of Jedo, near the bay of Totomina.

KUNOW, a town of Poland, in the palatinate of Sandomir, on the r. bank of the Kamienna, 12 m. NW of Opatow. Pop. 800.

KUNOWITZ, a town of Moravia, on the Olschowa, 37 m. S by E of Olmutz. Pop. 2,500.

KUNSTADT, a town of Moravia, 24 m. N of Brunn. Pop. 900.

KUNSTADT, or Constadt, a town of Prussian Silesia, in the principality of Oels, 38 m. E of Breslau.

KUN-SZENT-MARTON, a town of Hungary, in Great Kumania, 45 m. N of Szegedin, on the l. bank of the Körös. Pop. 2,300.

KUN-SZENT-MIKLOS, a town of Hungary, in Little Kumania, 35 m. S of Pest, on the Gentoun river. Pop. 3,800.

KUNUK, a village of Beluchistan, 22 m. S of Kelat, at an alt. of 5,000 ft. above sea-level.

KUNUR. See Cunur.

KUNUR, or Kama, a river of India, which rises in the valley of Chittral, and flows SW through Kafiristan into Afghanistan, where it joins the Cabul river on its N side, after a course of about 200 m.

KUNZELSAU, a town of Wurtemberg, on the Kocher, 9 m. NE of Oehringen. Pop. 2,500.

KUNZENDORF, a town of Prussian Silesia, in the reg. and 27 m. SSW of Breslau.

KUOPIO, an administrative district and town of Russia in Europe, in the E part of the grand duchy of Finland. The gov. extends between 61° 30′ and 64° 3′ N lat., and between 25° 56′ and 32° 20′ E long., and is bounded on the N by the laen of Uleaborg; on the E by that of Olonetz; on the S by the laens of Viborg and Kymmenegard, and on the W by that of Vasa. It is about 180 m. in extent from N to S, and 210 m. from E to W. It contains extensive plains covered to a great extent with heath, and numerous lakes. Of the latter the principal are the Kallavesi, Paapavesi, Haukivesi, Pihlagavesi, Puruvesi, and Pielisjaervi. The rivers are small, and flow generally S or SE towards the gulf of Finland. The hills by which it is intersected, although of little height, retain the snow the greater part of the year, and on the highest summits it never melts except in very warm summers. The soil, consisting chiefly of sand and gravel, is meagre and arid; but by dint of careful cultivation produces rye, wheat, barley, pease, haricots, and lint, in considerable quantities. Sheep are reared on its pastures in large numbers, and the horses of the locality are noted for their vigour. It abounds with game, and has also productive fisheries; but the distance of markets, and the few facilities possessed by the inhabitants for trade, render them for the most part extremely poor. Their number in 1835 was estimated at 136,706. The laen comprises 4 haerads or districts, viz.: Nedre-Karelens, Œfre-Karelens, Nedre-Savolax, and Œfre-Savolax.—The town is situated on a peninsula projecting into lake Kallavesi, 240 m. NNW of St. Petersburg, and 195 m. E of Vasa. Pop. 2,000.

KUPA, a town of Persia, in the prov. of Irak-Ajemi, 45 m. ENE of Ispahan. Pop. 2,000.

KUPEL, a town of Russia, in the gov. of Volhynia, 34 m. WSW of Staroï-Konstantinow.

KUPERESTI, a town of Moldavia, 21 m. ESE of Jassy, on the r. bank of the Baglui, at its junction with the Mitak.

KUPERPEH, a village of Asiatic Turkey, 35 m. WNW of Boli.

KUPFERBERG, a town of Bavaria, 37 m. NE of Bamberg. Pop. 800. — Also a town of Prussian Silesia, on the Bober, 17 m. SW of Jauer. Pop. 800. —Also a town of Bohemia, 21 m. NE of Elnbogen. Pop. 700.

KUPFERZELL, a town of Wurtemberg, in the bail. and 9 m. ENE of Oehringen, on the Kupfer. Pop. 1,000.

KUPIANSK, a town of Russia, in the gov. and 60 m. ESE of Kharkov, on the r. bank of the Oskoe. Pop. 700.

KUPINOWA, a fortified town of Hungary, on the Save, 16 m. SSW of Belgrade.

KUPISZKI, a town of Russia, in the gov. of Wilna, 45 m. NNE of Wilkonierz.

KUPO, a town of Greece, in the island of Negropont, 18 m. E of Negropont.

KUPPENHEIM, a town of Baden, near the river Murg, 22 m. NE of Strasburg. Pop. 1,300. It has some trade in wood and wine.

KUPROWITZ, a small town of Moravia, 9 m. SSW of Brunn.

KUR, a town of Beluchistan, capital of a small district of the same name, in the prov. of Sarawan, 15 m. NNW of Kelat.

KUR, a river of the Chinese empire, in Sungaria, and in the div. of Kur-kara-oussou. It descends from the mountains of Malakhaïdaba; runs first N, then W; and after a course of about 120 m. falls into the Kaltar-oshke-nor. It derives its name from the masses of snow which rise in heaps upon its banks in the upper part of its course. Its principal affluents are the Zirgalang, Ebtu, and Kur-kara-oussou, all of which it receives on the l.

KUR, Abi-Shur, Rud-Shiur, or Div-Rud, a river of Persia, in Farsistan, which has its source in the Silver mountains, near the confines of Kohistan; runs WSW into Laristan; bends S; and throws itself by two mouths into the Persian gulf, near the town of Kammer, and opposite the island of Kishm. It is the *Corius* and *Salsos* of the ancients. The name Rud-Shiur signifies Salt river.

KUR, Kura, or Mtwari, a river of Turkey in Asia, which has its source in the Saghanlu mountains, in the pash. of Akhaltskhai, near the confines of Erzerum, and about 60 m. NE of the town of that name. Running NE, it passes into Georgia, directing itself ESE through the central part of that prov., and passing in its course Gori and Teflis. At the latter city its ordinary width is 93 yds., but in floods 230 yds. Thence it flows SE, and entering Shirvan, separates Karabagh from the khanates of Shekin and Shirvan proper; and after a total course of about 830 m. throws itself into the Caspian sea by three embouchures, one of which directs itself SE, and another S to the bay of Kizil-Agatch. Its principal affluents are the Alazan on

the r.; and on the l. the Akstafa, Terter, and Aras or Araxes. After the junction of the latter stream, about 66 m. from its mouth, the K. becomes navigable for small vessels. It is the *Cyrus* or *Kyrus* of the ancients. The K. in general is yellowish and turbid, owing to the quantity of calcareous matter which it holds in solution. Its course for the most part is tranquil but rapid, flowing between banks so steep in some places that, it is remarked, a traveller may journey "for hours without the possibility of quenching his thirst in summer, though the river be constantly before his eyes, if not provided with a leathern drinking flask, and a long cord, to draw up the water." Its banks are partly covered with forests, wherein the vine is plentiful, together with various other fruits; but towards its mouth there is a great barren plain, a large portion of which is overspread with dwarf marine plants from which soda is extracted. It has been affirmed that snakes are in such abundance on the r. bank both of the Kur and Araxes as to preclude a passage across the plain of Mogan; this prejudice is as ancient as the days of Plutarch, who relates that Pompey was prevented from marching down the K. to the Caspian by the number of serpents which were found to infest its banks. The panther repairs to the banks of the river where they are covered with reeds and underwood; the wild boar inhabits the marshes at its mouth; while the lynx and hyæna are sometimes seen in its neighbourhood. Jackals are numerous; the beautiful Caucasian pheasant is frequent among the bushes; and the francolin in low and reedy places. Plutarch relates that Pompey, who forded the K. in one place, conveyed his army across it at another on 10,000 skins. This primitive plan of crossing rivers is not yet abandoned in the East. The Arabs dwelling on the banks of the Tigris and Euphrates, support themselves on inflated skins while fishing. The celebrated Nadir Shah provided a number of inflated skins, on which were laid planks or other materials whereby his armies crossed in their march to India. Tamerlane was enabled to pass the K. along with his army on a bridge formed of branches and reeds.

KURA, a small island in the Caspian sea, with very steep shores, in N lat. 39°.

KURA, or KURAKH, a khanate and town of Russia in Europe, in Southern Daghestan. The khanate is inhabited by Lesghiz, who speak a peculiar dialect. They are Mahommedans. Agriculture and the rearing of sheep and cattle form their chief occupations. They are governed by an hereditary prince tributary to Russia.—The town is 42 m. SW of Derbend, on the l. bank of a small river of the same name.

KURA-ABONDON, or CAYENNE'ES ISLANDS, a group of small islands in the Black sea, near the coast of Turkey in Asia, 8 m. E of the S entrance of the channel of Constantinople, in N lat. 41° 14′, and E long. 29° 14′.

KURACHI, or KURRACHI, a port of Sind, in N lat. 24° 51′, E long. 67° 2′. The town, which is 3 m. from the landing-place when the tide is out, contains about 25,000 souls, of whom two-fifths are Hindus. It is chiefly composed of mud-built houses. Its port is protected from the sea by the headland of Munorah. The bar at its entrance has only 2½ or 3 fath. water at spring-tides. The harbour extends about 5 m. northward from Munorah point. K. exports camels, saltpetre, salt, rice, ghee, hides, tallow, oil, oil-seeds, fish, bark, alkalies, indigo, cotton, and carpets; and is a transit-port for assafœtida, opium, madder, dyes, alum, wool, silk, shawls, gums, metals, and horses. It may be regarded as the great entrepot of the Indus. Goods intended for Cashmere, Bokhara, Afghanistan, Tibet, and Turkistan, are now carried direct from Liverpool to K.; and thence by steam-boats up that river to the different trading-marts on its banks, as far as Attock, a distance of 942 m. K. is plentifuly supplied with excellent water, vegetables are here abundant, and grain, rice, bullocks, and sheep are cheap; but communication by sea can only be kept up with it eight months in the year, or from September to April. Dr. Kennedy thus speaks of the importance of K. to the British government. "Depots of stores and well-equipped detachments at K., Sukkur, and Dera Ishmael Khan, will not only place the navigation of the whole river in perfect security, but form an invincible barrier to an invading army from the W: not that the Indus is to be relied on as 'a wet ditch, full of water,' like the moat of Ghizni; but as a canal for the easy and cheap conveyance of heavy ordnance and ammunition, and other military stores, to the scene of action, where an invading army would find a well-equipped artillery; which no expenditure could enable them, under any circumstances, to meet upon any thing like terms of equality. Too great a value cannot possibly be placed on the possession of the harbour of K., whether as a military and naval station, or in a political and commercial view; and every thing that our government can do should be done without delay, to improve and strengthen it. It is the key of Sind and the Indus, and of the approaches either military or commercial to Central Asia. A lighthouse on the headland of Munorah, and a pier on piles at the landing-place, are the first desiderata. The second and third will be the improvement of the Garra creek, and a canal to reunite it to the Indus, to make K. what it was in the days of Alexander, on the W outlet of the Indus." The imports at K. in 1846 amounted in value to 46,29,000 rupees; in 1845, to 31,40,000 r. The exports in 1846 amounted in value to 10,49,181 r., of which 4,40,747 r. were merchandise, 3,23,434 treasure, and 2,85,000 r. horses.

KURACHINSK, a town of Russia, in the gov. and 36 m. S of Perm.

KURAGGI, a town of Nifon, in Japan, 45 m. NNE of Jedo.

KURANIA, a village of Sind, 21 m. N of Sehwan, near the r. bank of the Indus.

KURANKO, an extensive territory in Upper Guinea, subdivided into numerous petty states. It is bounded on the N by Limba, Tamisso, and Sulimana; on the E by Kissi, the Niger, and countries yet unknown; on the S by the countries bordering on the coast; and on the W by the Bullom, Limba, and Timmani countries. It must extend a long distance to the eastward, as the natives of the district through which Laing passed could give no definite idea of its extent in that direction, merely affirming that he could not reach the end of it in one moon. A chain of hills, composed of micaceous granite and mica-slate, 60 m. in length, runs through the whole of K. in a NE direction. In these hills the natives find iron. Laing describes the scenery as occasionally very beautiful. Ascending an eminence called Sa Wollé, the summit of which, according to barometrical measurement, is 1,900 ft. above the level of the sea, his eye enjoyed a grand and extensive view of nearly two degrees in diameter, interrupted only by a hill to the E, with "the lovely Rokelle rolling its serpentine course across the landscape from NE to SW." All the rivulets running southwards through the chain of mountains already noticed collect behind the lofty hill of Botato, and fall into the Camaranca. The Kurankoes, in language and costume, are closely assimilated to the Mandingoes; they cultivate more ground than the Timmanis, and are in every respect a more industrious and intelligent people. They are great dancers. At sunset the

drum summons all to the dance: the musicians place themselves in the centre, and the company dance round them at a side-step, the whole facing inwards. "I have seen a dance of this kind," says Laing, "kept up without intermission for two days and three nights, the places of those retiring being immediately and constantly filled up." Their staple article of trade is cam-wood, which is sent down the Rokelle and the Camaranca, to be exchanged chiefly for salt. They manufacture cotton-cloth.

KURAO, a town of the peninsula of Malacca, in the prov. of Wellesley, near a river of the same name. The river forms the S boundary of the prov. separating it from Perak.

KURATIJA, a village of Egypt, 4 m. S of Cairo.

KURBA, a town of Hindostan, in the prov. of Gundwana, 32 m. E of Ruttunpur.

KURCZAHAN, a small river of European Russia, in Podolia, which falls into the Dniester below Bender.

KURDA, a town of Hindostan, in the prov. of Gujerat, 3 m. S of Theraud.

KURDA. See KHURDA.

KURDISTAN, an extensive region of Western Asia, comprising the districts of Kirmanshah and Ardelan in Persia, the Turkish districts of Mush and Betlis, and the independent territory of the Tyari, Hakkari, and Benawi tribes of Chaldeans, whose capital is Julamerik. The name signifies 'the country of the Kurds.' In ancient times the *Carduchi*, the ancestors of the modern Kurds, possessed this district called from them *Karduchia*, *Karduene*, *Korduene*, *Gordyene*, and *Corduene*. In the days of Xenophon it was a region distinct both from Armenia and Assyria, having Eastern Armenia on the N, and Western Armenia on the W, the Centrites being the boundary in that direction, whilst the lateral ridge of Zaco divided it on the SE from Assyria, as we learn from Strabo. It was not till the era of Tigranes that Carduchia or Corduene formed a distinct province of the Armenian kingdom, Tigranocerta being the capital. Down to the time of Shabur II. it was considered a province or district of Armenia, having Zabdicene on the S; Adiabene on the SE; Moxoene or the district of Mush on the NW; and Arzanene on the W; while the mountains of Hatarash formed its N and NE frontier, which separated it from the district of Van. By Ptolemy, *Gordyene* is placed in the SE of Armenia, and to the E of the sources of the Tigris. In his table, the first district to the E of the sources of that river is *Bagrandavene*, next *Gordyene*, next *Cortœa* the eastern part of Gordyene, and then the *Mardi*, clearly corresponding to the modern Amadia which is separated from the valley of the Khabur by a range of mountains on the W. The modern K. is of far larger extent, however, than the *Carduchia* of Xenophon, or the *Corduene* of other ancient writers, as it comprehends all the tract from the source of the Susan branch of the Khabur to that of the Little Zab; or from 41° to 47° E long. If a line be drawn from the source of the Susan, and prolonged SE till it strike the Tigris, 12 m. above Jeziret-ibn-Omar, it will represent the NW boundary of K.; and if the line be carried along the left of the Tigris SE till it strike the confluence of the Tigris with the Little Zab, it will represent the SW boundary. Another line drawn from the mouth of the Little Zab NE to its most SE source, where the Zagros meets the K. range, will represent its SE frontier. On the N, the mountains of Mush and the Nimrud-Dagh separate it from the valley of the S branch of the Euphrates; and the range of the Hatarash separates it from the district of Van. On the NE it is separated from Azerdbijan by the continuation of the Nimrud-Dagh from the point where it strikes the easternmost bend of the Hatarash, all the way SE till it strikes the most northern source of the Little Zab, near Yeltomar, where it is separated by an intervening ridge from the source of the Tuttawa which runs NNE to the Jigattai, a river flowing into the lake of Van. From this point the K. range runs E, and then due S, separating Turkish K. from the prov. of Ardelan or Persian K., till it meets the Zagros or Aiagha-Dagh. Though this territory be generally mountainous and rugged, yet the valleys in most places are very fertile in rice, millet, vines, and fruits. Several of the valleys to the W of the Khabur yield large crops of wheat and barley. In the vicinity of Betlis, apple, pear, plum, cherry, and walnut trees, are numerous and productive; and the vineyards of Kulti afford excellent wine and brandy; but the principal part of the land is kept in pasture, and the natives prefer the culture of fruits and vegetables to that of grain. The gardens in the vicinity of Betlis are irrigated by small canals which convey water from the rivers or mountains. Wine is still as abundant as Xenophon found it twenty centuries ago in all the Carduchian villages. The sides of the mountains are well-wooded with oak, ash, apple, pear, plum, mulberry, and walnut trees: so abundantly clothed with the majestic oak are the K. mountains throughout their whole extent, from the Tigris to the Nimrud-Dagh, and from the valley of Diyarbekir to the high plateau of Media, that they are called the Daru mountains, *i. e.*, 'the Mountains of oaks.' Gall-nuts are consequently very abundant, and in many places the poorer Kurds live for months successively on milk, cheese, and bread made of acorns. Honey, wax, manna, gall-nuts, and yellow berries, are largely exported; and silk, cotton, tobacco, hemp, and flax, are grown for domestic consumption. Horses are obtained in great numbers from K. for both the Turkish and Persian cavalry.

Kurdish tribes.] Respecting the numbers of the Kurdish population we have no reliable data; but it must be very considerable, as the five principalities enumerated by Father Garzoni could collectively raise more than 60,000 men. Colonel Chesney is of opinion that the pop. of K. west of Zagros amounts to 2,500,000. According to Garzoni the Assiretta, or small tribes, often revolt and depose their chiefs. The almost constant state of anarchy arising from this cause has separated many tribes from the great body of the nation, and forced them to disperse themselves through the neighbouring countries, and to lead a wandering life like the Arabs or Turkomans. These expatriated wandering tribes are computed at 140,000 tents, or as many fighting men scattered through the plains of Erzerum, Erivan in Russian Armenia, Diyarbekir, Sivas, Aleppo, Damascus, and other places. The Kurds have a white complexion, and an animated physiognomy. In person, says Fraser, "they are well-made and active; differing, perhaps, but little essentially from their neighbours the Persians. But the national features are strikingly peculiar. The cast of countenance is sharp, the form of the face oval, the profile remarkable from the prominence of the bones of the nose, and the comparative retrocession of the mouth and chin, which communicate to its outline a semicircular form. The eyes are deep-set, dark, quick, and intelligent; the brow ample and clear, but somewhat retreating, completing the shape assigned to the profile; and the general mould of the features by far more delicate than those of the Persians, which usually are somewhat too strong. In K. you would look in vain for a snub nose. The mouth is almost always well-formed, and the teeth fine. The hands and fingers small and slender. In short, there is something of elegance about the Kurdish form, which would mark them as a handsome nation in any part of the world. The same remarks apply to the women. When young, they are exceedingly pretty; but when old, or even at what we should call maturity, the sharp prominence of feature, which characterizes them in common with the men, is assuredly unfavourable to beauty, and they soon appear old and withered." Their language is Persian mixed with Arabic and Chaldee, and they use the Persian character; Mahommedanism is here conjoined with various superstitious notions, arising from remnants of the old Manichean and Magian systems. Above 100,000 Kurds are Nestorian Christians, and acknowledge the authority of two hereditary patriarchs; one residing at Kodjamisi near Julamerick, who has 5 bishops under him,—and another who has 13 suffragans. The episcopal dignity is hereditary, descending from uncle to nephew; and the bishops are often ordained at the age of 13. The inferior clergy can scarcely read.—Mr. Rich says, "the peasantry in K.

are a totally distinct race from the tribes, who seldom if ever cultivate the soil; while, on the other hand, the peasants are never soldiers. The clannish K. call themselves *sipah*, or military Kurds, in contradistinction to the peasant Kurds; but the peasants have no other distinguishing name than *rayahs* or *keuylees* in this part of K. A tribesman once confessed to me that the clans conceived the peasants to be merely created for their use; and wretched indeed is the condition of these cultivators. It much resembles that of a Negro slave in the West Indies; and the worst of all is, I have never found it possible to make these K. masters ashamed of their cruelty to their poor dependents. Every one agrees that the peasant is in a moment to be distinguished, both in countenance and speech, from the true tribesman; nor would it be possible for him to pass himself for his countrymen of nobler race. Mahomed Aga said to me, 'The Turks call us all Kurds, and have no conception of the distinction between us; but we are quite a distinct people from the peasants, and they have the stupidity which the Turks are pleased to attribute to us.' The treatment which the peasantry receive is well calculated to brutify them." The K., Mr. Rich says, "are the only Orientals I ever knew who sit up late at night, and rise late in the morning. Their chief visiting time is at night. When it grows dark they begin going about to each other's houses, where they amuse themselves with conversation, smoking, and music. They will pay two or three visits of this kind in the course of a night. About an hour before sunset, also, a kind of club or assembly is held before the house of the masraf, in an open place in the town called the meidan. Friends meet and chat on various subjects; arms or horses are displayed; and sometimes matches are made of wrestling, partridge or dog-fights. The K. appear to me to be a remarkably cheerful, social people, with no kind of pride or ceremony among them; and they are neither envious of one another, nor have I ever heard a K. speak an ill-natured word of another, however different they may be in party or interest."

The following particulars respecting the Kaldani, or Nestorian Christians of K., were collected by Dr. Walsh from their bishop and other persons of note among them:—"A sect of Christians, called by themselves Chaldeans, has from the earliest ages of the gospel inhabited the country on each side of the Tigris, at the foot and on the sides and summits of the great chain of mountains which lie to the E of that river. Shut out from intercourse with the rest of the world by the nature of the place, they are never visited by travellers. The face of the country is partly plain, and partly mountainous; but the mountain-tract is by far the most extensive, and so very healthy, that the plague, which sometimes rages in the countries all around, has never been known to infect this district. The pop. consists of about 500,000 persons, who are all Christians. They are free, and are independent of the Arabs, Turks, Persians, or Tartars, in the midst of whom they are situated; and though several attempts have been made in different ages to subdue them, they have successfully repulsed them all. The last great effort was made by the Turks in the beginning of the 17th cent., in which they lost 100,000 men, and 5 pashas, and have never since attempted to invade them. The Kaldani constantly live with arms in their hands, to preserve their independence; and they do not lay them aside even when they assemble in the churches for divine service on Sundays. Their government is republican, and at the head of it is a patriarch, who exercises both a spiritual and civil jurisdiction. Their capital is Jolemark [Julamerik]. It is surrounded by a strong wall, protected by European cannon, which were some time ago furnished to the patriarch by French engineers. It contains in winter about 12,000 inhabitants, the greater part of whom, in summer, emigrate to numerous villages which are scattered on the neighbouring hills." Almost every village has its priest, and likewise a church of peculiar simplicity, in which, a little before day-light, the Kaldani of each sex assemble on Sunday for worship. In their towns a few Turks only occasionally reside. The exercise of their religion is tolerated, but not openly; they have, therefore, no minarets. They have no schools for the general education of their children, and no printed books among them; and very few, even among the better classes, learn to read. Instruction is confined to the clergy, as the only persons in the community who require it In the different churches and convents are a few manuscripts, among which are the Scriptures, translated into their language, "which, though not printed, are sufficiently common in written copies." (?) Very early, missionaries from the college *de Propaganda* at Rome found their way among them; and at present they are divided into two hostile parties,—primitive Nestorians, who hold themselves independent of any other church,—and converted Catholics, who acknowledge a dependence on the see of Rome. The Kaldani of the mountains, who are the vast majority, have hitherto rejected all submission to the church of Rome, which denominates them heretics, as they still retain the discipline and doctrine of their church in primitive independence. Among the remarkable events of their history, is one which they speak of at this day with considerable interest. At a very early period a part of their tribe emigrated from their mountains, and proceeded to India, where they settled upon the coast of the higher peninsula. They brought with them the original purity of the Christian doctrine and discipline, before it had been corrupted by heresy; and this purity, they assert, they still retain in that remote situation.

KURDMUHULEH, a village of Puna, in Mazanderan, 23 m. N by W of Astrabad. It consists of a number of scattered houses situated in a kind of jungle.

KURNEK, a small river of Mekran, which runs into the Indian sea, 30 m. W of Tiz.

KURG, or Coduga, a small Hindu principality in the prov. of Malabar, now annexed to the Madras presidency. It lies among the Western Ghauts, between the parallels of 12° and 13°, at the head of the Cavery river; and is considered to extend from the Tambacherry pass on the S to the Hemavatti river on the N. It is a mountainous district, covered with forests and jungle, and inhabited by a bold and active race of mountaineers. A rugged pass, 8 m. in length, connects it with the W coast, and forms a military key to the Mysore. In the war with Tippu, the rajah of K. allowed the Bombay division of the British army to pass through his territories, and otherwise gave very important aid to the British.

KURGAN, a small river of Khorassan, which runs into the Caspian to the W of Astrabad.

KURGOMAH, a town of Hindostan, in the prov. of Gundwana, situated in the middle of a wild country inhabited by Goands, in N lat. 23° 11′.

KURI, a village of Afghanistan, on the Daman, 35 m. NE of Dera-Ismail-Khan.—Also a village of Cashmere, at the N base of Futi-Panjal, in N lat. 33° 35′.

KURIAT, a seaport of Oman, in Arabia, 20 m. SE of Muscat. It was formerly a place of some consequence, but was taken and burnt by Albuquerque in 1508, from which blow it has never recovered.

KURILAUT, a town of Tartary, 60 m. SSE of Urkonje.

KURILES, a long range of small islands at the E extremity of Asia, extending from the S point of Kamtchatka to the isle of Jesso, which belongs to Japan, between the parallels of 42° and 51°. The whole length of the chain amounts to nearly 900 m. The two nearest to the continent were discovered from Kamtchatka in 1713. In 1720 five of these isles were known, and since that time the rest have been gradually discovered and subjected. Some of these islands are not inhabited, and several are even uninhabitable, on account of the absolute want of water; others are fertile, well-wooded and full of game and fish. The archipelago of the K. belongs to the Russian gov. of Irkutsk, and the inhabitants pay a tribute of furs, which the Russians collect every two or three years. The Russian authority, however, can only be considered as extending over 19; the 3 most southerly belong rather to Japan. The inhabitants are small in stature. Their face is round and flat, and their beard and hair are black. They are humane, honest, faithful, and hospitable to each other, though averse to foreigners. The men employ themselves in hunting and fishing. The southern isles are visited by the Chinese and Japanese, who come for furs, whale-blubber, and eagles' feathers for arrows; in exchange for which they bring japanned vessels, cooking utensils, sabres, stuffs, ornaments, and tobacco. The K. live in huts, or rather earth houses, like the Kamtchadales, except that they floor them with planks, and ornament them sometimes with Japanese furniture. The people of the northern islands dress like the Tunguses, with the feathers of different aquatic birds, from which they take the skin along with the feathers, and with the skin of the sea-calf. The southern islanders, on the contrary, dress nearly like the Chinese, in long robes, made sometimes of the skin and feathers of water birds, but more frequently of nankeen and silk stuffs. They have a confused idea of a Supreme Being, yet they are addicted to the superstitious practices of Shamanism. The entire pop. of the archipelago has been supposed not to exceed 1,400.

KURISCHE-HAFF. See CURISCHE-HAFF.

KURISONDA, a village of Caramania, in Asiatic Turkey, 60 m. NNE of Tokat.

KURKLEKKI, the name given to that portion of the Hala range, in Beluchistan, through which the Bolan pass runs.

KURMUNAH, a small town of Independent Tartary, situated in a fertile and well-cultivated country, 13 m. E of Bokhara.

KURMYSCH, a town of European Russia, in the gov. of Simbirsk, on the river Sura, in N lat. 55° 28′. Pop. 1,200.

KURNAH. See KORNAH.

KURNAL. See KARNAL.

KURNBACH, or KRUMBACH, a town of Hesse-Darmstadt, 8 m. S of Beinheim. Pop. 800.

KURNIK, a town of Prussian Poland, 12 m. SE of Posen. Pop. 2,730.

KURRICHANE, a large city of S. Africa, belonging to the Murutsi, one of the Bechuana tribes, 160 m. NE by E of Lattaku, in S lat. 25° 40′, E long. 27° 10′. Pop. 16,000. (?) The manufactures of K. are found to have diffused themselves from the borders of the colony of the cape of Good Hope to the shores of Mozambique, and from Delagoa bay to the wandering tribes on the opposite coast. Needles, bodkins, and other articles of a similar nature, manufactured at K., and seen in abundance in the neighbourhood of Angra-Pequena bay, strengthen the supposition that the Portuguese have for many years carried on an inland correspondence between their settlements on the E and W shores of Africa. The inhabitants of K. manufacture pottery, and in the shape and painting of their articles show a superior degree of taste. They also appear to excel in the making of baskets. Campbell found the walls of their houses ornamented with paintings of elephants, camelopards, shields, &c. About K., and other places visited by Mr. Campbell, the height of the hills, the smooth regularity of their outline, and the indentations on their sides, afford indications of the presence of chalk, and of a secondary and consequently a fertile country. In this neighbourhood some of the rivers were seen running to the W, while others ran to the E, and in a SSE direction. It is probable that some of the rivers seen on this occasion may be branches of the Manica, the Delagoa, or Machavanna, near the sources of those which empty themselves into the Delagoa bay. Several large towns were reported to lie to the E. The smoke of one or two of them was seen in the distance.

KURRUDUCBIDGEE, a village of New South Wales, in Murray co., on the Shoalhaven river, 152 m. from Sydney.

KURRÛK, a pass on the W side of the Indus, in N lat. 33° 16′, E long. 70° 50′, by which the route from Peshawur, by the pass of Kohat, enters the Khuttuk territory. It is 64 coss travelling distance, and 90 m. direct distance, SSW of Peshawur. There is a v. here consisting of a few mud and pebble houses.

KURSHI, a town of Bokhara, 100 m. SE of Bokhara. Pop. 10,000.

KURSK, a southern prov. of European Russia, lying between 50° 20′ and 52° 25′ of N lat., and 33° 40′ and 38° 20′ of E long.; and bounded by the gov. of Orlov on the N; by Voronej on the E; by Kharkov on the S; and by Poltava and Chernigov on the W. Its territorial extent is about 17,000 sq. m.; and it is divided into 15 circles. It consists of a vast tract of flat and fertile land, extremely well watered by no fewer than 13 large and nearly 500 small streams, of which the principal are the Sem, the Donetz, the Isla, and the Oskol; but none of these rivers are navigable. There is not enough of wood for fuel. The climate is temperate, but the winter is long, the rivers being frozen over in November, and not breaking up till March. The inclination of the surface is toward the S, and the rivers flow to the Euxine. Corn is the chief product and article of export; next come hemp, tobacco, hops, honey, and saltpetre. The cattle are numerous, particularly the horses; and many of the landed proprietors have small studs on their estates. Leather, soap, saltpetre, spirits, and earthenware, form the chief articles of manufacture. The pop. in 1846 was 1,680,000, of whom 239,881 were returned as free husbandmen, 311,073 as serfs, 5,358 as nobles, 6,990 as clergy.

KURSK, a considerable town of Russia, on the river Tuskara, in N lat. 51° 43′ 41″, E long. 36° 29′ 51″, 240 m. S of Moscow, the capital of the preceding prov. It consists of the town properly so called, and of several surrounding villages. The houses, filling a broad valley, and climbing up the receding slopes of the surrounding heights, are pleasingly intermixed with orchards and gardens. The streets are generally paved. It has a Protestant consistory, and 16 churches. Several public buildings and two of the streets are of stone, but the rest of the town is of wood. It is one of the most ancient towns of the empire. Pop. in 1830, 22,447. Cloth, linen, and leather, are largely manufactured here. The chief articles of export are honey, wax, tallow, hemp, leather, and furs. The value of the annual exports is estimated at £150,000 sterling.

KURTAMYSCH, a town of Russia, in the gov. of Orenburg, on a river of the same name. Pop. 2,550.

KURTOWIANY, a town of Russia, in the gov. of Wilna, 16 m. ENE of Miedniki.

KURUM. See KARUN.

KURUM, a river of Afghanistan, which flows into the Indus, in N lat. 32° 37′, after a SE course of 120 m.

KURWAY, a town of Hindostan, in the prov. of Malwah, 14 m. W of Khimlassa.

KUS, a town of Japan, in the island of Kiu-siu, prov. of Ofosumi, 105 m. ESE of Nagasaki.—Also a town in the island of Nifon, and prov. of Yamato, 30 m. SE of Meaco.

KUSAB, a village of Afghanistan, 50 m. SSE of Peshawur, on the r. bank of the Indus.

KUSEL, a town of Bavaria, on the Glan, 17 m. NW of Kaisetlautern. Pop. 2,200.

KUSHA, an island in the gulf of Cabes, the most easterly in the group of the Karkeni islands, near the coast of Tunis, in N lat. 34° 48′ 50′, E long. 11° 19′.

KUSHAB, a town of Hindostan, in the prov. and 130 m. WNW of Lahore, on the l. bank of the Jelum.

KUSHK, a village of Afghanistan, in N lat. 34° 54′, on a river of the same name, an affluent of the Murghab.

KUSHK-I-ZERD, or KUSH-GUBER, a town of Persia, in Farsistan, in the district of Istaker, 80 m. NNW of Shiraz. It is situated in a fertile but ill-cultivated plain, and is surrounded with ruins.

KUSHLAK, a town of Afghanistan, on the route from Kwettah or Shawl to Candahar, to the SW of the Takatu mountains.

KUSKO, a town of Turkey in Europe, in Bosnia, in the sanjak of Herzegovine, 8 m. SSW of Livno, and 27 m. SSE of Glamotchi, near the N bank of a lake of the same name. The lake is 4 m. in length, and about 1½ m. in breadth; and receives the waters of several small streams.

KUSMA, a village of Yemen, in Arabia, 50 m. E of Hodeida.

KUSMO-DEMIANSK, a town of European Russia, in the gov. of Kasan, on the Wolga, 112 m. NW of Kasan.

KUSNETZK, a town of European Russia, in the gov. and 112 m. NE of Saratov. Pop. 10,626.—

Also a town of Asiatic Russia, in the gov. of Tomsk, 150 m. ENE of Barnaul. Pop. 2,120.

KUSSERY, a walled town of Central Africa, on the banks of the Shary, in N lat. 11° 20′, E long. 16° 30′. It is situated amid swamps and stagnant waters abounding with useless and rank vegetation, and infested in an extraordinary degree with countless myriads of tormenting insects. It is a strong town governed by its own sultan, by whom Denham, who visited it, was kindly received.

KUSSI, a town of Nifon, in Japan, 65 m. NE of Jedo.

KUSSNACHT, a well-built town of Switzerland, in the cant. of Schwyz, on the Waldstadter lake, 11 m. WNW of Schwyz. Pop. in 1850, 2,788 Catholics. Near this town is a chapel erected on the spot where William Tell slew the Austrian governor Geisler.—Also a well-built village of Zurich, on the lake of Zurich, 4 m. S of Zurich. Pop. in 1850, 2,486, of whom 2,416 were Protestants.

KUSSUR, a town of the Punjab, 27 m. SE of Lahore.

KUSTERDINGEN, a village of Wurtemberg, circle of the Middle Neckar. Pop. 800.

KUSTENDJI, a town of Turkey, in the pash. of Silistria, on the coast of the Black sea, 25 m. N by E of Mongolia, and 35 m. E by S of Rassova. It has been proposed to cut a canal from this port to one of the elbows of the Danube at Rassova, which would shorten the passage from the river to the sea nearly 200 m., and evade the difficult navigation of the Georgievsk mouth.

KUSTRIN, a strongly fortified town of Prussia, in the prov. of Brandenburg, circle of S. Konigsberg, at the confluence of the Warthe and the Oder. Pop. in 1837, 5,841; in 1846, 6,556. It has manufactories of woollens and leather. The country around is low and marshy, and the fortifications are surrounded by a triple line of wet ditches. It was taken by the French in 1806, who held it till 1814.

KUTAHIYAH, Kutaya, or Kermiyan, a sanjak of Asiatic Turkey, bounded by the sanj. of Sultanieh and Mount Olympus on the N; by the sanjaks of Afium, Karahissar, and Hamid on the E and SE; by Hamid and Mentesha on the S; and by Karasi, Sarukhan, and Aidin on the W. On the E, it is mountainous throughout, being covered by the Murad-Tagh and its ramifications; on the W, it stretches out into plains along the upper branches of the Sangarius. Its centre is an extensive upland, elevated 4,000 ft. above the level of the Black sea.—Its cap., of the same name, is situated at the foot of the Pursal-Tagh, 65 m. NNW of Karahissar, on the site of the ancient *Cotyœium*. It is said to contain 10,000 houses; but its buildings are not imposing. It is well supplied with water; and spreads over a considerable area. It contains 20 khans, 30 public baths, 50 mosques, 4 Armenian churches, and a Greek church. It is the seat of a Greek bishop; and of the Turkish beglerbeg or governor of Anatolia.

KUTCH. See Cutch.

KU-TIN, a district and town of China, in the prov. of Fo-keen, div. of Fu-chu-fu, in N lat. 26° 41′, E long. 118° 54′.

KUTNO, a town of Poland, in the gov. and 54 m. W of Warsaw. Pop. 4,000. It has manufactures of leather and woollens.

KUTTAIR. See Rohilcund.

KUTTENBERG, or Kutna-Hora, a considerable town in the interior of Bohemia, between Kollin and Czaslau, 6 m. NW of the latter town, and 40 m. E by S of Prague. It contains 14 churches, and an ancient palace. Its silver mines were formerly very productive. Those of lead and copper are still wrought. Pop. 8,600.

KUTTLAU, a town of Prussian Silesia, 6 m. NNW of Gross-Glogau. Pop. 1,400.

KUTTRA. See Cutterah.

KUTTUCK. See Cuttack.

KUTTUPDEA, an island in the bay of Bengal, adjacent to the district of Chittagong, being separated from it only by a narrow strait of 2 m. in breadth. It is about 13 m. long by 4 m. broad; and is principally covered with wood. Its N end is in N lat. 21° 55′, E long. 91° 48′.

KUTY, or Kutow, a town of Austrian Poland, in Galicia, on the Czeremosz, 61 m. SE of Halitz. It has extensive manufactures of Russia leather. Pop. 4,000, of whom a considerable number are Armenians.

KUTZENHAUSEN, a village of France, in the dep. of Bas-Rhin, 9 m. N of Strasburg, near the Salzbach. Pop. 1,100.

KUTZTOWN, a village of Berks co., in the state of Pennsylvania, U. S., 60 m. E of Harrisburg. Pop. 693.

KUWNIK, a town of Prussian Poland, 12 m. SSE of Posen. Pop. 1,300.

KUYNDER, a small seaport in Friesland, situated on the W side of a river of the same name, near its influx into the Zuyder-zee.

KUYTHOL, a commune of Belgium, in the prov. of E. Flanders, dep. of Nukerke. Pop. 315.

KU-YUEN-CHU, a district and town of China, in the prov. of Kan-suh, div. of Ping-leang-fu, in N lat. 36° 3′ 30″. E long. 104° 1′.

KUYUNJIK, a village or hamlet of Asiatic Turkey, on the l. bank of the Tigris, immediately opposite the city of Mosul, built on the NE extremity of an immense mound measuring 1,850 ft. in length from E to W, and 1,147 ft. in breadth from N to S, and rising 178 ft. above the level of the surrounding plain. This mound—evidently an artificial mass—is joined, by the remains of an ancient wall of unburnt bricks, to the v. of Ninewah on the S. The small river Kausar makes a sweep round the E and S sides of the mound, and then discharges itself into the Tigris, on the l. bank, a little above the bridge of Mosul. It was at this spot that the French archæologist, Botta, commenced his researches in Dec. 1842. See article Nimrud.

KUZISTAN. See Khuzistan.

KUZNICA BOBROWSKA, a village of Prussia, in the reg. of Posen, circle of Schildberg. Pop. 201.—There is a village in the same circle, distinguished as K. Myslniowska. Pop. 289.

KWALESTRAET, a commune of Belgium, in the prov. of E. Flanders, dep. of Nieuwerkerken. Pop. 146.

KWAN, a district and town of China, in the prov. of Shan-tung, div. of Tung-chang-fu, in N lat. 36° 33′, E long. 115° 39′.—Also a district and town of the prov. of Sze-chuen, div. of Ching-tu-fu, in N lat. 30° 59′, E long. 103° 42′.

KWAN-CHUN-CHU, a district and town of China, in the prov. of Kwei-chu, div. of Kwei-yang-fu, in N lat. 28° 8′, E long. 106° 14′.

KWANG-CHANG-HEEN, a district and town of China, in the prov. of Chih-le, and div. of Yih-chu, in N lat. 39° 24′, and E long. 114° 20′.—Also a district and town in the prov. of Keang-se, div. of Keën-chang-fu, between Nan-fung and Ning-to.

KWANG-CHING, a district and town of China, in the prov. of Shan-tung, div. of Tsaou-chu-fu.—Also a small town in Charra-Mongolia, in the territory of the Kartchin, on the Pao-ho, 129 m. NW of Peking. It contains a large temple dedicated to Fô.

KWANG-CHU, a division and town of China, in the prov. of Ho-nan. The div. comprises 4 districts.

The town is 210 m. S of Kae-fung-fu, in N lat. 32° 12′ 36″, and E long. 115°.

KWANG-CHU-FU, a division and town of China, in the prov. of Kwang-tung. The div. comprises 15 districts. The town is designated by Europeans CANTON: which see.

KWANG-GAN-CHU, a district and town of China, in the prov. of Sze-chuen, div. and 36 m. SE of Shun-king-fu, in N lat. 30° 31′ 26″, and E long. 106° 38′ 50″, on the r. bank of the Tsien-keang.

KWANG-FUNG, a district and town of China, in the prov. of Keang-se, div. of Kwang-sin-fu.

KWANG-HWA, a district and town of China, in the prov. of Hu-pih, div. of Fang-yang-fu, in N lat. 32° 27′, and E long. 111° 45′.

KWANG-LING, a district and town of China, in the prov. of Shen-se, div. of Tae-tung-fu, in N lat. 39° 46′, and E long. 114° 21′.

KWANG-NAN-FU, a division and town of China, in the prov. of Yun-nan. It comprises only the single district of Paou-ning-heën. The town is 165 m. ESE of Yun-nan, in N lat. 24° 9′ 36″, and E long. 105° 5′ 55″. It is surrounded by nearly inaccessible mountains, but the soil in many parts is extremely fertile. The inhabitants are denounced by their neighbours as barbarians.

KWANG-NING, a district and town of China, in the prov. of Shing-king, div. of Kin-chu-fu, in N lat. 41° 40′, and E long. 122°.—Also a district and town in the prov. of Kwang-tung, div. of Chaou-king-fu, 75 m. NW of Canton, in N lat. 23° 39′ 26″, and E long. 111° 58′ 55″.

KWANG-NING-CHING, a town of China, in the prov. of Shing-king, div. of Kin-chu-fu, 90 m. WSW of Moukden.

KWANG-PING-FU, a division and town of China, in the prov. of Chih-le. The div. comprises 10 districts. The town is 246 m. SSW of Peking, on the l. bank of the Fou-yam-ho, in N lat. 36° 45′ 30″, and E long. 114° 54′ 30″. It contains several temples, one of which is dedicated to those who have been supposed to have discovered the secret of rendering themselves immortal. The surrounding district is fertile and well-watered.

KWANG-PING-HEEN, a district and town of China, in the prov. of Chih-le, div. of Kwang-ping-fu, in N lat. 36° 34′, and E long. 115° 6′.

KWANG-SHAN-HEEN, a district and town of China, in the prov. of Ho-nan, div. of Kwang-chu, in N lat. 32° 8′, and E long. 114° 51′.

KWANG-SI, or QUANG-SI, a province of China, bounded on the N by Kwei-tchu and Hu-nan, from both of which it is separated by the Nan-ling mountains; on the E by Hu-nan and Kwang-tong; on the S by Kwang-tong and the prov. of Tonquin, in Annam; and on the W by Yun-nan. It lies between the parallels of 22° and 26° N; and between 105° and 113° E long. It is a mountainous and thinly settled region, with an area of 78,250 sq. m.; and a pop., according to Morrison, of 7,313,895. It is intersected from W to E, and nearly through its centre, by the Hong-kiang, which is joined by the Lieu-kiang on the N bank, and by the Ngo-yu-kiang on the S bank; and assumes thereafter, and towards the E extremity of the prov., the name of the Long-kiang. All its rivers belong to the basin of the Hong-kiang, with the exception of those which flow into the head of the gulf of Tonquin. The banks of the rivers sometimes spread out into plains—more in the E parts than elsewhere—on which abundance of rice is grown. There are mines of gold, silver, quicksilver, and other metals, in this prov., most of which are worked under the superintendence of government, but no data are accessible from which to ascertain the produce. Among the principal productions of K., besides provisions, are cassia, cassia-oil, ink-stones, sago, and cabinet woods. Its natural resources supply the principal articles of trade, for there are no manufactures of importance. Many partially subdued tribes are found within the limits of the prov., who are ruled by their own hereditary governors, under the supervision of the Chinese authorities. There are 24 districts occupied by these people, the names of whose heads-men are given in 'the Red book,' and their position is marked in the statistical maps of the empire; but no information is afforded by either concerning the numbers, language, or occupations of the inhabitants. K. is well-watered by the Hong-kiang, or 'West river,' and its great branches, which enable it to convey its timber and surplus produce to Canton, and receive from thence salt and other articles. The mountains rise to the snow-line on the NW, and much of the surface is uncultivable.—The capital, Kwei-lin-fu, lies on the Cassia river, a branch of the Hong-kiang, in the NE part of the prov. It is a poorly built city, surrounded by canals and branches of the river, destitute of any edifice worthy of notice, and having no great amount of trade; which indeed its situation in the most rugged part of the prov. would lead one to infer.—Sze-ching is on the frontiers of Tonquin.—Wuchau-fu, on the Hong-kiang, at its junction with the Leu-kiang, or Dragon-river, is the largest trading town in the prov.; all the export and import trade passes through it.—The independent districts are chiefly scattered over the SW near the frontiers of Annam, and if any thing could be inferred from their position, it might be thought that they were settled by Laos tribes, which had been induced by the comparative security of life and property within the frontiers, to acknowledge the Chinese sway. The unsubdued Miautsz are probably altogether distinct from these races; they occupy the NE portion of the prov. in the mountain-fastnesses between the frontier and Kwei-chu. This prov. is under the jurisdiction of the viceroy of Kwang-tung.

KWANG-SIN-FU, a division and town of China, in the prov. of Keang-se. The div. comprises 8 districts. The town is 150 m. E of Nan-chang-fu, on an affluent of Lake Pho-yang, in N lat. 28° 27′ 36″, and E long. 118° 6′. It has extensive manufactories of paper and of candles: the latter are considered the best in the empire. A strong garrison is kept in this town to defend the locality against the outlaws by whom the mountains are infested. The adjacent mountains afford fine rock-crystal, and contain quarries of red stone. The valleys have been rendered by diligent cultivation extremely fertile.

KWANG-TIH-CHU, a division and town of China, in the prov. of Gan-huwy. The div. comprises two districts. The town is 90 m. SSE of Nan-king, in N lat. 31°, and E long. 119° 23′.

KWANG-TSE, a district and town of China, in the prov. of Hu-pih, div. of Hwang-chu-fu, in N lat. 30° 10′, and E long. 115° 38′.

KWANG-TSUNG, a district and town of China, in the prov. of Chih-le, div. of Shun-tih-fu, in N lat. 37° 10′, and E long. 115° 18′.

KWANG-TUNG, or QUANG-TONG, a maritime province of China, extending between the parallels of 20° 13′ and 25° 34′ N, and the meridians of 108° and 117° 20′ E; and bounded on the N by Keang-se and Fo-kien; on the E by Fo-kien; on the S by the China sea; and on the W by Tonquin, Kwang-se, and Ho-nan. Its area is estimated at 79,456 sq. m.; and its pop. at 19,174,030. The province of K., from its having been for a long time the only one to which foreigners have had access, has almost become synonymous with China, although little more is really known of it than of the other provinces, except in

the vicinity of Canton, and along the course of the Pe-kiang, from Nan-hiung-chau to that city. Its facilities for internal navigation and extensive coasting trade, are unusually great; for while its long line of coast, nearly 1,000 m. in length, affords many excellent harbours, its rivers communicate with the regions on the W, N, and E, beyond its borders. The Nan-ling chain runs along the N frontier, between it and Kiang-si and Hu-nan. This chain assumes 40 or 50 names in its course from Kwang-si to Fo-kien, but no part of it is so well known as the road, 24 m. in length, which crosses the Mei-ling (Pum ridge) between Nan-ngan and Nan-hiung. The elevation here is about 1,000 ft., and none of the peaks in this part of the range exceed 2,000 ft. Towards Kwang-si they become more elevated. Their summits are limestone with granite underlying. Granite is the prevailing rock along the coast. The Li-mu ridge in the island of Hai-nan has some peaks reaching nearly to the snow-line. The bottoms of the rivers are wide, and their fertility amply repays the husbandman. Fruits, rice, silk, sugar, tobacco, and vegetables, constitute the greater part of the productions. Lead, iron, and coal, are abundant.

The Chu-kiang, or Pearl river, which flows past Canton, is formed by the union of three rivers, the West, North, and East; the two first unite at Sans-hwiu, to the W of the city; the East joins them at Whampoa. The Si-kiang, or West river, is by far the largest of the branches. It rises in the E part of Yun-nan, and receives tributaries throughout the whole of Kwang-si, along the S acclivities of the Nan-ling, and, after a course of 500 m., flows into the sea through numerous mouths, the best known of which is the Bocca-Tigris. The Pe-kiang, or North river, joins it after a course of 200 m., and the East is nearly the same length. These two streams discharge the surplus waters of all the northern parts of K. The country drained by the three cannot be much less than 150,000 sq. m., and most of their channels are navigable for boats to all the large towns in this and the prov. of Kwang-si. The Han-kiang, in the E end of K., is the only other river of importance. The large town of Chan-chu-fu or Tse-chiou lies near its mouth. The coast-line of K. extends from Namok island to Cochin-China, a distance of more than 600 m., in a SW direction. It is deeply indented with bays and estuaries, and presenting two remarkable exceptions to the general uniformity of the coast, viz., the large delta of the Pearl river, and the peninsula of Qu-chu, opposite Hai-nan. The number of islands scattered along this line is unknown; but if all are included, there can hardly be less than 300. The largest is Hain-nan or Keun-chu-fu.

KWANG-TUNG, a district and town of China, in the prov. of Yun-nan, div. and 18 m. NE of Tsu-heung-fu, in N lat. 25° 15′, E long. 101° 55′.—Also a prov. of Shin-king.

KWANG-YANG-HEEN, a district and town of China, in the prov. of Yun-nan, div. of Yun-nan-fu, in N lat. 24° 45′, E long. 102° 45′.

KWANG-YUEN-HEEN, a district and town of China, in the prov. of Sze-chuen, div. of Paou-ting-fu, 180 m. NE of Ching-tu-fu, on the l. bank of the Kia-ling-keang, in N lat. 32° 20′, E long. 105° 57′.

KWAN-SE-CHU, a division and town of China, in the prov. of Yun-nan. The town is 75 m. ESE of Yun-nan, in a plain, on the bank of a lake, in N lat. 24° 39′ 36″, and E long. 103° 49′ 5″.

KWAN-SHAN, a district and town of China, in the prov. of Keang-su, div. of Su-chu-fu, in N lat. 31° 28′, and E long. 120° 48′.

KWAN-TAOU, a district and town of China, in the prov. of Shan-tung, div. of Tung-chang-fu, 90 m. W of Tsi-nan, near the r. bank of the Oeï-ho, in N lat. 36° 42′, and E long. 115° 39′.

KWAN-TSIH-HEEN, a district and town of China, in the prov. of Fo-keën, div. and 15 m. NW of Shaou-wu-fu, in N lat. 27° 32′, and E long. 117° 28′.

KWAN-YANG, a district and town of China, in the prov. of Kwan-se, div. and 54 m. ENE of Kwei-lin-fu, in N lat. 25° 21′ 36″, and E long. 110°59′ 10″.

KWASSITZ, a town of Moravia, in the circle of Brünn, 15 m. NW of Ungarisch-Hradisch, on the r. bank of the Marche. Pop. in 1834, 1,157.

KWEI-CHE-HEEN, a district and town of China, in the prov. of Gan-hwuy, div. of Che-chu-fu.

KWEI-CHU, a district and town of China, in the prov. of Hu-pih, div. of E-chang-fu, 228 m. W of Wu-chang, on the l. bank of the Yang-tse-keang, in N lat. 30° 57′ 36″, E long. 110° 38′ 3″.

KWEI-CHU, or Koei-Tchou, a province of China, lying between the parallels of 24° 40′ and 29°, and the meridians of 103° 20′ and 109° 20′ E; and bounded on the N by Sech-wen; on the E by Hunan; on the S by Kwang-si; and on the W by Yun-nan and by Sech-wen. It is a wild mountainous district, — 'the Switzerland of China,' — inhabited by rude lawless tribes, who scarcely acknowledge the supreme government. The largest river is the Wu or Ou-kiang, which rises on the western frontier, and flows NE through the centre of the prov. to Se-nan, where it bends N, and crossing the frontier into Sech-wen, turns NNW, and joins the Yang-tse-kiang, on the r. bank, at the city of Pei. To this central river numerous streams descend both from the N and S. The head-streams of the Yuen-kiang rise in the SE part of the prov.; and several important feeders of the Hong-kiang or Kwang-si rise in the SW. The area of this prov. is estimated at 64,554 sq. m.; its pop. at 5,288,219. Its productions are rice, wheat, musk, tobacco, timber, cassia, lead, copper, iron, and quicksilver. Horses and other domestic animals are extensively reared.—The cap. is Kwei-yang-fu, situated near the centre of the prov., in N lat. 26° 30′, W long. of Pekin 9° 52′ 20″. There are many military stations in the S parts of the prov., intended to overawe the wild tribes of Miautz or Meaou-tsze, who are scattered over the wilder mountain-districts of the provs. of Kwang-tung, Kwang-si, Hu-nan, and Kwei-chu; and whose language is said to bear no analogy to that of the Chinese. These hardy tribes have frequently broken out into active hostilities against the Chinese government; and although vigorous efforts have more than once been made to subdue them, they still maintain comparative independence, and the general government contents itself with keeping them in check.

KWEI-GAN, a district and town of China, in the prov. of Che-keang, div. of Hu-chu-fu.

KWEI-HEEN, a district and town of China, in the prov. of Kwan-se, div. and 48 m. SW of Tsin-chu-fu, in N lat. 23° 7′, E long. 109° 18′.

KWEI-HWA, a district and town of China, in the prov. of Fo-keen, div. of Ting-chu-fu, in N lat. 26° 20′, E long. 117° 19′.

KWEI-HWA-CHING-TING, a district and town of China, in the prov. of Shan-se, div. of Leaou-chu, near the Mongolian frontier.

KWEI-HWA-TING, a district and town of China, in the prov. of Kwei-chu, div. and S of Gan-shun-fu.

KWEI-KE, a district and town of China, in the prov. of Keang-se, div. of Kwang-sin-fu, 93 m. ESE of Nan-chang, on an affluent of Lake Pho-yang, in N lat. 28° 16′ 48″, E long. 117° 17′ 20″. It is enclosed by walls of red brick, declining in height towards the river, and contains some well-built houses, and several triumphal arches.

KWEI-KEANG, a river of China, in the E part of the prov. of Kwan-se. It descends from the S side of the mountains of Nan-ling; runs S past the towns of Kwei-ling, Ping-lo, and U-chu; and joins the Ta-keang, on the l. bank, and after a rapid course of about 180 m.

KWEI-KUNG-HEEN, a district and town of China, in the prov. of Kwei-chu, div. of Kwei-yang-fu.

KWEI-LIN-FU, a division and town of China, in the prov. of Kwan-se. The div. comprises 10 districts. The town, which is the capital of the prov., is 1,185 m. SSW of Pekin, and 240 m. NW of Canton, in N lat. 25° 13′ 12″, E long. 110° 13′ 50″. It is situated on the Kwei-keang, at the foot of a mountain, covered with an odoriferous shrub named Kwei, which gives to the town its name. The town is of large extent, and is built in the style of the ancient fortresses of Europe. It is noted for its ink, and has some trade, but is greatly inferior in importance to most of the other provincial capitals of the empire.

KWEI-PING-HEEN, a district and town of China, in the prov. of Kwan-se, div. of Tsin-chu-fu.

KWEI-SHEN-HEEN, a district and town of China, in the prov. of Kwang-tung, div. of Hwuy-chu-fu.

KWEI-SHUN-CHU, a district and town of China, in the prov. of Kwan-se, div. and 18 m. SW of Chin-gan-fu, in N lat. 23° 10′, E long. 106° 4′.

KWEI-TIH-FU, a division and town of China, in the prov. of Ho-nan. The div. comprises 8 districts. The town is in a fertile plain, between two large rivers, 90 m. ESE of Kae-fung-fu, and in N lat. 34° 20′ 40″, E long. 115° 51′. It has but a scanty pop., and possesses, notwithstanding the advantages of its position, but little industry.

KWEI-TIH-LING, a district and town of China, in the prov. of Kan-suh, div. of Se-ning-fu.

KWEI-TING, a district and town of China, in the prov. of Kwei-chu, div. and 33 m. E of Kwei-yang-fu, in N lat. 26° 30′, E long. 107° 6′.

KWEI-TUNG, a district and town of China, in the prov. of Hu-nan, div. of Lin-chu, 174 m. SSE of Chan-sha-fu, in N lat. 26° 3′ 36″, E long. 113° 34′.

KWEI-YANG-CHU, a division and town of China, in the prov. of Hu-nan. The div. comprises 3 districts. The town is 186 m. S of Chan-sha, in N lat. 25° 48′, E long. 112° 3′ 3″.

KWEI-YANG-FU, a division and town of China, in the prov. of Kwei-chu. The div. comprises 8 districts. The town, which is the capital of the prov., is 510 m. NW of Canton, and 1,200 m. SW of Pekin, in N lat. 26° 30′, E long. 106° 36′. It is situated among steep mountains, near a river, and has a circumf. of about 3 m. The houses, consisting of brick and mud, are little better than huts, and are set down without any regularity,—the dread of invasion from the mountaineers being the alleged reason for disregard of all luxury in their dwellings. This town is said to have been the residence of the ancient kings of China; and the remains of temples and palaces which it still contains, evince its having formerly been a place of importance.

KWEI-YANG-HEEN, a district and town of China, in the prov. of Hunan, div. of Lin-chu, 210 m. S of Chan-sha, in N lat. 25° 48′, E long. 112° 3′ 3″, on the N side of the Siao-moey-ling mountains.

KWETTAH. See Shawl.

KWI, a small town near Point Kwi, on the W coast of the gulf of Siam, in N lat. 11° 58′.

KWIECESZEWO, a village of Prussia, in the reg. of Bromberg, circle of Mogilno. Pop. 513.

KWIN-NYON, or Quinhone, a port on the coast of Cochin-China, in N lat. 13° 41′. It is accessible only to vessels drawing 3 fath. water.—Within 15 m. of the port is a town of the same name, which is connected with it by a river, and is 3 days' journey by land from the capital.

KYAN-DUAYN, or Kyen-Dwen, a large river of Trans-Gangetic India, the largest tributary of the Irawaddi. It rises in a region called Hukhung, between the parallels of 26° and 27°, where it bears the name of the Tenui; flowing S through a narrow valley, it is joined by the Nampagna, under the parallel of 25°, and assumes the name of the Ningthi. In N lat. 23° 15′ it is joined on the r. bank by the Muthni or Munipore; and from this point its course is E of S to the Irawaddi, which it joins by two arms under 21° 40′. Its entire course is about 450 m.

KYANS, an extensive native race of the island of Borneo, whose tribes, differing however in various customs, are found on the great rivers Banjar, Pasir, and Coti, and probably on all the rivers of the E coast. On the N and NW parts of the island, they are found in the interior, along the course of the Bintulu, Barram, Rejang, and other rivers, as far W as the country of the Sarebas Dyaks; but they only occupy the inland parts, at a great distance from the coast, generally having between it and them other tribes, and frequently Malayan states. The K. of the rivers Banjar, Coti, and Pasir, appear to have been always subject to the European or Malayan power, which holds the mouth of their respective streams; but the K. of the NW have always been dreaded by the inhabitants of the Malayan towns of the coast. In their government they are said to resemble the Sea Dyaks, each village being under one chief, who is, however, subservient to the authority of a higher chief, while the whole country is divided into little states, each containing several villages, tributary to that in which the rajah of the prov.—as he is said to term himself—resides. The principal chief of this kind is the Rajah Nipa, who resides on the head-waters of the great river Rejang. The country of the K. is reported by all who have visited it to be very populous,—more so than any other parts of the island. In some parts of it gold and diamonds are found. Bees' wax and camphor are exported by the K. largely from Bintulu and Serekei, at which towns these commodities are collected by Mahommedan traders, who ascend these rivers, and by whom the whole of this valuable trade is carried on, in exchange for salt, cloth, beads, brass wire, and ivory. In war, the dress of the men differs much from that of the Dyaks of other denominations. The jackets they wear on these occasions are made of the skins of beasts; those of the panther and the bear are the most esteemed. A hole is cut in the skin, through which the head of the warrior is thrust, and the skin of the head of the animal, hanging down over his breast, is ornamented with little shells, placed over one another like scales. The broad part of the skin forms the back part of the jacket, the edges of which are bound with wide stripes of red cloth. Bunches of the feathers of the rhinoceros hornbill depend from little strings of beads fastened to the skin, and dangle in the breeze as they move about; and strings fixed in the inside of the skin, long enough to tie round the body, protect the dress from being blown about. Their war head-dresses represent monstrous masks or faces, and are formed of a frame-work of rattan covered with bear's skin or the skin of some other animal. They blow their poisoned arrows through the *sumpitan* with great force and accuracy. The poison is the *ipoh*, identical with the *upas* and *chetik* of Java. The darts employed are very thin, about 10 inches in length, and pointed with the sharp teeth of fish. The case which contains the darts is supported by the sword-belt, and is made of a bamboo joint. The whole distance to which the arrow can be blown with anything like effect, is 60 yds.; and at that distance they would probably not pierce the skin. The *sumpitan* varies in length, being from 7 to 10 ft. It is used also by the Mui people, the Benkatan, and the Tatows, and by all the tribes of the E coast. The swords of the K. tribes are of very peculiar construction. The iron from which they are formed is said to be the production of the country, and is prepared by the natives. The blades are convex on one side, and concave on the other, so that they can only be used in cutting from r. to l. They are generally about 2 ft. long, and 2¼ in. broad at the broadest part, and are frequently finely inlaid. The handle is of buck's-horn, often beautifully carved. Among the K. head-hunting is practised to a frightful extent. Mr. Law, from whose work on Sarawak we have abridged this notice of the K., says, that "notwithstanding the barbarity they display, and the bloody and ferocious tastes which lead to their wars, they are not, as they have been hastily stigmatized, cannibals; nor does any race, which, like the Battas of Sumatra, practises the horrid custom of feeding on the bodies of their own species, exist on the island."

KYBURG, a village of Switzerland, in the cant. of Zurich, district of Pfæffikon. Pop. 374, Protestants.

KYFFHAUSER, a mountain of Prussian Saxony, between the village of the Little Wipper and the Helme, to the N of Frankenhausen. Alt. 1,444 ft.

KYHNA (Gross and Klein), two villages of Prussia, in the reg. of Merseburg, circle of Delitsch. Pop. of Gross K. 192; of Klein K. 193.

KYLA, a small town of Sweden, in West Gothland, 23 m. SW of Carlstadt.

KYLE, a parish in Queen's co., 2 m. WNW of Borris-in-Ossory. Area 7,145 acres. Pop. in 1831, 1,810; in 1841, 1,888.—Also the middle district of Ayrshire, watered by the Ayr, the Coyl, the Lugar, the Cessnock, and the Nith. Pop. in 1831, 56,066; in 1841, 61,547.

KYLEMORE, a lake and rivulet in the p. of Ballinakill, co. Galway. The rivulet rises on the N side of the Binabola mountains, and flows 3 or 4 m. to the lake, which has a length of 2¼ m., and an area of 416 acres, and is overhung on the N side by Gurraun, alt. 1,973 ft., and on the S side by Benculeagh, alt. 2,084 ft., and Benbawn, alt. 2,395 ft.

KYLES-OF-BUTE, a narrow and remarkably picturesque arm of the frith of Clyde, which separates the NW part of the island of Bute from the districts of Kerry and Cowal on the mainland, in Argyleshire. After passing Port-Bannatyne bay, on the l., and leaving the mouth of Loch-Striven to the r., we find ourselves sequestered in the K. In the most picturesque part the passage narrows into the size of a small river, and the eye in vain searches for an opening through which to proceed—the hills being so closely joined, as to appear like one immense barrier surrounding the extremity of an inland lake. Passing the mouth of Loch-Ridan on the r., and bending suddenly to the l., the farther passage of the K. gradually and gracefully evolves itself, until the character of a strait is lost in the wide expanse of water that is overlooked by the lofty and distant peaks of Arran.

KYLIE, or KAILI, a town on the W coast of Celebes, inhabited by Bugis, who during the SW monsoon employ themselves in fishing for trepang and procuring tortoise-shell; and when the monsoon is changing, and before the NE winds set in, scour the straits as far as Lingan, taking and plundering every vessel. It is said that in the various ports and rivers of the district which takes its name from this town there are not less than 700 prahus of various sizes, all of which are employed occasionally in piratical expeditions. From K. to Mandaar point there are five principal rajahs, besides a host of petty chiefs. Each rajah of the first class has from 150 to 200 prahus; and each petty chief from 5 to 30.

KYLIE (POINT), a cape on the W coast of the island of Celebes, in S lat. 2° 30′.

KYLL, a small river of Prussia, which rises between the frontiers of Limburg and Juliers, to the NW of Kronenburg, and falls into the Moselle, 5 m. below Treves, after a course of 60 m. from N to S.

KYLLBURG, a small town in the Prussian prov. of the Rhine, on the river Kyll, 30 m. NNE of Luxemburg. Pop. 858.

KYLLBURGWEILER, a village of Prussia, in the reg. of Treves, circle of Ositburg. Pop. 144.

KYLOE, a chapelry in the co.-palatine of Durham, 6 m. NW of Belford. Area 7,750 acres. Pop. in 1831, 927; in 1841, 1,023.

KYME, a parish in Lincolnshire, 7 m. ENE of Sleaford. Area 8,210 acres. Pop. in 1841, 942.

KYMMENEGARD, a very extensive province of Finland, formerly belonging to Sweden, but ceded by that power to Russia in 1809. It stretches along the river Kymmene, between the parallels of 60° 15′ and 62° 20′ N, and includes a tract of country equal to the half of Scotland. Besides the Kymmene, it is watered by the Suima, the Pæjjæne, and the Punlavasi.—The K. river rises in Lake Pyhajarvi, and flows into the gulf of Finland in a course of about 72 m. prevailingly from N to S.

KYMOLOS. See ARGENTIERA.

KYN, a small island of the Baltic, on the coast of Russia, 40 m. N by E of Riga. It is about 5 m. long.

KYO, a township in the co.-palatine of Durham, 9 m. NW of Durham. Area 1,230 acres. Pop. in 1831, 412; in 1841, 965.

KYOTTMUNGUR, a village of Western Australia, in Perth co., at the junction of the Howick and Swan rivers.

KYPE, a small stream of Lanarkshire, which falls into the Avon a few miles above its junction with the Clyde.

KYRANTY, a town of Hindostan, in the district of Cutch-Bahar, on the S bank of the Durlah river. It formerly possessed a fort, but for many years the fortifications have been neglected.

KYRAUT, a district of Hindostan, situated between the 27th and 28th parallels of N lat. To the N it is bounded by the Himalaya mountains; to the E by Butan; to the S by Morung; and on the W by Nepal. The Tista is its principal river, and its chief town Damsong. In 1769, it was conquered by the rajah of Nepal, but it is little known to Europeans.

KYRE (GREAT), a parish in Worcestershire, 16 m. W by N of Worcester. Area 1,580 acres. Pop. in 1831, 159; in 1841, 160.

KYREGUR, a town of Hindostan, in the prov. of Oude, district of Barcilly, in N lat. 28° 18′.

KYRE-MINOR, a chapelry in the p. of Stoke-Bliss in Worcestershire, 4 m. SE of Tenbury. Area 1,130 acres. Pop. 144.

KYRITZ, a town of Prussia, in Brandenburg, on the Jägelitz, 46 m. NW of Berlin. Pop. 3,069.

KYTAH, a British station in Bundlecund, 10 m. from Kocheck, and 15½ m. from Chicari, in the midst of dreary arid flats intersected by deep ravines.

KYTU, a very lofty summit on the NW frontier of Afghanistan, in N lat. 34° 40′, E long. 62° 35′. It towers to a great height above a pass which is at least 6,000 ft. above sea-level.

KYUK-FYU, a harbour and recently-formed military post in Aracan, at the N end of Ramri island. The harbour is capacious, with good anchorage, and is secure from every wind. It is a watering-place for trading-vessels from Bassein on their way to Chittagong and Calcutta.

KYUKKUNGI, a town of Burmah, on the r. bank of the Bassein arm of the Irawaddi, 10 m. above Bassein.

KYUK-MAU, a village of Burmah, on the W bank of the Irawaddi, in about 23° N lat. It consists of 50 or 60 houses, and has two monasteries. The remains of two ancient cities are not far from this village. On the E side of the river no mountains are seen; on the W side they are still in sight, but some distance back, so that the valley becomes large. The interior of the country hereabouts is inhabited by Shans, and on the mountains are scattered tribes of Ke-Shins, a people who figure largely in the fears and tales of the village through the N portion of the empire. The soil from this village northward is rich and friable, and under judicious cultivation would probably yield a hundredfold; but all the instruments are of the rudest kind, and the manner of preparing the ground what might be expected of an oppressed, indolent people.

KYUKZUK, a town of Burmah, 30 m. SE of Pugan, in N lat. 20° 57′.

KYUMYUNG, a town of Burmah, on the r. bank of the Irawaddi, 32 m. above Amarapura.

KYUNTUMI, a town of Burmah, on the r. bank of the Bassein arm of the Irawaddi, in N lat. 17° 26′.

KZIENSOWIESCH, a village of Prussia, in the reg. of Oppeln, circle of Gross-Strehlitz. Pop. 565.

L

LAA, Laab, or Laha, an ancient town of Austria, in the lower circle of the Mannhartsberg, on an island of the Taya, 29 m. N of Korneuberg, and 39 m. N of Vienna, on the confines of Moravia. Pop. 1,378. It has a castle and is fortified.

LAACHER-SEE, a lake of Prussia, in the prov. of the Rhine, regency and 16 m. WNW of Coblenz, circle and 5 m. NNE of Mayen, near the Glees, at an alt. of 728 ft. above the level of the Rhine. It is 1,449 toises or 3,090 yds. in length, and 1,315 toises or 2,782 yds. in breadth, and about 214 ft. in depth. It appears to occupy the crater of an extinct volcano, and is encircled by a ridge of gently sloping hills composed of irregular beds of loose tufa. On its E bank is a deep aperture from which a considerable volume of carbonic acid gas is continually emitted, and in the vicinity is a mineral spring. The waters of the lake are bluish in colour, but clear, and abound with cray-fish, tench, pike, &c. They are remarkable for their coldness, but are never known to freeze. The name is derived from the village of Laach, which is situated at a short distance from its banks. The picturesque ruins of a considerable abbey, founded in 1093 by Henry II. of Laach, count of Lower Lorraine, are still to be seen on the W side of this lake. The locality is one of great beauty, and is much frequented by the inhabitants of Coblenz, and by geologists.

LAAK, Bischofs-Laak, or Shkafia-Loka, a town of Austria, in the gov. and circle and 18 m. NW of Laibach, at the confluence of the Bola and Zeyer, 5 m. SSW of Feichting. Pop. 1,072. It contains the ruins of a castle, and possesses manufactories of linen, thread, and iron-ware.

LAALAND, Lavland, or Lolland, an island of Denmark, forming, with the islands of Langöe, Weilöe, Steensöe, Falster, Femöe, Feiöe, Afköe, and several other smaller islands, a diocese and administrative province, containing a superficies of 30·25 German sq. m. and 99,300 inhabitants. The cap. of the prov. is Maribö.—The island of L., in the W part of the prov., lies in the Cattegat, to the S of Sieland, SE of Langeland, and W of Falster, from which it is separated by the Guldborg-Sund, between 54° 38′ 50″ and 54° 58′ 25″ N lat., and 10° 59′ and 11° 53′ E long. Its length from E to W is 39 m., and its greatest breadth 15 m., comprising a superficial area of 460 sq. m. Pop. in 1847, 53,200. Its coasts, except on the SW, are thickly indented with numerous bays, and on the SE is an extensive sand-bank. The shores, especially on the SW, are little above tide-level, and are consequently often submerged, and towards the centre of the island is a large lake named Maribö, the outlet of which forms the only river of any magnitude in the island. The soil, consisting of black mould, has a calcareous substratum, and is remarkable for its fertility, producing wheat of the best quality, rye, barley, oats, legumes, hops, hemp, fruit, &c., in great abundance. The sown is to the unsown land as 1 to 3·09. It has also extensive forests of oak which furnish excellent timber. Cattle, pigs, geese, and other aquatic fowls, and bees, are reared in great quantities by the inhabitants. The coasts abound with fish. The only articles of manufacture are of the commonest description, and for local use. The principal towns are Maribö, with 1,400 inhabitants, and Nakskov with 2,600 inhabitants, which latter is the chief seat of the trade of the island, Nyested with 1,000, and Rödby with 1,200 inhabitants.

LAANSCHITZ. See Cseklesz.

LAARA, a town now in ruins in Turkey in Asia, in Anatolia, in the sanj. and 8 m. ESE of Adalia, and on the gulf of that name. It has a harbour; and in the vicinity are well-frequented baths.

LAARAT, an island of the Asiatic archipelago, NNE of Timorlaut, from which it is separated by a channel 3 m. in breadth, in N lat. 6° 50′, and E long. 131° 50′. It is 27 m. in length from E to W, and about 18 m. in breadth. Scarcely anything is known either of its inhabitants or productions.

LAARWALD, a village of Hanover, in the district of Bentheim, on the Vecht.

LAAS, a town of Austria, in Illyria, in the gov. and 27 m. S of Laibach, circle and 17 m. SE of Adelsberg. Pop. 520. It has a castle, formerly inhabited by the princes of Laas. It possesses several tanneries, and has some trade in horses, hides, and salt. In the vicinity is a lake abounding with fish. —Also a village in the Tyrol, on the Etsch, NW of Botzen.

LAASCH (Gross), a village in the grand-duchy of Mecklenburg-Schwerin, E of Ludwigslust. Pop. 1,346.

LAASEN, or Laasan, a village of Prussia, in Silesia, in the circle of Breslau, N of Schweidnitz, on the Strigauer-Water. Pop. 424.

LAASPHE, a town of Prussia, in the prov. of Westphalia, regency and 39 m. SSE of Arnsberg, and circle of Witgenstein, on the l. bank of the Lahn. Pop. 1,800. It has manufactories of cloth, and several iron-works.

LAATZIG, a village of Prussia, in the reg. of Stettin, circle of Cammin, on the Dievenow. Pop. 257.

LABA, a river of Russia in Asia, in Western Circassia, which has its source in the dividing ridge on the N frontier of Abasia, in N lat. 43° 40′; runs NNE, and then NNW; and joins the Kuban, opposite Ust-Labinsk, after a course of about 180 m. Its principal tributaries are the Kujodshiol, the Tshamlyk, the Tshegrasa, and the Farss.

LABABAR, a village of France, in the dep. of Finistere, cant. of Plogastel, 14 m. W of Quimper. Pop. 364. It has an annual fair.

LABACH, a village of Prussia, in the reg. of Treves, circle of Saarlius. Pop. 435.

LABAJOS, a town of Spain, in Old Castile, in the prov. and 30 m. WSW of Segovia, and partido of Santa Maria-de-Nieva, on the road from Valladolid to Madrid. Pop. 786. It has a parish-church, a public granary, and an estanco or repository for patent goods, and possesses some manufactories of bolting-cloth.

LABARTHE-RIVIERE, a commune of France, in the dep. of the Haut-Garonne, cant. of Saint-Gaudens. Pop. 1,558.

LABASHEEDA, a village at the head of a bay of the same name, in co. Clare, 4½ m. SW of Kildysart. Pop. 606.

LABASTIDA, a town of Spain, in the prov. of Alava, and partido of Guardia, on the slope of the Sierra-de-Tolono, 7 leagues from Vitoria. Pop. 2,316. It contains the ruins of a castle and some other fortifications, a parish-church, and a convent. It has manufactories of brandy.

LABATA, a town of Spain, in Aragon, in the prov. and partido, and 15 m. E of Huesca. Pop. 378.

LABATA, or Mueni-Calunga, a town of Lower Guinea, in Benguela, 60 m. SW of São-Felipe-de-Benguela.

LABATHUDE, a commune of France, in the dep. of the Lot, cant. of La-Capelle-Marival. Pop. 1,240.

LABATUT, a commune of France, in the dep. of the Landes, cant. of Pouillon. Pop. 1,519.

LABBE', Laby, or Labe', a town of Senegambia, in the territory of Futa-Dialon, 58 m. direct distance NNW of Timbo, near the sources of the Gambia, Rio-Grande, and Senegal, in N lat. 11° 20'. It is represented as having an active trading pop., who push their enterprises as far as Timbuctu, which distance they perform in four months. It was visited by Watt and Winterbottom in 1794, who describe it as 2½ m. in circuit, and containing a pop. of 5,000.

LABBODY, a town of Upper Guinea, on the Gold coast, in the Inkran territory, 6 m. NE of Christiansborg.

LABBRO, a town of the Papal states, in the deleg. and 7 m. NNW of Rieti. Pop. 900.

LABCHISTA, or Lapsista, a village of Albania, in the sanjak and 4 m. NNW of Janina, on the S bank of a small lake of the same name, which communicates with that of Janina.

LABECEDE - LAURAGAIS, a commune and village of France, in the dep. of Aude, cant. of Castelnaudery. Pop. 1,144.

LABEHN, a village of Prussia, in the reg. of Coslin, circle of Stolpe, near Stolpe. Pop. 149.

LABENZ, a village of Prussia, in the reg. of Cöslin, circle of Schiefelbein. Pop. 435.

LABER, a town of Bavaria, in the Upper Palatinate, 9 m. NW of Regensburg, on the l. bank of a stream of the same name, which flows into the Danube at Sanzing, after a course of about 30 m. from NW to SE. The town has 3 churches, a castle, an hospital, a paper-mill, and a gunpowder manufactory. Pop. 860.—Also a river in the circle of Lower Bavaria, which rises near Sandlzhausen, and flows NE to the Danube, which it joins on the l. bank, a few miles above Straubing, after a course of 35 m.

LABES, a town of Prussia, in the prov. of Pomerania, reg. and 42 m. ENE of Stettin, on the l. bank of the Rega, at its confluence with the Lotznitz. Pop. 3,207. It has manufactories of coarse woollens, and some trade in wood.

LABESEAU, a village of France, in the dep. of La Gironde, cant. and 4 m. WNW of Grignols. Pop. 218.

LABESSERETTE, a commune and village of France, in the dep. of Cantal, cant. of Montsalvy. Pop. 1,379.

LABESSIERE-CANDEIL, a commune of France, in the dep. of Tarn, cant. of Gadalen. Pop. 1,054.

LABIA, a town of Turkey in Servia, in the sanj. of Kruschevacz, on the l. bank of the East Morava, 25 m. S of Nissa.

LABIAR, a village of Tripoli, in Barcah, 42 m. NE of Benghazi.

LABIAU, a town of Prussia, in the reg. and 26 m. ENE of Königsberg, on the Deine, within a ½ m. of its embouchure in the Kurische-haff. Pop. 3,595. It has tanneries, breweries, distilleries, potteries, and a linen-market; and conducts an active fishery in the haff.

LABISCHIN, or Labiszyn, a town of Prussia, in the reg. and 12 m. SSW of Bromberg, on an island formed by the Netze. Pop. 2,520, of whom a considerable proportion are Jews. It has manufactories of woollens, and some trade in wood.

LABLACHEN, a village of Prussia, in the reg. of Königsberg, circle of Labiau. Pop. 576.

LABORCZA, a river of Hungary, which rises in the mountains on the N frontier of the com. of Zemplin; runs S, and then SW; and uniting with the Latorcza coming from the E, near Zemplin, forms the Bodrog. Its principal affluents are the Cztroka and Ungh on the l., and the Ondava on the r.

LABOUAN. See Labuan.

LABRADOR, a peninsular portion of British North America, lying opposite the island of Newfoundland, from which it is separated by the straits of Belleisle, and extending between the 50th and 60th parallels of N lat. It is bounded on the N by Hudson's straits; on the E by the Atlantic ocean; on the S by the straits of Belleisle, and the gulf of St. Lawrence; and on the W by Lower Canada, and by Rupert's river district and the territory to the N of it stretching to Hudson's strait. The W limits are very indefinite; and the territory to the N of Rupert's river district, between Hudson's bay and Hudson's strait, is sometimes comprehended under the general name Labrador. A physical boundary might perhaps be found in the course of the Wanquesh river, and its continuation the Kokovak, which flow NW into Ungava bay, and that of the Meshickeman or North-West river, which flows into the straits of Belleisle. This frontier would however reduce the area usually assigned to L. by nearly one-half. This region was discovered in 1496 by the Portuguese, and by them named Terra de Laborador, or 'Ploughman's or Cultivable land,' a designation to which it seems to have very little title. For many years after its discovery by Gaspar de Corte Real it was called after him Terra Corterealis. It is frequently comprised under the name New Britain; and its NW prolongation towards Hudson's bay is generally denominated the East Main by the Hudson's bay settlers. The whole of this vast tract of country, as far as it has hitherto been explored, is extremely barren and dreary; its surface is everywhere rugged, and covered with large stones; the mountains are devoid of herbage, producing at best a little moss or a few blighted shrubs. The southern tracts present some appearance of soil capable of cultivation; and in the deep bays a little timber may be found, consisting of scraggy poplars, and stunted firs and birch, and aspens. Corn does not ripen; but potatoes, cabbages, and turnips are grown; but the prevailing aspect of the whole region is a heap of bare and frightful rocks. The highest mountains extend along the E coast, from lat. 54° to lat. 59° or 60°; but their elevation does not appear anywhere to exceed 3,000 ft. There are vast chains of lakes and ponds throughout the country, produced by the rains and melting of the snow, but springs are extremely rare.

The climate is remarkably rigorous; and the winter lasts about nine months from the middle of September to the middle of July. A meteorological journal kept at Nain, in 57° of N lat., thus records the state of the thermometer:

1777.	Highest.	Lowest.	Mean.
August,	76° 0′	36° 0′	52° 3′
September,	72 0	27 0	43 6
October,	51 0	12 0	30 2
November,	41 0	8 0	15 4
December,	31 0	26 0	10 3
1778.			
January,	18 0	30 0	12 2

August,	74 0	40 0	52 5
September,	69 0	34 0	43 5
Mean,			32 6

The prevailing winds on the E coast are from WSW to NW.

Of the mineralogy of L. little is known. The only mineral productions hitherto discovered are iron ore, granite, hornblende, limestone, lapis-ollaris, hæmatite, and the beautiful shining spar called the Labrador stone, which is collected by the Esquimaux on the shores of the sea and lakes, particularly in the vicinity of Nain. The prevailing rock is gneiss, overlaid by sandstone near the shore.

The animals of this country are neither very numerous nor various. Rein-deer are tolerably abundant; and black and white bears are frequently seen in considerable numbers, especially where fish, retarded in their progress by the cataracts, are found collected in one place. Wolves, foxes, mountain cats, martins, beavers, otters, hares, a few ermines, and porcupines, are the principal quadrupeds met with. The more permanent feathered inhabitants are eagles, hawks, horned owls, the red game, and a smaller species called the spruce partridge. Many migratory birds frequent the woods and lakes in summer and autumn, and some of the smaller sort are remarkable for their beautiful plumage; but after the breeding season is past they seek a happier clime before the approach of winter. Curlews are extremely abundant; and sea-fowl are numerous, especially in the little islands which lie along the E coast. The rivers are frequented by salmon and sea-trout, pike, barbel, and eels. There are no venomous insects or reptiles; but the myriads of small flies in the warmer months are exceedingly tormenting.

Labrador is very thinly inhabited. The natives, a miserable and diminutive race, consist of various tribes who are perpetually at war with each other, and may be divided into two general classes,—the mountaineers who inhabit the inland districts,—and the Esquimaux who occupy the sea-coasts. The former resemble the Hudson's bay Indians; and those of them who frequent the S parts of L. carry on a regular intercourse with the Canadian traders. They are of a low stature; but possess a robust constitution, and are capable of enduring great fatigue in travelling. They travel chiefly by means of canoes covered with the rind of birch, which are sufficiently large to contain a whole family with their articles of traffic, and yet so light as to be easily carried on their shoulders. Their chief occupations consist in hunting rein-deer, catching seals, and collecting furs, which they barter for blanketing, firearms, ammunition, and spirits, of which last article immoderately fond. Some of them have been visited by Roman Catholic missionaries, and still retain an attachment to the priests of the Canadian church. The Esquimaux were formerly settled at different places on the coast, almost as far down as the river of St. John's; but in consequence of quarrels with the mountaineers, their inveterate enemies, or of the encroachments of Europeans, they have removed their habitations far to the N. They are of small stature, and of a lighter colour than the other natives. They bear a near resemblance to the Greenlanders in their persons, language, and customs; and are considered as having emigrated from the opposite coast of Davis' straits. The Moravian missionaries, since 1764, have been endeavouring with wonderful perseverance to bring those rude tribes to the habits of civilized life, and the duties of the Christian religion. They have succeeded in forming three settlements on the coast of L., viz., Nain, Okkak, and Hopedale, which employ 25 missionaries, and contain altogether about 600 inhabitants, of whom above one-half belong to their congregations. The entire fixed pop. of L. probably does not exceed 4,000.

The coast of L. is frequented for fishing for a distance of 10° or 12° of latitude. It has been preferred to any other, for a long time, even by the Americans, on account of its security, and the general certainty of obtaining a supply of fish. The fishing is done in boats, and the number usually employed is one boat for every 30 tons of a vessel's register. Mr. Macgregor says that during the fishing season from 280 to 300 schooners proceed from Newfoundland to the different fishing-stations on the coast of L., where about 20,000 British subjects are employed for the season. About one-third of the schooners make two voyages, loaded with dry fish, back to Newfoundland during summer; and several merchant-vessels proceed from L. with their cargoes direct to Europe, leaving generally full cargoes for the fishing-vessels to carry to Newfoundland. A considerable part of the fish of the second voyage is in a green or pickled state, and dried afterwards at Newfoundland. Eight or nine schooners from Quebec frequent the coast, having on board about 80 seamen and 100 fishermen. Some of the fish caught by them is sent to Europe, and the rest carried to Quebec; besides which they carry annually about £6,000 worth of furs, oil, and salmon, to Canada. From Nova Scotia and New Brunswick, but chiefly from the former, 100 to 120 vessels resort to L. The burden of these may amount to 6,000 or 7,000 tons, carrying about 1,200 seamen and fishermen. They generally carry the principal part of their cargoes home in a green state. One-third of the resident inhabitants are English, Irish, or Jersey servants, left in charge of the property in the fishing-rooms, and who also employ themselves in the spring and fall catching seals in nets. The other two-thirds live constantly at L., as furriers and seal-catchers, on their own account, but chiefly in the former capacity, during winter, and all are engaged in the fisheries during summer. Half of these people are Jerseymen and Canadians, most of whom have families. From 16,000 to 18,000 seals are taken at L. in the beginning of winter and in spring. They are very large, and the Canadians and other winter-residents are said to feast and fatten on their flesh. About 4,000 of these seals are killed by the Esquimaux. The whole number caught produce about 350 tons of oil, value about £8,000. There are six or seven English houses, and four or five Jersey houses established at L., unconnected with Newfoundland, who export their fish and oil direct to Europe. The Moravians, whose principal settlement on the coast of L. is at Nain, have a ship annually from London, which leaves the Thames in May or June, and arrives at Nain in July, from whence it returns in September, laden with a valuable cargo of furs, oils, &c., for London. [*Commercial Tariff.*]

LABRAZA, a town of Spain, in the prov. of Alava, partido and 12 m. E of La Guardia, and 33 m. SE of Vittoria, on a mountain. Pop. 182. It is enclosed by walls, and was formerly a place of considerable strength.

LABRE'DE, a canton and commune of France, in the dep. of the Gironde, arrond. of Bordeaux. The cant. comprises 13 com. Pop. in 1831, 10,697; in 1841, 10,858. The v. is 19 m. S of Bordeaux, on an affluent of the Garonne. Pop. 1,328. It is noted as the birth-place of Montesquieu. The locality affords excellent wine.

LABRIT, a canton and commune of France, in the dep. of the Landes, arrond. of Mont-de-Marsan.

The cant. comprises 9 com. Pop. in 1831, 5,579; in 1841, 5,778. The v. is 16 m. N of Mont-de-Marsan, on the Lestrignon. Pop. 938. It has two annual fairs. This place was formerly named Albret, and was capital of a small territory of the same name. It contains the ruins of a castle which belonged to Henry IV.

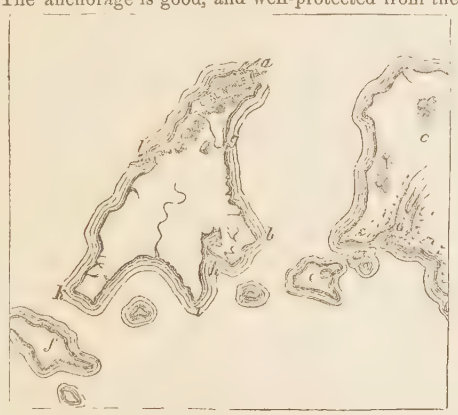
LABRO, a mountain in Tuscany, in which the Trusubbio, an affluent of the Ombrone, has its source.

LABSOL, a town of Tibet, in the prov. of Wei, about 150 m. SE of Lassa.

LABTCHOU, a town of Chinese Turkestan, 70 m. W of Khamil.

LABU, a town of Upper Guinea, in the territory of Yarriba, a little to the SE of Jannah, and 112 m. SE of Abomey.

LABUAN, or Labuhan, an island of the Malay archipelago, about 20 m. distant from the mouth of the Borneo river, on the NW coast of Borneo, in N lat. 5° 19′, E long. 115° 10′. It is of a triangular form, 10 m. in greatest length from NNE to SSW, and 5 m. in greatest breadth. Its area probably does not exceed 30 sq. m. It rises to an alt. of about 40 ft. above sea-level towards Bethune-head (*a*), its N point. The channel between its most eastern point, Tarras-point (*b*), and the nearest point of the mainland of Borneo (*c*), is but 4½ m. broad; and this channel is again further restricted by 4 islets, which, with 4 more lying to the SW, afford shelter in the SW or mild monsoon. This island was ceded to England in 1846, and the colony of L. was opened to settlers and other immigrants from and after the 1st of August 1848; the town of Victoria was also declared a free port, without any duties on imports or exports, and without tonnage or anchorage dues. The town from the sea presents a regular appearance. The anchorage is good, and well-protected from the



NE. Fish is abundant off the coast.—At the end of 1848 the pop., inclusive of the troops, 98 in number, amounted to 430 males, and 17 females, of whom the Europeans were 29 in number. In 1849, the total pop. was 751, of whom 175 were troops, and 26 Europeans; and the deaths amounted to 23. At present the climate is far from being healthy; but doubtless this is due in a great measure to defective drainage.—With the exception of rude jungle, and a few camphor trees, there is no vegetation on the island; every article of food, clothing, or merchandise is imported; and even fresh water is scarce; though there are a few streams on the E and S coast, and near its SW point. Cotton has been grown on the island, and is said to be of a good colour and strong fibre. The most valuable production of the island is coal, which appears to be the best that has yet been discovered in the East. It is a continuation of the great Bornean seam. Recent advices state that the coal-seams are upwards of 11 ft. thick, and that the line of crop extends over a distance of 2½ m. A company has been formed for working the Crown coal-mines on this island, and establishing a colliery capable of furnishing supplies of coal to the steam-vessels navigating the Eastern seas. It is probable that the coaling-stations at Hong-kong and Singapore, and perhaps even those of Batavia and Manilla, may ultimately receive their supplies from this island. The seam commences at a distance of only 334 yds. from the beach, and in the neighbourhood of a bay presenting good anchorage, and a sufficient depth of water to allow steamers of moderate draught to proceed close in shore. L. lies nearly in the direct track both of steam and sailing navigation from India to China during the NE monsoon; and is as intermediate a position between Singapore and Hong-kong as can be found, being 700 m. from the former, and 1,000 m. from the latter.—In the annexed chart, the mouth of the Kallias river in Borneo is marked *d*. The two largest islets between L. and Borneo are Daat (*e*) and Kuraman (*f*). The other points marked on the coast of L. are the mouth of the Gangara river (*g*); Victoria harbour (*h*); Hamilton-point (*i*); Kiamsam-point (*k*); Luke-point (*l*).

LABUHAN (Point), a headland on the W coast of Sumatra, in N lat. 3° 12′.

LABUISSIE'RE, a department and town of Belgium, in the prov. of Hainault, arrond. of Charleroi. Pop. of dep. 670. It is watered by the Sambre, and has a building-dock, several marble saw-mills, and an iron-mine. Pop. of town 330.

LABUK, a bay of the NE coast of the island of Borneo, in N lat. 6°, E long. 118°.

LABUN, a town of Russia in Europe, in the gov. of Volhynia, district and 29 m. ESE of Zaslaw, on the Khorym. Pop. 3,200.

LAC (Le), or Villers, a commune of France, in the dep. of the Doubs, cant. of Morteau, 21 m. NE of Pontarlier. Pop. 1,494. It has a manufactory of flint glass.

LA CACHE, a river of British North America, which joins Mackenzie river, about 40 m. above the confluence of Mountain river.

LACANAU, or Canau, a commune of France, in the dep. of the Gironde, and cant. of Castelnau-de-Medoc, 30 m. WNW of Borneaux, near a large etang of the same name. Pop. 879.

LACARACUNDA, or Lakerikhanda, a small town of Hindostan, in the prov. of Bengal, district of Birbhum, 12 m. SW of Nagore, and 78 m. WSW of Murshedabad. Muslin is extensively manufactured here.

LACAUNE, a canton, commune, and town of France, in the dep. of the Tarn, arrond. of Castres. The cant. comprises 8 com. Pop. in 1831, 10,995; in 1841, 11,819. The town is 30 m. ENE of Castres, on the Gyas. Pop. in 1841, 3,965. It possesses a Calvinist consistorial church. It has manufactories of dimity and of cheese, and carries on a considerable trade in poultry and in common woollen fabrics.

LACAZE, a commune and town of France, in the dep. of the Tarn, cant. of Vabre, 18 m. NE of Castres, on the Gijon. Pop. 2,365. It has several manufactories of cloth.

LACCADIVES, a group of islands in the Indian ocean, 75 m. W of Malabar, between the parallels of 10° and 12° 40′ N. They are divided into 15 smaller clusters, each of which comprises two or more islands, and several rocks and dry uninhabited spots; but the largest of them does not contain above 6 sq. m. of land, and they are surrounded by dangerous coral reefs. Their soil is rocky, and yields no grain; their only produce is poultry, eggs, cocoa-nuts, betel-

nuts, and plantains. The inhabitants are inoffensive, and not so shy as their Maldivian neighbours. They subsist on cocoa-nuts and fish, and manufacture a kind of sugar from cocoa milk. Their numbers are about 10,000, scattered over 19 islands. They are of Arabian origin, and profess Islamism, and are called Moplays by the inhabitants of the Deccan. These islands were discovered by Vasco de Gama in 1499, but are politically dependent on Canara, and passed with it under the dominion of England in 1792. They are seldom visited by European ships, on account of the intricate navigation. Ships may, however, safely take in refreshments at Kan-Rattea, in 10° 34′ N lat., and 72° 56′ E long. There is also a good harbour in the isle of Kalpeny. The three principal islands are Anderot, Cabarita, and Akhalu, which contain respectively 1,800, 1,200, and 1,300 souls, and somewhat exceed 3 m. in length, by one in breadth, each. They are all coral formations. Anderot presents one remarkable feature, in the land being highest on its windward side, which rises almost perpendicularly from an unfathomable depth, whereas all the others are protected to windward by sloping coral-banks. The medium height of Anderot above the level of the sea is 9 ft., and nowhere exceeds 15 ft. The larger islands are generally well planted with cocoa-nut trees; the manufacture of coir from the outer husk of the nut, into ropes, being the chief source of employment to the natives, beyond fishing, cultivating rice and a few vegetables, and gathering cowrie-shells which are found in considerable abundance among the islands. Only about twenty days' consumption of rice is grown in all the islands; the rest is imported from the continent.

LACCO, a town of Naples, in the prov. and 25 m. WSW of Naples, in the N part of the island of Ischia, on a group of low hills. Pop. 1,765. It has a fine church, a convent, and several mineral springs.

LACEBY, a parish of Lincolnshire, 4 m. WSW of Great Grimsby, on an affluent of the Humber. Area 1,650 acres. Pop. in 1831, 616; in 1841, 755.

LACEDEMONIA, an administrative province of Greece, in the Morea, bounded on the N by the dio. of Mantinea and Cynuria; on the E by the latter dio. and the Archipelago; on the S by Vateka bay and the gulf of Laconia, and the dio. of that name; and on the W by the dio. of Laconia, Messenia, and Mantinea. Pop. in 1839, 39,936. In the SE it projects into a long peninsula terminating in Cape Malea. Its principal river is the *Eurotas;* and its chief town is Sparta.

LACEDOGNA, a town of Naples, in the prov. of the Principato-Ultra, district and 17 m. NE of San-Angelo-di-Lombardi, at the foot of the Apennines. Pop. 500. It is the seat of a bishopric, and was formerly a considerable place.

LACE'PE'DE, a group of three low rocky islands, off the coast of NW. Australia, in S lat. 16° 50′, and E long. 122° 10′.

LACHADO, or LACADO-LAKE, a large lake of Siam, intersected by the parallel of 14° 48′, between the Tachin river on the W, and the Menam on the E, and connected with the latter river by the Talan creek.

LACHAUX, a village of Switzerland, in the cant. of Berne, bail. of Freibergen. Pop. 166., Cath.—Also a village in the cant. of Vaud, circle of Cossonay. Pop. 484.

LACH-DENNIS, a township in the p. of Great Budworth, Cheshire, 3 m. ESE of Norwich. Area 300 acres. Pop. in 1831, 32; in 1841, 33.

LACHEN, a village of Bavaria, in the circle of the Pfalz, district and 11 m. W of Spire, and 3 m. SE of Neustadt. Pop. 2,073.—Also a town of Switzerland, in the cant. and 16 m. NNE of Schwyz, and 21 m. SE of Zürich, on the S bank of the lake of that name, near the mouth of the Wäggithal. Pop. (Cath.) 1,506. It has a church with two towers, and possesses manufactories of cotton fabrics.

LACHEN PASS, a pass from Sikhim into Tibet, in N lat. 27° 58′, E long. 88° 32′. Alt. 15,500 ft. It is near the head of the Lachen, the most northern head-stream of the Tista, which rises to the NW of the Lachung pass, on the Tibetian plain of Cholamo, and flows W to the meridian of the Lachen pass, where it abruptly bends SSE, and joins the Lachung coming from the NE, near Chungtan, in N lat. 27° 36′, at an alt. of 6,000 ft. above sea-level.

LACHENEW, a commune of Belgium, in the prov. of Antwerp, dep. of Lierre. Pop. 837.

LACHES, a savage tribe who inhabit the mountains and forests to the NE of Tunja, towards the centre of the dep. of Boyaca.

LACHFORD, a chapelry in the p. of Grappenhall, Lancashire, about 1 m. SE of Warrington, on the S bank of the Mersey. Area 1,010 acres. Pop. in 1831, 2,166; in 1841, 2.361.

LACHIARELLA, a town of Austrian Lombardy, in the prov. and 9 m. N of Pavia, district and 2 m. ESE of Binasco. Pop. 1,620. It has an old fortress.

LACHIDA (CAPE), a cape on the N coast of the island of Milo, in the Archipelago, 5 m. WSW of Cape Vani, at the entrance to the port of Milo.

LACHINE. See CHINE (LA).

LACHLAN, or CALARE, a river of New South Wales, which takes its rise in two head-streams, the Abercrombie and the Boorowa, which unite their waters in S lat. 33° 58′, E long. 148° 51′. The united stream first runs NW through Hamilton plains, and WNW through Solway flats; after passing to the S of Mount Cunningham, spreads into a wide marsh which is intersected by the meridian of 147°, from the NW extremity of which it issues in a NW course, and after striking the parallel of 33° turns SW passing to the N of Flinder's range; under the parallel of 34° it again spreads out into a large marsh, at an alt. of 250 ft. above sea-level, which extends nearly to the right bank of the Morrumbidgee, and passes its superfluous waters into that river in times of flood.—Also a mountain of New South Wales, in the co. of Bathurst, between Coombing creek and the Belubula river, an affluent of the Lachlan.—Also a district of New South Wales, lying between the r. bank of the Morrumbidgee on the S and the l. bank of the Lachlan river on the N, comprehending a superficies of about 10,000,000 acres of undulating hill and dale; and watered by these rivers and their affluents the Yass, Boorowa, Narallan, Cook, Cookermungala, Carawang, and Jugion. The live stock in this district on 1st January 1850 was returned at 4,847 horses, 138,479 horned cattle, 522 pigs, and 346,762 sheep. The pop. in 1846 was 2,198, of whom 1,569 were males, and 629 females.

LACHOWCY, a town of Russia in Europe, in the gov. of Volhynia, district and 30 m. SSW of Ostrog, and 22 m. WSW of Zaslaw, on the l. bank of the Goryn. Pop. 1,950.

LACHOWICZE, a town of Russia in Europe, in the gov. and 84 m. SW of Minsk, dist. and 54 m. W of Sluck. It was formerly fortified, sustained a siege by the Cossacks, and was taken and destroyed by the Swedes in 1706.

LACHSA. See LAHSA.

LACHUNG PASS, a pass leading from Sikhim into Tibet, in N lat. 27° 56′, E long. 88° 55′, about 13 m. E by S of the Lachen pass. Alt. 18,000 ft. above sea-level. It takes its name from a stream which rises in several small lakes on its S side, and flows first SE and then SW to its junction with the Lachen at Chungtan.

LACIANO, a town of Naples, in the prov. of the

Terra d'Otranto, district and 16 m. WSW of Brindisi.

LACKAR. See LAKOR.

LACKARAGO, a town of Senegambia, in Kasson, near an affluent of the Senegal, 48 m. ESE of Kuniakary.

LACKAWANNA, a township of Luzerne co., in the state of Pennsylvania, U. S. Pop. 363.—Also a river in the same state, which has its source in Wayne and Susquehanna cos.; and after a generally S and SW course, falls into Susquehanna river at Pittstown.

LACKAWANNOCK, a township of Mercer co., in the state of Pennsylvania, U. S., 6 m. SW of Mercer. It has a hilly surface, and is drained by Little Neshannock creek. The soil consists of clay and loam. Pop. 2,130.—Also a range of mountains in the same state, in Luzerne and Wayne cos., running between the upper waters of the Lackawaxen and Lackawannock rivers. The N part of the range is named Moosuck mountain, and is intersected by the railroad from Honesdale to Carbondale.

LACKAWAXEN, a river of Pennsylvania, which has its principal sources in Wayne co, flows through a deep valley, and enters the Delaware in Pike co. It receives the Dyberry, Middle and Waullenpaupack creeks.—Also a township of Pike co., in the same state, 182 m. NE of Harrisburg, watered by Delaware and Lackawaxen rivers. Pop. 758.

LACON, a village of Marshall co., in the state of Illinois, U. S., 99 m. N of Springfield, on the E side of Illinois river, consisting in 1840 of about 20 dwellings.

LACONI, a town of Sardinia, in the div. of Capo Cagliari, prov. and 9 m. NNW of Isili, and 42 m. N of Cagliari, on the slope of a mountain. Pop. 1,600.

LACONIA, a diocese or administrative prov. of Greece, in the Morea, bounded on the N by the dio. of Messenia; on the E by that of Lacedemonia and the gulf of Laconia; on the S by the Ionian sea; and on the W by the gulf of Koron or Messina.

LACONIA, a village of Harrison co., in the state of Indiana, U. S., 147 m. S of Indianapolis, 2 m. N of the Ohio river. Pop. in 1840, about 500.

LACONSAWAN, a town of Siam, 150 m. NNW of Ynthia, on the r. bank of the Menam.

LACONTA, a town of Annam, in Laos, 330 m. NE of Lanchang, about 12 m. from the E bank of the Man-lou.

LACOURT, a commune of France, in the dep. of the Ariège, cant. and 4 m. SSE of Saint Girons. Pop. 1,250. It has quarries of grey marble and of quartz.

LACQ, a commune of France, in the dep. of the Basses-Pyrenees, cant. of Lagor. Pop. 635.

LAC-QUI-PARLE, a small lake, or an expansion of the St. Peter's river, in N lat. 45° 5′, W long. 95° 58′, about 10 m. below Big-Stone lake.

LACROMA, a small island of the Adriatic sea, in the Dalmatian archipelago, circle and 1 m. S of Ragusa. It has a fort belonging to the French.

LACROWZETTE, a commune of France, in the dep. of the Tarn, cant. of Roquecourbe. Pop. 1,170.

LACSNO, a village of Hungary, in the comitat of Saros, 19 m. E of Leutschau. It has some mineral springs.

LACUISINE, a department and village of Belgium, in the prov. of Luxemburg, arrond. of Arlon, watered by the Samur. Pop. of dep. 565. It has several iron-works and wire-mills. Pop. of v. 308.

LACUNZA, a town of Spain, in the prov. of Navarra, partido and 18 m. WNW of Pamplona, on the l. bank of the Araquil. Pop. 774.

LACZHAZA, a village of Hungary, in Little Kumania, 23 m. S of Pesth. Pop. 2,436.

LADA, a town of Wallachia, 42 m. W by S of Bukharest, near an affluent of the Vade.

LADAKH [*Moorcroft*], LADAK [*Strachey*], LAHDAK [*Gutzlaff*], a district of Chinese Tartary in the centre of the very elevated upland through which flows the Upper Indus, and which occupies the whole space between the lofty snow-clad range which bounds the valley of the Upper Sutledge and its tributary streams, and the equally elevated crest of the Muz-Tagh, the S frontier of Bukharia or Chinese Turkistan. It is bounded on the NE by the Chinese province of Khoten; and on the E and SE by the Lhassan provinces of Rodokh and Chan-than; on the S by the British prov. of Besahur or Bischur, and the independent states of Kulu and Chamba; on the SW and W by Cashmere and Baltistan, or Little Tibet; and on the NW and N by part of the latter region, and by Khafalun, and the Karakorom or Tsung-ling range of mountains. Its extent is computed at 30,000 sq. m., or half the surface of England. Its shape is that of an irregular triangle, the longest side or base of which forms the S limit, runs obliquely and irregularly about 220 m. from SE to NW, or from Bischur, by Kulu and Chamba, to Cashmere. These boundaries include what is called the Spiti of L. Now we demur to this arrangement, as it confounds the valley of the Indus with that of the Sutledge; and the same range which separates L. from the sources of the Little Sind, the Chenab, the Jelum, the Ravi, and the Beyah, also separates it from the valley of the Spiti and the Sutledge. Besides the Spiti is no more a dependency of L. than L. was of Runjit Sing of Lahore, to whom it paid a small tribute. For these reasons we would make the Spiti of L., and not Bischur, the S frontier. Little is really known of its E frontier, with this exception, that Chan-than or Chang-thang, where the E and S branches of the Indus originate and unite, lies to the SE of this principality, and is probably, like L. itself, bounded on the N by the same range of mountains continued to the E. Moorcroft indeed says that the unexplored territory of Khoten extends far to the E; along the face of the Muz-Tagh; that it is connected by irregular groups with the Kentaisse or Caillas; and that the line of the ancient thoroughfare between Kashghar and India was through Khoten and Rodokh, formerly the summer-residence of the chief of L. If this be so, Chan-than must be included in the principality of L.; and there can be no doubt that the district of Khoten lies to the NE of Chan-than. But as Khoten is altogether on the N side of the Muz-Tagh, in 37° N lat., that range is, in geographical strictness, the real N and NE boundary both of L. and of Chan-than.

Having little or no knowledge of the interior of L., we cannot attempt any detailed description of its surface. It is evident, however, that as it is merely a long and apparently narrow valley watered by the Indus, and surrounded on all sides by lateral ridges descending to the main stream from the great ranges which bound it, its surface must be very rugged and irregular, having a constant interchange of hills and valleys each watered by its mountain-stream. Many of the hills are of great altitude, but far inferior in elevation to the ranges whence they proceed; and the hollows between are dangerous and difficult to pass, which renders travelling exceedingly laborious and tedious. It appears, that, after a journey of five days NE of Cashmere, an evident ascent commences, which continues very great for four days successively, after which it becomes less steep on to L., but the rise continues on to the great range which separates Tibet from Yarkund. To the l. of this route, the country is very mountainous, but perfectly desolate. A route from Dir in Punjcora, passes eastwards

through the S part of this region, but it is excessively mountainous and difficult. Two marches before Izzet-Oollah reached the pass of Karakorom, he fell in with an icy elevated range called Khumdan, which, as he was informed, reached 200 cosses from SE to NW; and which separates Baltistan from the district of Surikol on the frontier of Badakshan. Communication with the neighbouring countries, except by the valley of the Indus, is extremely difficult, whether with Cashmere, Kashghar, Yarkund, Khoten, the Punjab, or the Spiti; everywhere mountain-ranges must be crossed ere L. be entered, so that it is, as it were, an insulated region, secluded from the rest of the world, the course of the Indus being its only outlet.

L. is extremely well-watered, from the numberless streams which run from valley to valley, increasing as they descend their rugged channels, till they reach their common receptacle the Indus. The most important river is the Sinh-kha-bab, or great Eastern branch of the Indus, which rises in the Kangis mountains, the Kailasa of the Hindus, and after traversing Chan-than from SE to NW, enters L. on its eastern, and follows the same course to its western frontier. Its two principal affluents are the Zanskar from the N, and the Shayuk from the S. The Dras, also from the S, joins it at Lé. The bed of the Shayuk, at the town of the same name, where it is joined by the Kamdan from the Karakorom mountains, has an alt. of 13,000 ft. above sea-level. The climate is very cold, as might be expected from its great elevation, and as lying between the Himalaya, Caillas, and Muz-Tagh, which must influence its temp. very much. Mountains half-covered with snow during the greater part of the year skirt the plain on which stands the city of L. Even in the month of June it freezes every night. As the territory of L. is almost entirely composed of hills and moors, it forms a good grazing country for almost every species of graminiverous animals, especially horses, sheep, and goats. The dogs of Tibet are twice as large as those of Hindostan, having large heads, and long coats; and are amazingly fierce and strong. This exactly agrees with Marco Polo's account of the Tibetian dogs; indeed the more we learn of these regions the more strongly is the veracity of the illustrious Italian confirmed. The bushy-tailed cow, or *yak*, of Tibet, is common to the whole of Western Tibet, and is an invaluable boon to the natives of L., both as a beast of burden, and as perfectly fitted, from its constitution and habits, to carry the traveller over the loftiest heights, or across the most impetuous torrents. The ponies of Zaishkar sell from 20 to 70 rupees each. They are very fleet, sure of foot, and cross the highest passes with ease. Moorcroft has communicated an interesting account of a new species of sheep he met with in L. called *purik*. This animal, when full-grown, is scarcely so large as a South Down lamb of five or six months old. It is as completely domesticated as the house-dog. On a surface of granite rock where a blade of vegetation can hardly be seen it will pick up food; and when the land is cleared of harvest and stubble, and not a stalk of vegetation appears, its indefatigable industry detects substances which afford sustenance. It will examine the cooking-pot, pick up crumbs, drink the remains of a cup of salted and buttered tea or broth, or nibble a cleanly picked bone; leaves of lettuce, rinds of turnip, skins of apricots, are to it luxurious fare; and the residuum of the coarse black tea consumed by the natives, after being steeped and treated with the utmost frugality, are devoured by this animal. It gives two lambs annually, and is twice shorn within the same period, the clip affording 3 lbs. of wool annually, the first crop being fine enough for tolerably good shawls. Moorcroft affirms that a British cottager could keep three of these sheep easier than he could a cur-dog, as they would live luxuriantly by day on the stripes of grass that border the roads. He also mentions a nondescript species of wild horse, called *kiang*, which he thinks might be domesticated for the use of the small farmer and poor in Britain. It is about 14 hands high, of a round muscular form, with remarkably clean limbs. It may perhaps be the *Equus Caballus*, which is found wild in almost every part of Central Asia. The produce of shawl-wool in this country is immense. L. abounds in fine timber for ship-building, and if it were possible—which it is not—to transport it down the Indus to the Punjab, it would be a most invaluable acquisition.—Of the mineral produce of L. we have no account whatever, save that Izzet-Oollah tells us that there are mines of sulphur three stages from Lé; that saltpetre abounds; and that excellent gunpowder is made at Lé.—L. is the great entrepot for all the produce of the pastoral region of the upper valley of the Indus; and is a common resting-place for all the caravans that go from Kashghar, Yarkund, and Khoten, to Cashmere and Afghanistan, or from these latter to Chinese Turkistan. It is the great emporium for all the shawl-wool which is produced in the districts of Chan-than and the Oondes, and which is subsequently exported to Cashmere. The Ladakhis enjoy a complete monopoly of the shawl-wool produce in the Cashmere market. The reason of this is, that in the reign of Mahmud Shah, the Mogul sovereign, the gealbo or chief of L., unable to contend with the Tartars to the eastward, applied for aid to the governor of Cashmere, who defeated the Tartars, or Kalmucks according to Izzet-Oolah, and restored the gealbo to the possession of his capital. In consequence of this defeat, an article was inserted in the treaty of peace with the Tartars to the effect that the Ladakhis should have the sole privilege of buying up, at their own price, all the shawl-wool produced in the districts of Rodak, Ghortope, and the Oondes of the upper valley of the Sutledge; and the sale of this article to any other save them is forbidden under pain of death. Even the Cashmerians, though allowed to attend the fairs of Rodak and Ghortope, and dispose of their merchandise, are prohibited from purchasing the shawl-wool, but must receive it at second hand from the Ladakhis. A duty of 4 rupees, or 10s., is charged by them on every horse-load of shawl-wool exported to Cashmere; but no duty is levied on it when imported into Tibet from other countries. A duty of 4 rupees is also charged on every terek weight of Cashmere shawls when exported to Yarkund. Three grand fairs are annually held, in the city of Lé, one in October, one in February, and a third in August. The second of these is the greatest fair. At these fairs the concourse of Mahommedans from Kashghar and Yarkund, of Lamas from Lassa, Tishulumbu, Diggarchi, and Ghortope, from Amritsir, and all the Punjab, and of merchants from Cashmere and other places, is said to be immense. All these pay duty for their merchandise; and the valuable productions of all their respective regions are poured into L., to be re-exported by various natural channels to their ultimate markets. From Hindostan are imported every species of Hindu manufactures and produce, as Multan chintzes, the silks of Benares and shawls. From Yarkund come silver, Russia leather, felt carpets, coarse and fine China silks, taffeties, velvets, earthenware, sable furs, small coral beads, and seed pearls; tea is brought from Lassa, and pays a small duty.

The question whether L. was a detached sovereignty from Tibet, as Father Desideri maintained, and which Malte Brun was unable to determine, is

now solved; and it is ascertained that it is altogether a distinct state from Tibet, though closely connected with it by political, commercial, and ecclesiastical bonds. The Chinese chief of Takklacotte assured Webb that the authority of the emperor of China extended as far as L., which, however, was independent of China. This doubt arose from the extended application of the name Tibet or Tobhot, which included all the vast region between China, Tangut, the two Bokharas, and Hindostan. Hence it was concluded, that since L. was in Tibet it must be a prov. of it, and not a distinct independent state. But it was forgotten that the appellative *Tibet* was not so much a political as an ecclesiastical designation—like the terms Christendom, Iran, Belad-al-Islam, and Kafiristan—denoting the region of the faith of Budha. L. is actually an independent state, though Runjit Singh sent a vakeel in 1819 to demand tribute. In fact, it is the interest of all the neighbouring states that L. should be independent, and it is to this sense of common interest that it owes its independency. It is the interest of the Chinese authorities, both to the N and E, that L. be protected, as it is the great market for their shawl-wool, and as the great transit of commercial intercourse with Hindostan; and it is equally the interest of Cashmere that L. be independent, to insure a constant supply of the precious shawl-wool for its favourite manufacture of shawls. All religions are tolerated at L.; but the established religion is Budhism, and the chief, whose title is *gealbo* or rajah, sends a yearly donation to the Dalai lama of Lassa. Whenever a son is born to the rajah, he abdicates the sovereignty; and the ministers govern in the name of the prince. The principal ministers are the *ghylong* or lama, who acts as deputy; the *chaghut* or steward, and the *muaghten* or military commander. During this period the ghylong is perfect master of the supreme authority, and the gealbo takes no part in state affairs. He derives his income from a tax levied on the head of each house.—The pop. of Lé, as of the country at large, is of the Tibetan stock, but a very considerable number of Cashmerians are domesticated at Lé, and a mixed race has originated from them and the women of the country, termed Argands. The Cashmerians and their descendants are engaged in commerce, and the lower orders follow the business of butchers, cooks, and petty retailers. There are also some Turani merchants, and in the lands of Chushut a colony of Balti Mahommedans is established. According to such information as could be obtained by Moorcroft, the whole pop. of L. may be between 150,000 and 180,000. Gutzlaff states that the number of families is variously estimated at from 20,000 to 60,000. The Ladakhis are in general a mild and timid people, frank, honest, and moral, when not corrupted by communication with the dissolute Cashmerians; but they are indolent, dirty, and addicted to intoxication. They have some singular domestic institutions. When an eldest son marries, the property of his father descends to him, and he is charged with the maintenance of his parents, who may continue to live with him if he and his wife please; if not, he provides them with a separate dwelling. A younger son is usually made a lama. Should there be more brothers, and they agree to the arrangement, the juniors become inferior husbands to the wife of the elder; all the children, however, are considered as belonging to the head of the family. The younger brothers wait upon the elder as his servants. On the death of the elder brother, his property, authority, and widow, devolve upon his next brother.

The dress of the natives is a coarse cloth made of sheep wool; in winter the poorer sort wrap themselves in the skin. They wear high black caps falling over one ear, shoes of undressed hide, within which they sew woollen cloth that comes up to the middle of the leg. Their hair is plaited like that of women, and falls down in a braid behind; they shave the beard, but preserve the mustachios. The lower part of the tunic is straight and scanty, whilst the upper part is folded, all in one piece. The tunic is make of black or coloured woollen. The women wear turquoises, emeralds, and pearls, woven with their hair.

LADAPEYRE, a commune of France, in the dep. of the Creuse, and cant. of Gueret. Pop. 1,502.

LADBERGEN, a village of Prussia, in the prov. of Westphalia, reg. and circle and 14 m. NNE of Munster. Pop. 1,300.

LADDA, or Lado, a group of small islands in the strait of Malacca, near the W coast of the peninsula of that name, and to the S of the island of Lancava, in N lat. 6° 20′, E long. 99° 40′. The principal island, which bears the same name, is covered in the interior with dense forests. The coasts are indented with numerous bays, affording good anchorage. The inhabitants are Malays, and noted pirates. The island belongs to Queda.

LADEINOE-POLE′, a district and town of Russia in Europe, in the gov. of Olonetz. The district is in the S part of the gov., to the E of Lake Ladoga. It is woody, damp, and cold. The town is 32 m. SE of Olonetz, and 21 m. E of the lake of Ladoga, on the l. bank of the Svir. Pop. 340. It has a church, and a dock erected by Peter the Great, in which the first Russian vessels for the navigation of the Baltic were built.

LADEK, a town of Poland, in the gov. of Kalisch, and obwod of Konin, on the r. bank of the Warta.

LADENBURG, a town of Baden, chief town in an amt of the same name, in the circle of the Rhine, 7 m. E of Mannheim, on the r. bank of the Neckar, at an alt. of 374 ft. above sea-level, and on the Main-Neckar railway. Pop. 2,431, of whom 1,359 are Catholics. It is enclosed by walls, and has 5 churches. The culture of tobacco and madder forms the chief branch of local industry. Fairs are held twice a-year. Pop. of amt 11,833.

LADERN, a village of France, in the dep. of Aude, cant. and 3 m. ENE of St. Hilaire. Pop. 486 Fairs for cattle are held twice a-year.

LADEUZE, a department of Belgium, in the prov. of Hainault, arrond. of Mons, watered by the Lunelle. Pop. 1,132.—Also a commune in the prov. of E. Flanders, dep. of Elichove. Pop. 157.

LADIES' BRIDGE, a village in the p. of Ightermurragh, co. Cork. Area 20 acres. Pop. 243.

LADIGNAC, a commune of France, in the dep. of the Haute-Vienne, cant. and 8 m. from Saint-Yrieix, on the r. bank of the Isle. Pop. 2,600. It has a blast-furnace, and several fineries. Fairs for cattle are held 4 times a-year.

LADIK, a town of Turkey in Asia, in Caramania, in the sanj. and 30 m. NW of Konieh, in a valley, at the foot of a ridge of hills, on the site of the ancient *Laodicea Combusta*. Pop. 500. It is built of mud, and contains several mosques, public baths, and caravanserais. In 1797 it suffered greatly from an earthquake. It is noted for its manufacture of carpets. Of the ancient city the only remains are some fragments of marble columns, and a few capitals and pedestals of pillars, which the Turks have converted into tomb-stones.

LADINHAC, a commune of France, in the dep. of Cantal, cant. of Montsalvy, 15 m. SSE of Aurillac. Pop. 1,118.

LADOGA, a lake of Russia in Europe, the largest in Europe, lying between 59° 58′ and 61° 46′ N lat., and between 29° 50′ and 32° 55′ E long., and en-

closed by the gov. of Viborg on the W and N; by that of Olonetz on the E; and by the gov. of St. Petersburg on the S. Its length from N to S is 138 m., and its greatest breadth 90 m., comprising a total superficies of 6,300 sq. m. It contains several islands, of which Valamo in the N, and Konovits towards the S, are the most remarkable; and numerous rocks and sand-banks, rendering the navigation extremely dangerous. Its banks are indented, and generally low. It receives about 60 tributary streams, the principal of which are the Volkhov and Siasi on the S, and the Svir, which conveys the waters of Lake Onega. It discharges itself by the Neva, which issues from its SW extremity, and flows into the gulf of Finland. The chief towns on its banks are Schleisselburg, Serdebol, Novaia-Ladoga, and Kexholm. The dangerous character of this lake, and the frequency and violence of its storms, induced Peter the Great to begin a canal from Schleisselburg to Novaia-Ladoga, on the Volkhov, a work which was completed in 1732; and under Catherine II. additional canals were dug, to extend communication to the Baltic. The Ladoga canal, 70 m. in length, and 74 ft. in breadth, forms, with the Siasi and Svir canals, a continuous line round the S and SE sides of the lake.

LADOGA (Novaia), a district and town of Russia in Europe, in the gov. of St. Petersburg. The district comprises the NE extremity of the gov. The town is 74 m. E of St. Petersburg, on the Volkhov, between Lake Ladoga and the canal of that name. Pop. 3,000. Navigation forms the chief employment of the inhabitants.

LADOGA (Staroi), a town of Russia in Europe, in the gov. and 72 m. E of St. Petersburg, district and 8 m. S of Novaia-Ladoga. Since the erection of the latter town it has become almost entirely depopulated, and the number of its houses does not exceed 50. It was formerly a large place, and is noted in Russian annals as the earliest residence of Rurik, first sovereign of Russia. The ruins of its ancient walls are still to be seen.

LADON, a commune and town of France, in the dep. of the Loiret, cant. of Bellegarde, 11 m. W of Montargis, on the Besonde. Pop. 1,095. It carries on an active trade in honey, wax, and saffron. Fairs for cattle and horses are held 5 times a-year.

LADRONES, a group of islands, two in number, near the S coast of China, in the prov. of Kwangtung, at the entrance of the bay of Canton, 18 m. SE of Macao, in N lat. 21° 57′, E long. 113° 52′. The larger and most easterly, named Great Ladrone or Mansan, is 3 m. in length, and about 5 m. in medium breadth. They are infested by pirates, who have long defied the maritime power of China. Their fleet is said to consist of upwards of 500 vessels, each carrying from 20 to 30 guns, and from 200 to 300 men. Their piracies have been considerably checked of late by the British force on the coast of China.

LADRONES, or Marianne Islands, a large archipelago stretching from N to S from the southern extremity of China into the N. Pacific about 450 m., between 13° and 21° 35′ N lat., and nearly under the 145th meridian of E long. They were originally discovered by Magellan in 1521, who first gave them the name of Las Islas de las Velas, from the peculiar sails of their prows; but afterwards denominated them Las Islas de los Ladrones, from the thievish disposition and dexterity of the inhabitants. Nearly a century and a half elapsed before the Spaniards proceeded to take formal possession, or make any kind of settlement upon these islands; but about the year 1668, Mary-Anne of Austria, widow of Philip IV., sent out a body of missionaries for the instruction of the natives; and from this circumstance they received the name of the Marianne, or more properly Mary-Anne Islands.

The L. are 20 in number; but only 5 of them are inhabited. The principal are Guam, Guajan, Guahon, or St. John, the largest and most southerly, which is about 80 m. in circumf., situated in N lat. 13° 25′; Zarpane, or Rota, about 7 leagues farther N, and 15 leagues in circumf.; Aguignan, or St. Ann, a high island of difficult access, 3 leagues in circuit, and 13 leagues N of Zarpane; Tinian, about 12 m. long and 6 m. broad, separated from the last mentioned by a narrow strait; Saypan, or St. Joseph, 3 leagues N of Tinian, and 25 leagues in circuit; Anatachan, or St. Joachim, 10 leagues in circuit, and 36 leagues N of Saypan; Sarigan, or St. Charles, 4 leagues in circumf., and separated from the last-mentioned by a channel 8 or 9 m. in breadth; Gugnam, or St. Philip, 6 m. farther N; Amalagan, or Conception isle, 12 leagues to the N, and 5 in circumf.; Pagon, or St. Ignatius, 10 leagues from the last mentioned, and 14 leagues in circuit; Grigan, or Agrigan, or St. Xavier, at 10 leagues' distance from the last mentioned, and nearly of the same size; Assonsong, or Assumption island, nearly 12 leagues to the N, and lengthway, a black, rugged, uninhabited cone, about 40 toises above the level of the sea, with the crater of a volcano on its summit; Urac, a desert isle, 3 leagues in circumf., and the most northerly of the chain, situated in N lat. 20° 45′. Their geological constitution is volcanic. Among them are numerous rocks, shoals, and currents, which render navigation extremely dangerous; and there are few safe harbours or roads in the whole group, except that of Guam at the town of Agana, the residence of the Spanish governor.

The climate of the L., though they lie under the torrid zone, is in general serene and temperate, except in July and August, when the weather is intolerably hot; and during the season of the western monsoons, between June and October, when violent hurricanes are experienced at full and change of moon. Their general aspect is beautiful and picturesque; their mountains and forests are covered with perpetual verdure, and their soil is naturally fertile and productive. Owing to the decreasing numbers and depressed state of the inhabitants, however, the most delightful among them have been suffered to relapse from a state of cultivated beauty into the rudest forms of an impenetrable wilderness. In 1742, the island of Tinian, according to the description given in Lord Anson's voyage, was one of the most interesting and healthy spots in the world; but in little more than twenty years afterwards, the same spot, when visited by Byron and Wallis, presented a picture in almost every feature completely opposite to that which Anson beheld: The woods were overgrown with underwood, and parasitical plants obstructing every path; the lawns were covered with rank grass and reeds, furnishing an asylum to swarms of centipedes, scorpions, and other venomous insects; the cattle were few in number, and so extremely shy as to render the pursuit of them a most laborious service; the air was so hot and oppressive that the seamen could scarcely make the necessary exertion to procure the requisite supplies of provisions; the water was brackish, and full of worms, and the rains incessant, while a suffocating heat continued to prevail, and many of the crew were seized with fever.—The L. produce cotton, indigo, rice, sugar, and the plaintain in abundance. Sulphur and some signs of metals have been discovered on Guam, and a pearl fishery exists near the coast of Saypan. Kotzebue says the only original native quadruped on these islands is the rat. There are numbers of wild hogs of a large size, and a few

guanacoes or lamas, which are supposed to have been introduced by the Spaniards; immense swarms of musquitoes, large black ants, a variety of venomous insects, and a species of tick, commonly attached to cattle, but apt to settle on the hands and limbs of European visitors. The fish on the coast have been uniformly found to be unwholesome.

The inhabitants of these islands regarded themselves, before the arrival of the Spaniards, as the only human beings in the world, and had a tradition that the first man was formed of earth from the island of Guam. In colour, speech, manners, and government, they bore a great resemblance to the Tagals, the original inhabitants of the Philippines. They appeared even to Magellan to have made some advance in civilization; and several monuments were observed by Anson and other navigators, particularly on the islands of Tinian and Saypan, which indicated the early presence of arts. They are a tall, robust, and well-proportioned race: of an olive complexion, darkened by the use of cocoa-nut oil; with well-grown beards, and long black hair which is sometimes tied up on the top of the head. The men wear little covering, commonly nothing more than a few palm-leaves; but the women have a kind of petticoat made of mat. Both sexes stain their teeth black, and some paint their bodies red. To the earlier navigators they appeared naturally acute, lively, and ingenious. The females are described by them as peculiarly cheerful in their dispositions, and of graceful deportment. They were treated with greater respect than is usual among uncivilized tribes; and, in the married state, seemed to hold rather a superiority in point of privileges over the men. Their huts were framed of the palm-tree, and divided by mats into different apartments appropriated to distinct uses, as places for sleeping, eating, working, and holding provisions; and their utensils, though few, were neatly made. Their canoes were peculiarly adapted to the nature of the seas and winds around these islands, and altogether unequalled for simplicity of structure, swiftness of sailing, and ease of management. They were usually about 40 ft. in length, 4 ft. in depth, and little more than 2 ft. in breadth. Kotzebue says the present inhabitants of the L. are no longer mariners, and have ceased even to build boats, contenting themselves with a rudely hollowed tree, from which they fish within the breakers. They were without any regular government before their subjection to the Spaniards; but had a class of nobles among them, who preserved a degree of dignity and distance in their intercourse with the other ranks, and were treated with great respect. Every man avenged his own quarrel; and hostilities frequently occurred between the inhabitants of different districts; but their wars were conducted with more acrimony than courage, and were never sanguinary; the loss of one or two combatants decided the battle, and usually terminated the dispute. Their religion consisted chiefly in a superstitious dread of an evil being, and of departed spirits, whom their magicians taught them to appease by stated fasts and ceremonies. They had poets among them who were greatly admired; and whose songs—which consisted of eulogies on their ancestors and nation—the women were accustomed to sing in bands with considerable harmony of voice and gracefulness of gesture. Their number in the middle of the 17th cent. was estimated at 150,000. This was probably greatly beyond the actual number. Their pop. when first visited by the Spanish missionaries was estimated at from 40,000 to 44,000. At present it probably does not exceed 2,000. The number of Spaniards is also very small. A considerable proportion of the present pop. are descendants of some hundreds of Philippine islanders who were brought to Guam after the depopulation of the L. by an epidemic. In 1816 the whole was officially returned at 5,389. The present inhabitants of Guam, says Kotzebue, "have been transformed into Spaniards. They live and dress like the Tagalese about Manilla, cultivate rice for their own consumption, prepare and drink cocoa wine, chew betel, smoke tobacco, and are content indolently to enjoy to an advanced age the fruits of the forest and the bountiful produce of the fertile earth."—*Anson's Voyages*, book iii., ch. 1.—*Byron and Wallis' Voyage in Hawkesworth's Collection.*—*Marchand's Voyage round the World*, vol. ii.—*Mortimer's Observations during a Voyage to Teneriffe.*—*Kotzebue's Voyage in* 1815–18.

LADRONES (Los), a group of islands, three in number, in the Pacific, near the coast of Guatimala, 60 m. WNW of the island of Quibo.

LADWA, a town of Hindostan, capital of a small independent state, in the prov. of Delhi, 22 m. N by E from Kurnal.

LADY, a town of Russia in Europe, in the gov. of Mohilev, district and 48 m. SE of Babinovitchi. It contains 2 churches and a synagogue.

LADY, a parish, forming the NE part of the island of Sanda, Orkney, comprising an area of 8 sq. m. Pop. in 1831, 858; in 1841, 909.

LADY ISLE, an uninhabited rocky islet, 3½ furlongs in length from N to S, and ¼ of a mile in breadth, in the bay of Ayr, 2 m. SW of Troon point, 5¼ m. NNW of Ayr pier, and 5½ m. SW by S of the mouth of Irvine water. It is the only place of shelter from W winds along a great extent of coast.

LADYKIRK, a parish in Berwickshire, bounded on the SE by the Tweed. Area 3,100 acres. Pop. in 1831, 485; in 1841, 504.—Also a district in the island of Stronsay.

LADYKIRK, or NORTH KIRK, a district in the island of Westray. Pop. in 1831, 834; in 1841, 846.

LADYKIRK, or SOUTH KIRK, a district in the island of Ronaldshay. Pop. 637.

LADYTOWN, a parish in co. Kilkenny, 3 m. SW by S of Naas, on the Liffey. Area 2,682 acres. Pop. in 1831, 405; in 1841, 292.

LADYZYN, a town of Russia in Europe, in the gov. of Podolia, district and 13 m. SSW of Gaïsin, on the r. bank of the Bug. In the vicinity is a ferruginous spring.

LAE-CHU-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 7 districts. The town is 186 m. ENE of Tse-nan-fu, in N lat. 37° 12′, and E long. 119° 47′. It is on a small river, which falls into the gulf of Chih-le a little below, and forms at its embouchure a good harbour. The town has a numerous garrison.

LAEFFELT, a commune of Belgium, in the prov. of Limburg, dep. of Vlytingen. Pop. 133.

LAE-FUNG, a district and town of China, in the prov. of Hu-pih, div. of She-nan-fu.

LAE-GAN-HEEN, a district and town of China, in the prov. of Gan-hwuy, div. of Chu-chu, in N lat. 32° 25′ 10″, and E long. 118° 25′ 39″.

LAEK, a commune of Belgium, in the prov. of Limburg, dep. of Houthaelen. Pop. 255.—Also a river in the prov. of Antwerp, an affluent of the Great Nethe.

LAE-KEANG-HEEN, a district and town of China, in the prov. of Sze-chuen, div. of Kea-tsing-fu.—Also a river in the prov. of Hu-nan, which runs N, and, after a course of about 120 m., joins the Hang-keang, on the r. bank, nearly opposite Hang-chu.

LAEKEN, a department and commune of Belgium, in the prov. of South Brabant, arrond. of Brussels. The principal river in the dep. is the

Senne. Pop. 3,020. The village is 2 m. N of Brussels, near the canal of that name, which is here crossed by a fine iron-bridge. Pop. 1,230. It has a magnificent royal palace with fine gardens and numerous handsome villas, and possesses extensive chemical works, a dye-work, calico-printing-mills, a distillery, and a brewery.—Also a commune in the dep. of Molenbeek-Saint-John. Pop. 1,781.

LAEMONT, a commune of Belgium, in the prov. of East Flanders, dep. of Quaremont. Pop. 586.

LAE-PAOU, a district and town of China, in the prov. of Kwan-se, div. of Lew-chu-fu.

LAE-PING-HEEN, a district and town of China, in the prov. of Kwan-se, div. of Lew-chu-fu, 144 m. SW of Kwei-lin, in N lat. 23° 38′ 24″, and E long. 109° 5′ 50″.

LAER, a department and commune of Belgium, in the prov. of Brabant, arrond. of Huy. Pop. 305.

LAERNE, a department and village of Belgium, in the prov. of East Flanders, arrond. of Termonde. Pop. of dep. 3,690. The village is 12 m. W of Termonde. Pop. 733.

LAER'S BANK, an extensive sand-bank, at the S entrance to the strait of Macassar, Asiatic archipelago, to the S of Zalinaf islands, in the line of the probably best route towards China, in December, January, and February.

LAE-SHWUY-HEEN, a district and town of China, in the prov. of Chih-le, div. of Yih-chu, 54 m. SW of Pe-king, in N lat. 39° 25′, and E long. 115° 47′ 22″.

LAETETEN, a commune of Belgium, in the prov. of East Flanders, dep. of Selzaete. Pop. 101.

LAETHEM-SAINT-MARTIN, a department of Belgium, in the prov. of East Flanders, arrond. of Ghent, watered by the Lys. Pop. 1,305. It has manufactories of linen.

LAETHEMSTRAET, a commune of Belgium, in the prov. of East Flanders, dep. of Laethem-Saint-Martin. Pop. 432.

LAE-WU, a district and town of China, in the prov. of Shan-tung, div. and 36 m. E of Tae-gan-fu, in N lat. 36° 16′, and E long. 117° 51′.

LAE-YANG, a district and town of China, in the prov. of Shan-tung, div. of Ting-chu-fu, 60 m. ESE of Lae-chu-fu, in N lat. 36° 59′, and E long. 121° 13′.—Also a district and town, in the prov. of Hunan, div. of Hang-chu-fu, 123 m. S of Chan-sha, in N lat. 26° 29′ 48″, and E long. 130° 39′ 48″, or 3° 47′ 42″ W of Peking.

LAFA, a town of Manshuria, in the district and 30 m. E of Kirin, on the r. bank of the Lafa-Pira.

LAFA-PIRA, a river of Manshuria, in the district of Kirin, which has its source in the mountain of Chanyen, runs SW, and, after a course of about 75 m., joins the Songari, on the r. bank, 30 m. SE of Kirin.

LAFAT, a commune of France, in the dep. of the Creuse, cant. of Dun-le-Palleteau. Pop. 1,020.

LA FAYETTE, a parish in the S part of the state of Louisiana, U. S., comprising an area of 1,800 sq. m., bounded on the W by Mermentan lake, and on the S by the gulf of Mexico. It is entirely flat, and to a great extent too marshy for cultivation. Pop. in 1840, 7,841; in 1850, 13,691. Its capital is Vermilionville.—Also a county in the N part of the state of Mississippi, containing a superficies, generally undulating, of 790 sq. m., drained by Tallahatchi river and its branches, and Yocanapuafa river. It has a fertile soil. Pop. in 1840, 6,531; in 1850, 14,069. Its capital is Oxford.—Also a county in the N part of the state of Missouri, containing an undulating surface of 450 sq. m., bordered on the N by the Missouri, and drained by its branches. Its soil is extremely fertile. Pop. in 1840, 6,815; in 1850, 13,961. Its capital is Lexington.—Also a county in the SW part of the state of Arkansas, containing an area of 1,260 sq. m., drained by Red river and its branches. Pop. in 1840, 2,200; in 1850, 4,837. Its capital is Lewisville.—Also a township of Onondaga co., in the state of New York, 130 m. W by N of Albany. Its surface is hilly, and is drained by Onondaga creek. The soil consists of clay loam. Pop. in 1840, 2,600. Pop. of village, 150.—Also a village of Newton township, Sussex co., in the state of New Jersey, 75 m. N of Trenton, on Paulinskill river, consisting in 1840 of about 14 dwellings.—Also a village of Deer creek township, Madison co., in the state of Ohio, 22 m. W of Columbus. Pop. 150.—Also a township of Coshocton co., in the same state. Pop. 848.—Also a township of Medina co., in the same state. Pop. 937.—Also a village of Walker co., in the state of Georgia, 199 m. NW of Milledgeville, on the W side of Chattooga river. Pop. 500.—Also a village of Tippecanoe co., in the state of Indiana, 70 m. NW of Indianapolis, on the E side of Wabash river, and at the terminus of the Wabash and Erie canal. Pop. 2,000.—Also a town of Jefferson parish, in the state of Louisiana, contiguous with New Orleans, on the Mississippi, and intersected by the New Orleans and Carrollton railway. Pop. 3,207.—Also a township of Van Buren co., in the state of Michigan. Pop. 327.—Also a township of Livingston co., in the state of Missouri. Pop. 307.—Also a township of Floyd co., in the state of Indiana. Pop. 928.—Also a township of Owen co., in the same state. Pop. 511.—Also a township of Union co., in the state of Arkansas. Pop. 337.

LAFFERDE, a village of Hanover, in the gov. and 14 m. ENE of Hildesheim. Pop. 1,117.

LAFFREY, a village of France, in the dep. of the Isère, cant. and 3 m. SSW of Vizeli. Pop. 320. It has two annual fairs. In the environs are quarries of freestone and of marble.

LAFITTE, a commune of France, in the dep. of the Lot-et-Garonne, cant. of Tonneins. Pop. 1,119. It has a Calvinist and a consistorial church.

LAFNITZ, a river of Austria, which has its source in Styria, in the circle of Grätz, near St. Jacob; runs SE along the frontier of Hungary; enters the comitat of Eisenburg, and, after a total course of about 60 m., throws itself into the Raab, on the l. bank, opposite St. Gothard. Its principal affluent is the Feistritz, which it receives on the r.

LAFORCE, a canton and commune of France, in the dep. of the Dordogne, arrond. of Bergerac. The cant. comprises 12 com. Pop. in 1831, 9,411; in 1841, 9,224. The village is 7 m. W of Bergerac. Pop. 957.

LAFORET, a department and commune of Belgium, in the prov. of Namur, arrond. of Dinant, watered by the Semoi. Pop. 266.

LAFOURCHE, a river of the state of Louisiana, U. S., an offset of the Mississippi, which separates from that river at Donaldsonville, and, after a SE course of 90 m., flows into the gulf of Mexico.

LAFOURCHE INTERIOR, a parish of the state of Louisiana, U. S., comprising an area of 1,000 sq. m., watered by Bayou Lafourche. It has a level surface, and is to a great extent too marshy for cultivation. Sugar and cotton are grown on the banks of some of the streams. Pop. in 1840, 7,303, of whom 3,246 were slaves; in 1850, 9,533.

LAFT, a town and port of Persia, on the N side of the island of Kishm, in the Persian gulf.

LAGA-AN, or LA-HOLM, a river of Sweden, which issues from the Widöstersi, in the prefecture and 15 m. from Jönköping; runs S, and traverses Lake Vidaestern; passes through the prefectures of Krono-

berg and Halmstad, and, after a course of about 120 m., throws itself into Laholm bay, in the Cattegat, 5 m. below the town of that name.

LAGAN, a river, and an artificial navigation, in the counties of Down and Antrim, in Ireland. The river rises on the N declivities of the Slieve-Croob mountains; and first flows 8 m. NW by W, then 4½ m. W and N, to the vicinity of Magheralin; it next flows 7 m. NE by E; and finally 6 m. NNE, to Belfast harbour, or the head of Belfast lough. Its longest affluent has a run of only 7 m., and joins it from co. Down at Lisburn.—The L. navigation ascends the river L. from Belfast harbour to the SSW vicinity of Lisburn; and then commencing to be all canal, first describes a crescent curvature, with the concavity to the N, within co. Down, and next describes another but less bold curvature, with the concavity to the S, chiefly within co. Antrim. The length of the navigation is 22 m.; the rate of lockage is 8⅓ ft.; and the cost of construction was £96,000. Its interior landing-places are the bleach-greens, mills, and factories, between Belfast and Lisburn; and the towns of Lisburn, Hillsborough, Moira, and Lurgan. It affords means of communication with all the shores of Lough, with the Blackwater and its navigations, and with the Newry navigation and the Bann.—Also a small river formed by the junction of three streams which have their sources in the counties of Monaghan, Cavan, and Meath, and unite 3¾ m. ENE of Moynalty, and, after a course of about 5 m., fall into Dundalk bay.

LAGAREJOS-DE-LA-CARBALLEDA, a town of Spain, in Leon, in the prov. of Zamora, partido and 11 m. ENE of Puebla-de-Sanabria, on a rising ground. Pop. 84.

LAGARTERA, a town of Spain, in New Castile, in the prov. of Toledo, and partido of the Puente-del-Arzobispo. Pop. 1,681. It has a parish-church, a public granary, and an estanco or repository for patent goods; and possesses a trade in cattle.

LAGARTO, a town of Brazil, in the prov. of Sergipe, about 60 m. W of Sergipe-del-Rey, in a plain. Pop. 2,000. The cultivation of cotton and other objects of local agriculture, and the rearing of cattle, form the chief employments of the inhabitants. It is noted for its gun-flints.

LAGATA, a town of Spain, in Aragon, in the prov. of Zaragoza, partido of Belchite, near a small river, in a flat but healthy locality. Pop. 557.

LAGE, a village of Hanover, in the county of Bentheim, on the Vecht, S of Neuenhaus. Pop. 340. —Also a market-town in the principality of Lippe-Detmold, 6 m. NNW of Detmold, on the r. bank of the Werre. Pop. 1,500.—Also a parish and walled town of the grand-duchy of Mecklenburg-Schwerin, 11 m. NE of Gustrow, and 14 m. SE of Rostock, on the r. bank of the Recknitz. Pop. 1,624. It has distilleries of brandy, a paper-mill, and numerous spinning mills. Fairs are held twice a-year.

LAGE, a parish of Brazil, in the prov. of Minas-Geraes, and district of São-Jose. It has a parish-church.—Also a town in the prov. of Bahia and district of Jaguaripe. It has a parish-church and an elementary school.—Also an island at the entrance of the bay of Nitherôhi, which it divides into two parts. It is surmounted by a fort, and cut in the rock below are several caverns which are used as state prisons.

LAGE-DE-CANHOTA, a town of Brazil, in the prov. of Alagoas and district of Imperatriz. It has a parish-church.

LAGENS, a town of the island of Flores, one of the Azore islands, on the SE coast. Pop. 1,400.

LAGER (Saint), a commune of France, in the dep. of the Rhone, cant. and 4 m. W of Belleville. Pop. 1,180. The environs afford excellent wine.

LAGERN, a mountain-range in Switzerland, extending from the vicinity of Baden, in the cant. of Argau, to Dielsdorf in Zurich. It forms the E branch of the Jura chain, and has an alt. of 3,000 ft.

LAGERY, a village of France, in the dep. of the Marne, cant. and 4 m. WNW of Ville-en-Tardenois. Pop. 420.

LAGES, a district and town of Brazil, in the prov. of Santa-Catharina. The district is large but thinly populated, the number of its inhabitants not exceeding 5,000. It is watered by the Curitiba or Iguacu, and several smaller streams; and produces fruit, gums, and varieties of excellent timber in great abundance. Cattle are also reared in great numbers. Timber and hides form the chief articles of local trade. The town is 130 m. E of Nossa-Senhora-do-Desterro.—Also a river in the prov. of Rio-de-Janeiro, which is supposed to have its source on the N side of the Serra-d'Itaguahi, runs NE through the district of São-João-do-Principe, receiving in its course the rivers Cosmo, Panellas, Passa-Vinte, Mozambique, Piloto, and Santa-Anna, and discharges itself into the Angra-dos-Reis. It derives its appellation from the quantity of boulders which are met with in its bed. After the junction of the Santa-Anna it takes the name of Guandu.

LAGGAN, a parish of Inverness-shire, about 17 m. SE of Fort-Augustus, about 20 m. in length, and from 18 to 20 m. in breadth. Pop. in 1831, 1,196; in 1841, 1,207. It is intersected by the Spey, and contains several lochs, the principal of which, Loch Laggan, is 9 m. in length, and from 1 to 2 m. in breadth, and it discharges itself by the river Spean into the Lochy.

LAGHI, or Lagin, a headland of Turkey in Europe, in Albania, in the sanj. of El-Bassan, on the S side of the bay of Durazzo.

LAGHUAT, an ancient town, belonging formerly to Marocco, but in recent times under the Algerine government, and now comprised in the French subdivision of Medeah, in the prov. of Algiers, in N lat. 33° 95′, E long. 3° 10′. It is built on the N and W sides of a mountain to the E of which runs the river Mzi, a small stream from which irrigates fine gardens to the N and S of the town, yielding dates, figs, peaches, plums, apricots, vines, almonds, mulberries, and bananas. The town is fortified, and is regarded as the capital of the Desert. Its pop. is estimated at from 5,000 to 6,000, who conduct a considerable trade in grain, powder, flints, oil, dates, cattle, haiks, cutlery, spices, sugar, and coffee.

LAGHY, a village of co. Donegal, 2¾ m. S by E of Donegal, and on the road thence to Ballyshannon. Area 20 acres. Pop. in 1841, 59.

LAGISHIN, a town of Russia in Europe, in the gov. and 141 m. SW of Minsk, district and 23 m. N of Pinsk.

LA GLEIZE, a department and commune of Belgium, in the prov. of Liege, arrond. of Verviers, watered by the Emblêve. Pop. of dep. 1,363; of com. 542.

LAGNASEO, a village of Sardinia, in Piedmont, in the div. of Coni, mandemento and 3 m. SE of Saluzzo, between the Po and Varaita. Pop. 1,980.

LAGNES, a village of France, in the dep. of Vaucluse, cant. and 4 m. ESE of L'Ile. Pop. 750. Fairs are held here twice a-year.

LAGNIEU, a canton, commune, and town of France, in the dep. of the Ain, arrond. of Belley. The cant. comprises 12 com. Pop. in 1831, 8,912; in 1841, 11,882. The town is 21 m. N of Belley, near the r. bank of the Rhone. Pop. in 1841, 2,531. It has a manufactory of straw-hats, and a tannery;

and carries on a considerable trade in thread. Fairs are held six times a year, and a market weekly.

LAGNI-REGI, Lagno, or Lanio, a river of Naples, in the prov. of the Terra-di-Lavoro, which has its source on the confines of the Principato-Ultra, in the mountain of Avella; traverses the plain of Nola; and after passing near Acerra, divides into two arms, of which one, having traversed Lake Patria, throws itself 1½ m. below, into the Mediterranean, after a course, in a generally W direction, of 51 m.

LAGNY, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, arrond. of Meaux. The cant. comprises 30 com. Pop. in 1831, 12,561; in 1841, 12,926. The town is 11 m. SW of Meaux, pleasantly situated on the l. bank of the Marne, which is here crossed by a bridge. Pop. in 1841, 2,212. It has a fine fountain and an hospital; and possesses manufactories of copper-ware and of cheese, and carries on an extensive trade in grain, timber, fruit, and fowls. This town was formerly fortified. In 1358 it was taken by the English, in 1544 by the marshal of Lorges, and in 1590 by the duke of Parma.

LAGO, a town of Naples, in the prov. of Calabria Citra, district and 17 m. SSE of Paola. Pop. 2,800.

LAGO-MAGGIORE. See Maggiore (Lago).

LAGOA, a village of Brazil, in the prov. of Minas-Geraes, in the com. of Ajuruoca, near the Rio Grande.

LAGOA. See Alagoa, and also Delagoa Bay.

LAGOA, or Mafumo, a river of Eastern Africa, in the district of Inhambane, which runs S into Delagoa bay.

LAGOA-DE-CIMA, a lake of Brazil, in the prov. of Rio-de-Janeiro, 10 m. W of Campos. It receives the Imbá, and discharges itself by the Ururahi into Lake Feia.

LAGOA-DE-MOSTARDAS, a lake of Brazil, in the prov. of São-Pedro-do-Rio-Grande, between the Lagoa-dos-Patos and the ocean. It is about 18 m. in circumf.

LAGOA-DOURADA, a village of Brazil, in the prov. of Minas-Geraes, 15 m. NNE of São-Jose.

LAGOA-SANTA, a village of Brazil, in the prov. of Minas-Geraes, comarca of Rio-das-Velhas, 10 m. NE of Sabara, on the bank of a lake of the same name.

LAGONEGRO, or Lagonera, a district and town of Naples, in the prov. of Basilicate. The district is divided into 10 cantons. The town is 12 m. ENE of Policastro, and 41 m. S of Potenza, at the foot of the Apennines, and near a lake of the same name, at an alt. of 2,100 ft. above sea-level. Pop. 5,000 It has 2 convents, and several charitable institutions. Linen and hats form its chief articles of manufacture. Fairs are held twice a-year.

LAGOR, a canton, commune, and town of France, in the dep. of the Basses-Pyrenees, arrond. of Orthez. The cant. comprises 23 com. Pop. in 1831, 11,238; in 1841, 11,375. The town is 10 m. SE of Orthez, and 17 m. NW of Pau. Pop. 1,700. It affords good red wine.

LAGORCE, a commune of France, in the dep. of Ardeche, cant. of Vallon, 9 m. SE of Largentière. Pop. 1,525.—Also a commune in the dep. of the Gironde, cant. of Guetres. Pop. 1,304.

LAGOS, a comarca and town of Portugal, in the prov. of Algarve. Pop. of com. 27,850. The town is 23 m. E of Cape St. Vincent, and 114 m. S of Lisbon, on the Atlantic, on the NW coast of a bay of the same name. Pop. 7,000. It is well-built, and has 3 churches, 3 convents, a civil and a military hospital, a town-hospital, a classical school, and a fine aqueduct. It has a small port. The bay is 6 m. in extent from E to W, and 3 m. from N to S, and is capable of affording anchorage to a large number of vessels. Its entrance is defended on the W by the batteries on the point Nossa-Senhora-de-Piedade, and nearer the town are the forts of Pinhao and Bandeira. Tunny and sardines are extensively fished on the coasts. The surrounding district produces wine, figs, and legumes, in great abundance.—Also a gulf of the archipelago, on the S coast of Turkey in Europe, in Romelia, in the sanj. of Gallipoli, in N lat. 41°, and E long. 25° 15′. Its entrance, lying between capes Fanari and Balustra, is 9 m. in breadth, and the depth of its embrasure is about equal. It receives the Karatch and the Sopari, and contains several islands. On its N side are a town and fortress of the same name.

LAGOS, a considerable town on the Guinea coast of Africa, at the N end of a low island, 5 m. long, and 1½ m. in breadth, within the entrance of Crado lagune. The river Ogu, which flows into the bight of Benin, and is navigable for moderate-sized vessels, connects L. with the populous and recently formed town of Abbeokuta, about 60 m. in the interior, on the Egba prov. of Yoruba. Although tributary to Benin, the king of Dahomey looks upon L. as within his dominions. This place has long been notoriously engaged in the slave-trade; and when the British cruizers began to capture slave-ships to the N of the equator, the slave-dealers, in order to escape detection, while at anchor in the Crado lagune at the mouth of the river—from which there is an inland canoe-passage to Benin—filled a number of vessels with stones and sank them on the bar. The chiefs of Yoruba are entirely opposed to the slave-trade; and Abbeokuta is composed of the inhabitants of 130 towns, who have assembled there for mutual defence against the ravages of the slave-trade. That spot was chosen for its natural strength; and although 30 years ago not a house existed on its site, it now contains 50,000 inhabitants. In 1842 a tide of emigration commenced from Sierra Leone, of liberated Africans who had been carried off from this part of the country, captured by the squadron, and landed at Sierra-Leone. Totally unassisted by government or European influence, they clubbed together, purchased a vessel, and undertook the voyage of 1,500 m. The natural access to Yoruba by Lagos being closed by the slave-traders, they landed at Badagry, and proceeded overland to Abbeokuta, where their arrival excited the strongest feelings of respect and affection towards England. The first body were soon followed by others, and now about 3,000 of these British subjects are settled at Abbeokuta, and a few at Badagry. In 1845 the Church Missionary society established a mission at these places; and 6 or 7 English missionaries belonging to that society and the Wesleyan Missionary society are now devotedly at work in the heart of Africa, spreading Christianity and civilization with unparalleled success. The late king of L. had two sons, Akitoye the younger, and Kosoko the elder. The latter was banished to Badagry for rebellion in his father's lifetime; but Akitoye, who had been made heir by the will of his father, on succeeding to the government, invited his brother home. The invitation was accepted; but before long Kosoko had organized a powerful party, by whose aid he deposed Akitoye, drove him from Lagos, and made himself king. In March 1851, the king of Dahomey marched against Abbeokuta, with the design of exterminating the missionaries and reducing the pop. to slavery. A severe action was fought under the walls of the town, in which the Dahomians were defeated with a loss of 1,209 of their best warriors. This abortive attempt was followed up, however, by other hostilities; and it soon became apparent that the safety both of the mission-

aries, the traders, and the liberated Africans in these free districts, depended on the restraint which could be put upon the hostile operations of the chief of Lagos. There seems reason to believe that these operations were the result of a preconcerted scheme arranged and assisted by the Brazilian slave-dealers, between the king of Dahomey and the slave-trading chiefs on the coast. Whydah, the principal port of Dahomey, was strictly blockaded, and the commodore on the station was instructed to consider the practicability of sending a small force into L. for the purpose of expelling the then chief and the slave-dealers by whom he was supported, and of re-establishing in his stead Akitoye, the former chief, who had been driven out mainly by the slave-dealers on account of his hostility to the slave-trade. Before, however, the formal instructions to commence these operations had reached the coast of Africa, Mr. Consul Beecroft had in some degree anticipated their tenour. Having arrived off L. on the 13th of Nov. 1851, he opened a negociation with Kosoko, to induce him to renounce the slave-trade; but, without waiting for the orders of the commodore, the consul went up the river to confer with this hostile chief. The proposed terms were rejected, and as the forts opened their fire on the boats—which were armed though sailing under a flag of truce—it was resolved that a somewhat precipitate attack should be made on the position. The Bloodhound steamer unluckily ran aground; the fire from the mud forts and stockades was more severe than had been anticipated; the defence was skilfully conducted by about 5,000 men against a party of 160 or 180 who had been landed, and it was found necessary to recall the forces, with a loss of two officers killed and 10 seamen wounded, after firing a part of the town. This failure rendered it incumbent on the commodore to take the earliest opportunity of inflicting summary retribution on Kosoko; and in less than a month after the first attack by the Bloodhound this refractory chief was assailed by a strong and well organized force, which led to an action on the 24th and 26th of December, in which, after a desperate engagement, the reduction of Lagos was effected, and 57 guns taken and destroyed. A treaty which was concluded a few days later with the restored chief of Lagos, Akitoye, prohibits the slave-trade, expels the slave-dealers, secures freedom of trade, puts down human sacrifices, and protects the propagation of Christianity. If these objects are really obtained, and if the territory of Abbeokuta proves to be what it is represented by the missionaries, a city of peace, of commerce, and in part of Christianity, an important step may have been made towards the improvement of Africa. If this channel has been cleared, and can be maintained clear for a legitimate trade, it will afford great facilities to the shippers of produce from the interior, which produces coffee, sugar, tobacco, cotton, palm-oil, and ivory.

LAGOS, a town of Mexico, in the state of Xalisco, 105 m. ENE of Guadalajara, and 225 m. NW of Mexico, in a fertile and well-watered plain. Pop. 2,000. In the vicinity is a silver-mine.

LAGO-SANTO, a town of the Papal states, in the leg. of Ferrara, on a point of land which stretches into the lake of Comacchio, and 6 m. N of Comacchio.

LAGOSTA. See Agosta.

LAGOW, a town of Prussia, in the reg. and 30 m. E of Frankfort, on a lake which is traversed by the Pleiske. Pop. 383.—Also a town of Poland, in the woivode of Sandemir, 15 m. WNW of Opatow. Pop. 1,500.

LAGRAN, a village of Spain, in the prov. and 15 m. SSE of Vitoria, partido and 9 m. NNW of La Guardia. Pop. 396.

LA GRANGE, a county in the NE part of the state of Indiana, U. S., comprising an area of 380 sq. m., generally undulating, and watered by the Fawn, Pigeon, and Little Elkhart rivers. Pop. in 1850, 8,424. Its cap. is Lima.—Also a township of Penobscot co., in the state of Maine, 97 m. NNE of Augusta. It has a fertile soil; and is watered by several streams, affluents of the Penobscot. Pop. 336.—Also a township of Duchess co., in the state of New York. It has a hilly surface, drained by Sprout and Wappinger's creeks, and possesses a fertile and well-cultivated soil. Pop. 1,851.—Also a township of Lorain co., in the state of Ohio, 111 m. NNE of Columbus, between two branches of Black river. Pop. 1,001.—Also a village of Oldham co., in the state of Kentucky, 35 m. NW by W of Frankfort, on the S bank of the Ohio. Pop. 233.—Also a village of Troup co., in the state of Georgia, 121 m. W of Milledgeville, on an affluent of Chattahoochee river. Pop. 1,000.—Also a village of Franklin co., in the state of Alabama, 136 m. N by W of Tuscaloosa, on elevated ground, 16 m. S of Tennessee river.—Also a village of Fayette co., in the state of Tennessee, 184 m. SW by W of Nashville, ½ m. N of Wolf river. Pop. 450.—Also a township of Cass co., in the state of Michigan, 171 m. W by S of Detroit, watered by a branch of Dowagiake river and Putnam's creek. It possesses a fine and well cultivated soil. Pop. 769.—Also a village of Lewis co., in the state of Missouri, 129 m. NNE of Jefferson city, on the W bank of the Mississippi, below the junction of Wyaconda river.

LAGRASSE, a canton, commune, and village of France, in the dep. of Aude, arrond. of Carcassonne. The cant. comprises 18 coms. Pop. in 1841, 5,901.—The com. is on the l. bank of the Orbieu. Pop. 1,327. It has several tanneries, and carries on a considerable trade in wool and iron.

LAGRAULET, a commune of France, in the dep. of the Gers, cant. of Montreal. Pop. 1,255.

LAGRAULIE'RE, a commune of France, in the dep. of the Corrèze, cant. of Seilhac. Pop. 2,009.

LAGRO, a village of Wabash co., in the state of Indiana, U. S., 94 m. N by E of Indianapolis. Pop. 486.

LAGRUERE, a commune of France, in the dep. of the Lot-et-Garonne, cant. of Le-Mas-d'Agenois, 9 m. SE of Marmande, on the Garonne. Pop. 1,279.

LAGUAN, an island in the Philippine archipelago, to the SW of Batag, in N lat. 12° 37′, E long. 125°. It is about 8 m. in length.

LAGUDIA, a group of islets in the Ionian sea, near the SW coast of the island of Corfu, in N lat. 39° 24′, E long. 19° 45′.

LAGUE'PIE, a commune of France, in the dep. of the Tarn-et-Garonne, cant. of Saint-Antonin. Pop. 1,099.

LAGUINGE, a village of France, in the dep. of the Basses-Pyrenees, cant. and 2 m. S of Tardets, and 10 m. S of Mauleon. Pop. 226. In the vicinity are beds of slate and marble.

LAGUIOLE, a canton, commune, and town of France, in the dep. of Aveyron, arrond. of Espalion. Pop. 2,128.

LAGUNA, a province of the island of Luçon, in the Philippine archipelago. It derives its name from lake Bay, around which it lies. It is watered by numerous streams, of which the principal is the Passanhan, and contains several thermal springs. Although possessing little culture, it produces rice in considerable quantities, indigo, and cacao. It affords also some kinds of Campeachy wood, and good timber. Pop. in 1825, 96,247, of whom 317 were mulattoes.—Also a town of Spain, in the prov. and par

tido and 4 m. S of Valladolid, in a plain between the Duero and Pisuergo. Pop. 385.

LAGUNA, a town of Bolivia, in the dep. of Charcas, and prov. of Tamina. It is now much decayed.

LAGUNA, Lagoa, or Santo-Antonio-de-la-Laguna, a district and town of Brazil, on the Lagoa Grande, in the prov. of Santa Catharina. Pop. 3,000. The district has a pop. of 6,000, chiefly cultivators of mandioc and millet, which, together with wood, are largely exported.—The lagune is 10 m. N of Cape Santa-Martha.

LAGUNA (La), or San-Antonio-de-la-Laguna, a town of Ecuador, in the prov. of Mainas, near the r. bank of the Huallaga, a few miles above its junction with the Orellana or Maranon.

LAGUNA (San-Cristobal-de-la), a town on the NE coast of Teneriffe, the capital of the island. It is finely situated on a basaltic hill, at an alt. of 1,620 ft. above sea-level. Most of the houses consist of only one story, with wooden balconies or roofs. Pop. 6,532. Since the eruptions of the volcano destroyed its port of Garachico, L. has declined from its former opulence, and Santa Cruz has become the centre of the commerce of the island.

LAGUNADALGA, a town of Spain, in the prov. and 20 m. SSW of Leon. Pop. 511. It has some trade in oil, soap, and leather.

LAGUNA-DE-CONTRERAS, a village of Spain, in the prov. of Segovia, 12 m. ENE of Cuellar, on the l. bank of the Duraton. Pop. 248.

LAGUNA-DE-LA-SOMOZA, a village of Spain, in the prov. of Leon, 7 m. SW of Astorga, near the Duerna. Pop. 310.

LAGUNA-DE-NEGRILLOS, a town of Spain, in the prov. and 25 m. S of Leon. Pop. 870. It has a parish-church, a public granary, and a custom-house.

LAGUNA ENCINILLOS, a lake of Mexico, in the dep. of Chihuahua, between the towns of Carazel and Chihuahua. It is about 20 m. in length, by 3 or 4 m. in breadth. The country in the vicinity affords excellent pasturage, but at present is entirely useless, from the continued inroads of the Apaches.

LAGUNAS (Las), a chain of lakes in Bolivia, in the Chiquitos territory, dep. of Santa-Cruz-de-la-Sierra.

LAGUNAS-DE-MAMORE (Las), a group of lakes in Bolivia, near the junction of the Mamore and Itenez or Guapore.

LAGUNILLA, a town of Spain, in the prov. and 12 m. S of Logrono. Pop. 998.

LAGUNILLA (La), a town of Spain, in Leon, in the prov. of Salamanca, and partido of Bejar. Pop. 720. It has a parish-church, an hospital, and a custom-house.

LAGUWAN, an island off the coast of Guayana, at the embouchure of the Essequibo, to the SE of Quoquaraba, in N lat. 6° 52′. It is about 10 m. in length.

LAHADJ, a town of Yemen, in Arabia, 16 m. NW of Aden, on the r. bank of the Meidam. It is the residence of a sultan, and is surrounded by a well-cultivated plain. Pop. about 500.

LAHAR, a town of Hindostan, in the prov. of Agra, 40 m. ESE of Gohed. It was taken by the British in 1781, but was restored to Sindia at the peace of 1783.—Also a town in the state and 54 m. E of Gualior.

LAHAWANOCK CREEK, a river of Pennsylvania, which runs into the Susquehannah, in N lat. 41° 20′.

LAHDACK. See Ladakh.

LAHERIE, a commune of Belgium, in the prov. of Luxemburg, dep. of Longlier. Pop. 134.

LAHESTRE, a department of Belgium, in the prov. of Hainault, arrond. of Charleroi, watered by the Haine. Pop. 1,216.

LAHI, or Laghi (Cape), a cape on the Albanian coast of the Adriatic, in N lat. 41° 20′ 10″, E long. 19° 25′ 6″.

LAHIJAN, a town of Ghilan, in Persia, 8 m. E of Reshd, on the r. bank of the Longhirud. It was once the metropolis of the prov.; but having revolted against Shah Abbas, it was taken and demolished, and has since ceased to be of any importance.

LAHMEDIEH, a village of Lower Egypt, on the E branch of the Nile, 14 m. SSW of Damietta.

LAHN, a small town of Prussian Silesia, on the Bober, 23 m. SW of Liegnitz. Pop. 900.—Also a considerable river of the W of Germany, which rises in Prussian Westphalia, in the Rodhaargebirge; flows through Upper Hesse and the duchy of Nassau, passing Marburg, Giessen, Wetzlar, and Nassau; and joins the Rhine between Upper and Lower Lahnstein, 4 m. SE of Coblenz, after a course of 100 m. It is navigable as far as Dietz, but might be rendered capable of conveying small boats as far as Marburg. Its principal affluents on the r. are the Fulda, Limde, Dill, Weil, Ems, and Elb; on the l. the Ahrd, the Solm, and the Dörsbach.

LAHNBERG, a town of Germany, in the duchy of Nassau, on the Lahn, 2 m. N of Weilburg. Pop. 700.

LAHNSTEIN (Upper and Lower), two contiguous towns in the duchy of Nassau, 8 m. WNW of Nassau, at the confluence of the Lahn and the Rhine. Pop. 3,393.

LAHOLM, or Lageholm, a seaport of Sweden, in the prov. of Halland, at the mouth of the Lagaaa, 30 m. N of Helsingborg. It has a considerable fishery of salmon; also fortifications erected by the Danes when in possession of the south of Sweden. It was reduced to ashes by accidental fire in 1802. Pop. 1,000.

LAHORE, a recently dissolved state of India, chiefly comprised between the Indus and the Sutledge, forming the dominions of the last Sikh maharajah, Runjit Sing, but now, with some exceptions of territory, annexed to the British dominions. Before its dismemberment and annexation it comprised a territory of at least 100,000 sq. m., with a pop. of 3,500,000; and its boundaries were the Himalaya on the N and E; the Sutledge, separating it from Gurwhal, Sirmur, and Sirhind, on the S; the Gharra, or united stream of the Beas and Sutledge, separating it from Upper Sind on the SW; and Afghanistan on the W. Of this territory, the region denominated the Punjab forms the larger, and by far the most valuable portion. The departments or great administrative divisions of Runjit Sing's kingdom were: 1st, the Punjab; 2d, Jummu and its dependencies; 3d, that of the Upper Indus, with Peshawur for its chief town; 4th, the district W of the Indus, of which the cap. was Dera-Ismail-Khan; 5th, Multan; 6th, the metropolitan prov. of Lahore. The three cities of Lahore, Amritsir, and Peshawur, contained each above 60,000 inhabitants; and Multan nearly 50,000. After the death of Runjit, and before the monarchy of his constitution had suffered any dismemberment, the total revenue paid annually into the exchequer of Lahore amounted, upon an average, to 122 lacs of rupees, or £1,220,000. Of this sum about 50 lacs were contributed directly by Cashmere and Multan, and between 2 and 3 lacs from the Jallinder Doab lying between the Beas and the Sutledge. Several small districts produced in the aggregate 22 lacs more; and about 11 lacs were annually raised by tolls and other duties. Burnes estimated the Khalsa or Sikh pop. of this state at 500,000; but Major Lawrence doubts whether the whole Punjab contains 250,000 Sikhs. Though comparatively few in number, they formed the mili-

tary and dominant class, and were chiefly located in the metropolitan prov., and especially in the cities of Amritsir and Lahore. Of the remaining pop., amounting to about 3,000,000, Mahommedans formed by far the most numerous portion, both in the Upper and the Lower Punjab. A considerable number were Hindu-Jats. The richest class were the Rajputs of the hills. A brief notice of the physical features and productions of the region lying within the limits above described, may be here inserted; but the reader will find ampler details under other heads, especially those of CASHMERE, INDUS, PUNJAB, and SUTLEDGE.

Physical features and productions.] Extending between the 28th and 36th parallels of N lat., and between the 71st and 77th meridians of E long., the country has a medium position corresponding nearly with that of Northern Africa and the American states. With mountain-ranges in its N portion which reach an elevation of 2 or 3 m., and with broad plains descending towards the S till they are scarcely above the level of the sea, all varieties of climate are obtainable, as well as every description of natural produce. The five rivers, the Indus, the Jelum, the Chenab, the Ravi, and the Sutledge, afford a navigation of not less than 1,960 m., together with such facilities of irrigation as may be turned to account even by the simplest methods.—Regarding climate, it appears that in Cashmere and the N district generally the therm. during winter often falls several degrees below the freezing point; that in the centre, at Lahore, it is seldom below 70° or 80°, and has been known to rise in the month of June, the period of greatest warmth, as high as 112°, in a tent artificially cooled; and that further S, towards Multan, the heat and dust storms are oppressive. During the principal part of the year the heat is accompanied by great dryness, except at midsummer, when there is rain for some weeks, especially in the northern districts. The diseases common to the country are the same as those observed throughout British India, fevers, liver complaints, and dysentery, being the most frequent. The readiness with which change of temperature may be obtained presents, however, a valuable means of mitigation, and the climate of Cashmere, as regards healthfulness, is asserted, not without some show of proof, to be the finest in the world. With respect to products, those of the N portion, including Cashmere, with its harvests of saffron and its important manufacture of shawls, estimated at £300,000 annually, together with the plains of Attock and Peshawur, which are covered with rich crops of rice, of wheat, and of barley, are extremely varied. The mountains, moreover, yield drugs and dyes and fruits, while their sides are covered with gigantic pines. Iron, copper, lead, salt, coal, nitre, plumbago, and even gold-mines abound; and, properly worked, would furnish, it is alleged, an enormous revenue. The Central Punjab is mostly a bushy jungle or pastoral waste, rescued from the desert by its rivers and by a primitive system of irrigation, while its dryness keeps it free from beasts of prey. Under these circumstances, large herds of cattle constitute its wealth. The plains, however, in the immediate vicinity of the Indus and its tributaries, are not surpassed in fertility, salubrity, or loveliness, by any in the East. The chief products which are cultivated are wheat and other descriptions of grain, indigo, sugar in abundance, rice, opium, cotton, hemp, assafœtida, and various sorts of oil seeds. The gardens yield guavas, dates, mangoes, limes, lemons, peaches, apricots, figs, pomegranates, plums, oranges, mulberries, grapes, almonds, melons, apples, beans, cucumbers, carrots, turnips, and a great variety of fruits unknown even by name to Europeans. Flowers, too, are produced in beautiful profusion. There are also trees valuable for their wood, but those adapted for fuel are rare. Amongst animals deer and camels are numerous. Buffaloes and sheep are also found in large herds and flocks. The flesh of cattle is, however, respected by the Sikhs, who only use the milk of the cow and the wool of the sheep, in addition to the skins or hides of either animal, which form an article of export. The Sikhs are extensive breeders of horses. Common domestic fowl as well as game exist in abundance, and the rivers swarm with fish, such as mullet, carp, &c., and a great variety of unknown species. The bee and the silk-worm thrive, and the fruits of their industry constitute valuable articles of trade and of home-consumption.

History.] Towards the close of the 17th cent the Sikhs, or Seikhs—whose history is sketched under the head SIKHS—had the nucleus of their empire, under Govind, in the fort of Amandpur-Nukkiwal on the Sutledge. In 1707, Banda, a Sikh chief, sacked Sirhind, and carried his devastations as far as Paniput. On Banda's capture and death, the Moslems waged a war of extermination against the Sikhs. All who escaped fled to the hills NE of Lahore, where they remained almost fugitives for 30 years, until Nadir Shah's invasion. On Nadir's death, they issued from their fastnesses, ravaged the Punjab, and repossessed themselves of Amritsir. In 1746, during the first Afghan eruption, they seized the Jallindar Doab; and when Timur, son of Ahmed Shah of Cabul, took Amritsir, and defiled their temples, they rose *en masse*, drave him out of the Punjab, and even captured Lahore. Ahmed Shah vainly endeavoured to subdue them. He retook Lahore, and drove the Sikhs before him from one end of the Punjab to the other; but no sooner had he retired than they were again upon his heels. The anarchy that followed upon the death of Ahmed Shah, and the weakness which preceded the hastening dissolution of the Delhi state, gave the Sikhs ample opportunity to subdue the Punjab, and consolidate their power. In 1750, Churut Sing held a small mud fort at Gujraoli, a village not far N of Lahore. At this time the Sikh confederacy was composed of 12 *missuls* or brotherhoods, some of whose *sirdars* or leaders were able to muster 10,000 or 12,000 horse. Churut Sing's missul was originally the weakest, but his successful defence of his mud fort raised him to popularity and leading influence among the Sikhs. Churut Sing was succeeded by his son Maha Sing, who also worked steadily and wisely for the aggrandizement of his family. Runjit Sing was only 12 years old when he succeeded his father Maha Sing; but in 1793, when only 17 years of age, he assumed the management of his own affairs, and at the age of 23 made himself master of the city of Lahore. He soon afterwards seized Kussur, and made an attempt on Multan; and in 1807 crossed the Sutledge, and began to wrest territory from the Sikh chiefs between the Jumna and Sutledge. His career in this quarter was, however, speedily checked by British interference; and in April 1808, a treaty was signed by him on the basis that he was not to keep troops to the S of the Sutledge, and the British were not to interfere with his government beyond that river; and that, as regarded the Cis-Sutledge states, the status of the year 1808 was to be upheld, while the territories of Sirhind and Malwa were specially taken under British protection. Runjit now directed his whole energies towards seizing all within the Punjab, and as far to the N and W of it as he could. In 1809, he got possession of Kangra; and in 1810, turning his attention to the opposite extremity of the Punjab, he laid siege to Multan, but retired on payment of a sum of money. In 1812, he took the rajaships of Bhunbar and Rajaori in the northern hills. In 1813, he bought for a lac of rupees the important fortress of Attock on the Indus. In 1814, he made an unsuccessful attempt on Cashmere; but he eventually achieved its acquisition in 1819. In 1818, he got possession of Multan; and the fall of that strong fortress paved the way for the conquest of Peshawur and Cashmere. In 1834, he entered into a treaty with Shah Sujah, whereby the latter gave up all claim to Peshawur and certain tracts on the Indus. Runjit died on the 27th of June, 1839, leaving an imbecile son named Karrack his direct heir. Karrack's cause was favoured by the British; but Dhyan, the able minister of the late maharajah, placed himself at the head of a dissident party, and espoused the cause of Shere, an adopted son of one of Runjit's wives. In the meantime an accident, as was alleged, removed Karrack out of the way. The new monarch, Shere, finding himself a mere tool in the hands of Dhyan, made an attempt to place himself under English protection, which insured his death. "'The Warwick of the Punjab,' under promise of raising a cousin of Runjit to the perilous height yet occupied by Shere, induced the ready instrument, whose appellation was Ajit, to enter into a conspiracy, the desired fruits of which he destined for another. This other was the too-famous boy-king Dhulip, the adopted son of one of Runjit's wives. This child was secretly brought into the capital; and shortly after, as Shere, while reviewing his troops, was passing before the body of cavalry commanded by Ajit, the latter advanced, and, under pretence of presenting him with a superb English carbine, shot him dead on the spot. So far successful, Ajit, with his followers, gal-

loped to the fort of Lahore. On his way he encountered a young son of Shere, named Pertab, whose throat he cut with his own hand; and entering the fort, he massacred the whole of Shere's wives. The last murder committed was that done on the infant son of Shere, who was only one day old; the monsters dashed it on the ground, and jumped upon it till life was extinct! The same day, and the eve succeeding to that day, witnessed the violent deaths of the old ex-minister and the new monarch, Ajit. The latter shot Dhyan dead, on his declaring that the boy Dhulip was the rightful heir to the throne. But Hira, the son of Dhyan, aided by the whole of the troops under the orders of the French general, Ventura, immediately attacked Ajit in the citadel, captured him, and slew him, with a vast number of his adherents. The boy-king Dhulip, under the management of his mother, the Rani, and the governorship of Hira, was forthwith acknowledged by our government, whose only object was to see a tranquil and friendly power established in the Punjab. But tranquillity and amity were destined to be strangers to the banks of the five rivers. The soldiery, who had been bribed by all sides, and who were gratified in proportion as usurpers increased, and their services were the more eagerly sought after and remunerated, grew mutinous for want of occupation. Hira, who would fain have tamed the monster whose savageness he had encouraged while it could be useful to him, was their first victim: he was shot — with the connivance it is believed of the Rani whom he had offended—before the eyes of the king while passing down the ranks on the back of an elephant. From that period the wildest anarchy reigned uncontrolled: the Sikh soldiery exercised the most licentious military despotism; and it was when they could exact nothing more from the exhausted treasury of the Punjab that they began to raise their lances in the direction of the British frontier on the Sutledge." The Rani, unable herself to control the army, whose excesses were now as burdensome to the country as the presence of an enemy could have been, urged it to measure its strength with that of the British on the other side of the Sutledge. The Sikh army had in 1843 and 1844 moved down upon the river from Lahore, and after remaining there encamped a few weeks, had returned to the capital. On the 11th of December, 1845, they took courage, and crossing the Sutledge at a point 12 m. from the cantonment of Ferozepur, invaded British India with a force of 60,000 men, and a noble train of artillery.

Sir Henry Harding, the governor-general of India, had at this critical juncture 10,500 men at Ferozepur, 7,200 at Ludiana, and 13,000 at Umballa; or about 30,000 men in all within 70 m. of the point of danger. With this comparatively small force the Sikhs were beaten in four pitched battles, fought in succession within six weeks, at Mudki, at Ferozepur, at Ferozeshah, and at Aliwal; but the want of heavy artillery and ammunition prevented the British following them across the Sutledge: and early in January 1846, a Sikh force crossed the river a few miles from Ludiana, with a large park of well-appointed artillery, and, under the very eyes of the British troops, formed a strong camp on the S side of the Sutledge, consisting of a series of semi-circular entrenchments, the outer one of which was 2½ m. from end to end, and ⅝ m. in depth; the whole surrounded by a deep ditch, and bristling with 67 pieces of artillery. A bridge of boats united this formidable camp to another on the opposite bank of the river, where also were planted heavy guns whose range swept easily across the river. The first portion of the siege-train, with ammunition, only reached the British camp on the 7th and 8th of February. On the morning of the 10th the army moved from their lines at Nialki. The artillery opened at 7 A. M.; the entrenchments were carried at the point of the bayonet; and at ½ past 10 o'clock, A. M., not a Sikh soldier was left alive upon the British bank of the Sutledge. On the 14th, the whole British army of the Sutledge was encamped at Kussur in the Punjab, within 30 m. of Lahore; and on the 20th the army encamped on the plain of Mean Mir, in the suburbs of Lahore. The maharajah, Dhulip Sing, having tendered to the governor-general the submission of himself and his chiefs, on the 9th of March, 1846, a treaty of peace was signed by which all the territory S of the Sutledge, and also the hill country between the Beas and the Indus, including the provs. of Cashmere and Hazarah, were ceded to the British. The maharajah also engaged to pay 50 lacs, or £500,000; to disband the mutinous troops, and confine his military force to 20,000 infantry, and 12,000 cavalry; not to extend or alter the limits of his territory without the concurrence of the British government; and to recognise the independence of Gholab Sing in such territories and districts as might be made over to him by the British government. No mention was made in this treaty of the provinces of Multan and Peshawur. On the 16th of March, a counter-treaty was signed at Umbitter by the governor-general of India and Gholab Sing, chief of Jamu, by which the latter was installed in possession, under British protection, of all the hilly or mountainous country between the Ravi and the Indus, including the valley of Cashmere, and the provs. of Husarah and Chumba, but excluding Lahul; and Gholab Sing undertook to pay £750,000. At the request of the Rani 10,000 British troops, with 36 pieces of artillery, were left in Lahore until a solid government should be established. The plan of government introduced under the treaty of Kussur, as it is called, was for a time eminently successful: but in the course of 1848 "the army of the state, and the whole Sikh people,"—to use the language of the governor-general's proclamation,—headed by Dewan Mulraj, chief of Multan, were again arrayed in arms against the British power. The storming of Multan, and the great battles of Chillianwalla and Gujerat, finally established British supremacy throughout the whole Lahore states: and on March 29th, 1849, the governor-general having proclaimed that the kingdom of the Punjab was at an end, and that the territories of Maharajah Dhulip Sing were then and henceforth a portion of the British empire in India, the Indus became the boundary of British India. Whether the Indus is a better boundary than the Sutledge is a question which divides military authorities. "The mouths of that river were made ours by the annexation of Sind. If we are to judge from the result, we could not have held the lower part of the Indus with either security or advantage, unless we held also the higher: nor would it be possible to make Sind pay for its keeping so long as it had to be armed and munitioned against a Sikh neighbour. Four years ago we had a sandy desert for our frontier, with a fierce, a numerous, a well-trained, and a fanatic army for our neighbours. That was not a state of things which could last long. The enemy burst into our dominions at once, and was checked in his onward progress rather through ignorance of his opportunities than any real impediment; and we, on the other hand, had to concentrate our army by forced marches from a considerable distance. If fortune seconded the desperate precipitancy of our attack and the courage of our arms, it is too much to reckon always on her favours. Our present situation is almost the reverse. We have mountains for our frontier, and hill-tribes for our neighbours. In the occupation of the Punjab we have the means of maintaining an army of observation, which we can easily concentrate at any one of the few passes through which our enemies can invade us. In fact, we can employ against the Afghans those very facilities which the Sikhs have employed against us. A glance at the Punjab shows its capacity for a frontier province or 'march,' to use the old word. Its five rivers are five natural lines of circumvallation, which our superiority in the arts and appliances of war will render more useful to the British defenders than to the Afghan assailant. Were it a matter of choice, these considerations would be rather too doubtful to justify so extensive a change in our Indian position and defences; but it is no longer a matter of choice, and has not been since the 12th of Dec. 1845, when the mutinous Janissaries of Lahore started on their unprovoked and ill-starred foray. We were then obliged to advance or recede." [*Times.*] For further considerations *pro* and *con* on this question see article INDUS.

In the new arrangements which have been made for the internal administration of the newly annexed territory, it is understood that the whole is to be arranged in 5 divisions, viz.: 1st, The division of Lahore, comprising the 5 sub-districts of Lahore, Amritsir, Dinanuggur, Skekhopura, and Wuzirabad. 2d, The division of Multan, comprising the 3 sub-districts of Multan, Pak-Puttun, and Jung. 3d, The Leia division, comprising the 4 districts of Leia, Kangurh, Dera-Ghazi-Khan, and Dera-Ismail-Khan; 4th, The Jelum division, comprising the 4 districts of Jelum, Shapur, Rawal-Pinder, and Pind-Dadun-Khan. And, 5th, a division comprising the 2 districts of Peshawur and Huzara. Important reforms have already been introduced into the taxation of the country. The whole of the land-assessment has been revised; and "when you have revised the land-assessment of an eastern exchequer you have seen the end of at least nine-tenths of everything which can be submitted to revision. The peaceful cultivators of the provinces have seen the end of the ancient system, under which the only limit to new demands was the exhaustion of the power of payment, and under which the emissaries of the government made it a rule to exact as much for themselves as for those who sent them. In many instances the scale of rates has been reduced 25, and in some 35, per cent.; and we are informed that a fixed revenue of 30 per cent. of the *gross* produce in the plains and 20 per cent. of the gross produce in the hills may now be raised with ease by the exchequer, and without oppression to the cultivator. There is every reason to believe that, however these changes may have influenced the minds of the upper classes of the Sikh community, they have abundantly conciliated towards us the goodwill of the majority of the native inhabitants. It is no uncommon occurrence, in the numerous feasts and festivals which are inculcated by their heathen superstitions, to hear the current of conversation among the common people interrupted by loud and spontaneous celebrations of the blessings of the British rule. The husbandman feels his deliverance

from the grinding tyranny of a fiscal overseer. The father begins to have faith in the preservation of his children from wanton outrage; and the man in whom nature has implanted a spark of honour or a principle of thrift exults over the establishment of a government which obtains the allegiance of its subjects by other means than bloodshed and spoliation. It is because the classes among whom sentiments like these have taken the firmest root, and for the most substantial reasons constitute the preponderating bulk of our new tributaries in the Punjab, that we cherish the most confident hopes of the discomfiture of any hostile invasions of our authority."

LAHORE, the capital of the state whose rise and fall under Runjit Sing is detailed in the above article, and at one period the residence of the Mogul emperors, is situated on the Ravi, in N lat. 31° 33′, and E long. 74° 26′, 230 m. NE of Delhi. Its fort and palace, and splendid gardens under the Mogul dynasty, have long been in a state of decay; for its position on the high road from Cabul to Delhi rendered it peculiarly open to the ravages of war. Some, however, of its splendid monuments still remain; but a recent French traveller says of it: "When seen from a distance, no idea can be formed of the spectacle it presents within; its present misery is as great as its past splendour. It is nothing but a mass of ruins; everywhere its noble mansions seem ready to fall to the ground. To adventure on foot through the inextricable mass of tortuous, infectious, dark streets forming the town, obstructed as they are too by ruins, and filled with elephants, horses, and men, is almost impossible for a stranger. The streets are so narrow that in many you may touch both sides as you pass. The houses, constructed of brick, are so high, so overladen with balconies and occupiers, and in such a state of dilapidation, that a blow would seem sufficient to overturn them, as it would the triumphal gates under which you pass in going from one quarter of the city to another. To sum up all, the ground, which has never been paved, is a mere open sewer, as horrible to see as to bear; and is pierced here and there by deep holes, which, notwithstanding all the address which is displayed to avoid them, often cause the elephants dangerous falls." Runjit Sing was at much expense in strengthening its walls and fortifications; but these are now being dismantled with a view to the opening up, ventilating, and cleansing of the city. Moorcroft states that the brick wall which surrounded L. when he visited it, in 1819, was 30 ft. high, and about 7 m. in extent; and Burnes says that the ancient cap. extended from E to W 5 m., with an average breadth of 3 m. The modern city occupied only the W angle of the ancient cap. There are two or three mosques; but none of them are of any size or magnificence; nor do the bazaars exhibit much appearance of wealth. There are now from 1,200 to 2,000 European residents within the city or in its vicinity; and their presence will doubtless speedily introduce trade and its concomitants into the city. In the city itself there were in 1850, 28,692 houses; and 143 schools, with an attendance of 2,243 pupils.—At Shahdarah, 2 m. N of the city, is the mausoleum of the emperor Jehangire, a quadrangular building of great beauty; and to the S of it, in the open plain, is the tomb of his favourite, Nur Jehan Begum.—The expenses of the municipal improvements introduced by the British authorities in this city are met by the levying of a petty custom, such as is common at home, on articles entering into the town for sale; and so highly are the improvements appreciated, and so lightly is the tax felt, that other large towns within the Punjab have applied for the extension of the system to them. Funds sufficient both for police and conservancy purposes are expected to be raised in this fashion, without taxing the resources of the state.

LAHORI BUNDER, a village of Sind, 33 m. SW of Tattah, on the l. bank of the Buggar or W branch of the Indus, 20 m. from the Pitti mouth. This place was formerly the seat of an extensive commerce, but it has fallen to decay in consequence of the Buggar having ceased to be navigable. By the treaty concluded in 1739 between Nadir Shah and the emperor Mahomed Shah, L. was used to mark the W boundary of Hindostan.

LA HORRA, a town of Spain, in Old Castile, in the prov. of Burgos, and partido of Roa. Pop. 731. It has a parish-church and a custom-house. Agriculture forms the chief branch of local industry.

LAHR, an amt or bail. and town of Baden, in the circle of the Middle Rhine. Pop. of bail. 15,860.—The town is on the r. bank of the Schulter, 11 m. SSW of Offenburg, and 20 m. SSE of Strasburg. Pop. 6,048. It is enclosed by a wall; and has an hospital, a poor's-house, a college, and an industrial school. It possesses manufactories of cloth, cotton, and linen fabrics, ribbon, leather, tobacco, chicory, vinegar, glue, playing-cards, &c. The environs afford lime and free-stone.

LAHR. See LAR.

LAHSA, EL-AHSA, or HADJAR, a district of Arabia, stretching along the W side of the Persian gulf, from the Chor-Abdullah to the S extremity of the gulf, or between the parallels of 23° 30′ and 30° N. The desert tract to the S of the lower part of the course of the Euphrates, inhabited by the Montefig Arabs, skirts it on the N; on the W a chain of hills running parallel to the coast of the gulf, and at a distance varying from 60 to 120 m., appears to divide it from the Nejed; on the S its limits are probably the interminable wastes of the great Roba-el-Chaly. Little is known of its interior. From the town of El-Kuweit or Kurem, on the coast of the gulf, a route leads NW into the territory of the Aneizeh Arabs, and SW to Jelajel in the Nejed. From El-Katif, 200 m. further S, on the coast of the gulf, routes lead W to Jelajel, WSW to Shakra and to Derayeh or El-Derej; and S to El-Hofuf. The great gulf of Bahrein, and the peninsular projection of Bahran, diversify the outline of the gulf to the S of El-Katif.—The greater part of L. is inhabited by Bedouin tribes, of whom the most powerful is that of Beni Khaled. A considerable number of Turks and Jews are found in the pop., scattered along the coasts. The Arabs of the coast mainly support themselves by fishing; those of the interior, upon dates. Rice and dhurra are cultivated; camels and asses, both of superior breed, are largely reared for exportation; and the fishery of pearls is pursued in the gulf, especially around the island of Bahrein.

LAHU (GRAND), a port of Upper Guinea, on the Ivory coast, at the mouth of a river of the same name, 30 m. W of Trade Town. Both points of the river are low and sandy. The town is built upon the W one, between the sea and a lagune, and is upwards of 1 m. in length. On the E point there is another smaller town. The two towns contain a numerous pop. The following description of them, from the *Journal of an African cruiser*, narrates their appearance in 1843: "On the side next the sea, you discern only the bamboo-walls of the town, and a few cocoa-nut trees scattered along the sandy beach; but on the lake-side there is one of the loveliest views imaginable. The quiet lake and its wooded islands,—the thousand of green cocoa-nut trees, laden with fruit, and shadowing all the shore,—the rivers, broad and dark, stretching away on either hand, until lost among the depths of the forest, which doubtless extends into the mysterious heart of Africa,—the canoes

returning along these majestic streams with people who had fled,—the hundreds of natives who reclined in the shade, or clustered around a fountain in the sand, or busied themselves with the canoes,—all contributed to form a picture which was very pleasant to our eyes, long wearied as we were with the sight of ocean and sky, and the dreary skirts of the sea-shore. King Peter, who rules over this beautiful spot, held his court under an awning of palm-leaves, in an area of more than 100 ft. square, around the sides of which were the little dwellings that conjointly composed his palace. The king received us with dignity and affability; and probably no less than 200 of his subjects were collected in the area to witness the interview. These people are a fine-looking race, well formed, and with very pleasing countenances."

LAHU (Half), a village of Upper Guinea, on the Ivory coast, 4 m. W of Grand Lahu.

LAHU (Mount), a range of hills in Upper Guinea, on the Ivory coast, 6 m. NNE of Grand Lahu. Alt. 350 ft.

LAHUL, or Lawur, a territory of Hindostan, in the NE of the Punjab; bounded on the N and E by Ladakh; on the S and SW by Kulu; and on the NW by Kishtawar; comprising an area of about 2,000 sq. m., and situated between 32° 35′ and 33° 20′ N lat., and between 76° 30′ and 77° 30′ E long. It is surrounded by lofty mountains, the highest summits of which rise to the alt. of upwards of 17,000 ft., and are covered with perpetual snow. Barra-Lacha pass, on the NW, has an elevation of 16,500 ft.; and Ritanka pass, on the S, 13,300 ft. The elevation of the whole territory considerably exceeds 5,000 ft. It is intersected by numerous streams, affluents of the Surajbhaga and Chandrabhaga, and is capable of successful cultivation. The indigenous productions of the soil are scanty, and the few fruits it affords are harsh and of small size. With the exception of Gosha and Tandi, two small hamlets at the head of the Chenab, it contains nothing in the form of a village. The houses are built in rows on the acclivities of the mountains, and are generally two or three stories in height. They are flat-roofed, and built of stone. The lower part is used as a place of shelter for cattle. Access to the upper is obtained by means of a notched plank of pine. The inhabitants are Tartars, and find their chief employment in the transit of goods between Chumbakulu and Ladakh. They wear a thick but soft species of woollen cloth of their own manufacture, and both men and women adorn themselves with a profusion of trinkets.

LA HULPE, a department and commune of Belgium, in the prov. of Brabant, arrond. of Nivelles, watered by the Argent. Pop. of dep. 1,397; of com. 963. Paper forms the chief article of local manufacture.

LAHUN (El), a village of Central Egypt, in the district of Fayum, 11 m. SE of Medenit-el-Fayum, at the entrance of a gorge of the same name, and on Joseph canal. It is supposed to be on the site of the ancient *Ptolemais Portus* or *Ptolemaidon Arsinoitum*.

LAIAH, a town of Senegambia, in the district and 30 m. SE of Furicaria, near the r. bank of the Kolungtang.

LAIBACH. See Laybach.

LAICHE, a commune of Belgium, in the prov. of Luxemburg, dep. of Chassepierre. Pop. 272.

LAICHEV, a town of Russia in Europe, in the gov. and 30 m. SSE of Kazan, on the r. bank of the Kama, 21 m. from its confluence with the Volga. Pop. 550. It is one of the chief entrepots for the salt of Perm, and has an annual fair.

LAICHINGEN, a town of Würtemberg, in the circle of the Danube, bail. and 11 m. ENE of Munsingen, and 10 m. NNW of Blaubeuern. Pop. in 1840, 2,014. It has an hospital. The manufacture of linen, and agriculture, form the chief branches of local industry.

LAID-BROLY, a commune of Belgium, in the prov. of Liege, and dep. of Ayeneux. Pop. 187.

LAIDLEY (Mount), a summit of New South Wales, between Hervey and Croker ranges, between 32° 50′ and 33° S lat., and 148° 58′ E long.

LAIDLEY PLAINS, a level tract in the district of Moreton bay, New South Wales, between Hay peak and an affluent of Lockyer creek.

LAIGLE. See Aigle (L').

LAIGNE', a village of France, in the dep. of the Mayenne, cant. and 6 m. W of Chateau-Gontier. Pop. 1,015.

LAIGNE'-EN-BELIN, a commune of France, in the dep. of the Sarthe, cant. of Ecommoy. Pop. 1,248.

LAIGNELET, a commune of France, in the dep. of the Ille-et-Vilaine, cant. and 3 m. ENE of Fougeres. Pop. 1,084. It has a glass-work.

LAIGNES, a canton, commune, and town of France, in the dep. of the Cote-d'Or, arrond. of Chatillon-sur-Seine. The cant. comprises 23 com. Pop. in 1831, 10,956; in 1841, 10,904. The town is 11 m. W of Chatillon-sur-Seine, near the source of a river of the same name. Pop. in 1841, 1,563. It has manufactories of linen, hats, and wooden ware, and an oil-mill; and carries on an active trade in cattle, wool, and hemp. In the environs are mines of coal. —The river L. has its source 1½ m. W of the town of the same name; runs N into the dep. of the Aube; passes Riceys; and, after a course of 21 m., throws itself into the Seine, on the l. bank, at the v. of Polizy.

LAIGNY, a commune of France, in the dep. of the Aisne, and cant. of Vervins. Pop. 1,282.

LAIGONAL, a mountain of France, in the chain of the Cevennes, 10 m. N of Vigan, on the confines of the deps. of the Gard and Lozere.

LAIGUEGLIA, a town of Sardinia, in the div. of Genoa, prov. and 7 m. SSW of Albenga, mand. and 2 m. SW of Alassio, on the Mediterranean. Pop. 1,421. It has several oil-mills.

LAIGUILLAT, a village of France, in the dep. of the Dordogne, cant. and 5 m. SSE of Mareuil. Pop. 1,019. It has two annual fairs.

LAILLE, a commune of France, in the dep. of the Ille-et-Vilaine, cant. of Guichen, 10 m. SSW of Rennes. Pop. 1,728. Fairs are held twice a-year.

LAILLY, a commune of France, in the dep. of the Loiret, 2 m. E of Beaugency, and 15 m. SW of Orleans. Pop. 1,735.

LAINATE, a town of Austrian Lombardy, in the prov. and 11 m. NW of Milan, district and 5 m. S of Saronno. Pop. 1,500.

LAINE, a village of France, in the dep. of the Saone-et-Loire, cant. and 5 m. NNW of La Chapelle-de-Guinchay. Pop. 520. It has 4 annual fairs.

LAINIO-ELF, a river of Sweden, in the prefecture of N. Bothnia, which issues from Lake Rosto; runs SE; and, after a course of about 150 m., throws itself into the Muonio-elf, on the r. bank, at Paialo-Kengiz, 120 m. N of Tornea.

LAINSECQ, a village of France, in the dep. of the Yonne, cant. and 5 m. S of St. Sauveur. Pop. 1,000. It has 6 annual fairs.

L'AIR, a commune of Belgium, in the prov. of Hainault, dep. of Horrues. Pop. 117.

LAIRG, or Larig, a parish in Sutherlandshire, intersected in nearly its entire extent by Loch Shin, and containing several small lakes and streams. Pop. in 1831, 1,045; in 1841, 913.

LAISSAC, or Layssac, a canton, commune, and town of France, in the dep. of Aveyron, arrond. of Millau. The cant. comprises 7 com. Pop. in 1831,

7,912; in 1841, 7,477. The town is 26 m. NW of Millau, near the l. bank of the Aveyron. Pop. 1,702. It possesses manufactories of pottery and of caddis, a wool-spinning mill, and several paper-mills, and has 2 annual fairs. In the vicinity are mines of coal.

LAITHAFALVA, or POTZNEUSIEDEL, a small town of Hungary, on the Laitha, 11 m. SSW of Presburg. Pop. 1,350.

LAIVES, or ST. MARTIN-DE-LAIVES, a commune of France, in the dep. of the Saone-et-Loire, cant. and 1½ m. W of Senecy, and 14 m. S of Chalons-sur-Saone. Pop. 1,373. It has 2 annual fairs.

LAIZETTE, a commune of Belgium, in the prov. of Hainault, dep. of Eugies. Pop. 355.

LAJAS, a port of the Canary islands, on the E coast of the island of Fortaventura, to the E of Oliva.

LAJE (SANTA-MARIA-DE), a town and small port of Spain, in Galicia, in the prov. and 37 m. WSW of Corunna, on a bay of the same name. Pop. 492. It has extensive sardine fisheries.

LAJNO, a market-town of Naples, in the prov. of Calabria-Citra, district and 19 m. NW of Castrovillari, near the source of the Lao. Pop. 2,600.

LAKA, a river of Galicia, which rises near Kolbuszow; runs NE, and then NW; and flows into the Vistula, on the r. bank, opposite Sandomir, after a course of 48 m.

LAKAHURRA, a village of the Punjab, 60 m. NE of Multan, on the route to Lahore.

LAKARDEWANI, a district of Hindostan, in the SE of Bhagulpur, consisting of rich land, finely interspersed with rocky hills. Area 919 sq. m. Pop. 240,000, nearly all Hindus. Its chief town is Nuni, on the l. bank of the Mawr, which drains the entire district, intersecting it from NW to SE.

LAKE, a county in the NE part of the state of Ohio, U. S., watered by Grand and Chagrin rivers. Area 220 sq. m. Its cap. is Painesville. Pop. in 1840, 13,719; in 1850, 14,645.—Also a co. in the NW part of Iowa, bordering on the N on Lake Michigan. Area 468 sq. m. Pop. in 1840, 1,468.—Also a co. in the N part of Illinois, skirted on the E by Lake Michigan. Area 425 sq. m. Pop. in 1840, 2,634; in 1850, 14,134. Its cap. is Little Fort.—Also a township in Starke co., in Ohio. Pop. 2,150.—Also a township in Logan co., Ohio. Pop. 1,175.—Also a township in Wayne co., Ohio. Pop. 1,144.

LAKE (CIRCLE OF THE), or SEE-KREIS, a circle of the duchy of Baden, on the N side of the lake of Constanz, bordering on Hohenzollern, Würtemberg, and Switzerland. It comprises the bishopric of Constanz, the eastern part of the principality of Furstenberg, and the towns of Uberlingen and Offullendorf.

LAKEDIVES. See LACCADIVES.

LAKE-OF-THE-THOUSAND-ISLANDS, a lake-like expanse formed by the St. Lawrence, after issuing from Lake Ontario, so called from the variety and number of islands with which it is interspersed. It is about 6 m. in breadth, and extends for 40 m. NE of Kingston. The islands are said to amount to 1,700 in all; but the largest is only 10 m. in length, by 6 m. in breadth.

LAKE-OF-THE-HILLS, a large lake in the NW part of North America, about 200 m. in length, and from 50 to 25 m. broad.

LAKE-OF-THE-WOODS, or LAC DE BOIS, a lake of North America. It is 70 m. long, and 40 m. wide; and derives its name from the quantities of oak, fir, pine, spruce, &c., which grow on its banks. It contains a few small islands. The boundary between Canada and the United States runs from Lake Superior, by Pigeon river, to the NW angle of this lake, in N lat.. 49°, W long. 94° 25′; and thence due W along the parallel of 49° to the Rocky mountains.

LAKE PLEASANT, a township in Hamilton co., in the state of New York, U. S., 81 m. NW by N of Albany, which takes its name from one of numerous small lakes, on the W side of which stands a village, also named from the lake. Pop. 300.

LAKE PROVIDENCE, a village in Carroll p., in the state of Louisiana, U. S., 366 m. NNW of New Orleans, on a lake formed by the ancient bed of the Mississippi, which discharges itself by the Tensas.

LAKENHAM, a parish of Norfolk, 1½ m. SSW of Norwich. Pop. 4,006.

LAKENHEATH, a parish of Suffolk, 5½ m. W of Brandon-Ferry. Area 10,550 acres. Pop. 1,579.

LAKE RIVER, a small stream of North America, which falls into the Mississippi, in N lat. 46° 30′. It is about 15 yds. wide at its mouth.

LAKE RIVER (LITTLE), a river of North America, which runs into the Mississippi, in N lat. 45° 36′.

LAKKI, a town of Afghanistan, in the district and 10 m. N of Marwat, on the Kurund river.

LAKOR, an island in the Banda sea, one of the Serawatti group, 62 m. E of the E end of Timor, between Moa on the W, and Loewang on the E, in S lat. 8° 15′. It resembles a dry coral bank raised about 20 ft. above sea-level. A few patches of sand which occur here and there are planted with cocoanuts; and some spots admit of cultivating yams and other roots. The pop. is estimated at between 800 and 1,000, whose chief wealth consists in pigs and sheep.

LAKTHO, a territory of India beyond the Ganges, situated to the N of Ava, and to the S of the Chinese prov. of Yun-nan. It is very little known, and has never been visited by Europeans; but appears to stretch along both sides of the Le-sien-kiang, between the Ho-Ti-kiang on the E, and the Kiu-ling on the W; and is described as mountainous, rocky, and incumbered with various species of underwood. The mountains are said to be penetrated by extraordinary natural caverns, which have been formerly inhabited. The soil is suited in many places to the cultivation of rice; and bamboos of immense size are among its vegetable productions. The inhabitants are represented as trading with Tonquin for salt, of which their country is destitute, though in cases of necessity they procure an inferior kind from the ashes of burned vegetables. They also import salt fish, oil, and silk stuffs for their chiefs; paying for these articles in buffaloes and cotton. Some have supposed that Laktho is only another name for Laos; others identify it with the Tar-ut-Shan territory of the Chinese.

LAKURA, a village of Beluchistan, 70 m. S of Kelat, in N lat. 28° 5′.

LALAIN, or POUY, a small river of France, which rises near Pouy, in the SW of the dep. of Aube, and flows into the Vannes, on the r. bank, near Foissy.

LALAING, a commune and village of France, in the dep. of Nord, cant. and 4 m. ENE of Douay. Pop. 1,692.

LALAND. See LAALAND.

LALANG, an island near the N coast of the island of Sumatra, in the straits of Malacca, in N lat. 2° 20′. It is about 10 m. in length.

LALANNE, a village of France, in the dep. of Hautes-Pyrenees, cant. and 2 m. WSW of Trie. Pop. 1,200.

LALANT (UNY), a parish of Cornwall, 3 m. SE of St. Ives. Area 4,240 acres. Pop. in 1841, 2,012.

LALBENC, or LALBENQUE, a town of France, in the dep. of the Isère, cant. and 3 m. NE of Vinay. Pop. 1,960.

LALEHAM, a parish in Middlesex, 2 m. S by E of Staines. Area 1,290 acres. Pop. in 1841, 612.

LALESTON, a parish in Glamorganshire, 2½ m. W of Bridgend. Pop. in 1831, 442; in 1841, 507.

LALEU, a commune of France, in the dep. of Charente-Inferieure, cant. and 3 m. WNW of Rochelle. Pop. 800.—Also a com. in the dep. of the Orne, 3 m. NNE of Mèle-sur-Sarthe. Pop. 1,115.

LALEYRIAT, a village of France, in the dep. of Ain, cant. and 4 m. E of Nantua. Pop. 1,100.

LALHEUE, a village of France, in the dep. of Saone-et-Loire, cant. and 3 m. W of Senecey, on the r. bank of the Grone. Pop. 650.

LALIA, a town of Senegambia, in the territory of Futa-challon, 35 m. ESE of Labbe.

LALIM, a town of Portugal, in the prov. of Beira, comarca and 12 m. SW of Lamego.

LALIN, a judicial partido, district, and town of Spain in Galicia, in the prov. of Pontevedra. The partido comprises 164 parishes. The town contains a parish-church and a custom-house. Pop. 270. Its industry consists chiefly in the rearing of cattle.

LALINDE, a canton and commune of France, in the dep. of Dordogne, arrond. of Bergerac. Pop. of cant., comprising 15 coms., 9,434; of com., 1,882.

LALITA-PATAM, a town of Nepal, 1½ m. S of Kathmandu, near the l. bank of the Bogmutti, in N lat. 27° 40′, E long. 85°. In 1803 it had a pop. of 24,000. Copper and tin wares, and cotton goods, are amongst its manufactures.

LALLA, or Lala, a small town of Greece, in the Morea, 15 m. NNW of Fanari, in the middle of a fine champaign slope which extends 5 or 6 m. on both sides of the Alpheius, in the elevated country to the NE of Olympus. It is the ancient *Alesiœum*.

LALLARY POINT, a cape on the SW coast of the island of Banca, in N lat. 2° 48′.

LALLAY, a village of France, in the dep. of Bas-Rhin, cant. and 2 m. SW of Villé. Pop. 600.

LALLI, a town in the Punjab, between the Chenab and Jelum, in N lat. 31° 49′. Pop. 5,000.

LALLYCROSS, a village of co. Cork, in the p. of Castlemagner. Pop. 166.

LALPUR, a town of Northern India, on the l. bank of the Cabul river, in N lat. 34° 17′. At an alt. of 1,404 ft. above sea-level. The river is fordable here.

LALSK, a town of Russia, in the gov. of Vologda, on the r. bank of the Louza, 45 m. NE of Veliki-Oustioug. Pop. 1,500. It has a brisk trade with Siberia, Moscow, and Archangel.

LALSUNT, a village of Hindostan, in the prov. of Ajmir, state and 45 m. SE of Jeypur.

LALUE, a commune of Belgium, in the prov. of Hainault, dep. of Anderlues. Pop. 572.

LALUSI, a village of Greece, in the Morea, in the nom. of Achaia, 5 m. S of Chelandritza, on a small affluent of the Peirus.

LALUTAYA, an island of the Philippine archipelago, between Paragua and Panay, in N lat. 11° 7′, E long. 121°. It is about 9 m. in length.

LAMA, a town of the Papal states, in the deleg. and 7 m. ENE of Ascole. Pop. 1,100.—Also a town of Austrian Lombardy, in the Polecina, 4 m. NE of Crespino.—Also a town of Naples, in Abruzzo-Citra, 15 m. SE of Lanciano. Pop. 2,000. It has manufactories of woollen cloth.—Also a canton and com. of Corsica, in the arrond. of Bastia. Pop. of cant. 1,392; of com. 387.—Also a river of Russia, in the gov. of Moscow, which rises 12 m. N of Rouza; flows N; and skirting the gov. of Tver, joins the Volga; on the r. bank, 24 m. NNW of Kein, after a course of 90 m.

LAMA (San Salvador de), a judicial partido, district, and town of Spain, in Galicia, in the prov. of Pontevedra. The partido comprises 31 parishes. Pop., chiefly pastoral, 760.

LAMA-DANGRA, a chain of mountains in Nepal, running WNW and ESE, from the l. bank of the Gordok, to the r. bank of the Kosi.

LAMAIN, a commune of Belgium, in the prov. of Hainault, cant. of Tournay. Pop. 595.

LAMAJAN, or Loemadjan, a native town of Java, 26 m. SSE of Probolingo. It stands on a plain at a considerable elevation above sea-level. Its principal feature is a fine square or central area, shaded by noble banyans, and bordered by the residences of the principal people.

LAMALMON, a large and lofty mountain of Abyssinia, on the caravan-road from Massuwah to Gondar, near the centre of the Samen chain. The ascent is very difficult, being in many places nearly perpendicular, and only to be mounted by a narrow path on the edge of precipices. At the most difficult pass, a duty is levied on all travellers. At the summit is an extensive plain, finely watered, and abounding with corn and pasture. A number of villages on this mountain are occupied by the descendants of the ancient inhabitants of the mountains of Abyssinia, who still preserve the religion and manners of their ancestors, and speak a language peculiar to themselves called the Falasha.

LA-MAR. See Mar.

LAMAR, a township in Clinton co., in Pennsylvania, on Cedar creek. Pop. 1,883.—Also a village in Marshall co., in the state of Mississippi.

LAMARCHE, a canton, commune, and village of France, in the dep. of Vosges, arrond. of Neufchateau.—The cant., comprising 26 com., had a pop. of 16,355 in 1841.—The com., 22 m. S of Neufchateau, on the r. bank of the Mouzon, had a pop. of 1,625.

LAMARCHE-SUR-SAONE, a village of France, in the dep. of Cote-d'Or, cant. and 3 m. SW of Pontaillier. Pop. 1,050.

LAMAROSA, a town of Portugal, in the prov. of Estremadura, comarca and 52 m. SE of Santarem, on a small stream of the same name, an affluent of the Tagus. Pop. 300.

LAMARSH, a parish of Essex, 6 m. NE of Halstead. Area 1,160 acres. Pop. in 1841, 404.

LAMAS, a province of Peru, intersected by the Moyobamba, a branch of the Huallaga. It is mountainous, and covered with wood.—The capital, of the same name, is situated in S lat. 7° 5′, on the l. bank of the Moyobamba.

LAMAS-DE-ORELHAO, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 21 m. NE of Villa-Real.

LAMATO, a small town of Austrian Italy, 5 m. NW of Milan.—Also a town of Naples, in Calabria Ultra 2da, 9 m. NW of Catanzaro. Pop. 1,400.—Also a river of Naples, in Calabria Ultra 2da, which rises near Adamo, runs S, and WSW, and flows into the gulf of Santa-Eufemia, 9 m. NNE of Il Pizzo, after a course of 32 m.

LAMB-HEAD, a cape on the SE coast of the island of Stronsa, one of the Orkneys, in N lat. 58° 57′.

LAMB'S HEAD, a cape of Ireland, forming the N point of entrance to Kenmare river, in co. Kerry, in N lat. 51° 42′.

LAMBA, a small uninhabited island of Scotland, on the NE coast of the mainland of Shetland, in N lat. 60° 45′.

LAMBACH, a town of Upper Austria, on the l. bank of the Traun, 6 m. ENE of Schwannenstadt. It has 3,000 inhabitants, and is neatly built, most of the houses being erected since 1809, when it was burned. It is an entrepot for the salt of Hallstadt and Ischil. There is a noble Benedictine abbey and church here.

LAMBALE, a village of Western Africa, on the Senegal, 75 m. SE of Goumel.

LAMBALLE, a town of France, dep. of Cotes-du-Nord, on the Gouessant, 21 m. W of Dinan. Pop. 4,200. It is surrounded with walls of old date, and has two suburbs. It has manufactures of linen and parchment.—The cant., comprising 13 coms., had a pop. of 14,634 in 1841.

LAMBANESS, a cape on the NE coast of the island of Unst, in the Shetland group, in N lat. 61° 10′.

LAMBARE, a fort of Paraguay, on the Paraguay. 2 m. S of Assumption, in S lat. 25° 20′.

LAMBAY, a small island in the Irish sea, near the W coast of co. Dublin, 1½ m. in length, and 1¼ m. in breadth. Area 595 acres. Pop. 100.

LAMBAYEQUE, a town of Peru, in the intendancy of Truxillo, situated in a pleasant and fertile spot, about 2 leagues from the sea, and 4 from its port of Pascamayo, 95 m. WNW of Truxillo. It has an elegant parish church of stone; and the river Lambayeque runs through the town, and fertilizes the environs. Some wine is made here; the poorer classes manufacture coarse cottons. The road to Lima passes through this place. Pop. 8,000, consisting of Spaniards, Mestizoes, and Indians. The principal manufactures are soap, goat-skin leather, cotton cloth, and marmalade of quinces, guavas, and limes. Hats of palm and rushes are also made here. Some of the shops and stores are well-stocked with European goods.

LAMBEG, a parish partly in co. Down, partly in co. Antrim. Area 1,565 acres. Pop. in 1831, 1,819; in 1841, 1,967.—Also a village in co. Antrim, 2 m. N of Lisbon. Pop. 218.

LAMBERHURST, a parish partly in Kent, partly in Sussex, 14 m. SW of Maidstone. Area 5,290 acres. Pop. 1,572.

LAMBERMONT, a village and com. of Belgium, in the prov. of Liege. Pop. 743.—Also a com. of the prov. of Luxemburg, dep. of Muno. Pop. 378.

LAMBERT, a village of France, in the dep. of Ardennes, cant. and 3 m. NE of Artigny. Pop. 216.

LAMBERT BAY, a bay on the NE coast of the island of St. Christopher, 2 m. SW of Muddy-point.

LAMBERT (Cape), a headland on the NW coast of Australia, in S lat. 20° 35′, E long. 117° 8′.

LAMBERT (Point), a cape on the coast of New Cornwall, forming the S boundary of Port Essington, in N lat. 54° 10′.

LAMBERT-DU-LATRAY (Saint), a commune and town of France, in the dep. of Maine-et-Loire, cant. and 12 m. SSW of Angers. Pop. 414.

LAMBERT-DES-LEVEES (Saint), a commune and town of France, in the dep. of Maine-et-Loire, 2 m. N of Saumur. Pop. 1,726.

LAMBERT-DE-LA-POTERIE (Saint), a commune of France, in the dep. of Maine-et-Loire, cant. of Thouarce. Pop. 1,273.

LAMBERT'S POINT, a cape of the island of Barbadoes, on the WSW coast, 2 m. WSW of High point.

LAMBESC, a canton, commune, and town of France, in the dep. of the Bouches-du-Rhône, arrond. of Aix. The cant. comprises 6 com. Pop. in 1831, 6,715; in 1841, 9,408.—The town is 14 m. NW of Aix, on the road from that town to Avignon. Pop. in 1841, 3,587. It is built partly on the slope of a hill, and has a handsome church, a large town-house, an hospital, several fountains, and two public walks. The lower part of the town possesses some elegance, but the upper is ill-built. It has manufactories of vermicelli and of soda, several oil-mills, and in the environs extensive brick and tile-kilns. The trade consists chiefly in grain. Fairs are held three times a-year. Previous to the revolution this town bore the title of a principality.

LAMBETH, an extensive parish, metropolitan suburb, and parl. borough, situated in the E division of the hund. of Brixton, Surrey, 1¾ m. SW by S of St. Paul's cathedral, on the SE bank of the Thames, which is here crossed by the Waterloo, Westminster, and Vauxhall bridges, and intersected by the London and Southampton railway. It forms, with Southwark, one of the most extensive suburbs of London, covering an area of 16 m. in circumf. Area of parish, including the districts attached to the new churches of St. John, Waterloo road, Kennington, Brixton, and Norwood, 3,640 acres. Pop. of p. in 1801, 27,937; in 1831, 87,856; in 1841, 115,888; in 1851, 139,240. By the Reform act, part of Lambeth, with the parish of St. Mary Newington, and the parish of St. Giles Camberwell, except the manor and hamlet of Dulwich, were appointed to return 2 members to parliament. Area of parl. borough 8,840 acres. Pop. in 1841, 197,412. Electors registered in 1837, 7,040; in 1847, 13,885. At Nine Elms is the London terminus of the South-eastern railway, well situated for economy and convenient connexion with the Thames. The residence of the archbishops of Canterbury is an extra-parochial precinct in this parish. It is situated near the Thames, between Vauxhall and Westminster bridges. It is an irregular but extensive pile, exhibiting specimens of almost every style of architecture that has prevailed within the last 700 years.

LAMBEZELLEC, a commune and town of France, in the dep. of the Finistère, cant. and 2 m. N of Brest. Pop. in 1841, 9,548. It has manufactories of sailors' coats and hats, and several oil-mills.

LAMBI. See Mel.

LAMBLEY, a parish of Nottinghamshire, 5 m. NE of Nottingham, and NW of the Trent. Area 2,170 acres. Pop. in 1831, 824; in 1841, 983.

LAMBLEY-UPON-TYNE, a parish and township in the co. of Northumberland, 4½ m. SW of Haltwhistle, on the W bank of the S. Tyne. Area of p. 2,310 acres. Pop. in 1831, 252; in 1841, 249.

LAMBOGE′. See Ambojar.

LAMBOURN, or Chipping-Lambourn, a parish in Berks, 65 m. W of London, and 7 m. NNW of Hungerford, comprising the market-town of Chipping-L., and the tythings of Upper-L., Blagrave-with-Hadley, and Eastbury-with-Bockhampton. Area of the p. 14,880 acres. Pop. of the p. in 1801, 2,045; in 1831, 2,386; in 1841, 2,595; of the town in 1831, 1,166; in 1841, 1,333.—The town is situated in a pleasant open country, near the edge of the chalk-downs which intersect this district. It is an ancient place, but contains some neat modern houses, and is well supplied with water. Horse-races are held annually on L. downs.

LAMBOURN (Upper), a tything in the above parish, 1½ m. NW of Lambourn. Pop. in 1831, 387; in 1841, 388.

LAMBOURNE, a parish in Essex, 4 m. S by E of Epping, on the river Roding. Area 2,480 acres. Pop. in 1831, 778; in 1841, 904.

LAMBRATE, a village of Austrian Lombardy, in the prov. and dist. and 3 m. ENE of Milan, on the r. bank of the Lambro. Pop. 600. It has a manufactory of gunpowder.

LAMBRECHT (Saint), a village of Bavaria, in the circle of the Pfalz, 4 m. W of Neustadt, on the Speirbach. Pop. 1,476. It has a manufactory of cloth, and of copper-wares.

LAMBRECHT (Sanct), a town of Austria, in Styria, circle and 22 m. WSW of Judenburg, and 33 m. N of Klagenfurt. Pop. 600. In the environs are quarries of marble.

LAMBRES-LES-DOUAY, a village of France, in the dep. of the Nord, cant. and 1½ m. S of Douay Pop. 700. It has an old mill.

LAMBRIGG, a township in the p. of Kirkby-in-Kendal, Westmoreland, 5 m. ENE of Kendal, at the source of the Mint. Pop. in 1831, 176; in 1841, 143.

LAMBRO, a river of Austrian Lombardy, which has its source in the prov. of Como, between the two arms of the lake of that name; traverses the provs. of Milan and Lodi; and throws itself into the Po, on the l. bank, near Corte-San-Andrea. It has a total course of about 75 m. in a generally S direction; and is joined on the r. at San-Angelo by the southern Lambro or Lambro-Morte.

LAMBSHEIM, a village of Bavaria, in the circle of the Pfalz, 3 m. SW of Frankenthal, and 17 m. NNW of Spire. Pop. 2,630.

LAMBSTON, or Lammerton, a parish in the co. of Pembroke, 3 m. W by N of Haverford-West, and E of St. Bride's bay. Pop. in 1831, 286; in 1841, 319.

LAMBTON, a township in the p. of Chester-le-Street, co. of Durham, 7 m. NNE of Durham, on the S bank of the Wear, and on the Great North of England and the Stanhope and Tyne railways. Area 650 acres. Pop. in 1831, 256; in 1841, 120.

LAMBTON, or Kitley, a village of Canada-West, partly in the township of Toronto, and partly in that of York, on the Humber, and 8 m. from Toronto. Pop. 250.

LAMEGO, a comarca and town of Portugal, in the prov. of Beira. The comarca contains 101,500 inhabitants. The town is 39 m. N of Viseu, and 87 m. NNE of Coimbra, at the foot of the Serra-Penude, and on the Balsamao, a little above the junction of that river with the Douro. Pop. 8,870. The principal buildings are the cathedral, founded by count Henry, father of the first king of Portugal; the episcopal palace, a large and handsome building, and containing an extensive library. It has also a church and several chapels, 4 convents, an old castle, a college, 2 hospitals, and an episcopal seminary. Pop. 9,000. It is noted as the place in which the Cortes assembled in 1144, to confirm the election of Alphonso I. to the throne of Portugal, and to enact the basis of the constitution of the new monarchy.—Also a small village of Brazil, in the prov. of Matto-Grosso, on the l. bank of the Guaporé, 6 m. N of the junction of the Rio-Baure.

LAMEIRA, a village of Portugal, in the prov. of Minho, comarca and 16 m. ENE of Guimaraens. In the environs are the remains of Roman baths.

LAMENTIN (Le), a town on the NE coast of the island of Guadaloupe, 20 m. NNE of La Basse Terre.—Also a town in the island of Martinique, 2½ m. NE of Fort-Royal.

LAMERDINGEN, a village of Bavaria, in the circle of Suabia, NW of Landsberg. Pop. 360.

LAMERTON, a parish in Devonshire, 15 m. N by W of Plymouth. Area 4,230 acres. Pop. in 1831, 1,209; in 1841, 1,288. The Brent-tor, in this p., has an alt. of 1,100 ft. above sea-level.

LAMESLEY, a chapelry and township in the palatinate of Durham, 4 m. S of Newcastle, on the Great Northern railway. Area 3,390 acres. Pop. in 1831, 1,910; in 1841, 1,846.

LAMIA. See Zeitun.

LA MINE, a navigable tributary of the Missouri, which joins it at Boonville, in the state of Missouri, after an ENE course of about 80 m.—Also a village in Cooper co., in the state of Missouri. Pop. 988.

LAMINGTON, a parish in Lanarkshire, 11 m. SE of Lanark. Area 11,000 acres. Pop. in 1841, 358.

LAMJUN, a town of Northern Hindostan, 32 m. NW of Gorkha, in N lat. 28° 12′.

LAMLASH, an excellent harbour on the SE side of the island of Arran, in the frith of Clyde, where vessels of any size, and almost in any number, can safely lie at anchor. It is sheltered from the sea by the Holy Isle, which bears 22 m. S ¼ W from Girvan, and 7 m. NE ¾ E from Cumbrae light. On each side of Holy Isle there is a good entrance into the bay. See article Arran.

LAMMAS, a parish in Norfolk, 9 m. NE of Norwich. Area 810 acres. Pop. in 1841, 299.

LAMMERMOOR-HILLS, a broad range of moorish heights, stretching E from the vale of Gala-water, in the SE extremity of Mid-Lothian, to the German ocean at the promontory of St. Abb's-head in Berwickshire. From the middle of the lofty mountain-range which begins at Cheviot in Northumberland, and the most elevated part of it, called the Louthers or Hartfell heights, a less lofty range goes off NE across Peebles-shire, to the vale of the Gala, which, but for being cloven through by this vale, would, under the name of the Lammermoor-hills, be continuous to the sea. The L. all lie within East Lothian and Berwickshire; and their range forms, with the loftier and commanding chain of the Cheviots and the Louthers, the vast triangular basin of the Tweed. The L. are in themselves an extensive curvature of heights nowhere bold and imposing in aspect, and often subsiding into low rolling table-lands of bleak moor. Primary micaceous schist composes the entire range, not only of the L., but of the heights which continue it through Peebles-shire, till it joins the metalliferous mountains about the sources of the Clyde. Lammerlaw, which rises in the p. of Lauder, and gives name to the whole range, has an alt. of 1,500 ft. Among other chief or remarkable summits, according to the measurements of Blackadder in his survey of Berwickshire, Criblaw has an elevation of 1,615 ft.; Clint-hill of 1,544; Tippet-knowes, 1,328; Manslaughter-law, 1,273; Twinlaw-hill, 1,260; Earlston-hill, 1,200; Great Dirrington-law, 1,145; Ayrhouse-hill, 1,054; Bemerside-hill, 1,011; and Cockburn-law, 912 ft.

LAMNAY, a commune of France, in the dep. of Sarthe, cant. of Montmirail. Pop. 1,139.

LA-MOA, or Na-moa, an island of China, off the coast of the prov. of Fo-kien, in N lat. 23° 28′, E long. 117° 10′.

LAMOILLE, a river of the state of Vermont, U. S., rising in Orleans co., and flowing SW, and then WNW, into Lake Champlain.—Also a co. in the NW part of Vermont. Pop. in 1850, 10,955.

LAMONDBY, a township in the p. of Skelton, in Cumberland, 8½ m. NW by W of Penrith. Pop. 246.

LAMONE, a river of Italy, which rises in the Central Apennines, and flowing from SSW to NNE, enters the reg. of Ravenna in the Papal states; passes Faenza; turns E, and flows into the Adriatic 9 m. NNE of Ravenna, after a course of 50 m. Near Faenza, it is connected by a canal with the Po-di-Primaro.

LAMONTGIE, a commune of France, in the dep. of Puy-de-Dome, cant. of Jumeaux. Pop. 1,246.

LAMONZIE-SAINT-MARTIN, a commune of France, in the dep. of Dordogne, cant. of Sigoules. Pop. 1,214.

LAMORRAN, a parish in Cornwall, 4 m. SW of Tregoney. Area 1,320 acres. Pop. in 1841, 99.

LAMORSEK, one of the Caroline group, in N lat. 7° 30′, E long. 146° 48′.

LAMOV (Nijni), a town of Russia, in the gov. of Penza, 30 m. ESE of Kerensk, on the l. bank of the Lamov, an affluent of the Mokcha. Pop. 3,700.

LAMOV (Verkhnij), a town of Russia, in the gov. of Penza, 9 m. SW of Nijni L. Pop. 4,300.

LAMOVSKAIA, a town of Russia, in the gov. and 42 m. SE of Tula.

LAMPA, a district of Peru, in the intendancy of Cuzco, which commences 30 leagues S of Cuzco, and is 30 leagues long from N to S, and 20 l. in breadth.

It is bounded by the chain of Vilcomota, which separates it from Assangara on the E, and whose crests constitute a part of the barrier between Buenos Ayres and the kingdom of Peru. On the SE it has the lake of Titicaca. Its climate is cold, producing little else than pasturage for numerous herds of cattle. —The chief town of the district is 150 m. S of Cuzco, on the river Nunai, which flows into Lake Titicaca. —Also a river of Chili, in the prov. of Santiago, which descends from the W flank of the Andes, and joins the Mapocha, on the r. bank, 14 m. W of Santiago, after a course of 65 m.

LAMPACAN, a small island in the Eastern seas, a little to the S of Junk-Seilan.

LAMPANGUI, a lofty mountain of the Chilian Andes, in S lat. 33° 18′, celebrated for its mines of gold, silver, and other inferior metals.

LAMPAUL, a commune of France, in the dep. of Finistere, cant. of Landivesiau, 12 m. WSW of Morlaix. Pop. 2,443.

LAMPEDOSA, or Lampedusa, the ancient *Lopadusa*, a small, narrow, but bold island in the Mediterranean, in N lat. 35° 31′ 10″, E long. 12° 36′ 44″. Its circumf. is about 13½ m. Its surface is nearly level, and its soil equally good if not richer than that of Malta. Its coasts are craggy and abrupt, except to the SE, where they shelve from nearly 400 ft. to a low shore. It was long uninhabited, both on account of its vicinity to the piratical part of Barbary, and because the question of its property was the subject of a never-ending lawsuit before the courts of Sicily and Malta. In 1802 it was ceded by the Neapolitan government to Don Fernandez. In 1843, the king of the Two Sicilies was allowed to take possession of it for a state-prison. Its importance lies in its harbour, which is capacious, and open only to the N, being sheltered on the E, W, and S by the land. The island is not accessible along its W side; but on the SE, near the port, good anchorage is found. The islets of Lampione and Linissa are dependent upon it.

LAMPENBERG, a village of Switzerland, in the cant. of Basle, bail. of Waldenburg. Pop. 401, chiefly Protestants.

LAMPERSDORF, a town of Prussia, in the reg. and 36 m. SSW of Breslau. Pop. 900.

LAMPERTHEIM, a town of Hesse-Darmstadt, 9 m. SE of Worms. Pop. 3,161.

LAMPERTSLOCH, a commune and village of France, in the dep. of Bas-Rhin, cant. of Waerth-sur-Sauer. Pop. 584. There are petroleum springs in the vicinity.

LAMPETER, a township of Lancaster co., Pennsylvania, U. S. Pop. 3,269.

LAMPION, or Lampione, a steep tabled rock in the Mediterranean, in N lat. 35° 32′ 50″, 7 or 8 m. W by N from the W cape of Lampedosa. It is about 800 yds. in length, and 200 yds. in breadth.

LAMPLUGH, a parish in Cumberland, 7 m. ENE of Whitehaven. Area 714 acres. Pop. 645.

LAMPON BAY, a bay on the E coast of the island of Luçon, in N lat. 14° 46′.

LAMPONG, a district in the S extremity of the island of Sumatra, beginning on the W coast, at the river of Padanguchi, and extending across as far as Palembang, on the NE side. It has several ports in the straits of Sunda, particularly Keysers and Lampong bays; and the great river Tulangbawang runs through it. In the neighbourhood of the rivers the land is overflowed during the rainy season, or months of January and February; and the villages situated on the higher grounds then appear like so many islands. In the W parts, towards Samangka, the land is mountainous; Keyser's peak, as well as others, are visible at a considerable distance from the sea. Of all the Sumatrans, the inhabitants of this district have the strongest resemblance to the Chinese, particularly in the roundness of their face, and the appearance of their eyes. They are also the fairest people in the island, and their women are esteemed the most handsome.

LAMPONG BAY, an indentation on the coast of Sumatra, about 30 m. from Keyser's bay, formed between Tanjong Tekus on the W, and Rajah Bassa on the E side. It is 20 m. wide at its entrance, and extends nearly the same distance in a N direction. From the W point of the bay a chain of islands extends a considerable way towards the E.

LAMPORECCHIO, a town of Tuscany, in the prov. of Florence. Pop. 2,800.

LAMPORT, a parish in the co. and 9 m. N of Northampton. Area 1,440 acres. Pop. 234.

LAMSAKI, or Lapsak, a town of Asiatic Turkey, on the Dardanelles, nearly opposite Gallipoli, on the site of the ancient *Lampsacus*. It is celebrated for its wine.

LAMSPRINGE, a town of Hanover, in the principality of Hildesheim, on the river Lamme, 18 m. W of Goslar. Pop. 1,181. It has some trade in hops.

LAMTAH, a village on the E coast of Tunis, 30 m. E of El Kirwan, on the spot formerly occupied by *Leptis Parva*. There are few traces of ancient remains here.

LAMUTES, a wandering tribe of Tunguses, in Eastern Siberia, who are scattered over Daouria, the E banks of the Baikal lake, and along the shores of the sea of Okhotsk.

LAMUZO, a small town of Asiatic Turkey, in the pash. of Itshil, 28 m. SW of Tarsus.

LAMVILLE, a river of Vermont, U. S., which, after running about 75 m., and receiving 14 tributary streams, falls into Lake Champlain.

LAMYATT, a parish of Somersetshire, 2 m. WNW of Bruton. Area 890 acres. Pop. 255.

LAN, a district and town of China, in the prov. of Shan-se, div. of Tae-yuen-fu, in N lat. 38° 25′, E long. 111° 45′.—Also a district and town in the prov. of Chih-le, 135 m. E of Pekin, on the r. bank of the Lan-ho.

LANAEKEN, a department and commune of Belgium, in the prov. of Limburg, arrond. of Tongres. Pop. of dep. 1,993; of com. 753.

LANAJA, a town of Spain, in Aragon, in the prov. of Huesca, and partido of Sarinena. Pop. 890. It has a parish-church and a custom-house. The manufacture of linen and the rearing of cattle form the chief branches of local industry. The town is of Moorish origin.

LANARK, a county of Western Australia, bounded on the N by the co. of Nelson; on the E, by the cos. of Goderich and Stirling; on the S and SW by the Pacific; and on the NW by the co. of Sussex. It is intersected from N to S by the Darling range; and watered by Donelly, Warren, Bowles, and Gordon rivers. The principal headlands are Green point, Point D'Entrecasteaux, and Cape Chatham. The coast to the W of Point D'Entrecasteaux affords no landing-place.

LANARK, a county, township, and village of Canada-West, in the Bathurst district. The township is watered by branches of the Mississippi, and has 10,430 acres under cultivation. Pop. in 1842, 2,129.—The village is 12 m. from Perth, on the river Clyde. Pop. about 250.

LANARK, a parish in the upper ward, and nearly in the centre of the co. of the same name, on the E bank of the Clyde. With the exception of the precipitous and highly romantic banks of the Clyde and the Mouse, the land generally consists of an elevated level, the highest parts being the moors of L. and Lee, which are about 760 ft. above the sea-level. There are two bridges over the Clyde; one of them

called the Hyndford bridge, 2 m. from the town, is a modern erection of great lightness and elegance. There are five bridges over the Mouse. One of these, the Cartland bridge, constructed by the celebrated Telford, is remarkable for its beauty and boldness of design. It has three arches, of 52 ft. span each; the height from the channel of the stream to the parapet is 125 ft., and to the spring of the arch, 84 ft. The parish contains the ancient burgh of L., and the large and thriving manufacturing village of New-Lanark. The pop. of the parish was, in 1801, 4,692; in 1811, 6,067; in 1821, 7,085; in 1831, 7,672; and in 1841, 7,666. This p. contains some of the most beautiful river-scenery in the kingdom, viz., the falls of Bonnington, Corra linn, and Stonebyres.

Lanark, a royal burgh in the above p., is situated upon a slope of ground about 300 ft. above the level of the Clyde adjacent to the town, and 650 ft. above the level of the river at Glasgow, in 55° 34′ N lat., and 3° 5′ W long., nearly in the centre of the Lowlands, being 25 m. distant from Glasgow, 31 m. from Edinburgh, 35 m. from Stirling, and 47 m. from Ayr. It consists principally of one main line of street, with several lanes diverging on either side, and the parish-church occupying a prominent position nearly in the centre of the town. The principal industrial occupations are hand-loom weaving and shoe-making, chiefly for the supply of the Glasgow market. There are three breweries and three mills. Upwards of 100 females are employed in flowering or embroidering lace. The pop. of the burgh in 1841 was 4,818; in 1851, 5,305. The town joins with Falkirk, Hamilton, Airdrie, and Linlithgow, in electing a parliamentary representative. The registered electors in 1848 were 232. The yearly revenue of the burgh amounts to about £1,000. For more than two centuries, the keeping of the weights and measures for Scotland was committed to the care of the town of L. These olden national standards were measured by Professor Robison in 1790, and again a few years afterwards, for the purpose of adjusting the standards of Edinburgh. The pound weight was then discovered to have lost about 7 grains English troy, giving 7,613 grains instead of 7,620 grains, which it should have contained: even with this error, however, the L. standard was better ascertained than any in Europe, with the exception of that at Brussels.—L. gives the title of Earl to the noble house of Hamilton.

LANARK (New), a large and handsome manufacturing village, situated on the r. bank of the Clyde, about 1 m. above the town of Lanark. It is the creation of the late philanthropic David Dale, who, in 1784, feued the site of the mills and village. The first mill was begun in 1785: since then various extensions have been made, until it is now the most extensive cotton manufacturing establishment in the co. About 1,400 of the inhabitants are employed directly in the mills. The majority of the present inhabitants are descendants of the original settlers collected from various parts of the Highlands. Mr. Dale was succeeded in the management of the mills by his son-in-law, Mr. Robert Owen, whose projects for the regeneration of the social system of mankind have made his name, and that of the v. in which he first attempted to carry them out, notorious in the kingdom. In 1827 he ceased to have any connection with these works.

LANARKSHIRE, a large, wealthy, and important county in the W division of the Lowlands of Scotland. It is bounded by the cos. of Dumbarton and Stirling on the N; by Linlithgow, Edinburgh, and Peebles shires on the E; by Dumfries-shire on the S; and by Ayr and Renfrewshire on the W. It is situated between 55° 18′ and 55° 56′ N lat.; and between 3° 24′ and 4° 23′ W long. The extreme length of the co., from SE to NW, is about 54 m. The greatest breadth in the centre is 33 m.; but at the extremities it becomes narrowed to little more than 10 m. It contains an area of 926 sq. m., or 471,278 Scots statute acres, equal to 584,800 Imperial acres. It is divided into three *wards*, or divisions, the Upper, Middle, and Lower wards; but formerly the co. was much more extensive, and there were only two divisions, called the Over and Nether wards of Clydesdale. Glasgow is, of course, the head-quarters of the circuit-justiciary and other courts, and the residence of the sheriff-depute, and two substitutes; but substitutes are also appointed over the Middle and Upper wards, and hold their courts at Hamilton and Lanark.

Physical features.] The Upper ward, which contains about three-fifths of the whole superficies, consists to a great extent of moorland pasture. Many of the hills are covered with verdure to the summit; but the general aspect of the district is sterile and uninviting. As the hills undulate towards the Middle ward of the co., their aspect is much softened, and the country presents every alternation of sylvan sweetness, with hill and dale, wood and wold, meadow and streamlet. Wheat has been grown in this ward, but it has been found that this grain has never paid the farmer except in highly propitious seasons. Oats are extensively cultivated, and barley. Potatoes are raised in large amount; and the turnip husbandry has been introduced with considerable success.—The Middle ward is much less mountainous than the Upper. Its surface is everywhere broken into inequalities, and throughout there is little level space except the valleys on each bank of the Clyde. The cultivated land of this ward is generally from 250 to 300 ft. above the level of the sea. Along the valley of the Clyde rich alluvial soils are met with upon a gravel bed. Within the present century the mosses in this district were computed to extend to more than 40,000 acres, or nearly one-third of the whole ward; but a considerable extent of these have now been brought under tillage. The most fertile portion of the Middle ward is that extending on each bank of the Clyde, stretching from Lanark to below the town of Hamilton. It is said that the far-famed orchard husbandry of Clydesdale was introduced into this district by the Romans, but whether or not this may be the case, the banks of this noble stream have long been celebrated for the fruits they bear; and, though this species of cultivation is not now so profitable as it used to be, it is still followed to a great extent. It is for its mineral wealth, however, that the Middle ward is most celebrated.—The Lower ward comprehends a fertile district, but the least interesting of the three so far as the external beauties of nature are concerned. It is, however, by far the most important, from possessing in the city of Glasgow that immense hive of population whose ingenuity and untiring industry has done so much to enrich the kingdom.—The Clyde—which, so far as the West of Scotland is concerned, may aptly be termed 'the Father of Waters'—receives into its bosom all the rivers or streamlets of any note in this co. Among these are the Daer, the Duneaton, the Douglas, the Culter, the North and South Medwin; the Mouse, rising in Carnwath, which winds through the charming glen of Cartland-crags, and falls into the Clyde about a mile from the town of Lanark; the Nethan, which joins the Clyde at Clydesgrove; the Avon, which rises on the borders of Ayrshire, passes Hamilton, and completes its course by mingling with the Clyde at Hamilton-bridge; the South Calder, which rises in the bleak moorland district of Linlithgowshire, and passing Shotts falls into the

Clyde after a course of nearly 20 m.; the North Calder, which rises near Bertram-Shotts, and after watering Old Monkland, increases the Clyde at Daldowie; the Calder-water, or the Rotten-Calder, which rises in East Kilbride, and joins the Clyde at Turnwheel; and the classic Kelvin, which takes its rise in the parish of Kilsyth in Stirlingshire, and joins the Clyde opposite the village of Govan.—The co. is little celebrated for its lakes or lochs. The Crane-loch, situated in a wild and bleak district in the p. of Dunsyre, at an elevation of 800 ft. above the level of the adjacent streams, is about a mile in circumf. Lang-loch, situated between the town of Lanark and Hyndford-bridge, is a sheet of water of considerable length, but remarkably narrow. Bishop's-loch covers between 80 and 90 acres in the p. of Old Monkland. A lake or reservoir, formed by art for supplying the Monkland and the Forth and Clyde canals, is situated in the ps. of New Monkland and Shotts, and has a superficies of more than 300 acres. —The mountains of L. are all situated in the hilly range of the S division or Upper ward. The principal are the lofty Louthers, on the borders of Dumfries-shire, which have an average elevation of 2,450 ft. above the level of the sea, and whose highest peak towers to the height of 3,100 ft.; Culter-fell is 2,330 ft.; Tinto, 2,236 ft.; Cairntable, on the borders of Ayrshire, 1,630 ft.; Dolphinton-hill, 1,550 ft.; Dunsyre-hill 1,230 ft. Perhaps the highest inhabited land in Scotland is the mining village of Leadhills, in this co., which is 1,300 ft. above the level of the sea. The town of Lanark has an elevation of 656 ft. The Middle and Lower wards possess no elevated features of this kind, but are in general so open in their view towards the frith of Clyde, that from any portion of the rising ground varying from 150 to 200 ft. above the level of the sea, the spectator may descry on a clear day the serrated peaks of the isle of Arran, at a distance of 50 m.

Geology and Minerals.] Respectable as this district has now been rendered in an agricultural point of view, it is to its ample possession of the mineral treasures of coal, iron, and lead, that this shire owes its supremacy over all other districts in North Britain. In the Upper ward, the mountainous ranges are generally composed of graywacke, or trap-rock; indeed these constitute the principal formation of the extensive range of hills which runs from the confines of the co. of Ayr to the Pentlands. The lofty territory of Leadhills is perhaps the most ancient mining district in Scotland. Lead has been successfully worked here for several centuries; and besides rich veins of this mineral, gold and silver have been wrought here, particularly in the reign of James V. of Scotland, who employed miners from Germany in this service. Copper-ore has been found in this district in small quantity, and a vein of antimony is known to exist, but neither are sufficiently abundant to encourage the working on a large scale. Ironstone exists in most of the parishes of the Upper ward, but it has only been worked in those of Carluke and Carnwath. The blackband ironstone is found abundantly in Cambusnethan, and the Shotts company have furnaces constantly in operation. Old Monkland is also rich in this mineral treasure, and from it the extensive works around, including those of Carron, Clyde, Gartsherrie, and Calder are partly supplied. The vast extension of the engineering and machine-making trade of Glasgow and the west of Scotland during the last thirty years, but more particularly the introduction of railroads, have given an impetus to the iron manufacture in this co. which is scarcely credible. It is not easy to ascertain the aggregate amount of the mineral produce of L.; but as a proof of its rapid and great growth it may be stated that the Monkland district is known to turn out nearly 200,000 tons annually, while only a few years previous to 1800 it did not produce more than 4,000 tons. There are also extensive works at Govan, in the immediate vicinity of Glasgow.—Valuable, however, though the iron of Clydesdale may be, it derives its great value from a still more important subterranean treasure, viz. the coal-field of the same district, which forms the best part of that great field which crosses the N part of the kingdom from E to W, and stretching in Lanarkshire to the extent of 30 m. It has been reckoned that the coal-field of this co. contains 110 sq. m., and in the ordinary acceptation of the term the supply may be said to be exhaustless.—Limestone is found abundantly throughout the coal-district, and some of it is of excellent quality. Freestone of excellent quality is found throughout the co., and in all the coal districts, in distinct strata of red and white, and sometimes of a mixed colour. On the E side of the Clyde the red sandstone predominates, while on the W and S the white is the standard.

Climate.] The wind in this co. is computed to blow about two-thirds of the year from the SW and W, over a vast ocean, where no land intervenes to prevent its coming to the coast saturated with the moisture of the vast Atlantic. The winds from the E blow less frequently, and the cold damps so prevalent on the E coast do not often arrive here. Intense frost is seldom of long continuance, and deep long-lying snow is rare.

Manufactures.] The rise and progress of the manufactures of L. belong so intimately to the history of Glasgow, that it is not necessary to treat of them at length here. From 1784, when the cotton-trade was introduced, after Arkwright's magnificent invention had become fully understood, and its practice was open to the whole country from the expiry of the patent, this co. was particularly qualified for entering into the new trade, first from its possession of an exhaustless supply of coal, and next from possessing sea-ports on the Clyde by means of which the merchants of Glasgow could hold communication with almost all the markets of the world. Wealth speedily flowed into the co.; old coal-mines were worked on improved principles with renewed spirit, and new ones opened; the iron-trade was called into existence; the superficies of the land, from the near presence of a wealthy commercial and manufacturing capital, grew in fertility and beauty; and thus L. received an impetus which has long since accorded her the first rank for pop., wealth, and importance among the counties of Scotland.

Population.] Of the total area of the co., the three wards contain the following proportions:

	Sq. m.	Scotch statute acres.
Lower ward, . .	78·75	40,078
Middle ward, . . .	302·50	153,954
Upper ward, . .	544·75	277,246
	926	471,278

By the government censuses of 1811 and 1831, the pop. of the various wards, and the total for the co., was as follows:

	Pop. in 1811.	Town and v. pop. in 1831.	Rural pop. in 1831.	Total.
Lower ward, .	122,501	208,736	8,100	216,836
Middle ward,	41,357	37,189	27,554	64,743
Upper ward, .	28,868	17,121	18,090	35,211
	192,726	263,046	53,744	316,790

By the census of 1841, the pop. of the wards, and of the co., was as follows:

Lower ward, . . .	300,593
Middle ward, ...	96,772
Upper ward, . . .	36,834
	434,199

This pop. comprised 82,730 distinct families, including 211,666 males, and 222,533 females. The total pop. of the co. in 1851 was 532,114, being an increase of 98,015, as compared with the census of 1841. The larger portion of this total is, of course, attributable to the city of Glasgow, the increase on which alone amounts to 66,302. The excess of females over males is almost entirely confined to Glasgow, which is easily accounted for by the great numbers of female factory-workers and domestic servants who are drafted into it from all parts of Scotland as well as from Ireland. In 1801, the pop. of Lanarkshire was 146,699; in 1821, 244,387. From 1801 to 1811, the increase was 31 per cent.; from 1811 to 1821, 27 per cent.; from 1821 to 1831, 30 per cent.; from 1831 to 1841, 38 per cent.; and from 1841 to 1851, 24 per cent. The average for all Scotland in the last decennial period, was only 10 per cent. The annual

rate of increase per cent. in the 50 years from 1801 to 1851 was 2·59; that for all Scotland being only 1·16 per cent.

The county of L. returns one member to parliament, and had a constituency of 2,705 voters in 1832; of 4,001 in 1841; and 3,732 in 1848. Glasgow returns 2 members. The burghs of Lanark, Hamilton, and Airdrie, within the co., and Falkirk in Stirlingshire, and Linlithgow in the shire of that name, return one member; and Rutherglen in the Lower ward, is associated in a similar privilege with the burghs of Kilmarnock, Dumbarton, Port-Glasgow, and Renfrew. Thus the co. is represented in parliament directly or indirectly by 5 members.—The annual value of assessed property in 1815 was £686,531; the land assessed to property tax in 1843 was £341,121; of mines, £58,303; and of all assessed property, £1,834,998. The number of registered paupers on the roll during the year ending 15th May 1847, was 17,264; that for all Scotland being 85,971. —The number of criminal offenders in 1836 was 401; in 1841, 513; in 1847, 796; in 1849, 750.

History.] Originally L. was peopled by the ancient tribe of Britons called the *Damnii*, and when the Romans withdrew from Britain Clydesdale was again left in the possession of this semi-barbarous tribe. By them was founded the kingdom of Strathclyde, which gradually extended until it included within its ample limits Liddesdale, Teviotdale, Dumfries-shire, Galloway, Ayrshire, Lanarkshire, Renfrewshire, part of Pebbles-shire, the western part of Stirlingshire, and the greater portion of Dumbartonshire, forming indeed a kingdom which embraced the greater part of Scotland south of the Forth, with the exception of ancient Lothian. After the formation of the Scottish kingdom, L. suffered more or less from the domestic conflicts between the kings and Gallovidian chiefs, or the wars of England; but continued to progress in rustic wealth. Its civilization was accelerated by the foundation of the bishopric of Glasgow, and the settlement in the district of several distinguished Flemings, from a family of which people were descended the once all-powerful Douglases. Sir William Wallace's first exploit was that of driving the English out of the town of Lanark. In the reign of James II. the ambition of the Douglases plunged the shire into the horrors of civil war. On the escape of Queen Mary from Lochleven castle, her army assembled at Hamilton, and was defeated by the regent Murray at Langside, near Glasgow. The western counties were the chief scene of the devoted resistance of the Presbyterians to Episcopal tyranny, in which this co. had its full share. The revolution of 1688 brought more peaceful times, and the declaration of the prince of Orange was published at Glasgow before its publication in any other part of Scotland. In proportion, however, as L. favoured and supported the Revolution, it bitterly opposed the Union of 1707.

LANCARA (San-Pedro-de-), a parish of Spain, in Galicia, in the prov. of Lugo, and partido of Sarria. Pop. 315. It has a parish church, and a custom-house; and possesses manufactories of common linen and woollen fabrics.

LANCASHIRE, a co.-palatine on the W coast of England; bounded on the N by Cumberland and Westmoreland; on the E by Yorkshire; on the S by Cheshire, from which it is divided by the river Mersey; and on the W by the Irish sea. The dist. of Furness, a portion of the county at its NW extremity, is detached from the rest by a narrow part of Westmoreland, and by Morecambe bay. The co. extends from 53° 20′ to 54° 25′ N lat.; and from 2° 0′ to 3° 15′ W long. Its extreme length, including the district of Furness, is about 74 m.; extreme breadth, about 45 m.; circumf. 342 m.; square area 1,117,260 statute acres.

Aspect of the country.] The surface of this co. is various in elevation; its features in some districts, especially towards the N, and all along the E border, are strongly marked. The disjoined portion of the co. called Furness partakes of the romantic, bold, and picturesque character of the adjacent counties. Coniston-fell, in this part of the co., rises to an elevation of 2,577 ft. above sea-level. The district of Lonsdale south of the Sands, contains land of a much less rugged description. The district of the Lune valley from Kirkby-Lonsdale is adorned by every charm of picturesque landscape from Hornby to Lancaster, and finely intersected by the Lune winding between wooded hills, and backed by the Yorkshire mountains of Ingleborough. The Fylde country, between the Lune and the Ribble, is chiefly a flat and fertile plain, interspersed with marsh-land and mosses. Seaward of the Lancaster and Preston canal, between Preston and Lancaster, and along the coast, the surface has the appearance in many places of having formerly been covered by the ocean; this is also observable in the district between the Ribble and the Mersey; and the whole of the district seaward of the Liverpool and Leeds, and the Douglas navigations, contains the traces of subterranean forest. That part of Ribblesdale where the river encompasses the town of Preston is very fine. Towards the NE part of the co., near Blackburn, Clitheroe, and Haslingden, the surface is rugged, and interspersed with numerous rivulets, Dividing the co. on the E from Yorkshire, and running northwards from Ashton-under-Lyne, near Manchester, to Hornby, is a ridge of hills called 'the Back bone of England,' which from its great elevation screens the co. from the severity of the E winds. Pendle-hill, near Clitheroe, one of the highest in the co., except those in Lonsdale north of the Sands, has an elevation of 1,805 ft. above sea-level; Boulworth-hill, near Burnley, of 1,689 ft. Towards the SE the land is at some points considerably elevated. Rivington-moor, near Bolton, is 1,545 ft. above sea-level. Between Bolton and the southern border of L. are Chat-moss and Trafford-moss; and there are other extensive bogs, mosses, and moors in various parts, as at Rainford to the N of Prescot, and the moors near Bolton, Kearsley, and Edgworth, and Whitworth-moor near Rochdale. There are several districts called 'forests,' but they contain little wood; indeed, the face of the country in general is bare of trees, though the numerous hedge-rows give the whole country a green and well-clad aspect.

Rivers and coasts.] The principal rivers of this co., viz. the Irwell, the Mersey, the Douglas, the Ribble, the Calder, the Wyre, and the Lune, noticed under their respective heads, all direct their course to the W, and fall into the Irish sea. The Irwell rises on the hills that form the boundaries between Lancashire and Yorkshire. Its first course is to Bury; it then bends to the W, and afterwards to the SE, to Manchester, where its waters are enlarged by two streams, and its course is again changed to the W, till it falls into the Mersey below Flixten. The Mersey rises on the borders of Cheshire and Derbyshire; and divides Cheshire and Lancashire, for a course of nearly 60 m., about 35 m. of which are navigable from Liverpool to the mouth of the Irwell. The Ribble rises in the Craven moors in Yorkshire. Its course is first S to Clitheroe; it afterwards declines to the W to Rochester, flows through the valley of Ribblesdale to Preston, and soon afterwards falls into the Irish sea by a very broad estuary. The Lune rises in the falls of Westmoreland; and flows through the valley of Lonsdale to Lancaster, where it becomes navigable. It also joins the sea by a very broad estuary. The Duddon, which divides the W side of Furness from Cumberland, at its junction with the sea forms a considerable bay at high water. The Crake, which runs nearly parallel to the Duddon, connects Thursten water with the sea at Leven sands.—The Mersey empties itself into a great estuary filled with banks, and crossed by a bar, over which at low tide there is but a foot or two of water; but the tides rise from 21 to 28 ft. The coast here is very flat, and in some places the sea is encroaching on it, particularly between the Ribble

and Morecambe bay. In the estuary of the Ribble there are numerous sand banks which are dry at low water, but on which the tide rises 6 faths. Morecambe bay is a large gulf, between the mainland of Lancashire and the peninsula of Furness. Off the extremity of this peninsula are several islands, the principal of which, called Walney, is 16 m. long and 1 m. broad. It is so low that it is frequently nearly inundated. It would appear that these islands were formerly connected with the mainland.

Lakes.] The lakes of this co. are situated in the northern district. Coniston lake, or Thurston water, extends from N to S about 7 m., with a breadth of from ½ m. to ¾ m.—Winandermere belongs partly to Lancaster and partly to Westmoreland. It is 15 m. in length, and forms part of the line of boundaries of this co. Its average breadth is about 1 m.—Esthwaite lake is about 2 m. in length, by a ½ m. in breadth.—Among the mountains are numerous small lakes called *tarns*, which do not deserve particular notice. Near Ormskirk is a sheet of water called Martin-mere, which in summer becomes nearly dry.

Artificial navigation.] The inland navigation of L. has been greatly promoted by the excavation of canals, forming part of that immense system of inland navigation by which the Irish sea and the German ocean are connected. The first completely artificial canal formed here, and indeed all but the first ever made in Britain, was the Sankey canal, which was begun in the middle of the 18th cent., merely by the deepening of the Sankey brook, but was soon changed into a proper canal, beginning in the Mersey near Warrington, and extending about 11¾ m., along the Sankey brook valley, to St. Helen's near Prescot. But long previous to the making of this canal, different acts of parliament for rendering the rivers Irwell, Mersey, Weaver, Douglas, &c., artificially navigable, had been obtained, and these objects in great measure effected: the Irwell, particularly, had been rendered navigable as far as Manchester. The Douglas, also, was rendered navigable in 1727, by the proprietors of the rich coal-mines in the district round Wigan.—The Duke of Bridgewater's canal, begun soon after the Sankey canal, was completed in 1766 From the aqueduct across the Mersey, E of Ashton, where it enters this co. from Cheshire, the Bridgewater canal runs N to Stretford, beyond which it branches off to the Leigh and Wigan canal on the one hand, and to Manchester on the other. That part of this canal which runs between Worsley and Manchester. formed the original design for the supply of Manchester with coals from the duke's collieries at Worsley. The Manchester branch joins the great line which runs N along the valley of the Roch, by Rochdale and Todmorden, to the Calder and Hebble navigation. The junction of the Bridgewater canal with the Mersey, by means of locks, was completed in September 1838.—The Manchester and Salford junction canal, connecting the river Irwell with the Rochdale canal, and thus, by means of the existing navigations, the W coast at Liverpool with the E coast at Hull, was opened in October 1839.—Besides those already noticed, several other canals radiate from Manchester. The Ashton-under-Lyne and Oldham canal joins the Rochdale canal at Manchester, and after a short E course sends one branch off S to Stockport, and another N to the collieries at Hollinwood, and then runs to Duckinfield near Ashton, where it is joined by the Huddersfield and Peak-forest canals. This canal is 12 m. in length, exclusive of its Stockport branch. — The Manchester, Bury, and Bolton canal, 15 m. in length, commences in the Mersey and Irwell navigation, at Manchester, and runs NW to Bolton with a branch to Bury.—Wigan may be held as the centre of the S district canals, though many unite at Manchester. Wigan is connected with Manchester by the Wigan and Leigh, and the Bridgewater canals; with Liverpool on the one hand, and with Chorley, Blackburn, Burnley, and Yorkshire, on the other, by the Leeds and Liverpool, and the Lancaster canals; and with Preston and the N canals, by that part of the Lancaster canal which runs from the Liverpool and Leeds canal to the river Ribble and the railroad crossing it by a viaduct to Preston.—The Liverpool and Leeds canal is one of the most extensive lines of inland artificial navigation in the empire. It was begun in 1770. It unites with the Aire and Calder navigation, and enters this co., from Yorkshire, at Foulbridge, near Colne, where its alt. above the Liverpool basin is about 433 ft., and where it passes through a tunnel about 1 m. long, and runs by Burnley and Blackburn, between which place and Wigan 11 m. of the Lancaster canal are incorporated with it. From Wigan to Liverpool its circuit is very tortuous, running first NW to the Douglas navigation, then passing round to the N of Ormskirk, and S to Aintree, near which its course is changed from SE to NW, and again to SW and SE. It proceeds by Forde and Bootle to Liverpool. The length of this canal, exclusive of branches, but including the 11 m. of the Lancaster canal, is nearly 130 m.; for 30 m. of which from Liverpool to Wigan, the country is so level that there is not a single lock in its course.—The Lancaster canal from Preston runs N in a circuitous course by Garstang, where it crosses the Wyre, by an aqueduct, to the vicinity of Ellel, at which place it sends off a branch to the Lancaster dock basin in the Lune estuary. It then proceeds to Lancaster, where it crosses the Lune by an aqueduct of 5 arches of 70 ft. span each, and 40 ft. high. Thence it runs into the Lancaster and Kendal canal. Between Preston and Kendal, a distance of 55 m., there is not a single lock on the line.—In the district of Furness, from Ulverston to the Leven, there is a short canal with a capacious basin formed in 1795.

Geology, minerals, &c.] The tract of mountainous moorland which separates Lancashire and Yorkshire, is chiefly composed of millstone-grit and hard freestone formations. As we approach the northern mountains of the co. which divide it from Westmoreland and Cumberland, transition limestone and slate prevail. The great coal-field of South L. to which the co. owes its pre-eminence in manufacture, occupies an extensive but irregular tract between the Mersey and the Ribble; its outline stretching SW from Colne, at its NE extremity, nearly in the line of the Leeds and Liverpool canal, to its junction with the Lancaster canal, whence it continues its SW sweep till it reaches a point between Wigan and Ormskirk. Thence it spreads W and S through the districts to the S of Ormskirk, and around St. Helen's and Prescot, its S outline being nearly coincident with the line of the Liverpool and Manchester railway as far as Manchester, whence it curves S by Stockport, while its E limit nearly coincides with the E boundary of the co., as the high land dividing it from Yorkshire consists of millstone-grit which crops out from beneath the coal-measure. The millstone-grit also rises to the E of Chorley and Wigan. To the NE of Lancaster the coal again crops out from beneath the superincumbent grit into a small coal-measure extending from near Hornby to the E of Ingleton in Yorkshire. There are upwards of 100 coal-pits in the great southern coal-field, principally in the vicinity of Prescot and St. Helen's, Wigan, Newton, Bolton, Oldham, Blackburn, and Burnley. The millstone-grit occupies all the space to the E of a line running N and S from Hornby to Preston, with the exception of the upper part of the valleys of the Ribble and the Hodder, where the carboniferous or mountain limestone of Cumberland and Derby are superincumbent. To the W of this line from Lancaster to Preston, and along the W skirt of the southern coal-field throughout the whole co., is the new red sandstone in which occurs the great deposit of rock salt. This, which is the uppermost geological formation in L., and occupies an immense area stretching S through Cheshire, Staffordshire, Worcestershire, &c., includes the S boundary of L. along the valley of the Mersey to Liverpool, whence it runs N nearly in the line of the Leeds and Liverpool, Douglas, and Lancaster, navigations, to Lancaster, and is skirted seaward by the subterranean forest already noticed, including the clays, marls, and peat-mosses of the Fylde district, all of which now cover the new red sandstone. The mountainous district of Furness is chiefly occupied westwards by carboniferous limestone, and eastwards by greywacke and culm. Copper is worked in High Furness, in the mines of Coniston and Muckle-gill. Other minerals obtained in this co. are lead at Anglezark near Chorley; ironstone in the same vicinity; flag and grey slates at Holland near Wigan, and blue slate in the hills near Hawkshead. Scythe-stones are obtained near Rainford. Coal, however, is the great staple Lancashire mineral. From a paper read at a meeting of the British Association, it appears that the coal-fields of L. cover a space of nearly 400 sq. m. Some idea of the quantity consumed may be formed from the fact stated by Mr. Heywood, that in 1836 the quantity of coal received in Manchester amounted to 913,991 tons, the value of which would be nearly £500,000.

Soils.] Mr. Garnett states that this co. may be agriculturally divided into three parts—the southern, the middle, and the northern. The southern division is that which lies between the river Mersey, which forms the S boundary of the co., and the Ribble, which runs by Preston. The middle division is the tract between the Ribble and the river Lune, which flows by Lancaster, and contains that peculiar district known as the Fylde. The northern division includes the land between the river Lune to the northern boundary which separates Lancashire from Westmoreland and Cumberland. These divisions differ essentially from each other in the character of the soil, the climate, and the people; and represent more accurately the great natural features of the county than either the ancient boundaries of the hundreds or the parliamentary divisions. There are striking differences between the southern division and the two northern divisions, in geology, in the nature of the soil, and the character and habits of the people, which together exercise a very important influence on the farming of the co. The southern division is by far the most extensive of the three, and its wealth and position render it the most important; but its farming is the worst. Mr. Garnett thinks that apart from other causes the low state of

agriculture in the great seat of manufacturing industry is to be accounted for by the fact that manufactures offer greater inducements to the more energetic than farming. The climate and the soil are impediments not to be overcome by the occupier of land unassisted by the owners, and the landed proprietors of L. have not been forward in the race of improvement. Even in the middle and northern divisions, where the soil is more friable, and in the Fylde, where it partakes more of the alluvial and peaty character, without draining the land is comparatively unprofitable. The soil of L. is generally held by large proprietors whose families have long inherited their estates, which of course are entangled by all the network of settlements and entails. From them, therefore little improvement is to be expected. And the men who have grown rich in the great marts of industry and commerce, in Manchester and Liverpool, when they seek permanent investments in land usually go S, where they find a more genial climate, a more fertile soil, a higher class of farmers and farming, than Lancashire affords. Still some landowners have set an example of energetic improvement. The area of the co. comprises 1,117,260 acres of land, of which 350,000 are in tillage, 450,000 in pasture, and the remainder in woodlands, moors, and mosses. It is estimated that about one-fourth of the pop., or 416,763, are engaged in the cultivation of the land. Small portions of limestone soil are scattered over the co., especially in the northern district. —Chat moss, in the S division of the co., traversed by the Liverpool and Manchester railway, is 5 m. long, and 3 m. broad; and has a depth, in some places, of 34 ft. There are other extensive tracts of moss in the S division of the co., as White moss near Middleton, Rainford and Kirby moss between Knowsley and Ormskirk, Halsall moss near Southport, Rufford moss, &c.; "and as these are in every instance either traversed by railways, or in the close vicinity of canals, they possess facilities for improvement unknown to many other districts of the country in which moss land has been profitably cultivated. In the N division of the co. there are also extensive tracts of moss. The most valuable of these are in the Fylde, to the N of the Wyre, and are estimated by Mr. Garnett to extend to 20,000 acres altogether. Besides the advantage of locality which the moss lands of this co. possess, they have generally either beneath their surface or in their immediate vicinity, beds of rich calcareous marl, by the application of which, in conjunction with drainage, they can be converted from worthless and unwholesome wastes into rich and productive lands."

Agricultural produce.] About one-fourth part of L. has been brought into cultivation. The immense demand for grass and hay for the support of horses, cows, and sheep, has prevented the extension of tillage. Wheat, oats, barley, beans, and potatoes, are cultivated; and less extensive crops are raised of rye, pease, tares, turnips, carrots, lucerne, and cabbages. The average produce of oats per acre is 45 bushels; of wheat, 25; of barley, 35. L. is celebrated for its horticulture, and meetings are frequently held at which specimens of the finest fruits and flowers are exhibited. Vegetables are cultivated to a great extent in the vicinity of the large towns; and fruit-trees are numerous in similar situations.

The horses of L. are generally good both for the team and the saddle. There is a breed of cattle peculiar to L., known by the name of the 'Lancashire long horns,' which is much more in demand in the midland cos. than in L. itself. The prime stock of this breed is kept in the Fylde. For the dairy, the Holderness, Derbyshire improved, Yorkshire red, and Suffolk poll cows, are in most repute. The original L. breed of oxen was highly celebrated, till the Leicesters, a kindred stock, rose into repute. A considerable quantity of cheese very similar to that of Cheshire is made in this co. A fine breed of sheep is peculiar to the mountainous districts about Walton and Silverdale; but the New Leicester and South Down breeds, as well as the black-faced Scotch and Welsh, are kept chiefly in the N parts of the co., being turned out to the hills in summer, and brought into enclosed pastures during winter. Furness-fells afford food for upwards of 50,000 sheep during summer. Hogs are fed to a considerable extent.—"The wages of labour throughout L. will be reckoned high as compared with southern cos. In South L. 12s. to 15s. a-week is the usual rate for Englishmen, and 9s. a-week for Irishmen. In that district native labour is so scarce that the farmers declare they could not get on at all without the aid of the Irish. Cottage-rents are from £3 to £5 a-year, according to accommodation. In the Fylde, labourers' wages are lower, 9s. and 10s. a-week being common. To the N and E of the Fylde, wages are higher, 12s. and 14s. a-week being the present rate. Women are seldom employed in the fields at hoeing or other light work, there being better payment for them in-doors at the factories. It is necessary, therefore, to employ men in this co. at many operations for which women or boys are found competent in other districts, and this makes the manual labour on the turnip-crop nearly double the cost in L., as compared with such cos. Fuel is abundant and cheap."—"The rent of land," says the same authority, the 'Times' commissioner' in 1850, "within 6 m. of Liverpool, ranges from 40s. to £4 per statute acre, according to quality, condition, and situation. Within the same distance of Manchester similar land lets at the same rent. Beyond that distance the rent varies from 20s. to 30s. per acre for the unimproved farms; but where drainage, buildings, and other improvements have been effected by the landlord, it ranges from 30s. to 40s. This is for land suited to the culture of green crops and wheat, and from which the whole produce may be sent to market. Besides the rent the tenant has to pay the rates, which, including tithe, land tax, highway rate, poor rate, and church rate, will vary from 10s. to 12s. 6d. an acre. The rent of the cold clay soils is much lower. Within the last 20 years, on many of the larger estates there has been little or no change in the rent. Farms are seldom let by tender, and except when there is a change of tenancy the farmer is usually left undisturbed. For small farms, however, there is great competition. Farms vary in size from 20 to 160 acres; the great majority are under 100 acres, and very few exceed 200 acres. There is no custom in the country which secures to the tenant any compensation for unexhausted improvement."

Climate.] This co. is remarkable for its humidity. Perhaps a greater quantity of rain falls here than in any other co. in Britain; and the atmosphere, even when no rain falls, is often cold and damp. Mr. Garnett estimates the annual fall at about 40 inches; whereas in Middlesex it seldom exceeds 20 or 21. At Townley, near Burnley, it has been found by experiment, that 42 inches of rain at a medium fall annually; at Manchester, 33 in. A register kept at Liverpool between 1784 and 1792, indicated the smallest quantity of rain at 24⅛ in.; and the greatest at 54¼ in. The humidity of the atmosphere is partly owing to the vicinity of the sea, and the lofty range of hills in the E part of the co. The winds which prevail most are the S, SW, and NE. The temp. of summer is generally low; and in many places the spring is very backward, especially in the N and E parts. The meadow and pasture-grounds are much

benefited by the moistness of the climate, but it is found particularly injurious to the arable lands.

Roads.] Many of the roads in L. are now superseded by its numerous railways; the principal, however, are the following.—The Liverpool road enters the co. at Warrington, and runs by Prescot to Liverpool, whence the Preston road runs by Ormskirk to Preston, where it meets with the road to Wigan and Warrington, and to Bolton and Manchester, to Blackburn, Haslingden, Burnley, and Colne, Whalley and Clitheroe, the road by Kirkham to Poulton, &c., and the road by Garstang to Lancaster, whence branches quit the co. for Westmoreland, &c., by Hornby, Kirkby-Lonsdale, and Burton. From Manchester numerous roads radiate,—to Liverpool by Warrington, to London by Stretford, to Congleton by Didsbury, to Stockport, Chapel-en-le-Frith, &c., to Sheffield, to Huddersfield by Oldham, to Halifax, Leeds, &c., by Rochdale and Todmorden, besides others to Bury and Haslingden, to Bolton, Leigh, Wigan, &c. There are numerous other roads communicating with these, and between the various towns and villages throughout this and the neighbouring cos. The highway returns for three years ending 1814, show an average total expenditure of £74,248 on 739 m. of paved streets and turnpike roads, and 2,977 m. of all other highways used for wheeled carriages, in this co. The returns of turnpike trusts for 1839 show an expenditure of £73,870 on 3,523 m. of road.

Railways.] Sustained, nay immensely promoted, as the manufacturing and commercial growth of L. has been by the numerous canals which thread their arterial course throughout its various and important districts, it is now more lavishly traversed, more completely organized, by the higher and still more vital powers and mechanism of railway transit. Numerous interlacements of these nerve-like conductors now connect the great centres of its vast constructive energies with each other, and with the various mercantile reservoirs into which the fruits of its industry are poured. Indeed this district was the field on which the great modern experiment of locomotive power and speed was tested,—the great centre whence the iron nerves of social and commercial life and intercourse were shot throughout the country.—The Liverpool and Manchester railway, formed under acts obtained in 1826 and following years, is 31 m. long, and was opened throughout on 15th September 1830. Under an act obtained in 1825, a railroad was made from Bolton to Leigh for the purpose of connecting the Manchester, Bolton, and Bury canal, with the branch-canal from Wigan, connecting the Leeds and Liverpool canal with the duke of Bridgewater's canal at Leigh. On the opening of the Manchester and Liverpool railway, this line was extended to Kenyon, where it joins the Manchester and Liverpool. At the Bolton terminus it is now joined by the Manchester and Bolton railway, opened 29th May 1838. This latter railway, 10 m. in length, runs from Bolton by Salford to Irwell-street, Manchester. The Runcorn-gap and St. Helen's, another affluent of the Liverpool and Manchester railway, was formed under an act passed in 1830. The town of St Helen's is connected with this line. A connecting link between the Liverpool and Manchester, and the Grand Junction railways, running N from Warrington to two points on the Liverpool and Manchester line, near Newton, a distance of 4¼ m., was formed under acts passed in 1829 and 1830. The Newton and Wigan line, uniting with the Liverpool and Manchester at Parkside near Newton, and joining the Wigan and Preston, or North Union, at Wigan, was formed under an act passed in 1830.

The Manchester and Leeds line, the most important link of railway communication across the island, from Liverpool to Hull, was opened throughout on 8th March 1841. The length of the line to Normanton is 50½ m., with 10 m. additional to Leeds.—The Manchester and Birmingham railway, for which acts were passed in 1837 and 1839, passes by Stockport to Crewe, 38½ m. from Manchester, where it joins the Grand Junction. The Manchester and Sheffield railway joins the Manchester and Birmingham railway at Manchester. The act for the formation of this railway was passed in 1837.—Preston is now another great railway centre in this co. The principal lines radiating from it are the Preston and Wigan now the North Union, united with the Liverpool and Manchester line by the Wigan branch near Newton; the Preston and Wyre; the Preston and Lancaster Junction; the Preston and Bolton; and the Preston and Todmorden. The Preston and Wigan railway was formed under an act passed in 1831. The Preston and Bolton railway, for the formation of which acts were obtained in 1837 and 1838, was originally intended to have run direct from Preston; but as carried into execution, it commences on the North Union railway at Euxton, and runs by Chorley to Bolton, where it joins the Manchester and Bolton. The Preston and Wyre railway and harbour company was incorporated for the purpose of facilitating the general traffic of Preston, by connecting it with a safe and commodious harbour at the mouth of the Wyre. The act for the formation of this railway was obtained in 1835, and it was opened for traffic on 16th July 1840. The Preston and Longridge railway, opened on 1st May 1840, was formed under an act obtained in 1836. The Preston and Lancaster Junction is a continuation of the North Union, from Preston, by Garstang, to Lancaster. It was formed under an act obtained in 1837.—By the opening of the East Lancashire railway from Liverpool to Preston, and from Burnley to Colne, and by the completion of the Manchester and Huddersfield railway by the London and North-western railway company from Staleybridge to Huddersfield, two entire lines are completed from Liverpool to Leeds, competing with the Lancashire and Yorkshire railway, which, in conjunction with the London and North-western and Midland railways, had heretofore conducted the whole of the traffic between those places.—By the opening of the Leeds and Thirsk railway, from the former town to Wetherby, a competing line is completed for the traffic from Thirsk, the Newcastle coal-field, and the north of England, to Leeds and the manufacturing districts round Manchester, shortening the distance very considerably.—The Manchester, Sheffield, and Lincolnshire railway company have opened their line for public traffic from Sheffield, by Worksop and Gainsborough, to Glandford-Brigg and Lincoln; thus conferring the advantages of railway communication upon a large part of Lincolnshire heretofore devoid of it, and completing as an integral communication in their own hands another route distinct from those heretofore existing from Manchester and Sheffield, and the important districts surrounding those places to the E coast of England and the Humber, at the ports of Great Grimsby and New Holland, opposite to Hull. By the opening of the North Staffordshire railway from Macclesfield to Uttoxeter, and of the Midland railway from Burton to the Leicester and Swannington railway, a more direct line is afforded from Manchester and the manufacturing districts bordering the North Staffordshire railway, to Derby and the counties of Nottingham and Norfolk, &c. From Lancaster railway communication is prolonged to the north by Westmoreland, Carlisle, Lockerby, Beattock, Lanark, Hamilton, and Glasgow, with a branch to Edinburgh.

Commerce and manufactures.] Liverpool is the grand emporium not only for the foreign commerce of L., but also of the cos. of Stafford, Warwick, and York, and of the western districts in general. The exports are chiefly the manufactures of these cos.; and the imports, American, West Indian, Russian, and other foreign and colonial produce. The extent of the trade thus carried on in L., as well as of the traffic coastwise, may be gathered from the various statistical details presented under the several articles Liverpool, Manchester, Preston, and Fleetwood. The trade of the smaller ports of Lancaster, Ulverstone, and Preston, is chiefly coasting.—As a manufacturing co., more than a merely commercial, L. is pre-eminently distinguished throughout the world. It appears to have been the earliest seat, and it is now the great centre, of the cotton manufacture. It was the nursery in which the greater number of the important improvements in the cotton manufacture were fostered; and those towns in which the operations of this vast manufacture have been carried on, have assumed altogether a new character and appearance within the last half century. Manchester is the great centre of the cotton trade. The value of the cotton goods produced in this city is at least equal to two-thirds of the total value of all the cotton goods manufactured in Great Britain. Ashton, Bolton, Bury, Blackburn, Stockport, Wigan, Preston, and the manufacturing villages surrounding these towns, are all engaged in the same great branch of trade. In 1838, besides 62 not at work, there were 2,003 cotton mills at work in L., employing 68,717 males, and 81,052 females. In the movement of these mills, steam-engines to the extent of 29,566 horse-power, and water to the extent of 3,429 horse-power, were employed. The total number of hands employed in the cotton factories of this co. in March 1847 was 201,573, of whom 111,803 were females. The woollen manufacture is next in importance to that of cotton in L. In 1838 there were 101 woollen mills, employing 3,086 males and 1,861 females, within this co.; besides which, there were 12 worsted mills, employing 924 hands. The total number of hands employed in 1847 in the woollen manufactories, was 7,971, and 340 in the worsted mills. Next in importance is the silk manufacture. In 1838 there were 31 mills, employing 5,591 hands. The number of hands employed in the silk manufactories of the co. in 1847 was 8,367. There were 16 flax manufactories in the co. in 1838, employing 2,881 hands In 1847, the number of hands employed in the flax factories was 2,541. A large number of hand-loom weavers are employed in the cotton as well as in the silk and mixed manufacture. In Manchester and its vicinity alone their

number is estimated at 8,000 to 10,000.—Calico printing and bleaching establishments of great extent are carried on at Manchester, Blackburn, Bolton, Bury, Acrington, &c. There are also considerable manufactories of hats in these and other towns, besides numerous manufactories of pins, glass, earthenware, paper, chemical substances, &c. Liverpool is celebrated for watches and watch-tools. Iron works are numerous in the northern district; and Lancaster is noted for upholstery and mahogany furniture.

Population.] The pop. of this co. has increased in an extraordinary ratio since the introduction of manufactures:—

The population, in 1700, was	166,200
in 1750,	297,400
in 1801,	672,731
in 1811,	828,309
in 1821,	1,336,854
in 1831,	1,500,000
in 1841,	1,667,054
in 1851,	2,063,913

The rate of increase per cent. from 1841 to 1851 was 22 per cent.; from 1831 to 1841 it was 25 per cent.; from 1821 to 1831, 28 per cent. The increase per cent. in the 50 years from 1801 to 1851 was 201·36; and the annual rate of increase, 2·23 per cent. The number of families in L. engaged in agriculture, in 1821, was 22,743; in trade, manufactures, and handicraft, 152,271. In 1831, out of 260,025 families, 24,696 were chiefly engaged in agriculture, and 173,693 in trade, &c. The pop. of 1841 was thus classified as to occupations:—

Farmers and graziers,	16,691	
Agricultural labourers,	30,237	
Total agriculture,		46,928
Trade, &c., occupation specified,	640,047	
Ditto, not specified,	9,582	
Total trade, &c.,		649,629
Total employed,		696,557
Persons of independent means,		33,207
Almspeople, pensioners, paupers, and beggars,		9,340
Other persons, not described,		4,945
Residue, including women and children.		923,005
Total,		1,667,054

The decimal proportions might be stated as follows:—

Trade, &c.,	39 per cent.
Agriculture,	2·8 ,,
Independent,	2 ,,
Residue,	56 2 ,,
	100

It is a fact worthy of notice that the proportion of the pop. employed is greater in Lancashire than in any other county of England. There is nearly 41·7 per cent. of the whole pop. of this county employed; and it may well deserve the epithet so often applied to it, of 'the hive of industry.' The proportion of females appears to have always exceeded that of males: thus,

In 1811 there were	334,004	males, and	434,205	females.
1821 ...	512,746	...	540,383	...
1831 ...	650,389	...	686,465	...
1841 ...	814,847	...	852,207	...
1851 ...	1,005,627	...	1,058,286	...

There are about 400,000 Irish, and their immediate descendants, in the co.—In agricultural Wilts, the average age at death is 35 years 4 months; in manufacturing L. it is only 22 years 10 months. In former times L. supplied a large contingent of fine soldiers to the army. It furnished the strength of the army which fought at Flodden. Cromwell pronounced his L. regiment the finest troops ever seen on a battle-field; and till recently the Guards were recruited from that co. A party of ten years' experience in the recruiting service told Dr. Playfair that where he used to obtain 10 recruits, he could now only obtain one, and that one was often rejected; and official documents prove that 28 per cent. of recruits sent from Manchester to the staff-surgeon of Liverpool have been rejected as unfit for service, being too thin, unable to stand straight, and narrow-chested. Medical testimony has accounted for this physical deterioration by ascribing it to empirical preparations of opium almost universally administered to infants in the manufacturing districts, which stunt growth and undermine the constitution. All the druggists in L. have deposed to the enormous consumption of opium.

Franchise, &c.] The northern division of the co., comprehending the hundreds of Lonsdale, Amounderness, Leyland, and Blackburn, returns 2 members to parliament; the southern division, comprehending the hundreds of Salford and West Derby, also returns 2 members. The number of electors registered for 1837 and 1846 was as under:—

	N. division.		S. division.	
	1837.	1846.	1837.	1846.
Freeholders,	5,088	6,963	11,581	16,064
Leaseholders,	403	507	2,424	3,350
Copyholders,	903	1,040	362	492
Occupiers,	3,256	3,194	3,140	3,457
Trustees,	39	13	214	50
Mortgagees,	2	3	33	4
Others,		126		214
Total,	9,692	11,846	17,754	23,630

Besides the county-members, the boroughs of Liverpool, Manchester, Oldham, Bolton, Wigan, Preston, Blackburn, and Lancaster, return each 2 members; and those of Warrington, Salford, Ashton, Rochdale, Bury, and Clitheroe, each 1 member.

L. is included in the northern circuit. The division of the co. into two parts for judicial purposes, made by order in council in 1835, coincides with that for parliamentary representation; and the assizes, which were formerly held at Lancaster for the whole co., are now held at Lancaster for the N, and at Liverpool for the S division. The quarter-sessions are held at Lancaster; and by successive adjournments at Preston, Salford, and Liverpool. The co. has a court of common pleas. It is held at Lancaster every assize; and has jurisdiction over all real actions for lands, in all actions against corporations within the co., and over all personal actions when the defendant resides in L. The county-jail at Lancaster is a magnificent pile, known as 'Lancaster castle:' it comprises within its area the county and the duchy courts, and a jail for crown prisoners and debtors. See LANCASTER. There is a county house of correction at Preston.

The county-rates are not recorded till 1815, when the assessment on the £ in pence and decimal parts was 3·9; that of 1834 was 3s. It appears that, in a list of six northern manufacturing counties, L. ranks highest in crime, being 1·18, while the average is 1·08 per cent. of the pop. According to the criminal returns for 1838, the total number of offenders in this county was 2,585; in 1847 it was 3,456. The six hundreds of L. are subdivided into 95 parishes, containing 1 county-town, Lancaster; 4 principal ports, Liverpool, Fleetwood, Lancaster, and Preston; and 14 boroughs and market-towns, viz., Ashton-under-Lyne, Blackburn, Bolton, Bury, Clitheroe, Lancaster, Liverpool, Manchester, Oldham, Preston, Rochdale, Salford, Warrington, and Wigan; and 17 other market-towns, viz., Burnley, Cartmel, Chorley, Colne, Dalton, Garstang, Hawkshead, Haslingden, Hornby, Kirkham, Leigh, Middleton, Ormiskirk, Poulton, Prescot, Todmorden, and Ulverston. The inhabited houses in 1831 were 228,130; in 1841, 298,184; in 1851, 356,436.

The total amount of assessed property, in 1815, was £3,087,774. In 1829, a new valuation of the

whole co. was made, according to the provisions of the 55° Geo. III., which returned the amount of property, liable to the county rate, at £4,214,634 per annum. The amount of real property (including tithes) assessed to the income tax in 1843, was £7,756,228, or an increase equal to 150 per cent. on that of 1815, while the average increase of property throughout the whole country, within the same period, did not exceed 65 per cent. Of this income, however, the item of railways amounted to £593,515, and represents a capital much of which is not situated within the co. itself. Mr. H. Ashworth, in a paper read before the British Association, estimated the assessment value of property in L., in 1692 and 1841, as follows:

	Value in 1692.	Value in 1841.	Increase per cent.
Lonsdale, .	£8,500	£301,987	3,500
Amounderness,	10,288	364,454	3,500
Leyland, .	5,774	199,868	3,500
Blackburn, .	11,131	497,541	4,400
Salford, .	25,907	2,703,292	10,400
West Derby, .	35,642	2,124,925	5,900
	£97,242	£6,192,067	6,300

It will be seen from this table, that in the course of 150 years the annual assessed value of the three hundreds which are principally engaged in agriculture,—Lonsdale, Amounderness, and Leyland,—had increased 35 fold, or 3,500 per cent.; while the other three hundreds into which this co. is divided, had increased in value 7,000 per cent., which was double the increase that had taken place in the agricultural portion of the county. In many of the separate towns and townships the increase was still more remarkable. Manufacturing industry had not only promoted the prosperity of the places in which it was developed, but had extended its benefits to the whole surrounding district, raising the rental of mere land in some instances 1,500, and in others 3,000 per cent.

Duchy and palatinate.] Lancashire was originally an Honour, or one of the superior class of seigniories, on which inferior lordships and manors depended, by performance of certain customs and services. As an Honour it was bestowed at the Conquest on Roger de Poicton. This nobleman having forfeited it, Stephen gave it to his son William, and till the time of Henry III. it was held by several eminent personages. Henry III. made his second son, Edmund Plantagenet, earl of Lancaster, and conferred on him the honour and estates. By Edward III. the title of duke was conferred on a descendant of the earl, and the county was raised to a palatinate, in favour of his son, John of Gaunt, to whom the dukedom had been transferred on his marriage with the heiress of the first duke. Through Henry of Bolingbroke this duchy and the estates passed to the Crown. By act of parliament they were annexed to the Crown, in the persons of Edward IV. and his heirs, for ever. Henry VIII. added many estates of dissolved monasteries to the duchy, the revenue of which, however, was sadly curtailed by leases granted by succeeding monarchs. The duchy of L. includes the co.-palatine and many estates in other counties of England. The rents leviable from these, in 1838, were as follow:

	Rents.
County of Berks, . . .	£1 2 8
,, Buckingham, . . .	72 1 0
Counties of Derby and Warwick, .	1,541 3 8¾
County of Essex, ...	143 16 11
,, Glamorgan, . . .	56 3 3½
,, Gloucester, . . .	1 0 0
,, Hants, . . .	78 0 0
,, Hertford, . . .	3 8 4
County-palatine of Lancaster and county of Chester, ...	2,456 6 4
County of Leicester, . . .	227 12 2

The income in 1840 was about £34,704, and the expenditure £30,346, leaving a balance of only £4,358 in the hands of the receiver-general. In 1848, the total income was £38,035; the expenses of management, £17,754!—The duchy has a court-of-chancery, held at Westminster, in which appeals may be heard from the chancery-court of the co.-palatine, with a further right of appeal to the sovereign in parliament. It has cognizance of all questions of equity affecting the duchy and co.-palatine. The officers of this court are the chancellor of the duchy, vice-chancellor, registrar, examiner, and chief clerk; with seal-keeper, clerks in court, messenger, attorney-general, and two Queen's counsel. It sits twice a-year at Lancaster, and twice at Preston; and has concurrent jurisdiction in matters of equity with the high court of chancery and the court of exchequer; except when the subject of the suits and the residences of the litigants are both within the co., when it has exclusive jurisdiction. The chief judge in the county is the vice-chancellor: the chancellor sits at Westminster.

History.] This county was inhabited under the Romans by the *Setantii*, a tribe of the Brigantes, and was included in the province of *Maxima Cæsariensis*. It was the scene of various conflicts between the Britons and Saxons in the 6th cent. The S district was finally conquered by Ella, who incorporated it with his kingdom of Deira; but long after the Saxon invasion the N district continued to form a part of Cumbria. In Edward the Confessor's reign L., according to Sir Francis Palgrave, was divided between Leofric, Earl of Coventry, and the Scottish prince, who governed Cumbria, the former possessing all the county to the S, and the latter all to the N of the river Ribble. In 1643, Manchester became the head-quarters of Sir Thomas Fairfax, having previously repelled several attempts which the royalists had made to get possession of it. Lancaster was alternately in the hands of both parties. A sanguinary battle was fought at Preston on the 17th of July, 1648, between the Scots, under the Duke of Hamilton, and the parliamentary army under Cromwell, when the former were routed with great slaughter. At Wigan, in 1651, the forces of the Earl of Derby were routed by Colonel Lilburne, and the earl himself, soon after, was taken prisoner, and beheaded at Bolton. The troops of the Pretender, in 1715, took up their quarters at Preston. The army of the young Pretender, in 1745, traversed the county both on their advance and on their retreat.

LANCASTER, a parish, borough, and port, the cap. of the co.-palatine of Lancashire. The parish contains, in the hundred of Lonsdale, the chapelries of Caton, Gressingham, Overton, Poulton, and Over-Wyersdale, and the townships of Aldcliffe, Ashton-with-Stodday, Bure, Bulk, Heaton-with-Oxcliffe, Middleton, Quern-moor, Scotforth, Skerton, Thurnham, and Torrisholme; and, in the hundred of Amounderness, the townships of Fulwood, Myerscough, and Preesall-with-Hackinsall, and the chapelries of Bleasdale, and Stalmin-with-Stanall. It has an area of 66,100 acres. Pop. in 1801, 17,158; in 1831, 22,294; in 1841, 24,149. It is interscected by the Lune, the canal from Preston to Kendal, the Preston, Lancaster, and Carlisle railway, and the Skipton and Lancaster branch of the Great North-Western. The township is situated on the S bank of the Lune, and contains most part of the town. The river, after passing southwards under the canal aqueduct, between the townships of Bulk and Skerton, and running in the same direction to the town, suddenly changes its course to the W, and opens, by successive sweeps, through its wide but shallow estuary, into Lancaster bay. It has now a depth of water up to the town of 14 ft. 10 in., and of 26 ft. at Glasson dock, at high water. The town stands in a highly picturesque situation on the acclivity of a bold eminence, the summit of which is crowned with the bastions of the castle, and the lofty tower of St. Mary's church. It contains many handsome houses, chiefly of freestone. Some of the more modern streets and squares are spacious and handsome, and the outskirts of the town are adorned with a number of elegant villas. Over the river, leading to the suburb of Skerton, is a handsome stone-bridge of 5 arches. The public buildings are numerous, and there are public baths, a theatre, and assembly-rooms. The parish-church is an ancient structure, in the florid style of English architecture, consisting of a nave, aisles, and chancel. The county lunatic asylum, on Lancaster moor, is a handsome stone edifice, accommodating between 500 and 600 patients, with a chapel attached. The principal buildings connected with the municipal affairs or govern-

ment are the town-hall and castle. The town-hall, erected in 1781, is a handsome building. The magnificent pile known as L. castle, comprises within its area the duchy and county courts, a house for the governor, and a jail for crown-prisoners and debtors. The prison is capable of accommodating in all cases 495 prisoners. This castle, which has served as a county-prison and seat for the administration of justice ever since the reign of Queen Elizabeth, has received many important alterations, which now render it one of the most complete establishments in the empire. The estimated expense of these improvements was upwards of £140,000; and it is said to be capable of containing nearly £5,000 men.—Besides upholstery and furniture, for which L. has long been noted, cotton and silk are the chief articles of manufacture. Ship and boat building are carried on, though not to so great an extent as formerly. Sail-cloth, cordage, &c., are manufactured. The trade of the port is now chiefly coastwise. A considerable foreign trade, especially with the West Indies, was possessed by L. till transferred to Liverpool. But though the West India trade has been on the decline, the American and Russian are still considerable. The gross receipt of customs duty, in 1837, amounted to £40,031; in 1849, to £30,736. The number of coasting-vessels which entered the port in 1832 was 547 = 32,549 tons; in 1850, 1,235 = 57,142 tons. This trade is carried on principally to the N of Holyhead, and S of the Mull of Galloway. The number of vessels registered at the port in December 1850 was 92 = 6,221 tons. The principal exports are mahogany furniture, saddlery, shoes, cottons, woollens, soap, candles, and provisions. The trade of L. has been much impeded by the shoals in the Lune estuary, which rendered it extremely difficult for vessels of 250 tons to approach the town, but a dock was formed at Glasson, about 5 m. below the town, goods being brought up to the old and new quays in lighters; a cut was also made from Glasson to the Lancaster canal; and the channel of the river itself has been much deepened up to the town.—The assizes for the N division of the co. are held at L. Under the new municipal act, the borough is divided into 3 wards, and governed by 6 aldermen and 18 councillors. The revenues of the corporation, in 1839, arising chiefly from rents, tolls, and dues, amounted to £1,385; in 1847, to £2,649. —L. returns 2 members to parl. To the township of L., and the municipal borough, the suburbs in the townships of Skerton and Bulk, with a small surrounding district, have been added for parliamentary representation. Pop. of parl. burgh in 1841, 14,389; in 1851, 16,168. Electors registered for 1837, 1,228; in 1848, 1,313. L. is one of the polling-places, and the principal place of election for the N division of the co.—L. was early a place of importance, and the capital of the co. It was burnt by the Scots in 1322 and 1389. It suffered also during the struggles of the houses of York and Lancaster, in the parliamentary war, and in the rebellion of 1745.

LANCASTER, a township of Canada West, in Eastern district, bounded on the NE by Lower Canada, or Canada East, and on the SE by Lake St. Francis. Pop. in 1842, 3,171. It is watered by affluents of the St. Lawrence, and has about 10,094 acres under cultivation.

LANCASTER, a county in the SE part of the state of Pennsylvania, U. S., comprising an area of 928 sq. m., bordered on the SW for upwards of 40 m. by the Susquehanna, and watered by Conestoga, Pecquea, Conewango, and other creeks, all affluents of the S. It contains considerable quantities of iron-ore and sulphate of magnesia. Pop. in 1840, 84,203; in 1850, 99,760. Its cap., Lancaster, and formerly cap. of the state, is 1½ m. W of Conestoga creek, 37 m. ESE of Harrisburg, and 62 m. W of Philadelphia, in N lat. 44° 2′ 36″, and W long. 76° 20′ 33″. Pop. in 1820, 6,663; in 1830, 7,704; in 1840, 8,417. It is intersected by the Great Western turnpike from Philadelphia to Pittsburg, and by the Philadelphia and Columbia railroad.—Also a co. in the E part of the state of Virginia, containing a superficies of 161 sq. m., bordered on the E and NE by Chesapeake bay and Potomac river. Pop. in 1840, 4,628; in 1850, 4,708. Its cap. is Heathville.—Also a district in the N part of the state of S. Carolina, containing a surface of 524 sq. m., bordered on the E by Lynche's creek; on the W by Catawba river; and watered by affluents of the latter river. Pop. in 1840, 9,907; in 1850, 10,988. Its cap., which bears the same name, is 72 m. NNE of Columbia, on a small branch of Catawba river.—Also a township of Coos co., in the state of New Hampshire, 101 m. N by W of Concord, bordered on the NW by Connecticut river, and watered by Israel's river and its branches. The surface is hilly, and the soil, especially on the streams, possesses considerable fertility. Pop. 1,316.—Also a township of Worcester co., in the state of Massachusetts, 36 m. W by N of Boston, on the Nashua river. Pop. in 1840, 2,019. It has a village on North river, consisting of about 75 dwellings.—Also a township of Erie co., in the state of New York, 280 m. W of Albany. The surface is undulating, and is drained by Ellicott's, Cayuga, and Seneca creeks. The soil consists of clay and calcareous loam. Pop. in 1840, 2,083. It has a village containing about 600 inhabitants.—Also a village of Hocking township, in the state of Ohio, 30 m. SE of Columbus, near the source of Hockhocking river, and connected by a canal 12 m. in length with the Ohio canal. Pop. in 1840, 3,272.—Also a village of Garrard co., in the state of Kentucky, 57 m. S by E of Frankfort. Pop. in 1840, 480.—Also a village of Smith co., in the state of Tennessee, 61 m. SE of Nashville, on the W side of the Cany fork of Cumberland river. —Also a township of Jefferson co., in the state of Indiana, 74 m. SSE of Indianapolis. Pop. in 1840, 1,787.—Also a village of Grant co., in the state of Wisconsin, 96 m. WSW of Madison.—Also a village of Lancaster co., in the state of Virginia, 83 m. E by N of Richmond. Pop. in 1840, 100.

LANCASTER SOUND, a channel of British North America, between Cockburn island on the S, and N. Devon on the N, and connecting Baffin's bay with Barrow's strait, which is its prolongation to the W. It extends between 77° and 84°. On the N it forms Croker's bay; and on the S are Navy Board and Admiralty inlets. It was discovered by Baffin in 1616.

LANCAUT, a chapelry and township in the p. of Tidenham, Gloucestershire, 2 m. N by E of Chepstow, on the E bank of the Wye, by which it is nearly encircled.

LANCAVA, or Langkavi, an island near the W coast of the peninsula and in the strait of Malacca, in N lat. 6° 30′, and E long. 99° 45′. It is about 17 m. in length and 5 m. in average breadth, and is very populous. Its soil is fertile, and in some parts well-cultivated: other parts are covered with fine timber. The coasts afford excellent anchorage, and have several safe harbours. It was formerly dependent upon the state of Queda.

LANC COVE, a river of New South Wales, in Cumberland co., an affluent of the Paramatta.

LANCE (Point), a cape of Newfoundland, on the S coast of the peninsula of Avalon, and on the W side of the bay of St. Mary.

LANCELIN, an island of Western Australia, off the county of Twiss, in S lat. 31° 4′, and E long. 115° 22′.

LAN-CHANG, Hanniah, or Mohang-lang, a town of Annam, on the l. bank of the Me-nam-kong, or Mekon, 200 m. WSW of Hué. Pop. about 5,000. It is enclosed by a lofty wall and ditch, and encloses a palace built of wood and several pagodas.

LANCHESTER, a parish and township in the co. and 7½ m. NW of Durham. Area of p. 41,890 acres. Pop. in 1831, 5,076; in 1841, 7,783. Area of township 5,830 acres. Pop. in 1831, 574.

LAN-CHU, a district and town of China, in the prov. of Sze-chuen, div. of Ching-tu-fu.—Also a town in the prov. of Yun-nan, div. of Le-keang-fu, in N lat. 26° 33′, and E long. 99° 46′.

LAN-CHU-FU, a division and town of China, in the prov. of Kan-suh. The div. comprises 7 districts. The town, which is the capital of the prov., and the seat of the Tsung-tuh, or governor, of both this and the prov. of Shen-se, is 330 m. WNW of Se-gan-fu, and 780 m. WSW of Pekin, on the r. bank of the Hoang-ho, in N lat. 36° 8′ 24″, and E long. 103° 55′. It carries on an active trade, consisting chiefly in skins and woollen fabrics, with the Mongols.

LANCIANO, a district and town of Naples, in the prov. of Abruzzo-Citra. The district comprises 8 cant. The town is 8 m. S of Ortona, and 14 m. SE of Chieli, on a river of the same name. Pop. 13,000. It has two suburbs, an archbishop's palace, a cathedral, numerous churches, several convents, a diocesan and several other schools. It was formerly a commercial place, but is now much decayed. Fairs are held twice a-year.

LANCIEGO, a town of Spain, in the prov. of Alava, partido and 6 m. ENE of La Guardia, and 29 m. SE of Vittoria, at the foot of a mountain which separates the Rioja-Alavesa from the rest of the prov. Pop. 819. It has a handsome parish-church, 3 chapels, an hospital, 3 schools, and several fountains. Its industry consists chiefly in the manufacture of linen.

LANCIERS (Isle de), an island of the South Pacific, in the Low archipelago, in S lat. 18° 28′, and W long. 139° 40′. It was discovered by Bougainville in 1768.

LANCING, or Launsing, a parish in Sussex, 3 m. ENE of Worthing, on the Adur, and N of the English channel. Area 2,300 acres. Pop. in 1831, 695; in 1841, 781.

LANÇON, a commune of France, in the dep. of the Bouches-du-Rhône, cant. and 5 m. S of Salon, and 18 m. WNW of Aix, on a hill. Pop. in 1841, 1,934. It is surrounded by old walls, flanked with towers of the era of Francis I., and contains the ruins of a fortress. The church stands in a square in which the four principal streets unite. Oil is its chief article of manufacture.—Also a village in the dep. of the Ardennes, cant. and 5 m. S of Grand-Pre, on the r. bank of the Aisne. Pop. 305. It has several iron-works.

LANÇOES, a river of Brazil, in the prov. of São-Paulo, an affluent of the Tiête.

LANÇOES-GRANDES, a sandy plain in Brazil, extending along the coast of the prov. of Maranhão, between the mouth of the Rio Preguiça and the plain of Mangues-Verdes. Its length from E to W is about 18 m. Another plain, named Lançoes-Pequenos, lies between the Rios Preguiça and Tutoga.

LANCQUE, a village of France, in the dep. of the Haute-Marne, cant. and 5 m. N of Nogent-le-Roi. Pop. 280. It has a battery.

LANCRANS, a commune of France, in the dep. of the Ain, cant. and 4 m. WSW of Collonge, and 20 m. SSW of Gex. Pop. 1,772. It has two annual fairs.

LANCRE, or Thuisy, a river of France, in the dep. of the Aube and cant. of Estissac. It throws itself into the Vannes, on the l. bank, at Estissac, after a course of about 12 m.

LANCUT, or Landshut, a town of Galicia, in the ldgb. of Lemberg, circle and 15 m. E of Rzeszow, and 21 m. W of Yaroslav. Pop. 1,862, of whom 369 are Jews. It has a fortress, and possesses several spinning-mills and bleacheries of linen.

LANCY, a commune of Switzerland, in the cant. of Geneva, on the l. bank of the lake. Pop. in 1850, 778, chiefly Catholics.

LAND, a parish of Norway, in the dio. of Aggershuus and bail. of Christiania, 60 m. N of the Christiania, on the E bank of the Rands-fiord. Pop. 5,119.

LAND'S-END, a celebrated promontory in Cornwall, forming the most westerly point of England, in N lat. 50° 6′, W long. 5° 45′. It is 9¼ m. WSW of Penzance, and 299 m. SW of London. It was called by Ptolemy *Bolerium;* by the British bards, Penringhuaed, or 'the Promontory of Blood;' and by their historians, Penwith, or 'the Promontory to the Left.' Several masses of rocks are seen above the surface of the sea more than 2 m. W of the Land's End. These are called the Long-ships; and a light-house was erected on the largest of these rocks in 1797, in 50° 4′ N lat., 5° 44′ W long.

LANDAF. See Llandaf.

LANDAFF, a township of Grafton co., in the state of New Hampshire, U. S., 84 m. NW of Concord. The surface is hilly, and is watered by Great Ammonusuck, Wild Ammonusuck rivers, and their branches. Pop. in 1840, 957.

LANDAK, a district and town in the island of Borneo, near the W coast, and NE of Pontiana. The district is intersected by a river of the same name. It is noted for its diamond and gold mines, and contains also considerable quantities of iron. The town is on a rising ground on the r. bank of the Landak river, 30 m. NE of Pontiana. It is strongly fortified. The Dutch have a settlement here.

LANDAS, a commune of France, in the dep. of the Nord, cant. and 2 m. E of Orchies, and 13 m. NE of Douay. Pop. 2,363. It has a manufactory of agricultural implements, and a large cattle-market.

LANDAU, a town of Bavaria, in the circle of the Pfalz, in a fine valley on the Queich, 18 m. WSW of Spire. Pop. in 1845, 6,074, of whom a large proportion are Jews. It is small but strongly fortified, and contains a church, 2 convents, and a lyceum. Tobacco is its chief article of manufacture. L., which was formerly an imperial town, was ceded to France in 1680, and fortified by Louis XIV. Its possession was long contested by the Imperialists. Its ultimate cession to Bavaria took place in 1815.—Also a presidial and town in the circle of Lower Bavaria, on the r. bank of the Isar, 18 m. S of Straubing, and 40 m. W of Passau. Pop. 1,600. Agriculture and the rearing of cattle form its chief branches of industry.—Also a town of the principality of Waldeck, 11 m. ENE of Corbach, and 20 m. W of Cassel, on a height bathed by the Wetter. Pop. 750.

LANDAUL, a village of France, in the dep. of Morbihan, cant. and 4 m. WSW of Pluvigner. Pop. 820. Fairs are held here twice a-year.

LANDAUMARI, a town of Senegambia, in the state of Futa-Jallon, 6 m. E of Languebana, and 84 m. NW of Labbé, on a mountain.

LANDBEACH, a parish in Cambridgeshire, 4½ m. N by E of Cambridge, and W of the Cam. Area 2,490 acres. Pop. in 1831, 422; in 1841, 468.

LANDCROSS, a parish of Devonshire, 2 m. S by E of Bideford, on the Yeo and Torridge, by which it is nearly surrounded. Area 1,150 acres. Pop. 120.

LANDEAN, a village of France, in the dep. of

the Ille-et-Vilaine, cant. and 5 m. NE of Fougeres. Pop. 1,605.

LANDECK, a town of Prussia, in the prov. of W. Prussia, reg. and 56 m. WSW of Marienwerder, circle and 20 m. WSW of Schlochau, at the confluence of the Dobbrinka and Haachen with the Kudde. Pop. 700. It has 2 churches,—a Catholic, and a Calvinist,—and a synagogue. It has some cloth manufactures.—Also a town in the prov. of Silesia, reg. and 58 m. S of Breslau, circle and 10 m. ENE of Habelschwerdt, on the l. bank of the Biala. Pop. 1,530. It has 3 Catholic churches, an hospital, a justiciary court, and a custom-house. In the vicinity are celebrated sulphureous baths.—Also a town of Austria, in Bohemia, in the circle and 33 m. NW of Pilsen, and 5 m. N of Tepel. Pop. 260. It has some mineral springs.

LANDECK, or Landok, a village of Hungary, in the comitat of Zips, 3 m. NNW of Kasmarkt. It has several mineral springs, and in the vicinity is a quarry of black slate.

LANDE-D'AIRON (Lé), a commune and town of France, in the dep. of the Manche, cant. of Villedieu, 11 m. NNE of Avranches, on the r. bank of the Airon. Pop. 1,070. It has numerous fairs.

LANDEGEM, a department and commune of Belgium, in the prov. of E. Flanders, arrond. of Gand, watered by the Caele. Pop. of dep. 1,986.

LANDEGODE, an island of Norway, off the coast of Nordland, to the NW of Bodöe.

LANDEK, or Landeck, a village of the Tyrol, in the circle of the Upper Innthal, 10 m. E of Imst, and 18 m. W of Innspruck, on the r. bank of the Inn. Pop. 1,026.

LANDEL, a village of Styria, in the circle and 32 m. NW of Brück, and 33 m. N of Judenburg, on the l. bank of the Ens. Pop. 277. It has an extensive trade in cattle and in timber.

LANDELEAU, a commune of France, in the dep. of Finistere, cant. and 5 m. ENE of Chateauneuf-du-Faou. Pop. 1,203. It has a paper-mill. Fairs are held 4 times a-year.

LANDELIES, a department and commune of Belgium, in the prov. of Hainault, arrond. of Charleroi. Pop. of dep. 429. The v. is 5 m. SW of Charleroi, near the Sambre. Pop. 374. In the vicinity is a quarry of lithographic stone.

LANDELLES, a commune and town of France, in the dep. of Calvados, cant. and 5 m. NNE of St. Sever. Pop. 1,641.

LANDEN, a department, commune, and town of Belgium, in the prov. of Liege, arrond. of Huy. Pop. of dep. 736. The town is on the Beck, 20 m. NNW of Huy. Pop. 721. It was formerly fortified. The locality is noted for the battle of Nerwindero, named from a village in the dep., which took place in July 1693, between the allies, commanded by William III. of England, and the elector of Bavaria, and the French, in which the latter were victorious.

LANDENNE, a department and commune of Belgium, in the prov. of the Liege, arrond. of Huy. Pop. of dep. 943; of com. 157.

LANDE-PATRI (La), a commune of France, in the dep. of the Orne, cant. of Flers, 13 m. N of Domfront, on the l. bank of the Vere. Pop. 2,066. It has manufactories of ticking and linen, and several nail-works.

LANDERNEAU, a canton, commune, and seaport town of France, in the dep. of Finistere, arrond. of Brest. The cant. comprises 9 com. Pop. in 1831, 15,795; in 1841, 16,068. The town is 13 m. ENE of Brest, and 23 m. WNW of Morlaix, on a river of the same name, at its entrance into the roadstead of Brest. Pop. in 1841, 4,906. It is situated on a hill between two mountains. The streets are ill-laid out and ill-paved, and the houses have little to attract notice. The only buildings worth mentioning are the town-house, the college, and the marine and civil hospitals. It possesses, however, extensive manufactories of steam-engines, of calico plain and printed, of sailors hats and apparel, of leather, and of animal black, soap, and candles, and several bleacheries; and carries on an active trade, chiefly with France and Italy and the colonies, in grain, horses, linen, plain and damask, sail and packing-cloth, leather, wax, honey, tallow, candles, &c. Fairs are held several times a-year. This town, which was formerly well-fortified, was taken in 1374 by John IV., and its garrison put to the sword; and again, in 1592, it was sacked by Guy Eder.

LANDERNEAU, or Elorn, a river of France, in the dep. of Finistere, which has its source on the N side of the mountains of Arrée; runs in a generally W direction; and, after a course of 42 m., of which 9 m. are navigable, throws itself into the roadstead of Brest, at the town of the same name. It enlarges considerably towards the end of its course, and forms a capacious harbour. Until it reaches the town of L. it bears the name of Elorn.

LANDERON, a town of Switzerland, in the cant. and 9 m. NE of Neufchatel, and 1½ m. WSW of Neuveville, at the entrance of the Thiele into Lake Bienne. Pop. (Cath.) 956. It has a church and a convent. Husbandry, boat-building, and fishing, form the chief branches of local industry.

LANDERROUET, a village of France, in the dep. of the Gironde, cant. and 5 m. W of Monségur. Pop. 300. It has 4 annual fairs.

LANDES, a department in the SW of France, composed of portions of the ancient govs. of Guyenne and Gascogne, and so called from the great extent of *landes* or uncultivated sandy heaths which it comprises. It stretches between the parallels of 43° 30′ and 44° 28′ N lat., and from 0° 10′ to 1° 31′ E long.; and is bounded on the N by the dep. of Gironde; on the E by those of Lot-et-Garonne and Gers; on the S by the dep. of Basses-Pyrénées, from which it is separated by the Adour; and on the W by the gulf of Gascogne. Its greatest length from E to W is about 65 geog. m.; from N to S about 62 m. Its superficial area is 928,769 hectares or 2,295,173 English acres, or nearly equal to the area of Devonshire and Dorsetshire united. In point of extent it is the 3d dep. in France; but in density of pop. only the 82d.—The inclination of its surface is towards the gulf of Gascogne, to which all its waters are conveyed, by means of the Adour on the S, and the Leyre on the N. The former of these rivers divides the dep. into two regions of distinct physical and economical character: all that portion lying to the N of it, and which comprises nearly four-fifths of the total area, being occupied with the *landes;* while the territory to the S of the Adour is fertile, and diversified with chains of hills, outlying spurs of the Pyrenees. From the mouth of the Gironde river, or the N extremity of the dep. of that name, all the way S to the Bayonne river, and even to the S extremity of the Pyrenees, the coast is bordered by a chain of *dunes* or low sand-hills, about 5 m. in width, and from 100 to 150 ft. in height; behind which numerous small lagunes have been formed here and there. The aspect of the *landes* themselves is thus sketched by a correspondent of the *Morning Chronicle,* who visited the district in 1850: "If the reader will glance over the map, he will observe a vast barren space, showing only at dreary intervals the unknown name of some miserable village, scooping out as it were a huge slice of fertile France, running back from the sea as far as the towns of Mont-de-Marsan and Dax, and then towards the N, retreating slowly back to the

Atlantic, and after passing within a few miles of Bordeaux, finally melting away. This great range of country is called towards its broader portions Les Grandes Landes; the narrower strip to the N goes by the name of the Landes de Bordeaux; but in soil, appearance, and characteristics, the two districts are identical. Over all its gloom and barrenness—over all its blasted heaths, and monotonous pine-woods, and sodden morasses, and glaring heaps of shifting sand, there is a strong and pervading sense of loneliness,—a grandeur and intensity of desolation which as it were clothes the land with a sad solemn poetry peculiar to itself. Emerging from black forests of fir, the wanderer may find himself upon a plain, flat as a billiard-table, and apparently boundless as the ocean, clad in one unvaried unbroken robe of dusky heath. Sometimes stripes and ridges, or great ragged patches of sand, glisten in the fervid sunshine; sometimes belts of scraggy young fir trees appear rising from the horizon on the left, and fading into the horizon on the right. Occasionally a brighter shade of green, with jungles of willows and coarse water-weeds, giant rushes, and tangled masses of dank vegetation, will tell of the unfathomable swamp beneath. Dark veins of muddy water will traverse the flat oozy land—sometimes, perhaps, losing themselves in broad shallow lakes—bordered again by the endless sand-banks and stretches of shadowy pine. The dwellings which dot this dreary landscape are generally mere isolated huts, separated sometimes by many miles, often by many leagues. Round them the wanderer will descry a miserable field or two planted with a stunted crop of rye, millet, or maize. The cottages are mouldering heaps of sod and unhewn and unmortared stones, clustered round with ragged sheds composed of masses of tangled bushes, pine stakes, and broad-leaved reeds, beneath which cluster, when not seeking their miserable forage in the woods, two or three cows, mere skin and bone, and a score or two of the most abject-looking sheep that ever browsed. Here and there you will descry upon the distant plain the shepherd of the flock,—an uncouth figure, muffled in dirty sheepskins, crowned by a broad-brimmed steeple hat, mounted upon stilts 4 or 5 ft. high, slowly stalking like a deformed giant across sand and swamp, or leaning motionless upon a pole which looks like a third wooden leg, passing away the dreary hours in knitting. Proceeding through the Landes towards the coast, a long chain of lakes and water-courses, running parallel to the ocean, breaks their uniformity. The country becomes a waste of shallow pools, and of land which is parched in summer and submerged in winter. Running in devious arms and windings, through moss and moor and pine, these 'lakes of the dismal swamp' form labyrinths of gulfs and morasses which only the most experienced shepherds can safely thread. Here and there a village, or rather bourg, will be seen upon their banks, half-hidden in the pine-woods; and a roughly-built fishing-punt or two will be observed, rowed or pulled along by the fleece-clad brethren of the stilt-walkers."

The principal lagunes, or etangs—as they are generally called—which line the coast of the dep., are those of Orx, Casau, Soustons, Leon, St. Julien, Aureillan, and Tosse. There are about 120 m. of river-navigation within the dep.; but the greater part of this line of transit is comparatively useless throughout a large portion of the year from the rapidity of current which distinguishes the Adour.—The proportions of the three predominant classes of soil within the dep. are as follows: heaths and landes, 731,142 hect.; chalky or calcareous soils, 176,891 h.; argillaceous soils, 38,424 h. The soil of the fertile portions of the dep. is richly productive in maize, wheat, millet, rye, saffron, hemp, lint, and wine. The wines are in general of good quality; about 20,000 h. are under vine-cultivation; and their produce averages annually 425,000 hectolitres. The extent of surface under forests is estimated at 125,000 hect. The landes are mostly appropriated to the rearing of sheep, mules, and pigs. The live stock within the dep. was returned in 1839 at 23,035 horses, 3,298 mules, 68,228 horned cattle, 28,656 goats, 51,651 pigs, and 463,628 sheep. In some quarters the silk-worm is reared, and bees form an important object in rural industry. The principal mineral products are iron, bitumen, turf, gypsum, pottery-clay, and free-stone. The quantity of iron made in 1839 amounted to 127,721 quintals.—Manufacturing industry is chiefly confined to leather, woollens and linens of coarse fabric, and the ordinary articles of domestic consumption. There are likewise oil-mills, and a few glass and earthenware manufactories.—The commerce of this dep. mainly consists of cattle, hams, wine, brandy, timber, rosin, bitumen, flint, and agricultural produce. The traffic with Spain is considerable; and is much aided by a railway which runs from Bordeaux to Teste. Both inland and deep-sea fishing are actively pursued.

The pop. of this dep. in 1801 was 224,272; in 1831, 281,504; in 1841, 288,077; in 1846, 298,220, or 32·59 to the square kilometer, while the average density for all France was 67·088 per square kil. Of this pop. there was one child at school, in 1840, for every 21·28.—The dep. is administratively divided into the three arrondissements of Mont-de-Marsan, Saint-Sever, and Dax; which are subdivided into 27 cantons, and 339 communes.—The dep. forms the diocese of the bishop of Aire.—The total public revenue in 1831 amounted to 3,585,980 francs; in 1840, to 4,033,571 francs.

LANDEVANT, a commune of France, in the dep. of Morbihan, cant. and 5 m. W of Pluvigner. Pop. 1,576. It has 7 annual fairs, and contains a lead-mine.

LANDE-VIELLE, a village of France, in the dep. of the Vendée, cant. and 8 m. ESE of St.-Gilles-sur-Vic. Pop. 515.

LANDEWEDNACK, a parish in Cornwall, 11 m. SSE of Helstone, on the coast. Area 1,300 acres. Pop. in 1831, 406; in 1841, 431.

LANDFALL, a small island in the gulf of Bengal, in the Andaman archipelago, near the N extremity of Great Andaman island, from which it is separated by the Cleugh channel.

LANDFORD, a parish in Wilts, 10 m. SE of Salisbury. Area 1,920 acres. Pop. in 1841, 255.

LANDGROVE, a township of Bennington co., in the state of Vermont, U. S., 98 m. S by W of Montpelier, watered by branches of West river, and intersected by the road across the Green mountains from Manchester to Chester. Pop. in 1840, 344.

LANDICAN, a township in the p. of Woodchurch, Cheshire, 5½ m. N by W of Great Neston. Area 510 acres. Pop. in 1831, 61; in 1841, 67.

LANDION, a small river of France, in the dep. of the Aube, cant. of Vandœuvre, which after running a distance of about 8 m. falls into the Aube.—Also a small river which has its source in the dep. of the Yonne, 11 m. NE of Tonnerre; enters the dep. of the Aube; passes Chesley; and after a course in a generally NW direction of 18 m. joins the Armance on the l. bank, a little below Ervy.

LANDIRAS, a commune of France, in the dep. of the Gironde, cant. of Podensac, 23 m. SSE of Bordeaux. Pop. 2,321. Fairs for cattle, horses, iron-ware, &c., are held here 4 times a-year. The locality affords good wine.

LANDISACQ, a commune of France, in the dep. of the Orne, cant. of Flers, 13 m. N of Domfront. Pop. 1,175. It has several nail manufactories.

LANDISBURG, a village of Perry co., in the state of Pennsylvania, U. S., 29 m. W of Harrisburg. Pop. in 1840, about 400.

LANDISWYL, a commune and village of Switzerland, in the cant of Berne, district of Konolfingen. Pop. 1,021, Protestants.

LANDIVISIAN, a canton, commune, and town of France, in the dep. of Finistere, arrond. of Morlaix. The cant. comprises 7 com. Pop. in 1831, 13,005; in 1841, 14,142.—The town is 13 m. WSW of Morlaix, near the source of the Elorn. Pop. in 1841, 3,217. It has a fine hall, and possesses manufactories of linen and of leather. It has numerous fairs.

LANDIVY, a canton, commune, and town of France, in the dep. and arrond. of Mayenne. The cant. comprises 8 com. Pop. in 1831, 11,944; in 1841, 12,347. The town is 24 m. NW of Mayenne. Pop. 1,911. Fairs for cattle, linen, and yarn are held 5 times a-year.

LANDKEY, a parish in Devonshire, 2½ m. ESE of Barnstaple, on the Taw. Area 2,510 acres. Pop. in 1831, 790; in 1841, 774.

LANDMOTH-WITH-CATTO, a township in the p. of Leek, N. R. of Yorkshire, 4 m. ESE of North Allerton. Area 600 acres. Pop. in 1841, 56.

LANDON, a township in the p. of Kirknewton, Northumberland, 6½ m. NW by W of Wooler, on the Glen. Pop. in 1831, 78; in 1841, 83.

LANDOURA, a town of Hindostan, in the prov. of Delhi, and district of Saharunpur.

LANDOWNY-LA-VILLE, a commune of France, in the dep. of the Aisne, cant. of Aubenton, 7 m. from Vervins. Pop. 1,537. It has extensive manufactories of fine baskets, hats, and damask.

LANDQUART, a mountain-stream of Switzerland, in the cant. of the Grisons, which has its source in the Alps; runs NW; and after a course of 45 m. joins the Rhine, on the r. bank, at Mayenfeld.

LANDRAKE-WITH-ST.-ERNEY, a parish in Cornwall, 4 m. WNW of Saltash, on the Lynher. Area 3,640 acres. Pop. in 1831, 872; in 1841, 812.

LANDRECIES, or LANDRECY, a canton, commune, and town of France, in the dep. of the Nord, arrond. of Avesnes. The cant. comprises 10 com. Pop. in 1831, 14,482; in 1841, 15,559.—The town is 12 m. W of Avesnes, on the Sambre, which here divides into two parts. Pop. in 1841, 4,111. It is strongly fortified, and has a church and a military hospital. It possesses manufactories of oil of cloves, several distilleries of gin, a corn-mill, several bottle-works, extensive bleacheries, &c.; has an active trade in cattle, cheese, butter, hops, lint, and timber, and is a depot for the coal of Charleroi and the slate of Fumay. Fairs are held monthly. This town was repeatedly taken by the Imperialists. In 1659 it was ceded by the treaty of the Pyrenees to France.

LANDRESSE, a commune of France, in the dep. of the Doubs, cant. of Pierre-Fontaine, 9 m. SSE of Baume-les-Dames. Pop. 400.

LANDREVILLE, a commune of France, in the dep. of the Aube, cant. of Essoyes, 7 m. ESE of Bar-sur-Seine, on the r. bank of the Ouse. Pop. 1,369. It produces common wine in large quantities.

LANDRIANO, a district and village of Austrian Lombardy, in the prov. of Pavia. Pop. of district 9,608.—The town is 11 m. NNE of Pavia, on the Lambro. Pop. 1,600.

LANDRICHAMPS, a village of France, in the dep. of the Ardennes, cant. and 3 m. S of Givet. Pop. 153. It has a white-iron and several copper works.

LANDRIESCH, a commune of Belgium, in the prov. of E. Flanders, dep. of Aygem. Pop. 228.

LANDROFF, a commune of France, in the dep. of the Moselle, cant. of Gros-Tenquin. Pop. 1,064.

LANDSBERG, a town of Bavaria, capital of a Landgericht-Bezirk of the same name, in the circle of Upper Bavaria, 35 m. WSW of Munich, on the r. bank of the Lech. Pop. 3,245. It is enclosed by walls; and has an old castle, numerous churches, 4 hospitals, a gymnasium, and a Jesuits' college for noviciates. It possesses several breweries and distilleries, wax-bleacheries, a bell-foundry, a salt-depot, and a brick-work. This town was taken in 1646, and again in 1800, by the French.—Also a town of Prussia, in the prov. of Saxony, regency and 15 m. NNE of Merseburg, circle and 8 m. W of Delitsch, on the Fühne. Pop. 1,002.—Also a town in the prov. of Silesia, regency and 35 m. NE of Oppeln, circle and 11 m. NNE of Rosenberg, on the l. bank of the Prosna. Pop. 1,026. It has a custom-house.—Also a town in the prov. of East Prussia, regency and 30 m. S of Königsberg, circle and 12 m. SW of Preussisch-Eglau, on the Stein. Pop. 1,967. It has an hospital, and possesses manufactories of cloth and hats.

LANDSBERG (ALT), a town of Prussia, in the prov. of Brandenburg, regency of Potsdam, and circle of Nieder-Barnim, 15 m. ENE of Berlin, on a river of the same name. Pop. 1,507. It has a Lutheran church, an hospital for the widows of Protestant ministers, and an orphan's asylum.

LANDSBERG-AN-DER-WERTHE, a town of Prussia, in the prov. of Brandenburg, capital of a circle of the same name, in the regency and 43 m. NE of Frankfort, on the Warthe or Warta, which is here crossed by a handsome bridge. Pop. 11,621, of whom a large proportion are Jews. It is surrounded by well-built walls, and has 5 suburbs, 3 churches, a gymnasium, an orphans' asylum, a house of detention, and a lunatic asylum. It possesses numerous manufactories of cloth and other woollen fabrics, hats, and leather, several paper-mills and extensive breweries, and carries on an extensive trade in grain and wool. In the environs are several lime-kilns and large nursery gardens.

LANDSBERG-WINDISCH, a town of Austria, in Styria, in the circle and 33 m. NW of Marburg, and 25 m. SW of Grätz, on the l. bank of the Lasnitz. Pop. 450. It has a castle, and possesses a manufactory of tin.

LANDSCAUTER, a department and commune of Belgium, in the prov. of East Flanders, arrond. of Gand. Pop. 546.

LANDSCHLACHT, a commune of Switzerland, in the cant. of Thurgau, district of Gottlieben. Pop. 492, chiefly Protestants.

LANDSCRONA. See LANDSKRONA.

LANDSDYK, a commune of Belgium, in the prov. of East Flanders, dep. of Bassevelde. Pop. 449.

LANDSER, or LANZSER, a town of Hungary, in the comitat and 17 m. SW of Oedenburg, 17 m. NW of Güns.

LANDSER, a canton, commune, and town of France, in the dep. of the Upper Rhine, and arrond. of Alt-kirch. The cant. comprises 22 com. Pop. in 1831, 12,973; in 1841, 13,805. The town is 9 m. NE of Alt-kirch. Pop. 611.

LAND-SHIPPING-QUAY, a township in the p. of Martletwy, Pembrokeshire, 5 m. ESE of Haverford-West, at Milford-Haven, near the mouth of the Cleddau. The name is derived from the quay, at which coal and culm are shipped.

LANDSHUT, a town of Bavaria, capital of a landgericht-bezirk, or presidial, of the same name,

in the circle of Lower Bavaria, 36 m. S of Ratisbon, and 42 m. NW of Munich, beautifully situated on the r. bank of the Isar, at an alt. of 1,336 ft. above sea-level. Pop. in 1840, 10,224; in 1845, 9,307. It consists of an old and a new town, and a suburb on an island of the Isar, and is still enclosed by old walls and ditches. It has 4 principal gates, and on a steep eminence to the S is the old fortress of Trausnitz, now used as an observatory. Two broad streets, intersected by numerous smaller ones, form the chief part of the town. The houses are built of brick, and the greater number have gardens. The principal edifices are the churches, the palace named Neue-Bau, the assembly-hall, and the old town-house. St. Martin's church is a handsome structure, and its steeple, which is 454 ft. in height, is one of the loftiest in Germany. There are also several hospitals, a gymnasium, a lyceum, a theological academy, a classical school, a Cistercian abbey, several convents, and a botanic garden, 2 market-places, and a parade. The university of Ingolstadt, which was removed hither in 1800, has been since transferred to Munich. The industry of the place consists chiefly in the manufacture of leather, cloth, hosiery, paper, pasteboard, clocks, and tobacco. It has also several distilleries of brandy, extensive breweries, and a copperwork. The trade consists chiefly in grain, cattle, and wool. This town was taken in 1796, 1800, 1805, and 1809, by the French.—Also a town of Prussia, capital of a circle of the same name, in Silesia, in the regency and 36 m. S of Leignitz, on the Bober, at the confluence of the Zieder, at an alt. of 1,215 ft. above sea-level. Pop. 3,998. It is enclosed by walls and ditches, and has 3 gates and 2 suburbs. It contains 3 churches, 2 Catholic and a Lutheran, a lyceum with a library and museum, a printing establishment, a theatre, and an hospital, and possesses several printing-mills and dye-works, extensive bleacheries and fulling-mills, and several breweries. The trade consists chiefly in linen yarn. This town has suffered much from the ravages of war. In 1760 it was taken and pillaged by the Austrians. Pop. of circle, 31,754.

LANDSHUT, or Lan'zhot, a town of Austria, in Moravia, in the circle and 42 m. SSE of Brünn, and 1½ m. N of the confluence of the Taga and March. Pop. 1,937.

LANDSITZ. See Cseklesz.

LANDSKRON, or Landzkorona, a town of Austria, in Galicia, in the regency of Lemberg, circle and 10 m. ESE of Wadowice, and 24 m. SW of Krakow. Pop. 1,500.

LANDSKRON, or Landskraun, a town of Austria, in Bohemia, in the circle and 39 m. E of Chrudim, on the Sazawa, and on the Austrian N states railway. Pop. 4,816. It is enclosed by a wall, and has 2 suburbs, and possesses extensive manufactories of woollen, linen, and cotton fabrics, the largest bleaching establishment in the kingdom, and several dye-works.

LANDSKRONA, a town and port of Sweden, in the laen and 23 m. NNW of Malmoe, and 18 m. NE of Copenhagen, on a tongue of land, extending into the Sound, in N lat. 55° 52′ 27″, and E long. 12° 50′ 49″. Pop. 3,975. It is well-fortified, and has a citadel, a church, and a large market-place, and several spacious streets. The principal branches of industry are the manufacture of tobacco, starch, soap, leather, gloves, paper, and sugar. The port, which is situated between the mainland and a small island, is safe and commodious, and has a depth of about 20 ft. Its principal exports are corn, fish, pitch, timber, and alum. A fair is held once a-year. This town has been several times taken by the Danes. Its ultimate cession to Sweden took place in 1677.

LANDSKRONE, a mountain of Prussia, in the prov. of Silesia, and regency of Leignitz, circle and 2 m. SW of Gorlitz, on the confines of the kingdom of Saxony. It is conical in form, and has an alt. of 230 toises = 490 yds. above sea-level.

LANDSKRUN, an ancient fortress of France, in the dep. of the Upper Rhine, cant. and 9 m. SW of Huningen, on the Swiss frontier. It was destroyed by the Bavarians in 1813.

LANDSORT, an island of Sweden, in the Baltic, near the S coast of the laen of Stockholm. It has a lighthouse on its S extremity, in N lat. 58° 44′ 28″, E long. 17° 54′.

LANDSTRASS, or Kostainaveza, a town of Austria, in Illyria, in the gov. and 48 m. ESE of Laybach, district and 18 m. ESE of Neustädtl, on an island of the Gurk. Pop. 400. The environs are noted for their chestnuts.

LANDSTUHL, a town of Bavaria, in the circle of the Pfalz, district and 2 m. NE of Deux Ponts, and 42 m. WNW of Spire. Pop. in 1840, 1,907. It contains the ruins of a fortress, the ancient residence of the counts of Sikingen. Potassium is found in the environs.

LANDTUFT, a commune of Belgium, in the prov. of East Flanders, dep. of Eecke. Pop. 826.

LANDUJAN, a commune of France, in the dep. of the Ille-et-Vilaine, cant. and 4 m. N of Montauban, and 9 m. N of Montford-sur-Men. Pop. 1,192.

LANDULPH, or Landilpe, a parish of Cornwall, 2 m. N of Saltash, on the Tamar. Area 1,880 acres. Pop. in 1831, 570; in 1841, 550.

LANDUNVEZ, a commune of France, in the dep. of Finistère, cant. and 4 m. W of Ploudalmezeau, near a rock which has an alt. of 200 ft. above the sea, and which is regarded as the point of division between the Atlantic and the English channel. Pop. 1,555. It contains the ruins of the castle of Châtel, a large quantity of the materials of which have been employed in the structure of the church of St. Louis at Brest, and of the theatre of that town.

LANDUSSE (La), a village of France, in the dep. of the Lot-et-Garonne, cant. and 3 m. W of Castillones. Pop. 1,200.

LANDWADE, a parish in Cambridgeshire, 13 m. ENE of Cambridge. Area 120 acres. Pop. in 1831, 25; in 1841, 29.

LANE, a haerad of Sweden, in the central part of the laen of Goteborg. Uddewalla is its chief place.

LANE, a lake in the parishes of St. Feighan and St. Mary, 1¾ m. SE by E of Castle-Pollard, co. Westmeath. It has an alt. of 312 ft. above sea-level, and covers an area of about 1,103 acres.

LANE OF LAUNE, a river of Kerry, formed by the Lower lake of Killarney, 3 m. W by N of the town of that name, and which, after a course WNW of about 10 m., falls into Castlemaine harbour.

LANEAST, a parish in Cornwall, 6½ m. W of Launceston, on the Inny. Area 2,600 acres. Pop. in 1831, 279; in 1841, 320.

LANE-END with LONGTON, a chapelry and market-town in the p. of Stoke-upon-Trent, Staffordshire, 7 m. N of Stone, and 13 m. N by W of Stafford. Pop. in 1831, 9,608; in 1841, 12,345. The town has risen, within the last 60 years, from an obscure village to a place of considerable importance.

LANEFFE, a commune of Belgium, arrond. of Dinant. Pop. 477. The railway from Sambre near Charleroi, to Vireux on the Meuse, has a branch-line to L. passing through a rich mineral district.

LANEHAM, a parish of Nottinghamshire, 6 m. NE by E of Tuxford, on the Trent. Area 1,840 acres. Pop. in 1831, 347; in 1841, 385.

LANEPAX, a town of France, in the dep. of the Gers, cant. and 8 m. SE of Eauze. Pop. 1,200

Fairs for grain, brandy, wine, and cattle are held here three times a-year.

LANERCOST-ABBEY, a parish in Cumberland, 12 m. ENE of Carlisle, on the N bank of the Irthing, and on the Carlisle and Newcastle railway. Area 36,510 acres. Pop. in 1831, 1,550; in 1841, 1,582. —The p. receives its name from a noble abbey founded here in 1169, the nave of which still forms the parish-church.

LANESBOROUGH, a small market-town in the p. of Rathcline, co. Longford, on the l. bank of the Shannon, 7 m. NE of Roscommon, and 63¼ m. WNW of Dublin. Area 19 acres. Pop. in 1831, 390; in 1841, 303.

LANESBOROUGH, a township of Berkshire co., in the state of Massachusetts, U. S., 135 m. W by N of Boston, on two fine hills drained by the head-branches of Husick and Housatonic rivers. Pop. in 1840, 1,140.

LANESTOSA, or Finestrosa, a town of Spain, in the prov. of Santander, partido and 17 m. S of Laredo. Pop. 400.

LANESVILLE, a village of Harrison co., in the state of Indiana, U. S., 135 m. S of Indianapolis. Pop. in 1840, 375.

LANET, a village of France, in the dep. of the Aude, cant. and 2 m. W of Monthoumet. Pop. 176. It has several tanneries. In the environs is a copper-mine.

LANEY, a small river in co. Cork, which has its source in the Derrynasaggart mountains, and joins the Sullane at Newbridge.

LANEY, a village of Switzerland, in the cant. and 1½ m. SW of Geneva. Pop. 600. It is well-built, and is noted for its manufacture of shawls.

LANFAINS, a commune of France, in the dep. of the Cotes-du-Nord, cant. and 8 m. W of Ploeuc, and 14 m. SSW of St. Brieux. Pop. 2,216.

LANG, a river of Sweden, in Jamtland, an affluent of the Ragunda or Indalstoms.

LANGA, a town of Spain, in New Castile, in the prov. and 27 m. N of Cuenca, partido and 10 m. SW of Huete. Pop. 110.—Also a town in the prov. and 51 m. WSW of Soria, and partido of Burgo-de-Osma, near the Duero, which is here crossed by a bridge. Pop. 680.

LANGADACHE, a village of Turkey in Europe, in Macedonia, in the sanj. and 13 m. E of Salonica, and to the S of Lake Langaza.

LANGADIA, a town of Greece, in the Morea, in the nom. of Gortynius, on a river of the same name, an affluent of the Ladon, 7 m. NNW of Dimitzana, and 20 m. S of Kalavrita.

LANGANNERIE, a hamlet of France, in the dep. of Calvados, cant. of Bretteville-sur-Laize, and com. of Arville. Pop. 223.

LANGAR-WITH-BARNSTONE, a parish in Nottinghamshire, 10½ m. ESE of Nottingham, on the Grantham canal. Area 3,550 acres. Pop. 309.

LANGARA, an island of the N. Pacific, at the N extremity of Queen Charlotte's island, in N lat. 54° 18′, E long. 137° 37′.

LANGARUD, a town of Persia, in the prov. of Ghilan, on a stream of the same name, which flows into the Caspian, and which is about 30 yds. broad at the town. L. contains some well-built brick houses, and is altogether a picturesque town, but is surrounded by unhealthy swamps.

LANGAST, a commune and town of France, in the dep. of the Cotes-du-Nord, cant. of Plenguenast, 9 m. NNE of Loudeac, on the r. bank of the Lié. Pop. 1,458. It has 3 annual fairs.

LANGATTE, a village of France, in the dep. of the Meurthe, cant. and 5 m. WNW of Sarrebourg. Pop. 792. It has a brewery, an oil-mill, and a tile-work. In the environs are extensive lime-quarries.

LANGAY, a range of mountains in Nubia, in the Bedja, to the S of the Dyaab mountains. They were traversed by Burckhardt in 1814.

LANGAZA, or Lengaza, a lake of Turkey in Europe, in Macedonia, in the sanj. and 9 m. W of Salonica. It is 9 m. in length, and about 4 m. in breadth. It receives numerous torrents from the adjacent hills, but has no apparent outlet. The banks are muddy, and the surrounding district, although possessing a fertile soil, exhibits but little cultivation. About 3 m. to the N of the lake is a town of the same name. It is situated in a plain, 9 m. in length from N to S, and 6 m. in breadth, and which is liable to inundation in winter.

LANGBOSE, a village of Prussia, in the prov. of Pomerania, and circle of Koslin, to the E of Stolpe. Pop. 170.

LANGBROEK (Neder), a parish of Holland, in the prov. and SE of Utrecht. Pop. 990.

LANGBU-MTHSO, a lake of Tibet, in the district of Khor, 500 m. NW of Lassa, and to the S of the Langbu-ri mountains.

LANG-CHUAN-HO, a river of China, in the prov. of Yun-nan, which has its source near the centre of the prov.; runs NE; and throws itself into the Kin-cha-keang, on the r. bank, 75 m. NW of Yun-nan, and after a course of about 90 m.

LANG-CHUNG-HEEN, a district and town of China, in the prov. of Sze-chuen, div. of Paou-ting-fu.

LANGBU-RI, a range of mountains in Tibet, in the N part of the prov. of Thsang.

LANGCLIFFE, a township in the p. of Bentham, W. R. of Yorkshire, 1 m. N of Settle, on the E bank of the Ribble. Area 1,890 acres. Pop. in 1841, 664.

LANGDALE, a township in the p. of Orton, Westmoreland, 8½ m. WSW of Kirby-Stephen.

LANGDALE, a parish of New South Wales, in the co. of Cumberland, bounded on the N by Fish river, and on the W by Campbell river.

LANGDALES (Great and Little), a chapelry in the p. of Grasmere, Westmoreland, 5 m. W by N of Ambleside. Pop. in 1831, 314; in 1841, 442.

LANGDON, a township of Sullivan co., in the state of New Hampshire, U. S., 59 m. W by S of Concord, intersected by a branch of Cold river, by which it is bordered on the S. Pop. in 1840, 615.

LANGDON (East), a parish in Kent, 3½ m. NNE of Dover. Area 1,050 acres. Pop. in 1841, 316.

LANGDON (West), a parish in Kent, 3½ m. N of Dover. Area 740 acres. Pop. in 1841, 119.

LANGDON-HILLS, a parish in Essex, 2 m. N of Hordon-on-the-Hill, on the Thames-haven railway. Area 1,850 acres. Pop. in 1841, 288.

LANGDORF, a commune of Switzerland, in the cant. of Thurgau, circle of Frauenfeld. Pop. 533, chiefly Protestants.

LANGDORP, a department and commune of Belgium, in the prov. of Brabant, arrond. of Louvain, watered by the Demer. Pop. of dep. 1,951; of com. 280.

LANG-DZA, a village of Tibet, in the prov. of Wei, on the SE side of the Snowy mountains, to the E of Lake Palte or Yambo, and 100 m. SE of Lasso.

LANGEAC, a canton, commune, and town of France, in the dep. of the Haute-Loire, arrond. of Brioude. The cant. comprises 16 com. Pop. in 1831, 12,374; in 1841, 12,441. The town is 16 m. S of Brioude, on the r. bank of the Allier. Pop. in 1841, 3,231. It has manufactories of lace, and in the environs are extensive coal-mines.

LANGEAIS, a canton, commune, and town of France, in the dep. of the Indre-et-Loire, and arrond. of Chinon. The cant. comprises 11 com. Pop. in

1831, 11,593; in 1841, 12,105. The town is 15 m. NNE of Chinon, and 15 m. WSW of Tours, on the r. bank of the Loire. Pop. in 1841, 3,138. It consists of a single street, but possesses considerable industry. It has extensive manufactories of coarse linen, tiles, and bricks, and carries on an active trade in wine, oil, legumes, timber, tiles, and bricks. The vine, hemp, melons, and haricot beans, are extensively cultivated in the environs. On an adjacent hill, commanding the town, is an old Gothic castle of great extent, built in 992 by Foulques-de-Nera, count of Anjou, and renewed in the 13th cent. under Philip III.

LANGEBOEKEN, a commune of Belgium, in the prov. of E. Flanders, dep. of Somergem. Pop. 614.

LANGEL, a village of Prussia, in the prov. of the Rhine, reg. of Cologne, and circle of Mulheim. Pop. 570.

LANGELAND, in earlier times LAFVIND, an island of Denmark, in the stift of Fyen, and bail. of Svendborg, in the Baltic, between Fyen on the NW, and Laland on the SE; and extending between 54° 44′ 25″ and 55° 09′ 38″ N lat., and between 10° 38′ and 10° 58′ E long. Its length from NNE to SSW is 35 m.; its breadth varies from 1½ m. to 7½ m.; and its total superficies, inclusive of that of the islet of Siöe, amounts to about 110 sq. m. Pop. 17,000, comprising 3,400 families. The coast-line of this island is generally regular in incline on the E, but is deeply indented on the W side. The general elevation of the surface exceeds that of the adjacent islands, yet the only considerable elevation is that of Fakkeberg, in the S part. The principal productions are wheat, potatoes, and flax. A considerable number of cattle are reared; and fishing is actively pursued.—The cap. is Rudkiöving, on the W coast, in the division of Norder-harde. The principal town in the Süderharde is Nyborg.

LANGELEEDE, a commune of Belgium, in the prov. of E. Flanders, dep. of Wachtebeke. Pop. 795.

LANGELMA-WESI, a lake in the S of Russian Finland, and NW part of the prov. of Tavastchus. It is 25 m. in length from NE to SW.

LANGELN, a village of Prussian Saxony, 4 m. N of Wernigerode. Pop. 1,000.

LANGELSHEIM, a town of the duchy of Brunswick, 6 m. NW of Goslar, on the r. bank of the Innerste. It has manufactories of linen and of potash. An argentiferous lead-mine is wrought in the vicinity.

LANGEMARCQ, a department and commune of Belgium, in the dep. of E. Flanders, arrond. of Ypres. Pop. of dep. 6,084; of com. 557. It has some spinning-mills.

LANGEN, a town of Hesse-Darmstadt, 6 m. NNE of Darmstadt. Pop. 2,500.

LANGENALB, a village of Baden, SW of Pforzheim. Pop. 542.

LANGENARGEN, a town of Würtemberg, at the influx of the Argen into the Boden-see. Pop. 993.

LANGENAS, a small island of Denmark, off the W coast of Sleswick, and 2 m. S of Föhr, between the island of Föhr on the N, and that of Pelworm on the S. It is 6 m. in length; and 1½ m. broad.

LANGENAU, a town of Bohemia, in the circle of Bidschow, 3 m. ESE of Hohen-Elbe. Pop. 2,400. It has large manufactures of cambric and gauze.—Also a village of Bohemia, in the circle of Leitmeritz, 12 m. SW of Zittau. Pop. 1,500. It has some glass-works.—Also a village of Prussia, in Silesia, in the circle of Rosenberg. Pop. 277.—Also a long and straggling town of Würtemberg, 10 m. NNE of Ulm. It is 2 m. in length. Pop. 3,600, chiefly consisting of linen-weavers.

LANGENAU (UPPER and LOWER), two villages of Prussia, in Silesia, in the co. of Glatz, 11 m. S of Glatz.

LANGENBERG, a town of Rhenish Prussia, in the reg. of Dusseldorf, 15 m. NE of Dusseldorf. Pop. 2,350. It has manufactories of silk and cutlery.—Also a town of Prussian Westphalia, in the reg. and 45 m. SW of Minden. Pop. 1,850.—Also a town in the principality of Reuss-Lobenstein-Ebersdorf, 4 m. N of Gera. Pop. 800.

LANGENBIELAU, three contiguous villages of Prussia, in the reg. and 32 m. SSW of Breslau. Pop. 9,006, chiefly employed in the cotton manufacture.

LANGENBOGEN, a village of Prussian Saxony, in the reg. and 9 m. NW of Merseburg. Pop. 200.

LANGENBRUCK, a commune of Belgium, in the cant. of Basle, circle of Waldenburg. Pop. 227, chiefly Protestants.

LANGENBRUCKEN, a town of Baden, 7 m. NE of Bruchsal, on the railway between Carlsruhe and Heidelberg. Pop. 1,240. There are mineral springs here.

LANGENBURG, a town of Würtemberg, on the r. bank of the Jaxt, 32 m. W of Anspach. Pop. 908.

LANGENDORF, or LAUCZKA, a small town of Moravia, in the circle and 15 m. NNW of Olmutz. Pop. 1,700.

LANGENDORF, a village of Hanover, on the l. bank of the Elbe, 42 m. ESE of Luneburg.—Also a commune of Switzerland, in the cant. of Soleure, bail. of Soleure-Labern. Pop. 354.

LANGENERRINGEN, a village of Bavaria, in the circle of the Upper Danube. Pop. 900.

LANGENFELD, a town of Lower Austria, 4 m. NNW of Krems. Pop. 1,200.—Also a town of Prussian Saxony, in the reg. and 52 m. WNW of Erfurt.

LANGENHAGEN, a village of Hanover, in the prov. of Calenberg, 6 m. N of Hanover. Pop. 1,150. It has an active trade in cattle and horses.

LANGENHOE, a parish of Essex, 5½ m. SE of Colchester. Area 2,200 acres. Pop. 161.

LANGENHOLZHAUSEN, a village of Lippe-Detmold, 14 m. N of Detmold.

LANGENHORN, a village of Denmark, in the duchy of Sleswick. It is 2 m. long, and the largest village in the country.

LANGENKANDEL, a town of Rhenish Bavaria, 9 m. SSE of Landau. Pop. 3,542.

LANGENLEUBA, a village of Saxony, 9 m. SE of Altenburg. Pop. 1,636.

LANGENLOIS, a town of Prussian Saxony, in the reg. and circle of Erfurt. Pop. 1,049.—Also a town of Lower Austria, in the circle and 6 m. NE of Krems, on the r. bank of the Loire. Pop. 2,120.

LANGENLUNGWIZ, a town of Saxony, in the co. of Schonburg, on the small river Lungwiz. Pop. 1,800.

LANGENMARCK, a commune and town of Belgium, in the prov. of W. Flanders, arrond. and 4 m. NE of Ypres. Pop. 5,796. It has oil-mills, soap-works, and bleaching-grounds.

LANGENSALZA, a town of Prussian Saxony, the chief place of Thuringia, 14 m. W of Erfurt, in N lat. 51° 6′ 59″, situated upon the Salza, which falls into the Unstrut a little below. Pop. 7,610. It has a castle, 2 parish churches, a theatre, a high school, and an agricultural society. It has manufactories of silk, woollen, and cotton; also of gunpowder and starch.

LANGENSCHWALBACH, a town of Nassau, 8 m. NW of Wiesbaden, celebrated for its mineral springs. Pop. 2,000, of whom a considerable number are Jews.

LANGENSCHWARZ, a village of Electoral Hesse, in the prov. and 12 m. N of Fulda. Pop. 750.

LANGENSELBOLD, a village of Electoral Hesse, in the prov. and 6 m. NE of Hanau, on the Gründaubach, an affluent of the Kinzig.

LANGENSTEINBACH, a town of the grand duchy of Baden, in the bail. and 7 m. WNW of Pforzheim. It has extensive mineral baths.

LANGENTHAL, a pleasant town of the Swiss cant. of Berne, 22 m. NE of Berne, on the Langeten. Pop. 2,700.

LANGENWEDDINGEN, a small town of Prussian Saxony, in the gov. of Magdeburg, 4 m. SE of Wanzleben. Pop. 1,200.

LANGENWEITZENDORF, a village in the German principality of Reuss-Schleitz, on the Leube, 5 m. WNW of Greitz. Pop. 1,700.

LANGENZENN, a town of Bavaria, on the river Zenn, 17 m. NE of Anspach. Pop. 1,960, chiefly engaged in the manufacture of silks and hosiery.

LANGER-AAR, a village of Holland, in the prov. of S. Holland, 8 m. E of Leyden.

LANGERBRUGGE, a commune of Belgium, in the prov. of E. Flanders, dep. of Evergem. Pop. 1,007.

LANGERLOO, a commune of Belgium, in the prov. of Limburg, dep. of Genck. Pop. 185.

LANGER-OOGE, a long narrow island, or rather three closely adjoining islands, subject to Hanover, on the NW coast of East Friesland, to the E of the island of Baltrum. It is about 13 m. in circumf., and consists almost entirely of sand. Pop. 100.

LANGERWEHE, a town of Prussia, in the reg. and 15 m. E of Aix-la-Chapelle. Pop. 993.—Also a town of Rhenish Prussia, in the reg. and 13 m. E of Aachen, on the railway to Duren. Pop. 1,296.

LANGESTRAET, a commune of Belgium, in the prov. of Brabant, dep. of Grimbergen. Pop. 263.—Also a commune in the same prov., dep. of Hekelgem. Pop. 335.—Also a com. in the prov. of East Flanders, dep. of Oostwinkel. Pop. 268.—Also a com. in the same prov., dep. of Wichelen. Pop. 250.

LANGEVELD, a commune of Belgium, in the prov. of Brabant, dep. of Uccle. Pop. 317.

LANGEVELDE, a commune of Belgium, in the prov. of E. Flanders, dep. of Zell. Pop. 197.

LANGEWAEDE, a commune of Belgium, in the prov. of W. Flanders, dep. of Merckem. Pop. 135.

LANGESSE, a village of France, in the dep. of Loiret, cant. and 9 m. NNE of Gien. Pop. 320.

LANGESUND, a small seaport of Norway, in the bail. of Bradsberg, on a bay of the same name, in the Skager-rack, 50 m. SSW of Christiania. Pop. 600. Its chief export is ship-timber.

LANGEWIESEN, a village of Germany, in the principality of Schwartzburg-Sondershausen, bail. and 1½ m. NNW of Gehren. Pop. 1,100. It has an active trade in wood.

LANGEZWAAG, a town of Holland, in the prov. of Friesland, 18 m. SE of Leeuwarden. Pop. 6,000.

LANGFAHR, a town of Prussia, in the reg. of Dantzig, 21 m. SE of Neustadt, on the Brentau. Pop. 1,198.

LANGFIELD, a township in the parish of Halifax, W. R. of Yorkshire, 10 m. W by S of Halifax, intersected by the Manchester and Leeds railway. Area 2,620 acres. Pop. in 1831, 2,514; in 1841, 3,284.

LANGFIELD (East or Upper), a parish in co. Tyrone, containing on its W margin the greater part of the town of Drumquin. Area 9,716 acres. Pop. in 1831, 2,856; in 1841, 3,143. Lough Claraghmore lies on the N border.

LANGFIELD (West or Lower), a parish in co. Tyrone, adjacent to the above. Area 23,906 acres. Pop. in 1831, 4,821; in 1841, 5,094. The lakes Bradan, Annagh, Doo, Lee, Cor, and Beach, diversify the interior.

LANGFORD, a parish in Bedford, 2½ m. S of Biggleswade, on the E bank of the Ivel, at the junction of the Ivel navigation. Area 2,100 acres. Pop. in 1831, 726; in 1841, 340.—Also a parish partly in Berks, partly in Oxfordshire, 3 m. NE by N of Lechlade. Area 4,200 acres. Pop. in 1831, 673; in 1841, 707.—Also a parish in Essex, 8½ m. E by N of Chelmsford. Area 1,430 acres. Pop. in 1831, 273; in 1841, 257.—Also a parish in Norfolk, 6 m. SW of Watton, on the river Wissey. Area 1,380 acres. Pop. in 1831, 36; in 1841, 57.—Also a parish in the co. of Nottingham, 3½ m. NNE of Newark. Area 1,430 acres. Pop. in 1831, 125; in 1841, 146.

LANGFORD-BUDVILLE, a parish in Somersetshire, 3 m. NW by W of Wellington. Area 1,500 acres. Pop. in 1831, 608; in 1841, 608.

LANGFORD (Little), a parish in Wilts, 8 m. NW by W of Salisbury. Area 740 acres. Pop. in 1831, 39; in 1841, 37.

LANGFORD (Steeple), a parish in Wilts, 8¼ m. NW by W of Salisbury. Area 1,510 acres. Pop. in 1831, 587; in 1841, 626.

LANGFORDEN, a parish and village of the grand duchy of Oldenburg, 3 m. N of Vechte. Pop. 1,360.

LANGHAM, a parish in Essex, 6½ m. NNE of Colchester. Area 3,100 acres. Pop. in 1831, 821; in 1841, 816.—Also a parish in Rutland, 2 m. NW of Oakham. Area 3,250 acres. Pop. in 1831, 608; in 1841, 591.—Also a parish in Suffolk, 8½ m. NE by E of St. Edmund's Bury. Area 1,720 acres. Pop. in 1831, 264; in 1841, 293.—Also a parish in Norfolk, 6 m. E by S of Wells. Area 1,950 acres. Pop. in 1831, 375; in 1841, 383.

LANGHOLM, a parish and town in Eskdale, Dumfries-shire. Area 15,272 Scottish acres. The larger portion of the area of the p., 30 sq. m., consists chiefly of smooth hills verdant to their summits and parcelled out into sheep-farms. Pop. in 1801, 2,039; in 1831, 2,676; in 1841, 2,820.—The town stands on the Esk, at the confluence with it of the Ewes and the Wauchope, 12 m. from Longtown, and 21 m. from Carlisle, and is embosomed in one of the sweetest landscapes in Scotland. Pop. 2,362. The weaving of serges, checks, and shepherds' plaids, and the manufacture of woollen yarns and hose, though not individually important, aggregately afford considerable employment.

LANG-KAOU, an island of China, in the Fo-keen channel, in the group of the Phang-hu islands. It is easy of access, but is said to be highly insalubrious to foreigners. The inhabitants rear large numbers of sheep.

LANGKAT, a district and river in the N part of the island of Sumatra, in the Riah country. The river descends from the Daholt mountains, and flowing E, falls into the sea under the parallel of 4° 10′.—Pepper is the chief article of export from this district.

LANG-KUNG, a district and town of China, in the prov. of Yun-nan, div. and 36 m. NNW of Tale-fu, in N lat. 26° 8′, E long. 100° 8′, on Lake Siul.

LANG-KWUY, a district and town of China, in the prov. of Yun-nan, and div. of Yun-nan-fu, in N lat. 27° 15′, E long. 101° 10′.

LANGLEE, a village of France, in the dep. of Loiret, cant. and 1 m. N of Montarges. Pop. 420.

LANGLEY, a parish in Essex, 7 m. WSW of Saffron-Walden. Area 5,730 acres. Pop. in 1831, 384; in 1841, 448.—Also a parish in Kent, 4 m. SE of Maidstone. Area 1,610 acres. Pop. in 1831, 244; in 1841, 294.—Also a parish in Norfolk, 9⅓ m. SE of Norwich, on the river Yare. Area 2,430 acres. Pop. in 1831, 361; in 1841, 323.—Also a hamlet in the p. of Claverdon, co. of Warwick, 3 m. SE by E of Henley-in-Arden. Pop. in 1831, 164; in 1841,

179.—Also a tything in the p. of Kington-St.-Michael, Wilts, 2 m. N of Chippenham. Pop. 601.

LANGLEY (Abbot's). See Abbots-Langley.

LANGLEY-BURRELL, a parish in Wilts, 2 m. N by E of Chippenham, on the Avon, and in the line of the Great Western railway. It is included within the parliamentary boundaries of the borough of Chippenham. Area 1,930 acres. Pop. 628.

LANGLEYDALE-AND-SHOTTON, a township in the p. of Staindrop, co.-palatine of Durham, 5 m. N of Barnard-castle, near the source of the river Gaunless. Here are extensive works for the smelting of argentiferous lead ore. Area 4,630 acres. Pop. in 1831, 217; in 1841, 185.

LANGLEY ISLAND, an island in the Arctic ocean, at the mouth of the Mackenzie river, immediately to the N of Halkett island, in N lat. 69°.

LANGLEY (King's). See King's Langley.

LANGLEY (Kirk), with MEYNELL-LANGLEY, a parish in Derbyshire, 4½ m. WNW of Derby. Area 2,900 acres. Pop. in 1831, 553; in 1841, 647.

LANGLEY-MARSH, or St.-Mary's, a parish in Bucks, 3½ m. ENE of Windsor, intersected by the Great Western railway. Area 3,820 acres. Pop. in 1831, 1,797; in 1841, 1,353.

LANGLEY-POINT, a prominence on the coast of Sussex, between Pevensey-bay and Beachy-head. The bight to the SW of this point, it has been suggested, might afford an eligible point for the formation of a harbour of refuge.

LANGLIR, a commune of Belgium, in the prov. of Luxemburg, dep. of Mont-le-Ban.

LANGNAU, a beautiful village of Switzerland, in the cant. and 15 m. E of Berne, on the Ilfis, near its confluence with the Emme. Pop. of p. 5,385, Protestants.—Also a Catholic village, in the cant. of Lucerne, bail. of Willisau. Pop. 1,168.—Also a parish and v. in the cant. of Zurich, circle of Horgen. Pop. 1,197, Protestants.

LANGOAT, a town of France, in the dep. of Cotes-du-Nord, cant. and 4 m. SSW of Treginer, near the l. bank of the Treginer. Pop. 2,140.

LANGOELAN, a village of France, in the dep. of Morbihan, cant. and 3 m. NNW of Guémené. Pop. 1,313.

LANGOEN, one of the Loffoden group, off the NW coast of Norway, in N lat. 69°, E long. 14° 20′. It is 35 m. in length from NE to SW, and nearly 14 m. in greatest breadth. Pop. 900.

LANGOGNE, a canton, commune, and town of France, in the dep. of Lozère, arrond. of Mende.—The cant., comprising 8 coms. had a pop. of 7,012 in 1841.—The commune and town are on the l. bank of the Allier, 4 m. SSW of Pradelles. Pop. 2,803. Some trade is conducted here in cattle, and in coarse woollens.

LANGOIRAN, a village of France, in the dep. of Gironde, cant. and 6 m. NNW of Cadillac, near the r. bank of the Garonne. Pop. 1,542, chiefly engaged in the manufacture of wines.

LANGON, a canton, commune, and town of France, in the dep. of Gironde, arrond. of Bazas.—The cant., comprising 13 coms., had a pop. of 12,689 in 1841.—The town, 27 m. SE of Bordeaux, on the l. bank of the Garonne, had a pop. of 2,597 in 1846. It conducts an active trade in white wines and brandy; and has numerous tanneries and cooperages. It communicates with Saint-Macaire, on the opposite side of the river, by means of a suspension-bridge.—Also a commune in the dep. of Ille-et-Vilaine, cant. and 6 m. NE of Redon. Pop. 1,655.

LANGON (Le), a commune and town of France, in the dep. of Vendée, cant. and 6 m. WSW of Fontenay-le-Comte. Pop. 1,685.

LANGONNET, a commune and town of France, in the dep. of Morbihan, cant. of Gourin, 26 m. WNW of Pontivy. Pop. 3,442 in 1841.

LANGOURLA, a commune and town of France, in the dep. of Cotes-du-Nord, cant. of Collinée, 16 m. ENE of Loudeac. Pop. 1,302.

LANGPORT, a parish and corporate market-town, in the co. of Somerset, 33 m. SW by S of Bath, on the river Parret, which is here crossed by two bridges, one of which is of great antiquity. Area of the p. 660 acres. Pop. in 1831, 1,245; in 1841, 1,172. The church is an ancient structure, in the early style of English architecture.—The town, which stands on an eminence on the N bank of the Parret, near its junction with the Yeo, consists of two good streets, and is divided into two parts called Eastover and Westover. The Parret is navigable thus far, and the trade of L., which is carried on by means of its water-communication with Bridgewater, consists partly in the import of coal, timber, iron, and other articles, and partly in general freight trade from Bristol, London, and Wales.

LANGQUAID, a town of Bavaria, in the circle of the Regen, presidial and 5 m. S of Abensberg, and 18 m. SSW of Ratisbon. Pop. 595. It has two churches, an hospital, several distilleries and breweries, and a brick-work.

LANGRES, or Langers, an arrondissement, canton, commune, and town of France, in the dep. of the Haute-Marne.—The arrond. comprises 10 cant. Pop. in 1831, 98,422; in 1841, 101,393.—The cant. contains 27 com. Pop. in 1831, 14,699; in 1841, 15,917.—The town is 21 m. SSE of Chaumont, and 42 m. NNE of Dijon, in N lat. 47° 51′ 53″, and E long. 5° 19′ 55″. Pop. in 1789, 6,630; in 1821, 8,208; in 1831, 7,460; and in 1841, 8,303. This town, which is one of the most elevated in France, is situated on the summit of a steep mountain, at an alt. of 486 yds. above sea-level, near the l. bank of the Marne, and is surrounded with old walls flanked with towers, and entered by six gates. It is well-built, and contains a fine square, a cathedral remarkable for the beauty and singularity of its architecture, a college, and a town-house. It possesses also a large and a smaller seminary, a school of design, several hospitals, a library, a theatre, and a museum. It is particularly noted for its cutlery, and has also manufactories of earthenware and leather, and several breweries. Its trade, which is considerable, consists chiefly in grain, flour, wine, oil, lint, hemp, cattle, sheep, wool, cheese, spices, hides, millstones, cloth, and linen. L. was the capital of the ancient *Lingones*, and was a town of considerable extent when taken and destroyed by Attila. In 1362 it was fortified by King John, and received considerable augmentations in the reigns of Louis IX. and Francis I. It contains numerous remains of antiquity.

LANGRICK-VILLE, a parochial chapelry and township of Lincolnshire, 22 m. E by S of Lincoln, between the Steeping and Bain. Area 1,630 acres. Pop. in 1831, 202; in 1841, 225.

LANGRIDGE, a parish in Somerset, 3½ m. N of Bath. Area 800 acres. Pop. in 1841, 109.

LANGRIGG AND MEALRIGG, a township in the p. of Broomfield, Cumberland, 7 m. WSW of Wigton, and 2 m. W of the Maryport and Carlisle railway. Pop. in 1831, 269; in 1841, 262.

LANGROIVA, a town of Portugal, in the prov. of Beira, comarca and 15 m. NE of Trancoso, and 28 m. N of Guarda, on the l. bank of the Lamegal. Pop. 704. It has a parish-church and 6 chapels. LANGSTONE, a parish in the co. of Monmouth, 4 m. E by N of Newport. Area 1,000 acres. Pop. in 1831, 194; in 1841, 220.

LANG-TAE-TING, a district and town of China, in the prov. of Kwei-chu, div. of Gan-shun-fu.

LANGTHORNE, a township in the p. of Bedale, N. R. of Yorkshire, 3½ m. NW of Bedale. Area 820 acres. Pop. in 1831, 136; in 1841, 115.

LANGTHORPE, a township in the p. of Kirkby-on-the-Moor, N. R. of Yorkshire, 1 m. NW of Boroughbridge. Area 800 acres. Pop. in 1841, 304.

LANGTOFT, a parish in Lincolnshire, 7 m. ENE of Stamford. Area 2,520 acres. Pop. in 1841, 778.

LANGTON, a township in the p. of Gainford, co.-palatine of Durham, 8 m. E by N of Barnard-castle. Area 1,060 acres. Pop. in 1831, 107; in 1841, 99. —Also a parish and township in the E. R. of Yorkshire, 3 m. SSE of New-Malton. Area 2,480 acres. Pop. in 1831, 341; in 1841, 328.

LANGTON, an islet of South Australia, in Spencer gulf, in Sir Joseph Banks' group.

LANGTON (East), a township in the p. of Church-Langton, Leicestershire, 3½ m. N of Market-Harborough. Area 870 acres. Pop. in 1841, 288.

LANGTON (Great), a parish formed of the united townships of Great and Little L., in the N. R. of Yorkshire, 9 m. ESE of Richmond. Area of the parish 1,860 acres. Pop. in 1831, 230; in 1841, 252.

LANGTON-HERRING, a parish in Dorset, 7½ m. SW by S of Dorchester. Area 1,400 acres. Pop. in 1831, 205; in 1841, 260.

LANGTON-LONG-BLANDFORD, a parish in Dorset, 1½ m. SE of Blandford-Forum, on the E bank of the Stour. Area 1,560 acres. Pop. in 1831, 187; in 1841, 202.

LANGTON-NEAR-HORNCASTLE, a parish in the co. of Lincoln, 16 m. E by S of Lincoln. Area 980 acres. Pop. in 1831, 115; in 1841, 177.

LANGTON-BY-SPILSBY, a parish in the co. of Lincoln, 3 m. N by W of Spilsby, on a branch of the river Steeping. Area 1,590 acres. Pop. in 1831, 230; in 1841, 194.

LANGTON-MATRAVERS, a parish in Dorset, 3 m. SE of Corfe-castle. Area 3,420 acres. Pop. in 1831, 676; in 1841, 762.

LANGTON-NEAR-WRAGBY, a parish in the co. of Lincoln, 11½ m. ENE of Lincoln. Area 2,540 acres. Pop. in 1831, 206; in 1841, 262.

LANGTREE, a parish in Devon, 3½ m. SW of Great Torrington. Area 4,080 acres. Pop. in 1831, 888; in 1841, 941.—Also a township in the p. of Standish, co.-palatine of Lancaster, 4 m. N by W of Wigan, in the line of the Wigan and Preston railway. Pop. 2,565.

LANGUE'BANA, or Longue'bana, a town of Senegambia, in the territory of Sagalia, 90 m. NW of Laby, between the Gambia and Rio-Grande.

LANGUEDOC, an ancient and extensive province in the S of France, extending on the E to the Rhone, and on the W to the Garonne. Its length from E to W was 170 m.; its breadth from N to S in general about 90 m. This large tract of country was divided into three parts: Haut-Languedoc, or Upper or Western L., having Toulouse for its capital; and Bas-Languedoc, or Eastern or Lower L., of which the chief town was Montpelier; and the Cevennes. The designations Upper and Lower, in this instance, have no reference to elevation of surface, Lower L. being by much the more mountainous of the two. At the revolution the whole of L. was distributed into the departments of Gard, Hérault, Ardèche, Lozère, Tarn, Haute-Garonne, and Aude. In point of soil and climate, L. is one of the most favoured regions of France; the fruits of a warm climate, in particular vines, olives, and mulberries, are produced here in profusion, while in situations that admit of irrigation, corn is successfully cultivated. The great articles of sale and export are wine and brandy.—This prov. nearly corresponds to the *Narbonensis Gallia* of the Romans. Towards the fall of the Western empire, it bore the name of *Septimania*. By its present name it began to be known in the 13th cent.

LANGUEUX, a commune of France, in the dep. of Cotes-du-Nord, cant. and 2 m. SE of St. Brieux. Pop. 2,000.

LANGUIDIC, a commune and town of France, in the dep. of Morbihan, cant. and 5 m. ENE of Hennebont. Pop. in 1841, 6,105.

LANGUILLE, a township of St. Francis co., in the state of Arkansas, U. S., 132 m. E by N of Little Rock, on the E side of Languille river. Pop. 195.

LANGUIN, a hamlet of France, in the dep. of the Loire-Inferieure, cant. and 2 m. NW of Nort, and 22 m. SSW of Chateaubriant.

LANGULA, a town of Prussia, in the prov. of Saxony, reg. and 30 m. NW of Erfurt, circle and 4 m. S of Muhlhausen. Pop. 782.

LANGVAND, a mountain in Norway, in the prov. of Nordland, to the E of the Sjonen-fiord.

LANGWARDEN, a parish of the grand-duchy of Oldenburg, circle and 20 m. N of Ovelgönne, bail. and 3 m. NW of Burhave, at the mouth of the Weser. Pop. 1,410.

LANGWART, a town of Bavaria, in the circle of Upper Bavaria, presidial and 11 m. WNW of Pfaffenberg, and 14 m. SSW of Ratisbon, on the Laber. Pop. 494.

LANGWATHBY, a chapelry in the p. of Edenhall, Cumberland, 4¼ m. NE by E of Penrith, on the E bank of the Eden. Area 2,540 acres. Pop. in 1831, 250.

LANGWEDEL, a town of Hanover, in the gov. of Stade, 18 m. ESE of Bremen, near the r. bank of the Weser. Pop. 625.

LANGWITH, a parish in Derbyshire, 5¾ m. N by W of Mansfield. Area 1,600 acres. Pop. in 1831, 165; in 1841, 194.—Also a township in the p. of Cuckney, co. of Nottingham. Pop. in 1841, 443.

LAN-HO, a river of China, which has its source in Charra-Mongolia; runs thence into China Proper; traverses the NE part of the prov. of Chih-le; and, after a course, in a generally SE direction, of 300 m., throws itself into the gulf of that name, 75 m. NE of the embouchure of the Pai-ho.

LANHOSA, a village of Brazil, in the prov. of Goyaz, 66 m. S of Desemboque, and to the SE of Goyaz.

LANHOSO, a town of Portugal, in the prov. of Minho, comarca and 6 m. E of Braga. Pop. 876.

LANHOUARNEAU, a commune of France, in the dep. of Finistere, cant. of Plouescat, 19 m. W of Morlaix. Pop. 1,134.

LANHYDROCK, a parish in Cornwall, 3 m. SE by S of Bodmin, on the Fowey. Area 1,680 acres. Pop. in 1831, 239; in 1841, 263.

LANIER, a village of Macon co., in the state of Georgia, U. S., 76 m. SW of Milledgeville, on the W side of Flint river.

LANIO. See Lagni-Regni.

LANISCAT, a commune of France, in the dep. of the Cotes-du-Nord, cant. and 3 m. ENE of Goaree, and 19 m. WNW of Loudeac. Pop. in 1841, 3,200.

LANIVET, a parish in Cornwall, 2¾ m. SW by S of Bodmin. Area 5,540 acres. Pop. in 1841, 1,149.

LANJAR, or Laujar, a town of Spain, in Andalusia, in the prov. and 18 m. NW of Almeria, and partido of Canjayar, in a valley on the S side of the Sierra Nevada. Pop. 2,980. It has a parish-church, a convent, a school, and a custom-house. Common woollen fabrics and alcohol form its chief articles of manufacture. In the adjacent mountains are mines of antimony.

LANJARON, a town of Spain, in Andalusia, in the prov. and 24 m. SSE of Granada, and partido of Orjiva. Pop. 2,960. It has a parish-church, a public granary, and a custom-house. It is of Arabic origin. In the environs are quarries of marble.

LAN-KE, a district and town of China, in the prov. of Che-keang, div. and 15 m. WNW of Kinwha-fu, in N lat. 29° 16′, E long. 119° 31′. It is built at the foot of a mountain, on the r. bank of the Tsin-tang-keang.

LANKEN, a village of Prussia, in the reg. of Marienwerder, N of Schlochau. Pop. 140.

LANKERAN, a town of Russia in Europe, in the district of Talish, 30 m. N of Astara, on the shore of the Caspian. It is a town of rising importance.

LANKHALSBEKE, a commune of Belgium, in the prov. of E. Flanders, dep. of Saint Nicolas. Pop. 120.

LANKLAER, a department and commune of Belgium, in the prov. of Limburg, arrond. of Tongres. Pop. of dep. 259; of com. 199.

LANKOWITZ, a village of Austria, in Styria, in the circle and 20 m. W of Gratz. It has a castle. Lignite, coal, iron, yellow ochre, and rouge, are found in the environs.

LANKSA, a river of Sumatra, which runs E into the strait of Malacca.

LANLIVERY, a parish in Cornwall, 1¾ m. WSW of Lostwithiel, and W of the Fowey. Area 6,670 acres. Pop. in 1831, 1,687; in 1841, 1,809.

LANLUM, a town of Hindostan, in the prov. of Orissa, district and 84 m. NW of Cuttack, on the r. bank of the Braminy.

LANMEUR, a canton, commune, and town of France, in the dep. of Finistere. The cant. comprises 8 com. Pop. in 1831, 15,790; in 1841, 14,951. The town is 8 m. NE of Morlaix, and 44 m. NE of Brest. Pop. 2,648. It occupies an unhealthy situation, and is both ill-built and ill-kept.

LANNARVILLY, a village of France, in the dep. of Finistere, cant. of Plabennec, 14 m. NNE of Brest. It is noted for its mineral waters.

LANNE, a commune of France, in the dep. of the Basses-Pyrénées, cant. and 2 m. WSW of Aramitz. Pop. 1,401.

LANNEMEZAN, a canton, commune, and town of France, in the dep. of the Hautes-Pyrénées, arrond. of the Bagnères-de-Bigorre. The cant. comprises 27 com. Pop. in 1831, 9,316; in 1841, 10,062. The town is 14 m. ENE of Bagneres-de-Bigorre, near the source of the Gers, and in the midst of a wild tract of country of the same name. Pop. 1,243. It has some trade in cattle, grain, &c.

LANNEPAX, a commune and town of France, in the dep. of the Gers, cant. and 8 m. SE of Eauze. Pop. 1,386.

LANNES (Cape), a headland of South Australia, on the S side of Rivoli bay, in S lat. 37° 36′ 40″, E long. 140° 11′.

LANNILIS, a canton, commune, and town of France, in the dep. of Finistere, and arrond. of Brest. The cant. comprises 5 com. Pop. in 1831, 14,352; in 1841, 14,583. The town is 15 m. N of Brest. Pop. in 1841, 3,124. It has manufactories of pottery, and carries on a considerable trade in grain and cattle.

LANNION, an arrondissement, canton, commune, and town of France, in the dep. of the Cotes-du-Nord. The arrond. comprises an area of 87,712 hect., and contains 7 cant. Pop. in 1831, 103,120; in 1841, 108,749. The cant. comprises 9 com. Pop. in 1831, 16,529; in 1841, 17,053. The town is 12 m. WSW of Treguier, and 39 m. NW of St. Brieux, on the r. bank of the Guer, at the entrance of that river into the English channel. Pop. in 1789, 3,884; in 1821, 3,597; in 1831, 5,371; in 1841, 5,650. It is ill-built, but has a good quay, and carries on a considerable trade in horses, corn, hemp, lint, thread, butter, and wine. In the vicinity are mines of iron and silver.

LANNOY, a canton, commune, and town of France, in the dep. of the Nord, arrond. of Lille. The cant. comprises 16 com. Pop. in 1831, 19,112; in 1841, 21,489. The town is 8 m. ENE of Lille, and 23 m. NNW of Douay. Pop. 1,355. It has several cotton spinning-mills, and manufactories of woollen and cotton fabrics. Flowers are extensively cultivated in the environs. L., which was formerly fortified, was repeatedly taken by the French and their enemies. It has belonged since 1667 to France.

LANO, a town of Chili, in the district of Maule, near the entrance of the Mataquito into the Pacific, 165 m. NNE of New Conception. Its inhabitants are chiefly Indians.

LANOUAILLE, a canton and commune of France, in the dep. of the Dordogne. The cant. comprises 10 com. Pop. in 1831, 12,149; in 1841, 13,002. The v. is 30 m. from Nontron. Pop. 1,225.

LANOUE'E, a commune of France, in the dep. of Morbihan, cant. of Joselin. Pop. 3,052.

LANOWCY, a town of Russia in Europe, in the gov. of Volhynia, district and 32 m. SE of Kremenetz, and 39 m. WSW of Zaslaw. Pop. 780.

LANQUAIS, a commune of France, in the dep. of Dordogne, cant. and 4 m. WSW of Lalinde, near the l. bank of the Dordogne. Pop. 1,055. This village was formerly the chief place of a small district that enjoyed immunity from taxation.

LANQUESAINT, a department and commune of France, in the prov. of Hainault, arrond. of Tournai. Pop. 490.

LANREATH, a parish in Cornwall, 5 m. WNW of West Looe, and E of the Trebant. Area 4,750 acres. Pop. in 1831, 651; in 1841, 651.

LANRIVAIN, a commune of France, in the dep. of the Cotes-du-Nord, cant. of Bothoa, 18 m. from Guingamp. Pop. 1,416. It has a considerable trade in cattle.

LANRODEC, a commune of France, in the dep. of the Cotes-du-Nord, cant. of Plouagat, 7 m. SE of Guingamp. Pop. 1,607.

LANS, a commune of France, in the dep. of the Isère, cant. and 5 m. NE of Villard-de-Lans, and 10 m. SE of Grenoble. Pop. 1,076.

LANSALLOES, a parish in Cornwall, 6 m. WSW of West Looe, on the coast. Area 2,930 acres. Pop in 1831, 884; in 1841, 828.

LANSARGUES, a commune and town of France, in the dep. of the Herault, cant. of Mauguio, 12 m.

ENE of Montpellier. Pop. 1,344. It has a distillery of brandy.

LANSBERG, a mountain of Prussia, in the prov. of Bas-Rhin, 1 m. N of Aix-la-Chapelle.

LANSDOWN, a county on the NE of Western Australia; bounded on the N by Carnarvonshire; on the W by Durham; and on the S by Beaufort.—Also a parish in Van Diemen's Land, in the co. of Monmouth, skirted on the W and S by the Derwent.

LANSDOWN, an elevated tract in Somersetshire, 3 m. NW of Bath. It has an alt. of 813 ft.

LANSERD, a village of Persia, in the prov. of Mazanderan, on the Caspian, 10 m. W of Fehrabad.

LANSEROS, a village of Spain, in the prov. of Valladolid, 3 m. SSW of Carbajal de la Encomienda.

LAN-SHAN, a district and town of China, in the prov. of Hu-nan, div. of Kwei-yang-chu, 216 m. SSW of Chan-sha-fu, on the l. bank of the Hang-keang, in N lat. 25° 30′, E long. 111° 50′.

LAN-SHAN-HEEN, a district and town of China, in the prov. of Shan-tung, div. of E-chu-fu.

LANSINBURG, a township in Rennselaer co., New York, situated on the E bank of Hudson river, 9 m. N of Albany. Pop. 3,330. A considerable trade is carried on here; and at some seasons large sloops ascend the river.

LANSING, a township in the state of New York, U. S., 175 m. W of Albany. Pop. 3,672.

LANSKORUN, a town of Russia, in the gov. of Podolia, 24 m. NW of Kamenetz.

LANS-LE-BOURG, a town of Savoy, 3 m. NW of Mont Cenis, on the r. bank of the Arc, at an alt. of 1,557 yds. above sea-level. Pop. 1,100.

LANTA, or LENTA, a canton and town of France, in the dep. of Haute-Garonne, 9 m. ESE of Toulouse. Pop. of cant. 6,004; of town 1,537.

LANTADILLA, a town of Spain, in the prov. and 24 m. NNE of Palencia, near the Pisuerga. Pop. 890.

LANTAGHUR, a town of Northern Hindostan, in the district of Lamjung, in N lat. 29° 5′, E long. 84° 19′. It is tributary to the rajah of Nepal.

LANTAO. See LINTAO.

LAN-TEEN, a district and town of China, in the prov. of Shen-se, div. and 30 m. SE of Se-gan-fu, in N lat. 34° 5′, E long. 109° 20′.

LANTEGLOS, a parish of Cornwall, 1½ m. WSW of Camelford. Pop., including that of the burgh of Camelford, 1,541.—Also a parish of Cornwall, 2 m. SE of Fowey. Pop. in 1831, 1,208; in 1841, 1,269.

LANTENNE, or LANTERNE, a river of France, in the dep. of Haute-Saone, which flows into the Seine, on the l. bank, after a course of 30 m. It passes Ormoiches and Mersnay.

LANTEUIL, a village of France, in the dep. of La Coreze, 9 m. SSW of Tulle. Pop. 1,050.

LANTEYRA, a town of Spain, in the prov. and 46 m. E of Grenada, on the N flank of the Sierra Nevada. Pop. 1,050.

LANTILLY, a village of France, in the dep. of La Nièvre, cant. and 2 m. ESE of Cortigny.

LANTON, a village of Roxburghshire, 2½ m. W of Jedburgh. Pop. 240.

LANTOSCA, a town of the Sardinian states, in Piedmont, on the Vesubia, 14 m. N of Nice. Pop. 2,240.

LANTRIAC, a village of France, in the dep. of Haute-Loire, cant. of St. Julien-de-Chapteuil. Pop. 1,153.

LAN-TSANG, a name by which the river Maykeang is distinguished in its passage through the Chinese prov. of Yun-nan.

LANTUR. See BANDA.

LANTWIT (LOWER), a parish in the co. of Glamorgan, 1 m. E of Neath. Pop. in 1841, 1,532.

LANTWIT (MAJOR), a parish in the co. of Glamorgan, 4½ m. SW by S of Cowbridge. Pop. in 1831, 1,076; in 1841, 1,027. The church, which is one of the most ancient in Wales, contains some curious old monuments.

LANTWITFAYRDRE (HIGHER and LOWER), a parish in the co. of Glamorgan, 3 m. NE of Llantrissant. Pop. in 1831, 811; in 1841, 2,092.

LANUSEI, a town of Sardinia, 57 m. NNE of Cagliari. Pop. 1,766.

LANVALLAY, a village of France, in the dep. of Cotes-du-Nord, cant. and 1 m. ESE of Dinan. Pop. 1,193.

LANVELLEC, a village of France, in the dep. of Cotes-du-Nord, cant. and 4 m. SE of Plestin. Pop. 1,767.

LANVENEGEN, a village of France, in the dep. of Morbihan, cant. and 3 m. SW of Faouet. Pop. 1,670.

LANVOLLON, a town of France, in the dep. of Cotes-du-Nord, 8 m. SE of Pontrieux. Pop. 1,462.

LAN-YANG, a district and town of China, in the prov. of Ho-nan, div. and 27 m. E of Kae-fung-fu, on the r. bank of the Hoang-ho, in N lat. 34° 54′, E long. 114° 59′.

LANZ, a town of Spain, in the prov. and 4 m. N of Pampeluna. Pop. 383.

LANZA, a small river of the N of Italy, which rises among the Alps, and falls into Lake Maggiore.

LANZAROTE, an island of the Atlantic ocean, in the group of the Canary islands, 9 m. NE of the island of Fuerteventura, from which it is separated by the canal De-Bocagna, 75 m. ENE of Teneriffe, and at a like distance from the shore of the Sahara, in N lat. 29°, and W long. 13° 38′. On the N and W are 5 small and desert but lofty islands, viz. Graciosa from which it is divided by the canal Del-Rio, Santa Clare, Alegranza, Roquete-del-Este, and Roquete-del-occidente. L. is 36 m. in length, from NE to SW, and 15 m. in breadth, comprising a superficies of about 300 sq. m. Pop. 17,500. Towards the centre it rises to the height of about 2,000 ft. above sea-level; and it contains several volcanoes. In its greater extent, however, it possesses but little elevation. It is scantily watered; and except in October and November, when rain generally falls, possesses a cloudless sky. Its principal productions are grain, wine, fruit, legumes, potatoes, barilla, and orchil. Sheep, goats, and in small numbers cattle, are reared on its pastures; and in the sandy tracts camels are not uncommon. The island contains 8 pueblos, has several harbours, and is defended by 4 forts. The chief town is Teguise. Previous to the arrival of the Spaniards this island bore the name of Teteroigotra. The aborigines appeared superior in civilization to the branches of the Guanche tribe, and lived in houses substantially built of stone.

LANZO, a commune and town of the Sardinian states, in Piedmont, on the Stura, 16 m. NW of Turin. It contains a group of 8 villages; and has manufactures of silk, and a considerable trade in butter, as well as in cattle. Pop. 2,335.

LAO, a town of the island of Cuba, 25 m. W of Havannah.

LAODICEA. See LADIK and LATAKIA.

LAOGHAL (LOCH), a sheet of water in the p. of Tongue, Sutherlandshire, about 4 m. long and 1 m. broad. It discharges itself by the Torrisdale.

LAOHAREAH, or ALHOWAREAH, a village of Tunis, 54 m. ENE of Tunis, near the E entrance of the gulf of that name, and 4 m. SW of Cape Bon.

LAON, a town of France, the cap. of the dep. of Aisne, near the river Ardon, in N lat. 49° 33′ 54″, 74 m. NE of Paris. Pop. in 1836, 8,230; in 1846, 8,054. It is enclosed by old walls; and is an ill-

built gloomy town. It is a place of great antiquity, its cathedral having been built in 1115. Before the first revolution L. was the see of a bishop. It contains at present a number of churches and chapels; also two hospitals, extensive barracks, a communal college, a library of 17,000 vols., and a theatre. It has manufactories of linen, stockings, hats, copperas, leather, and nails. The surrounding country is noted for its wine. L. was the scene of very obstinate fighting between the French and Prussians in March 1814.—The arrond. of Laon comprises the 11 cants. of Anizy-le-Chateau, Chauny, Coucy-le-Chateau, Craonne, Crecy-sur-Serre, La-Fere, L., Marle, Neufchatel, Rozy-sur-Serre, and Sissonne; and has an area of 245,580 hect. Pop. in 1831, 161,731; in 1841, 168,554.—The cant., comprising 27 com., had a pop. of 20,615 in 1841.

LAONS, a village of France, in the dep. of Eure-et-Loir, cant. and 4 m. ENE of Brezolles. Pop. 1,020.

LAOR. See Aor.

LAORCA, a village of Austrian Lombardy, in the prov. and 15 m. ENE of Como, on the r. bank of the Cherenzone.

LAOS, a country of India, bounded on the N by China; on the E by Tonquin and Cochin-China; on the S by Cambodia; and on the W by Siam and the Birman empire. It appears to stretch from the 16th to the 22d parallel of N lat.; but its precise boundaries are unknown. Like Cambodia and Siam, its general physical configuration is that of a valley, bounded on the E and W by ranges of mountains. Through this valley runs the great river Maykaung, Mekon, Me-nam-kong, or river of Cambodia, sometimes called the Japanese river. This stream must here be of great magnitude, for it rises in about 34° N lat., in the same parallel with the Irawaddi, and only a little to the S of the springs of the Hoang-ho and Kiang-ku of China. Under 18° N lat. therefore it has already reached 960 geog. or 1,112 British m. As L. is entirely an inland region, we are still less acquainted with it than with the dependent Cochin-Chinese districts situated upon the coast. The level parts yield abundance of rice; tobacco and the sugar cane are cultivated; gum-lac, ivory, and medicinal plants form the principal articles of export-trade. Valuable mines of tin and iron are reported to exist; and gold and silver are obtained in the sands of the rivers. In the province of Laos, which gives name to the whole kingdom, there is a mine which produces rubies and emeralds.—The climate is much the same as all other countries under the same parallel; but, surrounded as it is with high chains of mountains, these in all probability will tend to mitigate the heat.—Bissachere estimates the pop. of this country at 1,400,000 souls. The Laonese are celebrated over the East for their strict honesty. They are lazy and indolent, and much addicted to the study of magic. Marriages are easily contracted, and as easily dissolved. They manufacture silk and cotton fabrics, paper, leather, and gunpowder; and export to Rangoon, jaghery, drugs, dyes, lacquered wares, metals, sapan wood, lac, ivory, and skins. Marini says this country is divided into 7 provinces, but does not give their names. Wusthof mentions three as governed by vassal princes. The cap., called Mohang-Leng, is said to be a large city, enclosed with palisades, upwards of 100 leagues N of Lan-tchang, upon the banks of the Mekon, which here runs over a rocky channel. The Siamese appear to be in possession of the larger portion of the country.

LAOUR, a town of Hindostan, in the prov. of Bengal, district and 45 m. WSW of Silhet, and 120 m. NNE of Dacca. A considerable trade in salt and other articles is here carried on with the Garrows. The Laour hills contain immense beds of limestone, and afford the chief supply of that article to the prov.

LAPA, a small town of Brazil, in the prov. of Santa-Catharina, between the Rio-Itajahi and the town of Lages.—Also a village in the prov. of Minas-Geraes, 9 m. ENE of Sabara.—Also a village in the prov. of Ceara and district of Villade-Imperatriz, in the Serra-Meruoca.—Also a village in the prov. of Goyaz, on the Vermelho, which is here crossed by a bridge.

LAPAK, a small island of the Asiatic archipelago, in the group of the Sulu islands, and SSW of the island of that name, in N lat. 5° 32′, E long. 120° 52′. It is about 6 m. in length, rises to a considerable height, and is covered with wood; and with the adjacent island of Seeasse, from which it is separated by a strait 1½ m. in breadth, forms good shelter from the NE and SW winds.

LAPANOW, a town of Austria, in Galicia, in the circle and 9 m. SSW of Bochnia, and 33 m. WSW of Tarnow, on the l. bank of the Radomka.

LAPCHAS. See Sikkim.

LAPEDONA, a village of the Pontifical states, in the delegation and 6 m. SE of Fermo.

LAPEER, a county in the NE part of the state of Michigan, U. S., comprising an area of 828 sq. m., drained by Flint and Belle river, and Mill creek. The surface is undulating, and the soil fertile. Pop. in 1840, 4,265; in 1850, 7,026. The cap., of the same name, is 61 m. N of Detroit, at the confluence of Flint river and Farmer's creek. Pop. 746.

LAPENTIS, or Lapenty, a commune of France, in the dep. of the Manche, cant. and 5 m. E of St. Hilaire-de-Harcourt. Pop. 1,018.

LAPICZE, a town of Russia in Europe, in the gov. and 54 m. SE of Minsk, district and 24 m. S of Igoumen.

LAPIO, a village of Naples, in the prov. of the Principato-Ultra, district and 14 m. WNW of San-Angelo-de-Lombardi, cant. and 5 m. WNW of Paterno, on a hill. Pop. 2,320.

LAPITO, a village of Turkey in Asia, on the N coast of the island of Cyprus, 9 m. W of Cerina, and 15 m. NW of Nicosia. In the vicinity are the remains of the ancient *Lapethus*.

LAPLAIGNE, a department and commune of Belgium, in the prov. of Hainault, arrond. of Tournai. Pop. 985.

LAPLAND, the most northerly country of Europe, extending from N to S about 500 m., and about 300 m. from W to E, between the parallel of 64° N lat. and the Northern ocean, and between the North cape and the White sea. It consists of three distinct divisions, Russian, Norwegian, and Swedish Lapland. Russian L. comprehends all that part of the country which is situated to the E of the river Tornea; and is subdivided into three districts, one stretching along the N or Arctic coast, another bordering on the White sea, and a third inland adjoining to the lake Enara and the Norwegian frontier. Norwegian L., the smallest division, is a narrow strip along the W and N coast of Norway, and is divided into three portions, named Norland, West Finmark, and East Finmark. Swedish L., which is the largest and most southerly division, occupies the interior part of the country, W of the river Tornea; and is divided into four provinces, namely, Umea L., to the S; Pitea L., in the centre; Lulea L., and Tornea L., towards the N.—L. has been divided by Wahlenberg into five zones, concentric with the gulf of Bothnia, and differing from each other in climate and productions. The first, extending obliquely round the gulf of Bothnia, from N lat. 64° to nearly 69°, and forming a zone generally 80 m. in

breadth, is covered with forests of the spruce and Scotch fir, and named Woody L. The second, higher and colder than the first, extending from lat. 65° to nearly 70°, and generally only 6 or 8 m. in breadth, contains the Scotch fir, and is denominated Subwoody L. The third, higher than any of the preceding, stretches, like the second, from 65° to 70° of N lat., generally about 12 m. in breadth, except to the NE of Enontekis, where it is about 40 m., produces the birch, but no pines, and is distinguished as the Subalpine region. The fourth, immediately behind the third, and nearly of the same breadth, and still higher than any of the preceding, produces only the *Salix glauca*, a species of willow peculiar to very cold climates, and is named the Lower-Alpine region. The fifth, the farthest from the gulf of Bothnia, extending along the N side of L., and varying in breadth according as it is indented by the sea, is the most elevated tract of the whole. The greater part of it being above the line of perpetual congelation, and covered with eternal snows, produces no trees and scarcely any vegetation whatever, except a few hardy plants where the snow has been melted. It is denominated by Wahlenberg the Higher-Alpine region. The whole of Woody L. is so level, that scarcely one of the mountains rises higher than 213 ft. above the neighbouring plains; and in none of the three first zones is the height above the level of the sea considerable. In those lower districts, however, are several mountains considerably elevated: one particularly named Quickjock, in lat. 67°, is 1,140 ft. above the level of the sea. The church of Enontekis is 1,429 ft. above the level of the sea; and thence to the top of the Lapland Alps the ground rises constantly, but so gradually that it is practicable to go in a boat to the lake Kielesjarvi, which is in so elevated a situation that the birch tree is scarcely to be found in its neighbourhood. The Lapland Alps, passing through the S part of the country as high as the lake of Tornea, retain nearly the same elevation through the whole of their extent, and no part is considered to be lower than 2,132 ft. above the level of the sea; but the most elevated mountains occur in the southern parts of Lulea L. One of them, named Sulitelma, which is the highest mountain o Lapland, is 4,903 ft., and at its northern point 6,178 ft. above the level of the sea. This immense glacier is situated in 67° N lat., and 16½° E long. from Greenwich. Another, named Almajalos, a little to the N of Sulitelma, is 5,543 ft. in height; and Tulpajegna, a very extensive glacier, is 4,050 ft. These mountains are more than 2,700 ft. above the line of perpetual congelation, and are the coldest regions of L. Those of Getsetjack, Pernitjack, and Ridatjack, lying to the N of the last-mentioned, are supposed to be little inferior in height; but from the parallel of 68° 20′ N, the alpine range, which continues with little interruption till it terminates at the North cape, on the Frozen ocean, diminishes in height, and, though covered with snow, is free from glaciers. Of the maritime Alps, which occupy the W and N part of L., the principal chain, extending from the insular promontory of Lotfoden, and the W side of the gulf of Alten, contains many mountains which rise above the line of perpetual congelation, and bear glaciers immediately over the sea. The highest of these are the Alps of Linjen, which rise to an elevation of 4,264 ft. The rest of the coast of L. is very rocky; but, excepting the promontory of Kunnen, scarcely contains any high mountains. The promontories of Eastern Finmark do not exceed an elevation of 2,132 ft. above the level of the sea; those on its N coast are only 1,279 ft. in height. "It is extremely interesting," says Baron Von Buch, "to climb great and rapidly ascending heights in these climates. The vegetation with which we are familiar in the valleys, gradually disappears under our feet. The Scotch fir soon leaves us; then the birches become shrivelled; and presently they wholly disappear. Between the bushes of mountain-willows and dwarf birches the innumerable clusters of berry-bearing herbs have room to spread, blae-berries on the dry heights, and mountain-brambles on the marshy ground; but we at last rise above even these; the blae-berries no longer bear fruit, but appear singly with few leaves, and no longer in a bushy form. At last they too disappear, and are soon followed by the mountain-willows. The dwarf birch alone braves the height and the cold; at last it also yields before reaching the limit of perpetual snow; and there is a broad border before reaching this limit, on which, besides mosses, a few plants only subsist with great difficulty. Even the reindeer moss, which vies in the woods with the blae-berry in luxuriance of growth, is very unfrequent on such heights. On the top of the mountains—which is almost a table-land—there is no ice, it is true, nor glaciers; but the snow never leaves these heights; and a few single points and spots above the level are alone clear of snow for a few weeks. Nothing living is any longer to be seen, except perhaps occasionally an eagle in his flight over the mountains from one fiord to another." On Akha-Solki, one of these mountains on the W coast, which is about 3,392 English ft. in height, the following limits of the different productions were accurately marked:

Limit of snow in latitude 70°,	3,514 ft.
of *Betula nana*, or dwarf birch,	2,742
of *Salix myrsinitis*, or whortle-leaved willow.	2,150
Salix lanata, or downy willow, rises above the *Betula nana*, and approaches the perpetual limit of snow.	
of *Vaccinium myrtillus*, or blae-berry,	2,031
of *Betula alba*, or birch tree,	1,579

Geology and minerals.] Of the mineralogical structure of the mountains of L. little accurate information has yet been collected; but the following facts are enumerated by Professor Jameson. The mountains of Norway and L. are principally composed of primitive and transition rocks; flœtz rocks occur very rarely; and alluvial rocks are uncommon. Granite, contrary to the general belief of mineralogists, is a rare rock in Norway and L.; it even occurs but seldom in Sweden, and is to be considered as one of the least frequent of the primitive rocks in Scandinavia. The granite frequently alternates with gneiss. A newer granite sometimes occurs resting on mica slate, as at Forvig; or connected with clay slate and diallage rock, as in the island of Mageroe. Besides the gneiss which is associated with the oldest granite, there is another of newer formation which rests upon mica slate. Gneiss appears to be by far the most frequent and abundant rock in Scandinavia, all the other primitive rocks appearing in some degree subordinate to it. All the magnetic iron-stone of Scandinavia occurs in beds of gneiss, and not in veins, as has often been maintained by mineralogists. The class of transition rocks in Norway contains, besides greywacke, alum slate, clay slate, limestone, and other rocks well known to mineralogists as members of that class,—as granite, which sometimes contains hornblende; syenite, which contains Labrador felspar and numerous crystals of zircon; porphyry, amygdaloid, basalt, and sandstone. The transition limestone of Norway is sometimes granular foliated, like that which occurs in primitive countries, and contains much tremolite.—The country abounds in mines of iron, and furnishes several also of copper. Lead, zinc, and arsenic are not uncommon, and native gold has been found at Svappawara, in Tornea-Lapland; but rich iron ores form the chief treasures of the country, and might assist to introduce cultivation in those desert regions. The ore is found in thick beds in the gneiss, and when the surrounding substance is worn down, appears in many places above the surface like mountains of iron. At Luossovara and Svappawara, on the banks of the Tornea, are beds of the extraordinary thickness of 34 and 38 fath. But even this is still exceeded by the iron hill of Kerunaoara, about 11 m. W of Jukasjerfivi, where the pure ore has been seen to the extent of 800 Paris ft. All this mineral treasure, however, has hitherto been turned to little account, as the ore must be conveyed by a land-carriage of 46 m., in small Laplandish pulkers drawn by reindeer; and furnaces cannot be erected nearer the mines in consequence of the want of wood. The ore itself, though exceeding in richness that of Sweden, is difficultly fusible, and yields an iron which becomes brittle when cold, unless it has been smelted with some of the better sorts of ore from Uto or Dannemora.

Rivers.] The principal rivers of the country are the Tana, which rises in the distant mountains of L., and after running through E. Finmark in a NE direction, empties itself into a bay or sound of the same name, in the North sea; the Alten, which runs through W. Finmark in a NW direction, and empties itself into a bay or sound of the same name, which opens into the ocean; the Pitea, which rises in the Lapland Alps towards the W, about 67° N lat., and running in a SE direction, falls into the sea at Pitea; the Lulea, which proceeds from a long succession of lakes in the Lapland Alps, and running nearly parallel to the Pitea, falls into the sea at Lulea, in 65½° N lat.; the Tornea, which is formed by a number of streams uniting in one channel and running nearly due S through a long course, and falls into the N extremity of the Bothnian gulf at Tornea. Most of the rivers are of small size during winter, but when the snows melt in summer, they swell to an extraordinary height, and frequently inundate large tracts of country.—The lakes of L. are very numerous, and many of them of great extent. The most worthy of notice are those of Virihjaur and Vastinjaur, which may be considered as the centre of the alpine country of L.

Climate.] The climate of L. is singular, especially as it affects vegetation. Temp. is here regulated, not as in other parts of the world, by the lat. of the place, but by its height above the level of the sea, and distance from the gulf of Bothnia. Hence the temp. is remarkably similar through the whole extent of country between the Bothnian gulf and the alpine ridge of mountains, about the parallel of 69°; but in those parts which lie between the Lapland Alps and the Northern ocean, the heat, excepting in some of the valleys, is almost entirely regulated by the latitude In point of temp., therefore, L. may be divided into two regions, —the inland and the maritime. In the former, winter is very severe, and summer very hot; in the latter, the winter is comparatively mild, and the summer cold; the one being influenced by the temp. of the Frozen ocean, and the other screened from its action by the alpine ridge forming a circle round it. The following table furnishes a comparative view of the mean temp. in both regions:

	At Enontekis, in N lat. 68° 30′, and 1,555 ft. above sea-level.	At Mageroe, North cape.
January,	0° 41′	22° 08′
February,	0 55	23 16
March,	11 41	24 71
April,	26 02	30 02
May,	36 56	34 07
June,	49 49	40 14
July,	59 63	46 42
August,	55 89	43 70
September,	41 78	37 62
October,	27 44	32 00
November,	12 20	25 75
December,	1 01	25 74
	26 85	32 13

Though the mean temp. at Enontekis is nearly 6° lower than at the North cape, yet the former place is better calculated for vegetation than the latter, and even brings to maturity certain kinds of corn. The reason is, that the mean temp. during the summer months is much higher at Enontekis than at the Cape; and the power of vegetation is regulated more by the heat of summer than the cold of winter. Sometimes it happens in the Lapland Alps, when a colder summer than usual occurs, that the snow lies during the whole year, and all kinds of vegetables are completely destroyed, except a few lichens, polytricha, and *Peltidea crocea.* The progress of the seasons may gathered from the following observations made in 1797 at Utsjocki, upon the river Tana, in 69° 53′ N lat.

Jan. 21. The sun's half disc seen above the horizon.
May 5. First rain fell.
June 5. The ice disappeared upon the river Tana.
June 28. The lakes were free from ice.
July 15. Night frosts began.
Oct. 18. The rivers froze.
Oct. 25. The lakes froze.
Nov. 3. The ground covered with snow.
Nov. 20. The sun under the horizon.

During the winter solstice, when the sun continues during seven weeks together below the horizon, instead of a clear daylight there is only a twilight of a few hours. It is not so dark, however, but that a person might see to write from 10 o'clock in the forenoon to 1 o'clock in the afternoon; while the superior brightness of the moon and stars at this season, with the aid of the *aurora borealis*, and the reflection of the snow, supply in a great measure the absence of the sun. The cold at this time of the year is frequently so intense as to freeze brandy and spirits of wine. At the summer solstice, the sun is as many weeks continually above the horizon, as it is below it in winter; but his light during the night is paler and less brilliant than during the day. The heat is at this period extremely oppressive, especially in the valleys, and the air is darkened by clouds of troublesome insects, which the natives have no possibility of avoiding except by covering their heads with a cloth, smearing their faces with tar, or involving themselves in the smoke of a fire.

Soil and productions.] The soil of L. is generally sterile. The greater part of the country is covered with rocks, moss, or gravelly plains, or with a kind of turf composed of decayed mosses impregnated with standing water. There are a few tracts of tolerable soil, especially in the more southern districts. —The plants on the W part of L., towards the sea, are analogous to those of Scotland and Iceland; while the most abundant productions of Swedish L. more nearly resemble those of Siberia.—The vegetable productions are not numerous, but are more various than generally imagined. Wahlenberg's edition of the *Flora Lapponica* describes 1,087 species of plants found in L. Of this number only 496 are perfect plants; the remaining 591 are cryptogamous. Of grasses there are 102 species; of algæ, 55; of fungi, 94; of musci, 200; and of lichens, 207. Of trees there are 26 kinds, consisting of the Scotch fir, spruce fir, birch, alder, poplar, mountain-ash, bird-cherry, and 19 species of willows. There are no fruit-trees in the country, but a variety of berries are spontaneously produced, such as black-currants, rasp-berries, craw-berries, juniper-berries, bilberries, and the Norwegian mulberry, which grows upon a creeping plant, and is greatly esteemed as an antiscorbutic. In the gardens towards the S are raised cresses, spinach, onions, leeks, chives, orache, red cabbage, radishes, mustard, currants, barberries, elder-berry, wild-rose, columbines, rose-campion, carnations, sweet-williams, potatoes about the size of poppy-heads, French-beans, broad-beans, and tobacco when carefully managed; but neither white cabbage nor pease come to any perfection; and apples, pears, plums, and cherries, scarcely grow at all, though cultivated with the greatest attention. The most abundant native vegetables are sorrel, which is of great service on account of its antiscorbutic properties; angelica, which is highly relished as an article of food; and the *Lichen rangiferinus*, which furnishes the chief subsistence of the reindeer during winter. Of the indigenous fruits the most delicious is the berry of the *Rubus arcticus*, which is superior in fragrance and flavour to the finest raspberries or strawberries. Except in a few sheltered valleys, and on the banks of the rivers in the S districts, there are no agricultural labourers in L. In some places a plough of a peculiar construction, suited to ground full of large stones, is employed in preparing the field for the seed; but in general the earth is dug by the labourer. The grain which is chiefly sown in L. is barley, or rather *big;* in the lower regions rye is occasionally cultivated; and oats have been raised even in the high level of Enontekis. It is found that grain will not ripen in any district where the mean temp. of the three summer months does not reach 47⅓°. Its progress to maturity is extremely rapid; the corn sown in the end of May is commonly cut down in the end of July; and from the commencement of seed-time to the end of harvest, seldom more than 60 days. The domestic animals of the Laplanders are cows, sheep, dogs, goats, and rein-deer. The cows are fed during winter on hay from the meadows, or on the moss used by the rein-deer. The sheep and goats subsist on similar food; and, notwithstanding the rigour of the climate, are remarkably prolific. The dogs are chiefly kept for collecting the herds of rein-

deer, and are trained to obey the slightest signal from their masters. The rein-deer are the most valuable part of a Laplander's possessions, and the principal object of his attention. Of these useful creatures a wealthy Laplander often possesses 1,000, or more; and a person of the middle class from 300 to 700. Wild rein-deer abound in Norwegian L.; but few are found in Swedish L., except between Granoen and Lycksele. They are considerably larger than the tame deer. Hares are plentiful, and in the winter-season become entirely white. The marten is common in Norwegian L. The glutton and beaver occur. Otters of different kinds, ermines, squirrels, the *Mus lemnus*, a species of marmot peculiar to L., and field-mice in immense numbers are all natives of those high latitudes. Foxes are extremely numerous; wolves, generally of a tawny hue, but sometimes of a whitish colour, are also numerous, and extremely destructive to the tame rein-deer. Bears are also numerous.—Among the birds of L. are the Lapland wood-cock, which has its beak turned up at the end; the Swedish mock-bird, remarkable for the variety of its notes, as well as the beauty of its plumage; the Lapland owl, a very rare bird; a species of magpie; the three-toed woodpecker; and the great dark-coloured wood-cock, with a very long beak, of which the lower half is red. The only birds which remain during winter are partridges, crows, owls, and ptarmigans; but great multitudes resort, in summer, to the lakes and marshes for the purpose of breeding.—The only amphibious animals are common frogs and lizards.—The rivers abound in salmon; and the lakes in pike, perch, trout, eels, and char.

Natives.] The description of the *Finni*, by Ptolemy and Tacitus, is strikingly applicable to the Mountain Laplanders of the present day. They are supposed to have been the people designated by Herodotus, under the epithets *Cynocephali*, *Troglodytes*, and *Pigmies*. They disclaim the appellation of Laplanders, which is understood to be a term of reproach, and to have been given to them by the Swedes. It is deduced by some from the Latin *lippus*, 'blear-eyed;' by others from the Swedish *lappa*, 'a patch,' in reference to their garment. Some interpret the word from the Finnish *lappi*, 'exiles' or 'runaways,' supposing them to have migrated or to have been banished from Finland. The Laplanders, Samoyedes, Esquimaux, and Greenlanders, all found in the same N latitude, appear to have been originally the same people. The Laplanders are supposed to have descended from the White sea towards Norway and Sweden; while the Finns, on the other hand, ascended from Esthonia through Finland. In the N of Norway the Laplanders are called Finns; and the Finns who have penetrated into the country are denominated Quans. Mr. Laing says: "The Asiatic origin of the Scandinavian race, and of that religion of Odin or Asa-Odin which prevailed among them until the 11th cent., is placed beyond a doubt, although the causes and exact period of their migration are matters of conjecture only. It appears, also, undeniable that the original inhabitants, before this migration, were the progenitors of the present Lapland race. Whether any other people inhabited the country at that period seems uncertain. The tales, legends, or traditions, in the Saga, relative to Jetter, who were at once giants and wizards, or demons, would seem to establish that some people, more formidable to the large-sized Asiatics than the diminutive Laplanders, may have existed in the country. Yet witchcraft, or supernatural powers, which to this day are ascribed to the Laplander by the vulgar of the other race, would naturally give rise to the idea of superior size and strength, when the Laplander, driven to the Fjelde and to the extreme north, became out of the range of personal knowledge to the majority of the people, and, consequently, a being for imagination and credulity to enlarge. There is no evidence from remains of tombs, or other objects, that any third race ever inhabited the country. The two are as distinct in physical appearance as the varieties of a species can be; and as, owing to their totally different habits and modes of living, intermarriage is extremely rare, their distinctive characters stand out more contrasted, and less graduated into each other than in other countries—as Scotland—which are peopled by two different races. The affinity between the Norwegian and the German is obvious. The mind, in viewing them, cannot avoid classing them as belonging to one original stock, although unable to point out or express the peculiar points of similarity. By the same instinctive operation which discovers at once what is called blood in horses, or the cast of countenance in families or nations, one is impressed, on seeing the Laplanders, with the conviction that they are a branch of the great Celtic family which seems to have occupied Europe before the emigration of the Gothic people from Asia. The cast of countenance, the colour of the eyes and hair, the structure of the frame, and even the liveliness of gesture, are so similar in the best specimens of the Lapland people to what one meets with in those countries in which there are still remains of the Celtic blood,—as the SW of France, Wales, and the Highlands of Scotland,—that the mind is at once impressed with the conviction that they are of the same breed. Clothe a handsome Lapland girl in the Welsh costume, and place her with a basket on her arm in the market-place of Chester, and the stranger would chuck her under the chin, and ask what she had got to sell, without suspecting that she was not a Cambrian." The conversion of the Laplanders to Christianity cannot be dated much earlier than the middle of the 17th cent.; and it is still so very imperfect as to consist in little more than their receiving baptism, bearing Christian names, and attending on a few festivals of the church. They are not a numerous people; and probably do not exceed 60,000, scattered over an extent of 150,000 sq. m. Even of this number, Baron Von Buch considers that one-sixth part only is composed of real Laplanders, and that the rest are properly Finnish colonists by whose gradual influx the pop. of Swedish L. is said to have doubled, in the course of thirty years. The Laplanders have a swarthy complexion, black short hair, a wide mouth, hollow cheeks, and a chin somewhat long and pointed. Their eyes are generally weak and watery, in consequence, it is supposed, of their smoky habitations, or the driving and glaring snows of winter, which often have the effect of depriving the natives of sight for several days after returning from a hunting excursion. Yet they possess great strength of body, and are capable of undergoing an extraordinary degree of labour. They are not less remarkable for swiftness of foot and bodily agility; and are inured from their infancy to every kind of activity and exertion. The smallest person observed among them by Maupertuis, was a well-proportioned woman, who measured 4 ft. 2 inches and 5 lines; and Högsbröm frequently met with natives of the different provinces, whose height was between 5 and 6 ft. They discover considerable ingenuity in making the various utensils which they possess. Their sledges and canoes are so well put together that not a drop of water is able to penetrate their sides. From the wood of the birch-tree, they form vessels of various capacities, from an ordinary drinking cup, to casks for holding the milk of the rein-deer. From the horns of the rein-deer, they manufacture spoons in a very neat manner, which they stain with figures tolerably well designed. With no other instrument than a knife, they also carve their bowls and spoons with wonderful expertness. The steel of these knives they manufacture for themselves, and ornament in a style of some elegance. They tan their leather with the inner bark of the birch, and by means of fir bark give it a red stain; and they dye their wool with the blood-root or tormentil. The women prepare the skins of foxes, fawns, otters, and other animals for sale, by stripping off the membranous parts, and curing them with fish oil. They also make tinsel wire of different thickness, by drawing it through a machine formed of a rein-deer's skull; and with this wire they embroider coats, gloves, harness, &c., in a very fanciful style. Their thread is made from the tendons of the rein-deer. During winter they carry on some traffic in bartering skins, furs, dried fish, and venison, gloves and short boots, for coarse flannel, cloth, hemp, copper, iron, and various utensils, but particularly for tobacco, brandy, meal, and salt: besides exchanging fish for meal from the Russians on the northern coast. They are wholly destitute of learning, and have no accurate division of time. They use no almanack of their own, but employ a kind of instrument composed of seven small splinters or boards, like the ancient Runic calendar of the Goths.—The Lappish tongue, says Mr. Laing, "is apparently very rich in those inflexions or terminations which denote the different relations of objects. There are ten cases of nouns marking various relations of presence, absence, distance, which in other languages are denoted by distinct words or prepositions. The language appears not to have been altogether reduced to a printable state, by the adoption of proper signs for those sounds which our alphabet cannot express. It has been studied, and grammars of it published, by Leem, and by Professor Rask; but their labours were not intended for the Laplander, but for the continental philologist. In the hundred years from 1728 to 1828, all that has been printed for the use of the Laplander is a catechism, a translation of a few of the Psalms, and the first two chapters of the Gospel of St. Matthew. There appear to be difficulties from the difference of dialects, even among this handful of people, and from their scattered and partly wandering state, which make it impracticable to give them school-instruction in reading, and consequently to convey knowledge to them by the press. The Americans appear to overcome such small impossibilities: they have given the Cherokee instruction, religion, a printed language, and even political newspapers in it. The Europeans have not, to this day, given the Laplander the Scriptures in his language; and if the Bible were translated, it would be useless to him, as they have not taught him reading. His religious instruction at present consists in hearing a sermon in an unknown tongue, which the clerk translates, sentence after sentence, on the spot, into the Lappish."

LAPLEAU, a canton and commune of France, in the dep. of the Correze, and arrond. of Tulle. The cant. comprises 8 com. Pop. in 1831, 6,917; in 1841. 6,980. The v. is 33 m. from Tulle. Pop. 853. Coal is wrought in the environs.

LA-PORTE, a county in the NW part of the state of Indiana, U. S., containing a superficies of 460 sq. m., bordered on the NW by Lake Michigan. The surface, which is undulating, is drained by Kankakee, Little Kankakee, and Gallien rivers, and Trail creek. It contains extensive prairies, and possesses a fertile soil. Pop. in 1840, 8,184; in 1850, 12,169. The cap., which bears the same name, is 145 m. N by W of Indianapolis, in the vicinity of several beautiful lakes.

LAPOS, or Lapus, a river of Transylvania, in the com. of Szolnok, which has its source in the mountain of Varatika, near the confines of Hungary; runs first S, then W, afterwards N and NW; and, after a course of about 45 m., joins the Szamos, on the r. bank, a little to the NE of Erdod-Szada.

LAPOS-BANYA, a village of Transylvania, in the comitat of Szolnok, near the source of the Lapos, 21 m. E of Nagy-Banya. In its vicinity are mines of gold and of arsenic.

LAPOUCHNA, a town of Russia in Europe, in the prov. of Bessarabia, district of Orkhee, 24 m. SW of Kichenau, on a small river of the same name, an affluent of the Pruth. It has several churches and convents.

LAPPAJAERVI, a lake of Russia in Europe, in Finland, in the gov. and 66 m. E of Vasa, and district of Norra-Korsholm. It is 18 m. long, and 8 m. broad.

LAPPIENEN, a village of Prussia, in the reg. of Gumbinnen, NW of Tilsit. Pop. 200.

LAPPOHNEN (Alt and Neu), two villages in Prussia, in the reg. of Gumbinnen, N of Insterburg, containing respectively 53 and 32 inhabitants.

LAPPVESI, a district of Russia in Europe, in the grand-duchy of Finland, in the SW part of the gov. of Viborg.

LAPSTONE HILL, a summit of New South Wales, in the co. of Cook, in the range of the Blue mountains, and 37 m. from Sydney.

LAPTAU, a village of Prussia, in the reg. and N of Königsberg. Pop. 114.

LAPTE, a commune of France, in the dep. of the Haute-Loire, cant. and 6 m. ENE of Yssengeaux, at the source of the Aubeon. Pop. 2,503.

LAPUSNYAK, a district of Transylvania, in the W part of the comitat of Hunyad. It contains a v. of the same name.

LAPUTA, a village of Shelby co., in the state of Kentucky, U. S., 10 m. W of Frankfort, on a small branch of Kentucky river.

LAQUEUILLE, a commune of France, in the dep. of the Puy-de-Dome, and cant. of Rochefort. Pop. 1,137.

LAR, a town of Persia, in Farsistan, capital of the province of Laristan, on an affluent of the Khalatu, 195 m. SE of Shiraz, and 48 m. from the shore of the Persian gulf, in N lat. 27° 21′, E long. 54° 15′. Pop. about 12,000. It is situated in a fertile plain, and was formerly a flourishing place. The houses, about 2,000 in number, are mean-looking, and are everywhere intermingled with the remains of the former city. The principal existing edifices are the governor's palace, a large structure enclosed by embattled walls, flanked with square towers, and the bazaar. L. has extensive manufactories of arms, felt, printed goods, blue, and pottery; and carries on an extensive trade with Shiraz and Gombrun. To the former it sends grain, fire-arms, saltpetre, powder, in exchange from the latter for sugar, sugar-candy, coffee, iron, and Indian goods. From Shiraz it receives chiefly articles of European merchandise. The environs are well-cultivated, and, notwithstanding the scarcity of water, highly productive. The locality has long been noted for its breed of camels. On an adjacent hill are the ruins of an ancient fortress. The town is supplied with water by means of cisterns. L. was formerly capital of an Arab kingdom which extended from the Bahrein islands to the island of Ormus.

LARA, a town of Spain, in Old Castile, in the prov. and 18 m. SSE of Burgos, and partido of Salas-de-los-Infantes, on the Arlanza. Pop. 1,470.

LARACHE. See Araish (El).

LARACOR, a parish of co. Meath, 2 m. SE of Trim. Area 8,335 acres. Pop. in 1831, 2,395; in 1841, 2,682. It is noted as the birth-place of the duke of Wellington.

LARAGH, or Larah, a parish in co. Cavan, 5 m. E of Cavan. Area 17,282 acres. Pop. in 1831, 7,808; in 1841, 8,558.—Also a village in co. Wicklow, 1½ m. E of Glendalough, and 5½ m. NNW of Rathdrum. Laragh mountain, in the vicinity of this v., has an alt. of 1,313 ft. above sea-level.

LARAGHBRYAN, or Maynooth, a parish in co. Kildare. Area 8,040 acres. Pop. in 1841, 2,714.

LARAGNE, a canton, commune, and town of France, in the dep. of the Hautes-Alpes, arrond. of Gap. The cant. comprises 8 com. Pop. in 1831, 4,075; in 1841, 3,852. The town is 23 m. SSW of Gap, on the l. bank of the Bueck. Pop. 859. It has manufactories of common cloth and of linen.

LARAJASSE, a commune of France, in the dep. of the Rhone, cant. of Saint-Symphorien-sur-Coise. Pop. 2,612.

LARAM MOUNTAINS, a range of mountains in Afghanistan, extending a distance of about 60 m. in a NE direction, between the valleys of Rewat and Panjkora.

LARAMIE (Fort), the principal trading-port of the American Fur company, situated on Laramie river, near its junction with the Platte, in about 42° 40′ N lat., 672 m. from Independence in Missouri. It is a quadrangular structure, the walls of which, constructed of sun-dried bricks, enclose about three-fourths of an acre of ground, and are surmounted by watch-towers. On three sides of the coast are various offices and stores; the fourth side is occupied by the main building of the fort, two stories in height. It is surrounded by an extensive uncultivated plain, on which even timber is scarce. The occupants rear cattle and poultry, and have herds of horses and mules.

LARANJEIRAS, a district and town of Brazil, in the prov. of Sergipe. The district is bordered by the Rios Poxim-Mirim, Jacaracica, Salobro, Poxim, and Sergipe; and contains about 3,000 inhabitants, who find their chief employment in trade and agriculture. The town is 18 m. NW of Sergipe, on the l. bank of the Cotindiba, and about 12 m. from the sea. It has a parish-church, an hospital, a college, and a good port, and possesses a considerable trade in sugar, cotton, leather, and legumes.—Also a parish in the prov. of Pernambuco, and comarca of Goyanna.—Also a small Indian village in the prov. of Rio-de-Janeiro, near a point of the same name.—Also an island in the bay of Nitherohi, prov. of Rio-de-Janeiro.—Also a town in the same prov., on a river of the same name, which discharges itself into the bay of Botafogo.—Also a river which has its source in the prov. of Minas-Geraes, and joins the Rio Doce, on the l. bank.

LARANTUCA, a village and port on the E coast of the island of Flores in the Asiatic archipelago, on the Flores strait. The port is defended by a fort built by the Portuguese, and is frequented by vessels which come hither for provisions, which they receive in exchange for powder, shot, common cutlery, bottles, &c.

LARAQUETE, a river of Chili, in the territory

of Araucana, which has its source in the Cuesta-de-Elias, runs WNW, and discharges itself into Arauco bay, 30 m. SW of New Conception, and after a course of about 45 m.

LARAX, a river of France, which has its source in the NE part of the dep. of the Upper Pyrénées, flows through the E part of the dep. of the Gers, and entering that of the Tarne-et-Garonne, joins the Garonne, on the l. bank, to the NW of Castel-Sarrasin, and after a course, in a generally NE direction, of about 75 m.

LARBERT, a parish and village in Stirlingshire, 2 m. NW of Falkirk. Pop. in 1831, 5,526; in 1841, 4,404. It is noted as the birth-place of Bruce, the Abyssinian traveller. Pop. of v. 487.

LARCAT, a village of France, in the dep. of Ariege, cant. of Cabanes, 14 m. S of Foix. Pop. 369. It has extensive iron-mines.

LARCHAMP, a commune of France, in the dep. of Mayenne, cant. and 6 m. NNW of Ernée, and 19 m. WNW of Mayenne. Pop. 2,074.—Also a village in the dep. of the Orne, cant. and 5 m. SSE of Tinchebray, and 8 m. N of Domfront. Pop. 960.

LARCHANT, a village of France, in the dep. of the Seine-et-Marne, cant. of La Chapelle-la-Reine, 11 m. SSW of Fontainebleau. Pop. 542. It was formerly fortified.

LARCHE, a canton, commune, and town of France, in the dep. of the Corrèze and arrond. of Brives. The cant. comprises 9 com. Pop. in 1831, 7,379; in 1841, 7,555. The town is 8 m. WSW of Brives, on the l. bank of the Vezère. Pop. 806.—Also a village in the dep. of the Lower Alps, cant. and 4 m. SE of St. Paul. Pop. 550.

LARCHIN, a group of small islands, in the W part of the gulf of Siam, near the isthmus of Krâ.

LARCOM (Mount), a summit of NE. Australia, near the coast to the NW of Port Curtis, and SSE of Keppel bay.

LARDA, a river of the duchy of Parma, in the district of Borgo-San-Donino, which has its source near Sarbori, and throws itself into the Po, on the r. bank, 8 m. S of Cremona, and after a course, in a generally NNE direction, of 36 m.

LARDERO, a town of Spain, in Old Castile, in the prov. and partido of Logrono, near the Rio Iruega. Pop. 984. It has a parish-church and a custom-house, and possesses some manufactories of linen and of common cloth.

LARDY, a village of France, in the dep. of the Seine-et-Oise, cant. and 5 m. NW of La Ferté Aleps, on the Juine. Pop. 679. It has manufactories of lace and gloves.

LARECAJA, a prov. of Bolivia, in the central part of the intendency of La Paz. It is covered with mountains, several of which rise above snow-line; and is watered by numerous rivers, the principal of which is the Beni. The climate is temperate and salubrious. Fruit of different kinds is successfully cultivated on the slopes of the mountains, and large herds of cattle are pastured on their herbage. The number of the inhabitants of the prov. is estimated at 20,000. Its chief place is Zarata.

LAREDO, a judicial partido and town of Spain, in the prov. of Santander. The partido comprises 20 pueblos. The town is 20 m. ESE of Santander, and 26 m. WNW of Bilboa, on the Atlantic, on the r. bank of the embouchure of the Santona. Pop. 2,980. It is unwalled, but is defended by batteries near the shore. It has 3 parish-churches, a convent, and an hospital; and possesses manufactories of hats and coarse linen. In the vicinity are productive fisheries. The harbour was formerly a good and important one, but it is now choked with sand.—Also a town of Texas, on the NW confines of the district of San Patricio, 110 m. ENE of Cohahuila, on the Rio-Grande-del-Norte.

LAREK, or Larrack, an island of Persia, in the strait of Ormus, a little to the E of the island of Kishm, and SSW of that of Ormus. It is 5 m. in length, and about 3 m. in breadth, but is destitute of water and uninhabited. It affords, however, pasture to large numbers of goats, and has some game.

LAREN, a bailiwick of Holland, in the prov. of Guelderland, NE of Zutphen. Pop. 2,700.—Also a parish in the prov. of North Holland, SE of Naarden. Pop. 1,522.

LARES, a mountain of Spain, in the prov. and 90 m. E of Badajoz, to the SE of La-Puebla-de-Alcocer.

LARGEASSE, a village of France, in the dep. of the Deux Sèvres, cant. and 5 m. ESE of Moncoutant, on the Louine. Pop. 800. It has manufactories of linens and woollens.

LARGENTIERE, an arrondissement, canton, commune, and town of France, in the dep. of the Ardeche.—The arrond. comprises an area of 178,259 hect., and contains 10 cant. Pop. in 1831, 103,478; in 1841, 108,838.—The cant. comprises 14 com. Pop. in 1831, 13,681; in 1841, 14,565. The town is 22 m. SW of Privas, in a picturesque valley on the l. bank of a torrent named Ligne. Pop. in 1789, 2,392; in 1821, 2,250; in 1831, 2,919; and in 1841, 3,088. It has important manufactories of silk, and carries on a considerable trade in raw and manufactured silk, and wool-bearing and horned cattle. In the vicinity are mines of argentiferous lead.

LARGI VALLEY, a valley of the Punjab, about 40 m. in length, and about 10 m. in breadth, separated from the Indus by a prolongation of the Salt range, and intersected by the road from Dera-Ismail-khan to Peshawur. It is destitute of vegetation and uninhabited.

LARGO, a parish in Fifeshire, at the bottom of a bay of the frith of Forth to which it gives name. On its E side, at the distance of about 2 m. from the shore, Largo-law rises to the height of about 910 ft. above the level of the sea. It is of a beautiful conical form, green to the summit, where it is cleft in two, and exhibits a series of basaltic columns. From this hill, a splendid and extensive view of the whole surrounding country, the frith of Forth and its islands, and the opposite shore of the Lothians, is obtained. Pop. in 1831, 2,567; in 1841, 2,751. Of this pop. about 2,000 resided in the villages of Lower Largo, including Temple and Drummochy, situated near the sea, Upper Largo, Lundin-mill, Backmuir of Gilston, and Woodside. The nearest market-towns are Leven and Colinsburgh, each about 3 m. distant.

LARGO, a parish of Van Diemen's Land, in the co. of Monmouth, bounded on the W by the Clyde river, and on the E by the parish of Rutland.

LARGS, a parish in the extreme NW of the Cunningham district of Ayrshire. Area 19,743 acres. Its coast-line is almost parallel with that of Bute, and looks right across to that beautiful island. About one-sixth of the whole area of the p. is arable. At the S extremity of the p. stands the village of Fairley. Pop. of p. in 1831, 2,848; in 1841, 4,044.—The village of L. is beautifully situated on the coast, 8½ m. from Innerkip, and 13½ m. from Saltcoats. Its appearance is neat and cheerful; and the place is a favourite retreat during the summer months, of families from Glasgow, Greenock, and other towns, for ruralizing and sea-bathing. Four or five steamboats touch daily in summer, and one or two daily in winter, on their way between Glasgow and intermediate places on the one side, and Millport, Ardrossan, and Ayr, on the other; and they have access at all

states of the tide, the depth of water almost at the very shore being several faths. A large proportion of the inhabitants depend mainly on rents, perquisites, and profits drawn from summer-visitors; a few are maintained by the fisheries; and a considerable number are employed as weavers for the Glasgow manufacturers.

LARI, a town of Tuscany, in the prov. and 12 m. SE of Pisa. Pop. 1,570.—Also a town of Nigritia, in the state of Kanem, near the NW bank of Lake Chad. Pop. 2,000. Some cloth is manufactured here from cotton which is grown in the vicinity.

LARIAM, a village of France, in the dep. of Haute-Saone, cant. and 4 m. S of Montbozon. Pop. 170.

LARICAXAS. See LARECAJA.

LARIK, a village of Asiatic Turkey, in the pash. of Sivas, 8 m. NNE of Amasieh.

LARINO, a small town of Naples, in the prov. of Sannio, 22 m. NE of Campobasso. It is the see of a bishop.

LARISSA, YENISERI, or YENITCHER, a considerable town of European Turkey, the capital of the pash. of Thessaly, in a beautiful situation on the r. bank of the Salembria, or ancient *Peneus*, 6 m. SE of Ternovo, and 12 hours ENE of Trikala. From a distance it has an imposing appearance; but its interior is mean and irregular, the streets being ill-built, narrow, and dirty, and the houses in many parts wretched. The citadel stands upon a low eminence rising abruptly from the plain, and consists of a large Venetian fortress built upon ancient Cyclopean walls. The town contains 26 mosques, and a Greek church or cathedral. The inhabitants, between 20,000 and 30,000 in number, consist chiefly of Turks, with a mixture of Greeks, Jews, and Negroes. L. is the residence of a Greek archbishop, and of the pasha. The banks of the river are bordered by neat gardens; and on its l. side stands a suburb connected with the town by a well-built bridge. The air of the town is rendered unhealthy by the adjacent marshes; but the surrounding country is productive in corn and cotton.

LARISTAN, a small province in the south of Persia, extending along the N coast of the gulf of Persia; and bounded by the provs. of Fars and Kirman. It has an area of about 16,000 sq. m. It is diversified by ranges of mountains, with plains intervening, among which are Mount Tcharek on the S, the Kor on the E, and Khalatu and Nabent on the W; but is upon the whole the poorest and least productive prov. of the empire. The soil is so impregnated with acrid substances, and so destitute of water, that it is only rendered habitable by the periodical rains, which enable the inhabitants to fill their reservoirs, and to cultivate a quantity of dates and a little wheat and barley. The coast is in the possession of different Arab tribes, who live under their own sheiks, paying only a trifling tribute. Salt, silk, and camels are its chief productions. Its principal towns are Lar and Forg.

LARITA, a small seaport of France, in the dep. of Bouches-du-Rhone, 45 m. ESE of Toulon.

LARKE, a river which rises in the SW part of Suffolk; flows N by Bury-St.-Edmunds; and falls into the Ouse some miles below Ely. It is navigable to Bury-St.-Edmunds.

LARKHALL, a village of Lanarkshire, in the p. of Dalserf, 4 m. SE of Hamilton. It is built on a regular plan, and has a pop. of 1,609, chiefly weavers.

LARKHANA, a fortified town of Sind, in N lat. 27° 30′, 142 m. NW of Hyderabad, and 7 m. W of the Indus, with which it communicates by a canal. Pop. about 10,000. It has a strong citadel, and a well-supplied bazaar.

LARK'S POINT, a cape on the coast of Canada, in the river St. Lawrence, at the mouth of the Saguenay river.

LARLINGFORD, a parish of Norfolkshire, 2 m. NNW of East Harling. Area 1,260 acres. Pop. 205.

LARME (CAPE DE), a promontory on the S coast of Calabria, in N lat. 37° 53′.

LARNAGE, a village of France, in the dep. of La Drôme, cant. and 3 m. N of Tarn. Pop. 500.

LARNE, a sea-lough in co. Antrim. It enters by a comparatively narrow sound on the NE, expands into a fine bay along the boundary of Upper Glenarm, and past the town of Larne on the N, and then stretches taperingly away to its head. Its entire length is 5 m., extreme breadth 1½ m.—Also a seaport town partly in the p. of Inver, but chiefly in that of Larne, co. Antrim, at the head of Lough Larne, 8 m. SSE of Glenarm, and 17½ m. NNE of Belfast. The old town has narrow and crooked thoroughfares. The new town consists principally of one long, airy, well-built, and aggregately neat street. A very considerable amount of manufacture exists in cotton-weaving, sail-cloth-making, bleaching, rope-making, flour-making, and tanning; and the port, which is the safest and easiest of access on the NE coast of Ireland, possessed at one time a comparatively high importance; but, like Carrickfergus, though in a less degree, it has suffered by the rise and rapid progress of the trade of Belfast. In 1835 the exports amounted in estimated value to £66,309; and consisted of linen, corn, meal, flour, provisions, beans, and potatoes.

LARNICA, or LARNECA, a town of Cyprus, the second on the island, and the emporium of its commerce, the bay on which its port, La Scala, is situated forming the best roadstead on the SE coast of Cyprus. It is situated in N lat. 34° 54′ 30″, and about 1 m. from the shore; and consists of an upper and lower town, which present two or three wide streets, and united, contain a pop. of 5,000, of which number 40 families are Franks, and the remainder Greeks and Mahommedans. The Franks consist of French, English, Tuscans, Neapolitans, Venetians, and Ragusans, each of whom have a consul. The houses are mostly built of mud, and extremely mean. The exports are wheat, barley, cotton, silk, wine, and drugs; the imports are rice and sugar from Egypt, cloth, hardware, and colonial produce, from Malta and Smyrna. L. has no good water, but is supplied from a distance by a Turkish aqueduct. The country for several miles E and W of La Scala is uncultivated, marshy, and intersected by lagunes. In the vicinity of L. great quantities of fine vegetables, radishes, cauliflowers, and lettuces are grown; and the cultivation of the mulberry and growth of silk is still considerable.—On an adjacent cape are recognised the ruins of *Citium*, consisting of masses of rubbish, from which medals and fine bricks are frequently dug up.—The gulf of L., about 10 m. across, is protected from the N by Cape Pila, and from the SW by Cape Chiti, and has from 12 to 15 fath. water.

LARNTUKA, or LARRENTUKA, a seaport on the S side of Ende, one of the Molucca islands, with a good harbour, in S lat. 8° 15′.

LAROCHE, a village of Belgium, in the prov. of Luxemburg, on the river Ourthe, 14 m. W of Bastogne. Pop. 1,334.

LA RODA, a town of Spain, in the prov. and 24 m. NW of Albacete. Pop. 4,572.

LAROS, a village of the Turkish pash. of Trebizond, on the coast of the Black sea, 18 m. SW of Gonieh, in N lat. 41° 10′ 30″.

LAROYA, a town of Spain, in the prov. and 32 m. NNE of Almeiria.

LARRABEZUA, a town of Spain, in the prov. and 9 m. E of Bilbao, on an affluent of the Durango. Pop. 850.

LARRAGA, a town of Spain, in the prov. and 12 m. SSW of Pampeluna, near the r. bank of the Arga. Pop. 1,957. It is supposed to occupy the site of the ancient *Tarraga*.

LARRAN, a river of France, in the dep. of Basses-Pyrenees, which rises under the name of the Gambourg; flows past La-Bastide-Clarence, where it assumes the name of the Joyeuse; and joins the Adour, on the l. bank, near Urt, under the name L., after a NNW course of 21 m.

LARRASONNA, a village of Spain, in the prov. and 9 m. NE of Pampeluna, on the r. bank of the Arga. Pop. 250.

LARRAU, a village of France, in the dep. of Basses-Pyrenees, cant. and 8 m. SW of Tardets. Pop. 1,013. It has iron forges.

LARRINZAR, a village of Spain, in the prov. and 9 m. NE of Vitoria.

LARRO, an extensive town of Upper Guinea, 10 m. S by W of Jenna. The inhabitants appear to be in possession of a greater share of the necessaries and comforts of life than their neighbours on the coast; and the surrounding country yields proof of the active and industrious habits of the people, in its open glades, plantations of bananas, and neatly-paled fields of yams and Indian corn.

LARRY (Saint), a village of France, in the dep. of Ariège, cant. and 6 m. W of Castillon. Pop. 1,000.

LARS, a Russian fort on the N flank of the Caucasus, 6 m. NNW of Dariel, near the Terek.

LARTIGNE, a village of France, in the dep. of La Gironde, cant. and 8 m. SSE of Captieux. Pop. 300.

LARTY'S CREEK, a river of Pennsylvania, U. S., which runs into the Susquehanna, 10 m. W of Newbury.

LARUNS, a town of France, dep. of Basses-Pyrenees, on the Gave-d'Ossau, 18 m. SSW of Pau. Pop. 1,650.

LARWIGEN. See Laurwig.

LARY BUNDER. See Lahori-Bunder.

LASCARI, a town of Sicily, in the prov. of Palermo, cant. and 3 m. N of Collesano, on the r. bank of the Pilato.

LASCUARRE, a town of Spain, in the prov. and 48 m. E of Huesca, on the l. bank of the Isavena. Pop. 1,000.

LASGHIRD, a village and small mud fortress of Persia, in the prov. of Khorassan, 26 m. SW of Semnun, situated in a fine basin of rich and well-cultivated land. Its walls are very lofty and solid. A little above half their height is a row of doors opening outwards on a projecting wooden platform; and above that, another row midway between the first row and the summit of the wall. The entrance to the fortress is by a small aperture on the E side; and there are within its circuit about 100 houses built one over the other, and connected by arched passages and flights of steps and ladders, in a very curious manner. The inhabitants support themselves chiefly by gardening, and also raise a little wheat and barley.

LASHOA, a river of Bosnia, which rises 10 m. W of Trawnik, and flows into the Bosna, on the l. bank, 3 m. SE of Zemtsha, after an E course of 32 m.

LASHOM-JAMNAS, a village of Lower Egypt, on the coast of the Mediterranean, 12 m. NW of Damietta.

LASIETTE, a river of North America, which falls into Lake Michigan, between Marguerite and the straits of Michilimackinac.

LASK, or Lasko, a small town of Poland, 17 m. E of Siradia, on the l. bank of the Grabowka. Pop. 2,000.

LASKESTAD, a hamlet in the island of Stegen, on the W coast of Norway, in N lat. 67° 58′. In this remote and dreary spot are some ancient tombs, surmounted with hillocks, and a sort of obelisk 14 ft. in height, with a Runic inscription.

LASOCIN, a town of Poland in the obwodie and 15 m. N of Sandomir. Pop. 500.

LASSA, or Lahassa, a city of Asia, the capital of that extensive region which passes under the name of Great Tibet, in N lat. 29° 30′, E long. 91° 40′. It is described by M. Huc as presenting a very imposing appearance at a distance, in its tall white flat-roofed houses, and the numerous gilded roofs of its temples. It has several good streets, and numerous bazaars. The houses are for the most part several stories in height, and are annually white-washed all over, with the exception of the doors and windows, which are painted red or yellow. It is about 2 leagues in circuit, but at present has neither walls nor ramparts. The principal streets are broad and tolerably clean; but the suburbs are revoltingly filthy. L. is chiefly distinguished as being the residence of the Dalai-Lama, Talé-Lama, or Grand-Lama; and is usually crowded with noble personages from all parts of Asia, who come to present their homage, and to offer presents to this earthly divinity. "The palace of the Talé-Lama," says M. Huc, "merits, in every respect, the celebrity which it enjoys throughout the world. N of the town, at the distance of about a mile, there rises a rugged mountain, of slight elevation and of conical form, which, amid the plain, resembles an islet on the bosom of a lake. This mountain is entitled Buddha-La, *i. e.*, 'Mountain of Buddha,' 'Divine mountain;' and upon this grand pedestal, the work of Nature, the adorers of the Talé-Lama have raised the magnificent palace wherein their living divinity resides in the flesh. This palace is an aggregation of several temples, of various size and decoration; that which occupies the centre is four stories high, and overlooks all the rest; it terminates in a dome, entirely covered with plates of gold, and surrounded with a peristyle, the columns of which are, in like manner, all covered with gold. It is here that the Talé-Lama has set up his abode. From the summit of this lofty sanctuary he can contemplate, at the great solemnities, his innumerable adorers advancing along the plain or prostrate at the foot of the divine mountain. The secondary palaces, grouped round the great temple, serve as residences for numerous lamas, of every order, whose continual occupation it is to serve and do honour to the living Buddha. Two fine avenues of magnificent trees lead from Lha-Ssa to the Buddha-La, and there you always find crowds of foreign pilgrims, telling the beads of their long Buddhist chaplets, and lamas of the court, attired in rich costume, and mounted on horses splendidly caparisoned. Around the Buddha-La there is constant motion; but there is, at the same time, almost uninterrupted silence, religious meditations appearing to occupy all men's minds. In the town itself the aspect of the pop. is quite different; there all is excitement, and noise, and pushing, and competition, every single soul in the place being ardently occupied in the grand business of buying and selling. Commerce and devotion incessantly attracting to Lha-Ssa an infinite number of strangers, render the place a rendezvous of all the Asiatic peoples; so that the streets, always crowded with pilgrims and traders, present a marvellous variety of physiognomies, costumes, and languages. This immense multitude is for the most part transitory; the fixed pop. consists of Tibetians, Pebouns, Katchis, and Chinese." The temporal rule is entirely in the hands of the Chinese, and is administered by a vice-

roy, who resides here. L. conducts an active trade in silk, wool, goats' hair, assafœtida, drugs, and precious stones. The Katchi, says M. Huc, "are the richest merchants at L. All the establishments for the sale of linen, and other goods for personal and other use, belong to them. They are also money-changers, and traffic in gold and silver: hence it is that you almost always find Parsee characters on the Thibetian coinage. Every year, some of their number proceed to Calcutta for commercial operations, they being the only class who are permitted to pass the frontiers to visit the English. On these occasions they are furnished with a passport from the Talé-Lama, and a Thibetian escort accompanies them to the foot of the Himalaya mountains. The goods, however, which they bring from Calcutta, are of very limited extent, consisting merely of ribands, galloons, knives, scissors, and some other articles of cutlery and ironmongery, and a small assortment of cotton goods. The silks and linens in their warehouses, and of which they have a large sale at L., come from Peking by the medium of the caravans; the linen goods, being Russian, come to them much cheaper than they buy them at Calcutta."

LASSACTCHI, a town of Bulgaria, on the r. bank of the Danube, 50 m. NE of Hrishova.

LASSAHN, or Lassan, a small town of Prussian Pomerania, on a lake formed by the Peene, 38 m. SSE of Stralsund. Pop. 1,985.

LASSAM, a considerable trading-village on the N coast of the island of Java, 12 m. E of Rembang, in N lat. 7° 40′, E long. 111° 26′. It has the advantage of a fine navigable river, which runs through the town.

LASSAY, a small town of France, in the dep. of Mayenne, 11 m. NW of Vilaine. Pop. 1,650.

LASSE′, a town of France, in the dep. of Maine-et-Loire, cant. and 3 m. WNW of Noyant. Pop. 720.

LASSEUBE, a small town of France, in the dep. of Basses-Pyrenees, 6 m. E of Oleron. Pop. 3,040.

LASSIGNY, a small town of France, in the dep. of the Oise, 6 m. W of Noyon. Pop. 850.

LASSINGTON, a parish in the co. and 2½ m. NW of Gloucester. Area 560 acres. Pop. in 1831, 60; in 1841, 82.

LASSITI, a range of mountains in the E part of the island of Candia, connected on the W with Mount Psiloriti, and supposed to be the *Dicta* of the ancients.—At their foot, 30 m. SE of Candia, is a small town of the same name.

LASSUR, a town of Hindostan, in the prov. of Candeish, 7 m. NW of Choprah, near the r. bank of the Siuna.

LASSWADE, a parish and village of Edinburghshire, 6 m. SE of Edinburgh. Pop. in 1831, 4,252; in 1841, 5,025. The North Esk, entering at the SW extremity of the p., traverses it in a deep and singularly romantic and sinuous ravine, whose recesses, contractions, angularities, and rapid and circling sinuosities, combine with the remarkably varied surface of its sides to render its scenery equal in mingled picturesqueness and romance to any in Scotland. Many villas and cottages hang on the outskirts of L. and Roslin; and are occupied chiefly as summer-houses by the citizens of Edinburgh. One of the cottages near the village of L. was the residence, during some of the happiest years of his life, of Sir Walter Scott; but the grandest modern structure is Melville-castle, situated, nearly a mile below the village, on the l. margin of the Esk.—Along the Esk, chiefly between Roslin and L., are several paper-mills and bleachfields; at 1½ m. above Roslin is an extensive gunpowder manufactory; and at L. are a paper-mill, a distillery, a candle manufactory, oatmeal and barley mills, an iron and brass foundry, and a manufactory of fine carpets and damasks. The carpet manufactory is peculiarly celebrated. The Persian fabric produced at Kilmarnock is here extended to broad carpets, the weft being shot across by means of a cross-bow; and the carpets are woven in this way in their entire breadth, the pattern being tied in by boys as in the Persian rugs. Great quantities of fruit, vegetables, and daily produce are sent to the market of Edinburgh. Except the NW corner, where primitive rocks rise up in the Pentlands, the whole p. lies upon the various secondary formations summarily called the coal-metals, including sandstone, clays of great variety, a great number of distinct seams of coal, and three strata of limestone. Near Roslin is the scene of a battle, or rather of three battles in one day, fought, on the 24th February, 1303, between the Scotch and the English, conflictingly narrated by the historians of the two nations, but painted by those of Scotland in colours not a little flattering to Scottish bravery. The village of L. is most picturesquely situated on the l. of the North Esk, 6 m. SE of Edinburgh, and 2 m. W of Dalkeith. The v. of Roslin is 3 m. distant. The populous v. of Loanhead stands half-way between L. and Roslin.

LASTA, a mountainous province of Abyssinia, to the E of Begemdir, to which it is usually attached, between the mountains of Samen and Lake Ashanji. Its chief town is Sokota.

LASTAW, a river of North America, which rises in the Rocky mountains, and runs into Clarke's river.

LASTRA, or Lastera, a small town of Tuscany, 6 m. W of Florence, on the l. bank of the Arno. Pop. 1,000.

LASTRA (La), a village of Spain, in the prov. and 60 m. NNW of Palencia. Pop. 120.—Also a village in the prov. of Segovia, partido of Cuellar. Pop. 594.

LASTRES, a town of Spain, in the prov. and 30 m. ENE of Oviedo, near the coast of the gulf of Gascogne, and the embouchure of the Puntal.

LASTRES (Cape), a cape on the N coast of Spain, in the prov. of Asturias, in N lat. 43° 34′ 15″, W long. 5° 16′ 5′.

LASTRUP, a town of the grand-duchy of Oldenburg, 9 m. SW of Kloppenburg. Pop. 2,000.

LASUEN (Point), a cape on the coast of New Albion, in the Pacific ocean, in N lat. 33° 40′.

LASWARI, a town of Hindostan, in the prov. of Delhi, 24 m. E of Alvar, on a stream of the same name. On the 1st of Nov. 1803, a desperate battle was fought here between the British troops under Lord Lake, and the Mahrattas under Dowlut Row Sindiah, in which the latter were totally defeated.

LASZINA, a village of Military Croatia, on the r. bank of the Kulpa, 15 m. E of Carlstadt.

LASZKI-MUROWANE, a town of Galicia, in the circle and 12 m. W of Sambor, on the r. bank of the Strwiaz.

LASZOW, a village of Poland, in the obwodie and 20 m. SSW of Rubieszow, on the l. bank of the Hulywa. Pop. 400.

LATACUNGA, a district of Peru, lying to the S of Quito. The air is cold, from the vicinity of the country to the mountain of Cotopaxi.—Its chief town, of the same name, in S lat. 0° 55′ 14″, 50 m. S of Quito, is a large and well-built place, with straight and broad streets, and houses of stone, arched, and of one story, on account of the frequency of earthquakes. In 1698 the whole town was overturned by an earthquake, and almost all the inhabitants perished. Cloth and baize are manufactured in this city; and great quantities of salt pork are exported to Quito, Guyaquil, and other parts.

LATAK. See Le′.

LATAKIA, or LATACHIA, a seaport of Syria, in the pash. of Beyrut, celebrated during a considerable period of antiquity under the name of *Laodicea*. It stands on the S slope of a spur of the Ansayrii mountains, in N lat. 35° 30′, E long. 35° 48′, about a ½ m. inland; and its narrow picturesque streets are joined by gardens, and its port, to the sea. Walpole estimated the pop. at 7,000 in 1850, of whom 5,000 were Turks, 1,800 Greeks, and 200 Catholics. The houses are of stone, and flat-roofed, with connecting arches crossing the streets, in some parts, to support the walls. The streets have a high raised trottoir on either side, between which is a narrow path for horses.—The port is small, and well-sheltered by a reef on which stands a castle. Its entrance is narrow; but it will hold about 30 vessels from 150 to 300 tons. The chief export is tobacco, of which about 3,000 quintals are annually exported, chiefly to Egypt. It also exports oil, silks, and oranges.—L. was founded B.C. 300, by Seleucus Nicator. It was taken by the Crusaders.

LATCHA, a lake of Russia, in the gov. of Olonetz, 24 m. in length from N to S, and 8 m. in breadth. It receives the Soid; and discharges itself by the Onega into the White sea.

LATCHINGDEN, a parish in Essex, 12½ m. ESE of Chelmsford. Area 4,160 acres. Pop. 372.

LATERA, a town of the Papal states, in the deleg. of Viterbo, 9 m. S of Acquapendente. Pop. 1,050.

LATERZA, a town of Naples, in the prov. of Otranto, 25 m. NW of Taranto. Pop. 3,100.

LATHAM ISLAND, an islet off the E coast of Africa, in S lat. 6° 54′ 2″, E long. 39° 55′ 5″. It is of an oval shape, 1,000 ft. in length, and from 10 to 12 ft. in elevation, and was covered with guano when visited by Captain Owen in 1824.

LATHBURY, a parish in Bucks, 1 m. N of Newport-Pagnell. Area 1,650 acres. Pop. in 1841, 127.

LATHERON, a parish in Caithness, at the S extremity of the shire, extending 27 m. N from the Ord, along the coast; and from 10 to 15 m. broad. Its area has been estimated at 140,000 imperial acres, of which about one-tenth are arable. The surface is partly flat, partly mountainous; and is intersected by several straths or valleys watered by small rivers. The principal rivers are the Dunbeath, Langwell, and Berriedale, all of which have their source at from 12 to 16 m. from the sea. There are three large hills,—Morven, Scaraben, and the Maiden-pap. The coast is bold and rocky, but possesses several harbours. The principal headlands are the Ord, Berriedale-head, and Clythness. The herring, cod, salmon, and lobster fisheries are actively prosecuted on the coast. Pop. in 1801, 3,612; in 1831, 7,020; in 1841, 7,637. The largest village is Lybster, with a pop. of about 400.

LATHOM, a township of Lancashire, 4 m. NE of Ormskirk. Pop. 3,262.

LATILLE′, a commune and town of France, in the dep. of Vienne, 12 m. WNW of Poitiers. Pop. 1,181.

LATIMERS, a hamlet of Buckinghamshire, 3 m. SE of Chesham. Pop., including the hamlets of Waterside and Bottley, 1,054.

LATIMORE, a township in Adams co., Pennsylvania, U. S. Pop. 666.

LATINA, a village of Naples, in the Terra-di-Lavoro, 18 m. NNW of Caserta. Pop. 500.

LATIREQUIQUI, a river of South America, which rises in the NE of the Chaco territory; runs E; and enters the Paraguay, on the r. bank, after a course of 120 m.

LATISANA, a town of Austrian Lombardy, about 3 m. from the mouth of the Tagliamento, and 13 m. WSW of Palma-la-Nuova. Pop. 2,800.

LATORCZA, a river of Hungary, which rises in the Carpathians, in the NE part of the com. of Beregh; runs SW, and joins the Bodrog, on the l. bank, a little above Semplin.

LATOUCHE (POINT), a point of land on the N part of Behring's bay, in N lat. 59° 51′.

LATOUR (CAPE), or POINT BACCARO, a headland on the coast of Nova Scotia, forming the E point of Barrington bay, about midway between Cape Sable and Cape Negro. A lighthouse was erected on this point in 1850, in N lat. 43° 26′ 9″, W long. 65° 28′ 7″.

LATOWICZ, a town of Poland, 37 m. ESE of Warsaw. Pop. 770.

LATRECEY, a village of France, in the dep. of Haute-Marne, cant. and 4 m. SW of Chateau-Villain. Pop. 950.

LATRONICO, a town of Naples, in the prov. of Basilicata, 22 m. SW of Tursi. Pop. 3,500.

LATSCH, a parish and village of Switzerland, in the cant. of Grisons, circle of Albula. Pop. 141, Protestants.

LATTABUND, a mountain-pass in Kunduz, in about N lat. 36° 45′, E long. 69° 35′, leading from Talikhan into Badakshan, on the route from Talikhan to Kila-Afghan. Its summit is level, and from 4 to 5 m. in breadth.

LATTAI, sometimes called BICKERTON'S ISLAND, an island in the S. Pacific, in S lat. 18° 47′ 20″, consisting chiefly of a vast conical mountain, the summit of which has the appearance of having been burnt. The sides are covered with trees, and it is surrounded with a lower border of land, which is fertile, and affords fresh water.

LATTAKU, or LITHAKO (OLD and NEW), two towns of S. Africa, in the Bechuana country. New L. is in S lat. 27° 10′, E long. 24° 30′, about 900 m. NE of Cape Town, near the source of the Kruman or Kuruman; and about 40 m. to the NE of it stands Old L. Each of these towns, in 1820, contained about 4,000 inhabitants, whom Mr. Campbell sometimes calls Butshuanas, and sometimes Matchappees. They appear to be a peaceable and good-humoured race. The men pass the day in idolence, lounging and sleeping in the public squares or enclosures; whilst the women are employed in reaping the corn, or in the various branches of domestic duties. The former, however, tend the cattle, which are sent out to a distance to graze, and are frequently carried off by the Bushmen. On such occasions, the whole male population is summoned to pursue the spoilers, who, if overtaken, are put to death without mercy. On their return from these expeditions, the women and children go out to meet the conquerors, singing and dancing before them till they reach the public square, where a *peetso* or general meeting of the captains takes place, when the chiefs in set speeches relate to the assembly all the circumstances of the contest, and its result.

LATTA-LATTA, an island in the Eastern seas, adjacent to Gilolo, in S lat. 0° 20′, E long. 126° 50′. It is about 25 m. in circumf., and is divided from the island of Tappa by a strait about 1½ m. in length, and in some places not above 40 yds. broad, with good soundings. Between L. and the island of Mandioly is about 8 m. across.

LATTARICO, a town of Naples, in the prov. of Calabria-Citra, district and 15 m. NNW of Cosenza, cant. and 5 m. N of Montalto. Pop. 840. It has 3 churches.

LATTE (LA), a fort of France, in the dep. of the Cotes-du-Nord, cant. and 5 m. N of Matignon, and 20 m. NNW of Dinan.

LATTERAGH, a parish in co. Tipperary, 3 m. S of Toomavara. Area 4,065 acres. Pop. 1,132.

LATTIER (Saint), a commune of France, in the dep. of the Isere, cant. and 8 m. SW of St. Marcellin, on the r. bank of the Isere. Pop. 1,558.

LATTIN, a parish in co. Tipperary, 3 m. E of Emly. Area 2,276 acres. Pop. in 1841, 785.

LATTON, a parish in Wilts, 1½ m. N by W of Cricklade, N of the Thames. Area 1,680 acres. Pop. in 1831, 360; in 1841, 379.

LATTON, or Lacton, a parish in Essex, 16 m. W by N of Chelmsford, SE of the Stort, and on the London and Cambridge railway. Area 1,380 acres. Pop. in 1831, 319; in 1841, 303.

LATYCZEW, Letitschev, or Letyczew, a district and town of Russia in Europe, in the NW part of the gov. of Podolia. The district, which is watered by the Bug, is fertile, and affords excellent pasturage.

LATZKOE', a village of Russia in Europe, in the gov. of Yaroslav, district and 18 m. SW of Mologa. It has several weaving-mills.

LAUBACH, a town of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, bail. and 8 m. NW of Hungen, and 17 m. ESE of Giessen, on the Wetter, near its source. Pop. 2,032. It has a castle, containing a magnificent library, and an orphan's asylum. Fustian is its only article of manufacture.—Also a railway station in Upper Austria, between Linz and Gmunden.

LAUBAN, or Luban, a circle and town of Prussia, in the prov. of Silesia, and reg. of Liegnitz. The circle contains 42,566 inhabitants. The town is 43 m. WSW of Liegnitz, on the Queis. Pop. 5,850. It is enclosed by walls, and has a suburb, 4 churches, a lyceum, a gymnasium, an orphan's asylum, and 2 hospitals. It possesses extensive manufactories of linen and woollen fabrics, and of tobacco, several bleacheries and printing-mills, and tanneries.

LAUBEN, a village of Bavaria, in the circle of Swabia, presidial and 9 m. NNW of Ottobeuren, and 36 m. SW of Augsburg, on the l. bank of the Gunz. Pop. 350. It has manufactories of tin-ware.

LAUBENDORF, a village of Bohemia, in the circle and 31 m. SE of Chrudim.

LAUBENHEIM, a village of the grand duchy of Hesse-Darmstadt, in the circle of the Lower Rhine, on the Rhine. Pop. 750. Agriculture forms the chief branch of local industry.

LAUBHEIM, a town of Wurtemberg, in the circle of the Danube, bail. and 11 m. SSW of Willingen. Pop. 3,100.

LAUBIES (Les), a village of France, in the dep. of the Lozère, cant. of St. Amans, 14 m. N of Mende. Pop. 760. It is noted for its manufacture of serge.

LAUBRIE'RE, a village of France, in the dep. of the Mayenne, cant. and 8 m. W of Cossé-le-Vivien. Pop. 430.

LAUCH, a river of France, in the dep. of the Upper-Rhine, which has its source in the Vosges, at the extremity of the valley of Lautenbach, passes Guebwiller, and joins the Ill, on the l. bank, after a course in a generally E direction of 33 m.

LAUCHA, a town of Prussia, in the prov. of Saxony, regency and 17 m. WSW of Merseburg, circle and 11 m. SSE of Querfurt, on the l. bank of the Unstrut. Pop. 1,670.—Also a village of the duchy of Saxe-Coburg-Gotha, chief place of a patrimonial jurisdiction, in the principality and 8 m. W of Gotha. Pop. 350.

LAUCHAMMER, a village of Prussia, in the prov. of Saxony, in the regency and 78 m. E of Merseburg, circle and 20 m. ESE of Ziebenwerda. Pop. 600. It has a castle. It has an iron-work and several founderies, and a manufactory of cloth.

LAUCHART, a river which has its source in the kingdom of Wurtemberg, to the SW of Pfullingen; flows thence into the principality of Hohenzollern-Sigmaringen; and after a course of about 45 m. joins the Danube, on the l. bank, below Sigmaringen.

LAUCHHEIM, a town of Wurtemberg, in the circle of the Jaxt, bail. and 9 m. SSE of Ellwangen, on the Jaxt. Pop. 873, chiefly Catholics and Jews.

LAUCHRINGEN (Ober and Unter), two villages of Baden, on the Wutach, NE of Waldshut, containing respectively 471 and 227 inhabitants.

LAUCHRODEN, a village of the grand duchy of Saxe-Weimar, in the principality and W of Eisenach, on the Werra. Pop. 673. It contains the ruins of a castle.

LAUCHSTADT, a town of Prussia, in the prov. of Saxony, in the regency and circle and 6 m. WNW of Merseburg, and 9 m. SSW of Halle. Pop. 860. It has a castle, and there are mineral baths in the vicinity.

LAUCK, a village of Prussia, in the prov. of Königsberg, S of Braunsberg. Pop. 270. It has a castle.

LAUCZKA, See Langendorf.

LAUDA, a town of the grand duchy of Baden, in the circle of Lower Rhine, bail. of Gerlachsheim, 12 m. SSE of Wertheim, on the l. bank of the Tauber. Pop. 1,077. It has extensive breweries. The environs produce good wine.

LAUDENBACH, a town of Wurtemberg, in the circle of the Jaxt, bail. and 9 m. ESE of Mergentheim, and 39 m. NNW of Ellwangen, on the Worbach. Pop. in 1840. 5,062. It has a castle.

LAUDENBACH (Ober and Unter), two villages of the grand duchy of Baden, in the circle of the Lower Rhine, bail. of Weinham, on the confines of the Odenwald. Pop. 1,724.

LAUDER, a parish consisting of a large main body and a small detached section, in the district of Lauderdale, Berwickshire. The area of the whole parish is about 58 sq. m. It is intersected by Leader-water, Whaplaw-burn, Earnscleuch-water, and Blythe-water. About one-third of the entire area is arable. The uplands are for the most part excellent sheep-walks, and maintain numerous flocks of Cheviots, and a few of the black-faced breed. The p. is traversed down the vale of the Leader by the eastern mail-road between Edinburgh and London. Pop. in 1831, 2,063; in 1841, 2,198.—The ancient town and royal burgh of L. runs along the turnpike between Edinburgh and Kelso, parallel with the river Leader, at the distance of nearly half-a-mile from that stream; and is distant 12 m. from Greenlaw, and 25 m. from Edinburgh. It is a place of no trade but what is strictly local. Pop. in 1841, 1,148; in 1851, 1,105. It unites with the Haddington district of burghs in the election of a member of parl. Constituency in 1832, 34; in 1848, 55.

LAUDERDALE, a county in the NW part of the state of Alabama, U. S., comprising an area of 672 sq. m., bordered on the S by Tennessee river, and watered also by Blackwater, Shoal, Cypress, and Second creeks. The surface is hilly, but the soil is very fertile. Pop. in 1840, 14,485; in 1850, 20,888. Its cap. is Florence.—Also a co. in the E part of the state of Mississippi, containing a superficies of 700 sq. m., drained by Oktibbeha river and its branches. Pop. in 1840, 5,358; in 1850. 20,888. Its capital is Marion.—Also a co. in the W part of the state of Tennessee, containing a surface of 375 sq. m., bordered on the W by the Mississippi, and watered also by Forked Deer and Big Hatchee rivers and Coal creek. Pop. in 1840, 3,435; in 1850, 5,175. Its cap. is Ripley.

LAUDUN, a commune and town of France, in the dep. of the Gard, cant. and 8 m. W of Roquemaure, and 14 m. NE of Uzès, on the l. bank of the

Tava. Pop. in 1841, 2,226. The locality produces good wine.

LAUDUNI, a town of Naples, in the prov. of the Terra-di-Lavoro, cant. and 4 m. SE of Piedimonte.

LAUENAU, a bailiwick and town of Hanover, in the principality of Kalenberg. Pop. of bail. 3,986. The town is on the Caspau, near the Deisterberg, 12 m. N of Hameln, and 18 m. SW of Hanover. Pop. 660.

LAUENBURG, a duchy in the N of Germany, on the r. bank of the Elbe, adjacent to Hamburg, included since 1815 in the dominions of Denmark, of which it forms the S extremity. It lies between the parallels of 52° 21′ and 53° 48′ N; and is bounded on the N by Lubeck; on the E by Mecklenburg-Schwerin; on the S by the Elbe; and on the W by Holstein. Area 425 sq. m. It forms an undulating plain, with few hills, and has a soil which is partly sandy and covered with heath, partly rich and well-cultivated. Besides the Elbe, it is watered by the Stecknitz and the Trave; and there are two lakes on its E border, those of Schall and Ratzeburg. The most extensive forest is the Sachsenwald. The pop. in 1840 was 45,342; in 1845, 46,486. The occupations of the inhabitants are almost solely agricultural; they have however a carrying trade in timber between the Elbe and the Baltic, by the Stecknitz canal.—The duchy of L. was governed formerly by a duke of its own, but on the extinction of the family in 1689 its possessions went to the house of Hanover. These consisted at that period both of the prov. already described and of a tract on the l. bank of the Elbe. In 1815 the latter was united with Luneburg; the rest of the duchy was ceded to Prussia, but soon after made over to Denmark.

Lauenburg, the capital of the above-mentioned duchy, situated on a rising ground between the Elbe and the Stecknitz, 27 m. SE of Hamburg. Pop. 1,200. It carries on a considerable traffic. There is here a toll on the Elbe which produces an annual revenue of between £7,000 and £8,000 sterling. A railway between L. and Buchen, and from Buchen to Lubeck, where it joins the Berlin and Hamburg railway, was opened on 15th October 1851.

LAUENBURG, a circle and town of Prussia, in the prov. of Pomerania, and regency of Köslin. The circle contains 26,540 inhabitants. The town is 73 m. ENE of Köslin, and 41 m. WNW of Danzig, on the Leba. Pop. 3,810. It contains a castle, a Lutheran and 2 Catholic churches; and has manufactories of woollen and linen fabrics, hats, and sealing-wax, and tanneries, and several brick-works.

LAUENEN, a village of Switzerland, in the cant. of Berne, bail. of Saanen. Pop. 696.

LAUENFORDE, a town of Hanover, in the gov. of Hildesheim, cap. of a bailiwick, in the principality and 29 m. WNW of Gottingen, on the r. bank of the Weser. Pop. 618.

LAUENSTEIN, a bailiwick and town of Hanover, in the principality of Kalenberg, 11 m. ESE of Hameln, and 18 m. WSW of Hildesheim. Pop. 1,012. It has several breweries, paper-mills, and brickworks.— Also a town of Saxony, in the circle of Meissen, bail. and 14 m. SSW of Pirna, and 20 m. SSE of Dresden, at the foot of the Erzgebirge, on the l. bank of the Müglitz. Pop. 663. It has a handsome church, in which is the mausoleum of the Bünau family, and possesses manufactories of mats and other articles in straw.—Also a landgericht and village of Bavaria, in the circle of Upper Franconia. The village is 50 m. NNE of Bamberg. Pop. 390. It has manufactories of iron and copper ware, and of papier-maché.

LAUERZ, or Lowertz, a village of Switzerland, in the cant. and 5 m. WNW of Schwitz, at the foot of the Rossberg, on the W bank of a lake of the same name. Pop. 474, Catholics. It was to a great extent destroyed by the fall of a portion of the Rossberg in 1806. The lake of L. is 3 m. long and 1½ m. in breadth, and abounds in fish.

LAUF, a town of Bavaria, on the r. bank of the Pegnitz, 30 m. SE of Bamberg. Pop. 1,600. It has manufactures of brass, needles, wire, and glass.

LAUFACH, a village of Bavaria, 9 m. E of Aschaffenburg. Pop. 1,130.

LAUFEN, a town of Bavaria, on the Inn, 63 m. E by S of Munich. Pop. 1,800.—Also a town of Wurtemberg, on the r. bank of the Neckar, 6 m. SW of Heilbronn. It has a castle, a monastery, a bridge over the river, which is considered the finest and largest in Wurtemberg, and unites the town with a village called also Laufen, on the other side. Both together contain about 4,000 inhabitants. — Also a small town of Upper Austria, near the Traun, 18 m. S of Gemunden. — Also a town of Austria, in the duchy of Salzburg, on the l. bank of the Salza, 12 m. NNW of Salzburg. It has an extensive trade by means of that river and the Danube. Pop. 4,700.—Also a village of the Swiss cant. of Zurich, on the Rhine, in the bail. of Laufen, 2 m. SSW of Schaffhausen. Pop. 373, Catholics. There are here rapids in the course of the river.—Also a town of Bern, 11 m. ENE of Delemont, at the confluence of the Latzel and the Birse. Pop. 751, Catholics.

LAUFENBURG (Gross), a town in the Swiss cant. of Aargau, 26 m. W of Schaffhausen, on the l. bank of the Rhine. Pop. 699, Catholics. Here is a fall in the Rhine, which, though not so high, is generally thought more picturesque than the one at Schaffhausen. Pop. 1,000.

LAUFENBURG (Klein), a village of Baden, on the r. bank of the Rhine, opposite Gross L. Pop. 350.

LAUFERSWEILER, a village of Prussia, in the reg. and 36 m. NNE of Coblenz. Pop. 557.

LAUFNITZ, a small river of Austria, which rises in Styria, and falls into the Raab, near St. Gothard.

LAUGADIA, a town of Greece, in the Morea, 18 m. NNE of Caritena.

LAUGEBAST, a village of Saxony, in the circle of Meissen, bail. and 6 m. NW of Pirna, and 5 m. SE of Dresden, on the l. bank of the Elbe. Pop. 662. It has several spinning-mills.

LAUGHARNE, or Llacharn, a parish and seaport in the co. of Carmarthen, 9½ m. SW by S of Carmarthen. Pop. in 1831, 2,020; in 1841, 2,010. The town is situated on an estuary, near the mouth of the rivers Taff and Towy. The port has no trade of any value. L. is a place of considerable resort for visitors in the summer-months.

LAUGHTON, a parish in the co. of Leicester, 5 m. W by N of Market-Harborough. Area 1,430 acres. Pop. in 1831, 154; in 1841, 180.—Also a parish in the co. of Lincoln, 2 m. S by E of Falkingham. Area 840 acres. Pop. in 1831, 75; in 1841, 73.—Also a parish and township in the co. of Lincoln, 18 m. NW by N of Lincoln, and E of the Trent. Area 4,070 acres. Pop. in 1831, 441; in 1841, 483.—Also a parish in Sussex, 5½ m. E by N of Lewes. Area 4,110 acres. Pop. in 1831, 804; in 1841, 850.

LAUGHTON-EN-LE-MORTHEN, a parish and township partly in the E. R. and partly in the W. R. of Yorkshire, 8 m. NW of Worksop. The parish includes the chapelry of Letwell and the townships of L., Gilden-wells, Throapham, and Woodsetts. Area 7,590 acres. Pop. in 1831, 1,232; in 1841, 1,212. The church presents a fine specimen of early English architecture, and has a tower and spire which rise to an alt. of 185 ft.

LAUGNAC, a village of France, in the dep. of

Lot-et-Garonne, cant. and 4 m. ENE of Preysas. Pop. 560.

LAUINGEN, a small walled town of Bavaria, in the principality of Neuburg, situated on the Danube, 26 m. NW of Augsburg. It has a brisk trade in salt and wine, with manufactures of linen, woollen, and cotton stuffs. Pop. 3,800.

LAUJAR. See Lanjar.

LAUMONT, a chain of mountains in the E of France, which extend from St. Hippolyte in the dep. of the Doubs, to Repetsch, near Delemont, in Switzerland.

LAUN, a village of Bohemia, in the circle and 12 m. ENE of Saatz, on the r. bank of the Eger. Pop. 2,000.

LAUNAC, a town of France, in the dep. of Haute-Garonne, cant. and 6 m. WSW of Grenade. Pop. 800.

LAUNCELLS, a parish of Cornwall, 1 m. SSW of Stratton. Area 6,340 acres. Pop. in 1841, 855.

LAUNCESTON, or DunnehevED, a parish and the capital of the county of Cornwall, 13 m. NW of Tavistock, and 113 m. WSW of London, on the Kensey, near its junction with the Ottery and the Tamar. Area of p. 2,180 acres. Pop. in 1801, 1,483; in 1831, 2,231; in 1841, 2,460.—The town was formerly walled, and two of the gates are still in existence. It is situated on a steep declivity, and consists of two principal streets, with several smaller ones, in general narrow but well-built. The most remarkable feature in the present appearance of L. is the magnificent ruin of its castle, consisting of a gateway and tower, some decayed walls, and the keep, majestically situated on the summit of a conical rocky mount, and rendered more pleasing from being richly overgrown with ivy. There are some handsome houses in the town. The principal public buildings are the church, guild-hall, and jails. Newport is separated from L. only by a narrow rivulet. The houses extend on each side to the edge of the stream, and the principal streets are connected by a bridge. From their situation they may be regarded as one town, though they have had distinct privileges and a separate jurisdiction; Newport was anciently under the jurisdiction of L., as it is now again within the boundaries laid down in the parliamentary and municipal boundary reports. L. is not a manufacturing or commercial town, though serges have been extensively made here; but it derives some importance from being one of the towns in which the business of the county is transacted. There are manganese mines in the vicinity. The limits of the borough were greatly extended under the reform boundary act, and now include the disfranchised borough of Newport, and a large surrounding agricultural district, comprehending the parishes of St. Stephen, Lawhitton, South Petherwin, and St. Thomas the Apostle. The number of electors registered in 1837 was 353; in 1848, 344. Pop. of parl. borough, 6,070. L. is one of the polling-places for the members for the eastern division of the co.

LAUNCESTON, a hundred, parish, and town in Van Diemen's Land, in the county of Cornwall.—The hundred comprises the parishes of L., Breadalbane, Perth, and Evandale; and lies between the North Esk and the South Esk.—The town is situated in S lat. 41° 24′, E long. 147° 5′, at the confluence of the N. and S. Esk rivers, which here discharge themselves into the head of the Tamar, about 32 m. SE of Port Dalrymple, or 40 m. from the sea by water, and 121 m. from Hobart-town, with which it is now connected by an excellent line of road, by which stage-coaches perform the distance between the two towns at the rate of 12 m. an hour. It is far inferior as a town to Hobart-town; but the surrounding country is more beautiful and valuable. Its streets are well laid out; and its public buildings include a spacious church, a government-house, military barracks, court house, bank, post-office, and several hotels. Its pop. is about 6,000. Vessels of large size come up the river, as it is called, to the town; but, unaided by steam, the navigation is rather intricate. Its chief article of export is wool, of which 8,300 bales = 2,535,722 lbs. were exported in the season 1849-50.—The police-district of L., which has an area of 437,760 acres, and besides the town of L. embraces the towns of Perth and Georgetown, had a pop. of 6,206 males, and 3,894 females, on 31st Dec. 1847. Of these, 2,923 were free emigrants. The number of houses within the district was 1,976, of which 763 were of brick or stone. The number of private schools on 31st October 1848 was 25, attended by 304 boys, and 237 girls; and of government schools on 31st Dec. 1848, 71, with an average attendance of 50 scholars. The number of public houses in Sept. 1848 was 61, or one for every 165 of the pop. of the district. The number of acres under cultivation on 31st Dec. 1848 was 9,532; of granted but uncultivated land, 127,140 acres. The number of acres under wheat in 1848 was 5,395; barley, 317; oats, 1,507; pease, 38; beans, 10; potatoes, 271; turnips, 279; tares, 8; English grasses, 1,707.—The quantity of stock on 31st Dec. 1848 was 1,120 horses, 5,260 horned cattle, 31,103 sheep, 275 goats, and 2,219 pigs.—The following table exhibits an abstract of meteorological observations at the town of L. during the year 1848:

	Thermometer.		Barometer.		Rain.
	Max	Min.	Max.	Min.	Inches.

LAUNCESTON-TARRANT, a parish of Dorsetshire, 4½ m. NE of Blandford-Forum. Area 710 acres. Pop. in 1831, 72; in 1841, 123.

LAUNIOWITZ, a small town of Bohemia, in the circle of Kaurzim, 38 m. SSE of Prague.

LAUNOY, a town of France, in the dep. of Ardennes, 12 m. NNE of Rethel. Pop. 500.

LAUNTON, a parish in Oxfordshire, 1½ m. ENE of Bicester. Area 3,550 acres. Pop. in 1841, 619.

LAUNY, or Launa, a small town of Bohemia, on the Egra, 9 m. ENE of Saatz. Pop. 1,850.

LAUPEN, a small town of Switzerland, 10 m. SW of Bern, on the Sarine. Pop. in 1850, 651.

LAUPERSDORF, a parish and village of Switzerland, in the cant. of Soleure, bail. of Balsthal. Pop., with Höngen, 720, Catholics.

LAUPERSWYL, a parish and village of Switzerland, in the cant. of Bern, bail. of Signau. Pop. 2,816, Protestants.

LAUPHEIM, a small town of Würtemberg, on the small river Rottum, 13 m. SW of Ulm. It is divided into Great and Little L.

LAUPIE (La), a village of France, in the dep. of La Drome, cant. and 3 m. S of Marsanne. Pop. 307.

LAURAC-LE-GRAND, a village of France, in the dep. of Aude, cant. and 4 m. NW of Fanjeaux. Pop. 600.

LAURADIO, a small town of Portugal, on the S side of the Tagus, 6 m. SSE of Lisbon.

LAURE, a small town of France, in the dep. of the Aude, cant. and 3 m. SW of Peyriac.

LAUREANA, or Lovrana, a town of the Austrian states, in Istria, with a small harbour on the bay of Flanati, 8 m. S of Castua.

LAUREL, a village in Sussex co., Delaware, U. S., 52 m. S of Dover.—Also a co. in the SE of Kentucky. Area 400 sq. m. Pop. in 1850, 4,185. Its cap. is London.

LAUREL MOUNTAINS, a range of mountains in N. America, part of what is called the Alleghany mountains. It extends from Pennsylvania to N. Carolina, and gives rise to several branches of the Ohio river.

LAURENCE (Saint), a parish in Essex, 8 m. SE by E of Maldon, on the Blackwater river. Area 2,080 acres. Pop. in 1831, 182; in 1841, 176.—Also a parish in Kent, 1 m. W of Ramsgate. Area 3,200 acres. Pop. in 1831, 2,024; in 1841, 2,694.—Also a parish in the co. of Pembroke, 8 m. N by W of Haverford-West, on the river Cleddy. Pop. in 1831, 211; in 1841, 223.—Also a parish and village in the isle of Wight, 9 m. SSE of Newport, on the seacoast. The greater part of the p. consists of a slip of land extending about 1½ m. along the sea-shore, and forming part of the romantic tract called Undercliff. Area 350 acres. Pop. in 1831, 78; in 1841, 114.—Also a parish in Suffolk, 3 m. SE of Bungay. Area 1,750 acres. Pop. in 1831, 242; in 1841, 221.

LAURENCEKIRK, anciently Conveth, a parish and village in Kincardineshire. Area of p. 5,381 acres. Pop. in 1801, 1,215; in 1831, 1,886; in 1841, 1,904. The p. is watered by the Luther and its tributaries. Of the arable land 5,000 acres are in good cultivation.—The v. is situated on the road from Perth to Aberdeen, 10 m. NW of Montrose. It chiefly consists of one street, about a mile in length. In 1730 the pop. did not exceed 80 persons; in 1841 it was 1,365. At the present time hand-loom weaving forms the chief dependence of the whole p. A new and local species of manufacture—that of snuff-boxes—has sprung up, and obtained for the v. no little fame. The L. snuff-boxes are made of wood, in a style similar to those of Cumnock in Ayrshire.

LAURENS, a county in the NW part of S. Carolina, U. S., lying between Enoree and Saluda rivers. Area 920 sq. m. Pop. in 1840, 21,584; in 1850, 23,406. Its cap. is Laurensville.—Also a county in the SW part of Georgia. Area 780 sq. m. Pop. in 1840, 5,585; in 1850, 6,389. Its cap. is Dublin.—Also a township of Otsego co., New York, 15 m. SW of Cooperstown. Pop. 2,173.

LAURENT (Saint), a canton, commune, and town of France, in the dep. of the Jura, arrond. of Saint Claude. The cant. comprises 21 com. Pop. in 1831, 10,619; in 1841, 9,295. The town is 19 m. N of Saint Claude. Pop. 1,325. It has a considerable trade in timber and in cheese. Bees are extensively reared in the locality.—Also a village in the dep. of the Lot-et-Garonne, cant. and 7 m. NE of Lavardac, on the l. bank of the Garonne.

LAURENT-DE-L'AIN, or Les Macon (Saint), a commune of France, in the dep. of the Ain, cant. and 5 m. W of Bagé-le-Chatel, on the l. bank of the Saone, opposite Mâcon, with which it is connected by a stone bridge. Pop. 1,300. It possesses several iron-foundries, and manufactories of steam-engines, numerous flour and tan-mills and tanneries, a manufactory of animal powder, and several clock-manufactories. It carries on also an active trade in grain, hemp, flour, timber, horses, and cattle.

LAURENT-L'ABBAYE (Saint), a village of France, in the dep. of the Nievre, cant. and 5 m. NNE of Pouilly. Pop. 1,125.

LAURENT-D'AGNY (Saint), a village of France, in the dep. of the Rhone, cant. and 2 m. NNE of Mormant. Pop. 860.

LAURENT - D'AIGOUZE (Saint), a town of France, in the dep. of the Gard, cant. and 5 m. N of Aigues-Mortes, on the l. bank of the Vidourle. Pop. 1,200.

LAURENT-D'ARCE (Saint), a town of France, in the dep. of the Gironde, cant. and 3 m. NNW of St.-Andre-de-Cubzac, on the road from Libourne to Blaye. Pop. 890.

LAURENT-DES-AUTELS (Saint), a commune of France, in the dep. of the Maine-et-Loire, cant. of Champtoceaux, 15 m. from Beaupreau. Pop. 1,145. It has a large manufactory of pottery.

LAURENT-DES-BAINS (Saint), a commune of France, in the dep. of the Ardèche, cant. and 4 m. SSE of St. Etienne-de-Lugdares, in a narrow valley enclosed by steep rocks. Pop. in 1841, 1,036. It contains a large bathing establishment.

LAURENT-BLANGY (Saint), a commune of France, in the dep. of the Pas-de-Calais, cant. and 3 m. from Arras. Pop. 1,088. It has extensive manufactories of beet-root sugar and animal black, a distillery of gin, and several forges.

LAURENT-DE-CASTELNAU (Saint), a village of France, in the dep. of the Dordogne, cant. and 7 m. WSW of Domme. Pop. 890.

LAURENT-EN-CAUX (Saint), a commune of France, in the dep. of the Seine-Inferieure, cant. of Doudeville, 12 m. NE of Yvetot. Pop. 1,186.

LAURENT - DE - CERDA, or De Cerdans (Saint), a commune and town of France, in the dep. of the Pyrénées-Orientales, cant. and 8 m. E of Prats-de-Mollo, at the source of the Tech, and near the Spanish frontier. Pop. in 1841, 2,631. It has several forges, manufactories of arms, nails, cordage, and leather; and carries on a considerable trade in cattle. Bees are extensively reared in the locality.

LAURENT-DE-CERIS (Saint), a commune of France, in the dep. of the Charente, cant. and 4 m. W of St. Claud. Pop. 1,183.

LAURENT-DE-CHAMOUSSET (Saint), a canton, commune, and town of France, in the dep. of the Rhone, arrond. of Lyon. The cant. comprises 14 com. Pop. in 1831, 14,521; in 1841, 19,982. The town is 20 m. W of Lyon. Pop. 1,691. It has several spinning-mills and cotton-factories.

LAURENT-DE-CUVES (Saint), a commune of France, in the dep. of the Manche, cant. and 3 m. W of St. Pois. Pop. 1,436.

LAURENT-DE-LA-GANNE (Saint), a village of France, in the dep. of the Eure-et-Loire, cant. and 5 m. N of Nogent-Roulebois. Pop. 360. In its vicinity are several iron-mines.

LAURENT - SUR - GORRE (Saint), a canton and commune of France, in the dep. of the Haute-Vienne, arrond. of Rochechouart. The cant. comprises 6 com. Pop. in 1831, 8,902; in 1841, 9,012. The village is 8 m. ESE of Rochechouart, and 17 m. WSW of Limoges, on the l. bank of the Gorre. Pop. 2,619.

LAURENT-EN-GRANDVAUX (Saint), a village of France, in the dep. of the Jura, cant. and 5 m. ESE of La-Petite-Chiette, and 15 m. NNE of St. Claude. Pop. 1,327. It is noted for its cheese. The environs afford excellent honey.

LAURENT - DES - HOMMES, or Du-Double (Saint), a commune of France, in the dep. of the Dordogne, cant. and 6 m. W of Mucidan, and 17 m. SSW of Riberac, near the Isle. Pop. 1,285.

LAURENT-DE-MEDOC (Saint), a canton and commune of France, in the dep. of the Gironde, arrond. of Lesparre. The cant. comprises 3 com. Pop. in 1831, 5,243; in 1841, 5,101. The village is 13 m. SSE of Lesparre, and 26 m. NNW of Bordeaux Pop. in 1841, 2,692. The locality is noted

for its wine, and affords also large quantities of resin and pitch.

LAURENT-LE-MINIER (Saint), a commune of France, in the dep. of the Gard, cant. and 5 m. SW of Sumène, near the l. bank of the Vis. Pop. 1,160. It has a manufactory of paper and a silk spinning-mill.

LAURENT-DES-MORTIERS (Saint), a village of France, in the dep. of the Mayenne, cant. and 3 m. S of Bierné, and 8 m. SE of Chateau-Gontier. Pop. 530.

LAURENT-DE-MURE (Saint), a commune of France, in the dep. of the Isère, cant. and 5 m. NNW of Heyrieux. Pop. 1,141.

LAURENT-DE-NESTE (Saint), a commune of France, in the dep. of the Hautes-Pyrénées, cant. and 2 m. ESE of Nestier, and 16 m. ENE of Bagnères, near the Neste. Pop. 1,409.

LAURENT-D'OLT (Saint), a commune of France, in the dep. of the Aveyron, cant. and 2 m. N of Campagnac, and 27 m. N of Milhau, on the Lot. Pop. 2,067.

LAURENT-DU-PAPE (Saint), a commune of France, in the dep. of the Ardèche, cant. and 2 m. N of La Voute, on the l. bank of the Erieux, near the junction of that river with the Rhone. Pop. 1,230. It carries on a considerable trade in cattle, hemp, and linen of local manufacture.

LAURENT-DU-PONT, a canton, commune, and town of France, in the dep. of the Isère, arrond. of Grenoble. The cant. comprises 6 com. Pop. in 1831, 11,928; in 1841, 12,400. The town is 15 m. N of Grenoble, near the l. bank of the Guiers Mort. Pop. 3,156. It has large manufactories of linen and several forges.

LAURENT-EN-ROYANS (Saint), a commune of France, in the dep. of the Drôme, cant. and 2 m. NE of St. Jean-en-Royans, and 25 m. ENE of Valence. Pop. 1,175. It has a manufactory of steel and several silk-mills.

LAURENT-DE-LA-SALANQUE (Saint), a commune and town of France, in the dep. of the Pyrénées-Orientales, cant. and 6 m. E of Rivesaltes, and 8 m. NE of Perpignan, on the l. bank of the Agly, and near the entrance of that river into the sea. Pop. in 1841, 3,613. It has an extensive nail-work, and possesses a considerable trade in wine, brandy, and grain.

LAURENT-DE-LA-SALLE (Saint), a village of France, in the dep. of the Vendée, cant. and 4 m. N of Hermenault, and 10 m. NNW of Fontenoy-le-Comte. Pop. 1,000.

LAURENT-SUR-SE'VRE (Saint), a commune and town of France, in the dep. of the Vendée, cant. and 4 m. SE of Mortagne-sur-Sèvre, on the l. bank of the Sevre-Nantaise. Pop. 1,066.

LAURENT-DE-TERRE-GATTE (Saint), a commune of France, in the dep. of the Manche, cant. and 5 m. NE of St. James, and 10 m. SSE of Avranches. Pop. 1,435.

LAURENT-DU-VAR (Saint), a commune of France, in the dep. of the Var, cant. and 5 m. SE of Vence, on the r. bank of the Var, which is here crossed by a bridge, and near its entrance into the Mediterranean, and on the frontier of Italy. Pop. 751. It has a custom-house. The locality is noted for its wine.

LAURENZANA, a town of Naples, in the prov. of the Basilicate, district and 17 m. SSE of Potenza, and 38 m. NE of Policastro. Pop. 7,200.

LAURIA, a town of Naples, in the prov. of Basilicato, 7 m. SSE of Lagonegro. Pop. 7,800. It is singularly situated on the side of a steep mountain, and is surrounded by vineyards. It is divided into an upper and lower town; and contains 2 churches, and 2 convents; and has several woollen factories.

LAURIANO, a town of Naples, in the prov. of Principato-Citra, 15 m. WNW of Il-Vallo, and 2 m. WSW of Torchiara. Pop. 700.

LAURICOCHA, a lake of Peru, in the chain of the Andes, in S lat. 10° 30′, W long. 76° 30′. It is about 9 m. in length, and 3 m. in breadth. The Tungunagua, which issues from its E extremity, and flows N, is one of the twin head-streams of the Amazon.

LAURIERE, a canton and town of France, in the dep. of Haute-Vienne, arrond. and 21 m. NNE of Limoges.—The cant., comprising 6 com., had a pop. of 6,339 in 1841.—The town is 21 m. NNE of Limoges, on the Ardour. Pop. 1,248.

LAURIE'S HARBOUR. See Port Ross.

LAURIESTON, a considerable village in the parish, and 1½ m. E of the town of Falkirk, in Stirlingshire, on the mail-road between Edinburgh and Falkirk. Pop. in 1831, 1,306; in 1841, 1,198.

LAURINGEN, a town of Bavaria, 9 m. NNW of Hofheim, on the Lauer. Pop. 534.

LAURINO, a town of Naples, in Principato-Citra, 9 m. NE of Il-Vallo, 26 m. SSE of Campagna. Pop. 2,150.

LAURIS, a town of France, in the dep. of Vaucluse, cant. and 1½ m. NNW of Cadenet, on the l. bank of the Duranie. Pop. 1,215.

LAURISTON BAY, an inlet on the NE coast of the N island of New Zealand, penetrating 8 or 10 m. into the interior. It contains the harbour of Mango-nui, and receives two considerable streams.

LAURITO, a town of Naples, in Principato-Citra, 9 m. SE of Il-Vallo. Pop. 1,700.

LAURO, a town of Naples, in the prov. of Terra-de-Lavoro, 15 m. E of Gaëte. Pop. 1,050.—Also a town in the same prov., 6 m. SE of Nola. Pop. 1,838.

LAURON, a port of France, in the dep. of Bouches-du-Rhone, cant. and 4 m. SSW of Martignes, on the Mediterranean.

LAUROTS, a group of three islands off the E coast of Celebes. They are high and steep, covered with wood, and uninhabited. The S island is called by the Bugis, Mata Siri; the E, Kadapangan; the N, Kalambow.

LAURVIG, a bailiwick and port of Norway, in the dio. of Aggerhuus, skirted on the S by the Skager-rack, and watered by the Louven.—The port is situated at the mouth of the Louven, in N lat. 59° 2′, E long. 10° 7′. Pop. 3,398. It possesses iron manufactories, and a large cannon foundry. Its exports chiefly consist of herrings, salt, iron, and wood. Pop. 3,398.

LAUSANNE, the capital of the Swiss cant. of the Pays-de-Vaud, delightfully situated on three eminences belonging to a spur of the Jorat, in N lat. 46° 31′ 5″, E long. 6° 47′ 22″, 30 m. NE of Geneva, and about 1½ m. to the N of the lake of Geneva, and commanding an unrivalled view of that lake towards its head. The streets are narrow, steep, and irregular, and the houses generally are not well-built. It is an open town, and is divided into the city-quarter and 5 suburban quarters. The objects deserving the attention of the traveller at L. are the cathedral, a venerable building in the Gothic style, the finest religious edifice in Switzerland, and situated on the highest of the eminences; the chateau or castle, now the council-house, also an antique and imposingly massive edifice; the arsenal, the hospital, the cantonal college, the riding and drawing schools, and several good libraries and cabinets of natural history, the lunatic asylum, the penitentiary, and the cantonal library of 35,000 vols. There are an English chapel, a Roman Catholic church, and a Lutheran

church, within the town. L., without rivalling its celebrated neighbour Geneva, has long had considerable claims to literary distinction. It has had since 1536 an academy which has reckoned several distinguished scholars, such as Beza and Barbeyrac, among its teachers. In 1808, an improved form was given to this institution, the number of professors being carried to 14. The chief branches of education are classics and divinity; there is also a professorship of law, and one of natural and one of moral philosophy. Exclusive of this academy, there existed at L., after the revocation of the edict of Nantes in 1683, a theological seminary for the education of Protestant clergymen for France. Since 1809 this has been discontinued, as the French Protestant clergy can now receive their education at Montauban or Strasburg. The French language is very well spoken at L., and in the inferior schools the children of the lower orders are all carefully taught to read and write. L. has long been remarkable for the resort of strangers, attracted hither by the delightful situation, the institutions for education, and the polished character of the society. It was here that Haller passed some years; that Voltaire lived before settling definitively at Ferney; and that Gibbon composed the chief part of his great history. Of the pop., amounting in 1835 to 12,030, in 1850 to 17,108, of whom 16,101 were Protestants, and 970 Catholics, a number are employed in the cultivation of vineyards and gardens, the neighbouring country being fertile. Little trade is carried on, though the situation is not unfavourable to it. The only manufactures worth notice are those of jewellery and silversmiths' work, woollen cloth, and leather. The climate, though cold in winter, from the vicinity of the Alps, is healthy; the elevation of the town above the lake is between 400 and 500 ft., and about 1,600 ft. above the level of the sea. The mean temp. is 49° 4′; of winter, 32° 1′; of summer, 64° 7′. Before the reformation, L. was the see of a Catholic bishop. In point of political relations it was long an appendage to the cant. of Bern, but had at all times its separate constitution. It was separated from Bern, and incorporated with the new cant. of Vaud, on the change introduced into Switzerland by the French invasion of 1798.

LAUSANNE, a township of Northampton co., in the state of Pennsylvania, U. S., 100 m. ENE of Harrisburg. It has a mountainous surface, and is watered by Lehigh river and Laurel run. The soil is gravelly, and of little fertility. Pop. in 1840, 1,590.

LAUSPRELLE, a commune of Belgium, in the prov. of Hainault, dep. of Acoz. Pop. 200.

LAUSSAC, a town of France, in the dep. of the Aveyron, cant. and 7 m. E of Murde-Barres. Pop. 130. It has several mineral springs.

LAUSSEIGNAN, a town of France, in the dep. of the Lot-et-Garonne, cant. and 2 m. W of Lavardac. Pop. 1,260.

LAUSSIG, or Laussigk, a town of the kingdom of Saxony, in the circle and 19 m. SE of Leipzig, bail. and 9 m. WNW of Colditz. Pop. 2,062. It has several mineral springs, and possesses manufactories of woollen and cotton fabrics.

LAUSSNITZ, a village of Saxony, in the circle of Meissen, and bail. of Radeberg, 1½ m. SW of Königsbruck, and 17 m. NNE of Dresden.

LAUSSONNE, a village of France, in the dep. of the Upper Loire, cant. and 4 m. NE of Monestier, and 11 m. ESE of Puy, near a stream of the same name. Pop. 1,650.

LAUT (Pulo), an island of the Asiatic archipelago, at the S entrance of the strait of Macassar, and separated by a strait of the same name from the SE coast of Borneo, in S lat. 3° 40′, E long. 116° 25′. It is 60 m. in length from N to S, and about 30 m. in breadth. A deep bay indents the N coast. The principal production of the island is rice. It is but thinly populated.

LAUT (Little Pulo), a group of islands in the strait of Macassar, SSW of Pulo Laut, in S lat. 4° 45′, E long. 115° 55′.

LAUTARET, a mountain of France, in the dep. of the Upper Alps, and cant. of La Gave.

LAUT-DANAOU, a lake in the island of Sumatra, at the foot of the lofty mountains of Gunony-Besi. It abounds with fish.

LAUTENBACH, a village of France, in the dep. of the Upper Rhine, cant. and 5 m. NW of Guebwiller, and 14 m. SW of Colmar. Pop. 1,896.—Also a village of Baden, in the circle of the Middle Rhine, NE of Offenbach. Pop. 380.

LAUTENBURG, Ledzborg, or Leeborg, a town of Prussia, in the prov. of W. Prussia, reg. and 52 m. SE of Marienwerder, circle and 7 m. E of Strasburg, on the l. bank of the Wella. Pop. 2,050. It has a suburb; and possesses manufactories of cloth, linen, and pottery.

LAUTENTHAL, a town of Hanover, in the Indr. and 6 m. NNW of Clausthal, and 27 m. SE of Hildesheim, on the r. bank of the Innerste, in the midst of the Hartz mountains. Pop. 2,174. It has an hospital. It contains a powder-mill, and has a considerable trade in cattle and in lace. In the vicinity are the mines of Kreutzberg.

LAUTER, a river which has its source in the chain of the Vosges, in Bavaria, in the circle of the Pfalz, district and 18 m. W of Deux Ponts; runs SE to the frontier of the French dep. of the Lower Rhine, along which it flows to the Rhine, into which it throws itself at Neuburg, and 3 m. S of Hagenbach, after a course of about 48 m. Weissenburg and Lauterburg are the chief towns on its banks.—Also a river of Wurtemberg, in the circle of the Danube, which has its source in the Sternberg, and falls into the Danube at Ehingen.—Also a village of the kingdom of Saxony, in the circle of the Erzgebirge, 4 m. NNW of Schwarzenberg, and 20 m. SSW of Chemnitz. Pop. 2,388. It has manufactories of articles in straw and timber.

LAUTER (Ober and Unter), two villages in the duchy of Saxe-Coburg, to the N of Coburg, containing respectively 330 and 448 inhabitants.

LAUTERBACH, a circle and town of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, bail. and 6 m. N of Herbstein, and 18 m. WNW of Fulde, on the Schlitz, in a valley of the Vogelberg. Pop. 3,380. It has two castles belonging to the barons of Riedesel, and possesses extensive manufactories of linen, wax-cloth, leather, pottery, cutlery, and arms, several bleacheries, dye-works, and printing-mills, large fish-curing establishments, and several distilleries and breweries.—Also a village of the kingdom of Wurtemberg, in the circle of the Schwarzwald, bail. and 8 m. WSW of Oberndorf, and 10 m. WNW of Rottweil, on a small river of the same name. Pop. 1,300.—Also a village of the duchy of Saxe-Coburg-Gotha, in the principality and 21 m. WNW of Gotha. Pop. 352. It has manufactories of linen. Hops are extensively cultivated in the environs.—Also a village of the kingdom of Saxony, in the circle of the Erzgebirge, and S of Lengefeld. Pop. 1,165.—Also a village of Prussia, in the prov. of Silesia, reg. and 30 m. SSW of Breslau, circle and 14 m. ESE of Reichenbach. Pop. 537.—Also a town of Austria, in Bohemia, in the circle and 7 m. S of Elnbogen, and 17 m. E of Eger. Pop. 1,750. It has some woollen manufactures, and carries on a considerable trade in linen and hops. In the environs are mines of tin, and lime-quarries.

LAUTERBACH (Ober), a village of Bavaria, in

the circle of Lower Bavaria, presidial and 15 m. WSW of Pfaffenberg, and 29 m. SSW of Ratisbon. Pop. 171. It has a brewery, a distillery of brandy, and a brick-work.

LAUTERBERG, or Lutterburg, a town of Hanover, in the principality of Grubenhagen, 15 m. SE of Clausthal, at the confluence of the Lutter with the Hanoverian Oder, and in the midst of the Hartz mountains. Pop. 3,216. It has an industrial school, and possesses a silver and a copper foundery, several spinning-mills, and manufactories of needles, nails, and iron-ware. In the vicinity are mines of copper, iron, and cobalt; and the iron-work of Königshutte, one of the most important in the kingdom.

LAUTERBOURG, or Lauterburg, a canton, commune, and town of France, in the dep. of the Lower Rhine, and arrond. of Weissenbourg. The cant. comprises 6 com. Pop. in 1831, 9,823; in 1841, 8,629. The town, which is fortified, is 12 m. ESE of Weissenbourg, on the r. bank of the Lauter, near the confluence of that river with the Rhine. Pop. in 1841, 2,459. Its fortifications are partly constructed of earth, and in the vicinity is an entrenched camp. It consists of an old and new town; and contains 2 churches, a synagogue, 2 hospitals a civil and a military, and a custom-house. It possesses manufactories of potash, several roperies, a bleachery, a foundery, and several tile and brick works, and has also a considerable trade. This town was taken in 1744 by the Imperialists, and again by the Prussians in 1793.

LAUTERBRUNNEN, a parish and village of Switzerland, in the cant. and 36 m. SE of Bern, bail. and 7 m. SSE of Interlaken, in a valley of the same name, at an alt. of 2,450 ft. above sea-level, and on the l. bank of the Weisse-Lutschine, which is here crossed by a bridge. The valley extends from N to S, between lakes Thun and Brienz, from the Jungfrau in the Bernese Alps to the Aar, a distance of 18 m.; is about 2 m. in width; and is enclosed by steep mountains terminating in immense glaciers, above which the sun does not rise in summer before 7 o'clock. It contains numerous streams, remarkable, as the name of the v. denotes, for the purity of their waters, and forming numerous cascades. Of these streams the principal is the Staubbach. Oak, beech, pine, &c., abound in the valley; and its pastures are covered with large herds of cattle. The inhabitants, numbering in 1850, 1,756, Protestants, are a fine athletic people, but extremely poor.

LAUTERECKEN, a town of Bavaria, in the circle of the Pfalz, district and 18 m. NNW of Kaiserslauten, and 50 m. NW of Spire, at the confluence of the Lauter and Glan. Pop. 1,155. The environs abound with coal, and produce considerable quantities of wine.

LAUTERHOFEN, a town of Bavaria, in the circle of the Regen, SW of Amberg. Pop. 800.

LAUTERN, a village of Prussia, in the regency of Konigsberg, SW of Rossel. Pop. 400.

LAUTERSDORF (Ober and Nieder), two villages of the kingdom of Saxony, in the circle of Lausitz, NW of Zittau, containing respectively 652 and 590 inhabitants.

LAUTERSTEIN, an amt or bailiwick in the kingdom of Saxony, and circle of the Erzgebirge. Pop. 11,720. It derives its name from a castle situated 17 m. SE of Chemnitz. Its chief place is Zobelitz.

LAUTH, a village of Prussia, in the regency and E of Konigsberg. Pop. 310.

LAUTHAIN (Saint), a village of France, in the dep. of the Jura, cant. and 4 m. E of Sellieres. Pop. 1,121. In the environs are quarries of marble, alabaster, and gypsum.

LAUTLINGEN, a village of Wurtemberg, in the circle of the Schwarzwald, SE of Boblingen. Pop. 700.

LAUTREC, a canton, commune, and town of France, in the dep. of the Tarn, arrond. of Castrès. The cant. comprises 10 com. Pop. in 1831, 9,646 in 1841, 9,625.—The town is 10 m. NW of Castres, on a finely cultivated hill. Pop. in 1841, 3,467. It contains the ruins of 2 castles. It possesses a considerable trade in cattle and fowls. The locality is noted for its melons.

LAUTSCHITZ, or Blucina, a town of Austria, in Moravia, in the circle and 11 m. S of Brunn. Pop. 1,037.

LAUWE, a department and commune of Belgium, in the prov. of West Flanders, arrond. of Courtrai, watered by the Lys. Pop. of dep. 2,388.

LAUWER-ZEE, a gulf of the North sea, in Holland, between the province of Friesland on the W, and that of Groningen on the E. It is 6 m. in breadth, and about 7½ m. in depth. It receives the Hunse on the SE.

LAUZERTE, a canton, commune, and town of France, in the dep. of the Tarn-et-Garonne, arrond. of Moissac. The cant. comprises 10 com. Pop. in 1831, 12,486; in 1841, 12,559.—The town is 12 m. N of Moissac, on a rocky eminence between 2 streams. Pop. in 1841, 3,444. It has an active trade in grain, wine, and cattle.

LAUZES, a canton and commune of France, in the dep. of the Lot, arrond. of Cahors. The cant. comprises 11 com. Pop. in 1831, 7,815; in 1841, 7,878. The town is 12 m. E of Cahors.

LAUZET (Le), a canton, commune, and town of France, in the dep. of the Lower Alps, arrond. of Barcelonnette.—The cant. comprises 7 com. Pop. in 1831, 5,473; in 1841, 5,294.—The town is 11 m. WNW of Barcelonnette, and 28 m. NE of Digne, on the l. bank of the Ubaye. Pop. 1,020.

LAUZUN, a canton, commune, and town of France, in the dep. of the Lot-et-Garonne, arrond. of Marmande. The cant. comprises 16 com. Pop. in 1831, 13,219; in 1841, 13,387.—The town is 18 m. NE of Marmande, near the l. bank of the Drot. Pop. 1,390. It consists of only two streets, but is enclosed by old walls, and has a castle. It possesses manufactories of linen and distilleries of brandy, and has trade in corn, wine, legumes, and cattle.

LAVACHERIE, a commune and village of Belgium, in the prov. of Luxemburg, cant. of Saint-Hubert. Pop. 435.

LAVAGNA, a small town of the Sardinian states, in the Genoese territory, 1 m. SE of Chiavari, on the N coast of the gulf of Rapalo. Pop. 2,000.

LAVAL, an arrondissement, canton, and town of France, in the dep. of Mayenne.—The arrond. has an area of 181,475 hectares, and comprises 8 cants. Pop. in 1831, 117,534; in 1841, 125,866.—The cant. comprises 14 coms. Pop. in 1841, 36,572.—The town is the cap. of the dep. of the Mayenne, 44 m. W of Mans, in N lat. 48° 4′ 14″. It is situated in a valley on the river Mayenne, by which it is intersected; and is surrounded with old walls. The older portion of the town is very dilapidated, with narrow tortuous streets and heavy wooden-framed houses. Pop. in 1789, 10,602; in 1831, 16,403; in 1841, 17,348. The linen manufacture and bleaching are extensively carried on here. It has besides manufactories of serge, flannel, and cotton; and extensive tanneries and dye-works.—Also a village of France, in the dep. of Lozere, cant. and 6 m. SE of La Canourgue. Pop. 400.—Also a village of France, in the dep. of Gard, cant. and 3 m. NNW of Saint-Martin-de-Valgagne. Pop. 1,300.—Also a village in the dep. of Vosges, cant. and 1 m. SW of Bruyeres, on the r. bank of the Vologne. Pop. 205.—Also a vil-

lage in the dep. of Pyrenees-Orientales, cant. and 3 m. SW of Argeles. Pop. 415.

LAVAL-SAINT-ETIENNE, a commune and village of France, in the dep. of Isère, cant. of Domene, 12 m. ENE of Grenoble. Pop. 1,154.

LAVAL - ROQUECE'ZIERE, a commune of France, in the dep. of Aveyron, cant. of Saint-Servins. Pop. 2,821.

LAVALETTA. See VALETTA.

LAVAMUND, a small town of Austrian Illyria, in Lower Carinthia, 12 m. E of Klagenfurt, at the confluence of the Lavant and the Drave.

LAVANSARI, an island of Russia, in the gulf of Finland, in N lat. 60°, E long. 27° 42′. It is about 3 m. in length, and presents three small ports.

LAVANT, a small river of Sussex, which falls into the sea 5 m. below Chichester, after a SW course of 10 m.—Also a river of Austrian Illyria, in Lower Carinthia, which rises 12 m. S of Judenburg, and runs into the Drave, on the l. bank, at Lavamunde, after a course of 36 m.

LAVANT (EAST and WEST), a parish in Sussex, 2 m. N of Chichester. Area 2,970 acres. Pop. in 1831, 407; in 1841, 370. Goodwood, the splendid seat of the duke of Richmond, is in this p.; and the Goodwood races are annually run in the park.

LAVARDAC, a town of France, in the dep. of Lot-et-Garonne, 3 m. NW of Nerac, on the r. bank of the Baise. Pop. 1,442.

LAVARDENS, a town of France, in the dep. of Gers, cant. and 3 m. E of Jegun. Pop. 1,408.

LAVAU, a village of France, in the dep. of Loire-Inferieure, cant. and 4 m. SSW of Savenay, on the r. bank of the Loire. Pop. 800.

LAVAUR, an arrondissement, canton, and town of France, in the dep. of Tarn.—The arrond. has an area of 80,533 hectares, and comprises 5 cants. Pop. in 1831, 52,413; in 1841, 86,817.—The cant., comprising 19 coms., had a pop. of 18,679 in 1841.—The town is situated on the l. bank of the Agout, in N lat. 43° 40′ 52″, 23 m. SW of Alby, at an alt. of 158 yds. above sea-level. Pop. in 1789, 4,664; in 1831, 7,179; in 1841, 7,014. It is the seat of a communal college, and has a public library of 3,500 vols. It is the entrepot for the silk produced in Upper Languedoc, which is spun here before being sent to Nimes and Lyon. It has also cotton-factories, dye-works, and tanneries.

LAVAUX-SAINTE-ANNE, a commune of Belgium, in the prov. of Namur, cant. of Rochefort. Pop. 314.

LAVEAU, a village of France, in the dep. of Yonne, cant. and 4 m. SW of Saint-Targeau. Pop. 1,070.

LAVELANET, a town of France, in the dep. of Ariège, arrond. and 12 m. E of Foix, on the Lectouire. Pop. in 1841, 2,898, chiefly employed in the manufacture of woollens.

LAVELINE, a river of France, in the dep. of Vosges, which rises to the SE of Laveline, runs NW, and joins the Fave, a tributary of the Meurthe, near Bertrimoutier, after a course of 9 m.—Also a commune and village of France, in the dep. of Vosges, 5 m. ESE of Saint-Diéy. Pop. 1,895. There are mines of manganese in the vicinity.

LAVELINE-DIVANT-BRUYE'RES, a village of France, in the dep. of Vosges, arrond. and 15 m. ENE of Epinal, and 3 m. SE of Bruyères.

LAVELLO, a town of Naples, in the prov. of Basilicata, district and 9 m. NE of Melfi. Pop. 2,300. It is the see of a bishop, and has a cathedral and 2 convents.

LAVENDON, a parish in Bucks, 2½ m. NE of Olney. Area 2,320 acres. Pop. in 1831, 664; in 1841, 691.

LAVENHAM, or LANHAM, a parish and market-town in Suffolk, 16 m. W by N of Ipswich. Area 2,800 acres. Pop. in 1831, 2,107; in 1841, 1,871. The church, one of the finest in the co., was erected on the site of a more ancient edifice, in the 15th cent. The town occupies an agreeable situation on the sides of a valley, through which the river Bret flows. It consists of several small streets, the houses in which are generally old; but the market-place is spacious. It was once a manufacturing place, and noted for its blue cloths, serges, and other woollen stuffs; at present only the spinning of woollen yarn, and making of calimancoes and hempen cloth, are carried on. L. is one of the polling-places appointed for the county.

LAVENO, a town of Austrian Lombardy, in the prov. and 24 m. WNW of Como, near the embouchure of the Tresa on Lake Como.

LAVENZA, a town of the duchy of Massa-Canara, 6 m. W of Massa, at the embouchure of a small stream of the same name, in the gulf of Genoa. Pop. 1,280. It has a small harbour, and a fort.

LAVER (HIGH), a parish in Essex, 6½ m. NE by N of Epping. Area 1,960 acres. Pop. in 1831, 495; in 1841, 478. Locke resided, during the last fourteen years of his life, almost constantly in this p., at Otes manor-house, then the seat of Sir Francis Masham. Here he died in 1704, aged 73; and was buried on the S side of the churchyard, under a marble grave-stone, which has recently been repaired.

LAVER (LITTLE), a parish in Essex, 7½ m. NE by N of Epping. Area 680 acres. Pop. in 1831, 112; in 1841, 128.

LAVER (MAGDALEN), a parish in Essex, 13 m. W by N of Chelmsford. Area 880 acres. Pop. in 1831, 206; in 1841, 217.

LAVERCAUTIE'RE, a village of France, in the dep. of Lot, cant. of Salviac, 15 m. NNW of Cahors. Pop. 600.

LAVERSTOCK AND FORD, a parish in Wilts, 1½ m. NE of Salisbury, on a branch of the Avon. Area 3,150 acres. Pop. in 1831, 817; in 1841, 1,076.

LAVERSTOKE, a parish in Southamptonshire, 2½ m. NE of Whitchurch. Area 1,530 acres. Pop. in 1831, 117; in 1841, 123.

LAVERTON, a parish in Somersetshire, 3½ m. N by E of Frome. Area 1,060 acres. Pop. in 1831, 196; in 1841, 199.—Also a township in the p. of Kirkby-Malzeard, Yorkshire, 5½ m. WNW of Ripon, on a branch of the Ure. Area 7,710 acres. Pop. in 1831, 457; in 1841, 487.

LAVEY, a parish in co. Cavan, 6 m. E by S of Cavan. Area 10,678 acres. Pop. in 1841, 5,931.

LAVEY, a village of Switzerland, in the cant. de Vaud, circle of Aigle. Pop. in 1850, 251, Protestants.

LAVIANO, a town of Naples, in the prov. of Principato-Citra, 15 m. NE of Campagna. Pop. 1,650.

LAVIGNY, a village of Switzerland, in the cant. de Vaud, circle of Morges. Pop. 328, Protestants.

LAVINCOURT, a village of France, in the dep. of the Meuse, cant. and 6 m. ENE of Ancerville. Pop. 246.

LAVINGTON, or LINTON, a parish in Lincolnshire, 4 m. NNE of Corby. It comprises the township of Osgodby, and the hamlets of Hanby and Keisby. Area 4,540 acres. Pop. in 1841, 329.

LAVINGTON (EAST or MARKET), a parish and market-town in Wilts, 18 m. NNW of Salisbury, and 5 m. S of Devizes. The p. comprises the tything of Easterton. Area 5,840 acres. Pop. in 1831, 1,525; in 1841, 1,000. The church is an ancient edifice in the later pointed style of architecture.—The town is situated on the N border of Salisbury plain, and con-

sists principally of two streets. The inhabitants are chiefly employed in agriculture and malting.

LAVINGTON (West), or Bishop's Lavington, a parish in Wilts, 6 m. S of Devizes. Area 5,140 acres. Pop. in 1831, 1,322; in 1841, 1,554.

LAVINIA. See Civita-Lavigna.

LAVINO, a river of the Papal states, which descends from a branch of the Apennines, flows N, and joins the Samoggia, on the r. bank, in the leg. of Bologna, after a course of 30 m. It is the *Labinius* of the ancients.

LAVIS, a village of Austria, in Tyrol, 3 m. NNW of Trente, on the r. bank of the Avis, near its confluence with the Adige.

LAVIT-DE-LOMAGNE, a village of France, in the dep. of Tarn-et-Garonne, 9 m. SW of Castel-Sarrasin. Pop. 700.

LAVIZZARA, a circle in the Swiss cant. of Ticino, forming the upper part of the Valle Maggia.

LAVOIR, a commune of Belgium, in the prov. of Liege, cant. of Couthuin. Pop. 245.

LAVONCOURT, a village of France, in the dep. of Haute-Saone, cant. and 7 m. NNE of Dampierre. Pop. 352.

LAVORO (Terra di), a large and populous prov. in the NW part of the kingdom of Naples, bounded on the N by Abruzzo-Ultra 2da; on the NE by the prov. of Sannio; on the E by Principato-Ultra; on the S by Principato-Citra and Naples; on the SW by the Tyrrhenian sea; and on the NW by the States of the Church. Its superficial extent is 1,668 geog. sq. m. The soil is rich and fertile, and throughout of a volcanic nature. Towards the coast the country is level; but in the interior, towards the N and NE, it is traversed by several branches of the Apennines. The principal rivers are the Garigliano, the Volturno, and the Lagni-Regi. The principal lakes are those of Fondi, Agnano, Fusano, and Lango. The productions of the prov. are corn, wine, oil, mulberries, hemp, flax, and fruit of various kinds. Grazing is carried on to a considerable extent; and in the low grounds herds of buffaloes are kept. The best species of Italian wine, called *Lachrymæ Christi*, is made here. The principal articles of exportation are wine, oil, and silk.—The province is divided into the 5 districts of Caserta, Nola, Piedimonte, Gaëta, and Sora; which are subdivided into 49 *circondarii*, and 233 *comuni*. Its administration is similar to that of the other Neapolitan provs. Capua is the capital, and Gaëta the principal sea-port. Pop. 720,000.

LAVQUEN, or Villaricca (Lake of), a large lake of Chili, in the Araucanian territory, 30 m. E of Villaricca. It discharges its superfluous waters by the Tolten river.

LAVRADIO, a town of Portugal, in the prov. of Estremadura, comarca and 12 m. N of Setubal, on the l. bank of the Tagus, 6 m. SSE of Lisbon. Pop. 600.

LAVRAS-DE-FUNIL, a district and town of Brazil, in the prov. of Minas-Geraes, 40 m. NE of Campanha. It is well-watered by several streams which flow to the Rio-Grande on the N, and the Rio-Verde on the S; and produces cotton, millet, rice, oranges, and other fruits.

LAVRE, a town of Portugal, in the prov. of Alentejo, comarca and 32 m. NW of Evora. Pop. 1,050.

LAVRINHAS, a parish and village of Brazil, in the prov. of Mato-Grosso, on the road from Mato-Grosso to Curaba. Pop. 600.—Also a v. in the prov. of Goyaz, and about 120 m. N of the city of Goyaz.

LAW, or Lawe, a river of France, which has its source in the dep. of the Pas-de-Calais, to the ENE of St. Pol; flows thence into the dep. of the Nord; and, after a course, in a generally NE direction, of about 30 m., joins the Lys, near Gorgne.

LAWARYSZKI, a town of Russia in Europe, in the gov. and district and 17 m. E of Vilna.

LAWFORD, a parish in Sussex, 1½ m. W of Manningtree, on the Stour, and on the London and Norwich railway. Area 2,160 acres. Pop. in 1841, 868.

LAWFORD (Church), a parish in Warwickshire, 3¾ m. WNW of Rugby, on the S bank of the Avon, and intersected by the London and Birmingham railway. Area 2,070 acres. Pop. in 1841, 333.

LAWFORD (Little), a hamlet in the p. of Newbold-upon-Avon, Warwickshire, 4 m. W of Rugby. Pop. in 1831, 28; in 1841, 34.

LAWFORD (Long), a township in the p. of Newbold-upon-Avon, Warwickshire, 2½ m. NW by N of Rugby, on a branch of the Avon. Pop. 625.

LAW-HADEN, or Llan-Hawaden, a parish in the co. of Pembroke, 3 m. NW of Narbeth, on the Cleddau. Pop. in 1831, 657; in 1841, 634.

LAWHILTON, a parish in Cornwall, 3 m. SE by S of Launceston, on the Tamer. Area 2,570 acres. Pop. in 1831, 485; in 1841, 487.

LAWKLAND, a township in the p. of Chapham, W. R. of Yorkshire, 3½ m. NW by W of Settle, and W of the Ribble. Area 4,220 acres. Pop. 364.

LAWKOW, a town of Russia in Europe, in the gov. and 144 m. NW of Vilna, district and 28 m. S of Telsze.

LAWRENCE, a parish of Tasmania, in the co. of Westmoreland; bounded on the N and E by Lake river, by which it is separated from the co. of Somerset; on the S by the p. of Ringwood; and on the W by Brumby's river.—Also a group of islands at the entrance of Portland bay, Australia Felix, 12 m. E of Cape Sir Walter Grant, in S lat. 34° 24′ 30″, E long. 141° 41′ 45″.

LAWRENCE, a county in the N part of the state of Alabama, U. S., containing an area of 72 sq. m., bordered on the N by Tennessee river, and watered by Big Nance and Town creeks and their branches, and by the head-streams of Black Warrior river. Pop. in 1840, 13,313; in 1850, 15,250. Its cap. is Moultan.—Also a co. towards the S part of the state of Mississippi, comprising a surface of 790 sq. m., drained by Pearl river and its branches, and by the head-waters of Homochitto river. Pop. in 1840, 5,920; in 1850, 6,485. Its cap. is Monticello.—Also a co. in the S part of the state of Tennessee, comprising an area of 780 sq. m., drained by Shoal creek and its branches, and by those of Sugar creek and Buffalo river. Pop. in 1840, 7,121; in 1850, 9,322. Its cap. is Lawrenceboro'.—Also a co. in the E part of the state of Kentucky, containing an area, generally fertile, of 650 sq. m., bordered on the E by Sandy river, on the SW by Licking river, and drained by Little Sandy river and its branches, and by Blane's creek. Pop. in 1840, 4,730; in 1850, 6,280. Its cap. is Louisa.—Also a co. in the S part of the state of Ohio, containing an area of 430 sq. m., bordered on the S by Ohio river, and drained by Indian, Guyandot, and Symme's creeks. The surface is hilly, and the soil unequal in fertility. The chief productions of the locality are iron ore, coal, and potter's clay. Pop. in 1840, 13,719; in 1850, 15,247. Its cap. is Burlington.—Also a co. towards the S of the state of Indiana, containing a surface, generally hilly, of 438 sq. m., watered by White river, Salt, Guthrie's, Beaver, and Leatherwood creeks. Pop. in 1840, 11,782; in 1850, 12,210. Its cap. is Bedford.—Also a co. in the SE part of the state of Illinois, containing an area of 560 sq. m., bordered on the E by Wabash river, and on the W by Fox river, and watered by Embarrass river and Racoon creek. The banks of the streams are liable to inundation. The soil is

in some parts extremely fertile. Pop. in 1840, 7,092; in 1850, 6,132. Its cap. is Lawrenceville.—Also a co. towards the NE part of the state of Arkansas, comprising a surface, considerably diversified, of 1,300 sq. m., watered by Big Black, Current, and Strawberry rivers. Pop. in 1840, 2,835; in 1850, 4,172. Its cap. is Jackson.—Also a township of Saint Lawrence co., in the state of New York, 25 m. NE of Canton. The surface is hilly, and is drained by St. Regis and Deer rivers. The soil consists of clay loam. Pop. in 1840, 1,845.—Also a township of Mercer co., in the state of New Jersey, 6 m. NE of Trenton. It has a hilly surface, and is drained by Assunpink creek and Stony brook. The soil consists of loam and clay, and is well cultivated. Pop. 1,556.—Also a township of Tioga co., in the state of Pennsylvania, 20 m. NE of Wellsborough. It has a hilly surface, and is drained by Tioga river. The soil consists of gravel and clay. Pop. 888. It contains the v. of Lawrenceville.—Also a township of Washington co., in the state of Ohio, 9 m. NE of Marietta, on Little Muskingum river. It has a hilly surface, and contains iron ore, stone, coal, and several salt springs.—Also a township of Lawrence co., in the same state, 9 m. N of Burlington. Pop. 425.—Also a township of Stark co., in the same state, on the Ohio canal. Pop. 2,043.—Also a township of Tuscarawas co., in the same state, containing the villages of Lawrenceville, Zoar, and Bolivar. Pop. 1,523.—Also a township of Marion co., in the state of Indiana. Pop. 1,437.—Also a township of Van Buren co., in the state of Michigan. Pop. 243.

LAWRENCE (Saint). See Laurence (Saint).

LAWRENCE (Saint), a county in the NE part of the state of New York, U. S., comprising an area, finely diversified, of 2,717 sq. m., bordered for a distance of 75 m. on the NW by the Saint Lawrence, and watered by the St. Regis, Racket, Grass, Oswegatchie, and Indian rivers, and their tributaries. It contains also Black lake, an expansion of Indian river, and several other lakes, and a natural canal which connects Oswegatchie and Grass rivers. Lead and iron ore,—some of the latter magnetic,—and marble, are abundant in this co. Pop 56,706.

LAWRENCE (Saint), the largest river of North America, and one of the largest, if not the largest in the world, the outlet by which the great lakes Superior, Huron, Michigan, Erie, and Ontario, pour their superfluous waters into the gulf of St. Lawrence, and forming for more than half of its course the boundary between the British territories and those of the United States. In different parts of its course, this great river is known by different names. As far up from the sea as Montreal, it is called the St. Lawrence; and this name is usually extended to its course as high as Lake Ontario. From Montreal to Kingston in Upper Canada it is sometimes called the Cataraqui or Iroquois; between Lake Ontario and Lake Erie it is known as the Niagara river; between Lake Erie and Lake St. Clair, as the Detroit; between Lake St. Clair and Lake Huron, as the river St. Clair; and between Lake Huron and Lake Superior, it is called the Narrows, or the falls of St. Mary. Its remotest source is perhaps the St. Louis, which rises in about N lat. 48° 30′, W long. 93°; at an alt. of 1,192 ft. above sea-level, in the Algonquin country, near the sources of the Mississippi and of the Red river, and flows in a SSE course into the W extremity of Lake Superior; and its entire course, comprising the length of the various lakes through which it is considered to flow, to its mouth in the gulf of St. L., where it first divides into two great channels surrounding the island of Anticosti, is upwards of 2,400 m.; its average fall, therefore, from its source is a little more than 6 in. per m. But between Lakes Erie and Ontario, or in that part of its course known as the Niagara, its fall equals 334 ft. in a distance of only 35 m. It receives nearly all the rivers that have their sources in the extensive range or table-land to the northwards called the Land's height, which separates the waters falling into Hudson's bay from those that descend into the Atlantic; and all those that rise in the ridge which commences on its S bank, and runs nearly SW until it falls upon Lake Champlain. Of these the principal streams on the N are the Thames, Ouse, Ottawa, Masquinongé, St. Maurice, Batiscan, St. Anne, Jacques, Cartier, Saguenay, Betsiamites, and Manicouagan; and the Salmon river, Chateaugay, Chambly or Richelieu, Yamaska, St. Francis, Becancour, Gentilley, Du-Chêne, Chaudière, and Echemin, on the S. From its source the general direction of the St. L. is SE through Lakes Superior and Huron, to Lake Erie; nearly E through that lake; and then NE to the gulf. Its course from Lake Ontario to the gulf of St. L. is 770 m. From the NE extremity of Lake Ontario to Montreal, the distance is 190 m.; and the intervening country, though first settled only in 1783, now exhibits all the embellishments of improved cultivation. In this part of the river, and particularly for the first 40 m. below its outlet from Lake Ontario, the channel of the river is filled with a multitude of islands of every size and shape and aspect; and from this circumstance this portion of its course is sometimes termed 'the Lake of the Thousand islands.' Most of these "are covered with dense masses of forest trees; and some of these woody isles, low and flat, give the idea of the tranquil scenes of an Italian lagune, as seen in the heated but pure atmosphere and sky of a Canadian autumn; others are split and rent into a variety of fantastic forms, and present views of singular wildness; again, at another turn of the labyrinthine channel, we pass under a frowning wall of precipitous rock, covered with the moss and lichens of ages, and on whose bare tops, where never yet has man set his foot, the hoary pine or fir lifts its proud dark head, supported only by the finger-like fibres of which its few but firmly-clasping bare roots are formed. Then again another fairy picture presents itself, in groves growing as it were out of the water, and apparently stopping all further progress; whilst in a single second the verdant curtain is drawn, and the eye wanders over a vast tract of rippling water, broken here and there only by a few small rocks projecting above its surface, and bounded by the ancient and interminable forests of the main land." [*Sir R. Bonnycastle's Canadas.*]—About 100 m. below Lake Ontario, a number of rapids interrupt the navigation, and until the execution of the Cornwall canal, and the Military canal below Lake St. Francis, used to call forth all the address and enterprise of the boatmen, who, from the beginning of spring to the end of autumn, were continually passing up and down with loaded batteaux and rafts. Within these two or three years small steamers have begun to descend the rapids, but the attempt is always hazardous. It spreads out also in this part of its course into large lakes, namely the St. Francis, the St. Louis, and Deux Montagnes. The water-communication between Kingston and Montreal is effected chiefly by the Rideau canal, which connects Lake Ontario with the Ottawa, and admits vessels of 125 tons. The Grenville and La Chine canals continue the artificial line of communication to Montreal. By the Erie, Oswego, and Champlain canals, the St. L. is united, on the side of the United States, with the Hudson and the Susquehanna rivers; and by the Ohio and Pennsylvania canals with the basin of the Mississippi. To Montreal, which is 580 m. from the

gulf of St. Lawrence, ships of 600 or 700 tons can ascend with little difficulty. From Montreal to Quebec, a distance of 180 m., the impediments to vessels of large tonnage are not many, and may be easily overcome. About 90 m. below Montreal, the influence of the tide ceases entirely; indeed it is not felt for several miles below; and the St. L. preserves generally a uniform appearance until arriving at the Richelieu rapid, a distance of 52 m., where its bed is so much contracted by huge masses of rock as to leave but a very narrow channel, through which it flows with so rapid a current that it is necessary to use extreme caution in passing it. The banks of the river are of moderate height, but gradually increase on approaching Quebec, until they attain in Cape Diamond, on which that city is built, an alt. of 345 ft. above the level of the water. At Quebec the river is 1,314 yds. in breadth, and continues gradually increasing in breadth until it enters the gulf of St. L., where from Cape Rosier to the Mingan settlement on the Labrador shore, it is 105 m. wide. A little below Quebec is the island of Orleans, placed in the middle of the river, and forming two channels. Beyond this island are several others; and at Riviere-du-Sud the river is increased to 11 m. in breadth, and the general appearance of the adjoining country is extremely beautiful. Below the Riviere-du-Sud, the channel of the river, though 13 m. across, is so greatly interrupted by shoals and islands that at one part the passage is not more than 1,700 or 1,800 yds. across between the two buoys that mark the edge of the shoals; and the currents are numerous, irregular, and very strong. At 103 m. below Quebec, several islands occur to divide the stream of the river; from about 50 or 60 m. farther down, the navigation of the river is clear to the island of Anticosti, about 700 m. from Lake Ontario.

From the beginning of December until the middle of April the water-communication by this river is totally suspended by the frost. During this period the river, from Quebec to Kingston, and between the great lakes, with the exception of the Niagara and the Rapids, is wholly frozen over. The lakes themselves are never entirely covered with ice; but it usually shuts up all their bays and inlets, and extends many miles towards their centres. Below Quebec, the St. L. is not frozen over; but the force of the tides incessantly detaches the ice from the shores, and such immense masses are kept in continual agitation by the flux and reflux that the navigation is totally impracticable in these months. But the surface of the frozen river at this season still offers the best route for transporting produce; and tracks are soon marked out, by which a more expeditious intercourse is maintained by vehicles of transport of all descriptions, than would be possible on the established roads at this season so deeply covered with snow; and this is continued until the approach of spring makes the ice porous, and warm springs occasioning large flaws, render it unsafe. When this alteration takes place the ice soon breaks up, and by the beginning of May is either dissolved or carried off by the current.

The St. L. drains an area of country extending to above 400,000 sq. m., of which, according to Dr. Forry's estimate, 94,000 sq. m. are covered with water. Darby estimates the total water-surface of the St. L. water-system at 72,930 sq. m., embracing in this estimate the surface of Lake Michigan as well as all the other great lakes; and the solid contents of the whole at 1,547,011,792,360,000 cubic ft. Its hourly discharge he estimates at 1,672,704,000 cubic ft., which exceeds by more than one-half his estimate of the hourly discharge by the Mississippi. M'Taggart estimates the discharge of the St. Lawrence at 4,512,000,000 tons per day at an average for 240 days; and 25,560,000,000 tons per day for 125 days, or during the melting of the snow and ice.

LAWRENCE (Gulf of Saint), a bay of the Atlantic, which receives the waters of the above river, formed between the W part of Newfoundland, the E shores of Labrador, the E extremity of the prov. of New Brunswick, part of the prov. of Nova Scotia, and the island of Cape Breton. It communicates with the Atlantic ocean by three different passages, viz. on the N by the straits of Belleisle, between Labrador and Newfoundland; on the SE by the passage between Cape Ray, the SW extremity of the latter island, and the N cape of Breton island; and by the narrow channel, named the Gut of Canso, that divides Cape Breton from Nova Scotia. The distance from Cape Rosier to Cape Ray is 79 leagues; from Nova Scotia to Labrador, 106. In this gulf lie the large islands of Anticosti, and Prince Edward or St. John's, and the Magdalen islands, Brion's island, and the Bird islands. In the entrance, between Cape North and Cape Ray, is the island of St. Paul. In spring the entrance and E parts of the gulf are frequently covered with ice; but the greatest danger to navigation in this gulf arises from the prevalent fogs. "The prevailing winds, during the navigable season, are either directly up or directly down the estuary, following the course of the chains of high lands on either side of the great valley of the St. Lawrence. Thus a SE wind in the gulf becomes ESE between Anticosti and the S coast, ENE above Point-de-Monts, and NE above Green island. The W winds do not appear to be so much guided in direction by the high lands, excepting along the S coast, where we have observed a WSW wind at the island of Bic become W, WNW, and NW, as we ran down along the high and curved S coast, until it became a NNW wind at Cape Gaspé. These winds frequently blow strong for three or four days in succession; the W winds being almost always accompanied with fine, dry, clear, and sunny weather: the E winds as frequently the contrary, cold, wet, and foggy. In the spring, the E winds most prevail, frequently blowing for several weeks in succession. As the summer advances, the W winds become more frequent, and the SW wind may be said to be the prevailing wind in summer in all parts of the river and gulf. Light S winds take place occasionally: but N winds are not common in summer, although they sometimes occur. Steady NW winds do not blow frequently before September, excepting for a few hours at a time, when they generally succeed E winds which have died away to a calm, forming the commencement of strong winds, and usually veering to the SW. The NW wind is dry, with bright clear sky, flying clouds, and showers. After the autumnal equinox, winds to the N of W become more common, and are then often strong steady winds of considerable duration. In the months of October and November the NW wind frequently blows with great violence in heavy squalls, with passing showers of hail and snow, and attended with sharp frost. Thunder-storms are not uncommon in July and August; they seldom last above an hour or two; but the wind proceeding from them is in general violent and sudden, particularly when near the mountainous part of the coast."

LAWRENCE (Saint), or Santa Laurentiia, an island in Behring's sea, near the SW extremity of Behring's strait, 28 m. distant from the coast of Asiatic Russia, in N lat. 64° 30′, W long. 170°. It is about 85 m. in length from E to W; and 28 m. from N to S. Its coasts are low, and bordered with islets. Its interior offers little beyond naked and sterile rocks. Lieut. Sindov explored a portion of the coast of this island in 1764, and gave it the name of the Sindov Isles, supposing it to form a group. About the same period it was visited by some English navigators, who bestowed on it the name of Clarke. Billings, who visited it in 1791, restored its earliest name of Saint Laurentiia in his chart.

LAWRENCEBURG, a village of Perry township, Armstrong co., in the state of Pennsylvania, U. S., 200 m. WNW of Harrisburg, on the W bank of Alleghany river. Pop. in 1840 about 150.—Also a village of Lawrence co., in the state of Tennessee, 75 m. SSW of Nashville, on the E side of Shoal creek. Pop. 350.—Also a village of Anderson co., in the state of Kentucky, 12 m. S of Frankfort, on the W side of Kentucky river.—Also a village of Dearborn co., in the state of Indiana, 86 m. SE of Indianapolis, on the N bank of the Ohio river, 1 m. below the confluence of the Great Miami river, and at the junction of the Whitewater canal.

LAWRENCEVILLE, a village of Lawrence township, St. Lawrence co., in the state of New York, U. S., 231 m. NNW of Albany.—Also a village of Lawrence township, Mercer co., in the state of New Jersey, 6 m. N by E of Trenton, in a fertile plain.—

Also a village of Lawrence township, Tioga co., in the state of Pennsylvania, 158 m. N by W of Harrisburg. It has a hilly surface, and is drained by Tioga river and its branches. The soil consists of gravel and clay.—Also a town of Pitt township, Alleghany co., in the state of Pennsylvania, on Alleghany river, opposite Wainwright's island, and 2½ m. above Pittsburg. Pop. 867.—Also a village of Brunswick co., in the state of Virginia, 73 m. SSW of Richmond, on a branch of Meherrin river. Pop. 350.—Also a village of Montgomery co., in the state of North Carolina, 115 m. WSW of Raleigh, on the E side of Yadkin river.—Also a village of Guinnet co., in the state of Georgia, 84 m. NW of Milledgeville, 8 m. SE of Chattahoochee river. Pop. 250.—Also a village of Lawrence co., in the state of Illinois, 159 m. SE by E of Springfield, on the W bank of Embarrass river. Pop. 350.—Also a village of Monroe co., in the state of Arkansas, 75 m. E of Little Rock, on a small stream, 5 m. E of White river.

LAWRENNY, a parish in the co. and 3½ m. NNW of Pembroke, at Milfordhaven. Pop. in 1831, 422; in 1841, 432.

LAWSHALL, a parish in Suffolk, 6½ m. S by E of Bury St. Edmund's. Area 2,280 acres. Pop. in 1831, 885; in 1841, 925.

LAWSVILLE CENTRE, a village of Lawville township, Susquehanna co., in the state of Pennsylvania, 187 m. NNE of Harrisburg. The township is hilly, and is watered by Snake creek.

LAWU, a volcano in the island of Java, in the principality of Madion, 24 m. E of Surakarta. It emits continually sulphureous vapours.

LAX, a village of Switzerland, in the cant. of the Grisons, 4 m. NE of Ilanz. Pop. 200.—Also a village in the canton of Valais, on the r. bank of the Rhone, 9 m. ENE of Brigg. Pop. 150.

LAXA, a river of Chili, which has its source in a lake of the same name, to the SE of the volcano of Antuco or Tucapel; runs W, between the districts of Rere and of the Isla-de-la-Laxa; and, after a course of about 150 m., joins the Biobio, on the r. bank, 48 m. above Concepcion. It forms a cascade 40 toises in height.

LAXAS, a town of New Grenada, in the dep. of Cauca, 150 m. NNE of Popayan. It had formerly valuable mines in its vicinity.

LAXE-FJORD, or LAYS-FIORD, a bay of Norway, in Finmark, on the N coast, between Tanafiord on the E, and Porsange-fiord on the W.

LAXENBURG, or LACHSENBURG, a town of Austria, in the lower circle of the Wienerwalde, 11 m. SSE of Vienna, and on the railway thence to Glognitz. Pop. 790. It is well-built, and possesses two imperial palaces, one of which was built in 1377 by Duke Albert III.; the other is used as a summer-residence, and has a park, 6 m. in circumf., and intersected by the Schwaecha.

LAXFIELD, a parish in Suffolk, 5¼ m. N by E of Framlington, at the source of the Blythe. Area 3,790 acres. Pop. in 1831, 1,158; in 1841, 1,172.

LAXFORD, a river in Sutherlandshire, which has its source in Loch Stalk, in the p. of Edderachylis, and falls into a bay of the same name, formed by an arm of the sea, and affording excellent anchorage.

LAXTON, a parish in Northamptonshire, 8 m. NW of Oundle, and SE of the Welland. Area 1,370 acres. Pop. in 1831, 188; in 1841, 136.—Also a chapelry in the p. and 3½ m. SE by E of Howden, E. R. of Yorkshire, and about 3 m. S of the Hull and Selby railway. Area 1,520 acres. Pop. in 1831, 281; in 1841, 266.

LAXTON-WITH-MOORHOUSE, a parish in Nottinghamshire, 3 m. SSW of Tuxford, between 2 branches of the Trent. Area 3,610 acres. Pop. in 1831, 188; in 1841, 642.

LAY, a river of France, in the dep. of La Vendée, which rises near St. Pierre, 14 m. N of Fontenay-le-Comte; runs NW, and then SW; and flows into the Atlantic, opposite the isle of Ré, to the W of the embouchure of the Sevre-Niortaise, after a course of 65 m. It is navigable from Beaulieu.—Its principal affluents are the Smagne on the l., and the Petit-Lay and Yon, on the r.

LAYAU, a town of the island of St. Vincent, on the W coast, in a bay, at the mouth of a river, to both of which it gives name.

LAYBACH (GOVERNMENT OF), one of the two great divisions of Austrian Illyria. See article ILLYRIA.

LAYBACH, in Slavonic LABLANA, a town of the Austrian empire, the cap. of one of the two great divisions of Austrian Illyria, in N lat. 46° 1′ 48″, 28 m. NE of Trieste. It stands on the navigable river of the same name; is tolerably well-built; and has 3 suburbs, a town-house, a cathedral, 10 churches, 2 hospitals, a central school with the privileges of a university, an observatory, a public library, a theatre, and an old castle, which stands on an eminence and is now used as a prison. Pop. in 1845, 13,000. L. is the seat of the government-offices for the prov., and the see of a bishop. Its manufactures of woollens and silks have fallen into decay, but its potteries, porcelain manufactures, and tanneries are still thriving; and it has an active carrying trade with Italy, Croatia, and the S of Germany.

LAYBACH (OBER), a town of the Austrian empire, in Carniola, near the source of the river Laybach, 11 m. SW of the larger town of Laybach. Pop. 1,400.

LAYBACH, or LAUBACH, a river of Carniola, which rises near Virth, about 1 m. W of Upper Laybach, and falls, after a short NNW course, into the Save, on the r. bank. It is navigable for boats almost to its head.

LAYCOCK, a parish in Wiltshire, 3 m. S of Chippenham. Area 4,170 acres. Pop. in 1841, 1,780.

LAYDE, a parish in co. Antrim, 36 m. N of Belfast. Area 29,243 acres. Pop. in 1841, 4,218.

LAYDE, a town of Western Africa, on the Senegal, in the country of the Foulahs, 45 m. SE of Goumel.

LAYE, a town on the SW coast of Sumatra, in S lat. 3° 40′.

LAYER-BRETON, a parish in Essex, 6 m. SSW of Colchester. Area 970 acres. Pop. in 1841, 290.

LAYER-DE-LA-HAYE, a parish in Essex, 4½ m. SSW of Colchester. Area 2,490 acres. Pop. in 1831, 637; in 1841, 731.

LAYER-MARNEY, a parish in Essex, 16 m. NE of Chelmsford. Area 1,500 acres. Pop. in 1831, 275; in 1841, 256.

LAYESA, a town of Spain, in the prov. of Valencia, 30 m. S of Teruel. Pop. 750.

LAYHAM, a parish of Suffolk, 2 m. S by W of Hadleigh. Area 2,290 acres. Pop. in 1841, 549.

LAYKAN, a small island in the Eastern seas, near the SW coast of Celebes, in S lat. 5° 32′.

LAYON, a river of France, which issues from the lake of Issemay in the dep. of Maine-et-Loire; runs NE, and then NW; passes Thouarce; and joins the Loire below the bridge of Chalonne, on the l. bank, after a course of 56 m.

LAYOS, a town of Spain, in the prov. and 9 m. SW of Toledo, on the r. bank of the Guadarrauque. Pop. 300. Mines of silver and copper were at one time wrought in the vicinity of this place.

LAYPADOH, a town of Birmah, in the prov. of

Mranma, 12 m. SE of Patanagoh, on the l. bank of the Irawaddi.

LAYRAC, a town of France, in the dep. of Lot-et-Garonne, near the conflux of the Gers and the Garonne, and 4 m. S of Agen. Pop. 1,253.

LAYS, a town of France, in the dep. of Saone-et-Loire, cant. and 2 m. N of Pierre, on the l. bank of the Doubs. Pop. 1,726.

LAYSTERS, a parish in Herefordshire, 4 m. SSW of Tenbury. Area 2,220 acres. Pop. in 1841, 226.

LAYSTON, a parish of Hertfordshire, 1 m. E of Buntingford. Area 1,580 acres. Pop. in 1841, 1,187.

LAYTHAM, a township in the p. of Aughton in Yorkshire, 2½ m. E of Aughton. Area 1,270 acres. Pop. in 1831, 138; in 1841, 109.

LAYTON-WITH-WARBRICK, a township in the p. of Bispham, in Lancashire, 7 m. NW of Wigan. Area 2,000 acres. Pop. in 1831, 943; in 1841, 1,968.

LAYTON (East), a township in the p. of Stanwick, in Yorkshire, 5½ m. N of Richmond. Area 1,010 acres. Pop. in 1831, 156; in 1841, 117.

LAYTON (West), a township in the p. of Hutton-Magna, in Yorkshire, 5 m. S by E of Greta-Bridge. Area 570 acres. Pop. in 1831, 94; in 1841, 88.

LAZARO (San), a town of New Mexico, 50 m. S of Santa Fe.

LAZAROFF, an island of the Pacific, in S lat. 14° 53′, W long. 148° 39′.

LAZGUN PASS, a pass in the Lhassa territory, in Ladakh, leading between Le and Agam on the Shayuk river, at an alt. of 18,500 ft.

LAZISE, a town of Austrian Lombardy, in the prov. of Verona, on the lake of Garda, 10 m. WNW of Verona. It is well-built, and has a castle, with a small harbour. Pop. 2,540.

LAZONBY, a parish of Cumberland, 7 m. NNE of Penrith. Area 11,510 acres. Pop. in 1841, 570.

LAZZAROVICH, in Austrian Dalmatia, one of the four counties in the district of the Mouths of the Cattaro. It forms the NW corner of the district of Xuppa.

LE, a district and town of China, in the prov. of Chih-le, div. and 27 m. S of Paou-ting-fu, and 114 m. SSW of Pekin, in N lat. 38° 32′, and E long. 115° 40′.—Also a district and town in the prov. of Kan-suh, div. of Tae-chu, 165 m. SSE of Lan-chu, in N lat. 34° 10′, and E long. 105° 10′.

LE′, or Leh, a city of Central Asia, the cap. of the country of Ladakh, in the valley of the Upper Indus, in N lat. 34° 9′ 20″, E long. 78° 20′ [*Moorcroft*]. It is situated at the foot of a spur of the immense range of mountains which divide the valley of the Shayuk or Nubra river from that of Ladakh, and of which all the passes exceed 18,000 ft. elevation, at an alt. of about 10,600 ft. [*Strachey*] above sea-level; and is composed of between 400 and 500 flat-roofed houses. The interior of the town is a confused assemblage of houses and narrow alleys. On the S side is a small verdant open space, on the skirts of which are a few of the best houses; and the rajah's residence, a singular but not inelegant structure, on an elevated situation behind the town, overlooks the whole. On the eminences surrounding the town are innumerable Munis and Bhuddist monuments. There is a square fort upon the plain near the town. The mountains in the environs of L. are everywhere as barren as possible; but where there is a stream, a few willows, poplars, and aspens, or a bunch of fir-trees, may be seen. The mean temp. at Le, at mid-winter, is generally about 3° F. The climate is dry, and scarcely any other moisture than snow falls. Three grand fairs are held in the year at L. At these, the concourse of Mussulmans from Yarkund, Lamas from Lhassa, Hindus from the Punjab, and merchants from Cashmere and many other places, is said to be immense.

LEA, a river of England, which rising near Luton in Bedfordshire, runs ESE, and S, by Hertford and Ware, dividing Essex from Hertfordshire and Middlesex, and falls into the Thames a little below Blackwall, after a course of 40 m.—Also a township in the p. of Backford, Cheshire, 3½ m. NNW of Chester. Area 700 acres. Pop. in 1831, 92; in 1841, 115.—Also a township in the p. of Wybunbury, Cheshire, 5 m. SE by E of Nantwich. Area 200 acres. Pop. in 1831, 56; in 1841, 68.—Also a parish, partly in the co. of Gloucester, and partly in that of Hereford, 4½ m. ESE of Ross. Area 530 acres. Pop. in 1831, 161; in 1841, 209.—Also a township in the p. of Preston, Lancashire, 3½ m. W by N of Preston, intersected by the Wyre and Preston railway. Area 3,120 acres. Pop. in 1831, 687; in 1841, 710.—Also a parish in Lincolnshire, 2½ m. SSE of Gainsborough. Area 2,050 acres. Pop. in 1831, 197; in 1841, 198.—Also a parish in Queen's co., containing the town of Portarlington. Area 18,488 acres. Pop. in 1831, 5,761; in 1841, 5,667.

LEA and CLEVERTON, a parish in Wilts, 1½ m. ESE of Malmesbury, included within the parl. boundaries of the borough of Malmesbury. Area 1,170 acres. Pop. in 1831, 419; in 1841, 330.

LEACH, a river of Gloucestershire and Oxfordshire, which falls into the Thames at Lechdale.

LEACOCK, a township in Lancaster co., Pennsylvania, U. S., 44 m. ESE of Harrisburg. Pop. 3,537.

LEADEN, a river of England, which rises near Ledbury in Herefordshire, enters Gloucestershire at Preston, and falls into the Severn opposite the city of Gloucester.

LEADENHAM, a parish in Lincolnshire, 8½ m. NW by W of Sleaford. Area 2,260 acres. Pop. in 1831, 565; in 1841, 598.

LEADER, a small river, rising in the Lammermoor hills, traversing the district of Lauderdale, in Berwickshire; for some distance, dividing that co. from Roxburghshire; and falling into the Tweed, 2 m. below Melrose. It runs with considerable rapidity, is a good trouting stream, and boasts some fine scenery on its banks, particularly as it approaches the Tweed.

LEADHILLS, a mining village, in the moorland p. of Crawford, in the S extremity of the co. of Lanark, about 1,300 ft. above the level of the sea, and perhaps the highest inhabited land in Scotland. It is 46 m. from Edinburgh; and 16 m. from Thornhill in Dumfries-shire. Pop. 950. The aspect of the country around is of the most sterile description imaginable, and the v. occupies a position in a valley, from one side of which a bleak lofty ridge ascends to the height of 2,450 ft. This inhospitable region has, however, attracted to it an industrious community from the lead which has been worked there almost, it may be said, from time immemorial, though the written records, concerning their operation, do not reach further back than about 1600. L. is only about a mile distant from the sister mining-village of Wanlockhead in Dumfries-shire, constituting between them perhaps the richest lead-mining district in the country. Besides galena, no fewer than nine species of lead-ore occur here. In the zenith of the trade, in 1810, L. produced about 1,400 tons annually, valued, according to the then current price, at more than £45,000; but of late years both the price and the quantity produced have materially fallen off, the mines only yielding from 700 to 800 tons annually. Gold is found in all the neighbouring streams in minute particles, and at one time the search for this precious mineral was conducted on an extensive scale. The inhabitants of

Leadhills, who are almost entirely supported by the mines, have long maintained the character of a primitive and well-educated race. L. has the honour of having given birth to Allan Ramsay, the author of the pleasant pastoral of the 'Gentle Shepherd.' Ramsay's father was manager of the mines, and he was born there in 1686, where he spent his earliest years.

LEADING CREEK, a village of Lewis co., in the state of Virginia, U. S., on a small stream of the same name, an affluent of Little Kanawha river. Pop. in 1840, 240.

LEADON (High), a hamlet in the p. of Rudford, Gloucestershire, 4½ m. ESE of Newent. Area 590 acres. Pop. in 1831, 100; in 1841, 105.

LEAFIELD, a chapelry in the p. of Shipton-under-Whichwood, co. of Oxford, 4 m. NW by N of Witney. Area 1,920 acres. Pop. in 1841, 737.

LEAF RIVER, a village of Greene co., in the state of Mississippi, U. S., on the NE side of a stream of the same name, a branch of Pascagoula river.

LEAGRAM-WITH-BOWLAND, a township in the p. of Whalley, co.-palatine of Lancaster, 7 m. WNW of Clitheroe. Area, including Whitewell, 7,960 acres. Pop. in 1831, 288; in 1841, 273.

LEAKE, a parish in Lincolnshire, 7 m. NE of Boston. Area 5,880 acres. Pop. in 1841, 1,859.

LEAKE, a central co. in the state of Mississippi, U. S. Area 576 sq. m. Pop. in 1840, 2,162; in 1850, 5,535. Its cap. is Carthage.

LEAKE (East), a parish in Nottinghamshire, 9 m. S by W of Nottingham. Area 2,504 acres. Pop. in 1831, 975; in 1841, 1,057. This is a polling-place for the S division of the co.

LEAKE (West), a parish in Nottinghamshire, 9½ m. S by W of Nottingham, in the line of the Midland counties railway. Area 1,390 acres. Pop. in 1831, 203; in 1841, 208.

LEAKERVILLE, the cap. of Greene co., in the state of Missouri, U. S., 190 m. SE of Jackson, on the Chickasawha.

LEAL, a village of Russia, in the gov. of Esthonia, district and 21 m. SE of Hapsal.

LEAM, a river of Warwickshire, which rises near Shuckburgh-park; flows successively NE, N, NW, and W; and joins the Avon above Warwick, after a course of 30 m. Its principal tributaries are the Rainsbrook, and the Itchen.

LEA-MARSTON, a parish in the co. of Warwick, 2½ m. N of Coleshill, in the line of the Birmingham and Derby railway. Area 1,130 acres. Pop. in 1831, 269; in 1841, 278.

LEAMINGTON-HASTINGS, a parish in the co. of Warwick, 4 m. NNE of Southam, in the line of the Warwick and Napton canal. Area 3,340 acres. Pop. in 1831, 464; in 1841, 509.

LEAMINGTON-PRIORS, a parish and town in the co. of Warwick, 2½ m. E of Warwick, and 22 m. SE of Birmingham, on the banks of the Leam, and intersected by the Warwick and Napton canal, and the Warwick and Leamington railway, which commences by a junction with the London and Birmingham railway near Coventry, and terminates at Portland-place in this p. Area of p. 1,720 acres. Pop. in 1801, 315; in 1831, 6,209; in 1841, 12,864. —The town is pleasantly situated in a fine country on the river Leam, over which there is here a stone-bridge connecting the ancient village with what is now called the new town. The adjunct, 'Priors,' which distinguishes this place from L.-Hastings, is derived from its having been formerly a dependency of the priory of Kenilworth. Within the last 50 years, L. was only an inconsiderable village; but since the discovery, in 1797, of its medicinal springs, it has been gradually rising in repute, and has now become a resort of the votaries of health or pleasure. The houses which rise on either bank of the river are commodiously constructed, and elegantly furnished as boarding or lodging-houses for the sick or the gay. The principal street is excelled by few in any town throughout the kingdom. The assembly-rooms are handsome; the theatre is a commodious building erected in 1814. Two public libraries, a picture-gallery, a museum, and pleasure-gardens also contribute towards the accommodation and amusement of the visitors of this place. Numerous very handsome private residences have been built in and near the town.—The waters of L. are of three kinds, sulphureous, saline, and chalybeate. The first set of baths for the accommodation of visitors was erected in 1786. New baths and a pump-room were erected in 1812, on the N side of the town, near the river, at the cost of £25,000. The waters may be used either externally or internally. The visiting season commences generally about April, and terminates in November. The scenery of the surrounding country, with Warwick castle in the distance, and the Avon flowing in the vicinity, is beautiful and picturesque.

LEANANE, a beautiful rivulet of co. Donegal, formed by the superfluent waters of Lough-Gartan, at an elevation of 228 ft. above sea-level; and flowing ENE and E, to the head of its estuary in Lough Swilly, at the town of Rathmelton. Its length of course is about 10 m.

LEANG-CHU-FU, or Erginrul, a division and town of China, in the prov. of Kan-suh. The div. comprises 6 districts. The town is 150 m. NNW of Lan-chu, in N lat. 37° 59′, E long. 102° 48′.

LEANG-HEANG-HEEN, a district and town of China, in the prov. of Chih-le, div. of Shun-teen-fu, 18 m. SW of Pekin, in N lat. 39° 44′, E long. 116° 14′. It has a tower outside the walls 5 stories in height.

LEANG-SHAN-HEEN, a district and town of China, in the prov. of Sze-chuen, div. of Chung-chu, 228 m. E of Ching-tu, in N lat. 30° 46′, E long. 107° 51′.

LEANG-TANG, a district and town of China, in the prov. of Kan-suh, div. of Tae-chu, 120 m. SE of Kung-chang-fu, in N lat. 33° 58′, E long. 106° 22′.

LEAO-COU-KHOTON, a town of the Corea, in the prov. of Ping-nan, on the Yalu, a little to the E of Chang-chang-khoton.

LEAOU-CHIN-GAN-TING, a district and town of China, in the prov. of Kwan-se, div. of Chin-gan-fu.

LEAOU-CHING-HEEN, a district and town of China, in the prov. of Shan-tung, div. of Tung-chang-fu.

LEAOU-CHU, a division and town of China, in the prov. of Shan-se. The div. comprises 2 districts. —The town is 84 m. SE of Tae-yuen-fu, in N lat. 37° 2′ 50″, E long. 113° 27′ 30″.

LEAOU-HO, a river of China, which has its source in Mongolia, in the In-chan or Siolki mountains; runs first E under the name of Sira or Chara-Mouren; then bends SSW into the prov. of Leaou-tung; takes the name of Leaou; and after a total course of about 540 m. throws itself into the gulf of Leaou-Tung. Its principal affluents are the Lokha on the r., and on the l. the Her-su and Hu-nu-hu. It is navigable in almost its entire extent.

LEAOU-TUNG, Liao-Tung, Mukden, or Shing-King, a province of Chinese Manshuria, lying between the parallels of 38° 58′ and 42° 50′ N lat., and the meridians of 119° 7′ and 124° 50′ E; and bounded on the NW by Kartshin; on the NE by the district of Kirin; on the E by Corea; on the S by the Yellow sea and the gulf of Leaou-Tung; and on the SW by the prov. of Chih-le in China Proper, from which it is separated by the Great wall of China. It

is a mountainous district; and appears to be richly diversified with hills and valleys, rivers and torrents, fields and forests. Its great river, the Leaou-ho, flows through the centre of the prov., and is joined by two large affluents, the Lokha or Yang-shi-mu and the Hu-nu-hu. The climate is severe during winter. All of the rivers become frozen towards the end of October, and continue ice-bound until March. A large portion of the surface is covered with immense forests, in which the pine, cypress, acacia, and willow are prevalent. Wheat, legumes, apricots, peaches, mulberries, and cotton, are grown. The vine, the chestnut, and the walnut thrive; and ginseng and rhubarb are largely exported. The pop. in 1761 was estimated at 668,852; but this number must have greatly increased since that period, for emigrants have long hastened to this point not only from China but even from the provinces towards the N. The prov. is divided into 2 fu, viz. Tung-tien and Kin-chu; the former containing the cap. and the S part of the prov.; the latter, the W part bordering on China.—The gulf of L. is about 120 m. in length, and 80 m. in breadth. Its entrance lies between Charlotte's point, the extremity of the long peninsular projection of the mainland of this province, which has obtained from English navigators the name of the Regent's sword, on the E, and the mouth of the Lan-ho river on the W, which may be regarded as forming the N limit of the gulf of Pe-che-li: these two gulfs being respectively the N and S portion of the great projecting arm or gulf which the Yellow sea throws out towards the NW.

LEAOU-YANG-CHING, a district and town in the prov. of Leaou-tung, div. of Kin-chu-fu, in N lat. 41° 10′, E long. 123° 27′.

LEAOU-YANG-CHU, a district and town of China, in the prov. of Leaou-tung, div. of Fung-teën-fu.

LEAP, a small village in the p. of Aghancon, King's co., 5¼ m. SE of Birr, on the road to Mountrath.—Also a village and a glen in co. Cork, 5 m. from Roscarbery, on the road thence to Bantry. The glen is a gorge at the head of Glandore harbour, strikingly romantic as a piece of close scenery.

LEAR, a rivulet of co. Kildare, which flows SW along the boundary between co. Kildare and co. Carlow, to the river Barrow, in an entire run of about 9 m.

LEASINGHAM, or Lessingham, a parish in Lincolnshire, 2¼ m. NNW of Sleaford. Area 2,960 acres. Pop. in 1831, 358; in 1841, 472.

LEATHERHEAD, a parish and town in Surrey, 18 m. SW by S of London, and 12 m. NE by E of Guildford, on the river Mole, over which there is here a bridge of 14 arches. Area of p. 3,250 acres. Pop. in 1831, 1,724; in 1841, 1,740. The town consists of four streets, intersecting each other in the centre, and containing several good mansions. Its trade and manufactures are inconsiderable. A large fair for horses and cattle is held on the 10th of Oct. In the vicinity are several handsome villas.

LEATHLEY, a parish in the W. R. of Yorkshire, 10 m. NNW of Leeds, on the N bank of the Warfe. It includes the township of Castley. Area of p. 1,640 acres. Pop. in 1831, 413; in 1841, 382.

LEATHWAITE, a chapelry in the p. of Kirk-Ireleth, co. of Lancaster, 5 m. NW of Ulverston. Area 6,160 acres. Pop. in 1831, 190; in 1841, 202.

LEAU. See Leeuwen.

LEAVENING, a township in the p. of Acklam, Yorkshire, 6 m. SSW of New-Malton. Area 1,110 acres. Pop. in 1831, 854; in 1841, 434.

LEAVENWORTH, a village in Crawford co., in the state of Iowa, U. S., 124 m. S by W of Indianapolis, on the N side of the Ohio, 2 m. below Great Blue river.

LEAVENWORTH (Fort), the most western military station of the United States, situated in N lat. 39° 21′, on the r. bank of the Missouri, in the Indian territory, at an alt. of 912 ft. above sea-level. It consists of 4 wooden block-houses, loop-holed for musketry, and connected by a quadrangular wall.

LEAVINGTON (Kirk), a parish and township in the N. R. of Yorkshire, 5 m. W of Stokesley, on the river Leaven. The parish comprises the townships of Castle-L., Kirk-L., Pickton, and Low Worsall. Area of p. 4,560 acres. Pop. in 1841, 483.

LEAVISHAM, or Levisham, a parish in the N. R. of Yorkshire, 5 m. NNE of Pickering. Area 2,670 acres. Pop. in 1831, 168; in 1841, 163.

LEBA, a river of Prussia, which has its source in Lake Sanow, in the prov. of West Prussia; runs N between the regencies of Danzig and Köslin; enters the prov. of Pomerania; runs first W, then NNW, and throws itself into a lake of the same name, after a course of about 45 m. The lake, which is 60 m. NE of Köslin, is 11 m. in length, and 5 m. in breadth. It is connected by a channel with the Baltic.—Also a town in the regency and 69 m. NE of Köslin, circle and 18 m. NNW of Lauenburg-Batow, on the channel which connects Lake Leba with the Baltic. Pop. 948. It has extensive fisheries, especially of salmon, with which the river abounds, and carries on also an active trade in timber.

LEBACH, a market-town of Prussia, in the prov. of the Rhine, regency of Treves, NNE of Saarlouis.

LEBANON, or Jebel-Libnan, an extensive mountain-system chiefly belonging to Central Syria, but thrown off towards the S from the great chain of Mount Taurus and the lofty table-land of Anatolia, and, under various names and aspects, extending along and beyond the E coast of the Mediterranean to the N shores of the Red sea. Along its whole extent, from Mount Taurus to the Red sea, this mountain-system is skirted on its E side by a vast and elevated plateau, known towards the N as the plain of Syria, and further S as the Great Arabian desert. On its W side is the narrow strip of coast composing Syria and Phœnicia, across which it flings its frequent spurs or buttresses into the Mediterranean; further to the S lies the great plain of Sharon; then comes the desert, the Paran of the Scriptures, extending from the SE corner of the Mediterranean to the valley of El Arabah; and lastly, the peninsula of Sinai. In the centre of this mountain-system lies the great valley which contains the Dead sea, the river Jordan, and the chain of lakes which runs from the sources of the Jordan to the foot of Taurus.

The Alma-Tagh or Amanus, a spur of the Southern Taurus, as it enters the N point of Syria, leaves only the narrow passage of the Armenian gates between it and the gulf of *Issus* or Iskenderun. This range is connected on the SW with the Jebel-Musa, which again is slightly connected with Mount Casius by Jebel-Siman. A little beyond Antioch, the Jebel-Kraad strikes off from the Anti-Casius, and running SSW along the Upper Orontes, forms the water-shed between that river and the Nahr-el-Kebir. On the banks of the latter, the chain takes the name of Jebel-Nosaïri, or Ansari, and running S at the distance of only 12 or 15 m. from the coast, and with an elevation seldom exceeding 1,000 ft., becomes connected with the Jebel-Akkar, or N section of the Jebel-Libnan or Mount Lebanon, whose course, between the parallels of 33° 10′ and 34° 30′, is to the W of S, and at a distance from the coast of the Mediterranean varying from 15 to 20 m. The average elevation of this bold range, which is almost entirely composed of masses of limestone rock, is

between 7,000 and 8,000 ft.; and its culminating point, Jebel-Makmel, occurs between N lat. 34° 10′ and 34° 15′, a little to the S of the great mountain-recess which contains the celebrated cedars of L., which attains an elevation exceeding 12,000 ft. above sea-level, and is covered with perpetual snow. This range, with its declivities on both sides, has a breadth of from 12 to 18 m., and rises abruptly from the valley of Baalbec or Cœle-Syria, on the E side, while on the W it gradually sinks down, in a series of beautiful terraces and valleys to the shores of the Mediterranean. On both sides of the range, a kind of terrace occurs, about mid-height, which divides what is called the Lower L. from the Upper L. To the S of the Boghaz or pass by which the Leontes cuts its way through the chain, it runs for some distance almost parallel to that river, and is prolonged towards the SSW in the Belad Bshirrai. Beyond this, two parallel ridges, or rather a rocky upland, may be regarded as prolonging the great W chain of Palestine to the borders of Arabia Petrea.

The Anti-Lebanon may be regarded as a prolongation of the chain which skirts the valley of the Orontes on the E side. Under the name of Jebel-es-Sharki, or 'Eastern mountain,' it runs parallel to the Lebanon along the E side of the valley of Baalbec, with a breadth in some places of 20 m. Beyond the valley of the Leontes it sends off a branch in a SW direction which unites with the Lebanon and separates the basin of the Jordan from the great northern valley of Syria. From the great mountain mass of Hermon or Jebel-esh-Sheikh, the Anti-L. is prolonged southwards in the Jebel-Heish. The Anti-L. may be regarded as sinking down into the hills of Galilee which surround the W shore of that basin, and terminating in the cliffs which form the N border of the great plain of Esdraelon; but its general connection with the Sinaitic peninsula is kept up by the peaks of Jebel-Attarus, Jebel-Ajlun, Jebel-Morad, and Jebel-Jelad or Gilead.

The general formation of L. consists of carboniferous and mountain limestone, with greywacke and slate here and there rising to the surface. Basalt and other igneous rocks appear to the S and E of Lake Tiberias. Iron and coal occur in different parts of the range. There are very few vegetable productions which do not flourish in the Lower L., but the vine and the mulberry tree are the most important objects of cultivation.

LEBANON, a county in the SE part of the state of Pennsylvania, U. S., comprising an area of 348 sq. m., drained by Swatara creek and its branches. It has an undulating surface, and is very fertile. Pop. in 1840, 21,872; in 1850, 26,125. The capital, which bears the same name, is 24 m. E of Harrisburg, on the Union canal. Pop. in 1840, 2,500. Pop. of township, 6,197.—Also a township of York co., in the state of Maine, 88 m. SW of Augustus, bordered on the W by Salmon Falls river, by which it is divided from the state of New Hampshire. Pop. 2,273.—Also a township of Grafton co., in the state of New Hampshire, 4 m. S of Hanover, bordered on the W by Connecticut river and watered by Masconey river. The banks of the rivers are extremely fertile. Pop. 1,754.—Also a township of New London co., in the state of Connecticut, 31 m. ESE of Hartford. It has an undulating surface, with a fine rich soil, and is watered by Yantic river and its branches. Pop. 2,194.—Also a township of Madison co., in the state of New York, 107 m. W by N of Albany. The surface is hilly, and is drained by Chenango river and its branches. The soil consists of clay loam. Pop. 1,794.—Also a township of Hunterdon co., in the state of New Jersey, 40 m. N by W of Trenton. The surface is mountainous, and is drained by Spruce run and the S branch of Raritan river. The soil is fertile and well-cultivated. Pop. 3,849.—Also a township of Wayne co., in the state of Pennsylvania, generally hilly, and drained by branches of Dyberry creek. Pop. 366.—Also a village of Warren co., in the state of Ohio, in the township of Turtle creek, between two branches of the river of that name, and 85 m. WSW of Columbus. Pop. 1,500.—Also a village of Russell co., in the state of Virginia, 325 m. W by S of Richmond, on a branch of Clinch river.—Also a township of Meig's co., in the state of Ohio, on the river of that name. Pop. 621.—Also a village of Cobb co., in the state of Georgia, 106 m. NW of Milledgeville, on the N side of Chattahoochee river.—Also a village of Marion co., in the state of Kentucky, 59 m. SW by W of Frankfort, on a small branch of Salt river. Pop. 546.—Also a village of Wilson co., in the state of Tennessee, 32 m. E of Nashville, on a branch of Cumberland river. Pop. 1,500.—Also a village of Boone co., in the state of Indiana, 25 m. NW of Indianapolis.—Also a village of St. Clair co., in the state of Illinois, 71 m. S of Springfield. Pop. 250.—Also a village of Searcy co., in the state of Arkansas, 95 m. N by W of Little Rock, on the S side of Buffalo fork of White river.—Also a village of De Kalb co., in the state of Alabama, 112 m. NE of Tuscaloosa, on the N side of Big Wells creek.—Also a township of Cooper co., in the state of Missouri. Pop. 1,009.

LEBBEKE, a department and commune of Belgium, in the prov. of East Flanders, arrond. of Termonde. Pop. of dep. 4,320; of com. 1,004. The village is 3 m. SSE of Termonde, and 17 m. NW of Brussels. It has several breweries, distilleries, and oil mills and extensive tanneries.

LEBEDIAN, a district and town of Russia in Europe, in the gov. of Tambov. The district presents a level surface, and is watered by the Don. It produces corn in great abundance, and has a fine breed of cattle. Pop. 60,300. The town is 117 m. WNW of Tambov, on the r. bank of the Don. Pop. 3,000. It contains 7 churches, 3 of which are built of wood.

LEBEDIN, a district and town of Russia in Europe, in the gov. of Kharkov. The district is situated in the NW part of the gov., and contains 125,000 inhabitants. Tobacco and plums are extensively cultivated in this locality, and besides drying large quantities the inhabitants distil brandy from the latter. The rearing of cattle forms also an important branch of local industry. The town is 81 m. WNW of Kharkov, on the l. bank of the Olchana. Pop. in 1838, 10,515. It is defended by ramparts and a ditch. It contains 3 churches. The houses are chiefly built of wood.

LEBEI, or Lebsi, a river of Russia in Asia, in the prov. of Omsk, which has its source in the Alatan mountains, on the confines of Sungaria; runs first NNW; then bends SW through the marsh at the N side of the Balkash-Nor or Lake Tengiz, and enters that lake between the Ayagus and Aksu.

LEBEHNKE, a village of Prussia, in the regency of Marienwerder, SE of Deutschkrone. Pop. 600.

LEBERING, or Lebring, a village of Austria in Styria, in the circle and SE of Gratz, on the Mur. Pop. 300.

LEBERN, or Labern, a bailiwick of Switzerland, in the S part of the cant. of Soleure, on the S slope of the Jura mountains. The soil varies in fertility, and is in some parts marshy; but it is generally well-cultivated. Cattle are also extensively reared in its pastures. The bail. comprises 4 jurisdictions, and contains 5,650 inhabitants. Grenchen is its principal town.

LEBIAJIA, a town of Russia in Asia, in the gov.

and 240 m. SW of Tobolsk, district and 51 m. ESE of Kourgan.

LEBIAJII, a fortress of Russia in Asia, in the prov. and 105 m. W of Omsk, near the confines of the gov. of Tobolsk. It forms part of the military line of the Ishin.

LEBIAR, or Labiar Forest, an extensive tract in the W part of the Sahara, to the N of Lake Cayor, covered with gum trees.

LEBIDA, or Lebda, a town, now in ruins, in the kingdom and 60 m. ESE of Tripoli, in the Mediterranean. It is the *Leptis-Magnus* of the Romans, and contains magnificent remains of antiquity, now to a great extent buried with sand. It is noted as the birth-place of Septimius Severus.

LEBIDERJAH. See Jalyn.

LEBIDI, a town of Greece, in the nom. of Mantinea, 12 m. NNW of Tripolitza.

LEBIODA, a town of Russia in Europe, in the gov. and 48 m. E of Grodno, district and 21 m. SW of Lida.—Also a town in the gov. and 45 m. NW of Minsk, district and 17 m. SSW of Wileyka.

LEBO, a river of Chili, in the district of Araucania, which has its source about 60 m. S of Concepcion; runs SW; and after a course of about 60 m. throws itself into the Pacific, in S lat. 37° 56′.

LEBOM, or Lebum, a town of the Somauli country, in the kingdom and 60 m. W of Hurrur, on the confines of Abyssinia.

LEBONARY, a town of Russia in Europe, in the gov. and district and 47 m. NNE of Vilna, and 18 m. WNW of Swieciany.

LEBRADE, a village of Denmark, in Holstein, NE of Ploen.

LEBRIJA, a judicial partido and town of Spain, in Andalusia, in the prov. of Seville. The partido comprises 3 pueblos.—The town is 29 m. SSW of Seville, and 15 m. N of Xerez, in a fine undulating plain, 6 m. from the l. bank of the Guadalquivir. Pop. 7,741. It is generally well-built, and contains a fortress now in ruins, a parish church part of which formerly belonged to an ancient mosque, several convents, an hospital, a college founded by Antonio-de-Nebrija, and a post-office. It possesses extensive manufactories of pottery and delft-ware, of blankets and coarse frieze, of wax and of soap; and has several brick and tile-works and lime-kilns. This town occupies the site of the ancient *Nebrissa*, and contains numerous Roman and Moorish remains. It is noted as the birth-place of Juan-Diez-de-Solis, the discoverer of the Rio-de-la-Plata in 1512.

LEBRIJA, or Canaverales, a river of New Grenada, in the dep. of Boyaca, which has its source about 36 m. SW of Pamplona; runs NW past Giron; receives on the r. the Oro, Samabalita, Negro, and Surata; and throws itself into the Magdalena, on the r. bank, 55 m. above Tamalameque, and after a course of about 150 m.

LEBRILLA, a town of Spain, in the prov. and 14 m. SSW of Murcia, partido of Totana, and 18 m. NNW of Carthagena. Pop. 2,179. It is large and well-built; and has a parish-church, three chapels, several convents, an hospital, a public granary, and a custom-house.

LEBUS, a circle and town of Prussia, in the prov. of Brandenburg, regency of Frankfort. Pop. of circle 29,701. The town is 6 m. N of Frankfort, on the Oder. Pop. 1,750. It is the seat of a bishopric, and was formerly a place of importance. Fishing now forms the chief object of local industry.

LEÇA-DO-BALIO, a village and small port of Portugal, in the prov. of Minho, comarca and 6 m. NNW of Porto, on the Atlantic. Pop. 2,400.

LECCE, a town of Naples, in the prov. of Abruzzo-Ultra, district and 16 m. SE of Avezzano, cant. and 2 m. W of Gioja, on a mountain. Pop. 1,700. It contains 3 churches.—Also a district and town in the prov. of Otranto. The dist. comprises 13 cants. The town, which is the cap. of the prov., is 26 m. NE of Gallipoli, and 62 m. ESE of Tarento, in N lat. 40° 21′ 14″, E long. 18° 10′ 42″. Pop. 14,200. It is defended by walls and towers in bad condition, and a deep ditch; and contains a castle, a cathedral, 31 churches, several convents, a fine government-house and town-hall, a Jesuits' college, a foundling hospital, and a theatre; but has declined in pop. and trade, and exhibits a desolate appearance. It possesses manufactories of woollen, cotton, and silk fabrics, of lace, and of tobacco, and carries on some trade in wine, oil, snuff, lint, and articles of local manufacture. It is supposed to stand on the site of the ancient *Lycia* or *Lycum*.

LECCO, a pleasant market-town of Lombardy, in the gov. and 32 m. NNE of Milan, deleg. and 17 m. ENE of Como, at the extremity of the E arm or branch of Lake Como, at the efflux of the Adda. Pop. 4,330. It is ill-built, and its ramparts are in ruins. It has several silk and cotton-mills, two iron works, a manufactory of copper and iron-ware, several oil-mills; and carries on an active transit trade in copper, iron, silk, grain, and salt. The olive, the vine, and the mulberry are cultivated in its environs.

LECELLES, a commune of France, in the dep. of the Nord, cant. and 1½ m. NNW of St. Amandles-Eaux. Pop. 2,132. It has an oil-mill, and manufactories of agricultural implements and of nails.

LECERA, a town of Spain, in the prov. and 36 m. SSE of Saragossa, and partido of Belchite, in a flat and arid locality. Pop. 1,946. It has an hospital.

LECH, a river, or rather mountain-torrent, which has its source in the Tyrol, in the circle of the Upper Innthal, in the mountains of Arlberg; runs first NE, then E, into Bavaria; separates the circles of Swabia and Upper Bavaria, passes to the E of Augsburg, and throws itself into the Danube, on the r. bank, 14 m. W of Neuberg, and after a course of 150 m. Its principal affluent is the Wertach, which it receives on the l. The bed of this river is thickly strewn with islands, and from the quantity of debris with which its waters are loaded during the floods which recur periodically in May, is liable to frequent changes. In winter it is almost everywhere fordable. A little above Fussen it narrows to the width of about 90 ft., and forms a fine cascade. Lower down it is crossed by several wooden bridges.

LECHE, a river of Peru, in the intendency of Truxillo, and prov. of Lambayeque, which has its source on the W side of the Andes, near Ingaguasi, runs SW past Morrope, and throws itself into the Pacific, 24 m. NW of Lambayeque, and after a course of 75 m.

LECHENA, a town of Greece, in the Morea, in the dio. of Elis, on the E bank of the gulf of Klarentza, 8 m. N of Gastouni, and 27 m. NNW of Lebrinoi.

LECHEROLLES, a village of France, in the dep. of the Seine-et-Marne, cant. and 2 m. SE of La Ferté-Gaucher, and 14 m. ESE of Coulommiers. Pop. 290. In the environs are quarries of fine white stone and beds of potters' clay.

LECHFELD, an extensive plain in Bavaria, in the circle of the Upper Danube, watered by the Lech, and containing the town of Augsburg. It is noted for the battles of which it has been the scene, viz. between Pepin and the Bavarians and Saxons, in which the former was victorious, in 743; for the conquest of Charlemagne over the Huns in 794; for the defeat of the Franks and Bavarians by the Hungarians in 910; and for the defeat of the latter by the Germans, under Otho I., in 955.

LECHHAUSEN, a village of Bavaria, in the circle of Upper Bavaria, on the Lech, opposite Augsburg. Pop. 2,100. It has manufactories of a variety of silk and linen fabrics, and an iron-work.

LECHINICH, or LECHNICH, a town of Prussia, in the prov. of the Rhine, regency and 14 m. S of Cologne, and 16 m. WNW of Bonn, in a fertile plain, at the confluence of the Erft with the Nassel. Pop. 1,700. It is surrounded with a ditch, and has 2 ancient gates in a good state of preservation. The houses are regular in appearance, but consist chiefly of wood and earth. Leather and oil are the only articles of local manufacture, and the little trade that is carried on in this town consists chiefly in pigs and poultry. The castle of L. was founded in 1330 by Henry of Virneuburg, archbishop of Cologne. In 1642 it successfully resisted the united forces of France and Saxe-Weimar. Its fortifications, as well as those of the town, were destroyed at the peace of Westphalia.

LECHKERREH, an oasis and caravan-station in the desert of Barca, 24 m. NE of Djallou.

LECHLADE, or LEACHLADE, a parish and market-town in the co. of Gloucester, 22 m. SE of Cheltenham, at the confluence of the river Leach with the Isis or Thames, which is navigable up to St. John's bridge for vessels not exceeding 80 tons burden. The distance from London by water is 146½ m. Area 3,980 acres. Pop. in 1831, 1,244; in 1841, 1,300. The town consists principally of one long wide street, containing some good houses, and skirting the margin of the Thames, which is here crossed by St. John's bridge. The inhabitants derive considerable advantages from its situation at the highest navigable point of the Thames, as the produce of the cos. of Gloucester and Wilts is brought hither to be transmitted to the metropolis.

LECK, a parish in co. Donegal, 1 m. ESE of Letterkenny. Area 10,745 acres. Pop. in 1831, 4,036; in 1841, 3,422.—Also a chapelry in the p. of Tunstall, co.-palatine of Lancaster, 2½ m. SE by E of Kirby-Lonsdale, on a branch of the Lune. Area 3,880 acres. Pop. in 1831, 326; in 1841, 288.

LECK, the name borne by the lower part of the course of the Old Rhine from the point where it separates the provs. of Utrecht and Gelderland, till joined by the Merwe branch, when it assumes the name of the Maas.

LECKBECK, a river of England, in the co. of Lancaster, which rises near Kirby-Lonsdale; forms for a short way the boundary between Lancashire and Westmoreland; descends with impetuosity towards Leck, and thence flows into the Lune.

LECKEN, a parish in co. Westmeath, E of Ballinalock. Area 3,202 acres. Pop. in 1841, 995.

LECKFORD, a parish in the co. of Southampton, 2 m. NNE of Stockbridge, on the Anton or Test river. Area 2,530 acres. Pop. in 1841, 231.

LECKHAMPSTEAD, a chapelry in the p. of Chieveley, Berks, 8¼ m. E by S of Lambourn-Chieveley. Pop. in 1831, 402; in 1841, 372.—Also a parish in Bucks, 3½ m. NE by N of Buckingham. Area 2,070 acres. Pop. in 1831, 499; in 1841, 505.

LECKHAMPTON, a parish in Gloucestershire, 2½ m. S by W of Cheltenham, intersected by the Cheltenham and Gloucester railway. Area 1,330 acres. Pop. in 1831, 929; in 1841, 1,770: an increase due to its proximity to Cheltenham.

LECKNICZA, a town of Servia, in the sanj. of Semendria, 18 m. WSW of Czavatz, on the r. bank of the Drin.

LECKNITZ, a river of Prussia, in the prov. of Brandenburg, which falls into the Spree.

LECKONFIELD, a parish in the E. R. of Yorkshire, 3½ m. NNW of Beverley. Area 4,030 acres. Pop. in 1831, 307; in 1841, 374

LECKPATRICK, a parish of co. Tyrone, containing part of the town of Strabane. Area 13,451 acres. Pop. in 1831, 6,030; in 1841, 5,723.

LECOUSSE, a commune of France, in the dep. of Ille-et-Vilaine, cant. and 1 m. N of Fougeres. Pop. 1,311.

LECROPT, a parish of Scotland, lying at the union of the Teith and Allan with the Forth, partly in the co. of Perth, and partly in that of Stirling. Pop. in 1841, 513.

LECTOURE, an arrondissement, canton, and town of France, in the dep. of Gers.—The arrond., comprising 5 cants., has an area of 98,833 hectares. Pop. in 1841, 52,140.—The cant. comprises 14 com. Pop. in 1841, 14,557.—The town is situated in N lat. 43° 55′ 54″, 20 m. N of Auch, on the river Gers, on a hill accessible only on one side. It has a communal college, and an hospital; and possesses manufactories of leather, beetroot sugar, and coarse woollens, and some traffic in brandy, corn, and wine. Pop. in 1831, 6,495; in 1841, 6,262.

LECZNA, a town of Poland, in the palatinate of Lublin, 15 m. ENE of Lublin. Pop. 2,266.

LED SOUND, a secure and convenient channel of the Baltic, in the Aland archipelago, formed by the island of Lemlard on the N, and a multitude of islets and rocks on the S and W. A winding channel, 18 m. in length, and in some places not exceeding 100 yds. in width, leads from this sound to Lumpar bay and the fortress of Bomarsund.

LEDA, a small but navigable river of Hanover, in the prov. of E. Friesland, formed by the union of the Ohe and the Marka. It falls into the Ems near Leer, on the r. bank, after a NW course of 24 m.

LEDBURY, a parish and market-town in the co. of Hereford, 13 m. E by S of Hereford, on the post-road from Hereford to Tewkesbury, and intersected by the Gloucester and Hereford canal. Area of p. 9,010 acres. Pop. in 1831, 3,909; in 1841, 4,591.—The town is situated in the E angle of the co., at the S extremity of the Malvern-hills, on a declivity about 1 m. W of the river Leden. It consists chiefly of two principal streets, intersecting each other at right angles. In the more ancient part of the town many of the houses have projecting stories; the modern ones are built of red brick, and have a respectable appearance. The church is a fine old structure, partly in the Norman and partly in the early English style.

LEDDER, a river of Wales, in Caernarvonshire, which falls into the Conway, 12 m. S of Aberconway.

LEDE, a large village of Belgium, in the prov. of E. Flanders, 8 m. SW of Dendermonde. Pop. 3,200.

LEDEGHEM, a town of Belgium, in W. Flanders, 12 m. E of Ypres, on the l. bank of the Heulebeke. Pop. 3,100.

LEDEN, or LEADON, a river in Gloucestershire, rising near Ledbury, on the NW border of the co., and running SE, by Upleadon and Rudford, to the Severn, at the isle of Alney near Gloucester. The Hereford and Gloucester canal runs along the valley of this river, from Rudford to Alney.

LEDENSK, a town of Russia, in the gov. of Vologda, 50 m. N of Totma.

LEDERHOSE, a village of Prussian Silesia, in the reg. and 30 m. WSW of Breslau. Pop. 350.

LEDESMA, the ancient *Bletisa*, a town of Spain, in the prov. and 21 m. WNW of Salamanca. It is of great antiquity. Near it is a warm mineral spring, with a bath of Moorish construction. Pop. 1,800.—Also a village in the prov. and 18 m. SW of Logrono.

LEDETSCH, a town of Bohemia, on the Sazacoa, 50 m. SE of Prague. Pop. 1,050.

LEDIANOIA, a bay or gulf of the Frozen ocean, on the N coast of Nova Zembla, in N lat. 78°.

LEDIGNAN, a canton and village of France, in the dep. of Gard, 8 m. S of Alais.

LEDIGOS, a village of Spain, in the prov. of Palencia, 12 m. WNW of Carrion. Pop. 250.

LEDNICZ, a small town of Hungary, in the com. of Treuselim, 80 m. NNE of Presburg.

LEDNOCK, a small river of Scotland, in Perthshire, which falls into the Erne, at Comrie.

LEDRI, a small river in the S of Tyrol, which falls into the lake of Guarda.

LEDSHAM, a parish and township in the W. R. of Yorkshire, 6 m. N of Pontefract. The York and Derby railway passes S of the town, and the Leeds and Selby on the N. The p. comprises the townships of L., Fairburn, and Ledstone. Area of the p. 5,190 acres. Pop. in 1831, 944; in 1841, 1,061.

LEDWICK, a river of England, in Salop, which, with three tributary streams, joins the Teme, 5 m. S of Ludlow.

LEDYARD, a township in New London co., in the state of Connecticut, U. S., 47 m. SE of Hartford. Pop. 1,871.—Also a township in Cayuga co., in the state of New York, 171 m. W of Albany. Pop. 2,143.

LEE, a parish in Bucks, 3¼ m. SE by S of Wendover Area 500 acres. Pop. in 1831, 186; in 1841, 142.—Also a parish and village in Kent, 6 m. SE by E of London, on the edge of Blackheath. The v., which is pleasantly situated, contains many well-built houses. Area 1,470 acres. Pop. in 1831, 1,108; in 1841, 2,360.

LEE, a large and beautiful river of co. Cork. It issues from the romantic lake of Gougane-Barra; expands, after a run of 4 m., into Lough Allua; and flows past Inchegeelagh, near Macroom, and past Ballincollig and Cork, to the head of Cork-harbour at Little Island, or the estuarial expanse of Lough Mahon. Its course, with the exception of unimportant sinuosities, is all E; and its length of run, from its source to Little Island, is 34½ m. The Bride and the Awbeg, which fall into the L., must not be confounded with the larger Cork rivers of the same name which fall into the Blackwater. The Sullane is the Lee's largest affluent; and the only other considerable one, additional to it and to the Bride and the Awbeg, is the Glanmire, which falls into rather the estuary than the river, immediately above Little Island. The Lee is navigable for ships to the city of Cork; and is affected by the tide, and navigated by boats, about 2 m. above the city.—Also a rivulet of co. Kerry, which rises in three head-streams, and runs W past the town of Tralee, to the head of Tralee-bay.—Also a small stream in Cheshire, which runs into the Weaver, 2 m. N of Nantwich.

LEE, a county in the SW part of the state of Virginia, U. S., comprising an area of 512 sq. m., situated in a valley between Cumberland and Powell's mountains, and drained by Powell's river and its branches. Pop. in 1840, 8,441; in 1850, 10,267. Its cap. is Jonesville.—Also a co. in the SW part of the state of Georgia, containing a superficies of 600 sq. m., watered by Flint river and its branches. Pop. in 1840, 4,520; in 1850, 6,660. Its cap. is Starkville.—Also a co. in the N part of the state of Illinois, comprising a surface of 720 sq. m., drained by Rock and Green rivers. Pop. in 1840, 2,035; in 1850, 5,289. Its cap. is Dixon.—Also a co. in the S part of the Iowa territory, comprising an area of 600 sq. m., bordered on the SW by Des Moines river, and on the NE by Skunk river, and watered by Sugar, Half-breed, and Lost creeks. It has an undulating surface, but is very fertile. Pop. in 1840, 6,093; in 1850, 18,867. Its cap. is Fort Madison.—Also a township of Penobscot co., in the state of Maine, 125 m. NE of Augusta, watered by a branch of Mattawanekeag river. Pop. in 1840, 724.—Also a township of Stafford co., in the state of New Hampshire, 38 m. E by S of Concord, watered by Lamprey, Little, North, and Oyster rivers. Pop. 926.—Also a township of Berkshire co., in the state of Massachusetts, 128 m. W of Boston, on the Housatonic river. The surface is hilly, but the soil very fertile. Pop. 2,428.—Also a township of Oneida co., in the state of New York, 114 m. WNW of Albany. It has an undulating surface, and is drained by Canada and Fish creeks. The soil consists of clay and sandy loam. Pop. of township, 2,936. Pop. of village, 150.—Also a township of Athens co., in the state of Ohio, 81 m. SE of Columbus. Pop. 848.—Also a township of Cahoun co., in the state of Michigan.

LEEBOTWOOD, a parish in Salop, 4 m. NNE of Church-Stretton. Area 1,600 acres. Pop. in 1831, 223; in 1841, 233.

LEEBROCKHURST, a parish in Salop, 2½ m. SE by E of Wem, on the E bank of the Roden. Area 550 acres. Pop. in 1831, 150; in 1841, 165.

LEE (St. John), a parish in Northumberland, 2 m. NNW of Hexham, between the South and North Tyne, and intersected by the Carlisle and Newcastle railway. The parish includes the townships of Wall, Bingfield, West Acomb, Anick, Anick-Grange, Cocklaw, Fallowfield, Hallington, Portgate, and Sandhoe. It is rich both in mines of coal and of lead. Area 15,090 acres. Pop. in 1831, 1,962; in 1841, 1,947.

LEE'S CREEK, a river of the United States, in Virginia, which runs into the Ohio, in N lat. 38° 57′.—Also a river of Kentucky, which runs into the Ohio, in N lat. 38° 36′.

LEECH LAKE, a lake in North America, in the Algonquin territory, one of the feeders of the Mississippi, into which it discharges itself by a short stream flowing NE, in N lat. 47° 14′, W long. 93° 39′, at an alt. of 1,356 ft. above the level of the gulf of Mexico, and 2,675 m. distant from that gulf. The whole face of the country along the river to this place, has the appearance of an impenetrable morass or boundless savannah; but on the borders of L. lake are some oak, and large groves of sugar-maple.

LEEDS, a parish and village in Kent, 5 m. SE by E of Maidstone, on a branch of the Medway. Area 1,760 acres. Pop. in 1831, 613; in 1841, 675.

LEEDS, a parish, parliamentary borough, and important manufacturing town, situated in the honour of Pontefract, in the W. R. of Yorkshire, on the Aire and Calder navigation, and the Leeds and Liverpool canal, and in communication with the North Midland, the Selby and Hull, the Bradford and Halifax, Leeds and Thirsk, and Manchester and Leeds railways. It is distant by railway from Birmingham 115 m., from Bolton 53 m., from Derby 74 m., from Halifax 21 m., from Hull 55½ m., from Liverpool 75 m., from London 186½ m., from Manchester 42½ m., and from York 31 m. The river Aire flows through the p. in a SE direction, receiving in its course numerous small *becks* or rivulets. The limits of the borough coincide with those of the p., being 30 m. in circumf.; extending 7½ m. from N to S, and 7¼ m. from E to W; and comprising the town of L., with the out-townships and chapelries of Armley, Beeston, Bramley, Farnley, Holbeck, Hunslet or Hunflet, Chapel-Allerton, Headingley-with-Burley, Wortley, and Potter-Newton, and parts of the townships of Seacroft and Temple-Newsham. Area of the p. 19,221 acres. Pop. in 1801, 53,162; in 1831, 123,393; in 1841, 152,054; in 1851, 172,270.—The township is about 3 m. in length, and 1½ m. in breadth. It contains several hamlets, and the village of Woodhouse. Area of the township 3,050 acres. Pop. in 1801, 30,669; in 1831, 71,602; in

1841, 88,741; in 1851, 101,331, or with the suburbs of Hunslet and Holbeck, 134,995. The number of inhabited houses within the parl. borough in 1851 was 36,165; of uninhabited, 1,646. In 1839 a committee of the town-council reported that of the total pop. of the town-proper, exclusive of the outlying suburbs, amounting to 82,220, the passive as respects employment was 20,445, leaving the 61,675 active, and classified thus:

Engaged in manufacture by power,	10,663
Hand-loom weavers,	1,289
Woolcombers,	138
Select trades,	13,233
Miscellaneous do.,	17,916
Other children and domestic servants,	18,436

The number of dwellings—not in all cases separate houses, but dwellings occupied by separate families—was 18,279; of which 16,773 were occupied by English families, 996 by Irish, 70 by families belonging to other countries, and 440 unoccupied. With the exception of the townships of L., Holbeck, and Hunslet, the p. is chiefly devoted to agricultural and mineral purposes. The most important of the latter are the coal-mining operations by which the manufacturing energies and growth of the town have been principally sustained; there are also large quarries of freestone, slate, and flag-stone for pavements. Numerous and handsome seats and villas, scattered throughout the vicinity of L., are inhabited by opulent families connected with the manufactures of the district.

Town Proper.] The town is wholly situated within the limits of the township of L., on the N bank of the Aire and Calder navigation; but there are populous and thriving suburbs in Holbeck and Hunslet on the opposite bank of the river, which are connected with the town by 6 bridges. The town extends on the slope and partly on the summit of a hill which rises from the N bank of the river, and from the top declines to the E, W, and N. It extends upwards of 1½ m. along the river from E to W, by about 1 m. in breadth from S to N. The W part of the town is the most elegant. Park-place, Woodhouse-square, Park-square, and Hanover-square, are finely edificed. The NW portion, near the Commercial buildings, contains some very excellent streets, while a number of good dwelling-houses greatly relieve the unfavourable impression created by the inferior districts. The buildings of the town are in general of brick, tinged of a deep red colour from the presence of iron in the clay, which is obtained in the immediate vicinity. The streets are in general well-built, though in the older parts of the town inconveniently narrow. At the junction of Park-row and Infirmary-street, upon a pedestal of granite, stands a fine bronze statue of the late Sir Robert Peel, erected by public subscription in 1852.—In 1853, the foundation was laid of a town-hall, which is to comprise the two law-courts for the W. R., the borough-court, and council-room, and a great central hall, 190 ft. long by 72 ft. wide, and 72 ft. high. The whole structure will form a parallelogram of 250 by 200 ft., with 4 façades, raised on an elevated platform.—The borough-gaol is a handsome castellated structure on the S side of the Aire, about 1 m. W of the town. An extensive system of sewerage is now in process of execution.

Manufactures.] The great woollen manufacture, which extends its ramifications to the most distant extremities of the empire, is principally concentrated in L. and its vicinity. In the larger factories in and about L., since the introduction of machinery, all the processes of cloth-making are carried on, from the breaking of the fleece to the packing of the cloth for market. Superfines are now largely made; swandowns, toilenets, kerseymeres, pelisse-cloth, and various other fancy articles, are also manufactured. The manufacturers of mixed cloth have chiefly occupied the villages to the W of the town, and on the banks of the Aire; white cloths, on the other hand, are chiefly manufactured about Dewsbury, and near the river Calder. Various kinds of stuffs; carpets, blankets, camblets, shawls, shalloons, &c., are made. In 1853 there were 21 flax-mills at work in the p. of L., some of them amongst the largest in the empire. There are also extensive dye-houses and dressing-shops, where both woollen and worsted goods are furnished, after being purchased in the rough state at the cloth-halls of L. and Huddersfield, and the piece-halls of Bradford and Halifax. Amongst the flaxen textures, thread, linen, canvas, and sacking, are made to a considerable extent. Large tobacco manufactories were some years since established; and there are extensive potteries and glass-works, chemical works, paper and corn-mills, and foundries and engine-factories. The manufacture of locomotive engines employs upwards of 2,000 hands. The coal which supplies the immense steam-power in general at work, is provided from mines in the vicinity of the town.—The original market for woollen cloth was held on L. bridge. In 1711 the first cloth-hall was erected.—The Coloured cloth-hall, erected in 1758, is a quadrangular building of brick, enclosing an open area, 120½ yds. long, and 66 yds. broad, divided into six streets. Each street contains two rows of stands, and each stand measures 22 inches in front, having marked on it the name of the clothier to whom it belongs. The total number of stands is 1,800, and each is freehold property. In this hall the country manufacturers dispose of their coloured cloths, in the rough state, to the merchants and finishers. The White cloth-hall, built in 1775, is on the same plan, and of nearly the same extent. The market-days are on Tuesdays and Saturdays, on which days alone the merchants are permitted to buy or to inspect the cloths in the hall.—The Commercial buildings, constituting a sort of exchange for the merchants, immediately in front of the Coloured cloth-hall, form an elegant structure of Ionic architecture, with colonnades.—The central market, the principal ornament of the E part of L., exhibits in front a handsome elevation of Grecian architecture. The interior is very spacious and commodious. The centre is divided into three walks with stalls, and a gallery is carried round three sides of the building, with a bazaar on one side.—The Free market, in Vicar lane and Kirkgate, occupies an area of about 9,758 sq. yds., and affords ample accommodation for dealers in cattle, pigs, hay, vegetables, fruit, and other commodities.—The Shambles consist of streets with commodious shops on each side, and affording ample accommodation to the trade.—The South market consists of a number of commodious and uniform shops for retail dealers, surrounding a spacious area, in the centre of which is a temple or cross. The quarterly leather fairs are held here.—The Corn-exchange or Corn-market, is a handsome building at the head of Briggate-street, erected in 1828-29 at a cost of about £12,500.—A spacious stock-exchange was erected in Albion-street in 1846.—Among the buildings reared by private enterprise, one of the most striking is the great flax-mill belonging to the Messrs. Marshall, in which all the processes of flax-manufacture, save those of sorting and heckling, are conducted in one vast apartment. This building is 132 yds long, and 72 yds. wide (inside measure), and 20 ft. high. The roof consists of 72 brick arches, supported on 72 iron pillars, and secured together by strong iron work. There are 66 glass domes in the roof, 48 ft. round,

and 11 ft. 6 inches high. The total weight of the roof is 4,000 tons. There are 4 steam-engines of 100 horse-power, and 2 of 80 horse-power each attached to this great establishment; and one engine of 7 horse-power does nothing but blow hot or cold air into the room. The building covers more than two acres of ground.

Municipal government, &c.] The town of L. was incorporated by letters-patent 2° Charles I. Under the new municipal act, the borough, divided into 12 wards, was appointed to be governed by 16 aldermen and 48 councillors. The number of municipal voters is about 9,500. In 1839 the income of the borough, including £11,369 derived from borough rates, amounted to £17,421; in 1846-7 to £21,236; in 1849-50, to £27,488. Under the reform act, the borough of L., which is co-extensive with the p., returns 2 members. The number of electors registered in 1837, was 5,894; in 1851, 6,300.—The public buildings, connected with the government of L., are the court-house, prison, and barracks. The present court-house and prison is a handsome edifice, in Park Row, founded in 1811. The principal front consists of a portico and two wings. On each side of the vestibule are the rotation-office, and the West riding magistrates' room, communicating with the great room, in which is an elevated stage for public accommodation, capable of containing 800 persons. Spacious cavalry barracks at Buslingthorpe, on the boundary of the township, were erected at an expense of £28,000, in 1819-20.

Churches, schools, &c.] There are 35 district churches in the parish of L., of which 25 are in the town and suburbs, and about 40 dissenting places of worship. The new parish church erected in 1839-40 by subscription, at a cost of £12,000, is in the Gothic style of the latter end of the 14th cent. The nave and chancel are thrown open, and are 28 ft. wide in the clear, 47 ft. high, and 160 ft. long together. The tower is 27 ft. square, and 130 ft. high. St. Saviour's is a magnificent building designed in the rich style of the early part of the 14th cent. There are also several large and handsome chapels for Baptists, Independents, Methodists, Swedenborgians, Unitarians, the Society of Friends, and Roman Catholics. In 1839, according to the report of the statistical committee already referred to, the places of worship in the township of L. afforded accommodation for 47,051 persons, viz.—13,255 in the churches of the Establishment, 11,160 in Wesleyan chapels, 6,030 in Independent chapels, and 16,626 in chapels belonging to all other denominations. A new general cemetery was formed in 1835. It occupies about 10 acres, and is tastefully ornamented. The free grammar school is well endowed, and is attended by about 150 scholars. In the township of L., in 1839, there were 154 general daily schools, attended by 3,488 males and 2,911 females, and taught by 42 masters and 112 mistresses; besides 20 factory-schools, attended by 230 males and 130 females. The number of Sunday schools was 50. The total number of teachers in these latter schools was 1,425; 6,759 children were at school on the week-days, being about 1 to 12 of the whole pop.; and 11,429 were partaking of Sunday school instruction. Large day-schools are connected with the Mechanics' institution; and the total number of Sunday school pupils was upwards of 12,000, in 1853. The industrial training school for the township receives and educates 400 children. The principal literary and scientific institutions are the Philosophical and Literary society, the Mechanics' institute, the school of Medicine, a school of design, established in 1846, a Roman Catholic literary institute, a musical union, a choral society, and Zoological and Botanical gardens, occupying about 20 acres near Headingley. The Mechanics' institute is a very thriving society, numbering above 1,800 members, and possessing a library of between 7,000 and 8,000 vols.—Amongst the recreative institutions are a theatre, assembly-rooms, concert-room, news-room, music-hall, public baths, and archery ground. There are numerous philanthropic and benevolent institutions. Of these, the General infirmary, and the House-of-recovery for fever cases, the Dispensary, and Hospital for women and children, are among the most important.

History.] L. is a place of great antiquity, but its origin and the derivation of its name are wholly unknown. After the Conquest, L. came into possession of the De Lacies. In 1642, Lord Clarendon characterises L., Halifax, and Bradford, as "three very populous and rich towns, depending wholly upon clothiers." In the civil war the town was taken by Sir Thomas Fairfax. War, however, was not its severest visitation during this calamitous period: it repeatedly suffered under the dreadful ravages of the plague. In 1644-5 a fifth part of its pop. was cut off by this horrible scourge; the town was nearly deserted, and grass grew in the streets.

LEEDS, a township of Lower Canada, in the co. of Megantic, watered by the Becancour and several smaller streams. It is in its greater extent very fertile, producing grain, flax, hemp, and abounding in excellent timber. Pop. 173.—Also a county and township of Upper Canada, in the Johnstown district. The co. comprises 10 townships. It returns a member to the house-of-assembly. The township is bordered on the S by the St. Lawrence, and intersected by the Gananoque river, an affluent of the St. L., and the Rideau canal. The former forms the outlet of a chain of lakes, 3 in number, which lie towards the N and across the central part of the township.—Also a township of Kennebec co., in the state of Maine, U. S., 21 m. W by S of Augusta, bordered on the W by Androscoggin river, and intersected by the Androscoggin railway. The soil possesses considerable fertility. Pop. in 1840, 1,736; in 1851, 1,952.—Also a village of Catskill township, Greene co., in the state of New York, 28 m. SSW of Albany, on Catskill creek. Pop. in 1851, 300.

LEEFDAEL, a department and commune of Belgium, in the prov. of Brabant. Pop. of dep. 1,702. The village is in the arrond. and 6 m. SW of Louvain, and 10 m. E of Brussels, on the r. bank of the Voer. Pop. 1,286. It has several breweries.

LEEK, an extensive parish and a market-town in Staffordshire, 154 m. NW by N of London, 22 m. NNE of Stafford, and 14 m. SE of Macclesfield, on the Churnet. Area of p. 34,370 acres. Pop. in 1831, 18,387; in 1841, 11,738; in 1851, 13,292. The p. comprises the market-town of L., the chapelries of Endon, Henecote, and Rushton-Spencer, and the townships of Bradnop, Longsdon, Heaton, Leekfrith, Rushton-James, Rudyard-with-Caudery, Stanley, and Tittesworth.—The town, one of the handsomest in the county, occupies the summit and declivities of a pleasant eminence above the river Churnet, nearly in the centre of a spacious valley. It is a place of great antiquity. The silk manufacture is extensively carried on here. The articles in silk and mohair for which this town is chiefly noted, are sewing-silks, twist-ferrets, galloons, handkerchiefs, shawls, buttons, ribbons, sarcenets, and broad silks. A considerable number of women and children are employed in the neighbouring villages, in the manufacture of Florentine buttons. The principal occupation of the hand-loom weavers is the production of black, checked, or figured silk kerchiefs, and a few gros-de-naples and figured gown pieces of the first quality, the best plain black ribbons, and silk serges.

LEEK, or LEAKE, a parish in the N. R. of Yorkshire, 6 m. N of Thirsk. Area 7,520 acres. Pop. 1,173.

LEEK (De), a commune of Holland, in the prov. and 9 m. WSW of Groningen, in a marsh and near a lake of the same name. Pop. 4,451.

LEEK-FRITH, a township in the p. of Leek, Staffordshire, 5 m. N by W of Leek. Pop. 926.

LEEK-WOOTTON, a parish in Warwickshire, 2½ m. NNE of Warwick, W of the Avon, and intersected by the Birmingham and Warwick canal. Area 1,860 acres. Pop. in 1831, 433; in 1841, 360.

LEELANAU, a county in the state of Michigan, U. S., on the E shore of the lake of that name, and W of Grand Traverse bay. It contains several considerable sheets of water, and is intersected by Betsy's river. Along the lake it presents several high sand bluffs.

LEEMING, a chapelry in the p. of Burneston, N. R. of Yorkshire, 2 m. ENE of Bedale, and W of the Swale. Pop. in 1841, 682.

LEENANE, a small fishing village in co. Galway, 17½ m. NW by W of Oughterard, and 136½ m. W of Dublin.

LEENDE, a commune of Holland, in the prov. of North Brabant, cant. and 7 m. SE of Eindhoven, and 12 m. WSW of Helmont. Pop. 1,528.

LEER, an amt or bailiwick and town of Hanover, in the principality of Ost Friesland, 17 m. S of Aurich, on the r. bank of the Leda, near its confluence with the Ems. Pop. in 1845, 6,719. It has three churches—a Catholic, a Reformed, and a Lutheran—and a college; and possesses extensive manufactories of linen, woollen fabrics, hosiery, hats, leather, glue, soap, oil, vinegar, and several distilleries, extensive bleacheries, &c., and carries on an active trade in grain, cattle, butter, cheese, honey, wax, linen, and flax. It has also several docks. Pop. of bail. 17,112.

LEERBACH, a village of Hanover, in the dist. and 4 m. SSW of Clausthal, in the midst of the Harz mountains. Pop. 550. It has extensive iron-works.

LEERBECK, a department and commune of Belgium, in the prov. of Brabant, arrond. of Brussels. Pop. of dep. 583; of com. 571.

LEERDAM, a town of Holland, in the prov. of South Holland, cant. and 7 m. NW of Gorkum, on the r. bank of the Linge. Pop. 2,665. In the vicinity is the little village of Acquoi, noted as the birthplace of Jansen.

LEERNE-SAINT-MARTIN, a department and commune of Belgium, in the prov. of East Flanders, arrond. of Gand. Pop. 787. It is watered by the Lys, and possesses an oil-mill and several breweries and distilleries.

LEERNES, a department and commune of Belgium, in the prov. of Hainault, arrond. of Charleroi, and watered by the Sambre. Pop. of dep. 1,112; of com. 382.

LEERS, a commune of France, in the dep. of the Nord, cant. and 4 m. SE of Lannoy, and 10 m. E of Lille. Pop. 1,821.

LEERS (Nord), a department and commune of Belgium, in the prov. of Hainault, arrond. of Tournai. Pop. of dep. 734; of com. 174.

LEERS-ET-FOSTEAU, a department and commune of Belgium, in the prov. of Hainault, arrond. of Charleroi. Pop. of dep. 479; of com. 410.

LEERSUM, a parish of Holland, in the prov. and SE of Utrecht. Pop. 610.

LEES, a hamlet and chapelry in the p. of Ashton-under-Lyne, Lancashire, 1½ m. E of Oldham.

LEES, a village of France, in the dep. of the Lower Pyrenees, cant. and 1½ m. W of Accous, and 17 m. S of Oleron, near the Gave-d'Aspe. Pop. 882. In its vicinity are quarries of fine marble, and two copper mines.

LEESBURG, a village of Maurice River township, Cumberland co., in the state of New Jersey, U. S., 78 m. S by W of Trenton, on the E bank of Maurice river. Pop. in 1840, 100.—Also a village of London co., in the state of Virginia, 153 m. N of Richmond, 1½ m. N of Potomac river, on an elevated plain, at the foot of Killoctan mountains. Pop. 2,500.—Also a village of Washington co., in the state of Tennessee, 278 m. E of Nashville, on the E side of an affluent of Nolichucky river. Pop. 200.—Also a village of Harrison co., in the state of Kentucky, 27 m. NE of Frankfort, on the W side of an affluent of Licking river.—Also a village of Fairfield township, Highland co., in the state of Ohio, 64 m. SW by S of Columbus. Pop. 350.—Also a village of Kosciusko co., in the state of Indiana, 133 m. N by E of Indianapolis, 2 m. NW of Tippecanoe river.

LEESE, a township in the p. of Sandbach, Cheshire, 2½ m. NE of Middlewich, and N of the Dane. Area 390 acres. Pop. in 1831, 126; in 1841, 151.

LEESE, a village of Hanover, in the co. of Hoya, on the Weser, to the S of Nienburg. Pop. 1,027.

LEEST, a department and commune of Belgium, in the prov. of Antwerp, arrond. of Malines, watered by the Senne. Pop. of dep. 1,400; of com. 400.

LEESTONE, a rivulet, headland, and fishing and coast-guard station in co. Down. The headland and station are 1½ m. E of Kilkeel, at the mouth of the river of the same name.

LEESVILLE, a village of Sharon township, Schoharie co., in the state of New York, U. S. Pop. in 1840, 125.—Also a village of Campbell co., in the state of Virginia, 147 m. W by S of Richmond, at the junction of Stanton river and Goose creek. Pop. 75.—Also a village of Lawrence co., in the state of Indiana, 78 m. S by W of Indianapolis, on the W side of Guthrie's creek. Pop. 200.

LEETOWN, a village of Jefferson co., in the state of Virginia, U. S., 177 m. N by W of Richmond. Pop. 75.

LE-CHING, a district and town of China, in the prov. of Shan-se, div. and 42 m. NE of Lu-gan-fu, in N lat. 36° 25′, and E long. 113° 27′.

LE-CHUEN, a district and town of China, in the prov. of Hu-pih, div. of She-nan-fu.

LEEN-CHING, a district and town of China, in the prov. of Fo-keen, div. and 30 m. ESE of Ting-chu-fu, in N lat. 25° 37′ 12″, and E long. 116° 49′ 50″.

LEEN-CHU, a division and town of China, in the prov. of Kwang-tung. The div. comprises 2 districts. The town is 130 m. NNW of Canton, on an affluent of the Pe-keang, in N lat. 24° 50′, E. long. 112° 14′.

LEEN-CHU-FU, a division and town of China, in the prov. of Kwang-tung. The div. comprises 3 districts. The town is on the Leen-keang, near its entrance into the gulf of Tonquin, 100 m. W of Kaou-chu-fu, in N lat. 21° 38′ 54″, and E long. 108° 58′ 50″ (obs. of mis.), or according to the charts of the Eng. Adm., 107° 20′.

LEEN-HWA-TING, a district and town of China, in the prov. of Keang-se, div. of Keih-gan-fu.

LEEN-KEANG, a district and town of China, in prov. of Fo-keen, div. and 21 m. ENE of Fuh-chu, at the entrance of a small river into the Eastern sea, in N lat. 26° 8′, and E long. 119° 20′.—Also a river in the prov. of Kwang-tung, which runs SW, and after a course of about 75 m. throws itself into the gulf of Tonquin, at the town of Leen-chu. The estuary of this river forms a good harbour, and in the adjacent sea are productive pearl fisheries.

LEEN-PING-CHU, a district and town of China, in the prov. of Kwang-tung, div. of Hwuy-chu-fu, 126 m. NE of Canton, in N lat. 24° 19′ 12″, and E long. 114° 17′ 30″.

LEEN-SHAN-HEEN, a district and town of

China, in the prov. of Kwang-tung, div. of Leen-chu, in N lat. 24° 45′, and E long. 112°.

LEEUWARDEN, an arrondissement, canton, and town of Holland, in the prov. of Friesland. The arrond. comprises 10 cant., and contains 93,220 inhabitants. The town, which is the capital of the prov., is 35 m. W of Groningen, and 72 m. NE of Amsterdam, on the Ee, in N lat. 53° 12′ 14″, and E long. 5° 47′ 33″. Pop. in 1840, 21,956. It is surrounded by a rampart of earth, enclosed by a moat, and is intersected by numerous canals, communicating with those of Harlingen and Groningen. It is well-built, the streets are straight and spacious, and the canals are tastefully lined with trees. The principal buildings are the palace of the prince of Orange, the churches, 12 in number, one of which contains the tombs of the princes of Orange, and an old edifice of the 16th cent.,—one of the richest specimens of brick and stone works mixed to be found in Holland,—now used as a military house of correction. Close to the Harlingen gate is a massive Gothic tower, the church belonging to which was swept away by a storm. L. has also a synagogue, a fine town-hall, an exchange, and an arsenal. It possesses extensive manufactories of linen, paper, &c., and has a large general trade.

LEEUWBRUG, a commune of Belgium, in the prov. of East Flanders, dep. of Denderleeuw. Pop. 315.

LEEUWEN, a village of Holland, in the prov. of Gelderland, cant. and 2 m. W of Druten, and 14 m. WNW of Nimeguen, on the l. bank of the Waal. Pop. 1,500.

LEEUWENBERG. See Lion's Head.

LEEUWERGEM, a department and commune of Belgium, in the prov. of E. Flanders, arrond. of Audenard. Pop. 648.

LEEUWIN (Cape), a headland of Western Australia, on the coast of the co. of Sussex, on the W side of Flinders bay, in S lat. 34° 19′, and E long. 115° 8′. It is a low hill, opposing to a tremendous sea an inclined plane of some acres of solid granite.

LEEUW SAINT PETER, a department and commune of Belgium, in the prov. of Brabant, arrond. of Brussels, watered by the Zuen and Senne, and intersected by the Charleroi canal. Pop. 3,565.

LEEWARD ISLANDS. See Antilles.

LEFAO, a town on the NW coast of the island of Timor, in the Sunda archipelago.

LEFF, a river of France, in the dep. of the Côtes-du-Nord, which has its source near Lezlac, passes Château-Laudren, and throws itself into the Trieux, on the r. bank, 3 m. below Pontrieux, after a course in a generally NNW direction of about 30 m.

LEFFE, a village of Austrian Lombardy, in the prov. and 12 m. ENE of Bergamo, district and 1½ m. S of Gandino. Pop. 1,200. It has manufactories of woollen fabrics.

LEFFINGHE, a department and commune of Belgium, in the prov. of West Flanders, arrond. of Bruges. Pop. 1,645.

LEFKA, a village of Greece, in Livadia, in the nom. and 8 m. WSW of Thebes. It occupies the site of the ancient *Leuctra*, noted for the victory of Epaminondas over the Lacedemonians in the year 371 B.C.

LEFKEH, a town of Turkey in Asia, in Anatolia, in the sanjak of Sultan-Oghi, 45 m. ENE of Brusa. It contains about 400 houses neatly built of sun-baked brick, and has a mosque, a great convent, a public bath and a caravanserai.

LEFKOSIA. See Nicosia.

LEFONGA, an island of the S. Pacific, in the group of the Hapai islands, in the Tonga archipelago, in S lat. 19° 50′, and W long. 174° 30′. It is about 8 m. in length and 3 m. in breadth. It is surrounded by coral reefs; and on the E side is a shelving rock covered at high-tide. Towards the centre of the island the soil appears to be fertile and well-cultivated. The inhabitants are numerous, and have made some progress in the arts of civilization.

LEFTIMO, a district of the island of Corfu, comprising its S extremity. Its soil is almost entirely marl, and its principal produce oil. Its 5 principal villages, which are contiguous, have a conjoined pop. of about 2,000, whose manners and morals generally contrast unfavourably with those of other Corfiote districts.

LEFTWICH, a township in the p. of Davenham, Cheshire, 1 m. S of Norwich, between the Weaver and Wenlock, and on the Grand Junction railway. Area 1,110 acres. Pop. in 1841, 2,001.

LEGANES, a town of Spain, in New Castile, in the prov. and 7 m. SW of Madrid, and partido of Getafe, in a pleasant and salubrious situation. Pop. 1,905. It has a parish church, 4 chapels, several hospitals, excellent barracks, and a public granary. The manufacture of chocolate, and the rearing of cattle, form the chief branches of local industry.

LEGANGER, a parish of Norway, in the diocese and 78 m. NE of Bergen, on the N side of the Sogne-Fjord. Pop. 3,230.

LEGANIEL, a town of Spain, in the prov. and 56 m. NNE of Cuenca, and partido of Uclés, on a calcareous rock, 3 m. from the Tagus. Pop. 1,220. It has manufactories of broom. The environs afford wine, and are noted for their breed of pigs.

LEGARDA, a town of Spain, in the prov. of Alava, partido and 3 m. WNW of Vitoria, near the gorge of Mount Arrato. Pop. 60.

LEGAU, or Lechau, a town of Bavaria, in the circle of Swabia, presidial and 6 m. W of Grönenbach, and 15 m. NW of Kemplen. Pop. 600.

LEGAZPIA, a town of Spain, in the prov. of Guipuzcoa, and partido of Vergera, 28 m. SW of San Sebastian, and 8 m. NE of Mondragon, on the l. bank of the Urola. Pop. 1,083. It has a parish church, a convent, an hospital, and a prison. It has some manufactures of coarse linen fabrics, but the iron works in the vicinity and the rearing of cattle form the chief branches of industry.

LEGBOURN, a parish in Lincolnshire, 3 m. SE of Lincoln, on the Great Northern railway. Area 1,910 acres. Pop. in 1831, 449; in 1841, 461.

LEGE, a canton, commune, and town of France, in the dep. of Loire-Inferieure, arrond. of Nantes. The cant. comprises 4 com. Pop. in 1831, 6,780; in 1841, 7,291. The town is 26 m. S of Nantes. Pop. in 1841, 3,401.—Also a village in the dep. of the Haute-Garonne, cant. and 5 m. SW of St. Beat, on the l. bank of the Aune, an affluent of the Garonne. Pop. 200. In the vicinity are mines of argentiferous lead, and quarries of marble.

LEGELHURST, a village of the grand duchy of Baden, in the circle of the Middle Rhine, E of Kehl. Pop. 1,414.

LEGENDRE ISLAND, the northernmost of Dampier's group off the NW coast of Australia. It is 9 m. long and from a ½ to 1½ m. broad. Its NW point is in S lat. 20° 18′ 45″, E long. 116° 46′.

LEGER (Saint), a hamlet of France, in the dep. of Calvados, arrond. of Caen, and com. of Carcagny. Pop. 119.—Also a village in the dep. of the Gironde, cant. of St. Symphorien, 12 m. W of Bazas. Pop. 800. —Also a village in the dep. of the Loire-Inferieure, cant. of Bouaye, 11 m. WSW of Nantes. Pop. 452. —Also a town in the dep. of the Seine-et-Oise, cant. and 7 m. NNW of Rambouillet. Pop. 850.

LEGER-SOUS-BEUVRAY (Saint), a canton and commune of France, in the dep. of the Saone-et-Loire, arrond. of Autun. The cant. comprises 7

com. Pop. in 1831, 6,692; in 1841, 7,462. The village is 11 m. WSW of Autun. Pop. 1,222. It carries on a considerable trade in wood.

LEGER-AU-BOIS (Saint), a village of France, in the dep. of the Seine-Inferieure, cant. and 8 m. S of Blangy, and 11 m. NE of Neufchatel. Pop. 950. It has a manufactory of glue.

LEGER-DU-BOSCDEL (Saint), a village of France, in the dep. of the Eure, cant. and 3 m. ENE of Bernay. Pop. 352. It has several iron-works.

LEGER-DE-FOUCHERET (Saint), a commune of France, in the dep. of the Yonne, cant. and 3 m. ENE of Quarré-les-Tombes. Pop. 1,499. It has a manufactory of glue. Fine micaceous sand is found in the locality.

LEGER-SUR-D'HEUNE (Saint), a commune of France, in the dep. of the Saone-et-Loire, cant. of Chagny, 10 m. WNW of Chalons-sur-Saone. Pop. 1,597. It has several gypsum and tile-works.

LEGER-MAYNAZEIX (Saint), a commune of France, in the dep. of the Haute-Vienne, cant. of Magnac-Laval, 17 m. NE of Bellac. Pop. 1,623.

LEGER-DE-MONTBRELLAS (Saint), a village of France, in the dep. of the Vienne, cant. and 3 m. WNW of Trois-Moutiers, and 8 m. NW of Loudun. Pop. 550.

LEGER-DE-MONTBRUN (Saint), a village of France, in the dep. of the Deux-Sèvres, cant. and 5 m. ENE of Thouars. Pop. 764. It has several mineral springs.

LEGER-DE-PEYRE (Saint), a commune of France, in the dep. of the Lozère, cant. and 4 m. N of Marvejols. Pop. 1,477. It has manufactories of various kinds of woollen fabrics. In the environs are a copper-mine and several mineral springs.

LEGER-DES-VIGNES (Saint), a village of France, in the dep. of the Nievre, cant. and 2 m. N of Decize, near the r. bank of the Loire. Pop. 350. It has a bottle-work, and contains a coal-depot.

LEGERWOOD, a parish in Berwickshire, 5 m. S of Lauder. Area about 14 sq. m. In its N corner it attains an elevation, in Boon-hill, of 1,090 ft. above sea-level; its S division is wholly occupied by a broad-based height called L. hill. Pop. 571.

LEGESBY, a parish in Lincolnshire, 3 m. SSE of Market-Raisen. Area 3,230 acres. Pop. 326.

LEGGU, a village on the coast of Guinea, about a $\frac{1}{4}$ m. inland from Babli-point, and $3\frac{1}{4}$ m. SSW of a table-hill rising to 520 ft. above sea-level.

LEGGUINO, a town of Austrian Lombardy, in the prov. and 25 m. WNW of Como, district and 5 m. WNW of Gavirate, on the E bank of Lago Maggiore.

LEGHAIBA, or Gobba, a town in the kingdom of Tripoli, in Barca, 15 m. SW of Derna.

LEGHEA, a station in the desert of Nubia, on the route of the Sudan and Cairo caravan, 120 m. NW of New Dongola.

LEGHORN [Ital., *Livorno;* French, *Livourne;* Span. *Liorno*], a large town and sea-port on the W coast of Italy, in the grand-duchy of Tuscany, prov. and 15 m. SW by W of Pisa, 45 m. WSW of Florence, in N lat. 43° 32′ 7″, E long. 10° 17′ 7″. It is of a square form, and about $2\frac{1}{2}$ m. in circuit, but has two large suburbs. On the side of the sea it is well-fortified; and towards the land it is enclosed by walls. The streets are in general wide, straight, clean, and well-paved, especially that called La Via Grande, which traverses the town in a direct line, from the gate of Pisa to that of the harbour, opening near its centre into a spacious square (*n*). The NW end of the town, or that lying between the citadel and the old castle, is intersected by canals which carry the merchandise to the doors of the warehouses. The private houses are for the most part well-built, but there are few public buildings of interest. At one of the corners of the great square stands the Duomo, or high church, a Gothic fabric remarkable only for its vault. Exclusive of this there are 6 Catholic parish churches, 2 Greek churches, an Armenian chapel, numerous synagogues, and a Turkish mosque. The ducal palace is a building of little importance. On the side of the harbour is a fine marble statue of Ferdinand I., grand-duke of Tuscany, supported by four colossal slaves, in bronze. The other remarkable structures are the arsenal (*m*), the warehouses for salt, tobacco, and oil, the theatre, and the public baths. L. contains also 3 hospitals, and a charity-

school for girls. The principal literary institution is an academy of sciences, literature, and the arts, with a library of 6,000 vols. open to the public.

The maritime accommodations of L. consist of a roadstead, and an outer and an inner harbour. The outer harbour, which is the real port, is difficult to enter on account of the shelves which obstruct the approach; and notwithstanding the pains taken to clean it, is frequently incumbered with mud; but ships exceeding 400 tons, for which it has not sufficient depth of water, lie securely in the spacious road to the WNW, moored to pillars with great iron rings. The outer harbour is protected from the swell of the waves, and in a considerable degree from the wind, by a fine mole (*a a a*) of 600 paces in length, which forms a pleasant promenade, exhibiting not only the town and shipping, but several islands in the Tuscan sea. The Darsena or inner harbour (*s*), is only a small basin constructed inside of the other for the grand-duke's galleys. On an island on one side of the port is the lazaretto (*b*), said to be the finest establishment of the kind in Europe, and consisting of a variety of buildings divided into squares, through which there is a constant and free circulation of air. A second and third lazaretto lie about 1½ m. to the S of the Lazaretto di Santo Rocco. The warehouses are airy and extensive; and the merchandise, after being opened, remains untouched for a certain time. The lighthouse of L. stands on a rock a little to the SW of the mole (*c*), and is brilliantly illuminated at night. In 1834, the free port franchises were greatly enlarged and its limits extended by the admission of the suburbs. There is regular steam-communication with Genoa and Marseilles on the one side, and Civita Vecchia and Naples on the other; and railroad communication, by the Leopolda railway, with Pisa, Empoli, and Florence; with Sienna by a line from Empoli; and with Pescia and Lucca by a line from Pisa.

L., though far from the largest city, is perhaps the greatest commercial depot of Italy. It is the residence of consuls from the principal states of Europe, and the chief medium of Italian commerce with the Levant and the coast of Barbary. It is annually visited by upwards of 4,000 vessels; and its trade, with the exception of the period of French domination, has been in a state of continual progression. In 1757 it amounted in national produce to about £166,666; it 1834 to £1,733,333. The average annual import of British manufactures is about £600,000. The shipping of the port consists of about 550 vessels. It supplies the interior of Italy with the produce of the rest of Europe, of the Levant, and of the colonies; and in return exports the produce and manufactures of the adjacent part of Italy, silks, strawhats and plait, oil, fruits, borax, cheese, anchovies, marble, and sulphur, cream of tartar, coral, rags, hemp, wool, drugs, and objects of fine art. The manufacturers of Silesia and other parts of Germany find this a valuable market for their linen, the English for their woollens, and the French for their silks. In the town of L. the chief branch of manual industry is the working of coral and alabaster. The other manufactures, such as those of silk, leather, ropes, soap, and paper, are on a small scale. Shipbuilding engages many hands.—The pop. has varied considerably in the present age, according to the state of trade. In 1791 it was 50,790; in 1812, 45,504; in 1836, 76,397; in 1845, 80,195. Of this number above a sixth part are Jews, who here enjoy considerable privileges, and are said to form the wealthiest part of the community. Almost all the inhabitants are engaged in commerce; and several English houses of extensive connection are established here.

L., formerly *Liburnum* and *Liburni Portus*, can boast of no antiquities, having been in the 15th cent. little more than a village immersed in swamps and sea-weed, when it was sold by the Genoese to Florence, in exchange for Sarzana, a town more contiguous to the former, and 100,000 golden florins. It is indebted for its prosperity to the family of Medici, the princes of which successively enlarged and fortified it, constructed the port and mole, declared it a free harbour, and encouraged Jews and commercial strangers to settle in it. Canals have rendered the neighbouring marshes fit for culture, and in some measure dissipated the noxious effluvia, though the air still continues somewhat unhealthy. Good water being scarce, government caused a stream of excellent water to be conveyed hither from the mountains of Colognole, by an aqueduct 12 m. in length. In the environs of L., the most interesting object is the churchyard of the English (*d*), where, among many other interesting monuments, is to be seen that of Smollet, and of Francis Horner.

L'EGLISE, a commune and village of Belgium, in the prov. of Luxemburg, cant. of Neufchateau. Pop. 766.

LEGNAGO, a fortified town of Austrian Italy, in the Veronese, 22 m. SE of Verona, and 26 m. ENE of Mantua, in N lat. 45° 11′ 18″, E long. 10° 59′ 13″. It is divided by the Adige into two parts, and that part on the l. bank of the stream is called Porto-Legnago. The public buildings consist of several monasteries, a royal gymnasium, and a theatre. Pop. 5,700. Its trade is of some importance, and it has a weekly market for silk, corn, and rice. A canal was dug, in 1762, from this town to Ostiglia, on the Po, near Mantua.

LEGNAJA (Borgo-di), a town of Tuscany, 1 m. W of Florence, near the Arno. Pop. 2,100.

LEGNANO, a town of Austrian Italy, on the r. bank of the Olona, 14 m. NW of Milan. It is connected with Legnarello, on the opposite bank of the river, by a bridge. Pop. 2,800, chiefly engaged in cotton and silk manufactures.

LEGNONCINO, a mountain of Lombardy, in the NE of the prov. of Como, near the E bank of the Lake of Como. Alt. 4,980 ft.

LEGNONE, a mountain of Lombardy, in N lat. 46° 5′, E long. 9° 25′, rising to nearly 8,000 ft. above sea-level.

LEGORETTA, a town of Spain, in the prov. and 15 m. SSW of St. Sebastian. Pop. 590.

LEGRAD, a town of Hungary, in the com. of Szegech, at the confluence of the Drave and the Muhr, 15 m. E of Varasdin. Pop. 2,350. It was considerably injured by a succession of earthquakes, from the 8th to the 20th of November 1778.

LEGUAN ISLAND, a small island at the mouth of the river Essequibo, in Guayana.

LEGUE (Le), a small port of France, dep. of Cotes-du-Nord, on the Channel. Pop. 750.

LEGUEVIN, a small town of France, in the dep. of Haute-Garonne, 9 m. W of Toulouse. Pop. 1,000.

LEGUMO, a small town of Austrian Italy, in the Milanese, on Lago-Maggiore, 41 m. NNW of Milan.

LEH. See Le.

LEHDINE, a prov. and small town in the W part of the Birman empire, between the Irawaddi on the E and the Romah-Pokung-lung mountains on the W.

LEHE. See Bremerlehe.

LEHEN, a small town of Germany, in Baden, 3 m. NW of Freyburg, with 800 inhabitants.

LEHESTEN, a village of Saxe-Meiningen, in the bail. and 6 m. SE of Gräfenthal, on a rising ground between the Sirmitz and the Loquitz. Pop. 700.

LEHIGH, a river of America, which rises in Lu-

zerne co., near Wilkesbarre, in Pennsylvania, U. S., and flows through a most important coal region, a distance of 100 m., to the Delaware river at Easton. It is navigable by means of dams, locks, and canals, from Easton to Whitehaven, a distance of 84½ m. —Also a co. in the E part of Pennsylvania. Area 389 sq. m., skirted by the Lehigh river on the NE. Its cap. is Allentown. Pop. in 1840, 25,787; in 1850, 32,940.—Also a township in Northampton co., in Pennsylvania, to the S of Blue mountain. Pop. 2,049.

LEHIGH GAP, a pass in Blue mountain, in the state of Pennsylvania, U. S., 104 m. ENE of Pennsylvania, through which the Lehigh river passes between precipitous cliffs rising 1,200 ft. above the bed of the stream.

LEHIGHTON, a village in Northampton co., in Pennsylvania, U. S., 36 m. WNW of Easton, on the W bank of the Lehigh, which is here crossed by a bridge 214 ft. in length.

LEHMAN, a township in Luzerne co., in the state of Pennsylvania, U. S., 121 m. NNW of Harrisburg. Pop. 530.

LEHNA, or Bambori, a small town and fortress on the coast of Abasia, 15 m. SSE of Pitzunda, and 28 m. NNW of Sukum-Kaleh. It has a few bazaars kept by Armenian traders. The vicinity is clothed with a dense forest in which the box becomes a giant, and even the juniper attains a circumf. of 15 ft. The arbutus, likewise, and the oleander, tamarisk, olive, fig, rhododendron, and pomegranate attain great luxuriance.

LEHNE, a river of Prussia, which rises in the duchy of Westphalia, and runs into the Roer, 2 m. below Schwiert.

LEHNIN, a town of Prussia, in the Middle mark of Brandenburg, 15 m. WSW of Potsdam. Pop. 950.

LEHRBERG, a town of Bavaria, in the circle of Franconia, on the Rezat, 5 m. NW of Anspach. Pop. 900.

LEHRE, a village of the duchy of Brunswick, circle of Riddagshausen, on the Schunter, 6 m. NW of Königslutter. Pop. 750.

LEHRI, a town of Beluchistan, in N lat. 29° 14′, near the S base of a mountain-ridge connecting the Suliman range with the Hala range.

LEIA, a province of Lahore, to the NW of Multan, skirted by the Sind on the W. It is a fertile and well-cultivated district. Its cap., of the same name, is situated about 3 m. E of the Indus, in N lat. 30° 59′, E long. 70° 59′. It is a thriving place, with a pop. of about 15,000.

LEIBA, a town of Spain, in the prov. of Burgos, 9 m. NNW of Santa-Domingo, on the r. bank of the Tiron. Pop. 1,300.

LEIBEN, a town of the archduchy of Austria, 4 m. NE of Pechlarn, near the r. bank of the Danube.

LEIBISCH, a village of Prussia, in the reg. and 50 m. S of Marienwerder, and 6 m. ENE of Thorn. Pop. 200.

LEIBITZ, or Libice, a small town of Hungary, in the palatinate of Zips, 1 m. S of Käsmarkt. Pop. 2,260.

LEIBNITZ, a small town of Austria, in Styria, on the Sulm, at the confluence of the Lasnitz, 16 m. S of Gratz. Pop. 1,050.

LEICESTER, a parliamentary borough, the cap. of the co. of Leicester, on the Midland Counties railway, by which it is brought into connection with all the great lines traversing the inland districts, and with Birmingham, Derby, Nottingham, Manchester, and London, distant by railway from Aylesbury 70 m., Birmingham 48 m., Derby 29¼ m., Leeds 102 m., London 103¼ m., Rugby 20 m. The town is pleasantly situated almost in the centre of the co., in a gentle hollow, on the E bank of the sluggish Soar, which is here crossed by 4 bridges. The principal streets, which intersect each other at right angles, are spacious and well paved; but a large proportion of the town is built in a straggling confused manner. The old buildings have been mostly replaced of late years by modern brick houses. The theatre and the new hall are both fine edifices; and the terraces and banks are also fine erections. Amongst the chief architectural ornaments of the town are the assembly rooms. The exchange is a plain brick edifice built in 1747. On rising ground, on the S side of the town, stands the new co. jail. Its exterior bears some resemblance to a baronial castle, having flanking towers and portcullis at the entrance, and turrets at short intervals round the boundary walls which include an area of more than 3 acres. It is a strong building, constructed on the most approved plan, and comprises 126 cells. The Leicester station of the Midland Counties railway is a large building on the E side of the town. Some of the churches are fine edifices. The dissenting places of worship are numerous.—Under the new municipal act the enlarged borough has been divided into 7 wards, and is governed by 14 aldermen and 42 councillors. The income of the corporation in 1839 was £21,069; in 1847, £20,648. L. has returned 2 members to parliament since the time of Edward I. Electors registered in 1837, 3,581; in 1848, 3,505. Leicester is one of the polling-places, and the principal place of election for the southern division of the county. —L. has fully shared in that tendency to increase which for nearly half-a-century has characterized the manufacturing towns of the kingdom. The pop. in 1801 was 16,953; in 1831, 39,306; in 1841, 48,167. Its trade and manufactures, both with regard to the variety and quantity of the articles produced, have more than doubled within the last 30 years. The principal manufacture is that of woollen hosiery, which is more extensively carried on here than in any other town of the kingdom except Nottingham. In the various branches of industry requisite for bringing the raw material into the shape of stockings, several thousands of the inhabitants are occupied. Worsted thread and cotton thread are manufactured to a considerable extent; the making of cotton or Berlin gloves, and of silk hosiery, is also an important branch of industry. Upwards of seventenths of the woollen manufactures of L. are consumed within the kingdom. The manufacture of woollen stockings was commenced in L. about the time of the Revolution. It was very unpopular at first, and the few artificers were forced to work their frames in secret. The trade, however, soon outgrew the prejudices by which it had been at first kept down. In 1712 it was computed that in L. 1,000 persons were employed in sorting, combing, and dyeing; 6,000 in spinning, doubling, and throwing; and 6,000 in weaving, seaming, and dressing up the woollen goods. In 1785 the invention of a worsted spinning machine gave the trade an impetus; and in 1792 there were upwards of 70 hosiers in L., employing no less than 3,000 frames. In 1831 the number had doubled; and in 1845 there were in L. and the villages around about 10,000 frames employed in making stockings, shirts, drawers, socks, and caps; about 2,000 in making gloves and mitts; and about 750 machines employed in the production of 'fancy hosiery.' In this department are included figured and coloured scarfs, shawls, cravats, boots and leggings, for children, braces, worsted 'polka jackets,' and so forth. Many of these articles are knitted by hand in the villages of the midland cos.; but the greater portion of the fancy hosiery made is wrought by complicated machinery in L. In this department

it was calculated that in 1845 between 7,000 and 8,000 persons were employed. There were also used about 500 stocking-frames, ingeniously adapted to the requirements of this new branch of industry, about 150 warp-looms, which produce every fabric, from the most gossamery lace to the coarsest carpetting, and about 100 machines called grinders, of ingenious and complicated construction. About one-half of the fancy hosiery then produced was destined for the foreign, and one-half for the home market. In 1845 there were 52 steam-engines employed in propelling the machinery used in the town. In the borough are several corn-mills, and two extensive iron-foundries. The town has been indebted in some measure for its prosperous condition to its situation on the high road between London and the cotton district of Lancashire, the hardware and cutlery of Sheffield, and the cloth manufactories of the W. R. of Yorkshire. Its trade is also greatly facilitated by the important lines of inland communication which it possesses by means of the Midland Counties railway, the Swannington railway which connects the town with the Ashby coal-field, and the river Soar. —L. is a place of very great antiquity. During the Saxon heptarchy, it formed part of the kingdom of Mercia. During the civil war, its burgesses warmly espoused the cause of the Parliament, and sustained one of the severest of sieges from the royalist army.

LEICESTER, a township of Addison co., in the state of Vermont, U. S., 73 m. SSW of Montpelier. The surface is in some parts mountainous, and is watered by Otter creek and Leicester river. The soil consists to a great extent of fertile sandy loam. Pop. in 1840, 603.—Also a township of Worcester co., in the state of Massachusetts, 48 m. W of Boston, watered by French and Blackstone rivers. The surface is hilly. The soil, consisting of clay loam, possesses considerable fertility. Pop. 1,707.—Also a township of Livingstone co., in the state of New York, 5 m. W of Genesee. The surface rises in terraces from the Genesee river, by which it is bordered on the E. Pop. 2,415.

LEICESTERSHIRE, one of the midland counties of England; bounded on the N by the cos. of Derby and Nottingham; on the E by Lincoln and Rutland; on the S by Northampton and Warwick; and on the W by Warwick, Stafford, and Derby. From these cos. it may be said, in general, to be divided by no natural boundaries, though short portions of the rivers Trent, Soar, Anker, Welland, and Avon, run along different parts of the boundary-line. Its greatest length from a point to the S of Lutterworth to the N part of the vale of Belvoir, is about 45 m.; its breadth from E to W about 40 m. Its square area is generally estimated at 515·840 acres.

Aspect of the country.] The general appearance of this co. is picturesque in so far as green fields, and numerous hedge-rows, and a succession of gentle eminences can make it. The surface of the co. may in general be denominated table-land: the elevations are too insignificant to form striking features in the landscape. Bardon-hill, the highest elevation, is only 853 ft. above sea-level, not half the height of Axe-Edge and Kinder-Scout, in the adjoining co. of Derby. Its rise above the immediate vicinity is only 200 or 250 ft.; and the descent, from its base to the level of the Soar at Leicester, a distance of 10 m., is 400 ft., leaving only 200 for the gradual descent of the Soar and Trent from Leicester to the Humber, a distance of 90 m., exclusive of the sinuosities of the rivers. The vale of Belvoir to the NE, extending upwards of 15 m.; the valley of the Wreke, from Melton to its junction with the Soar below Syston; and the entire length of the Soar, with many of its tributary streams, exhibit scenes of fertility equal, for their extent, to most in the empire.

Rivers.] From the circumstance of this co. being placed in the centre of England, it cannot boast of any large rivers, although it is well-watered by smaller streams and rivulets, which essentially contribute to form the rivers of other counties. The principal rivers of this co. are the Soar, Swift, Welland, Avon, Wreke, and Anker. The Trent, which ranks above the preceding rivers with respect to volume of water, touches the co. at the park of Castle-Donnington, and forms the extreme N boundary for a distance of only 6 to 8 m., until it meets the Soar near Hemington. The Soar rises near the SW border of the co., between Hinckley and Lutterworth; flows in a N direction, passing Leicester, Mount-Sorrel, and Loughborough; from Dishley, runs along the border of the co. for 7 or 8 m.; and finally turns into Derbyshire, and falls into the Trent. The channel of this river has been deepened from Leicester downwards, so as to be navigable for barges. In its course it receives the waters of the Wreke. The Soar, the Wreke, and the Welland, send their waters to the German ocean; while the other streams flow towards the W.

Canals.] The town of Leicester possesses the advantages of internal navigable communication with the E, S, and W coasts and sea-ports: namely, Gainsborough, Hull, Boston, London, Chichester, Portsmouth, Poole, Exeter, Bristol, Gloucester, Chester, and Liverpool, exclusive of many intermediate towns and districts of great manufacturing importance, through the medium of the Leicester navigation to Loughborough, and thence to the Trent and Grand Trunk to the N; and the Union and Grand Union, and thence to the Oxford and Grand Junction canals towards the S. The artificial deepening of the Soar, already noticed, is upwards of 20 m. in length, and sometimes leaves the natural bed of the river for a short distance. It is navigable by such barges as can sail on the Trent; and gives off a collateral cut to Loughborough, whence a continuation has been made to certain collieries both by cuts and railways. The Wreke has been made navigable as far as Melton-Mowbray, where it communicates with the Oakham canal, which runs in an E direction for about 8 m., enters Rutlandshire, and advances a similar distance to Oakham. The Union canal originates near Leicester, from the Soar navigation, and runs with a winding course, in a direction nearly S by E, as far as Harborough, near which it gives off a branch called the Derby and Leicester canal. The Grand Union forms a communication between the Union near Foxton and the Grand Junction at Long-Buckby, thus opening up a communication with London; and the Ashby-de-la-Zouch canal, 30 m. in length, and level throughout, enters the SW side of the co. near Hinckley, runs in a direction nearly N by W, passes Market-Bosworth, and reaches Ashby-de-la-Zouch. It joins the Coventry canal at Nuneaton. Railways have been adopted for all the branches where lockage was required.—The Grantham canal enters from Lincolnshire, runs along the vale of the Belvoir, and passes into Nottinghamshire, after a course of about 10 m. in Leicestershire.

Railways.] Those connected with the canal navigation are the Ashby-de-la-Zouch, and the Leicester and Swannington railways. From the extremity of the Ashby-de-la-Zouch canal, the former runs by the town of Ashby-de-la-Zouch to the Ticknall limeworks, passing in its course under a tunnel 457 yds. long, at the end of which a branch commences, and runs 4¼ m. to the limeworks at Cloud hill, whence another short branch extends to Lount colliery. There is also a branch of half-a-mile from the Ashby canal to a colliery near Moira; and at the commencement of the canal on Ashby-wolds, another extends to the Potteries on Gresley-green, and to the Swadlincote collieries.—The Leicester and Swannington railway, formed under act 11° Geo. IV. cap. 58, commences at the Union canal, in the river Soar, near Leicester, whence it runs NW, and through a tunnel 1¼ m. in length, after which it turns to the SW for about 3¼ m., and again NW, terminating at Swannington, a distance of 15⅝ m. There are four short branches from the main line. The object of this railroad was the supply of coal and limestone to the populous town of Leicester,—an object in which it has been successful.—The Midland Counties railway is by far the most important line by which this co. is at present traversed. It enters the S district between Lutterworth and Over-clay-brook; and running NE by Leicester, curves NW by Loughborough, and quits the co. by crossing the Soar.

Roads.] The principal of these are the great road from London to Manchester, which passes Market-Harborough, Leicester, Mount-Sorrel, and Loughborough; and the road from London to Leeds, which passes Melton-Mowbray and Nether-Broughton. Various other roads radiate from L. to the more important towns and villages in the co.—The length of turnpike roads in this co. has been estimated at about 286 m.; cross-roads, 1,430 m.; forming a total of 1,716 m. of communication. The returns of turn-

pike trusts, for 1839, show an expenditure of £23,816 on 1,597 m. of road.

Geological structure.] The geology of L. is interesting. The principal minerals are coal, slate, sienite, gypsum, and lime. The coal deposits are on the W. commencing on the borders of Derbyshire; and on the whole of the W of Charnwood, within the red sandstone districts. This portion of the co. may be said to be one immense coal-field; and in this part metalliferous limestone abounds. E of the coal-district, in the N of the co., are the hills of Charnwood forest,—the most remarkable in the county. On the SE side they consist of transition-slate, furnishing valuable quarries, which are worked to the depth of 90 ft., the slate becoming finer as the workmen go deeper. Tin is said to have been found, but no workings appear. The basalt rocks at Stoney-Stanton are supposed to be part of an immense dyke running from the forest through Bedworth, in a SW direction, to Rowley, in Staffordshire. In the vale of Belvoir, and the whole of the E side of the co. from Bottesford to Catthorpe, blue marl, or clay, abounds. The oolite, a yellow limestone formation, extending through Lincolnshire, enters this co. at Croxton-Kyriel, and continues as far as Waltham-on-the-Wolds; thence to Buckminister, and thence parallel with the boundary of the co., till it leaves it near Market-Overton. This limestone abounds in fossil remains. The red sandstone on which Belvoir-castle is built, extends in a SW direction as far as Grimston, and thence to Edmundthorpe. The whole of the high ground to the N of the Wreke and Eye, is of the same formation.

Soil and produce.] The soils of this co. may be divided into three classes: clay-loam, sandy or gravelly loam, and meadow soil. There is no surface-soil that can properly be denominated clay or sand. There is no chalk, and the peat-bogs have long since been drained. For the most part, however, the soil is strong and stiff, composed of clay and marl, affording a great extent of rich grazing-land, and peculiarly fitted for the culture of beans and wheat, for which it is proverbially noted. The proportion of pasture and meadow land throughout the co. much exceeds that of arable. The parts under tillage lie chiefly to the N and W. The size of farms is from 50 to 300 acres upon the heavier soils; and from 150 to 500 on the lighter. The majority of the landowners are small holders of from 50 to 500 acres which they generally cultivate themselves. The grazing lands have been very generally drained, and in some places considerable attention has been paid to irrigation.—There are many dairy farms, especially in the vicinity of Hinckley, Bosworth, and Melton-Mowbray. Although L. has acquired no such national fame for the excellence of its cheese as Gloucestershire and Cheshire, it is the first co. in the empire for the excellence of its cheese. It was in this co. that the celebrated Stilton cheese was first made, and it still continues to be a standard article of production. It ought to have been named Withcote cheese, being first made in that small v., on the E side of the co., and about 30 m. from Stilton. This cheese is now made chiefly on the farms near Melton-Mowbray. The average yield of a dairy on moderate land may be reckoned at 3 to 3½ cwt. of cheese per cow; and on better land, up to 4½ and even 5 cwt. The quantity of cheese generally sent to Leicester October fair is about 200 tons annually; and it is calculated that of 5,000 tons annually sent down the Trent from Leicester, Nottingham, Derby, and the N of Staffordshire, Leicester produces at least 1,500 tons. Dairy farms vary in size from 100 to 500 acres.—The cattle of L. owe their excellence to the exertions of Bakewell of Dishley farm, near Loughborough, who died in 1795. The present improved breed of cattle is firm bound, firm in the neck, throat, and bosom; the back is straight, wide, and loaded with flesh, the rump thick, wide, and fleshy on the points. The colour is red, the legs short, with thin, wide, and spreading horns. The weight, when fat, is from 9 to 10 score the quarter, but often much more. Besides this Dishley breed, many others are met with, as this co. is much used for grazing and fattening for the butcher, cattle from Wales, Ireland, Scotland, and the N counties. Three breeds of sheep are reared: the old Leicester, the new Leicester, and the forest sheep. The old Leicester, derived from the original stock of the co., is large, heavy, and slow to fatten, with coarse wool. The new Leicester breed, for which also the co. is indebted to Bakewell, is thus described: "Their backs are broad and straight; their breasts are full, bellies tucked up heads small, necks short, legs thin, pelts light, and wool fine of its kind. They are quiet in temper, and capable of being fattened in a short time, on a small proportion of food, and to a great weight, in proportion to their apparent size. Fat wethers weigh about 25 lbs. a quarter. The average fleece is about 7 lbs." The forest-breed is comparatively inferior, and is found chiefly about Charnwood. The black breed of L. horses is in general demand; and many are reared for the waggon, the plough, the race-course, and the chase. Mules and asses are much used by farmers; and swine are extensively fed. "Grazing and pasturage, since the commencement of the present cent., have been so very extensively followed here, that L. may be regarded as the model school of the empire, in those departments of husbandry, the head-quarters of all those marvellous improvements of stock, &c., which have spread the renown of 'Leicestershire' with the breed of its sheep all over the world. Towards the close of the last cent. L. was almost one open district of common fields. Though that large portion of it which is still the country of our finest hunts, remains of course in much the same condition, enclosures, to an enormous extent, have from time to time been made, so that its pasturage is scarcely to be exceeded throughout the United kingdom; and its sheep-feeding economy has probably realised larger returns of money than any other branch of agricultural or farming occupation, within any given equal period of years. Under these aspects, as contributing so largely to our supply of animal food, and to the staple of almost our oldest and most important trade—wool—L. is to be regarded as one of the most important cos. in the kingdom."

Manufactures.] If the ratio of persons employed constitute a ground of decision, L. is essentially a manufacturing co., there being but 5 cos. in England, which in this respect have a decided precedence, whilst it is on a level with those of Nottingham, Derby, and Chester. The principal manufactures are those connected with wool, one of the staple products of the co., and which is also exported raw. Wool-combing, the spinning of woollen yarn, and the weaving of stockings, are the principal occupations; framework-knitting being the most extensive and important of those. The magnitude to which this branch of industry, enterprise, and ingenuity, has now attained, cannot be correctly ascertained. Half-a-century ago, the articles made from the stocking frame were chiefly limited to stockings, socks, caps, gloves, and mitts, and these, for the most part, of worsted spun by the hand, and in variety confined to the few detached improvements then made on the frame. The materials used in this manufacture, and the machine which works them, have undergone great changes; and an almost infinity of fabrics of

worsted, lamb's wool, cotton, thread, and silk, mixtures of these, angola and merino in every degree of tenuity, from the coarsest yarn to that used in making bobbin net lace, are now produced. The main central points of this manufacture in L. are Leicester, Loughborough, and Hinckley; but it has more or less spread through a great extent of the co. There are about 20,000 frames at work in the town and co. of L., employing 35,000 hands. Of these, upwards of six-tenths are occupied in the production of common woollen hosiery; two-tenths in the fancy trade; and the remaining two-tenths in the manufacture of cotton and merino fabrics. Some years ago, in the S and W parts of the county, worsted stuffs were manufactured: this branch is now nearly extinct. Coarse felt hats are made at Ashby-de-la-Zouch and Coleorton; and carpets at Market-Harborough. There are some iron foundries in the co.

Divisions and general statistics.] This co. comprises 6 hundreds: viz. Framland, Gartree, Goscote-east, Goscote-west, Guthlaxton, and Sparkenhoe; 196 parishes, 11 market-towns, and 1 borough. Pop. at the Norman survey, 34,000; in 1700, 80,000; in 1750, 95,000; in 1801, 130,081; in 1831, 197,000, consisting of 42,142 families, of whom 12,352 were employed in agriculture, and 22,984 in trade, &c.; in 1841, 220,304; in 1851, 234,938. The increase per cent. in 50 years from 1800 to 1851 has been 75·36; the annual rate of increase 1·13.—L. is in the prov. of Canterbury, and, until recently, formed an archd. in the dio. of Lincoln; but the ecclesiastical commissioners have transferred it to the dio. of Peterborough. —The number of savings' banks, on 20th November, 1838, was 7; total number of depositors, 4,445; total amount deposited, £120,389. In November 1849, the number of savings' banks was 7; number of depositors 8,046; amount deposited, £198,287.—The poor-rate returns for three years to Easter 1750, show an average expenditure of £7,549 on the poor of this county; in 1803, £83,806; in 1839, £64,400; in 1847, £83,527. The value of property rated to the poor rates in 1847 was £1,013,767; and the rate of assessment per pound 1s. 7¾d., that for all England being 1s. 6¾d. The expenditure for the half-year ending Lady-day 1852 was £25,725.

Franchise and government.] This county returns 6 members to parliament; viz. 2 for the N division, including the hundreds of W. and E. Goscote, and Framland, and those detached portions of Gartree situate E of Goscote; and 2 for the S, including the remainder of Gartree with Sparkenhoe and Guthlaxton. The members for the N division are polled for at Loughborough, Melton-Mowbray, and Ashby-de-la-Zouch, the principal place of election being Loughborough; those for the S, at Leicester, Hinckley, and Market-Harborough. The town of Leicester returns 2 members. The number of electors registered for the co., in 1837, was 4,299 for the N, and 4,580 for the S division. In 1848, the number registered for the N division was 4,146; for the S, 5,455. Previous to the passing of the Reform act, the co. returned only 2 members.—L. is comprehended in the midland circuit. The assizes and quarter-sessions are held at Leicester.

History.] At the period of the Roman invasion this co. was inhabited by a tribe called *Corani*, or *Coritani*, and was soon incorporated with the prov. of *Flavia Cæsariensis*. After the departure of the Romans, it formed part of the Anglo-Saxon kingdom of Mercia, and the inhabitants were known by the name of the Middle Angles. It was long under the dominion of the Danes, who constituted Leicester one of their chief cities. During the civil war in 1645, Leicester was besieged by Charles I., who took it by storm. It was, however, regained in the same year by the parliamentary forces under Sir Thomas Fairfax. The duchy and earldom of L. have, from the time of Henry IV., been merged in the Crown, until 1837, when Thomas William Coke, Esq., was created earl of Leicester and Holkham.

LEICHLINGEN, a village of Prussia, in the prov of the Rhine, regency and 15 m. SE of Dusseldorf, circle and 9 m. SW of Solingen. Pop. 430. It has manufactories of cloth and of cutlery.

LEIDERSDORF, a hamlet of Bavaria, in the circle of the Regen, presidial and 7 m. SSE of Amberg, on the l. bank of the Vils.

LEIDERSHAUSEN, a village of the grand-duchy of Baden, in the circle of the Lower Rhine, bail. and 5 m. S of Weinham, and 9 m. E of Manheim. Pop. 1,093.

LEIDSCHENDAM, a village of Holland, in the prov. of South Holland, cant. and 4 m. E of the Hague, on the canal from that town to Leyden. Pop. 1,800.

LEIGH, a tything in the p. of Wimborne-Minster, Dorset, 1 m. E of Wimborne-Minster. Pop. in 1831, 532; in 1841, 574.—Also a chapelry in the p. of Yetminster, Dorset, 5½ m. S by W of Sherborne. Area 2,200 acres. Pop. in 1831, 400; in 1841, 396. —Also a parish and sea-port in Essex, 4 m. SW of Rochford, at the mouth of the Thames. The inhabitants are chiefly fishermen engaged in the oyster-trade. Area 930 acres. Pop. in 1831, 1,254; in 1841, 1,271.—Also a parish in Surrey, 3 m. SW of Reigate. Area 3,710 acres. Pop. in 1831, 483; in 1841, 495.—Also a township in the p. of Westbury, Wilts, 1 m. SW of Westbury. Pop. in 1831, 1,420; in 1841, 1,380.—Also a chapelry in the p. of Ashton-Keynes, 3 m. W by S of Cricklade. Pop. in 1831, 267; in 1841, 299.—Also a parish in the co. of Worcester, 4½ m. W by S of Worcester, on the river Teme. Area 6,840 acres. Pop. in 1831, 1,933; in 1841, 2,011.

LEIGH, a river of Van Diemen's Land, which has its source to the E of Balfour river, about 11 m. SE of the hill of that name; runs NNW; and joins Arthur river in E long. 145°, and about 8 m. above the entrance of that river into the Indian ocean.

LEIGH, Lea, or Nurriwillun, a river of Australia Felix, which separates the co. of Grant from the district of Portland bay, and falls into the Barwon.

LEIGH, or Lees, a parish in Staffordshire, 4½ m. WNW of Uttoxeter, on the Crewe and Derby railway. Area 7,360 acres. Pop. in 1841, 1,012.

LEIGH, or West Leigh, a parish in Kent, 2¾ m. W of Tunbridge. Area 3,840 acres. Pop. in 1831, 1,011; in 1841, 1,245.—Also a parish and market-town in the co.-palatine of Lancaster, 42 m. S by E of Lancaster, and 7¼ m. SW of Bolton, in the line of the canal navigation between Wigan and Manchester, and of the railway communication between Bolton and the Liverpool and Manchester railway. The p. includes the chapelries of Astley and Atherton, and the townships of Bedford, Tyldesley, Pennington, and West Leigh. Area of the p. 11,820 acres. Pop. in 1801, 12,976; in 1831, 20,083; in 1841, 22,229.—The market-town of L. is composed of the townships of West L. and Pennington; the market-place standing in the former, and the parish-church in the latter. The principal articles manufactured here are cambrics, muslins, bandanas, fustians, and satins, for the Manchester market.

LEIGH (High), a chapelry in the p. of Rostherne, Cheshire, 5 m. NW by N of Knutsford. Area 5,010 acres. Pop. in 1831, 983; in 1841, 982.

LEIGH (Little), a chapelry in the p. of Great Budworth, Cheshire, 3½ m. NW by W of Norwich, on the river Weaver, and intersected by the Grand Trunk canal. Area 1,280 acres. Pop. in 1831, 381; in 1841, 387.

LEIGH (North), a parish in Devon, 3½ m. W by N of Colyton, on a branch of the Axe. Area 1,450 acres. Pop. in 1831, 240; in 1841, 252.—Also a

parish in Oxfordshire, 3 m. NE by N of Witney. Area 2,460 acres. Pop. in 1831, 591; in 1841, 617.

LEIGH (South), a parish in Devon, 3 m. W by S of Colyton. Area 2,130 acres. Pop. in 1831, 320; in 1841, 357.—Also a parish in Oxfordshire, 3 m. ESE of Witney. Area 1,980 acres. Pop. in 1831, 339; in 1841, 326.

LEIGH (West), a parish in Devon, 2 m. NNE of Bideford, on the river Torridge. Area 1,340 acres. Pop. in 1831, 484; in 1841, 526.

LEIGH-WITH-EVINGTON, a parish in Gloucestershire, 5 m. NNE of Gloucester. Area 1,720 acres. Pop. in 1831, 355; in 1841, 489.

LEIGH-UPON-MENDIP, a parish in Somersetshire, 5 m. W of Frome. Area 1,470 acres. Pop. in 1831, 640; in 1841, 619.

LEIGH-DE-LA-MERE, a parish in Wilts, 5 m. NNW of Chippenham. Area 1,360 acres. Pop. in 1841, 114.

LEIGH READ, or Mosquito, a county of the state of Florida, U. S., on the E side of the peninsula, watered by St. John's, Halifax, Spruce, Hillsborough, Indian and St. Lucian's rivers, and by St. Sebastian's and Jupiper creeks. It is of great extent, and comprises a great diversity of soil and climate. It contains numerous swamps, but these are easily drained, and are very fertile. Its capital is New Smyrna.

LEIGH-WOOLEY, a tything in the p. of Great Bradford, Wilts. Pop. in 1831, 1,680; in 1841, 1,511.

LEIGHLIN, a diocese in the ecclesiastical prov. of Dublin, and civil prov. of Leinster. Its nominal seat is Old Leighlin in co. Carlow. In 1600 the see was united to that of Ferns; and ever since it has remained annexed to that see. At the new arrangement made by the Church temporalities bill in 1833, it and Ferns were jointly decreed to be united to Ossory. The nett yearly episcopal income of the see, on an average of three years ending at the close of 1831, was £2,499. The dio. lies partly in the cos. of Kilkenny and Wicklow, but chiefly in Queen's co. and the co. of Carlow. The length of the diocese is about 50 m.; its breadth is from 8 to 16 m.; and its area is 482,115 acres. Pop. in 1831, 187,095. Total of parishes, including chapelries, 84; of benefices, 60. Number of Presbyterian meeting-houses, 2; of other Protestant dissenting meeting-houses, 12; of Roman Catholic chapels, 64. In 1834, the inhabitants consisted of 20,391 Churchmen, 191 Presbyterians, 288 other Protestant dissenters, and 169,982 Roman Catholics.

LEIGHLIN (Old), a parish, containing an episcopal village of the same name, in co. Carlow. Area 9,920 acres. Pop. in 1831, 3,530; in 1841, 3,658. The site of the church at the v. has an elevation above sea-level of 289 ft. The v., or decayed episcopal town, formerly a parliamentary borough, stands on the road from Leighlin-Bridge to Castle-Comer, in a recess of the Castle-Comer hills, 1¾ m. W of Leighlin-Bridge, and 7 m. SW by S of Carlow. The name L. is a corruption of Leth-Glen, 'the half-enclosed valley.' During the wars between the English and the Irish, the town suffered many severe vicissitudes. The present cathedral was built or at least founded by Bishop Donat, who died in 1185. It consists of a nave and chancel. The length of the nave is 84 ft.; that of the chancel 60 ft.; breadth, 21 ft. Pop. in 1831, 106; in 1841, 140.

LEIGHLIN-BRIDGE, a market and post town, partly in the p. of Agha, partly in the p. of Wells, co. Carlow, on the river Barrow, and on the road from Dublin to Waterford, 1¾ m. E of Old Leighlin, and 3 m. N by W of Bagnalstown. The bridge, which spans the Barrow at the town, and occasioned a change of the name of the place from New Leighlin to Leighlin-Bridge, comprises 10 arches, and was built about the year 1320. In the vicinity of the town are several extensive corn-mills and corn-stores. Pop. in 1831, 2,035; in 1841, 1,748.

LEIGHMONEY, or Liffany, a parish 1½ m. SE of Innishannon, co. Cork. Area 2,716 acres. Pop. in 1831, 855; in 1841, 896.

LEIGHS (Great), a parish in Essex, 5½ m. SSW of Braintree, on the river Chelmer. Area 3,150 acres. Pop. in 1831, 756; in 1841, 765.

LEIGHS (Little), a parish in Essex, 5 m. SW of Braintree, on the river Chelmer. Area 1,640 acres. Pop. in 1831, 189; in 1841, 182.

LEIGHTON, a township in the parish of Nantwich, Cheshire, 5 m. NE by N of Nantwich, between the rivers Weaver and Wenlock. Area 1,510 acres. Pop. in 1831, 261; in 1841, 237.—Also a township in the p. of Neston, Cheshire, 1½ m. N of Great Neston, at the mouth of the Dee. Area 620 acres. Pop. in 1831, 333; in 1841, 374.—Also a parish in Hunts, 5 m. N by E of Kimbolton, between two branches of the Ouse. Area 2,770 acres. Pop. in 1831, 452; in 1841, 448.—Also a hamlet and township in the p. of Worthen, Montgomeryshire, 1 m. SE of Welshpool, on the E bank of the Severn. Pop. in 1831, 213; in 1841, 220.—Also a parish in Salop, 3½ m. N by W of Much-Wenlock, on the N bank of the Severn. Area 1,300 acres. Pop. in 1831, 360; in 1841, 403.

LEIGHTON, a village of Lawrence co., in the state of Alabama, U. S., 132 m. N of Tuscaloosa, on the Tuscumbia and Decatur railroad.

LEIGHTON-BUZZARD, a parish and market-town in the co. of Bedford, 19 m. SSW of Bedford, and 41 m. NW of London, intersected by the Grand Junction canal, and the London and Birmingham railway, which has a station here, near which it passes through a tunnel 300 yds. in length. The p. comprises the chapelries of Billington, Eggington, Heath-with-Reach, and Stanbridge, and the market-town of L. Area of p. 8,990 acres. Pop. in 1801, 3,172; in 1831, 5,149; in 1841, 6,053. Pop. of township, in 1831, 3,330; in 1841, 3,965. The adjunct to the name is generally thought to be a corruption of Beau-desert. The town is pleasantly situated near the river Ouse, and consists chiefly of one long street, intersected by two smaller ones at right angles. A considerable trade is carried on in this thriving town in corn, timber, iron, and other commodities. The manufacture of straw-plait and lace affords employment to many of the inhabitants, and there are respectable establishments in the brick and lime trade. It is one of the polling-places for the co.

LEIGNÉ-SUR-USSEAU, a canton and commune of France, in the dep. of the Vienne, arrond. of Chatellerault. The cant. comprises 10 com. Pop. in 1831, 5,602; in 1841, 5,707. The village is 8 m. N of Chatellerault, and 26 m. NNE of Poitiers. Pop. 321.

LEIGNON, a department and commune of Belgium, in the prov. of Namur, arrond. of Dinant. Pop. of dep. 855; of com. 231.

LEILA, a town of Abyssinia, in the div. of Tigre, and district of Midre-Bahrnegast, or land of the seaking, on the E side of Mount Taranta, and on the road from Massowa to Dixan.

LEIMBACH, a town of Prussia, in the prov. of Saxony, in the regency and 31 m. NW of Merseburg, circle and 1 m. NNE of Mannsfeld, on the Wippra. Pop. 900. It has two copper-works and a vitriol manufactory.

LEIMEN, a town of the grand-duchy of Baden, in the circle of the Lower Rhine, bail. and 4 m. S of Heidelberg, on the r. bank of the Leim, an affluent of the Rhine. Pop. 1,327. It is enclosed by a wall and ditch, and contains 3 churches. It has a manu-

factory of tobacco. Agriculture forms an important branch of local industry.

LEIMERSHEIM, a village of Bavaria, in the circle of the Pfalz, district and 12 m. ESE of Landau, cant. and 8 m. S of Gemersheim. Pop. 2,020.

LEIMNAU, a village of Wurtemberg, in the circle of the Danube, bail. and 3 m. SE of Tettnang, and 60 m. SSW of Ulm. Pop. 1,000. It has a bathing establishment.

LEIMINDEN, a village of Holland, in the prov. of N. Holland, on the SE side of the lake Haarlem.

LEIN (Cape), a headland of France, in the dep. of the Manche, on the N coast, NE of the island of Pelée.

LEINA, a river of Saxe-Gotha, which rises on the N side of the Thuringerwald, is joined by the Apfelstadt, and flows into the Werra.

LEINACH (Lower), a village of Bavaria, in the circle of Lower Franconia, presidial and 12 m. NW of Würzburg. Pop. 1,200.

LEINBAUMS, a village of Bohemia, in the circle and 38 m. SE of Tabor, and 12 m. SE of Neuhaus. It has a large glass-work.

LEINE, a river of Germany, which has its source in the Harz mountains, in the SW part of the Prussian prov. of Saxony, a little to the W of Stadt-Worbis; flows thence into the kingdom of Hanover; crosses the duchy of Brunswick; re-enters Hanover; and after a course in a generally N direction of about 150 m. joins the Aller, on the l. bank, to the E of Ahlden. Its principal affluents are the Ruhme, and Innerste on the r., and on the l. the Ilme, and Aue. The chief places on its banks are Heiligenstadt, Gottingen, Alfeld, Gronau, Hanover, and Neustadt. It is navigable as far as Hanover. This river gave its name to a dep. of which Gottingen was the chief place, and which is now comprised in the gov. of Hildesheim and Hanover, the duchy of Brunswick, and Electoral-Hesse. —Also a river in Prussia, in the prov. of Saxony and regency of Merseburg, an affluent of the Lober. —Also a river in the kingdom of Wurtemberg, circle of the Jaxt, which flows into the Kocher, near Abtsgmünd.

LEINEBERG, a bailiwick of Hanover, in the gov. of Hildesheim, near the centre of the principality of Gottingen, watered on the E by the Leine. Pop. 3,366.

LEININGEN, an ancient county of Germany, now comprised in the grand duchy of Baden and the Bavarian circle of the Pfalz.

LEININGEN (Alt and Neu), two villages of Bavaria, in the circle of the Pfalz, SW of Grunstadt. The former contains the ruins of the castle of the family of Leiningen, and has several iron-works and wire-drawing-mills. Pop. 780.—Neu L., which lies to the SW of the former, has a collegiate church. Pop. 840.

LEINSTER, one of the four provinces of Ireland; bounded on the N by Ulster; on the E by the Irish sea; on the SE by St. George's channel; on the S by the Atlantic ocean; on the SW by Munster; on the W by Munster and Connaught; and on the NW by Connaught. Its boundary over most of the SE is the river and estuary of the Suir; over most of the W, the river and lacustrine expansions of the Shannon; but over most of the remaining distance of contact with the other provinces is an altogether artificial line. Its outline, but for being considerably indented by the Ulster co. of Cavan on the N, would be very nearly a slender or elongated oval, extending almost due N and S. Its greatest length S by W, from the most northerly point of co. Louth to Hook-point in co. Wexford, is 112 m.; its greatest breadth, W by N, from Wicklow-head to the confluence of the Little Brosna with the Shannon, is 67 m. Its area comprises 3,961,188 acres of arable land, 731,886 of uncultivated land, 115,944 of continuous plantations, 15,569 of towns, and 51,624 of water; in all, 4,876,211 acres.

Surface.] L. is usually, and perhaps justly, pronounced the richest in soil of the four provinces. Yet were it not for co. Wicklow's mountain grandeur and about one-half of the champaign country's luxuriance of aspect, the prov. is greatly inferior in landscape to nearly the whole of Ulster and Munster, and even to a large portion of Connaught. All the northern half of L., excepting the Carlingford mountains in a small district of the NE of Louth, a small group of hills in the extreme W of Meath, and occasional undulations and isolated hills in the other districts, is, in the strictest sense of the phrase, a champaign country; and a large proportion of it consists of a vast plain—the largest and most important in the kingdom, and well known to graziers for its generally rich soil and fattening grasses—which, with some slight interruptions, extends from the Dublin mountains on the S to the low fertile hills of Meath and Louth on the N, and at least 30 m. inland from the shores of the Irish sea. The S half of the prov. is much more diversified than the N. Nearly all the central and W sections of this half of the prov., as well as a large extent of the contiguous sections of the N half, either mainly consist of great sheets of morass or contain large interspersions of bog with flat lowland, but on the NE rises a grand congeries of mountains.

Coasts and islands.] The coasts of L. are much less indented by the sea than those of the other three provs. The only bays and inlets of any consequence are Carlingford-bay on the boundary with Ulster, Dundalk-bay in Louth, the tiny estuary of the Boyne between Louth and Meath, the sound between Ireland's Eye and the peninsula of Howth, Dublin-bay immediately E of the city of Dublin, Wexford-harbour at the mouth of the Slaney and on the E coast of co. Wexford, and Waterford-harbour on the boundary with Munster. The principal islands are Lambay and Ireland's Eye in co. Dublin N of Howth-head, Dalkey at the S side of the entrance of Dublin bay, and the Saltees off the S coast of co. Wexford.

Rivers and lakes.] The chief streams are the Dundalk river, the Fane, the Glyde, and the Dee, all flowing to Dundalk bay; the Boyne, whose embouchure is between Louth and Meath; the Nanny-water, which enters the sea midway between co. Louth and co. Dublin; the Shannon, which includes the greater part of both co. Westmeath and King's co.; the Liffey, whose embouchure is at the head of Dublin bay; the Bray and the Vartry rivulets, which drain the NE district of co. Wicklow; the Ovoca and its affluents, which drain the central and SE districts; the Slaney, whose embouchure is at the head of Wexford-harbour; and the Barrow, inclusive of that of its large affluent the Nore.—The principal lakes are Sheelin, Ganny, and Kinnail, on the boundary with co. Cavan in Ulster; Ree, a great expansion of the Shannon, on the boundary with Connaught; Dereveragh, Iron, Owhel, Lane, and Ennel, in co. Westmeath; and Bray, Dan, Nahanagan, Finogefin, and Glendalough, in co. Wicklow.

Communications.] L. is much richer in facilities of communication, at once with Britain, with its own interior, and with the rest of Ireland, than any other of the provs. The communications by steam with Great Britain and Wales are more numerous than those of either Ulster or Munster; and, with the exception of those to Scotland on the N, and those to Plymouth and London on the S, they are considerably more direct. The steam communications of Dublin with Liverpool are the most important in the kingdom; those of Dublin with Holyhead, and of Drogheda, Dundalk, and Wexford with Liverpool, make a prominent figure; and those of Dublin with London, Bristol, and the Clyde, and of New Ross with England, are far from being trivial.—Within L. are the whole of the navigation of the Boyne; the

whole of the navigation of the Barrow; the whole of the Royal canal; all the branches, and by far the greater part of the main line of the Grand canal; along its W boundary extends the navigation of the middle and the lower Shannon, connecting it with all W. Connaught and N. Munster; and along the inland part of its S boundary extends the navigation of the Suir, connecting it with a considerable part of SE. Munster.—In 1838 the only completed railway within L. was the first in Ireland, that from Dublin to Kingstown. The prov. is now intersected by the Dublin and Galway railway; the Great Southern and Western railway to Cork; the South-Eastern railway to Kilkenny; and the Dublin and Drogheda line. The most remarkable of the railway works constructed since 1838 is the brief line of atmospheric railway from Kingstown to Dalkey.

Divisions.] The prov. of L. is politically divided into 5 eastern or maritime counties, 3 western or Shannon-bounded counties, and 4 interior or inland counties. The maritime cos., named from N to S, are Louth, Meath, Dublin, Wicklow, and Wexford; the Shannon-bounded cos. are Longford, Westmeath, and King's; and the inland cos. are Kildare, Queen's, Carlow, and Kilkenny.—The political prov. includes the whole of the ecclesiastical prov. of Dublin, with its 5 bishoprics of Dublin, Kildare, Leighlin, Ferns, and Ossory.

Population.] Pop. in 1821, 1,757,492; in 1831, 1,909,713; in 1841, 1,973,731; in 1851, 1,167,771, being a decrease of 15·5 per cent. within the last 10 years. Houses in 1792, 181,948; in 1821, 278,398; in 1831, 292,729; in 1841, 306,459; in 1851, 277,522. The following statistics are all of 1841. Males, 963,747; females, 1,009,984. Inhabited houses, 306,459; uninhabited complete houses, 12,320; houses in the course of erection, 1,272. First-class houses, 20,052; second-class, 74,488; third-class, 131,998; fourth-class, 79,921. Families employed chiefly in agriculture, 214,046; in manufactures and trade, 92,692; in other pursuits, 55,396. Families dependent chiefly on property and professions, 14,560; on the directing of labour, 133,151; on their own manual labour, 200,121; on means not specified, 14,302.—Clergymen of the Established church, 560; Methodist ministers, 46; Presbyterian ministers, 30; Roman Catholic clergymen, 711.

History.] A history of L. is in a very large degree identical with a history of Ireland. In the 2d cent., the territory which now constitutes L. was inhabited by the tribes called *Brigantes, Menapii, Cauci,* and *Eblani.* In the eight centuries which followed, it appears to have been changefully partitioned into principalities, mainly Irish, yet eventually and in a considerable proportion Danish; during two or three centuries its maritime districts, particularly around Dublin and along the low grounds, were almost wholly in the possession of the Danes. At the arrival of the English in the 12th cent., its S and larger division constituted the kingdom of L. under the line of Cahir, most of its N division constituting the kingdom of Meath under the O'Melaghlans, and a small part of its N division belonged to the kingdom of Ulster under the O'Niells. At the settlement which followed the Anglo-Norman conquest, the territory which had constituted the kingdom of L. was inherited by the descendants of Eva, wife of Earl Strongbow and daughter of Dermod Macmurrough, the last king of Leinster; and the territory which had constituted the kingdom of Meath was granted to Hugh de Lacy. These two territories, in a general view, formed the district which till the time of James I. was called 'the English Pale,' and which enjoyed English protection and the administration of English laws, to the exclusion of all the Irish districts or the portion of Ireland lying beyond its limits. The Pale underwent both frequent and great vicissitudes in extent; and while, at one time, it included a considerable part of Ulster and three-fourths of Munster, it at other times suffered contraction far within the boundaries of L. The only cos. which never shook off the English law or were constantly within the English Pale, were Dublin, Louth, Meath, Kildare, and Wexford.—L. gives the title of Duke, in the peerage of Ireland, to the ancient and noble family of Fitzgerald. In 1746-7, James, 20th earl of Kildare, was created Viscount Leinster, in the peerage of Great Britain; in 1761, he was made Marquis of Kildare; and in 1766, he was advanced to the dignity of Duke of L.; and his descendant is the only Duke, the premier Marquis, and the premier Earl of Ireland.

LEINSTER (Mount), a mountain on the mutual border of the cos. of Carlow and Wexford, 5½ m. SW of Newtownbarry. It is broad-based, and somewhat peaked in its acumination, and lifts its summit to the alt. of 2,610 ft. above sea-level.

LEINSTETTEN, a town of Wurtemberg, in the circle of the Schwarzwald, bail. and 7 m. NW of Salz. Pop. in 1840, 471.

LEINTWARDINE, a parish and township of Herefordshire, 7 m. W of Ludlow, at the confluence of the Teme and Clun. Area 8,350 acres. Pop. in 1831, 1,358; in 1841, 1,568.

LEINUNGEN (Gross), a village of Prussia, in the prov. of Saxony and regency of Merseburg, SW of Wippra. Pop. 590.

LEIPA, Leippa (Bohmisch), or Ceska-Ljpa, a town of Bohemia, in the circle and 24 m. ENE of Leitmeritz, and 45 m. NNE of Prague. Pop. in 1845, 5,761. It contains 2 castles and a gymnasium; and possesses manufactories of cloth, calico, printed goods, porcelain, and pottery, and several glass-works.

LEIPERSVILLE, a village of Ridley township, Delaware co., in the state of Pennsylvania, 97 m. ESE of Harrisburg, intersected by the Leiper canal. Pop. in 1840, 125.

LEIPFERDINGEN, a village of the grand-duchy of Baden, in the circle of the Lake, 9 m. W by N of Engen. Pop. 600.

LEIPHEIM, a town of Bavaria, in the circle of Swabia, presidial and 3 m. W of Gunzburg, and 12 m. ENE of Ulm, on the r. bank of the Danube. Pop. 1,426. It is enclosed by an old embattled wall, and has a church and an hospital. It has a considerable trade in hops.

LEIPISCH (Hohen), a village of Prussia, in the prov. of Saxony and regency of Merseburg, E of Leibenwerda. Pop. 700.

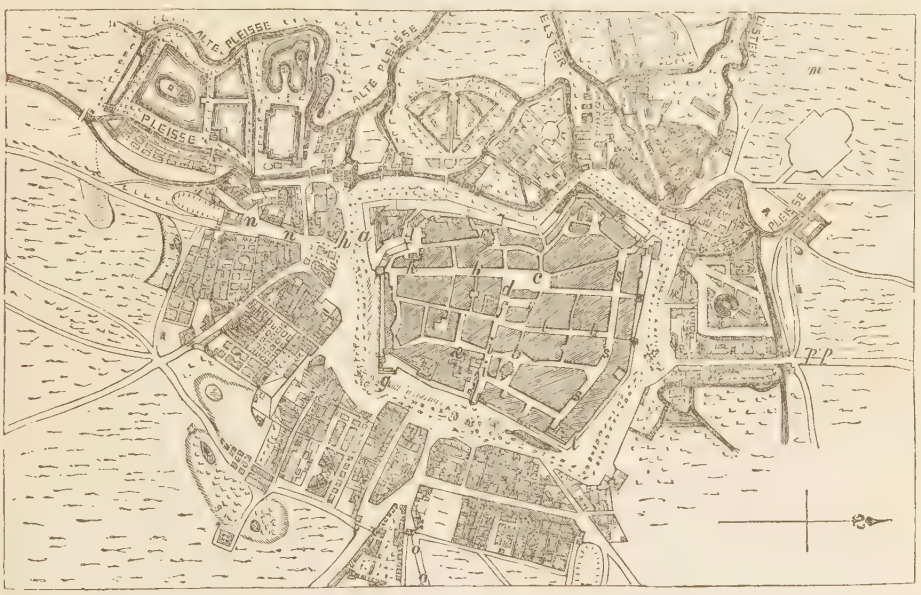
LEIPNICK, or Leipnik, a town of Moravia, in the circle and 9 m. NW of Prerau, and 8 m. W of Weisskirchen, on the Beczwa. Pop. 5,262, of whom 1,441 are Jews. It contains a castle belonging to the princes of Dietrichstein, 2 churches, a college, and 2 hospitals, and has some cloth manufactories.

LEIPNITZ, a village of the kingdom of Saxony, in the circle of Leipsic, SE of Grimma. Pop. 273.

LEIPSIC (Circle of), a province comprising the NW portion of the kingdom of Saxony; bounded on the E by the circle of Misnia or Meissen; on the S by that of the Erzgebirge and the principality of Altenburg; and on the W and N by Prussian Saxony. It has an area of 1,537 sq. m., and a pop. in 1843 of 396,845; in 1849, of 428,532. The soil is fertile, particularly in corn, but deficient in wood, which is brought chiefly from the Erzgebirge and the Vogtland. In some places are found potters' clay, limestone, marble, chalk, porphyry, and jasper. This circle is subdivided into the 3 upper bailiwicks of Borna, Rochlitz, and Grimma; and is the seat of considerable manufactures.

LEIPSIC, or Leipzig, an important commercial city of E. Germany, the second cap. of Saxony, situated in a wide but monotonous plain on the river Pleisse, and in the vicinity of the Parde or Parthe, the White Elster, and the Luppe, in N lat. 51° 20′ 19″, E long. 12° 21′ 45″, 18 m. SE of Halle, and 60 m. WNW of Dresden, at an alt. of 350 ft. above sea-level. Before the year 1409 it bore the Slavonic name of *Lipzk*, signifying 'a linden tree;' and many trees of that species are still found scattered between the town and its suburbs. The town is of an oblong form, extending 1 m. in length, and nearly ¾ m. in breadth. Its length from S to N is parallel to the course of the Pleisse. It is surrounded by gardens and orchards on all sides; and has on the N and W a triple barrier of water formed by the several rivers in its vicinity, which form an interlacement of water courses. L. was formerly fortified, but has long been dismantled, and the space occupied by the ramparts is laid out in gardens with a beautiful alley of

lime-trees: outside of these are the suburbs, two large and two small, which are pleasingly laid out. The only remaining fortification is a solid black-looking castle adjacent to the river, on the SE side of the town, called Pleissenburg, with a tower rising from the point of two converging bastions to the height of 228 ft., which forms an observatory. The town is divided into 4 quarters, has 4 handsome freestone gates, and contains 7 squares, 6 principal streets, and 12 small streets. The streets are neither broad nor well-lighted, but they are kept clean by means of sewers. The private houses, though crowded, are lofty, and have in general a good appearance; and the whole town, though scarce comparable to Dresden in beauty, has an air of comfort and substantiality. Among the public edifices are remarked the exchange, the town-house, the cloth-hall, the Lutheran church of St. Nicholas, the Roman Catholic chapel, the post-office, the booksellers' halls, the Augusteum, the new theatre, and the arsenal. On an esplanade, in one of the suburbs, is a statue of the late king of Saxony. Besides 6 hospitals, there are in the town an orphan-house, a foundling hospital, an institute for the deaf and dumb, and a house-of-correction with a separate ward for lunatics. Here are also 3 public schools. The environs contain a number of pleasant gardens. There are railroads from L. to Dresden, Munich, Magdeburg, Berlin, and Cassell.—In the subjoined cut the castle and observatory are marked *a;* the church of St. Nicholas, *b;* the great market-square, *c;* the Rath-haus, *d;* the Paulinum or Fursten-haus of the university, *e;* the exchange, *f;* the civic school, *g;* the esplanade, *h;* the church of St. Thomas, *r;* the theatre, *t;* the Grimmaische-gasse, *i i;* the Peterstrasse, *k k;* the Reich-strass, *l l;* the Bruhl, *s s s;* the Rosenthal, *m;* the Petersteinweg, *n;* the road to Berlin, *o o;* the road to Halle, *p p.*



University.] The university of L. was founded in 1409. It is divided into four nations, the Saxon, the Misnian, the Franconian or Bavarian, and the Polish or Silesian; and consists, like other German universities, of the faculties of theology, law, medicine, and philosophy. There is not properly speaking any specific building for the university; but six colleges or academical halls, in which the lectures are given, compose it. The principal of these are the Augusteum and the Paulinum. The number of regular professors in 1834 was 34, whose total salaries, independently of certain small fees, amounted to 32,410 dollars, or £4,725; exclusive of extra professors, private lecturers, and teachers of the living languages and fashionable exercises. There are for the poor students 150 small bursaries or exhibitions, of 30 rix-dollars (£5 or £6) a-year each. Most of the students live within the walls of the old Paulinum, where some of them are allowed both board and lodging, but others are only entitled to a seat at the public table. The number of students varies from 800 to 900. The university library contains about 112,000 vols.; the town's library, 60,000. The latter contains several rare and beautiful editions of the classics, about 2,000 manuscripts chiefly oriental, and a variety of antiquities, gems, medals, and natural curiosities. To the university belong a museum of natural history, a clinical institute, a botanic garden, and an observatory. The property of the university is valued at £156,000; but the interest of the larger portion is applicable only to benevolent purposes.—L. has also a civil school, and school of general knowledge.—There are several literary and scientific societies in L., such as the belles lettres, the economical, the philological, the Linnæan, and an academy of the fine arts. The university and the book trade attract many learned characters to this place. The pop. is of comparatively mixed descent, but nearly all Protestants. In 1837, it amounted to 47,514; in 1846, to 54,519, of whom about 5,000 were Catholics. The number of inhabited houses in 1847 was 1,453.

Manufactures and commerce.] L. has manufactures of linen, silk, velvets and velveteens, gold and silver thread, playing cards, oil-cloth, sealing-wax, and liqueurs; likewise several silk-dyeing and woollen-spinning factories, and a number of musical instrument makers, joiners, dyers, goldsmiths, printers, and type-founders. These manufactures, however, supply but a small proportion of the business carried on in L., which is the chief commercial city in the interior of Germany, its central position and other cir-

cumstances having made it a general entrepot. A great part of this business is carried on at the three great fairs, which take place at the new year, Easter, and Michaelmas. These fairs are attended by from 8,000 to 9,000 purchasers, not only from every town of consequence in Germany, but from almost every commercial community in Europe and America. "At the Michaelmas fair of 1839," says Dr. Bowring in his *Report on the Prussian Commercial Union*, "the foreign purchasers of most importance were Greek merchants of Moldavia and Wallachia. About 7,000 cwts. of manufactured goods were declared for those principalities in the custom-house registers, chiefly German broad-cloths, ordinary English and German cotton goods, and French silks. From Russia few merchants attended, and those were almost exclusively from Odessa and the southern provinces. The severe police regulations in Northern Russia as to the granting of passports, constitute what is next to a prohibition to merchants to leave that country, even if strictly for commercial purposes. Few buyers, also, come from the Austrian dominions, except Galicia; from which prov., as well as from Prussian Poland and Cracow, many Jews frequent the L. fairs, and, in spite of every obstacle, smuggle manufactured goods of all kinds across the Russian frontiers. Switzerland is principally supplied with German and other foreign goods from Frankfort-on-the-Maine; Italy with the same, by way of Trieste or Leghorn, and other ports. The trade with the United States is mostly effected by commission; and from France and England not many visitors attend the fair in question, (which they resort to principally for Russian produce). If, however, the attendance of foreign buyers at the Michaelmas fair of 1839 was perceptibly less than on previous occasions, the number of German purchasers was much greater than usual: the fair was considered to have been one of the best for many years; and, as proving how intimately the state of finance and commerce in Great Britain affects that of other parts of the globe, it may be remarked, that one of the principal causes of the activity of the inland trade on that occasion is stated to have been the previous large exportation of corn to England, which had supplied some parts of Germany with no insignificant sums of money. Of the goods brought to the L. fairs, the broad-cloths of Prussia and Saxony are among the most important; from 90,000 to 100,000 pieces is only a medium quantity sold. Fancy fabrics for trousers, especially from the Rhenish provinces; winter coatings, made in Brandenburg, and which cost to the purchaser about 20 per cent. less than English fabrics of the same description; flannels, and Saxony merinos, meet with a ready sale. Of English woollens there was a considerable stock at the fair of 1839; and figured crapes were wholly cleared off, without satisfying the demand. German cottons, which have long been successfully competing with the British in the German markets, were so rapidly cleared off, that one house in Berlin sold off and renewed its entire stock in the space of a fortnight! British printed calicoes, however, at low prices, still form an important item in the account, being bought by the Moldavian and Wallachian merchants, and the Polish Jews. The plain silks of Berlin, which now rival those of France and Switzerland; figured silks from Crefeld and Elberfeld (Rhenish Prussia); French figured silks for Russia, and shot-silks for the Turkish principalities and Germany; the ribbons of St. Etienne; linens of Silesia; lace and embroidery of Saxony; wooden clocks, and other wooden articles, made extensively in the mountain and forest districts of Germany; the jewellery, &c., of Berlin, which now to a formidable extent rival the French; Dresden china, and Bohemian glass, are among the principal articles of traffic. Of Russian produce there were, at the Michaelmas fair of 1839, about 18,000 cwts. of hides of leather; 2,500 cwts. of isinglass; about 5,000,000 quills (as estimated); besides furs and peltry, feathers, horse-hair, &c.; for some of which goods there was a less rapid sale than usual." The total value of the business transacted here in a year is computed at 27,000,000 dollars, or £4,500,000 sterling, exclusive of the book-trade, which forms a remarkable and a peculiar object in the commerce of L.

Book-trade.] Scattered as are the German *literati*, the whole sale booksellers are confined to a few large cities, as Frankfort-on-the-Maine, Berlin, Nuremberg, Augsburg, and Hamburg. These supply the retail booksellers in each surrounding district, and have long felt the necessity of a place of periodical meeting, to purchase, or rather to exchange, their respective publications. This facility, afforded formerly by Frankfort-on-the-Maine, has for the last hundred years been sought in the more central position of L. Here the booksellers of every large town in Germany assemble at the Easter fair, each bringing a portion of the books printed by him since the last year. These they exchange for other books; and whoever happens to take more books than he gives, pays the balance in money or bills, and receives a large discount. Foreign books are likewise bought and sold at the fair, and considerable business continues to be done in books throughout the year. The number of booksellers settled at L. is about 130; the number from other parts who attend the fair varies from 200 to 300. The new publications, great and small, exhibited for sale, are computed at an average of 5,000 distinct works; but as the editions are generally small, the value of the books sold or exchanged is supposed not to exceed £200,000 in a year. In the *Handbuch fur Kaufleute*, in 1835, it was estimated that 40,000,000 of sheets of letter-press are printed yearly at L.; and in the Appendix to Dr. Bowring's report it is actually carried up to the enormous amount of 70,000,000 of sheets per annum! Almost every publishing-house in Germany has an agent in L., with whom books remain for a twelvemonth and a day after their publication, when what are unsold are returned by the agent to the publisher, under the name of 'crabs.' Of the abundance of this species of shell-fish the publishers have generally occasion to complain; for it would seem that the profits of the bookselling business in Germany are by no means commensurate with its extent. In 1589, the number of new works brought to the L. fair was 362; in 1616, 731; in 1716, 558; in 1789, 2,115; in 1814, 2,529; in 1820, 3,958; in 1830, 5,926; in 1839, 9,738. It is to be observed, however, that about one-half of the books in the fair catalogues of this century are only new editions.

History.] L. and its neighbourhood have been repeatedly the scene of military conflicts. During the Thirty years' war the Swedes gained near it the two great battles of 1631 and 1642 over the imperialists. L. was taken by Frederick II. in 1745, and again in 1756; and on the latter occasion suffered greatly from the exactions of the conqueror. These were, however, far surpassed by its sufferings in 1813, when it was made the general hospital of the French army; and its environs became in the autumn the scene of the most important events. In August and September of that year the Allies had acquired a marked superiority, and had worsted the French in several actions; but Bonaparte, clinging pertinaciously to the central position of Dresden, his opponents took the bold determination of throwing themselves in his rear, at a distance of 80 m. Towards the middle of October, Blucher and Bernadotte arrived, by a circuitous march, near the environs of Leipsic on the N, while Schwartzenberg drew near the city from the SE. The French were in the middle, and contested on the 16th, with great firmness, the distant outposts against each of the armies. The 17th was passed by both sides in approximating their forces, and preparing for a decisive conflict. Blucher and Bernadotte marching round to the E, put themselves in communication with Schwartzenberg; and the dreadful engagements of the 18th took place over a long line of positions extending from N to S, and distant from L. about 7 m. E. The opposing masses numbered 240,000 on the side of the Allies; and 160,000 on that of the French. The battle began early at each end of the positions; but soon became close and sanguinary, particularly at the village of Probstheyde, on the r. of the French, whither Bonaparte repaired in person. This v. was repeatedly taken and retaken. The fire of the artillery was destructive on both sides, and all was undecided, when at noon a messenger from the extreme l. of the French position brought the unwelcome notice that a part of the Saxon artillery and cavalry had gone over to the Allies. At three o'clock came the still more alarming information of the desertion of the Saxon infantry. The intelligence was kept secret; a detachment of the French guards replaced the Saxons; but the superiority now acquired by the Allies was decisive, and the battle closed with the loss of a considerable part of the French position. A retreat, all the way to the Rhine, was now unavoidable. The orders for it were issued at nightfall, but the execution was necessarily very slow, all being obliged to take one road, the others being occupied by the Allies. The French accordingly suffered dreadfully in this

retreat; and from this time forward the superiority of the Allies was decisive and irresistible.

LEIPSIGE, a village of Bohemia, in the circle of Bunzlau, on the road from Hayda to Gabel. It is a long straggling place, extending 1½ m. along a valley between two steep banks. It has a bleachfield, and a manufactory of linen thread.

LEIRE, a parish in Leicestershire, 4 m. NNW of Lutterworth, intersected by the Midland Counties railway. Area 870 acres. Pop. in 1841, 406.

LEIRE, or San Salvador-de-Leire, a monastery of Spain, in the prov. of Navarre, partido and 6 m. NE of Sanguesa, on the r. bank of the Aragon. The church contains the tombs of several of the kings of Navarre.

LEIRIA, a town of Portugal, capital of a comarca, in the prov. of Estremadura, 78 m. NNE of Lisbon, in a fertile and well-cultivated valley, near the r. bank of the Liz. Pop. 2,500. It has a suburb, and is enclosed by walls. It contains an old castle, a cathedral, 2 parish-churches, 3 convents, a college, a school, and an hospital. In the vicinity is a forest of firs, planted by order of King Dionysius, to prevent the advance of the sand from the coast over the fertile soil of the locality. At the neighbouring v. of Marinhas is a large glass-factory. This town was taken from the Moors, and fortified by King Henriquez. It was the residence of several sovereigns.

LEISA, a village of the grand-duchy of Hesse-Darmstadt, in the district and 1½ m. S of Battenburg, and 13 m. NNW of Marburg. Pop. 285. It is noted as the scene of a victory of Charlemagne over the Saxons in 779.

LEISBORN, a village of Prussia, in the prov. of Westphalia, reg. and 33 m. SE of Munster. Pop. 1,864.

LEISIGEN, a village of Switzerland, in the cant. and 27 m. SSE of Berne, and bail. of Interlachen, at the foot of a mountain of the same name, on the S bank of Lake Thun. Pop. 416, Protestants. It has ferruginous baths.

LEISSNIG, an amt or bailiwick and town of the kingdom of Saxony, in the circle and 30 m. ESE of Leipzig, and 39 m. WNW of Dresden, on a hill, near the l. bank of the Freyberg Mulde, and at an alt. of 469 ft. above sea-level. Pop. 4,800. It is enclosed by walls, and has a fine castle on the opposite side of the river. It contains 2 churches and a college, and possesses manufactories of cloth, linen, and tobacco-pipes, and several spinning-mills and bleacheries. It is noted as the birth-place of Schwarz, the reputed inventor of gunpowder.

LEISTON, a parish of Suffolk, 3½ m. ESE of Saxmundham. Area 5,220 acres. Pop. 1,177.

LEITE, a small river of Prussia, in the reg. of Gumbinnen, an affluent of the Memel.

LEITERBACH (Unter), a village of Bavaria, in the circle of Upper Franconia, N of Bamberg. Pop. 320.

LEITH, a district suburban to Edinburgh, lying between it and the frith of Forth, and comprising its port, some outskirts of its streets, part of its parliamentary territory, and a considerable portion of its environs. Parochially it is divided into North L. and South L. The water of Leith divides North from South L. The former p. has an area of only about 270 acres, and, with the exception of some garden grounds, and a few fields, is all covered by villas, and by the villages of Newhaven and Hillhouse-field, and the town of North L. The pop. in 1801 was 3,228; in 1831, 7,416; in 1841, 8,492.—South L. has an area of about 1,200 acres, and includes besides its landward districts, parts of Calton and Canongate, Abbey-hill, Norton-place, the E side of Leith-walk, Jock's Lodge, Restalrig, and the whole town of South L. Pop. in 1801, 12,044; in 1831, 18,439; in 1841, 19,776. The ancient seat and name of the p. of South L. was Restalrig.

Leith, the seaport of Edinburgh, a parliamentary borough, and a populous and important town, stands, as to its proper boundaries, from ¾ to 1¾ m. N of Edinburgh; as to its street-lines and edificed area, connected with Edinburgh by the long street called Leith-walk. The limits include all the p. of North L., with, of course, the large suburb and separate harbour of Newhaven, a portion of St. Cuthbert's, about equal in extent to North L. p., and very nearly one-third of the p. of South L. With some not very trivial exceptions, it is a field of waste lands, and a confused arena of alleys, lanes, and dingy streets, encinctured with a broad belt of gay and attractive buildings. North L., which contains the docks, and anciently comprehended the citadel and the chief seat of traffic, was of old a congeries of low houses, huddled into groups or irregular lines, and straddling their way among nuisance in front and in rear, very much in the style of a Portuguese or Spanish town of the present day; but within the last 30 years, and particularly since about 1818, it has undergone great and renovating changes. The exchange buildings, at the foot of Constitution-street, are a large and elegant structure in the Grecian style of architecture. —The custom-house, built in 1812, at the cost of £12,000, and situated at the W end of the lower drawbridge, is a noble edifice, likewise in the Grecian style, and adorned in front with pillars and pediment.—The new court-house, situated at the corner of Constitution-street and Charlotte-street, is by far the most elegant edifice in the town.—The high school, built in 1806, on the SW corner of the links, is a spacious oblong building, in the Grecian style of architecture.—Dr. Bell's school, built in 1839, in Great Junction-street, is a large and elegant Gothic edifice.—The Trinity-house, erected in 1817, on the W side of Kirkgate, is a handsome edifice.—The fort stands about a ½ m. W of the custom-house. It has long been a station for a considerable park of artillery, and is kept in excellent order.

Harbour.] L. harbour consists of the gut formed by the discharge of the water of Leith, and is entirely tidal. It was formerly, with the exception of being traversed by the shallow and unimportant stream, quite dry at low water; and even yet it has then a very trifling depth. The late John Rennie, civil engineer, was employed in 1799 to examine the ground, and to form designs of docks and extended piers on a scale somewhat proportioned to the actual and increasing trade of the port. An immediate result was the construction of a splendid suite of docks, at the cost of about £285,000. Two wet docks, each 250 yds. long, and 100 yds. wide, were, with three graving-docks on their N side, commenced in 1800, and completed in 1817. A third and larger dock on the W, designed to reach nearly to Newhaven, was projected; but this and all kindred matters were thrown into abeyance by a total failure of funds. In 1824-5, the E pier was extended about 1,500 ft., so as to have an entire length of 2,550 ft., or more than half-a-mile; a W pier and breakwater was erected to the extent of 1,500 ft., and terminating within 200 ft. of the other; and a part of the western end of the W dock was set apart as a store-yard for the naval service. In 1848, further improvements were commenced, by which the E pier was extended 1,000 ft. further, and the W breakwater converted into a pier, with a low water landing-place at its extremity; while the channel or fair-way has been given a depth of 6 ft. at low water A new dock has also been formed, contiguous to the old E dock, 700 ft. in length, and 300 ft. wide, with 1,900 ft. of wharfage, and 21 ft. water at low neap tides. The harbour revenue amounts to about £27,000 per ann.—Steam-vessels from L. ply to Hamburg, Rotterdam, London, Hull, Newcastle, Berwick-upon-Tweed, Shetland, Orkney, Caithness, Inverness, Cromarty, Banff, Aberdeen, Montrose, Dundee, the coasting-towns of Fife, and Stirling. Several ships belonging to the port are employed in the Greenland whale-fishery, and a considerable number trade with distant foreign ports, especially with those of the Baltic and the West Indies. The quarantine-station of the port is Inverkeithing bay, on the Fife coast, 8¾ m. in a direct line NW by W of the entrance of L. harbour.

Commerce and trade.] The principal articles of importation from foreign countries are wines, tobacco, timber, hemp, tallow, grain, and West Indian

produce. The whole Baltic trade with the E of Scotland was at one time concentrated in L. The customs revenue in 1849 was £545,884; in 1850, £531,220.—L., though not in a strict sense a manufacturing town, or the seat of any staple produce, possesses a variety of productive establishments, some of them of considerable or even great magnitude. Ship-building is carried on in several yards, and has produced many large steamers and bulky sailing-vessels. There are sailcloth factories, manufactories of glass, chiefly in the department of common ale and wine bottles, and a large corn-mill, propelled by steam. Other manufacturing establishments than those already named, are some manufactories of cordage, two breweries, a distillery, places for the rectifying of spirits, an extensive sugar-refining establishment, a large meat-preserving work, some soap and candle manufactories, and several cooperages and saw-mills.

Municipal government, &c.] L. is now governed by a provost, 4 bailies, a treasurer, and 10 councillors. It was, until very recently, altogether enthralled to Edinburgh.—L. unites with Musselburgh, Portobello, and Newhaven, in sending a member to parliament. The pop. of the parl. borough in 1841, was 25,984; in 1851, 30,676. Parliamentary and municipal constituency in 1839, 1,272; in 1849, 1,372.

LEITH-HILL, an eminence in Surrey, near Boxhill, rising to the height of 993 ft. above sea-level, commanding an extensive prospect over the wealds of Surrey and Sussex.

LEITHA, a river formed in the archduchy of Austria, by the junction of the Schwarzau and Pitten, which unite at the village of Haderswerd, and 6 m. S of Neustadt. It flows first NE along some parts of the frontier of Hungary, passes Bruck, then bends SE into Hungary, and joins the Raab, on the r. bank, at the town of that name, and after a course of about 90 m.—Also a chain of mountains which runs in the SW direction, along the confines of the archduchy of Austria, and the Hungarian comitat of Oedenburg, between the river of the same name and the NW bank of Lake Neusiedel. It extends over a distance of about 15 m., but is of little height.

LEITHEN, a rivulet of Peebles-shire, in the NW angle of the p. of Innerleithen, an affluent of the Tweed.

LEITHOLM, a village of Berwickshire, in the p. of Eccles, 7½ m. NE of Kelso. Pop. in 1841, 365.

LEITMERITZ, or Litomerice, a circle or administrative subdivision and town of Bohemia. The circle, which is the most northerly of the prov., is bounded on the N by the kingdom of Saxony; on the E by the circle of Bunzlau; on the S by that of Rakonitz; and on the SW by the circle of Saatz. It is 60 m. in length from NE to SW, and 24 m. in medium breadth, comprising an area of 60 Austrian sq. m., and contains 43 towns, 936 villages, and 81 seignories. Pop. in 1833, 350,662; in 1837, 359,881. It is intersected in the NW by the chain of the Erzgebirge, and is generally mountainous. Its principal rivers are the Eger, Bila, and Polzen. It is noted for its fertility, producing corn, fruit, hops, flax, and wine in great abundance. In the mountains are found tin, precious stones, and several mineral springs.—The town, which is the capital of the above circle, is 36 m. NNW of Prague, and 45 m. SSE of Dresden, on the r. bank of the Elbe, which is here crossed by a bridge, and at an alt. of 357 ft. above sea-level. Pop. 4,300.—It is fortified and well-built; and contains a fine cathedral, an episcopal palace, numerous churches, a custom-house, a gymnasium, a theological academy, a diocesan seminary, and a printing establishment. It has extensive manufactories of cloth, straw-hats, and chicory, and carries on an active trade in corn, fish, especially salmon, wine, and other productions of the locality.

LEITOMISCHL, Leutomischel, or Litomissle, a town of Austria, in Bohemia, in the circle and 42 m. NE of Chrudim, and 12 m. NNE of Policzka, on the Laucna. Pop. 6,395. It has a castle belonging to the counts of Waldstein, 3 churches, a piarist college, a gymnasium, and a lyceum; and possesses manufactories of cloth, muslin, and printed goods, several dye-works, and distilleries. This town was taken by the Prussians in 1758, and suffered extensively from conflagrations in 1775 and 1814.

LEITOWN, a village in the p. of Errol, Perthshire. Pop. in 1831, 110; in 1841, 112.

LEITRIM, the most NE county of the prov. of Connaught in Ireland. It is bounded on the N by the bay and co. of Donegal; on the NE by co. Fermanagh; on the E by the cos. of Fermanagh and Cavan; on the SE and S by co. Longford; and on the W by cos. Roscommon and Sligo. It can hardly be called a maritime county; for it is touched by Donegal bay, over a distance of only 2½ m. Its outline is elongated and irregular. Its extreme length, in a direction S of SSE, is 41½ m.; its breadth, at the N extremity, is 2½ m.; at the centre, or Lough Allen, 5¼ m.; midway between the centre and the N, 13 m.; and midway between the centre and the S, 15 m. Its area comprises 249,350 acres of arable land, 115,869 of uncultivated land, 3,396 of continuous plantations, and 23,748 of water,—in all, 392,363 acres.

Surface.] The surface of the central and N divisions of the co., in a general view, is a part of a wide shelving slope which descends N, along Sligo, Leitrim, Fermanagh, and Donegal, to the sea; and of the S division, is part of a compound series of mountains, high pasture-grounds, and poor arable lands, disposed round the sources and early course of the Shannon. The loftiest summits in the N division have altitudes above sea-level of 1,712, 2,007, 1,575, 1,228, 1,511, 1,524, 1,448, 1,447, 1,123, and 1,377 ft.; the loftiest summits in the S division, all in the near vicinity of Lough Allen, have altitudes above sea-level of 1,407, 1,707, and 1,922 ft.

Waters.] Lough Melvin, on the NE boundary, lies 90 ft. above sea-level, and has within co. L. an area of 4,460 acres. Upper Lough Macnean, on the E boundary, lies 172 ft. above sea-level, and has within the co. an area of 636 acres. Lough Garadice, on the E boundary, lies 176 ft. above sea-level, and has within the co. an area of 1,106 acres. The chief lakes and loughlets, on the E and S boundary, are Glasshouse, Laheen, Rockfield, Drumhart, Cullies, Gulladoo, Beaghmore, South Tully, Gortermone, Doogary, Nabelwy, Cloonoose, Fearglass, Sallagh, and Drumshambo. Lough Allen, situated on the W boundary, lies 159 ft. above sea-level in summer, and has an area within co. L. of 7,536 acres. Lough Gill, situated on the W boundary midway between Lough Allen and the sea, lies 20 ft. above sea-level, and has an area within the co. of 498 acres. Lough Glin or Glencar, situated on the W boundary 4½ m. N of Lough Gill, lies 97 ft. above sea-level, and has an area within the co. of about 190 or 200 acres. Six or seven of the interior lakes of the co. have each an area of from 180 to 350 acres; but the others, though numerous, are in general very much smaller, and probably do not average more than between 30 and 50 acres.—Excepting the Shannon after its efflux from Lough Allen, all the streams are of inconsiderable volume, and most of comparatively very brief length of run. The principal in the N division of the county are the Drowes or Bundoran and the Duff or Banduff to Donegal bay; the

Glenaniff, the Ballagh, the Lackagh, and the Kilcoo, to Lough-Melvin; two rivulets to Upper Lough Macnean; the Shannon and the Diffagher to Lough Allen; and the Bonnet, the longest and much the most beautiful of the whole, to Lough Gill. The principal ones in the S division of the co. are the Yellow and the Stony rivers to Lough Allen; the Blackwater and the Dale to Lough Garadice; and the Aghacashel, the Eslin, and the Rinn to the Shannon.

Climate.] The climate of L. is aggregately colder than that of the S cos. of Ireland; and, owing to the great number and the height of its mountains, it is more raw and wet than even most parts of other counties in the same latitude. The S division, however, is considerably more genial than the N.

Minerals.] A tiny district of gneiss, passing into granite and mica slate, lies about 3½ m. WSW of Manor-Hamilton, but is chiefly confined to the mountain of Benbo. A belt of mica slate, about 2 m. in breadth, and nearly insulating the previous formation, extends down the vale of the Bonnet river. Old red sandstone and sandstone conglomerate occupy a tiny district in the S environs of Drumshambo, and also to the SE of Drumsna. Yellow sandstone and sandstone conglomerate form two districts, each about 3½ m. in mean breadth, and extending respectively across the N and the S extremities of the county. Millstone-grit, including white sandstones and shales with thin beds of limestone and coal, forms a great district of from 6 to 16 m. in length from the foot of Lough Allen across the co. to Sligo and Fermanagh; it also constitutes the upland patch of surface which figures conspicuously in the mountain-mass of Dartree. The coal formation, constituting a chief part of the coalfield of Connaught, and spreading out to continuations in the adjacent counties of Roscommon and Sligo, exhibits itself in several comparatively large patches and pendicles within the millstone-grit district, and particularly in the immediate vicinity of Lough Allen. Floetz or carboniferous limestone is the surface rock of all the remaining parts of the co., both N and S of the millstone-grit district, and constituting rather more than one-half of its entire area.—Lead ore occurs near Lurganboy; copper ore, on the N side of Benbo; manganese, in the vicinity of Benbo; and steatites, marls, fuller's earth, and potter's clay, between Lurganboy and Dromahaire.

Soils and agriculture.] Large tracts of deep, dark, rich soil, on a limestone bottom, occur in the vicinity of Manor-Hamilton, Dromahaire, Sheemore, and Mohill. The sides and summits of most of the hills in the S division of the co. are covered with a thin stratum of hungry, ferruginous loam, upon a hard, gravel bottom, varying in character with the geognostic structure of the hills. The valleys of the S have in general a superior soil to that of the hills, deeper in surface, not so reddish, and much more fertile. In consequence of a large proportion of the profitable land consisting of strong wet soil, draining is in a supereminent degree necessary in order to any department of agricultural prosperity, yet it is almost generally neglected. Sheep-stock is kept to a surprisingly less amount than on similar lands in other parts of the kingdom; and the reason is simply, that, in consequence of having to feed on the herbage of moist, undrained pastures, it is generally unthriving. The acres under crop in 1848 were 5,319 in wheat, 31,848 in oats, 2,987 in barley and rye, 127 in pease and beans, 8,098 in potatoes, 2,954 in turnips, 1,080 in cabbage and mangel-wurzel, 184 in flax, and 23,788 in meadow and clover.—In 1841, the number of farms of from 1 acre to 5 acres each, was 9,373; of from 5 to 15 acres, 7,971; of from 15 to 30 acres, 877; and of upwards of 30 acres, 202. In 1841, the live stock, together with their respective value, were 2,986 horses and mules, £23,888; 2,515 asses, £2,515; 45,421 cattle, £295,237; 9,588 sheep, £10,547; 21,812 pigs, £27,265; and 163,355 poultry, £4,083. Grand total of value of live stock, £363,535. In 1847, the number of horses and mules was 3,214; of asses, 3,840; cattle, 56,864; sheep, 4,625; pigs, 3,376; goats, 2,317; poultry, 84,958.—About 140 years ago almost the whole co. was a continuous forest. The forest on the Slieve-an-Ierin mountains was burnt to extinction in conducting iron-works on the banks of Lough Allen; and many other portions are supposed to have been destroyed as common fuel, since the bogs, even about 40 years ago, had "only begun to be nibbled at around the edges for turf." In 1841, the continuous plantations within the county consisted of 3,396 acres.

Trade and manufactures.] In 1802, the only noticeable establishments or appliances in any of the departments of manufacture, were 4 bleachfields, a considerable number of looms, comparatively numerous coarse potteries, about 50 corn-mills, and about half-a-dozen tuck mills. The existing state of trade and manufactures will be best shown by the personal statistics of some branches of productive industry ascertained in the census of 1841:—Millers, 59; flax dressers, 74; spinners of flax, 6,709; of wool, 1,379; of unspecified classes, 13,214; weavers of linen, 247; weavers of woollen, 30; weavers of unspecified classes, 709; bleachers, 12; dyers, 9; clothiers, 4; skinner, 1; curriers, 3; tanners, 3; brogue-makers, 126; boot and shoe makers, 540; tailors, 528; lime-burners, 6; stone-masons, 250; carpenters, 285; coopers, 246; coach and car-makers, 5; letter-press printers, 5.

Communications.] A line of canal connecting the Shannon with the Erne, and the internal navigations of the W with those of the NE, crosses the S section of the co. A projected line of railway from Dublin to Sligo passes up the l. bank of the Shannon for some distance within Leitrim, and touches the towns of Drumsna and Carrick-on-Shannon.—The chief roads within the co. are the mail-lines from Dublin to Sligo through Drumsna and Carrick-on-Shannon; from Enniskillen to Sligo through Manor-Hamilton; from Sligo to Londonderry across the N end of the county; from Drumsna to Mohill, and from Carrick-on-Shannon to Ballinamore.

Divisions and Towns.] The co. is divided into two baronies in the N, and three in the S. Rossclogher and Dromahaire occupy respectively the N and the S of the N division; and Carrigallen, Mohill, and Leitrim, occupy respectively the E, the S, and the NW of the S division.—The towns and chief villages in Carrigallen are Ballinamore, Carrigallen, and Newtowngore; in Dromahaire, Drumkeeran, Dromahaire, and part of Manor-Hamilton; in Leitrim, Drumsna, Drumshambo, Kiltoghert, Leitrim, Jamestown, Keshcarrigan, and part of Carrick-on-Shannon; in Mohill, Dromod, Cloone, Mohill, and Roosky; and in Rossclogher, Kiltyclogher, Kinlough, Lurganboy, and part of Manor-Hamilton. There is no town within the co. having a pop. of 2,000.

Statistics.] Population in 1792, 50,000; in 1813, 94,095; in 1821, 124,785; in 1831, 141,524; in 1841, 155,297; in 1851, 111,808, being a decrease of 28 per cent. within 10 years. Houses in 1792, 10,026; in 1813, 17,899; in 1821, 21,762; in 1831, 24,200; in 1841, 25,912; in 1851, 19,787. The following statistics are all of 1841. Males, 77,501; females, 77,796; families, 27,192. Inhabited houses, 25,912; uninhabited complete houses, 712; houses in the course of erection, 25. First-class inhabited houses, 152; second-class, 3,221; third-class, 11,340; fourth class, 11,199. Families employed chiefly in agriculture, 21,663; in manufactures and trade, 4,067; in other pursuits, 1,462. Families dependent chiefly on property and professions, 508; on the directing of labour, 5,799; on their own manual labour, 20,479; clergymen of the Established church, 20; Roman Catholic clergymen, 34; not specified, 6.—At the close of Dec. 1841, the National Board had in operation within the co. 32 schools, conducted by 52 male and 12 female teachers, attended by 2,463 male and 1,974 female scholars. In September 1848 there were 85 National schools in operation, attended by

11,159 children. — The criminal commitments in 1845 were 361; in 1847, 610; in 1848, 677.—The annual amount of property valued for the poor-rate is £162,552.—L. sent to the Irish parliament 2 members for the co.; 2 for Jamestown, and 2 for Carrick-on-Shannon; but it sends to the Imperial parliament only 2 members for the co. Constituency in 1841, 1,488, of whom 1,214 were £10 freeholders. In 1849 the constituency was only 615.

History.] Before the period of the Anglo-Norman conquest, the territory which now constitutes the co. of Leitrim formed a principality or petty kingdom governed by the chief of the sept of O'Rourk. L. was first erected into a separate co. in 1563 or 1565. In 1615, numerous grants of land in L. were made to English 'undertakers.' In 1641, Sir Owen O'Rourk, at the head of a force of native Irish, seized all the military strengths of the co., excepting the castles of Manor-Hamilton and Carrickdrumrusk, and garrisoned them against the English government. In 1650, the Roman Catholic bishops and clergy held a synod at Jamestown, delegated agents to treat on their behalf with foreign powers, and framed a sentence of excommunication against the person and all the adherents of the Marquis of Ormond. The forfeitures which followed the long and great rebellion of the 17th cent. extinguished the influence of the name of O'Rourk. In 1798 the French invaders under General Humbert marched and counter-marched through L., and finally surrendered at Ballinamuck. Either the co. or the town of L. gives the title of Earl, in the peerage of Ireland, to the noble family of Clements.

LEITRIM, a parish 4½ m. SE by E of Loughrea, co. Galway. Area 4,098 acres. Pop. in 1831, 1,688; in 1841, 1,562, of whom 280 were in the village of L.—Also a parish partly in co. Waterford, but chiefly in co. Cork, 3¾ m. E by S of Kilworth. Area 7,128 acres. Pop. in 1831, 2,032; in 1841, 2,579.—Also a village in the p. of Kiltoghert, in co. Leitrim, 3 m. N by E of Carrick-on-Shannon. Pop. 406.

LEITZKAU, a town of Prussia, in the prov. of Saxony, regency and 15 m. ESE of Magdeburg, and circle of Jerichow 1st. Pop. 996. It has 2 churches and an alms-house. The suburban v. of Althaus L. has a pop. of 138; and that of Neuhaus L., of 133.

LEIVA, or Nuestra-Senora-de-Leiva, a town of New Granada, in the dep. of Boyaca, 15 m. NW of Tunja, and 72 m. NNE of Santa-Fe-di-Bogota, in a plain, at the foot of a chain of mountains. Pop. 600. It has a parish church and 4 convents. The surrounding district is fertile and well-watered, and contains the rich copper-mines of Munquera.

LEIXLIP, a parish partly in co. Kildare and partly in co. Dublin. Area 3,201 acres. Pop. in 1841, 2,033. The town is 1½ m. WNW of Lucan, 3½ m. ESE of Maynooth, and 8¼ m. W by N of Dublin, at the confluence of the Liffey and Rye. Area 26 acres. Pop. in 1831, 1,159; in 1841, 1,086.

LEIZA, a town of Spain, in the prov. of Navarre, partido and 2 m. NW of Pamplona, at the foot of Mount Ariaz. Pop. 1,700. It has a fine parish church, and possesses manufactories of common woollen and linen fabrics, several iron and copper works, and a paper-mill. In the environs are mines of iron and copper, and a ferruginous spring.

LEIZERSDORF, a town of the archduchy of Austria, in the prov. of Lower Austria, 8 m. NNW of Korneuburg. Pop. 1,030.

LEJJUN (El), or Legune, a village of Syria, in the pash. and 22 m. SE of Acre, in the plain of Esdraelon.

LEKA. See Lockehaus.

LEKCHA, a lake of Russia in Europe, in the NW part of the gov. of Olonetz, and of the district of Povienetz. It is 24 m. in length from NW to SE, and 5 m. in breadth.

LEKE, a department and commune of Belgium, in the prov. of West Flanders, arrond. of Bruges. Pop. of dep. 1,286.

LEKKERKERK, a parish and village of Holland, in the prov. of South Holland, arrond. and 9 m. E of Rotterdam, cant. and 9 m. SSW of Haastrecht, on the r. bank of the Leck. Pop. 1,882.

LEKNO, a town of Prussia, in the prov. of Posen, regency and 36 m. SW of Bromberg, circle and 6 m. ENE of Wongrowiz, on a small lake. Pop. 433.

LEKSMOND, a village of Holland, in the prov. of South Holland, cant. and 11 m. N of Gorcum, and 11 m. SSW of Utrecht. Pop. 1,287.

LELANT (Uny). See Lalant (Uny).

LELEK (Sank), a village of Transylvania, in the country of the Szecklers, in the N part of the march of Haromszek.

LELESZ, a town of Hungary, in the comitat and 11 m. ENE of Zemplin. It contains a castle, and a Premonstratensian abbey. Pop. 1,609.

LELIAH, a village on the N coast of the island of Buro, in the group of the Molucca islands.

LELLEY, a township in the p. of Preston, E. R. of Yorkshire, 8 m. ENE of Hull. Area 800 acres. Pop. in 1831, 114; in 1841, 136.

LE LORROIR, a commune of Belgium, in the prov. of Hainault, dep. of Solre-Saint-Gery. Pop. 140.

LELOVO, a town of Turkey in Europe, in Albania, in the sanj. and 40 m. SSW of Janina, and 17 m. WNW of Arta, in a fertile valley of the Merlchica mountains.

LELOW, a town of Poland, in the gov. of Kielce, obwod and 31 m. N of Olkusz. Pop. 600.

LELUNDA, a river of Lower Guinea, which has its source in the mountains on the E confines of Congo, runs W past San Salvador, and throws itself into the Atlantic, 24 m. S of the embouchure of the Zaire, and after a course, in a generally W direction, of about 200 m.

LEMA, or Leima, a small group of islands in the China sea, near the W coast of Borneo, and to the N of the island of Carimata, in S lat. 1° 10′, and E long. 108° 50′.

LEMAN, a river of Devonshire, which falls into the Exe near Tiverton.

LEMAN (Lake). See Geneva (Lake of).

LEMANAGHAN, a parish of King's co., 3½ m. NE by E of Ferbane. Area 19,615 acres. Pop. in 1831, 5,787; in 1841, 5,806. It contains an extensive bog of the same name.

LEMBACH, a commune of France, in the dep. of the Lower Rhine, cant. and 7 m. WSW of Wissembourg, and 32 m. N of Strasburg. Pop. in 1841, 1,961.—Also a town of the archduchy of Austria, in the prov. of Lower Austria, and circle of the Mühl, 23 m. WNW of Passau, and 32 m. W of Freystadt. It has numerous spinning-mills.

LEMBECQ, a department and commune of Belgium, in the prov. of South Brabant, arrond. of Brussels, on the Senne. Pop. of dep. 2,401. The village is 12 m. SW of Brussels, on the Senne. Pop. 914. It contains an old castle; and possesses manufactories of sugar from beet-root, several distilleries and breweries, a salt-refinery, and several paper-mills.

LEMBERG, a commune and town of France, in the dep. of the Moselle, cant. of Saint Avold, 17 m. SE of Sarreguemines. Pop. in 1841, 2,599. Common pottery, pipe-clay, and tiles, are its chief articles of manufacture. In the vicinity are the extensive glass-works of Muzthal-Saint-Louis.—Also a village of Bavaria, in the circle of the Pfalz, district and 15 m. ESE of Deux Ponts. It has a glass-work.

LEMBERG, a central circle of Galicia; bounded by the circle of Zolkiew on the N; by Zloczow on the NE; by Brzezany on the SE; by Sambor on the SW; and by Przemysl on the W. It has an area of 932 sq. m., with a pop. in 1837 of 175,601. It is a flat country, with here and there a few hills of slight elevation, and watered by a few small streams. Its forests and pasturages are extensive;

and the rearing of cattle forms the chief employment of rural industry.

LEMBERG, or LEOPOLD, a city of Austrian Poland, formerly the capital of Red Russia, and now of Galicia and Lodomeria, giving name to the above circle, stands on the Peltew, or Poltev, a branch of the Dniester, in N lat. 49° 51′ 42″, E long. 24° 2′ 32″, 156 m. E of Cracow, in a deep round valley surrounded by hills which form a circle of about 4 m. in diam., and at an alt. of 868 ft. above sea-level. It is a large and populous place, containing in 1831, 50,536; in 1837, 58,728; in 1845, 73,000, a considerable proportion of whom were Jews. It was once well-fortified, but the ramparts have been converted into streets and public walks, though it has still two castles, one outside of and the other within the walls. The lofty towers and spires of the Catholic cathedral and the churches, and the height and massiveness of the houses, which are built of freestone, give the town an air of grandeur, particularly when viewed from a distance. Several of the streets in the suburbs are wide and straight, and the squares spacious. The city proper is small; but there are 4 suburbs each equal to the city in extent. The sides of the encircling belt of hills are covered with villas interspersed with gardens. The number of churches is 30. There is a university, which was removed to Cracow, but has been re-organized by the Austrian government, and in 1845 was attended by 1,400 students. There are also an Imperial academy, a Roman Catholic and a Greek ecclesiastical seminary, 2 high-schools, several Jewish schools, and a large public library. The Rath-haus is a very stately quadrangular pile; and the theatre is an immense building of recent erection. —L. is, next to Brody, the greatest trading-town of Galicia. Its fair, called the 'Three kings' fair,' which lasts 6 weeks from January 14th, is on a very large scale and the business transacted at it is immense, as L. is the principal entrepot between Odessa, and other Russian ports on the Black sea, and Vienna, and the rest of Germany. The Russians bring to the fairs of L. large quantities of peltry from Siberia and Tartary, and receive in exchange the hardware, woollen, and cotton goods of Austria; while the corn of Poland and Galicia passes through in waggons, to be shipped on the Dniester, and exported from Odessa. Great droves of horned cattle arrive also from Moldavia and Bessarabia, and are sent into the Austrian and Silesian territories. There are large establishments for manufacturing cotton stuffs, and extensive dye-works, distilleries, and tanneries. L. is the seat of a Catholic archbishop, a Greek metropolitan, and an Armenian archbishop.—In 1656, this city made a firm defence against the Russians and Cossacks; but in 1704, it was stormed by the Swedes. Since 1772, it has belonged to Austria.

LEMBEYE, a town of France, in the dep. of Basses-Pyrenees, 18 m. NE of Pau. Pop. 1,000.

LEMBO, a town of Lower Guinea, near the r. bank of the Lucala, 24 m. NNE of Massangano.

LEMENE, a river of Austrian Lombardy, which rises a little to the N of Santo Vito; runs S, passing Porto-Gruaro; and divides into two branches, one of which passes Santo-Gaetano, before it reaches the Adriatic; and the other branches off into several canals, while the main stream reaches the sea at Falconera.

LEMFORDE, a town of Hanover, in the co. and 9 m. S of Diepholz, to the SE of the Dummer-see. Pop. 912.

LEMGHIN, a town of Chinese Turkestan, 30 m. SE of Turfan.

LEMGO, a town in the principality of Lippe-Detmold, situated on the river Bega, in N lat. 52° 1′ 40″, E long. 8° 54′ 20″. It is a place of antiquity, and was formerly one of the Hanse towns, and possessed considerable woollen manufactures; but it never recovered its losses during the Thirty years' war. It has still however some manufactories of woollen, leather, and linen. It has 2 castles, a convent, a Lutheran gymnasium, an orphan house, a Calvinist and 2 Lutheran churches. Pop. 2,020.

LEMIA, or LEMUY, a small island in the Pacific ocean, on the coast of Chili, in S lat. 42° 40′, W long. 73° 35′. There is a village of about 20 houses upon its E side.

LEMINGTON, a parish in Gloucestershire, 12 m. SE of Stratford-on-Avon. Area 660 acres. Pop. 53.

LEMLAND, one of the Aland isles, in the gulf of Finland, belonging to Russia, lying immediately S of Aland, in N lat. 60° 4′. It is 8 m. in length from N to S.

LEMLUN, a village of Asiatic Turkey, on the Euphrates, about midway between Bassora and Hilla. About 10 m. below is the village of New L., where the river divides into two arms which form a delta, and spread into extensive marshes which during the period of the highest inundation of the river cover a breadth of 60 m., and through which the main stream of the Euphrates pursues a tortuous course in a channel from 50 to 80 yds. broad, and from 6 to 9 ft. deep. At Salva, about 20 m. below New L., the river, though still in the marshes, resumes in some degree its previous size, and the marshes are contracted by at least one-half. At the E extremity of the Gratim inlet, 52 m. below L., the marshes terminate. The country around these marshes produces abundance of rice, and is inhabited by the wild and lawless tribes called Khaizail and Kualem, who live in tents and in huts made of reeds, and use beautifully shaped reed canoes.

LEMMER, a village of Holland, in the prov. of Friesland, 20 m. S of Leeuwarden, in N lat. 52° 50′ 44″. Pop. 2,327.

LEM-MAS, or LE-MAS, a group of islands off the S coast of China, at the entrance of the bay of Canton. Tam-quan-Tow or the Great Lema, the extreme NE of the group, is intersected by the parallel of 22° 3′ N, and the meridian of 114° 17′ E. The other islands, in succession to the SW, are Ya-chow, E-chow, Tai-tam-mi, Hai-pong, and Yung-gai.—This group must not be confounded with the island of Lam-ma to the SW of Hong-kong, and 9 m. NNW of the Great Lema.

LEMNOS, STALIMENE, or LIMYE, an island of European Turkey, in the archipelago, between the promontory of Mount Athos and the Hellespont, in N lat. 39° 55′, 22 m. SW of Imbros. It is 15 m. in length from E to W, and about 11 m. in breadth. On the N there is an extensive roadstead; and on the S are the two harbours of Port Kudia and Port Santo-Antonio. About two-thirds of the surface are hilly, dry, and barren; but it is tolerably fertile in the S and W parts, which are watered by a number of springs. It produces corn, oil, hemp, flax, cotton, silk, and considerable quantities of grapes, figs, and mulberries; and its shores are celebrated for the variety and excellence of the fish taken upon them. Its chief exports are ewe-milk cheese, silk, cotton, and wool. The *terra sigillata* of L. is a kind of fine clay which was at one time in high repute for its supposed medicinal properties. The pop. of the island amounts to 12,000, a large proportion of whom are Greeks, and excellent seamen. In the time of Belon this island contained 75 towns and villages. —The small town of L., the cap. of the island, the see of a Greek metropolitan, has a harbour, and contains about 2,000 inhabitants. The only other places worth mentioning are Kochino, Candia, and Santo-Antonio.

LEMON, a township of Butler co., in the state of Ohio, U. S. Pop. 2,053.

LEMPA, Lempta, or Zacatecoluca, a river of Guatimala, in the state of San-Salvador, which issues from a lake to the ESE of Guatimala, on the W extremity of the table-land; runs ESE to the junction of the Torolo, when it bends S; and throws itself into the Pacific, 20 m. S of San-Salvador, and after a course of about 75 m. It is at some points about 150 yds. in breadth, but its navigation is obstructed by a bar of sand at its mouth.

LEMPDES, a commune and town of France, in the dep. of the Haute-Loire, cant. and 5 m. W of Auzon, and 9 m. NW of Brioude, on the Allagnon, which is here crossed by a bridge. Pop. in 1841, 1,728.—Also a commune and town in the dep. of the Puy-de-Dôme, cant. and 4 m. SW of Pont-du-Chateau. Pop. 1,883.

LEMPITLAW, a village in the p. of Sprouston, Roxburghshire, 4½ m. E of Kelso.

LEMPS (Le-Grand), a canton, commune, and town of France, in the dep. of the Isère, arrond. of La-Tour-du-Pin. The cant. comprises 13 com. Pop. in 1831, 14,158; in 1841, 14,403.—The town is 13 m. S of La-Tour-du-Pin, and 23 m. NW of Grenoble. Pop. in 1841, 2,115.

LEMSAL, a town of Russia in Europe, in the gov. of Livonia, district and 50 m. NNE of Riga, and 33 m. W of Wolmar, on a small lake, near the gulf of Riga. Pop. 1,050. It has several tanneries, and carries on a considerable trade.

LEMSTER, a township of Sullivan co., in the state of New Hampshire, 40 m. W of Concord. The surface is hilly, and is watered by branches of Sugar and Cold rivers. Pop. in 1840, 941.

LEMTA. See Lamtah.

LEMUY. See Lemia.

LEMVIG, a town and port of Denmark, in Jutland, in the diocese and 90 m. NNW of Ribe, bail. and 34 m. N of Ringkiöbing, on the S coast of the Lymfiord. Pop. 800. It possesses building docks and an hospital, and has productive fisheries.

LEN, a river in Kent, which flows into the Medway at Maidstone.

LENA, a noble river of Eastern Siberia, which has its source in the gov. of Irkutsk, on the NW side of the lofty granitic mountains of Baïkal, 30 m. from the W bank of the lake of that name, in N lat. 53° 20′, E long. 106° 10′. It runs first N, then NE; becomes navigable at Katchuk or Kotshuga, only 50 m. from its source; enters into the prov. of Yakutsk, near Krestovskoï; on reaching Yakutsk, where it is a wide and noble river, it takes a nearly N direction, and proceeds to the Arctic ocean, which it enters 700 m. below Yakutsk, by numerous mouths, in N lat. 73°. Its principal affluents are the Kirenga, Vitima, Olekma, Talbatchim, Aldan, on the r., and on the l. the Kuta, Viliuï, and Mouna. The basin of the L., which is of considerably smaller extent than that of the Yenisei and Obi, is enclosed on the S by the mountains of Baïkal and of Stanovoï, on the SE by the latter, on the E by a range of low hills by which it is separated from the basins of the Indighirka and Yana, and on the W by another low ridge running in the direction of the basins of the Yenisei and Olenek. The length of this river is upwards of 2,000 m. Its course is sinuous, and its current, as its name denotes, sluggish. The plains through which it flows are in the higher part of its course well wooded with spruce and yellow pine, and studded with numerous villages; but towards the N, below Yakutsk, their aspect becomes wild and dreary in the extreme. It becomes a very rapid stream in spring, on the breaking up of the ice and melting of the snow; but in the beginning of autumn is so shallow that vessels are obliged to unload their cargoes into flat-bottomed boats, to get them conveyed to Katchuk.

LENAWEE, a county in the SE part of the state of Michigan, U. S., comprising an area of 735 sq. m., watered by Raisin and Ottawa rivers. It has an undulating surface, and a fertile soil consisting of sandy and argillaceous loam. Pop. in 1840, 17,889; in 1850, 26,374. Its cap. is Adrian.

LENCES, a town of Spain, in Old Castile, in the prov. and 18 m. NNE of Burgos, partido and 8 m. NW of Briviesca, on the l. bank of the Ommo. Pop. 367. The streets are regularly laid out, and the houses generally well-built.

LENCH (Rouse), a parish in Worcestershire, 5½ m. SW by W of Alcester. Area 1,380 acres. Pop. in 1831, 251; in 1841, 280.

LENCH (Sheriff's), a hamlet in the p. of Church Lench, Worcestershire, 4 m. N of Evesham. Pop. 83.

LENCLOITRE, a canton, commune, and town of France, in the dep. of the Vienne, arrond. of Châtellerault. The cant. comprises 9 com. Pop. in 1831, 8,183; in 1841, 8,380.—The town is 11 m. W of Châtellerault, on the l. bank of the Lauvigne.

LENCLOS, a commune of Belgium, in the prov. of Luxembourg, dep. of Etalle. Pop. 289.

LENCOUACQ, a commune of France, in the dep. of the Landes, cant. and 7 m. NW of Roquefort. Pop. 1,237.

LENDELEDE, a department and commune of Belgium, in the prov. of West Flanders, arrond. of Courtrai. Pop. of dep. 4,142.

LENDERSDORF, a village of Prussia, in the prov. of the Rhine, regency and 19 m. E of Aachen, bail. and 3 m. SSW of Duren, on the l. bank of the Roër. Pop. 504. It has an iron-foundery and slitting-mill.

LENDERSHAGEN, a village of Prussia, in the reg. of Stralsund, circle of Franzburg. Pop. 162.

LENDINAR, a town of Austrian Lombardy, in a district of the same name, in the gov. of Venice, del. and 11 m. W of Rovigo, on the Adigetto. Pop. 5,142.—The district comprises 8 com. Wine, grain, and flax are extensively cultivated in the locality.

LENE. See Lane.

LENEY, a parish in co. Westmeath, comprising an area of 4,231 acres, of which 259 are in Lough Owhel. Pop. in 1831, 1,479; in 1841, 1,455.

LENGBACH (Alt), a village of Austria, in the circle of the Wienerwald, on the W declivity of the Wienerwald.

LENGEFELD, a town of Saxony, in the circle of the Erzgebirge, bail. of Wolkenstein and Annaberg, 14 m. SE of Chemnitz, and 36 m. SW of Dresden. Pop. 3,995. It has manufactories of woollen and cotton fabrics, fustian, &c., and has several spinning-mills.—Also a village of Prussia, on the Lahne, in the reg. of Erfurt, W of Muhlhausen. Pop. 652.—Also a village of Prussia, in the reg. of Merseburg, circle of Naumburg, on the l. bank of the Saal. Pop. 186.—Also another v. in the reg. of Merseburg, circle of Sangerhausen. Pop. 419.

LENGENAU, a village of Switzerland, in the cant. of Aargau, pleasantly situated on the Hugel. Pop. 1,781, of whom 562 are Jews.

LENGENFELD, a town of Saxony, in the circle of Voigtland, bail. and 12 m. NE of Plauen, and 30 m. SW of Chemnitz. Pop. 2,425. It has manufactories of various woollen and linen fabrics, spinning-mills, and bleacheries, and several breweries.—Also a village of Austria, in the circle of Mannhartsberg, N of Krems.—Also a village of Prussia, in the reg. of Erfurt, circle of Heiligenstadt. Pop. 1,290.

LENGERICH, a village of Hanover, in the gov. and 30 m. NW of Osnabruck, 9 m. ENE of Lingen. Pop. 910.

LENGERICH, or MARGARETHEN-LENGERICH, a town of Prussia, in the prov. of Westphalia, reg. and 19 m. NNE of Munster, circle and 2 m. from Tecklenburg, at the foot of a mountain. Pop. 1,315. It has manufactories of woollen, silk, and linen fabrics, and of tobacco. Conferences preliminary to the peace of Westphalia were held here in 1648.

LENGERUD, a river of Persia, in Ghilan, which has its source in the mountains of Elburz; makes a circuit to the NE; and falls into the Caspian, 20 m. SE of the embouchure of the Sufid-Rud, and after a course of about 60 m. The chief places on its banks are Lahajan and Lengerud. Between the latter place and the sea its banks are marshy, and rise but little above sea-level. Its waters abound with fish.—The town of L. is 9 m. NE of Lahajan, and 27 m. ESE of Recht. Pop. 3,000. It has a good caravanserai, and possesses an extensive trade, chiefly in silk.

LENGNAU, a village of Switzerland, in the cant. and 18 m. N of Bern, bail. and 4 m. N of Buren, at the foot of the Jura mountains. The French were here defeated by the Bernese on the 2d March 1798. In the environs are mines of iron, a species of earth named *huppererde*, and a mineral spring.

LENGRIES, a village of Bavaria, in the circle of Upper Bavaria, presidial and 8 m. S of Tolz, and 36 m. S of Munich. Pop. 375. It has an hospital and an alms-house. In the vicinity is a quarry of marble.

LENGRONNE, a village of France, in the dep. of the Manche, cant. and 5 m. NW of Gavray, and 8 m. S of Coutances. Pop. 1,052.

LENGSFELD, a town of the duchy of Saxe-Weimar, in the principality and circle and 17 m. SSW of Eisenach, on the r. bank of the Felda. Pop. 2,239. It is enclosed by walls, and has 2 castles and a synagogue.

LENGSFELD (SCHENK), a market-town of the grand-duchy of Hesse-Darmstadt, in the prov. of Starkenburg, district 8 m. SSE of Dieburg, and 14 m. ESE of Darmstadt. Pop. 1,160.

LENGUAS, a fierce tribe of Indians, who inhabit the E part of the Gran Chaco in La Plata. When any of their number dies, they all change their names, in order, they say, that they may not be remembered by the deceased.

LENHAM, a parish in Kent, 9½ m. E by S of Maidstone, and 5 m. S of the South-eastern railway. Area 6,890 acres. Pop. in 1841, 2,214.

LENIDI, or LENITI, a village and port of Greece, on a bay of the same name, and at the mouth of a small river, 3 m. NNW of Erikes, and 21 m. ENE of Mistra.

LENHEIRO, a mountain of Brazil, in the prov. of Minas-Geraes, near the town of São-João-del-Rei.

LENING, a village of France, in the dep. of the Meurthe, cant. and 3 m. NW of Albestrof, and 18 m. NE of Chateau-Salins. Pop. 492. It has a fulling-mill.

LENINO, a town of Russia in Europe, in the gov. of Minsk, district and 80 m. WNW of Mozyr, and 56 m. S of Sluck, on the r. bank of the Sluck.

LENIVKA, a town of Russia in Europe, in the gov. and 41 m. SSW of Kharkov, district and 26 m. SW of Zmiev.

LENK (AN DER), a village of Switzerland, in the cant. and 36 m. S of Bern, and bail. of the Upper Simmenthal, on the Simme, at the foot of rocky mountains which are covered with perpetual snow. Pop. of p. 2,246.

LENKERAN. See LANKERAN.

LENKERSHEIM, a town of Bavaria, in the circle of Middle Franconia, presidial and 3 m. E of Windsheim, and 16 m. N of Anspach, on the r. bank of the Aisch. Pop. 800. It has 2 Lutheran churches.

LENNA, a village of Austria, in Lombardy, in the prov. and 18 m. N of Bergamo, district and about a mile S of La Piazza, on the r. bank of the Brembo.

LENNARD, a mountain of Western Australia, in the co. of Wellington, in the Roe range.

LENNE, a river of Prussian Westphalia, which rises near Astenberg, in the circle of Brilon; runs successively W, SW, and NW; and joins the Ruhr between Westhofen and Herdeke, after a course of 60 m.

LENNEP, a town of Rhenish Prussia, in the reg. and 21 m. E of Dusseldorf, near a small stream of the same name. Pop. in 1837, 6,025. It is a town of some manufacturing importance, having several woollen and cotton-weaving establishments, and iron and steel-works. It has also a trade in Rhine and Moselle wines.

LENNICK-SAINT-MARTIN, a town of Belgium, in the prov. of S. Brabant, 8 m. WSW of Brussels. Pop. 1,293.

LENNICK-SAINT-QUENTIN, a town of Belgium, in the prov. of S. Brabant, 1 m. S of Lennick-Saint-Martin, near a branch of the Senne. Pop. 2,147.

LENNINGEN (OBER), a town of Würtemberg, in the bail. of Kirchheim. Pop. 930. Cherries and other fruits are largely cultivated in the vicinity.

LENNOCK, a small stream in the p. of Birnie, Morayshire, tributary to the Lossie.

LENNON, a village of France, in the dep. of Finistere, cant. of Pleyben, 9 m. E of Chateaulin. Pop. 1,229.

LENNOX, a name given in early Scottish history to the ancient co. of Dumbarton, comprehending the whole of the modern co. and a large part of Stirlingshire, and part of the cos. of Perth and Renfrew. The original name was *Leven-ach, i. e.* 'the field of the Leven;' and very appropriately designated the basin, not only of the river Leven, but also of Loch-Lomond, anciently called Loch-Leven. Levenachs, in the plural number, came to be the name of all the extensive and contiguous possessions of the powerful earls of the soil; and, being spelt and written Levenax, was easily and naturally corrupted into Lennox. In the 13th cent., Lennox and the sheriffdom of Dumbarton appear to have been co-extensive; but afterwards, in consequence of great alterations and considerable curtailments upon the sheriffdom, they ceased to be identical.

LENNOX, a parish of Van Diemen's Land, in Somerset co., bounded by the Macquarie river on the N, and the Isis on the W.

LENNOX-HILLS, a range of heights stretching ENE from Dumbarton to Stirling, along the middle of the ancient district of Lennox. The range is interrupted by the valley of the Blane, and, from Dumbarton thither, is called the Kilpatrick hills. The name Lennox-hills is more strictly applied to the heights between the valley of the Blane and Stirling, which in their various parts are called the Killearn, the Campsie, the Kilsyth, the Dundaff, the Fintry, and the Gargunnock hills. The range, after being interrupted by the valley of the Forth, passes on, under the name of the Ochil-hills, till it reaches the vicinity of the Tay. Throughout the whole of the strictly Lennox-hills are colonnades and precipices of basalt. The hills are composed chiefly of trap and whinstone. The soil is chiefly arenaceous, mingled with till. The summits rise in Campsie to the height of 1,500 ft.; and in Kilsyth to the height of 1,300 ft.; but in many places they ascend no higher than to be inconsiderable hills. See CAMPSIE-FELLS.

LENNOXTOWN, a considerable village in the p. of Campsie, Stirlingshire, 9 m. N of Glasgow, and 6½ m. W of Kilsyth. Pop. 2,821. A calico-printing establishment in the v. employs upwards of 800 persons. Two other similar establishments, two bleachfields, and several collieries and lime-works, are in the vicinity. There is an extensive alum-work at the E end of the v. The Campsie branch of the Edinburgh and Glasgow railway terminates here at a point 11½ m. distant by rail from Glasgow.

LENO, a town of Austrian Lombardy, in the prov. and 12 m. S of Brescia. Pop. 3,410. It has linen and silk manufactories.

LENOIR, a county in the SE part of the state of North Carolina, U. S., comprising an area of 390 sq. m., watered by Neuse river and its branches. Pop. in 1840, 7,605; in 1850, 7,828. Its cap. is Kingston.—Also a village of Caldwell co., in the same state, on the S side, and near the source of Yadkin river.

LENOLA, a town of Naples, in the prov. of the Terra-di-Lavoro, district and 14 m. NW of Gaeta, cant. and 5 m. N of Fondi, on a hill. Pop. 2,080. It contains 2 churches and an hospital. This town is supposed to occupy the site of the ancient *Inola Campana.*

LENOX, a township of Madison co., in the state of New York, U. S., 121 m. WNW of Albany. It has an undulating surface, is drained by Cowasalon and Oneida creeks, and possesses a generally productive soil. Pop. in 1840, 5,440. The village called Lenox-basin is on the Erie canal, and consists of about 20 dwellings.—Also a township of Berkshire co., in the state of Massachusetts, 132 m. W of Boston. It has a hilly surface, and is watered by Housatonic river. Pop. 1,313. The village consists of about 40 dwellings.—Also a township of Susquehanna co., in the state of Pennsylvania, 170 m. NNW of Harrisburg, generally hilly, watered by Tunkhannock creek and its branches. The soil consists of clay and gravel. Pop. 800.—Also a township of Ashtabula co., in the state of Ohio, 15 m. S of Ashtabula. Pop. 550.—Also a fertile township of Macomb co., in the state of Michigan. Pop. 284.

LENS, a canton, commune, and town of France, in the dep. of the Pas-de-Calais, arrond. of Bethune. The cant. comprises 22 com. Pop. in 1831, 17,360; in 1841, 17,410.—The town is 12 m. SE of Bethune, on the Souchet. Pop. in 1841, 2,673. It has an hospital, and possesses manufactories of lace, leather, soap, oil, and sugar from beet-root; extensive distilleries of gin and brandy, and breweries; several spinning-mills and bleacheries; and several brick and lime-kilns. In the environs are mines of coal and clay. L. was formerly fortified, and was several times taken during the wars of Flanders. Marshal Gassion was killed under its walls in 1647, and the following year it was the scene of a signal victory over the Spaniards by the Prince of Condé.

LENS, a department, commune, and town of Belgium, in the prov. of Hainault, arrond. of Mons. Pop. of dep. 2,174. The town is 8 m. NNW of Mons, on one of the branches of the Dendre. Pop. 1,800. It contains a fine castle, and its trade is extremely active. It possesses several breweries and salt-refineries, and in the environs are extensive limestone pits.—Also a parish and village of Switzerland, in the cant. of Valais, NW of Siders. Pop. 1,622.

LENSAHN, a village of Denmark, in Holstein, 7 m. N of Neustadt.

LENS-LESTANG, a commune of France, in the dep. of the Drôme, cant. and 4 m. WNW of Le-Grand-Serre, and 28 m. NNE of Valence. Pop. 1,532.

LENS-SAINT-REMY, a department and commune of Belgium, in the prov. of Liege, arrond. of Huy. Pop. of dep. 1,411; of com. 728.

LENS-SAINT-SERVAIS, a department and com. of Belgium, in the prov. of Liege, arrond. of Huy. Pop. 273.

LENS-SUR-GEER, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. of dep. 287; of com. 227.

LENT, a village of Holland, in the prov. of Gelderland, about 1½ m. N of Nimeguen.

LENTA, a river of Naples, in the prov. of Abruzzo-Citra, which flows into the Adriatic NE of Chieta.

LENTELLA, a town of Naples, in the prov. of Abruzzo-Citra, district and 8 m. SSW of Il Vasto. Pop. 530.

LENT-EN-DOMBES, a commune and town of France, in the dep. of the Ain, cant. and 7 m. S of Bourg-en-Bresse, on the l. bank of the Veyle. Pop. 1,068. It contains the ruins of a castle, and was formerly enclosed by a wall. It has an extensive trade in horses.

LENTHAL (Earls), a chapelry in the p. of Aymestrey, Herefordshire, 6 m. SW of Ludlow, at the source of a branch of the Teme.

LENTHAL (Starkes), a parish of Herefordshire, 6 m. SW by W of Ludlow. Area 970 acres. Pop. in 1831, 127; in 1841, 147.

LENTI, Lenthi, or Nemphti, a town of Hungary, in the comitat of Salad, 17 m. S of Lövö, and 78 m. S of Oedenburg, on the r. bank of the Kerka.

LENTILHAC-DU-CAUSSE, a village of France, in the dep. of the Lot, cant. of Lauzes, 14 m. NE of Cahors. Pop. 500.

LENTILLY, a commune of France, in the dep. of the Rhone, cant. and 2 m. SE of Arbresle, and 10 m. WNW of Lyon. Pop. 1,180.

LENTINI, or Leontini, a town of Sicily, in the prov. and district and 24 m. NW of Syracuse, and 15 m. WNW of Agosta, near the r. bank of a river of the same name. Pop. 5,100. This town has declined rapidly since the earthquake in 1693. It was the *Leontium* of the Romans. The environs are fertile but insalubrious. The river L. is formed by the confluence of several streams, and, after a course of about 30 m., falls into the Ionian sea, below Giaretta.

LENTING, a village of Bavaria, in the circle of the Upper Pfalz, presidial and 3 m. of Ingolstadt, and 30 m. WSW of Ratisbon. Pop. 340. It has a saltpetre refinery and a manufactory of potash.

LENTON, a parish and village of Nottinghamshire, 1½ m. W by S of Nottingham, intersected by the Nottingham canal, and by the Nottingham branch of the Midland Counties railway. Area of p. 5,080 acres. Pop. in 1831, 3,077; in 1841, 4,467.

LENZ, or Lentsch, a village of Switzerland, in the cant. of the Grisons, 11 m. S of Coire. Pop. 353, Catholics.

LENZBURG, a bailiwick, circle, and town of Switzerland, in the cant. of Aargau. The bail. comprises 5 circles and 7 parishes, and in 1850 contained 17,562 inhabitants, of whom 17,370 were Protestants. It is fertile, producing corn and fruit in great abundance, and affording excellent pasturage. It possesses large herds of cattle, and has several tile and brick works.—The town is 8 m. E of Aarau, and 18 m. W of Zurich, on the r. bank of the Aar. Pop. 1,957. It is well-built, and has on a height an ancient fortress belonging to the counts of Lenzburg, and a normal school. It possesses manufactories of printed muslins and of carriages, and extensive bleacheries, and has a flourishing trade. At the distance of 3 m. are the ruins of the castle of Braunegg, belonging to the Gessler family, which was destroyed by the Swiss in 1415.

LENZEN, a town of Prussia, in the prov. of Brandenburg, regency and 86 m. NW of Potsdam, and circle of West Priegnitz, on the r. bank of the Lokenitz, between two lakes. Pop. 3,000. It has an hospital, and possesses several distilleries and breweries. It has an active trade in corn and timber. Agriculture and the rearing of cattle form also important branches of local industry.

LENZFRIED, a village of Bavaria, in the circle of Swabia, presidial and 2 m. E of Kempton. Pop. 1,500.

LENZKIRCH (Ober), a market-town of the grand-duchy of Baden, in the circle of the See, bail. and 5 m. S of Neustadt, on the Hasslach. Pop. 650. It has manufactories of clocks, straw-hats, &c., and carries on an active trade in the agricultural productions of the environs.

LENZKIRCH (Unter), a village of the grand-duchy of Baden, on the Hasslach. Pop. 400. It has manufactories of glass and extensive agricultural industry.

LEO (San), a town of the Pontifical states, in the delegation of Urbino-et-Pesaro, 7 m. WSW of San Marino, on a mountain. Pop. 1,200. It is of small extent, but is defended by a fort, and has a large bridewell. In 1824 a large chest was discovered, buried near the fort, containing several gold vases and sceptres, a crown set with diamonds, and many other articles of value, supposed to have belonged to King Berenger, who here defended himself for a considerable period against Otho I.—Also a village of Zante, near the W coast of the island, 2 m. from Cambi, and 1½ m. from Luca. There is a good deal of arable land and some vineyard round it.

LEOBEN, a town of Styria, 29 m. NNW of Gratz, circle and 10 m. WSW of Bruck, on the r. bank of the Mur, at an alt. of 1,670 ft. above sea-level. It possesses extensive barracks, and has several salt-magazines and forges, and carries on an active trade in iron and stone-coal. The treaty of peace between France and Austria was signed here in 1797. In the vicinity are mines of iron.

LEOBERSDORF, or Loibersdorf, a market-town of the archduchy of Austria, in the lower circle of the Wienerwald, 21 m. SSW of Vienna, on the Triesting. Pop. 1,270. It has several manufactories of silk fabrics, and cotton-spinning mills.

LEOBSCHUTZ, or Hlubzien, a circle and town of Prussia, in Silesia, in the reg. and 33 m. S of Oppeln, on the Zinna. Pop. in 1837, 5,640. It contains 3 churches, a castle belonging to the prince of Lichtenstein, a Catholic gymnasium, and a gymnasium; and possesses manufactories of linen, cloth, ribbon, hosiery, and leather, and has an active trade in flax and thread. This town suffered much during the Thirty years' war. Pop. of circle 51,063.

LEOCHEL AND CUSHNIE, a united parish in Aberdeenshire, about 6 m. in length from E to W, and varying from 3 to 6 m. in breadth. Pop. in 1831, 1,077; in 1841, 1,084. A river of the same name has its source in this p., and runs N to the Don, which it joins near Alfordkirk.

LEOGANE, a village on the W coast of the island of Hayti, in the dep. of the West, 24 m. W by S of Port-au-Prince, in N lat. 18° 31′, W long. 72° 39′. It is situated in a beautiful and extensive valley, and on a river of the same name, which, about half-a-league below, throws itself into the gulf of L. It was formerly well-fortified, and populous. The gulf is formed by two peninsulas, and opens between Cape St. Nicolas, at the W end of the N peninsula, and Cape Dame Marie, the NW point of the S peninsula, 45 leagues apart. At the bottom of the bay is the island of Gonave, and on the N side of the S peninsula are the islets of Ressif and Caymite. It embosoms a vast number of bays.

LEOGANG, a town of the archduchy of Austria, in the circle and 32 m. SSW of Salzburg, and 8 m. N of Zell, on the r. bank of the Urselauer. It has several copper-works, and in the environs are mines of that metal, and of lead, antimony, cobalt, and zinc.

LEOGEATS, a village of France, in the dep. of the Gironde, cant. and 7 m. SW of Langon. Pop. 1,032.

LEOGNAN, a commune of France, in the dep. of the Gironde, cant. of Labrede, 8 m. S of Bordeaux. Pop. 1,755. It affords good wine.

LEOGNANO, a town of Naples, in the prov. of Abruzzo-Ultra, district and 7 m. S of Teramo, cant. and 5 m. NE of Tossicca. Pop. 750.

LEOGUADDA, or Leobadda, a town of Yariba, in Western Africa, between Atopa and Eetchó or Show, 35 m. W by N of Rakka. It is surrounded by a double wall, and the houses are pleasingly intermingled with tall green trees. Large tracts of land are under corn, yams, and other cultivation, in the vicinity of the town.

LEOMIL, a town of Portugal, in the prov. of Beira, comarca and 16 m. SE of Lamego, and 23 m. SSE of Villa-Real, on the l. bank of the Tivora. Pop. 1,150.

LEOMINSTER, a parish and borough in the co. of Hereford, 137 m. WNW of London, and 12 m. NNW of Hereford, in a fertile valley on the river Lugg, at its junction with several tributaries, and intersected by the Leominster canal. The p. contains the townships of Ivington and Broadward, besides the town of L. Area 9,290 acres. Pop. in 1801, 3,563; in 1831, 5,249; in 1841, 4,916.—The town consists of one long principal street, running nearly N and S, with four or five others intersecting it at right angles. A few of the ancient houses are built of timber, ornamented with grotesque carvings, and plastered and painted white and black; but most of the buildings are modern brick erections. The church is an ancient edifice. There is a public reading-room, and a theatre. The town-hall, or butter-cross, is a curious structure, erected in 1633, of wood and brick, and is supported by pillars of oak curiously carved. The income of the borough in 1839 amounted to £870; in 1846 to £529. L. returns 2 members to parliament. The parliamentary boundary now coincides with that of the p., and the new municipal borough. The number of electors registered in 1837 was 664; in 1848, 553. It is one of the polling-places for the co. members.—L. had at one time a rather extensive manufactory of hats and woollen cloths, but these have almost entirely disappeared. A few coarse linseys, check horse-collaring, &c., are still made; but the leather glove trade is now one of the chief manufactures, giving employment to a number of females. Tanning, dyeing, malting, nail and rope-making, and flax-dressing, are carried on to some extent; but the principal business carried on in the town, is a retail trade in the town itself, and with the adjacent country, the town owing its importance principally to its being the market for the produce, consisting chiefly of wool, wheat, cider, and hops,—of a district extending about 7 m. round. The horse, cattle, and sheep fairs are important. Races are annually held in the vicinity of the town.—Also a parish in Sussex, 10 m. E of Chichester, near the junction of the Arundel and Portsmouth canal. Area 3,230 acres. Pop. in 1831, 715; in 1841, 785.

LEOMINSTER, a township in Worcester co., Massachusetts, U. S., 44 m. WNW of Boston, intersected by a branch of Nashua river. Pop. 2,069.

LEON, one of the great divisions of Spain, still distinguished by the title of a kingdom. It lies between the parallels of 40° 10′ and 43° N, and the meridians of 4° and 7° W; and is bounded by Asturias on the N; Old Castile on the E; Estremadura on the S; and Galicia on the W. It has the form of an irregular oblong 200 m. in length from N to S, and 148 m. in breadth from E to W. Its territorial extent is 20,050 sq. m., and its pop. in 1849 was 1,128,833. It is divided into the 5 provs. of Leon, Zamora, Salamanca, Palencia, and Valladolid. The two latter provs., with an area of nearly 500 sq. m., are now administratively annexed to Old Castile. Its chief towns are Leon, Salamanca, Ciudad-Rodrigo, and Astorga. This extensive prov. is divided by the

Douro into two nearly equal parts; and it is watered besides by the Sil, the Eresma, the Tormes, the Elsa, the Pisuerga, the Agueda, and several other rivers, which traverse it in various directions. In the N and in the S it is mountainous: the Asturian chain entering it in the former division; and the great central chain of the peninsula skirting its S frontier. It contains many fertile tracts with fine pasturage. Maize, olives, wheat, and flax, are partially cultivated; but agriculture might be greatly aided here by the more general introduction of irrigation. Madder is cultivated to some extent. The mountains are covered with trees of different kinds principally oak; but the plains and valleys are destitute of wood, and it is only in the most fertile parts that even fruit-trees are to be found. The wine made on the side of Galicia is bad, and incapable of transportation; but of that on the SE side of the prov. the quality is excellent. L. has no manufactures worth notice, though mines of iron and copper are found in the mountains. Mules are bred in considerable number; herds of cattle and flocks of sheep are numerous; and the great mass of the pop. consists of "hardy, ill-educated agriculturists, creatures of routine, and foes to innovation." This part of Spain was included in the *Tarraconensis* of the Romans. The foundation of the kingdom of L. was laid in the 8th cent., by the celebrated Pelagius, who also founded the kingdom of Oviedo; but Ordonno II. was the first who assumed the title of king of L. In 1037 this kingdom was united to that of Castile by Ferdinand the Great, and it is now governed by the same laws.

LEON, a province of Spain, comprising the N part of the ancient kingdom of Leon, and bounded on the N by Oviedo; on the E by Palencia; on the S by Valladolid and Zamora; and on the W by Orense and Lugo. It lies between the parallels of 41° 50′ and 43° 5′ N. Its superficial extent is 277·38 German sq. m., and its pop. in 1834 was 267,438; in 1849, 288,833. The soil is stony, and the surface covered with mountains of the great Cantabrian chain, between which, however, there are several extensive valleys and plains. A branch of the Cantabrians, which separates the basin of the Duero from that of the Minho, divides the prov. into two physical regions, one comprising the E, the other the W part of the prov. The principal river is the Esla or Ezla, which rises in the mountains of Valdeburon, and flows to the Duero. The Torio, Borsnega, Coa, and Orbigo, also belong to this section of the prov. The W section is watered by the Sil, the Bocza, the Qua, and the Cabrera. The climate in winter is moist and cold; in summer, mild and pleasant. The chief vegetable products are wheat, barley, pulse, fruit, flax, and in favourable situations vines; but the great source of employment is the rearing of cattle. The chief manufactures are linen and hardware. The prov. is subdivided into the partidos of Astorga, Baneza, Becilla, Leon, Murias-de-Paredes, Ponferrada, Riano, Sahagun, Valencia-de-don-Juan, and Villafranca-del-Vierzo. These are subdivided into 1,351 pueblos. Its military administration is presided over by the captain-general of Old Castile; its ecclesiastical by the abbot of San-Marcos-de-Leon. Its legal tribunals are under the supreme court of Valladolid.

Leon, anciently called *Legio* from having been the station of the 7th Roman legion, a city of Spain, the cap. of the foregoing kingdom and province, and one of the oldest episcopal sees in Spain, is situated in N lat. 42° 45′, W long. 5° 17′, at the confluence of the Torio and Vorsnega or Bornesga, whose united streams run into the Esla below the town. It is a heterogeneous mixture of dirty streets filled with beggars, splendid churches, and half-ruined family-mansions. A great part of the walls are built of green marble, but they too are in a decayed state, and much built up against. It has 13 churches, and a number of convents. In 1844 it had 1,198 houses, and 5,720 inhabitants. The Plaza Mayor, opposite to the town-house, contains several good and uniform buildings. The cathedral has a claim to be considered one of the finest monuments of pointed Gothic architecture in Spain. It encloses the tomb of one emperor, 37 kings, and the shrines of several saints. The other buildings entitled to attention are the houses of the families of Luna and Guzman, the town-house, and the convents of Santo-Domingo and of San-Marcos-de-Leon. The latter convent is an enormous edifice with a splendid facade; but is yet unfinished. The ancient palace of the kings of L. is now in a decayed state, and has been converted into a manufactory. The town has several small manufactories of woollens, linen, stockings, and leather gloves; but the inhabitants subsist chiefly on the expenditure of the clergy. The environs are pleasant, and contain many fine avenues of ash, poplars, elms, and willows; they are productive also in fruit, corn, and above all in flax.—L. was founded in the reign of the emperor Galba. It was taken by Leovigeldo in 586, but was the first town of consequence recovered from the Moors; after which it continued for three centuries the residence of the Catholic kings of Spain until Don Pedro removed the court to Seville. The town was sacked by Soult in Dec. 1808.

LEON, a city of Central America, the capital of the state of Nicaragua, situated in N lat. 12° 26′, W long. 86° 52′. It was an opulent town, and a principal mart of commerce, at the period of the declaration of independence; but during the last 25 years it has suffered greatly from internal broils, as well as the constant ebb and flow of the fortunes of the state; and the wealthier portion of its citizens emigrated many years since S. It occupies a comparatively extensive area, but has no very imposing public structures, and its best houses suffered most in the many struggles it has been the theatre of. Its present pop. does not exceed 20,000. It exports Nicaragua wood, mahogany, spars, all-spice, sarsaparilla from Costa-Rica, gums, wax, tortoise-shells, and indigo.

LEON, a town of Mexico, in the state and 30 m. WNW of Guanaxuato, situated in a plain eminently fertile in wheat, barley, and maize. It is also the name of several inconsiderable settlements in S. America.—Also a river of Peru, in the prov. of Tucuman, which runs E and enters the Rio-Grande.—Also a river of Peru, in the dep. of Arica, which enters the Pacific ocean.—Also a river of Central America, which falls into the bay of Mexico, 75 m. W of Truxillo.—Also a river of Quito, which runs S at a little distance S of the city, and enters the Jiron.

LEON, a county in the N part of the territory of Florida, U. S., comprising an area of 1,824 sq. m., bordered on the S by Appalachee bay, and on the W by Ocklokony river, and intersected in the E by Wakully river. Pop. in 1840, 10,713; in 1850, 11,513. It is marshy near the coast, but in other parts fertile and abounding with pine.—Also a township of Catteraugus co., in the state of New York, 311 m. W by S of Albany. The surface is elevated, but generally level, and is drained by Conewango creek and its tributaries. The soil, consisting of clay and sandy loam, is very fertile. Pop. 1,326.—Also a village of Madison co., in the state of Virginia, 165 m. NW of Richmond, on Crooked Run.

LEON, a town of France, dep. of Landes, cant. and 8 m. W of Castels. Pop. 1,050.

LEON. See Isla-de-Leon.

LEON (Nuevo), a department of Mexico, bounded on the N, W, and NW by Cohahuila; on the NE and E by Tamaulipas; on the S by Zacatecas and San-Luis-Potosi. It has an area of 21,000 sq. m. Pop. in 1842, 101,108. It lies to the E of the great table land, but is a mountainous country, and thinly inhabited. The chief town is Monterey, the see of a bishop. The other towns are Saltillo and San-Felipe-de-Linares.

LEON (Saint), a village of France, in the dep. of the Allier, cant. and 5 m. NE of Jalligny.—Also a commune in the dep. of the Haute-Garonne, cant. and 5 m. NW of Nailloux, and 3 m. ESE of Villefranche. Pop. 1,226.

LEON-SUR-L'ISLE, a village of France, in the dep. of Dordogne, cant. and 3 m. NNW of Grignols, on the l. bank of the Isle. Pop. 1,020.

LEON-SUR-VEZE'RE, a village of France, in the dep. of the Dordogne, cant. and 4 m. SW of Montignac, on the r. bank of the Vezère. Pop. 860.

LEONARD (Saint), a commune of France, in the dep. of the Loir-et-Cher, cant. and 2 m. NW of Marchenoir, and 19 m. N of Blois. Pop. 1,204.—Also a commune in the dep. of the Seine-Inferieure, cant. and 2 m. ESE of Fecamp, and 18 m. NW of Havre. Pop. 1,176.—Also a canton, commune, and town in the dep. of the Haute-Vienne, arrond. of Limoges. The cant. comprises 10 com. Pop. in 1831, 12,303; in 1841, 13,072.—The town is 12 m. E of Limoges, in an elevated situation near the r. bank of the Vienne, which is here crossed by a handsome bridge. Pop. in 1841, 5,680. It has fine boulevards, and is generally well-built. The architecture of the church is that of the 10th cent. The town is noted for its manufacture of paper and of copper utensils. It has also extensive manufactories of different kinds of woollen fabrics, leather, ribbon, porcelain, and numerous spinning-mills. The origin of L. is generally ascribed to the era of Clovis. It was originally named Noblac or Saint-Leonard-le-Noblet.

LEONARD (Saint), a chapelry in the p. of Ashton-Clinton, co. of Buckingham, 3 m. E by S of Wendover. Area 970 acres. Pop. in 1831, 147; in 1841, 178.—Also a parish in Devonshire, adjoining Exeter, and included within the municipal and parl. boundaries of that borough. Area 80 acres. Pop. in 1831, 467; in 1841, 1,129.—Also a parish partly in the cinque port and borough of Hastings, Sussex, 1½ m. WSW of Hastings. The town of St. Leonards, which was commenced about 18 years ago, near to the E boundary of the p., extends towards the W upwards of a ½ m. along the sea-shore, and has become a favourite watering-place. Pop. in 1841, 768.

LEONARDA (San), a town of Spain, in Old Castile, in the prov. and 33 m. WNW of Soria, and partido of Burgo-de-Osma, on the slope of a mountain of the same name, near the Rio-Lobos. Pop. 710. It has an old castle.

LEONARDA (San), a village and fortress of Naples, in the prov. of Capitanate, district and 17 m. NE of Foggia, cant. and 8 m. WSW of Manfredonia.—Also a village and port of Sicily, in the prov. and district of Trapani, on the N coast of the island of Favignana. The harbour affords good anchorage, and is defended by the forts of San-Giacomo and San-Leonardo.

LEONARD-DES-BOIS (Saint), a commune of France, in the dep. of the Sarthe, cant. of Frisnay-sur-Sarthe, 23 m. W of Mamers. Pop. 1,533. It has a manufactory of cutlery.

LEONARDSTOWN, the capital of St. Mary's co., Maryland, U. S., situated on Britton's brook, 5 m. from its mouth in the Potomac, and 52 m S of Baltimore.

LEONARDSVILLE, a village of Brookfield township, Madison co., in the state of New York, U. S., 86 m. W by N of Albany or Unadilla river. Pop. 250.

LEONBERG, a town of Wurtemberg, 8 m. WNW of Stuttgard. Pop. 2,200.

LEONDARI, the ancient *Megalopolis*, a town of Greece, in the nom. of Gortynia, 18 m. SW of Tripolitza.

LEONE, one of the Navigator's islands, in S lat. 14° 6′. It is about 5 m. in circumf., separated by a narrow channel from Fanfoue on the E.

LEONE (Monte). See Monteleone.

LEONESSA, a small town of Naples, in the prov. of Abruzzo-Ultra, 19 m. NW of Aquila, on the l. bank of the Corno. Pop. 7,000.

LEONFELDEN, a town of the archd. of Austria, in the Mühl circle, 9 m. WNW of Freystadt.

LEONFORTE, a considerable town in the interior of Sicily, on the declivity of a mountain, 7 m. W of San-Filippo-d'Argiro. It carries on a trade in grain, wine, silk, and sulphur, and has an annual fair. Pop. 10,678.

LEONHARD (Sankt), a town of Styria, 8 m. E of Marburg, containing 200 houses.—Also a small town of Austrian Illyria, in Carinthia, 18 m. SE of Judenbourg, near the river Levant, with several iron works. Pop. 800.—There are five other places of the same name in Carinthia.—Also two small towns of Austria Proper, one in Upper Austria, 30 m. S of Steyer; the other in Lower Austria, 18 m. W by S of St. Polten.

LEONI, a town of Naples, in the prov. of Principato-Ultra, district and 3 m. S of San-Angelo-de-Lombardi. Pop. 4,100.

LEONI, a township of Jackson co., in the state of Michigan, U. S., 71 m. W of Detroit. Pop. 1,067.

LEONIDAS, a township of St. Joseph co., in the state of Michigan, U. S. Pop. in 1840, 410.

LE'ONIE (Sainte), a village of Algeria, in the prov. of Oran, 4 m. S of Arzeu, on the road from that town to Oran. It was founded in 1846 by a colony of 50 Prussian families.

LEONPOL, a town of Russia, in the gov. and 120 m. N of Minsk, on the l. bank of the S. Dwina.

LEONS-LES-REUCOUS (Saint), a village of France, in the dep. of Aveyron, cant. and 4 m. SSE of Vesins. Pop. 1,400.

LEONTITOS, a village of Greece, 33 m. SSW of Trikala, on the r. bank of an affluent of the Aspropotamos.

LEONTICA, a commune of Switzerland, in the cant. of Tessin, district of Blenio. Pop. 473, Cath.

LEONTINI. See Lentini.

LEONVILLE, a village of France, in the dep. of Loiret, cant. of Outarville. Pop. 150.

LEOPESI, a village of Greece, in the nom. of Attica, on the E skirts of Mount Hymettus.

LEOPOLD (Port), an anchorage at the entrance of Prince Regent's inlet and Barrow's straits, in N lat. 73° 50′, W long. 90° 12′. The expedition in search of Franklin, under Captain Sir James Ross, was shut up here from the 11th of September 1848 to the 28th of August 1849. Sir James's party travelled 200 m. to the westward, along the W and NW coast of North Somerset, while other three parties examined the N shore of Barrow's strait, and the E and W shores of Prince Regent's inlet, but without discovering any traces of the missing expedition.

LEOPOLD'S ISLANDS, two islands in the Arctic sea, discovered by Parry in 1809. Captain Ross ascertained that South L., in N lat. 73° 56′, W long. 90°, is connected with the mainland, and forms the NE point of America.

LEOPOLDOVA, a village of Hungary, on the Banat, between the Karos and the Temes, near the l. bank of the Danube, and 20 m. N of Belgrade. Pop. 1,700.

LEOPOLDSAU, a small town of Lower Austria, 6 m. N by E of Vienna.

LEOPOLDSBERG. See Vienna.

LEOPOLD-SHLAG, a small town of Upper Austria, near the frontiers of Bohemia, 28 m. NNE of Lintz.

LEOPOLDSTADT, or Leopoldvara, a town of Hungary, situated between the Danube, the Waag, and the Dyrna, opposite Freistadl, 56 m. E of Vienna. Pop. 1,660. It is well-fortified, and contains a large military hospital.

LEOVILLE, a village of France, in the dep. of Charente-Inferieure, cant. and 6 m. SE of Jonsac. Pop. 700.

LEOVO, a town of Bessarabia, in the district of Bender, near the l. bank of the Pruth, 45 m. SSW of Kichenau. Its exports by the Danube in 1839 were valued at 96,615 rubles; its imports at 81,955 rubles.

LEPANTO', or Naupactus, a small town of Grecce, situated at the foot of Mount Rizina, on the gulf of the same name, at its entrance from the gulf of Patras, in the nom. of Etolia, about 3 m. ENE from the castle of Romelia. It is built in a triangular form, surrounded by high walls and other fortifications, and has a small heptagonal fort, but is commanded from several adjacent points. The harbour is blocked up with sand, and only admits small vessels. This town was the *Naupactos* of the Greeks.

LEPANTO (Gulf of), a gulf of the Ionian sea, on the W coast of Grecce, separating the S coast of Romania from the Morea, and extending from the gulf of Patras on the W to the isthmus of Corinth on the E. Its entrance is narrow, and is defended by two castles erected by the Turks in the 15th cent., one on each side of the strait. It is 78 m. long from W to E, and 20 m. wide at its greatest breadth. It forms the bay of Salona or Asprospetia on the N, and that of Corinth on the SE. It was the *Corinthiacus sinus* of the ancients. On the 7th of August 1570, Don John of Austria defeated the Turkish fleet near the mouth of this gulf with immense slaughter.

LEPE, a small town of Spain, in the prov. of Seville, on the river Saltes, near the sea, 10 m. E of Ayamonte. It has a small and good port. Pop. 2,800.

LEPEL (Novoi), a town of Russia, in the gov. and 55 m. WSW of Vitebsk. Pop. 1,000.

LEPEL (Staroi), a town of Russia, in the gov. and 56 m. WSW of Vitebsk.

LEPENITZA, a town of Bosnia, rising on Mont Ivan, 15 m. SW of Bosna-serai, and flowing N to the Bosna, which it joins at Visoka, after a course of 30 m.—Also a river of Servia, rising in Mount Rudnik, passing Kragojevatz, and flowing into the Morava on the l. bank, 15 m. SE of Hassan-Pasha-Palenka, after a NNE course of 48 m.

LEPENITZE, a town of Turkey, 21 m. ESE of Joanina, near the source of the Aspropotamos.

LEPENTZ, a river of Turkey, rising in Mount Tchar, in the sanjak of Uskup, and flowing SE to the Vardar, which it joins 3 m. E of Uskup.

LEPER'S ISLAND, one of the New Hebrides, in the S. Pacific, in S lat. 15° 21′. It was so called by Bougainville, who visited it in 1768, and found the inhabitants in general afflicted with leprosy.

LEPOTI, a small town of Georgia, in the prov. of Kakheti, 22 m. SE of Kakheti.

LEPPERSDORF, a village of Saxony, in Misnia, on the borders of Lusatia, 12 m. NE of Dresden. It is celebrated for its manufacture of fine linens.

LEPSINA. See Eleusis.

LEPTON, a township in the p. of Kirk-Heaton, Yorkshire, 4 m. E by S of Huddersfield. Pop. 3,875.

LEQUEITIO, a small town of Spain, in the prov. of Bilbao, on the bay of Biscay, 28 m. ENE of Bilbao. It is defended by several small forts. Pop. 1,900, chiefly fishermen.

LEQUILE, a town of Naples, in the Terra-d'Otranto, 3 m. SSW of Lecce. Pop. 1,295.

LEQUIO, a town of the Sardinian states, in the prov. and 12 m. N of Mondovi, at the confluence of the Tanaro and Rea. Pop. 1,180.

LERAN, a village of France, in the dep. of Ariege, cant. and 6 m. S of Mirepoix. Pop. 860.

LERANG (Point), a cape on the N coast of the island of Java, in E long. 111° 27′, S lat. 6° 37′.

LERAY, or Lere, a town of France, in the dep. of Cher, 6 m. NNW of Cone. Pop. 1,373.

LERAY, or Lareid, a town of Belgium, in the prov. and 15 m. SE of Liege. Pop. 2,150.

LERBACH. See Leerbach.

LERGA, a village of Spain, in the prov. of Pampeluna, 6 m. SW of Sanguesa. Pop. 350.

LERIA. See Leiria.

LERICI, a small port of Italy, in the Genoese territory, on the E shore of the bay of Spezzia, 6 m. SE of Spezzia. Pop. 2,000. Between Maria-de-Carrara and L. an amphitheatre and other ruins mark the site of the ancient Etruscan town of *Portus Lunæ*, once a flourishing sea-port, although now far inland.

LE'RIDA, a province of Spain, organized in 1822; bounded on the N by the Pyrenees; on the E by the prov. of Barcelona; on the S by that of Tarragona; and on the W by Saragossa and Huesca. It is covered on the N and E by branches of the Pyrenees; in the SW there are some extensive plains. The Segre, an affluent of the Ebro, intersects the prov., and here receives the Noguera-Pallaresa and the Noguera-Ribargorzana. The territory is generally well-irrigated and fertile. The pop. in 1849 was 197,445.—It is administratively subdivided into the 8 partidos of Balaguer, Cervera, L., Seo-de-Urgell, Solsona, Sort, Tremp, and Viella-en-el-Valle-de-Aran.

Le'rida, the capital of the above province, stands on the r. bank of the Segre, a little above its junction with the Ebro, 70 m. E by S of Saragossa. It is beautifully situated on the slope of a hill; but the streets are narrow, crooked, and ill-paved, excepting on the side of the river, where there is a good quay extending the whole length of the town. It is a bishop's see. Its university, formerly in repute, was suppressed by Philip V., and has given place to a priests' college under the bishop. On the top of the hill, which is crowned by the citadel, are the remains of a palace occupied formerly by the kings of Aragon. The ancient cathedral also stood there; but a modern and handsome building has been erected in the town to supply its place. Pop. in 1845, 16,634. The commerce of L. is confined to the exportation of the products of the adjacent territory, which is fertile in wine, silk, oil, hemp, and flax, and well-intersected with canals.—L. is a place of great antiquity, and covers the site of the ancient *Ilerda*, described by Lucan. It was taken by the Goths and Moors, and was for some time the cap. of a small kingdom under the latter. It submitted to the French in 1707, and again in 1810.

LERIN, a town of Spain, in the prov. of Pampeluna, partido and 11 m. SSE of Estella, and 24 m. SSW of Pamplona, on a rocky ridge which rises in the midst of a desert, and the base of which is washed by the Ega. Pop. 2,398. The streets are ill laid out, and the houses, consisting generally of earth or

brick, ill-built. It has, however, a large square, and a variety of pleasant promenades, and possesses a handsome parish-church, containing the mausoleum, in marble and alabaster, of the Infanta of Navarre, Donna Juana, and of her husband, Louis-de-Beaumont, first count of L., 3 chapels, a palace belonging to the counts of L., 2 convents, an hospital, and a custom-house. The distillation of brandy and the rearing of cattle form the chief branches of local industry. In the rocky sides of the plateau are numerous caverns, supposed to have been Moorish dwellings. In the vicinity is a sulphureous spring. L. is supposed to have been the ancient *Iturisa*. In 1459 it successfully withstood a siege by the Castilians; and in 1808, 600 Spaniards held the castle for several days against a detachment of the French army.

LERINNES, a commune of Belgium, in the prov. of Brabant, dep. of Tourinnes-Saint-Lambert. Pop. 562.

LERINS, a group of islands in the Mediterranean, near the coast of France, in the dep. of the Var, to the SE of Vannes, and SW of Antibes. The two principal islands are Ste. Marguerite and St. Honorat. The first is 2 m. in length from E to W, and about ¾ m. in breadth. St. Honorat, to the S of the former, is 1½ m. in length from E to W, and about ⅛ of a league in breadth. They are defended by a fort and several batteries, and are surrounded by rocks, which render approach to them extremely dangerous. They abound with partridges and hares. In 1536, these islands were invaded, and almost immediately afterwards evacuated, by Admiral Andre Doria. They were taken by the Spaniards in 1635, but in 1637 were regained by the French, and subsequently fortified. The island of Sante Marguerite is noted as the place of confinement of 'the Man with the iron mask.'

LERMA, a judicial partido and town of Spain, in Old Castile, in the prov. of Burgos. The partido comprises 7¼ pueblos. The town is 23 m. S of Burgos, on the road from Madrid to Bayonne, in an elevated situation, near the l. bank of the Arlanza. Pop. 1,395. It contains a handsome collegiate church, founded in 1606, and 2 parish-churches, 3 convents, and a palace built by the cardinal duke of L., minister of Philip III. It is a quadrangular edifice, all of stone, and bearing a close resemblance to the exterior of the official buildings of the Escurial. It has also an hospital, a custom-house, and a public granary. Leather and earthenware are the chief articles of local manufacture.—Also a village of Sardinia, in the div. of Genoa, prov. and 11 m. SSW of Novi, mand. and 5 m. S of Castelletto-d'Orba, on the r. bank of the Piotta. Pop. 1,015. It is the ancient *Liburna*.—Also a town of Mexico, in the state and 18 m. SW of the town of that name, at the entrance of the cold and humid valley of Toluca, and near the source of the Rio Grande Santiago, which here bears the name of L. It is irregularly built, and contains about 250 families. Agriculture forms the only branch of local industry.

LERMILLA, a town of Spain, in Old Castile, in the prov. and 14 m. NNE of Burgos, and partido of Bribiesca, in a narrow valley, on the Omino, an affluent of the Orca. Pop. 107.

LERO, a village of Greece, on a bay of the E coast of the island of Negropont, and 20 m. NE of the town of that name.—Also an island of the Archipelago, near the coast of Asia Minor, and to the N of the island of Kalamine, in N lat. 37° 10′, E long. 26° 51′. Pop. about 2,000. It is 9 m. in length from N to S, and about 3 m. in breadth. It is covered with lofty mountains, and, except in low and well-watered tracts, possesses little fertility. In these the vine, olive, fig, and in small quantities corn, legumes, and cotton, are successfully cultivated. Bees are reared in large numbers, and also large flocks of sheep. The island contains a town of the same name, situated on the E coast, on the slope of a hill, between two ports. It is commanded by a fort, now in ruins, built by the Genevese. On the S coast is a commodious harbour, named Port Parthein, well-sheltered by the island of Archangel, which stretches across the entrance. This island is the *Leros* or *Leria* of the ancients.

LERRIG, or LERRIGS, a village in the p. of Kilmoily, co. Kerry. Area 14 acres. Pop. in 1841, 116.

LERRING, a small river in Cornwall, which falls into the Fowey, near Penwick.—Also one of three denominations of a bog in co. Galway, which comprises an area of 3,249 acres.

LERS, a river of France, which has its source in a ramification of the Pyrenecs, in the dep. of Ariege, and cant. of Lavelanet; flows along the confines of the dep. of the Aude; enters that of the Upper Garonne; and, after a total course of about 75 m., falls into the Ariege, on the r. bank, a little above Centegabelle. Belesta, Mirepoix, and Melpech, are the chief places on its banks.

LERWICK, a parish on the mainland of Shetland, extending about 6 m. along the coast, but nowhere above 1 m. in breadth. On the E and NE it is bounded by the sea, which separates it from Bressay island, and forms the excellent harbour called Bressay sound. The surface is rocky and mountainous; but there are good arable fields on the coast. Pop. in 1801, 1,706; in 1831, 3,194; in 1841, 3,284.—The town of L. is situated on Bressay sound, and derives its consequence from being the seat of the courts of law, and the resort of vessels employed in the whale and herring-fishery, which make this bay their place of rendezvous. It consists of one principal street next the quay. Pop. in 1841, 2,287; in 1851, 2,904. Straw-plaiting is the only species of manufacture carried on here. The customs revenue in 1839 amounted to £754; in 1846-7 to £549; in 1850 to £365. The number of sailing-vessels which entered the port from foreign ports in 1850 was 14 = 1,825 tons; coastwise 202 = 17,139 tons.

LES, a town of Spain, in Catalonia, in the prov. and 83 m. N of Lerida, partido and 11 m. NNW of Viella, in the valley of Aran, on the r. bank of the Garonne. Pop. 611.

LESA, a town of Sardinia, in the prov. and 6 m. S of Pallanza, on the r. bank of Lago-Maggiore.

LESACA, a town of Spain, in the prov. of Navarre, partido and 28 m. NNW of Pamplona, in a fertile plain, watered by the Bidassoa. Pop. 2,180. It has 2 hermitages and a convent, and possesses several manufactories of woollen fabrics. In its vicinity is a mine of copper.

LES AVINS, a department and commune of Belgium, in the prov. of Liege, arrond. of Huy. Pop. of dep. 342; of com. 228.

LESBE, a fortress of Lower Egypt, in the prov. and 6 m. N of Damietta, on the r. bank and near the mouth of the eastern branch of the Nile.

LESBOS. See MITYLENE.

LESBURY, a parish in Northumberland, 3½ m. E by S of Alnwick, on the N bank of the Aln, which is here crossed by a bridge. Area 4,540 acres. Pop. in 1831, 976; in 1841, 1,108. It comprises the township of Lesbury-with-Hawkhill.

LESCAR, a canton, commune, and town of France, in the dep. of the Basses-Pyrénées, arrond. of Pau. The cant. comprises 16 com. Pop. in 1831, 9,571; in 1841, 9,781. The town is 5 m. NW of Pau, and 14 m. NE of Oleron, on a hill, near the r. bank of the Gave-de-Pau. Pop. 2,093. It has ma-

nufactories of hosiery and calico, and several spinning-mills. This town is supposed to have been founded about the year 1000, on the ruins of the ancient *Beneharnum*. It bore at first the name of Lescourre. In 1569 it was destroyed by the Calvinists.

LESCHAU, a village of Bohemia, in the circle and 23 m. ESE of Beraun, and 20 m. S of Prague.

LESCHELLE, a commune of France, in the dep. of the Aisne, cant. of Nouvion. Pop. 1,308.

LESCHENAULT (Cape), a headland of Western Australia, in the co. of Twiss, in S lat. 31° 20′, E long. 115° 28′.

LESCHENAULT (Port), an arm of the sea in Wellington co., Western Australia, enclosed on the W by a narrow tongue of land, and opening by a narrow channel on the S into Koonbanah bay, in S lat. 33° 19′, E long. 115° 37′. It forms a safe and commodious harbour, with good winter-shelter.

LESCHKIRCH, or Uj-Egyhaz, a sthul or administrative division of Transylvania; bounded on the N by the comitat of Lower Weissenburg; on the E by the sthul of Nagy-Sink; on the S by the district of Fagaras and the sthul of Hermanstadt; and on the W by the latter. It is one of the smallest div. of the prov., comprising an area not exceeding 48 sq. m. Pop. in 1837, 17,136. It is generally mountainous, and is watered by the Aluta and Hartbach. Its chief productions are oats and timber. It contains a town of the same name, and 11 villages.—The town, named also Uj-Egyhaz and Nokrig, is on the r. bank of the Hartbach, 18 m. NE of Hermanstadt, and 60 m. WNW of Cronstadt. It is well-built, and contains a mixed pop., numbering about 984, of Saxons, Wallachians, and Bohemians.

LESCHNITZ, or Lesnica, a town of Prussia, in the prov. of Silesia, reg. and 22 m. SSE of Oppeln, circle and 8 m. SW of Gross-Strelitz. Pop. in 1837, 1,126. It has manufactories of linen and tobacco.

LESCHNIZZA, a market-town of Turkey in Europe, in Servia, in the pash. of Semendria, on the r. bank of the Drinna, SW of Schabars.

LESCOVITZA, or Leskovatz, a town of Turkey in Europe, in Servia, in the sanj. of Kruchovatz, 89 m. NE of Pristina, and 67 m. NW of Ghiustendil, on the l. bank of the Morava.

LESCUN, a commune of France, in the dep. of the Basses-Pyrénées, cant. and 4 m. SW of Accous, and 20 m. S of Oleron. Pop. 1,118. It contains quarries of fine marble, and in the neighbouring mountains is a copper-mine.

LESCURE, a commune of France, in the dep. of the Ariege, cant. and 6 m. ENE of St. Girons. Pop. 1,675.—Also a commune in the dep. of the Aveyron, cant. of La Salvetat. Pop. 2,276.—Also a commune and town in the dep. of the Tarn, cant. and 2 m. NE of Albi. Pop. 1,981. The town was formerly fortified. In its vicinity, near the r. bank of the Tarn, is a curious church of the era of the 10th cent.

LESCURE-LES-ROUEN, a village of France, in the dep. of the Seine-Inferieure, cant. of Boos, 3 m. SSE of Rouen, on the r. bank of the Seine. It has a manufactory of soda and a bleachery.

LESDAIN, a department and commune of Belgium, in the prov. of Hainault, arrond. of Tournai. Pop. 600.

LESDIGUIE`RES, a hamlet of France, in the dep. of the Hautes-Alpes, cant. of Saint-Firmin-en-Val-Godimard, 17 m. NNW of Gap, on the l. bank of the Drac. It has a fine castle.

LESGEWANGMINNEN, a village of Prussia, in the regency of Gumbinnen, SE of Ragnit. Pop. 110.

LESGHI. See articles Caucasus and Circassia.

LESHENA, a village of Greece, in the Morea, on the Ionian sea, in the nom. of Elis, N of Gastuni.

LESIER-ULAN-DABSUN-ULA, a mountain of Tibet, on the N frontier of the prov. of Wei. Near it is the source of the Katsi-ulan-Muren, an affluent of the Murus-ussu.

LESIGNAT-DURAND, a commune of France, in the dep. of the Charente, cant. of Montemboeuf, 15 m. S of Condolens, on an affluent of the Charente. Pop. 1,000. It has an active trade in cattle.

LESIGNEUX, a village of France, in the dep. of the Loire, cant. and 3 m. S of Montbrison. Pop. 1,084.

LESIGNY, a village of France, in the dep. of the Vienne, cant. and 8 m. N of Pleumartin, on the l. bank of the Gardempe, at the confluence of that river with the Loire. Pop. 645.

LESINA, an island of Dalmatia, in the Adriatic, in N lat. 43° 9′, and stretching from 16° 22′ to 17° 12′ E long. It is 50 m. in length from W to E, but nowhere exceeds 8 m. in breadth, and has an average breadth of only 4½ m. It is separated from the island of Brazza on the N by the Canale-di-Greco, which narrows to a breadth of only 4 m. On the SW the Canale-di-Lissa separates it from the island of Lissa; and on the SE the Canale-di-Narenta from the peninsula of Sabioncello. Its E extremity approaches within 4 m. of the mainland. Its principal towns are L., near the W extremity; Citta-Vecchia on the N coast; and San-Giorgio at the E extremity. Pop. 12,539. It is highly fertile, and produces wine, rosemary-oil, figs, almonds, saffron, oranges, aloes, and honey, besides a considerable quantity of grain. It also exports wool, cheese, and anchovies.—The town of L. lies at the bottom of a little bay, entirely surrounded with mountains, which rise so abruptly as only to leave a narrow space for the buildings and quay. It presents some fine old Venetian buildings. Pop. 2,000.

LESINA, a town of Naples, in the prov. of Capitanate, district and 14 m. NNE of S. Severo, cant. and 10 m. NNE of S. Paolo, on the r. bank of a lake of the same name. Pop. 1,100.—The lake, which is also named Salso or Salpe, and is the *Pantanus* of Pliny, is 14 m. in length from E to W, and about 2 m. in breadth. A low narrow tongue of land separates it from the Adriatic. It abounds in fish.

LESKAU, a town of Bohemia, in the circle and 27 m. WNW of Pilsen, and 9 m. S of Tepel. Pop. 907. It has an active trade in wood, corn, and sheep.

LESKILAE, a river of Russia in Europe, in Finland, in the gov. of Viborg and district of Sordavall. It forms the outlet of Lake Yanisiaroi, and throws itself into Lake Ladoga, 9 m. E of Sordavall, and after a course of about 18 m. It has fisheries of salmon and of pearl-oysters.

LESLIE, a township of Ingham co., in the state of Michigan, U. S., 89 m. W by N of Detroit. Pop. in 1840, 281.

LESLIE, or Lesly, a small parish in Aberdeenshire, comprising an area of 4 sq. m. Pop. 553.

LESMAHAGO, a large parish in the upper ward of Lanarkshire, stretching along the SW bank of the Clyde. It comprises an area of 34,000 acres, watered, in addition to the Clyde, by the Peniel, Douglas, Logan, Nethan, Kype, and Cannar; and has a general alt. of 500 ft. above sea-level. A range of mountains, rising in some parts to an elevation of 1,200 ft., separate it on the W from Ayrshire. Pop. in 1831, 6,409; in 1841, 6,902.—The principal village or post-town in the p., called also Lesmahago or Abbey-Green, is beautifully situated on the Nethan, about 6 m. from Lanark. Pop. 881.

LESMO, a village of Austria, in Lombardy, in the prov. and 15 m. NNE of Milan. Pop. 830. It has a paper-mill.

LESMONT, a town of France, in the dep. of the

Aube, cant. and 6 m. WNW of Brienne-le-Château, on the r. bank of the Aube. Pop. 500.

LESNEVEN, a canton, commune, and town of France, in the dep. of Finistère, and arrond. of Brest. The cant. comprises 10 com. Pop. in 1831, 17,879; in 1841, 19,174. The town is 17 m. NE of Brest, and 19 m. WSW of St.-Pol-de-Leon, in a plain. It has a large naval hospital and a corn-exchange; and carries on an active trade in grain, cattle, flax, linen, wax, and honey. This town was founded in 1096, by Even, count of Leon. In its environs are a Gothic church and a castle.

LESNEWTH, a parish of Cornwall, 4½ m. N by E of Camelford. Area 1,940 acres. Pop. 137.

LESNOI-KARAMYCH, a German colony in Russia in Europe, consisting of about 171 families, who have established themselves in the gov. and 57 m. SSW of Saratov, district and 60 m. NNW of Kamychin.

LESPARRE, an arrondissement, canton, commune, and town of France, in the dep. of the Gironde. The arrond. comprises an area of 120,671 hectares, and contains 4 cant. Pop. in 1831, 36,918; in 1841, 38,013.—The cant. comprises 15 com. Pop. in 1831, 16,499; in 1841, 16,700.—The town is 41 m. NW of Bordeaux, between the l. bank of the Gironde and the ocean. Pop. in 1789, 338; in 1821, 818; in 1831, 1,232; in 1836, 1,404; in 1841, 1,521. It has manufactories of a variety of woollen fabrics, several wool-carding and spinning-mills, and a printing establishment, and carries on an extensive trade in wood.

LESPONNE, a hamlet of France, in the dep. of the Haute-Pyrenees, cant. and 5 m. E of Bagnères. Pop. 586. In the adjacent mountain of Congérès is a rich mine of zinc.

LESSA, a maritime village of Portugal, in the prov. of Minho, 4 m. N of Oporto.

LESSAC, a village of France, in the dep. of the Charente, cant. and 5 m. N of Confolens. Pop. 1,200.

LESSAY, a canton, commune, and town of France, in the dep. of the Manche, arrond. of Coutances. The cant. comprises 13 com. Pop. in 1831, 14,747; in 1841, 14,266.—The town is 14 m. N of Coutances, on the l. bank of the Ay. It has extensive salt-works and several dye-works, and possesses an active trade in mules, fowls, and feathers.

LESSE, a village of Brunswick, in the district of Wolfenbüttel, circle and 5 m. WNW of Saldern, and 13 m. WSW of Brunswick. Pop. 1,062. It has a large spinning-mill, and in the vicinity is a quarry of free-stone.—Also a river of Belgium, which has its source in the prov. of Luxembourg, near Opont; flows thence into the prov. of Namur; and after a circuitous course of about 45 m. unites with the Meuse, on the r. bank, at Anseremme. Its principal affluents are the Homme on the r., and the Wimbe. Near the village of Ham it disappears at the base of a mountain, and reappears on the opposite side at the distance of 542 yds.

LESSEN, or Laszyn, a town of Prussia, in the prov. of West Prussia, regency and 17 m. SSE of Marienwerder, circle and 15 m. E of Graudenz. Pop. 1,670.

LESSEN (Gross), a village of Prussia, in Silesia, in the circle of Leignitz, on the Bober, NW of Grünberg. Pop. 525.

LESSINES, or Lessen, a department, commune, and town of Belgium, in the prov. of Hainault, arrond. of Tournai. Pop. of dep. 4,980. The town is 23 m. ENE of Tournai, and 8 m. NNE of Ath, on the l. bank of the Dender. Pop. 860. It is a pretty town, and has a Catholic church, a town-house, and an hospital. It possesses numerous manufactories and bleacheries of linen, an oil and numerous chicory mills. 5 salt-refineries, several breweries and distilleries, 2 soap-works, and a printing establishment. Paving-stones, coal, oil, and wood, form its chief articles of trade. In 1303 it was taken by the Flemish, after a long siege, and burnt.

LESSINGHAM, a parish in Norfolk, 7 m. ESE of North Walsham, on the sea-coast. Area 560 acres. Pop. in 1831, 191; in 1841, 241.

LESSINGHE, a town of Belgium, in the prov. of West Flanders, dep. and 5 m. SSW of Ostende, on the canal from that town to Nieuport.

LESSIVES, a department and commune of Belgium, in the prov. and arrond. of Namur, watered by the Lesse. Pop. 185.

LESSNESS, or Westwood, a chapelry in the p. of Erith, Kent, 3½ m. NW by N of Dartford, and bounded on the N by the Thames.

LESSOE, a parish of Norway, in the dio. of Aggershuus, and N part of the bail. of Christian. It contains a considerable iron-mine; and near it a lake, at an alt. of 2.200 ft. above sea-level, which discharges by two outlets, one of which flows NW to the North sea, and the other SE to the Skager-Rack.

LESSOE. See Loessoe.

LESWALT, a parish of Wigtonshire, 4 m. NW of Stranraer. Pop. in 1831, 2,636; in 1841, 2,712.

LETART, a township of Meigs co., Ohio, U. S., 108 m. SW of Columbus, on the Ohio. Pop. 642.

LETCHER, a co. in the E part of Kentucky, U. S. Area 200 sq. m. Pop. in 1850, 2,513.

LETCHWORTH, a parish of Herts, 2 m. ENE of Hitchen. Area 1,120 acres. Pop. in 1841, 108.

LETCOMBE-BASSET, a parish of Berks, 2½ m. SW of Wantage. Area 1,260 acres. Pop. 293.

LETCOMBE-REGIS, a parish adjoining the above, on the E. Area 4,540 acres. Pop. 1,030.

LETHAM, a village of Fifeshire, 4 m. W of Cupar. Pop. 383.—Also a v. of Forfarshire, 5 m. E of Forfar. Pop. 745.

LETHENDY, a parish of Perthshire, 12 m. N of Perth. Pop. in 1831, 402; in 1841, 662.

LETHERINGHAM, a parish of Suffolk, 11 m. NNE of Ipswich. Area 1,090 acres. Pop. 164.

LETHERINGSETT, a parish of Norfolk, 2 m. W by N of Holt. Area 1,010 acres. Pop. in 1841, 273.

LETHNOT, a parish of Forfarshire, 12 m. NNE of Forfar. Pop. in 1831, 404; in 1841, 400.

LETI, a small island in the Eastern seas, in N lat. 8° 25′, E long. 127° 40′.—Also an island of Bulgaria, in the delta of the Danube, lying between the Kilia and Sulina mouths of that river.

LETINO, a town of Naples, in the Terra-di-Lavoro, 6 m. ESE of Capriati. Pop. 1,030.

LETITSHEV, or Letycav, a town of Russian Poland, in the gov. of Podolia, on the Bug, 55 m. NE of Kamenitz. Pop. 2,235.

LETMATE, or Lethmate, a village of Prussia, in the reg. of Arensberg, 4 m. W of Iserlohn. Pop. 570.

LE-TSEU-EN, a district and town of China, in the prov. of Shen-se, div. of Se-gan-fu, in N lat. 34° 31′, E long. 108° 20′.

LE-TSIN-HEEN, a district and town of China, in the prov. of Shan-tung, div. of Wu-ting-fu, in N lat. 37° 33′, E long. 118° 20′.

LETTER B, a township of Oxford co., in the state of Maine, U. S., 77 m. NW of Augusta.

LETTERE, a town of Naples, 3½ m. ENE of Castellamare. Pop. 4,000.

LETTERHAUTERN, a department and town of Belgium, in the prov. of W. Flanders, arrond. of Alost. Pop. 1,077.

LETTERKENNY, a town of co. Donegal, pleasantly situated on the river Swilly, 15 m. SW of Londonderry. Pop. in 1831, 2,168; in 1841, 2,161.

LETTERKENNY, a township of Franklin co., in

the state of Pennsylvania, U. S., 7 m. NW of Chambersburg. Pop. 1,918.

LETTERLUNA, a parish in King's co., 3 m. NE of Kinnitty. Area 8,430 acres. Pop. in 1831, 1,000; in 1841, 1,115. The Black-Gap, on its S boundary, has an alt. of 1,293 ft. above sea-level.

LETTERMACWARD, a parish of co. Donegal, 4 m. N by W of Glenties. Area 20,800 acres. Pop. in 1831, 2,039; in 1841, 2,475.

LETTERMORE, an island at the entrance of Kilkerran bay, co. Galway. It is 3 m. in length; and from ¾ to 2 m. in breadth; and in its highest ground has an alt. of 388 ft. above sea-level.

LETTERMULEN, an island in Kilkerran bay, co. Galway, separated by a very narrow sound from Garomna island on the E. It is 1½ m. in length.

LETTERSDORF (Nieder and Ober), two villages of Saxony, in the circle of Lusatia, adjoining each other, and 16 m. SSE of Bautzen.

LETTERSTON, a parish of Pembrokeshire, 8 m. NNW of Haverfordwest. Pop. in 1841, 498.

LETTO-MANAPELLO, a town of Naples, in Abruzzo-Citra, 12 m. SSW of Chieti. Pop. 1,330.

LETTON, a parish in Herefordshire, 5 m. SW of Weobly. Area 1,330 acres. Pop. in 1831, 200; in 1841, 224.—Also a parish in Norfolk, 4¾ m. SSW of E. Dereham. Area 1,440 acres. Pop. in 1841, 154.

LETTONIA, a district of Russia, now included in the gov. of Riga.

LETTOWITZ, a small town of Moravia, on the Zwittau, 25 m. N of Brunn. It has extensive cotton-mills.

LETUR, a town of Spain, in the prov. of Murcia, 30 m. N of Caravaca. Pop. 2,970.

LEU (Saint), a town on the W coast of the isle of Bourbon, 10 m. S of St. Paul. Also a village of France, in the dep. of Seine-et-Oise, cant. and 4 m. NW of Montmorency. Pop. 1,700.

LEUBUS, a village of Prussian Silesia, on the r. bank of the Oder, 30 m. WNW of Breslau. Pop. 565. Near it is another v. of the same name, with a pop. of 1,309, and a magnificent Cistercian abbey.

LEUCA (Capo di), a cape on the coast of Naples, forming the extreme SE point of Italy. It is in N lat. 39° 48′ 7″, E long. 18° 22′ 5″. It is the *Salentinum promontorium* of the Romans.

LEUCADIA. See Ducato.

LEUCATE, a town of France, in the dep. of Aude, on a lake of the same name, 17 m. S of Narbonne. Pop. 1,104.—The lake is about 9 m. in length, and is separated from the sea by a narrow strip of sand.

LEUCATE (Cape), a cape on the S coast of France, in the dep. of the Aube, on a point of land which projects from a bay of the same name.

LEUCHARS, a parish of Fifeshire, 4 m. NW of St. Andrew's. Pop. in 1831, 1,869; in 1841, 1,901.—The v. of L. is pleasantly situated about 1 m. from the coast of the German ocean. The inhabitants, amounting to 620, are chiefly employed in the linen manufacture for the Dundee market. The Edinburgh and Dundee railway has a station at the v. of L., 7 m. NE of Cupar, and 39 m. from Edinburgh; and a branch-line, 4½ m. in length, from this point to St. Andrew's, was opened in 1852.

LEUCHTENBERG, a town of Bavaria, 24 m. NE of Amberg, on the l. bank of the Luhe. Pop. 500.

LEUCI (San), a town of the Papal states, in the deleg. and 3 m. S of Benevento. Pop. 3,000.—Also a village of Naples, in the Terra-di-Lavoro, 3 m. N of Caserta. Pop. 380.

LEUCTRA, or Leftra, a village of Greece, 7 m. SW of Thebes, famous for the victory obtained by Epaminondas over the Lacedemonians, in the year 371 B. C. It stands at the distance of a few miles from the ruins of Platæa.—Also a maritime v. of the Morea, on the gulf of Koron.

LEU-D'ESSERENT (Saint), a town of France, in the dep. of Oise, 7 m. NW of Senlis. Pop. 1,192. There are large quarries in the vicinity.

LEUGGEIN, a parish in the Swiss cant. of Aargau, district and 3 m. WSW of Zurzach. Pop. 1,193, Catholics.

LEUGLAY, a village of France, in the dep. of Cote-d'Or, cant. and 3 m. NNW of Recey. Pop. 452.

LEUGNIES, a commune of Belgium, in the prov. of Hainault, cant. of Beaumont. Pop. 375.

LEUGNY, a village of France, in the dep. of Yonne, cant. and 6 m. SE of Toucy. Pop. 620.

LEUHAN, a village of France, in the dep. of Finistere, cant. and 3 m. S of Chateauneuf-de-Faou. Pop. 1,263.

LEUK, or Loeche, a town of Switzerland, in the cant. of the Valais, about 1 m. from the Rhone, at the confluence of the Dala, 15 m. ENE of Sion. Pop. 557, Catholics. It has an alt. of 5,000 ft. above sea-level, and is celebrated for its baths.

LEUN, or Lein, a village of Prussia, in the prov. of the Rhine, circle and 9 m. W of Wetzlar, on the r. bank of the Lahn. Pop. 800.

LEUPEGHEM, a department and village of Belgium, in the prov. of E. Flanders, arrond. of Audenarde. Pop. 1,028.

LEUSDEN, a village of the Netherlands, in the prov. of Utrecht. Pop. 900.

LEUSSOW, a parish and village in the duchy of Mecklenburg-Schwerin, bail. and 12 m. W of Grabow. Pop. 1,284.

LEUSTADT, a small town of Hesse-Darmstadt.

LEUTENBERG, a town of Schwarzburg-Rudolstadt, 12 m. NNW of Lobenstein, on the Sornutz. Pop. 700. It has in its vicinity several silver and copper-mines and works.

LEUTERSBURG, a small town of the Swiss cant. of St. Gall, 4 m. N of Lichtensteig.

LEUTERSDORF, a town of Bohemia, in the circle and 22 m. WNW of Leitmeritz. Pop. 1,270. It has manufactories of fine woollens.

LEUTERSHAUSEN, a town of Bavaria, 6 m. WNW of Anspach. Pop. 840.

LEUTH, a village of Belgium, in the prov. of Limburg, cant. of Reckheim. Pop. 724.

LEUTHEN, a village of Prussian Silesia, 10 m. W of Breslau. Pop. 600. It is remarkable for a decisive victory obtained here by Frederick II. of Prussia over the Imperialists, on 5th Dec. 1757.

LEUTKIRCH, a small town of Würtemberg, on the river Eschach, 38 m. S of Ulm, at an alt. of 709 yds. above sea-level. Pop. 2,088. It has manufactories of cottons and linens.—Also a village of Baden, 3 m. ESE of Salem.

LEUTMANNSDORF, a village of Prussian Silesia, 6 m. SSE of Schweidnitz. Pop. 1,396.

LEUTMERITZ. See Leitmeritz.

LEUTSCHAU, in Hungarian Loese, a town of Hungary, in the com. of Zips, 24 m. W by S of Szeben. It is pleasantly situated, partly on the slope of a hill, and has a large square, in which is a handsome Gothic church. Pop. 5,200. It has a Lutheran college, and a Catholic gymnasium. Saffron is extensively cultivated in the environs. The town was formerly surrounded with walls, and was frequently taken and retaken during the commotions in Hungary in the 17th cent. It has also suffered greatly from fires.

LEUZBACH, a small river of Prussian Silesia, which falls into the Oder.

LEUZE, or Leuse, a town of Belgium, in the prov. of Hainault, on the Petite Dender, 11 m. E of

Tournay. Pop. 5,880. It is a place of considerable manufacturing activity.—Also a commune and village in the prov. of Namur, cant. of Eghezie. Pop. 897.

LEVACHEVA, a town of Russia, in the gov. of Orenburg, on the l. bank of the Bielaia, 6 m. N of Sterlitanrak.

LEVAL-CHANDEVILLE, a commune of Belgium, in the prov. of Hainault, cant. of Beaumont. Pop. 252.

LEVAL-TRAHEGNIES, a commune and village of Belgium, in the prov. of Hainault, cant. of Binche. Pop. 1,303.

LEVAN (St.), a parish of Cornwall, 8 m. SW of Penzance, on the sea-coast. Area 2,400 acres. Pop. in 1831, 515; in 1841, 531. Here are some remarkable rocks projecting into the sea, rising to a considerable alt., and defended on the land-side apparently by ramparts and ditches. On one of their most elevated points is the celebrated *logan*, or rocking-stone, a mass of granite, supposed to weigh not less than 90 tons, yet so poised that a slight force is sufficient to cause it to rock to and fro.

LEVANE, a town of Tuscany, in the prov. and 26 m. SE of Florence, on the Arno. Pop. 2,000.

LEVANGER, a town of Norway, on the SE coast of the Drontheim sound. Pop. 400.

LEVANGHE, a small island of the Adriatic, near the E coast of Istria, in E long. 13° 52′, N lat. 45° 1′.

LEVANNA, a village in Cayuga co., in the state of New York, on the E side of Cayuga lake. Pop. 200.

LEVANSO, a small island in the Ægadean group, at the W extremity of Sicily, about 10 m. W of Trapani. It is 6 m. in circuit, and affords shelter to vessels from N and NW winds, and is fertile in wine, oil, and grain. Pop. 4,500.

LEVANT, a term sometimes applied to the coasts of the Mediterranean E of Cape Matapan, and the gulf of Sidra, particularly those of Asia Minor and Syria. The trade of these countries was long in the hands of an exclusive corporation called the Levant company. The term itself seems gradually becoming obsolete.

LEVANT, an island in the Mediterranean, on the SE coast of France, belonging to the Hieres group. Its E point is in N lat. 43° 2′ 35″, E long. 6° 30′.

LEVANT, a township in Penobscot co., in the state of Maine, U. S., 80 m. NNE of Augusta. Pop. 1,061.—Also a township in the Bathurst district of Upper Canada, intersected by the Clyde.

LEVANTADOS, an island of the Atlantic, near the coast of St. Domingo, at the entrance of the great bay of Samana.

LEVANTINE (Val), or Livinenthal, a district of Switzerland, in the NW part of the cant. of Ticino, comprising the 4 circles of Airolo, Fardo, Gurnico, and Quinto.

LEVANTO, a province of the Sardinian states, in the E part of the division of Genoa, bounded on the N by the duchy of Parma; on the E by Tuscany and Massa-Canara; on the S and SW by the Mediterranean; and on the W by the prov. of Chiavari. It is a mountainous district, with an area of 194 Italian sq. m., of which one-third is under cultivation, and one-third is covered with forests. Pop. in 1839, 73,139. It is subdivided into the 6 mandamento of Godano, Lerici, Sarzane, Spezzia, and Verzano. Its cap. is Spezzia.

LEVANTO, a town of the Sardinian states, in the division of Genoa, 18 m. NW of Spezzia. Pop. 4,596.

LEVAZNA, a river of Servia, rising to the S of Kragogevatz, and flowing NE to the Morava.

LEVEGO, a village of Austrian Lombardy, in the prov. and 1 m. N of Belluno.

LEVELAND, a parish in Kent, 4½ m. SSW of Faversham. Area 320 acres. Pop. in 1841, 100.

LEVEN, a parish in the E. R. of Yorkshire, 6 m. NE of Beverley. Area 5,070 acres. Pop. in 1831, 771; in 1841, 988.

LEVEN. See Lancashire.

LEVEN, or Line (The White), a river in Cumberland, springing with the Black Leven from various fountains near Christenbury-crags, on the Scottish border, receiving the Black L., and winding through fertile and pleasant vales, by Kirklinton, to the Esk, which it joins 3 m. S of Longtown.

LEVEN, a beautiful though brief river of Dumbartonshire, carrying off the tributary and superfluent waters of Loch-Lomond, from the foot of that lake to the Clyde at Dumbarton-castle. Owing to the purity of its water, its banks are dotted with print-works and kindred manufactories; and the vale along which it flows teems with population. On its banks are the large villages of Alexandria, Bonhill, and Renton, and the burgh of Dumbarton, with its suburb of Bridgend. Mr. Galbraith has calculated the quantity of water discharged by the L. to be about 59,939 cubic ft. per minute, when the river is rather below its average height; or 877,925,685 tons per annum.

LEVEN, a considerable river of Van Diemen's Land, in the co. of Devon, flowing NNE into Bass's straits.

LEVEN, a village in the p. of Scoonie, in Fifeshire, 9 m. E of Kirkcaldy, and 2 m. S of Kennoway, at the mouth of the river Leven, which here forms a safe harbour admitting vessels of 300 tons burthen at spring-tides. It chiefly consists of two principal streets, which run parallel to each other; and has a pop. of 1,827 inhabitants, who are chiefly employed in the manufacture of coarse linen.

LEVEN (Loch), a beautiful expanse of water, at the N base of the Lomond hills, in the immediate neighbourhood of the burgh of Kinross, and in the SE quarter of the small shire of that name. Its circumf. is about 10 or 11 m. The general character of the scenery which surrounds it is soft and gentle, and not altogether deficient in variety. The islands in the lake are two in number; one opposite Kinross, on which the ruins of a castle stand, and St. Serf's isle, near the E end, on which are the remains of a religious house. The island on which the ruins of the castle stand is about 2 acres in extent. In this castle the unfortunate Queen Mary was imprisoned on the 16th June, 1567, and forced to sign an instrument resigning the crown to her infant son, who, a few days thereafter, was inaugurated at Stirling under the title of James VI. Her subsequent defeat at Langside, and her immediate flight into England, were within a few days, the unfortunate result of her long-meditated, and well-executed escape from this castle. The trout produced in Loch-L. are of high flavour and a bright red colour. The fishing is alleged to have been considerably injured by a partial draining of the loch which has been effected at an enormous expense, but with a disproportionate beneficial result.—The Leven issues from the SE end of the loch, and, after a course almost due E of about 12 or 14 m., falls into the sea at the town of Leven. Its current is rapid, having a fall of no less than 310 ft. in the above distance.

LEVEN (Loch), an arm of the sea, on the W coast of the Scottish Highlands, protruded a length of 12 or 13 m. inland, from Loch-Linnhe; and separating the co. of Argyle on the S, from Invernessshire on the N. On the Argyleshire side is Balahulish, with its slate-quarries, and in the vicinity is the famed vale of Glencoe. A small river called the Leven, the issue of a series of small lakes farther to the E, flows into it at the head.

LEVEN-SEAT, a mountain in the p. of Carn-

wath, in Lanarkshire, rising 1,200 ft. above the level of the Clyde.

LEVENANT, a river of Wales, in Cardiganshire, which falls into the Dovy.

LEVENNY, a river of Wales, in Caernarvonshire, which falls into the Irish sea.

LEVENNY, a river of Wales, in Denbighshire, which falls into the Cluyd.

LEVENS, a chapelry in Westmoreland, 5½ m. S of Kendal. Area 3,920 acres. Pop. in 1841, 993.

LEVENSHULME, a township in Lancashire, 3 m. SE of Manchester, with a station on the Manchester and Crewe railway. Pop. 674.

LEVENTIN, a large lake in Prussian Lithuania, which is joined to the lake of Angerburg by a small canal.

LEVENZO, a town of the Sardinian states, in the prov. and 12 m. N of Nice, near the l. bank of the Vesubia. Pop. 1,200.

LEVER, an island on the coast of Norway, one of 5 on the N of Broad sound.

LEVER (Darcy), a township of Lancashire, 1½ m. E of Great Bolton. Pop. 1,700.

LEVER (Great), a township of Lancashire, 1 m. SSE of Great Bolton. Pop. 657.

LEVER (Little), a township of Lancashire, 2 m. ESE of Great Bolton. Pop. 2,580.

LEVERN, a river of Renfrewshire, which rises in the Long loch, and flows NE to the White Cart, which it joins 3 m. SE of Paisley.

LEVERANO, a small port of Naples, on the Terra-d'Otranto, 12 m. WSW of Lecce. Pop. 1,670.

LEVEREN, a village of the Prussian prov. of the Rhine, duchy of Juliers. Pop. 800.

LEVERETT, a township in Franklin co., Massachusetts, U. S., 83 m. W by N of Boston. Pop. 875.

LEVERINGTON, a parish of Cambridgeshire, 1 m. NNW of Wisbeach. Area 9.000 acres. Pop. 1,954.

LEVERSDALE, a township in the p. of Irthington, in Cumberland, 7 m. NE of Carlisle. Pop. 438.

LEVERTON, a parish in Lincolnshire, 5 m. ENE of Boston. Area 3,390 acres. Pop. 687.

LEVERTON (North and South), two adjacent parishes of Nottinghamshire, 6 m. E of East Retford. Area of North L., 1,050 acres. Pop. 344. Area of South L., 2,530 acres. Pop. 451.

LEVI (Cape), a cape on the N coast of France, to the NE of the bay of Cherburg, 8 m. NW by W of Cape Barfleur.

LEVICO, a town of Tyrol, 10 m. SE of Trient. Pop. 3,517.

LEVIER, a town of France, dep. of Doubs, 9 m. S of Ornans. Pop. 1,430.

LEVIGNAC, a village of France, in the dep. of Haute-Garonne, cant. and 4 m. NNW of Leguevin, on the r. bank of the Save. Pop. 700.

LEVIGNAC-LE-HAUT, a town of France, in the dep. of Aveyron, cant. and 4 m. N of St. Aubin. Pop. 1,500.

LEVINGTON, a parish of Suffolk, 6 m. SE of Ipswich. Area 1,660 acres. Pop. 214.

LEVISI, a large Greek village of Asiatic Turkey, in the sanj. of Mentesha, situated in an elevated plain near the coast, 5 m. NE of Cape Angistro, and 3 m. SSW of Makri. It was terribly devastated by an earthquake in February 1851, which, it is reported, levelled to the ground the whole houses of the village, 1,500 in number, and buried at least 600 human beings under their ruins.

LEVITHA ISLANDS, a group of four islands in the Archipelago. The largest, and easternmost of the group, is intersected by the parallel of 37° N, and the meridian of 26° 29′ E. It is of remarkably irregular outline, and nowhere exceeds 1 m. in breadth. Its length from W to E, between Elminopoint and Spano-point, is 5 m. On its S side it presents a good harbour with from 4 to 50 fath. water. On its E side is Vathi bay, the head of which is separated by a narrow isthmus not exceeding 200 yds. in breadth from the W side of the S harbour or Levitha harbour. — Mauro and Laros are both very small narrow islets lying to the W of Levitha, between it and Kinaro the westernmost of the group, which is intersected by the meridian of 26° 18′ E, and is about 2 m. in length from W to E, but nowhere exceeds 1 m. in breadth. Its W part attains an alt. of 1,050 ft. above sea-level.

LEVIZZANO, a town of Italy, in the duchy and 17 m. SW of Modena, on the l. bank of the Secchia. Pop. 2,200.

LEVKOPOL, a decayed town of Russia, in the Crimea, 80 m. S of Perekop.

LEVORANO, a town of Naples, in the prov. of Otranto, 11 m. SW of Lecce. Pop. 1,800.

LEVROUX, a small town of France, in the dep. of Indre, 11 m. N of Chateauroux. Pop. 2,608. It has manufactories of woollens and leather.

LEWANICK, a parish of Cornwall, 5 m. SW of Launceston. Area 3,920 acres. Pop. 733.

LEW-CHING-HEEN, a district and town of China, in the prov. of Kwan-se, div. and 18 m. NW of Lew-chu-fu, on the l. bank of the Lung-keang, in N lat. 24° 25′, and E long. 108° 58′.

LEW-CHU-FU, a division and town of China, in the prov. Kwan-se. The div. comprises 8 districts. The town is 105 m. SW of Kwei-lin, on the l. bank of the Lung-keang, in N lat. 24° 14′ 24″, and E long. 109° 8′ 30″.

LEWE (North), a parish of Devonshire, 4 m. SW of Hatherleigh. Area 5,050 acres. Pop. 1,051.

LEWE-TRENCHARD, a parish of Devonshire, 9½ m. WSW of Oakhampton. Area 3,530 acres. Pop. 527.

LEWENZ, or Leva, a town of Hungary, in the palatinate and 6 m. SE of Bars. Pop. 4,600. It carries on a traffic in corn, cattle, brandy, wine, tobacco, and leather. In the neighbourhood are mineral springs.

LEWES, a parliamentary borough in the hund. of Lewes, Sussex, 49 m. S by E of London, and 7 m. NE of Brighton. Area 1,360 acres. Pop. in 1831, 8,592; in 1851, 9,533. It is situated on the W declivity of one of those fertile eminences known by the name of the South Downs, and encompassed by an amphitheatre of loftier hills, which impart to it a pleasing and picturesque aspect. The Ouse flows through the town, and pursuing a S course, falls into the sea at Newhaven. From this point up to the town, where it is crossed by a stone bridge, the river has been rendered navigable for barges of considerable burden. The streets are in general spacious, and many of the houses are handsome. The shire-hall, or sessions-house, is an elegant building, comprising a council chamber, the civil and criminal courts, and the grand jury-room. A range of barracks stands about 1 m. to the S of the town. Races are generally held at the end of July, or the beginning of August, on an excellent race-course to the W of the town. Paper is made here to a small extent. The trade in wool was formerly extensive, but it is said to have declined. A considerable traffic, however, is carried on in grain, malt, sheep, and cattle. Sheep fairs, held on the 21st of September, and 2d of October, annually attract purchasers from all parts of the kingdom. A wool fair is held in summer. — The borough is not incorporated. The spring, summer, and winter assizes are held here, in the county-hall, and also the quarter-sessions for the E division of the shire. The borough returns 2 members to parliament. The

number of registered electors in 1837 was 890; in 1848, 844. L. is connected by a branch-line with the London and Brighton railway.—L. is supposed to have been the site of the Roman station *Mutuantonis*. William I. gave it, with the rape of L., to William de Warren, who had married his daughter, Gundred; and it continued in the possession of the earls of Warren till 1439. The castle has been long in ruins, but the keep, which is in tolerable preservation, has been repaired, and the summit of the mount laid out and planted. On an eminence near the town a great battle was fought in 1264, between Henry III., and the confederated barons under the command of Montford, earl of Leicester.

LEWIN, a village of Bohemia, in the circle and 6 m. N of Leitmeritz. Pop. 560.—Also a v. of Prussia, in the reg. and 57 m. SSW of Breslau. Pop. 991.—Also a v. in the reg. of Potsdam, circle of Upper Bavaria.

LEWIS, one of the largest of the Hebrides, parted by two arms of the sea into two divisions, the southern called Harris, and the northern Lewis. The whole island is 82 m. long from the sound of Bernera to the Butt of L., in a direction running SW and NE; and the average breadth may be 11 m. Area 451,000 acres. The total length of L. is 40 m. from the boundary-line to the Butt; its greatest breadth is rather more than 20 m. L. belongs to Ross-shire, but Harris is annexed to the co. of Inverness. The surface of L., which is of a triangular figure, with the apex to the N, is not so rugged and mountainous as the S district; and the low grounds are covered with lakes, mosses, and swamps. On the coast the land is of a sandy soil, but is tolerably fertile when well-manured with sea-weed. The coast is indented by Loch-Bernera, Loch-Roig, Loch-Carlowa, with subordinate indentations; and is well-adapted for the white fish and herring-fisheries. The rocky cliffs which form the Butt or N extremity of L., rise to the height of 60 or 80 ft., and are broken into very rugged and picturesque forms. The loftiest mountain is that of Suaneval, which Macculloch supposes to be nearly equal in height to Clisseval in Harris, or about 2,700 ft. A group of hills on the N side of Loch-Bernera attain a height of about 800 ft. Gneiss is the predominant and fundamental rock. The rivers abound with trout and salmon. Besides the town of Stornoway [which see] there are several small villages. The chief employment of the inhabitants is the rearing of sheep and black cattle, and the fishery. L. is divided into 4 parishes, viz.: Barvas, Lochs, Stornoway, and Uig. A number of small adjacent islets and rocks belong to the district, some of which are inhabited, but the greater number are too trivial to deserve particular notice. Pop., exclusive of Harris, in 1801, 9,168; in 1831, 14,541; in 1841, 17,037.

LEWIS, a county in the N part of the state of New York, U. S., comprising an area of 1,122 sq. m., generally hilly, and watered by Black, Beaver, Independence, Moose, Salmon, Indian, and Oswegatchie rivers. It is in some parts fertile. Pop. in 1840, 17,830; in 1850, 24,570. Its cap. is Martinsburg.—Also a co., in the NW part of the state of Virginia, containing a hilly area of 1,600 sq. m., drained by Little Kanawha river and its branches, by the W fork of Monongahela river and its branches, and by the head-waters of the E fork. Pop. in 1840, 8,151; in 1850, 10,031. Its cap. is Weston.—Also a co. in the N part of the state of Kentucky, containing a surface of 375 sq. m., bordered on the N by Ohio river, and drained by Salt Lick and Kinniconnick creeks. Pop. in 1840, 6,306; in 1850, 7,103. Its cap. is Weston.—Also a co. in the NE part of the state of Missouri, containing an area, generally undulating, of 500 sq. m., bounded on the E by the Mississippi, and drained by Fabius and Wyaconda rivers. It has a fertile soil, and affords fine timber. Pop. in 1840, 6,040; in 1850, 6,577. Its cap. is Waterloo.—Also a township of Essex co., in the state of New York, 131 m. N of Albany. It has a mountainous surface, and is drained by Boquet river and its tributaries. It is in some parts fertile. Pop. in 1840, 1,505.—Also a township of Lycoming co., in the state of Pennsylvania. Pop. 542.—Also a township of Brown co., in the state of Ohio, 121 m. SW by S of Columbus, bounded on the S by the Ohio. The surface is undulating, and drained by Whiteoak, Eagle, and Bullskin. Pop. 2,437.—Also a township of Clay co., in the state of Indiana. Pop. 472.

LEWIS, an island in Dampier archipelago, off the NW coast of Australia, in S lat. 20° 35′, E long. 116° 33′. It is about 9 m. in length from N to S; and is separated by Mermaid strait from the continent.—Also a river of New South Wales, in the co. of Bathurst, which unites with the Summerhill creek, and forms a considerable affluent of the Macquarie. The locality of the gold-diggings first reported in the Bathurst district, extends along these streams downwards all the way to the Macquarie.

LEWIS, Saptin, or Great Snake, a river of the Oregon territory, which issues from a lake on the W flank of the Wind River mountains, near the Three Tetons; flows SW to Fort Hall, in N lat. 43° 4′, where it is joined by the Portneuf, and is 800 ft. wide. About 18 m. below the fort are the American falls; and 150 m. farther down, the Salmon falls. From these falls the river runs in a NW direction 70 m. to Fort Boisé, where it is joined by the Owyhee from the W, and Reid's river from the E. About 100 m. from Fort Boisé it receives the Salmon river, a stream 200 m. in length; and, after a further course of 50 m. to the N unites with the Kooskooskie, which rises near the head-waters of the Missouri, in the spurs of the Rocky mountains. From this junction the L. turns suddenly to the W; passes through the Blue mountains; and, after flowing 80 m. in a W course, empties itself into the Columbia, of which it forms the great S branch. It is only navigable at intervals, its course being much broken by whirlpools and rapids.

LEWIS (Saint), a headland of Labrador, on the N side of a bay of the same name, in N lat. 52° 30′.

LEWISBOROUGH, a township of Westchester co., in the state of New York, 130 m. S by E of Albany. The surface is irregular, and is drained on the W by Croton river. The soil consists of clay and sandy loam. Pop. in 1840, 1,619.

LEWISBURG, a village in Buffalo township, Union co., in the state of Pennsylvania, U. S., 67 m. N of Harrisburg, on the W bank of the Susquehanna, a little below the mouth of Buffalo creek. Pop. in 1840, 1,220.—Also a village of Greenbrier co., in the state of Virginia, 214 m. W of Richmond, and 9 m. E of the White Sulphur springs. Pop. 900.—Also a village of Mecklenburg co., in the state of Kentucky, 172 m. W by S of Frankfort, on the S bank of Green river.—Also a village of Marshall co., in the state of Tennessee, 54 m. S of Nashville.—Also a village of Cass co., in the state of Indiana, 81 m. N of Indianapolis, on the N bank of the Wabash river, and on the Wabash and Erie canal.—Also a village of Conway co., in the state and on the N bank of the Arkansas, 45 m. NW of Little Rock.

LEWISBURGH, a village in the p. of Kilgavower, co. Mayo, on the Lewisburgh rivulet, 5½ m. ESE of Clare island. It is a poor and deeply secluded place; but might become a prosperous fishing village, with the aid of a suitable harbour at the mouth of the rivulet. Pop. in 1841, 448.—Also a rivulet of co.

Mayo, which rises on the N side of the Farmnagar mountain, and runs NW to the Atlantic, a little below the village of Lewisburgh.

LEWISHAM, a parish of Kent, on the Ravensbourne, 5 m. SE of London. Area 5,220 acres. Pop. in 1831, 9,659; in 1841, 12,276.

LEWISTON, a township of Niagara co., in the state of New York, 297 m. W by N of Albany. It is bounded on the N by the Niagara, and intersected from E to W by a ridge of hills. The soil, consisting of calcareous and sandy loam, is generally fertile. Pop. in 1840, 2,533.—The village is on the E side of Niagara river, 7 m. from Lake Ontario. Pop. 900.

LEWISTOWN, a township of Lincoln co., in the state of Maine, U. S., 31 m. SW of Augusta, bordered on the W by Androscoggin river. Pop. in 1840, 1,801.—Also a village of Mifflin co., in the state of Pennsylvania, 57 m. NW of Harrisburg, on the N side of Juniata river, at the junction of Kishcoquillas creek, and intersected by the Pennsylvania canal. Pop. 2,058.—Also a village of Bloomfield township, Logan co., in the state of Ohio, 77 m. NW by S of Columbus, on the E side of Miami river.—Also a village of Fulton co, in the state of Illinois, 55 m. NW of Springfield, 4 m. E of Spoon river, and 12 m. W of Illinois river. Pop. about 200.

LEWISVILLE, a village of Henry co., in the state of Indiana, U. S., 42 m. E of Indianapolis, on the E side of Flat Rock creek.

LEWKNOR, a parish in Oxfordshire, 5½ m. SSE of Thame. Area 4,690 acres. Pop. in 1841, 847.

LEW-YANG-HEEN, a district and town of China, in the prov. of Hu-nan, div. and 42 m. E of Chansha-fu, in N lat. 28° 10′, E long. 113° 27′.

LEXDEN, a parish and village in Essex, 1½ m. W of Colchester. Area 2,440 acres. Pop. 1,454.

LEXEN, or LISZNICE, a village of Moravia, 21 m. NW of Olmutz. Pop. 360.

LEXHAM (EAST and WEST), two parishes in Norfolk, lying adjacent to each other, 6 m. NE of Swaffham. Area of East L., 1,600 acres. Pop. in 1831, 206; in 1841, 236. Area of West L., 1,140 acres. Pop. in 1831, 103; in 1841, 124.

LEXINGTON, a district in the central part of the state of S. Carolina, U. S., comprising an area of 900 sq. m., watered by Saluda river, an affluent of Broad river. Pop. in 1840, 12,111; in 1850, 12,930. Its cap., which bears the same name, is situated on a small branch of Saluda river.—Also a township of Somerset co., in the state of Maine, 63 m. N by W of Augusta. It has a fertile soil, and is watered by an affluent of Kennebec river. Pop. in 1840, 564.—Also a township of Middlesex co., in the state of Massachusetts, 11 m. NW of Boston. It is watered by branches of Shawsheen river, and in the vicinity of these is very fertile. Pop. 1,642.—Also a township of Greene co., in the state of New York, 28 m. W of Catskill. It has a mountainous surface, and is drained by Schoharie creek. Pop. 2,813.—Also the cap. of Rockbridge co., Virginia, 146 m. W of Richmond, situated on the W side of North river. Pop. 1,200. Washington college, and the Virginian Military institute, are situated here.—Also the cap. of Davidson co., in N. Carolina, 117 m. W of Raleigh.—Also the cap. of Oglethorpe co., in Georgia, 70 m. N of Milledgeville.—Also the cap. of Holmes co., in Missouri, 62 m. N of Jackson.—Also the cap. of Henderson co., in Tennessee, 117 m. WSW of Nashville, on Beech river, an affluent of the Tennessee.—Also the cap. of Fayette co., in Kentucky, on a branch of the Elkhorn, in N lat. 38° 6′, W long. 48° 18′, 24 m. ESE of Frankfort, 85 m. S of Cincinnati. Pop. in 1820, 5,279; in 1840, 6,997. It is one of the neatest and best-built towns in the Western states; and contains about 1,200 houses, and 10 churches. Among the public buildings are a courthouse, a jail, a masonic hall, the state lunatic asylum, and the halls of Transylvania university founded in 1798.—Also a township in St. Clair co., in Michigan. Pop. 500.—Also a township in Stark co., in Ohio. Pop. 1,637.—Also a township and village in Richland co., in Ohio, 56 m. NNE of Columbus. Pop. 400.—Also the cap. of Scott co., in Iowa, 89 m. S by E of Indianapolis.—Also the cap. of La Fayette co., in Missouri, 132 m. WNW of Jefferson. Pop. 2,354.

LEYDEN, in Dutch LEIDEN, an interesting old town of Holland, in the prov. of S. Holland, 17 m. N of Rotterdam, and 22 m. SW of Amsterdam, in N lat. 52° 9′ 5″, E long. 4° 29′ 5″, on the smallest deltoid branch of the Rhine. It is one of the largest cities of Holland, and inferior to none in the spaciousness of its streets, several of which are intersected by fine canals bordered with trees. The form of the town is oblong. Its length from E to W is about 2 m. Its pop., computed in the middle of the 13th cent. at 100,000; and in the 18th cent. at 48,000; was returned in 1837 at only 36,110; and in 1844 at 38,500. The canals that traverse the town form, by their various intersections, upwards of 50 petty islands, which are connected together by above 100 small bridges mostly of stone. The fortifications consist, as in other Dutch towns, of a low circular mound of earth, partly covered with turf, and partly faced with brick. Along this mound are shady walks under a double avenue of trees; and on the outside of it is a deep and broad moat, across which there are 8 bridges, leading to as many gates. The principal streets are broad, well-paved, and somewhat raised in the middle, so that no water can remain on them. One of the sewers is so large as to admit boats for the purpose of cleaning it. The Breade-straat or Broad-street, in which the stadthouse is situated, is one of the finest in Europe. It extends in the form of a crescent from one end of the town to the other, a distance of nearly 2 m.; and not only its public but its private buildings have an air of neatness and elegance. The private houses are for the most part of brick, with the gable-ends to the street in the old Dutch style: many of them are 5 or 6 stories high. Of public buildings, L. has few worthy of attention. The stadthouse, however, is a magnificent structure with a stone front, and surmounted by a number of spires. In the centre of the town is a very ancient castle or fort, traditionally considered as a work of the Romans. It rises above the tops of the highest houses, and affords an extensive view of the town and environs. The church of St. Pancras, which was dedicated in 1315, is of the usual Dutch form, and in length about 270 ft. The transepts measure about 226 ft. from N to S, far exceeding those of any English, and perhaps, with one or two exceptions, any European cathedral. The tower is a most extraordinary, ragged, and uncouth erection. St. Pancras was the last church in L. to retain the Catholic ritual, the first Reformed meeting not having been held there till July 25, 1574. St. Peter's church is of the usual ground-plan, with the addition of double aisles to the nave and a singular baptistery. Its length is about 300 ft.; the material, brick, dressed with stone. The whole fabric seems to have been rebuilt in 1339. The whole structure is flanked by two octagonal dying into circular turrets; but rising only to the bottom of the window is a huge lean-to, the remains of the enormous tower, and a famous seamark. The other public buildings of L. are the arsenal, the custom-house, and the hospitals.—The university of L. was formerly famous throughout Europe. It was founded in 1575, and has numbered many eminent men among its professors and students. The num-

ber of professors is 33. Most of the lectures are delivered in Latin. Their salaries, independent of a house and the small fees paid by the pupils, average somewhat more than £250. The number of students in 1835 was 647; in 1847, 439. The session, as in other Dutch colleges, commences in September, and terminates about the end of June. Attached to the university is a botanical garden, founded in 1593, and now containing 7 acres, a rich cabinet of natural history, an anatomical theatre, an observatory, an academy of design, and a library. In the last the manuscripts are said to form 10,000 volumes; the number of printed volumes in the library which contains the library of Vossius is about 40,000. L. contains a number of private collections of books and natural curiosities, has several learned societies, and altogether has much of the air of a university town. Though the academics wear no dress, they are easily enough distinguishable. The booksellers of L. make a respectable show with the works of their own professors and of those of Groningen and Utrecht. The buildings of the university, which are a good deal scattered about, bear no marks to distinguish them from any other public edifices; and the senate-house is only interesting from the authentic portraits it contains of many Dutch worthies, such as Salmasius, Boerhaave, Gomarus, and Arminius.—Letter-press printing, especially the printing of classical books, formerly a great branch of trade here, is now much reduced. L. was formerly the seat of a very extensive manufacture of fine woollens and linens, but the competition of other nations, especially the English, has of late years caused a decline from its pristine importance. It is still, however, regarded as the most important seat of these manufactures in Holland; and it is here that the great wool fair of Holland is annually held. An excellent opportunity is afforded by this gathering for seeing the various provincial inhabitants of Holland, who bring with them all their peculiarities of custom and costume. Besides the woollen and linen manufactures, there are also at L. extensive factories of indigo and soap, and large tanneries and salt-refineries. The town is connected by railroad with Haarlem and Amsterdam; and by canals with Haarlem, Delft, and the Hague.

History.] In the history of L., the most conspicuous event is the famous siege which it sustained in 1573-4 against the Spaniards under Baldis. It was to reward the brave and eventually successful resistance of the inhabitants that the university was erected in the following year; and the anniversary of the deliverance of L. is still commemorated by public rejoicings. In 1655, L. was visited by a plague which carried off 4,000 of its inhabitants; and in 1807 the explosion of a vessel laden with gunpowder destroyed 285 houses on the spot now occupied by a public square called Rapenbourg Among the distinguished individuals whom this place has produced, are Scaliger, Heinsius, Salmasius, Van Swieten, and the celebrated leader of the Anabaptists at Munster in 1634, commonly known by the name of John of Leyden. The country in the neighbourhood of L. is perfectly level, and, being too wet for tillage, is laid out in pasture. Butter and cheese are made in large quantities, both for home consumption and export. The immediate environs are thickly studded with villas, gardens, and pleasure-houses.

LEYDEN, a township of Franklin co., Massachusetts, U. S., 102 m. WNW of Boston. Pop. 632.—Also a township of Lewis co., New York, U. S., 15 m. S of Martinsburg. Pop. 2,438.

LEYDEN, an island situated off the NW coast of Ceylon, subordinate to Jaffnapatam, from which territory it is only separated by a narrow channel. Its length is about 13 m., by 2½ m. in breadth. It contains excellent pasture for cattle and horses; and produces paddy, cocoa-nuts, and the palmyra. It contains nearly 5,000 inhabitants. Its principal v. and port is Kayts. It is sometimes called Mandetivoe.—Also a small island in the Eastern ocean, near the coast of Java, 9 m. NE of Batavia.

LEYDENDORP, a village of Holland, 2 m. E of Leyden. Pop. 1,100.

LEYDER-DAM, or Leidschendam, a town of Holland, in the prov. of S. Holland, 3 m. E of the Hague. Pop. 1,800.

LEYLAND, a parish in Lancashire, 4 m. NW of Chorley, intersected by the Preston and Wigan railway. Area 17,950 acres. Pop. in 1831, 13,871; in 1841, 14,032. There are several cotton-spinning mills in this p., which comprises the chapelries of Euxton and Heapy.

LEYNI, a town of Piedmont, in the prov. and 9 m. NE of Turin. Pop. 3,090.

LEYPUNI, a village of Poland, in the obwod and 20 m. E of Seyny. Pop. 250.

LEYRE, a river of France, formed by the union of the L. of Luxey and the L. of Pissos, in the dep. of Landes. The united stream flows in a NNW direction to the gulf of Arcachon.

LEYRIA. See Leiria.

LEYSELE, a canton and village of Belgium, in the prov. of W. Flanders, arrond. of Furnes. Pop. 2,098.

LEYSSE, a river of Savoy, rising to the NNE of Chambery, and flowing into the lake of Bourget after a course of 15 m. from S to N.

LEYTA, or Leyte, one of the southernmost of the Philippine islands, to the SSW of Samar, between the parallels of 9° 50′ and 11° 35′. It is 120 m. in length, by 38 m. in average breadth. The soil is fertile; and the mountains abound in deer, cows, wild hogs, and fowls. The island is intersected by a chain of mountains which runs in a direction NW and SE; and so materially do they influence the climate, that the seasons differ entirely on the different sides of this mountainous region. The inhabitants were estimated in 1837 at 92,175, who pay tribute in wax, rice, or cloth.—It has a town of the same name, situated in a bay on its N coast.

LEYTHA. See Leitha.

LEYTON, a parish and village of Essex, 5 m. NE of London. Area 2,820 acres. Pop. in 1831, 3,233; in 1841, 3,274. The v. is pleasantly situated on the E bank of the Lea.

LEZ, or Les, a small river of France, in the dep. of Herault, which rises in the Cevennes; flows S; and, after a course of 20 m., falls into the Mediterranean 2 m. SE of Montpellier.—Also a river in the dep. of Drome, which flows into the Rhine, near Mont-Dragon.

LEZA, a village of Spain, in the prov. and 24 m. SSE of Vitoria. Pop. 400.

LEZARA, a river of Spain, which rises 12 m. NW of Santiago, and flows into the bay of Corcubion after a course of 36 m.

LEZARDE, a river of France, in the dep. of Seine-Inferieure, which rises 3 m. N of Montevilliers, passes Harfleur, and joins the Seine, on the r. bank, 3 m. above Havre, after a course of 12 m.

LEZARDRIEUX, a canton, commune, and town of France, in the dep. of the Côtes-du-Nord, and arrond. of Lannion. The cant. comprises 6 com. Pop. in 1831, 13,485; in 1841, 13,592. The town is 17 m. ENE of Lannion, on the l. bank of the Trieux. Pop. 2,192. It has a custom-house, and possesses considerable trade.

LEZARO, a river of Spain, in Galicia, an affluent of the Corcubion.

LEZAT, a commune and town of France, in the dep. of the Ariège and cant. of Tossat, 19 m. NW of Pamiers, on the l. bank of the Lèze. Pop. in 1841, 2,934. This town is of considerable antiquity, and formerly gave its name to a small territory.

LEZAY, a canton, commune, and town of France, in the dep. of the Deux-Sevres, and arrond. of Melle. The cant. comprises 10 com. Pop. in 1831, 11,769; in 1841, 11,838. The town is 8 m. ENE of Melle,

on the Dive. Pop. 2,342. It has manufactories of linen and cordage, and several brick, tile, and lime-kilns.

LEZAYSK, a town of Galicia, in the ldgb. of Lemberg, circle and 26 m. NE of Rzeszov, on the l. bank of the San. Pop. 3,288.

LEZENNES, a commune of France, in the dep. of the Nord, and cant. of Lille. Pop. 1,051. It has manufactories of several kinds of silk and linen fabrics, and of beet-root sugar.

LEZIGNAN, a canton, commune, and town of France, in the dep. of Aude, and arrond. of Narbonne. The cant. comprises 17 com. Pop. in 1831, 8,863; in 1841, 9,794. The town is 14 m. W of Narbonne, and 23 m. E of Carcassonne. Pop. in 1841, 2,268.

LEZINI, a lake of Greece, in Livadia, in the nom. of Acarnania, 23 m. SW of Vrachori, near the Ionian sea, and opposite the island of Ithaca. It is 5 m. in length, and 2 m. in breadth.

LEZO, a town of Spain, in the prov. of Guipuzcoa, partido and 6 m. ESE of San Sebastian, on the brow of Mount Jaizquivel, near the gulf of Gascogny. Pop. 730. It is well-built, has well-paved streets, and contains a fine square and a magnificent church. It has a small port, and possesses extensive fisheries.

LEZOUX, a canton, commune, and town of France, in the dep. of the Puy-de-Dôme, and arrond. of Thiers. The cant. comprises 12 com. Pop. in 1831, 11,780; in 1841, 12,350. The town is 9 m. WSW of Thiers, and 5 m. from the r. bank of the Allier. Pop. 3,601. It has a fine square and an hospital, and possesses a considerable trade in corn and hemp.

LEZUZA, a town of Spain, in the prov. of Albacete, and partido of Roda, at the foot of the mountains of Alcaraz, and 90 m. ENE of Ciudad-Real. Pop. 2,451. It has a parish-church, a custom-house, and an elementary school, and possesses two tile-works and a fulling-mill.

LGOV, a district and town of Russia in Europe, in the gov. and 41 m. W of Kursk, on the l. bank of the Sem. Pop. 900. The district which lies in the NW part of the gov. produces large quantities of grain and hemp, and has large herds of cattle.

LHASSA. See Lassa.

LHONAR, a town of Hindostan, in the prov. of Berar, district and 12 m. SSW of Maihker, and 84 m. ENE of Aurungabad, near a small salt lake.

LHOTKA, a village of Bohemia, in the circle and 8 m. ESE of Pilsen. It has several paper-mills.

LHUIS, a canton and commune of France, in the dep. of the Ain and arrond. of Belley. The cant. comprises 12 com. Pop. in 1831, 7,854; in 1841, 8,014. The village is 18 m. from Belley.

LIAKA (Point), a headland of the island of Cephalonia, on the S coast, in the district of Livato, in N lat. 38° 5′, and E long. 20° 35′.

LIAKHIK, a bay of Russian America, on the SE coast of the island of Kadiak, in the group of the Aleutian islands. On its banks is the principal establishment in the island.

LIAKHOV. See Siberia (New).

LIAKURA, or Likeri, a mountain of Greece, in Livadia, in the nom. of Bœotia, 18 m. WNW of Lebadea, and 70 m. WNW of Athens, in N lat. 38° 29′, and E long. 22° 34′. It forms part of the great Hellenic chain which separates the basin of the Archipelago from that of the Ionian sea, and lies between the Mavropotamo, on the N, and the Sizaliska, on the SE. This mountain, the highest peak of the *Parnassus* of the ancients, rises to the height of 7,982 ft. above sea-level, and is one of the loftiest in Greece. On the NE it is connected with Mount Œta, and on the SW with Mount Helicon. On its SW flank is the v. of Kastri, and in its vicinity the fountain of Castalia; and about an hour to the SE of Kastri is the v. of Arachova, at an alt. of 3,533 ft. above sea-level. See Kastri. Two roads lead from Arachova, one towards Delphi, the other to the Corycian cave and the summits of Parnassus.

LIAMONA, a river of Corsica, which has its source near Mount Rotondo, and, after a course to the SW of about 30 m., falls into the Mediterranean 12 m. N of Ajaccio. This river gave its name to one of the two departments into which Corsica was divided in 1793. It bears, in the upper part of its course, the name of Grosso.

LIANCOURT, a canton, commune, and town of France, in the dep. of the Oise and arrond. of Clermont. The cant. comprises 23 com. Pop. in 1831, 10,047; in 1841, 9,770. The town is 5 m. SSE of Clermont, and 20 m. ESE of Beauvais, near the Brèche. Pop. in 1841, 1,364. It consists of 4 principal streets, which meet in an extensive market-place, and contains a fine church, a castle—formerly a magnificent edifice, but to a great extent destroyed at the Revolution—an hospital, and a geometrical school. It has extensive manufactories of carding machines, several of earthenware and hosiery, and several spinning-mills. Grain, legumes, and nuts, form its chief articles of trade.

LIANE, a river of France, in the dep. of Pas-de-Calais, which rises to the NE of Desvres, passes Isques, and forms the port of Boulogne after a W course of 21 m.

LIAZOMINSKOI, an island of Russia, in the White sea, off the coast of Archangel, at the mouth of the Dwina. It is 10 m. in length, and about 5 m. in breadth.

LIBAN, a village of Bohemia, in the circle of Bidschow, 6 m. SW of Gitschin. Pop. 560.

LIBAN, or Babi, an island to the N of Timor, in S lat. 8° 2′ 36″, E long. 125° 42′.

LIBANCABAYAN, an island of the Philippines, between Masbate and Samar, in N lat. 12° 4′.

LIBANUS. See Lebanon.

LIBAU, a sea-port of European Russia, in the gov. of Courland, on the Baltic, near a lake of the same name, in N lat. 56° 31′ 36″, E long. 20° 55′ 20″. It has only one good street, and the greater part of the houses are of wood. Pop. 10,110. Its port is small, but of easy access. It exports the produce of the surrounding country, hemp, linseed, &c. At the port of L. 232 vessels cleared inward, and the same number outwards, during 1849. Of these 88 were Russian, 81 Dutch, 31 Norwegian, 18 English, 6 French, 5 Danish, 1 Prussian, 1 Mecklenburg, and 1 Argentine. They were despatched as follow: 122 vessels to Holland, 44 to Russian ports, 35 to England, 13 to France, 6 to Denmark, 5 to Norway, 2 to South America, &c. The exports from L. during 1849 were as follow: Rye, 75,830 chet.; barley, 74,460 chet.; wheat 2,379 chet.; oats, 23,088 chet.; linseed, 26,259 chet.; hempseed, 255 chet.; pease, 4,200 chet.; sowing seed, 1,684 casks; flax, 5,282 berkow; tow, 677 b.; hemp, 142 b.; and bones, 1,184 b.; besides timber, and grain, and provisions for account of the Crown, which are not inserted in the returns. This town was a place of trade so early as the 13th cent.; but it afterwards suffered severely from the wars which the Swedes carried on in this quarter. Pop. 5,000.

LIBBERTON, a parish in Lanarkshire, 3 m. ESE of Carnwath. Area 8,700 acres. Pop. in 1841, 796.

LIBBESDORF, a village of Anhalt-Dessau. Pop. 450.

LIBBIANO, a village of Tuscany, 34 m. SSE of Pisa.

LIBENZ, a village of Bohemia, 27 m. ESE of Elnbogen. Pop. 300.

LIBERIA, a recently organized and recognised republic on the western shores of Tropical Africa, midway between Sierra Leone and Cape Palmas. It originated in an immigration of free or liberated people of colour from the United States under the auspices of the American Colonization society. A handful of free Blacks sent out in 1820, which, in spite of many sinister forebodings, has become the nucleus of a state of considerable extent, with which the governments of Great Britain and France have concluded treaties of trade and commerce; and which promises to exert a powerful influence in suppressing the slave-trade, and planting civilization and Christianity in Africa. In a tract published by the Massachusetts Sabbath School society, we are informed that "not only has the establishment of L. been the means of thoroughly annihilating the slave trade along the extensive line of coast [about 400 m., with a mean depth of 40 m. inland] which it now occupies, but its influence has been faithfully and unceasingly exerted to the same end. Already many of the barbarous African chieftains, whose rule was a system of the most degrading tyranny over their unhappy subjects, have been brought into amity with the republic, on the terms of consenting to forego their inhuman slave-hunts, and have become citizens of L., thus affording the most effectual barrier against any revival of the slave-trade on this part of the coast. It appears from comparing the census of 1843 with the number added since that time, that the pop.—consisting of emancipated slaves and free coloured people from the United States, Africans rescued from slave traders, and their children—is 6,343. Of the native tribes who have placed themselves under the jurisdiction of the republic and look to its government for protection, no census has been taken; but from the best information that can be obtained, they cannot be fewer than 200,000; and are probably more. A small part of these—perhaps 2,000 or 3,000—have become so far civilized that the heads of their families are admitted to all the rights of citizenship, and vote at elections. The others are beginning to advance in civilization in proportion to the opportunities they have had to acquire it. The Liberian government does not require them to remove from the country, though it has bought their lands; but allows them to remain and become citizens. In 1843, there were in Liberia 16 schools, having 562 scholars; of these 192 were children of native African parents, and there were some of them in every school except two. There were then 23 places of worship, with 1,474 communicants, of whom 1,014 were emigrants from America and their children, and 469 were native Africans who had been converted from heathenism. Of the latter, 116 were of those who had been rescued from slave-traders, and 353 were natives of that region. Emigrants, on their arrival, are at once admitted to all the rights of citizenship. Each receives gratis a town-lot, or 5 acres of land suitable for farming, and if he has a family, a larger quantity in proportion to the number dependent on him."

Productions.] The natural resources of L. are considerable, and are steadily in process of development. Palm-oil is produced by the nut of the palm tree, which grows in the greatest abundance throughout Western Africa: about 150,000 dollars' worth were shipped from L. in 1847. The demand for it, both in Europe and America, is daily increasing, and there is no doubt it will ere long become the most important article of trade. Cam-wood, red-wood, bar-wood, and other dye-woods, are found in great quantities in many parts of the country. About 30 m. E of Bassa cove is the commencement of a region of unknown extent where scarcely any tree is seen except the cam-wood. This boundless forest of wealth, as yet untouched, is easily accessible to that settlement; roads can be opened to it with little expense, and the neighbouring chiefs will give their co-operation to a measure so vastly beneficial to themselves. One Liverpool house imported 600 tons in a single year, worth about 50,000 dollars. Ivory is procurable at all points, and constitutes an important staple of commerce: it is supposed that from 150,000 to 200,000 dols.' worth is annually exported. Gums of different kinds enter largely into commercial transactions: the house referred to above imported in three years into Liverpool, of gum-senegal nearly 600,000 dols. Dyes of all shades and hues are abundant. Gold, which is found at various points of the coast—from the Gambia to the Bight of Benin, and probably to a much greater extent—is obtained by the natives by washing the sand brought down from the mountains by the rivers. Besides these articles of commerce, may be specified wax, hides, horns, pepper, ginger, arrow-root, ground nuts, copper, mahogany, teak, and Gambia wood. Cotton of a very beautiful staple, yielding two crops a-year, is indigenous, and thrives for 12 or 14 years in succession without renewal of the plant. Coffee of a superior quality is raised in L., and can be cultivated with great ease to any extent. It bears fruit from 30 to 40 years, and yields 10 lbs. to the shrub yearly. Sugar-cane grows in unrivalled luxuriance, and as there are no frosts to be dreaded, can be brought to great perfection. Indigo, caoutchouc, tamarinds, limes, oranges, lemons, pine-apples, guavas, the castor-oil plant, and many other articles which are brought from tropical countries to this, might be added to the foregoing list. Indeed there is little in the fertile countries of the East or West Indies which may not be produced in Western Africa.—The pop. is upon the whole well-disposed to work, and the rate of wages per day is about 1s. It is an extraordinary feature of this part of the coast that horses and other draught animals will not live, and hence every kind of transport, except that upon the rivers, is performed by manual labour. Much of the cam-wood which is exported from Liberia is brought a distance of 200 m. on men's backs. At Monrovia, the port and cap., the pop. amounts to about 9,000. A large portion of the territory has been accurately surveyed, and is sold in sections by the government, at from 50 cents to 1 dollar per acre.

Climate.] The climate of L., although more healthy than Sierra-Leone, is still deadly to the European; but the improvement it has undergone during the last ten years from the effect of clearing, drainage, &c., is stated to have been most remarkable. The coloured immigrants from America, who used invariably to suffer fever on their arrival, are now able to go to work at once.

Government.] The government of the country is precisely on the American model, consisting of a president, a vice-president, a senate, and house of representatives, the number of members in the former being 6, and in the latter 28. The possession of real estate to the value of 30 dollars is the electoral qualification. Slavery and the slave-trade are perpetually abolished in the republic by the 9th art. of its treaty with Great Britain in 1848. The revenue, which was in 1842 about 20,000 dollars, is derived entirely from an *ad valorem* duty of 6 per cent. on imports, and the produce of land-sales. Ardent spirits, the use of which it is sought to discourage, form an exception, and are taxed 25 cents per gallon. The principal trade is carried on by barter, but there is a small paper circulation of about 6,000 dollars, redeemable on demand.—The government of this infant republic already evinces desire for aggrandize-

ment of territory. With this view it recently purchased New Cestos on the S, and is endeavouring to secure by purchase the mouths of the river Gallinas on the N. This policy has already involved the nascent state in much hostility with native chiefs which might easily have been averted; and the consequent expenses of government have prompted the imposition of a tariff so high as to be injurious to legitimate trade.—The organization of the republic as an independent state took place in July 1842, when Mr. Roberts, who had formerly acted as governor under the Colonization society, was elected president.

LIBERTON, a parish of Edinburghshire, 2 m. SSE of Edinburgh. Area 4,140 acres. Pop. 3,450.

LIBERTY, a county in the SE part of Georgia, U. S. Area 660 sq. m., bounded on the SE by the ocean; on the SW by the Altamaha. Pop. in 1840, 7,241; in 1850, 7,859.—Also a township in Waldo co., Maine, 20 m. E of Augusta. Pop. 895.—Also a township of Sullivan co., New York, 119 m. SW of Albany. Pop. 1,569.—Also a township in Steuben co., in New York.—Also a township in Tioga co., in Pennsylvania. Pop. 1,128.—Also a township in Adams co., in the same state. Pop. 773.—Also a township in Columba co., in Pennsylvania. Pop. 1,328.—Also a township in Susquehanna co. Pop. 554.—Also the cap. of Bedford co., in the state of Virginia, 142 m. W by S of Richmond. Pop. 375.—Also the cap. of Casey co., in Kentucky, 69 m. S of Frankfort.—Also a township in Adams co., in Ohio. Pop. 1,498.—Also the name of several other townships in the state of Ohio, of which the principal are in Butler co., in Clinton co., Crawford co., Delaware co., Fairfield co., Guernsey co., Hancock co., Harden co., Highland co., Jackson co., Knox co., and Licking, Logan, and Seneca cos.—Also the cap. of Union co., in Iowa, 72 m. E by S of Indianapolis. Pop. 500.—Also the cap. of Clay co., in Missouri. Pop. 1,127.—Also the cap. of Amite co., in Mississippi, 101 m. SSW of Jackson.—Also the name of numerous townships and villages throughout the United States, especially in Missouri, Michigan, Arkansas, and Iowa.

LIBETHEN, or Libeth-Banya, a town of Hungary, 122 m. E by N of Vienna, in the com. of Sohl, 9 m. E of Neusohl. Pop. 1,389. It has rich mines of copper and iron, and springs of blue vitriol.

LIBIADA, a village of Turkey, in Romelia, 48 m. ESE of Salonica, on the S coast of the gulf of Orfano.

LIBIN, or Libyna, a village of Bohemia, 6 m. NE of Luditz. Pop. 150.

LIBLIN, a village of Bohemia, 15 m. NNE of Pilsen.

LIBOBO, a small island in the Eastern seas, on the SE coast of Gilolo, in S lat. 10° 48′.

LIBOCH, a village of Bohemia, 4 m. NW of Leitmeritz, on the r. bank of the Elbe.

LIBOCHOWITZ, a town of Bohemia, on the Egra, 8 m. SSW of Leitmeritz, on the l. bank of the Eger. Pop. 1,249.

LIBOLO, a district of Lower Guinea, to the N of Benguela, skirted by the Coanza on the N, and the Ganga on the E.

LIBOS, a town of France, in the dep. of Lot-et-Garonne, cant. and 1 m. SW of Fumel, on the r. bank of the Lot. Pop. 850.

LIBOURNE, an arrondissement, canton, and com. of France, in the dep. of La-Gironde.—The arrond. has an area of 128,589 hectares; and comprises the cantons of Branne, Castillon, Contras, Sainte-Hoy, Fronsac, Guitres, L., Lussac, and Pujols. Pop. in 1841, 106,659.—The cant. comprises 10 com., and had a pop. of 20.280 in 1841.—The com. is situated near the junction of the Isle and the Dordogne, in N lat. 44° 55′ 2″, W long. 0° 15′ 29″. Pop. in 1821, 8,349; in 1846, 8,943. It is regular and well-built, and contains extensive barracks, with several other public buildings. Its trade consists chiefly in the export of wine and brandy; but it has some manufactures of light woollen stuffs, and also glass-works. There is a railway from Bordeaux to L.; and from L. to Angouleme.

LIBTAKO, a considerable town of Sudan, in N lat. 14° 40′, E long. 0° 30′, 335 geog. m. NW of Sakatu, and 240 m. SE of Timbuktu, first visited by a European in the person of Dr. Barth, who reached it, on his journey from Kashna to Timbuktu in 1853.

LIBYA (Desert of). See Sahara.

LICH, a town of Hesse-Darmstadt, in Upper Hesse, 42 m. NE of Mentz. Pop. 2,980.

LICHANA, an oasis and village of Algeria, in the Northern Zab, to the SW of Zaatcha. It is said to contain 50,000 palm-trees, and a village with 1,800 inhabitants. Its inhabitants have opposed a vigorous resistance to the French.

LICHANE, a village of France, in the dep. of Basses-Pyrenees, cant. and 1 m. SW of Mauleon. Pop. 350.

LICHBOROUGH, a parish in the co. of Northampton, 6 m. NW of Towcester. Area 1,580 acres. Pop. in 1831, 415; in 1841, 408.

LICHET (Maltravers), a parish in the co. of Dorset, 6 m. SW by W of Wimborne-Minster. Area 2,580 acres. Pop. in 1831, 680; in 1841, 817.

LICHET (Minster), a parish in the co. of Dorset, 4½ m. NE by N of Wareham. Area 3,660 acres. Pop. in 1831, 505; in 1841, 858.

LICHFIELD, or Litchfield, a parish in the co. of Southampton, 4½ m. N of Whitchurch. Area 2,900 acres. Pop. in 1831, 82; in 1841, 94.

LICHFIELD, a city and county in itself, the seat of the see of Lichfield, in the hund. of Offlow, co. of Stafford, 110 m. NNW of London, 16 m. N of Birmingham, and 16 m. SE by E of Stafford, on a stream tributary to the Trent, in the line of the Wyrley and Essington canal, and about 1 m. SW of the Stafford and Rugby railway. Area 3,180 acres. Pop. in 1801, 4,712; in 1821, 6,075; in 1831, 6,499; in 1841, 6,761. The town is agreeably situated in an open vale surrounded by fertile hills of moderate height. It is irregular in form, several of its most populous streets stretching to a considerable distance in different directions from the main body of the town. The market-place was graced in 1838 by a statue of Dr. Johnson, who was born at L., in a house opposite the site of the statue. The principal public edifices in L. are the cathedral, churches and chapels, guild-hall, jail, house-of-correction, market-house, and a small theatre.—The cathedral, one of the noblest religious fabrics in the empire, is situated in a spacious area, surrounded by numerous elegant mansions. The extent of the whole cathedral from E to W is 411 ft., and from N to S 167 ft. It has three spires, one in the centre of the building, and 258 ft. in height, and the others at the W end, 183 ft. high. The body of the cathedral is lofty and spacious, supported by pillars, formed by numerous slender columns with foliated capitals. The length of the body, from the great W door to the choir, is 213 ft., its breadth 153 ft.; the breadth of the aisles 66 ft., and the height of the nave 60 ft. The bishop's palace stands at the NE corner of the close. The deanery-house is to the W of the palace. The dio. of L. formerly extended over the cos. of Derby and Stafford, excepting the ps. of Brome and Clent in the latter; and over the greater part of Warwick, and nearly the half of Salop. By order in council in 1836, the archd. of Coventry was transferred to the dio. of Worcester, and the dio. appointed to be hence-

forth called 'the diocese of Lichfield;' that part of the archd. of Salop which is in the dio. of L. has also been transferred to Chester; and that part of the peculiar jurisdiction of Bridgnorth which is in this dio. to Hereford. The total number of benefices in the dio. of L. in 1838 was 491. The average gross yearly income of the see, for three years ending 31st Dec. 1831, was £4.375; net yearly income, £3,923. The average net income of the dean and chapter, or corporation of the cathedral, as a corporation aggregate, during the same three years, was £1,311.—The income of the borough under the new municipal regime, in 1839, was £2,157; in 1847, £1.330. The city returns 2 members to parliament. Under the Reform boundary act the close was added to the limits for parl. purposes, and the pop. of the parl. borough in 1841 was 6,761; in 1851, 6,573. The number of electors registered for 1837 was 878; for 1848, 704. L. has been celebrated for its ale. There are here a considerable number of malt-kilns, several extensive coach and harness manufactories, a flax-mill, and a paper-mill; and carpets and sheeting have been extensively manufactured. About one-half of the inhabitants are employed in trade and manufactures. —The rise of the town is intimately connected with the erection of the see and cathedral. During the parliamentary war, L. suffered much from its attachment to the royal cause, and was alternately in the hands of the parliamentary and royalist party.

LICHTAERT, a commune and village of Belgium, in the prov. of Brabant, cant. of Herenthals. Pop. 1,508.

LICHTEN, a village of Moravia.

LICHTENAU, a town of the electorate of Hesse, 13 m. SE of Cassel. Pop. 1,460.—Also a town of Baden, in the Middle Rhine circle, bail. and 6 m. NE of Rheinbischofsheim, on the Acher. Pop. 1,272. —Also a town of Prussian Westphalia, in the reg. and 47 m. S of Minden. Pop. 1,525.—Also a Moravian settlement in Greenland, in the district of Julianshaab, 90 m. NW of Cape Farewell.—There are several small places of the same name in Germany.

LICHTENBERG, a town of Bavaria, in the circle of Upper Franconia, 12 m. NW of Hof. Pop. 900. —Also a village of France, in the dep. of Bas-Rhin, 14 m. NNE of Saverno. Pop. 1,010.—Also a principality in the S of Rhenish Prussia, ceded to Prussia in 1834 by the duke of Saxe-Coburg-Gotha. It has the principality of Birkenfeld on the NW; the seigniory of Meissenheim on the NE; Bavaria on the SE; and the Prussian regency of Treves on the SW. Its surface is mountainous; and it is watered by the Nahe, the Stein-Alb, and the Blies.

LICHTENFELS, a town of Bavaria, circle of Upper Franconia, on the Maine, 20 m. NNE of Bamberg. Pop. 2,105. The railway from Nurnberg to Neumarkt has a station here.

LICHTENSTADT, a town of Bohemia, 9 m. NE of Elnbogen. It has tin and silver-mines. Pop. 1,000.

LICHTENSTEIG, a town of Switzerland, in the cant. of St. Gall, on the r. bank of the Thur, 27 m. E of Zurich. Pop. 875.

LICHTENSTEIN, a principality in the SW of Germany, lying between Tyrol, the Vorarlberg, and Switzerland. Pop. 5,000.—Also a town of Saxony, in the circle of Zwickau, 14 m. WSW of Chemnitz. Pop. 2,960.

LICHTENVOORD, a town of Holland, in the prov. of Gelderland, 19 m. SE of Zutphen. Pop. 3,600.

LICHTENWALD, a village of Styria, in the circle and 15 m. S of Cilly, on the l. bank of the Save. Pop. 556.

LICHTERVELDE, a commune and town of Belgium, in the prov. of W. Flanders, 13 m. WSW of Bruges. Pop. 5,895.

LICHVIN, a town of European Russia, on the Oka, 28 m. S of Kaluga. Pop. 1,200.

LICK, a township in Jackson co., in the state of Ohio, U. S. Pop. 822.

LICKBLA, a parish in co. Westmeath, 3½ m. NW of Castle-Pollard. Area 8,837 acres. Pop. 2,394.

LICKERRIG, a parish in co. Galway, 3½ m. NW of Loughrea. Area 4,468 acres. Pop. 1,191.

LICKETSTOWN, a village in the p. of Portnascully, co. Kilkenny, near the l. bank of the Suir, 2¼ m. SW of Granny. Pop. in 1841, 137.

LICKFIN, a parish in co. Tipperary, 2¼ m. NE of Killenaule. Area 679 acres. Pop. in 1841, 548.

LICKING, a county in the state of Ohio, U. S. Area 666 sq. m. Pop. in 1840, 35,096; in 1850, 38,781.—Also a river in the state of Kentucky, which has its rise between the sources of the Kentucky and the Great Sandy; pursues a NW course through Kentucky for upwards of 145 m.; and, by a mouth 150 yds. wide, falls into the Ohio, directly opposite Cincinnati. It waters a fine, rich and well-inhabited country. In high water it swells to a respectable size, but in long droughts it nearly disappears below the limestone rocks which constitute its bed. It is navigable for 70 m.—Also a river in the state of Ohio, which rises in Licking co.; runs E; and empties itself into the Muskingum, opposite Zanesville. Near its mouth, and 4 m. above, are falls which afford many valuable mill-seats.—Also a township in Licking co., in Ohio. Pop. 1,215.

LICKING-CREEK, a township in Bedford co., in the state of Pennsylvania, U. S. Pop. 824.

LICKING-HOLE-CREEK, a river of Virginia, U. S., which runs into James river, in N lat. 37° 42′.

LICKMOLASSY, a parish in co. Galway, containing the town of Portumna. Area 12,112 acres. Pop. in 1831, 5,404; in 1841, 5,742.

LICKORAN, or Lacoran, a parish in co. Waterford, 4 m. NE by E of Cappoquin. Area 2,414 acres. Pop. in 1831, 529; in 1841, 635.

LICKY, a rivulet of co. Waterford, rising on the Drum mountain, at an elevation of about 700 ft. above sea-level, and flowing 9 m. WSW to the Blackwater.

LICONTA (Cape), a headland of Tripoli, on the coast of the gulf of Sidra, in N lat. 30° 56′, E long. 17° 50′.

LICORDIA, a town of Sicily, 7 m. SE of Calatigirone, on the Dirillo. Pop. 7,000.

LICOSA (Puenta della), a cape on the coast of Naples, in the gulf of Salerno, in N lat. 40° 14′, E long. 14° 54′. It was the *Posidium promontorium* of the Romans.

LICQUES, a town of France, in the dep. of Pas-de-Calais, cant. and 6 m. SSE of Guines. Pop. 1,576.

LID, or Lyd, a river of Devonshire, which falls into the Tamar, 4 m. from Tavistock.

LIDA, a small town of Russia, in the gov. of Grodno, 196 m. ESE of Königsberg. Pop. 2,000.

LIDDEL, a river of Roxburghshire, and of the W part of the boundary with England, which rises in a bog called Dead water, the source also at some miles' distance of the English Tyne; receives in the early part of its course many considerable feeders; runs 16 m. SW, swollen at different stages by the Hermitage, the Tweeden, the Blackburn, and the Tinnis, when it is joined, on its l. bank, by Kershope-water, the boundary, for 7½ m., with England. After its confluence with the Kershope, it continues its SW direction, becomes beautifully sinuous, and runs in a straight line 7½ m. to the Esk, dividing Castletown 2½ m., and Canobie in Dumfries-shire 5 m. from England.

LIDDES, a parish and village of Switzerland, in the cant. of Valais, circle of Entremont. Pop. 1,347, Catholics.

LIDDESDALE, a district of Roxburghshire, drained by the Liddel, taking its name from that stream, and identical, as to both limits and history, with the p. of CASTLETOWN: which see.

LIDDIARD-MILLICENT, a parish of Wilts, 3 m. NNE of Wootton-Bassett. Area 1,850 acres. Pop. in 1831, 406; in 1841, 564.

LIDDIARD-TREGOOSE, a parish of Wilts, 4 m. W by N of Swindon. Area 5,930 acres. Pop. 960.

LIDDINGTON, a parish in Rutland, 2 m. S by E of Uppingham. Area 2,020 acres. Pop. in 1831, 534; in 1841, 589.—Also a p. in Wilts, 4 m. ESE of Swindon. Area 2,280 acres. Pop 454.

LIDGATE, a parish in Suffolk, 6½ m. SE of Newmarket. Area 1,780 acres. Pop. in 1841, 450.

LIDHULT, a town of Sweden, in Smaland, 60 m. S of Jonkioping.

LIDKIOPING, a town of Sweden, in W. Gothland, near the influx of the river Lida into Lake Wener, 93 m. SW of Orebro. Pop. 1,900. A large fair is annually held here.

LIDLINGTON, a parish in Bedfordshire, 3½ m. W by N of Ampthill. Area 2,520 acres. Pop. 926. It has a station on the Bedford and Bletchley branch of the North-western railway.

LIDNEY, a parish of Gloucestershire, 10 m. S of Dean. Area 7,320 acres. Pop. 1,885.

LIDO-DI-PALESTRINA, a long and narrow island near Venice, to the S of Malamocco, with a small town of the same name, within the limits of the free port of Venice.

LIDO-DI-SOTTOMARINA, the most southern of the long narrow islands which separate the lagunes of Venice from the sea. It has a town of the same name, containing 2,600 inhabitants, within the limits of the free port of Venice. An embankment of freestone, 32 ft. thick, defends the coast next the Adriatic from the violence of storms.

LIDROMIA, or CHILIDROMIA, a small island of Greece, on the coast of Magnesia.

LIDS, a small island of Denmark, in the Baltic, near the S coast of Laaland, in N lat. 54° 41′.

LIEBAU, a town of Moravia, 14 m. NE of Olmutz. Pop. 3,260.—Also a town of Prussia, in the reg. and 34 m. SW of Liegnitz. Pop. 1,930.

LIEBEMUHL, a town of E. Prussia, on the Liebe, 76 m. SSW of Königsberg. Pop. 1,300.

LIEBEN, a village of Bohemia, on the r. bank of the Moldau, 5 m. NE of Prague. Pop. 1,000.

LIEBENAU, a town of Hesse-Cassel, on an island in the Diemel, 30 m. W of Gottingen. Pop. 589.—Also a town of Hanover, in the co. of Hoya, on the Aue, 6 m. SW of Nieuburg. Pop. 1,435.—Also a town of Bohemia, on the r. bank of the Moldau, 4 m. NE of Prague. Pop. 1,000.—Also a town of Bohemia, 18 m. NNW of Gitschin. Pop. 1,544.

LIEBENBURG, a village of Hanover, 18 m. SSW of Brunswick. Pop. 422.

LIEBENGRUN, a village of Prussia, in the reg. and 48 m. SE of Erfurt. Pop. 470.

LIEBENSTEIN, a village of Bohemia, in the circle and 23 m. W of Elnbogen. Pop. 550.—Also a v. in the duchy of Saxe-Coburg-Gotha, 6 m. SSW of Arnstadt. Pop. 270.—Also a v. in the duchy of Saxe-Meiningen, 18 m. SW of Gotha. Pop. 300.

LIEBENTHAL, a town of Prussia, in the reg. and 30 m. WSW of Liegnitz. Pop. 1,200.

LIEBENWALD, a town of Prussia, in the prov. of Brandenburg, 36 m. NNE of Potsdam, at the embouchure of the canal of Finow in the Havel. Pop. 1,800.

LIEBENWERDA, a town of Prussian Saxony, on the l. bank of the Schwarz-Elster, 38 m. NNW of Dresden. Pop. 1,400.

LIEBENZELL, or ZELL, a town of Würtemberg, on the river Nagold, 12 m. W of Stuttgard. Pop. 960.

LIEBEROSE, a town of Prussia, in Lower Lusatia, 27 m. SSW of Frankfort. Pop. 1,400.

LIEBERWOLKWITZ, a town of Saxony, in the bail. and 6 m. SE of Leipsic. Pop. 1,024.

LIEBISTORF, a commune of Switzerland, in the cant. of Freiburg, district of the Lake. Pop. 310, of whom 270 are Catholics.

LIEBLOS, a town of Hesse-Cassel, in the prov. of Hainau, circle of Gelnhausen. Pop. 952.

LIEBSTADT, a town of Prussia, in the reg. of Königsberg, 48 m. WSW of Prenzlow. Pop. 1,200.—Also a town of Saxony, in the bail. and 7 m. SW of Pirna. Pop. 600.

LIEBSTADTL, a village of Bohemia, 9 m. NNE of Gitschin. Pop. 560.

LIEBWERDA, a village of Bohemia, 18 m. E of Zittau. There are mineral springs in the vicinity.

LIECHINA, a town of Bosnia, in the sanj. and 18 m. NE of Bagna-Luka.

LIEDERTSWYL, a commune of Switzerland, in the cant. of Basle, circle of Waldenburg. Pop. 153.

LIEGE, a large and very important province of Belgium; bounded on the N by Holland and Limburg; on the E by Rhenish Prussia; on the S by the grand duchy of Luxemburg, and the Belgic prov. of Namur; and on the NW by S. Brabant. Its superficial extent is 1,100 sq. m. Pop. in 1815, 361,438; in 1845, 438,077. The aspect of the country is that of an undulating plain, except in the S and E, where it is hilly, and covered with extensive forests bordering on the forest of Ardennes, and partaking of its rugged and barren soil, a great proportion being waste land. The principal river that traverses the prov. is the Meuse or Maese. Of the subordinate streams, the most considerable are the Ourthe, the Aywaille, the Vesdre, and the Mehaigne. Most parts of the prov. are better adapted to pasture than tillage. In the Pays-de-Herve, in the NW of the prov., cattle are reared in large quantities; and it is principally here that the well-known Limburg cheese is made, the Pays-de-Herve having at one time formed part of Limburg. This cheese is exported to the extent of £140,000 per ann. The sheep are esteemed for their flesh, but their wool is of an inferior quality. The parts of the prov. where cultivation is carried on to most advantage are the districts of L. and Huy, particularly in what is called the Hesbaye, extending from St. Trond in Limburg, SE to L., and SW along the l. bank of the Meuse. These produce corn, and a little wine resembling the middling wines of Burgundy and Champagne. The farms range from 60 to 150 hectares; but leases are limited to 3, 6, or 9 years. Wheat is grown in the proportion of about 7 or 8-24th parts of the cultivated land; 8-24ths are in rye, and 5-24ths under oats.—The mineral productions of the prov. are abundant. The coal-mines are said to be worked to the extent of 1,200,000 tons annually; mines of alum, calamine, and zinc exist; and 58,832 tons of iron-ore were raised in 1851. The manufacturing industry of this prov. is likewise considerable; large quantities of woollens, hardware, and arms, are made and exported. The other exports are cheese, spa-water, timber, coal, and minerals.—This prov. sends 5 senators and 9 representatives to the chambers; and in point of jurisdiction is under the high court of L. The local or provincial assembly consists of 50 members; and the country is divided into the 4 arrondissements of L., Huy, Verviers, and Waremme; and was subdivided in 1838 into 22 cantons and 319 communes.—Before the French revolution this prov. was

subject to the bishop of L., a member of the Germanic body. The revenue of the bishopric exceeded £100,000 a-year, and it had a regular constitution; but the members of the states consisted almost entirely of the clergy and the nobles. In 1792 the French took possession of the whole bishopric, and retained it at the peace of Luneville. It formed the chief part of the deps. of the Lower Meuse, the Ourthe, and the Sambre and Meuse. On the fall of Buonaparte the bishopric underwent the same fate as the rest of the Netherlands, and was incorporated into that kingdom by the congress of Vienna. A portion of the duchy of Limburg, the co. of Dalhem, the principality of Stavelot, and some portions of Luxemburg, Brabant, and Namur, were incorporated with this prov. on its organization.

Liege [Germ. *Lüttich;* Dutch, *Luyk* or *Luik*], the capital of the preceding prov., and one of the most important and flourishing cities of Belgium, situated on the Meuse or Maese, in a pleasant valley, surrounded with cultivated hills, 13½ m. S by W of Maestricht, and 54 m. E by S of Brussels, in N lat. 50° 39′ 22″, E long. 5° 31′ 42″. The Maese, in its progress through this valley, is joined by the smaller streams of the Liege, the Ourthe, and the Ambleve; and on entering the town divides into a number of branches, which by their intersections form several insulated spots bordered with neat quays and connected by handsome bridges. L., including its 10 suburbs, contains about 8,000 houses, and in 1836 had 58,008, in 1845, 77,587 inhabitants; and before the buildings joined, was divided into an upper and lower town. The upper or old town stands on the declivity of a hill, and slopes to an arm of the Maese which separates it from the lower town. The latter is divided into two sections: the Isle, and the Quarter beyond the Maese. The form of the town is compact, being, exclusive of the suburbs, only 1 m. in length, and ¾ m. in breadth. The citadel stands at the NW corner; on the ESE is Fort Chartreuse; and the principal square is almost in the centre of the town. The chief suburbs are detached from the town. That of Maestricht is a double range of buildings, stretching along the l. bank of the river towards the N. The suburb of Valbarge is to the NW; that of St. Marguerites is to the S. L. presents very different appearances in different parts; some quarters have miserable streets, narrow, dirty, and thinly inhabited; others have broad streets, neat squares, quays, and promenades. In general, however, L. is an ill-built town, containing a number of gloomy streets and lanes entirely destitute of that cleanliness and neatness which marks most towns of the Netherlands. The loftiness of the houses contributes not a little to their gloom. The chief bridge, the Pont de l'Arche, is 153 yds. in length, and has 6 arches. A quay extends above and below this bridge the whole length of the town. The fortifications were formerly more considerable than they at present are. The public buildings are neither numerous nor interesting. The cathedral church of St. Lambert, built in the 8th cent., a Gothic edifice, by no means of elegant architecture, was destroyed by the French in 1794. The hotel-de-ville, which looks into the principal public square, is a large but heavy building of great extent. It was anciently the residence of the prince-bishops of L. It contains a public library. Before the French revolution, L., being an ecclesiastical government, had an extraordinary number of churches, abbeys, and convents; of these part remain, part are suppressed. Of the churches, the most remarkable is that of St. Jacques, completed in 1552. There are 21 Roman Catholic, and 1 Protestant church in the city. The other buildings and institutions entitled to attention are the theatre, the arsenal, and the university founded in 1816, with 4 faculties, and between 300 and 400 students, and a library of 62,000 vols. The fountains, particularly one near the centre of the great square, deserve the attention of the traveller. Among the educational establishments are an Episcopal seminary, a normal school, and a royal medical conservatory, with 300 pupils in 1839.

The inhabitants of L. are actively engaged in trade and manufactures. The great majority of the artisans work in their own houses, and of these the greater portion are in the suburban districts.—The principal products of the surrounding territory are coal, zinc, iron, lead, and alum; also tobacco in considerable quantities. L. has very extensive iron-works; and is particularly famous for its manufactures of cannon and muskets, fowling-pieces, and pistols. The number of arms manufactured in 1849 amounted to 405,030 pieces. The cannon foundry is maintained by government; but is also worked to supply any foreign demand. The manufactures of clock-work are also extensive; those of nails employ in the town and neighbourhood from 10,000 to 14,000 workmen. Steam-engines and machinery are largely produced here, and at the v. of Seraing, 2 m. to the SW. Hardware of all kinds, files, and bronze articles, are largely made; also woollen and cotton fabrics, serge, earthenware, glass, vitriol, and verdigris. Leather is very largely manufactured. The carrying trade is considerable, the town having a water-communication both with Holland and Germany.—The scenery of the environs is such as to counterbalance the gloom of the town, the ascent of most of the hills being covered with vineyards, while the lower grounds contain pleasant hop-gardens and corn-fields. The town and environs have frequently suffered considerably from the inundations of the Meuse, particularly in 1740, 1816, and 1850.

LIEGNITZ, a regency or government of Prussian Silesia, occupying the NW part of that country, and separated from Bohemia on the S by the Riesengebirge. Its area is 4,100 sq. m. Pop. in 1837, 836,318, of whom 706,005 were Protestants. It includes the former duchies and principalities of Glogau, Sagan, L., and Karolath, with part of those of Jauer and Upper Lusatia. This large and populous tract is divided into 19 circles, viz. Löwenberg, Jauer, Schönau, Bolkenhain, Landshut, Herschberg, Bunzlau, Goldberg, Liegnitz, Lüben, Glogau, Sprottau, Sagan, Freistadt, Grünberg, Görlitz, Rothenburg, and Hoyerswerda.—A great part of the surface is level, or intersected by hills of little elevation, consisting of sand or clay. Towards the S it rises into mountainous elevations. The soil is various, being in many places fertile, and producing corn in sufficient quantity for exportation; but the greater part is sandy. The climate is mild, and vines are reared in the E part of the regency. Forests are extensive throughout the whole, and timber forms an article of export. The pasturage is good, and the cattle numerous. The chief manufactures are of linen and woollen. The principal rivers are the Oder, on the N; the Bober, the Neisse, the Queis, the Schwartz-wasser, and the Katzbach.

Liegnitz, the capital of the above government, is situated at the conflux of the Katzbach, the Schwartz-wasser, and the Neisse, 40 m. W by N of Breslau, on the Berlin and Breslau railway, in N lat. 51° 12′ 48″, E long. 16° 9′ 47″. It is surrounded by an earthen mound planted with lime, mulberry, and chestnut trees, and has four gates, but is not fortified. The old palace of the princes, though within the town, is surrounded by a separate moat and high wall. The other remarkable objects in the town are the castle, the council-house, the public

school, the 2 Lutheran churches, the college formerly belonging to the Jesuits, the catholic church of St. John, and the superb Furstencapelle, in which the dukes of L. and Brieg are buried. There is an academy for the education of the sons of Silesian gentlemen, whether Protestants or Catholics, with 8 professors, and 111 pupils in 1836. L. has manufactories of woollen, cotton, and linen stuffs, of Prussian blue and starch; and carries on a considerable trade in madder. The pop. in 1837, including the suburbs, was 11,607; in 1846, 13,980. The town is ancient, and has repeatedly suffered from fires. On the 16th August, 1760, the king of Prussia obtained a victory over the Austrian general Laudohn, between this place and Parchwitz.

LIEGOS, a village of Spain, in the prov. and 50 m. NE of Leon. Pop. 171.

LIEN-CHING. See Leen-Ching.

LIENZ, or Luenz, a town of the Tyrol, situated at the conflux of the Isola and Drave, at an alt. of 407 toises = 867 yds., in N lat. 46° 47′ 50″. Pop. 2,000.—Upper L., in the neighbourhood, is a large village.

LIEPVRE, Lebereau, or Levrau, a commune of France, in the dep. of the Upper Rhine, cant. and 3 m. SW of Sainte-Marie-aux-Mines, on the Lebure. Pop. 1,898. It has a manufactory of calico, and possesses mines of silver, copper, lead, arsenic, and antimony.

LIER, a parish of Norway, in the diocese of Aggerhuus, and SE part of the bail. of Buskerud. Pop. 3,970.

LIER, or Lierre, a department, commune, and town of Belgium, in the prov. of Antwerp, arrond. of Malines. Pop. of dep. 13,351. The town is 10 m. SE of Antwerp, and 8 m. NNE of Malines, at the confluence of the Great and Little Nithe. Pop. 9,543. It is well-built, and has several churches, an asylum for aged women, and an hospital. It possesses several manufactories of silk, calico, printed muslins, and lace, several spinning-mills, numerous oil-mills, and breweries, distilleries of gin, several salt-refineries, and several tanneries. This town, which is very ancient, was considerably increased in size in 1385. It returns 3 members to the chambers.

LIERGANES, a town of Spain, in Old Castile, in the prov. and 8 m. S of Santander, and partido of Entrambas Aguas, in a narrow valley, on the l. bank of the Miera. Pop. 725. It has a parish-church, several chapels and convents, and a custom-house. It has an active trade in cattle, and in the environs are several iron-forges.

LIERGUES, a village of France, in the dep. of the Rhone, cant. and 4 m. NW of Anse, and 3 m. SW of Villefranche. Pop. 662. In the environs are quarries of fine marble.

LIERNAIS, a canton and commune of France, in the dep. of the Côte-d'Or, and arrond. of Beaune. The cant. comprises 15 com. Pop. in 1831, 8,600; in 1841, 8,877. The town is 31 m. WNW of Beaune. Pop. 1,184. The locality is noted for its wine.

LIERNEUX, a department and commune of Belgium, in the prov. and arrond. of Namur. Pop. of dep. 1,942; of com. 410.

LIERS, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. 340.

LIERSCHEBAEN, a commune of Belgium, in the prov. of Antwerp, and dep. of Konings-Hoyckt. Pop. 146.

LIERY, a commune of Belgium, in the prov. of Liege, and dep. of Retinne. Pop. 154.

LIESER, a river of Prussia, in the prov. of the Rhine, which has its source in the circle of the Daun, to the E of Kerpen; runs first S, then SE; and throws itself into the Moselle, on the l. bank, at a town of the same name, and after a course of 45 m. The town is 21 m. N of Trèves, and 3 m. WSW of Berncastel. Pop. 900.

LIESING, a village of the archduchy of Austria, in the lower circle of the Wienerwalde, 6 m. SW of Vienna, on a small river of the same name, an affluent of the Triesting.

LIESLE, a commune of France, in the dep. of the Doubs, cant. and 5 m. SW of Quingey, and 17 m. SW of Besançon. Pop. 1,037.

LIESSEL, a commune of Belgium, in the prov. of Antwerp, dep. of Gheel. Pop. 324.

LIESSIES, or Liesses, a commune and town of France, in the dep. of the Nord, cant. and 5 m. S of Solre-le-Château, on the Grande-Helpe. Pop. 1,015.

LIESTAL, or Lichstall, a circle and town of Switzerland, in the canton of Bâle, 10 m. SE of Bâle, on the l. bank of the Ergolz, and at an alt. of 1,084 ft. above sea-level. Pop. (Protestant) 2,462. It contains the ruins of the castle of Schauenburg, and has manufactories of gloves and paper, and of tin and iron ware. The surrounding locality produces wine and grain, and affords excellent pasturage.

LIETOR, a town of Spain, in the prov. of Albacete, and partido of Hellin, 23 m. S of Chinchilla, on a spur of the Sierra Ladera, and on the r. bank of the Mundo. Pop. 2,096. It has a parish-church, an hospital, a convent, and a custom-house, and has manufactories of linen cloth, and other woollen fabrics, and a fulling-mill.

LIETZEN, a village of Styria, in the circle and 33 m. NNW of Judenburg, on the l. bank of the Ens. Pop. 1,013.—Also a village of Prussia, in the prov. of Brandenburg, circle and NW of Frankfurt. Pop. 340.

LIEU (Le), a village of Switzerland, in the cant. of Vaud, circle of Pont, 18 m. WNW of Lausanne, on the W bank of the lake of Joux. Pop. 999, Protestants.

LIEU-KIEU, or Lu-Chu Islands—pronounced Du-Chu by the natives—a group tributary to China, lying between the parallels of 26° and 27° 40′ N, and the meridians of 127° 10′ and 129° 5′ E. We are indebted to the narrative of Su-poa-quang, a learned Chinese, who was sent hither from China in the quality of an ambassador in 1719, for our first certain information respecting these islands. Kæmpfer, indeed, had noticed them under the name of the islands of Lequeyo, but in an obscure and general manner. The missionary Gaubil introduced Su-poa-quang's narrative to the notice of Europe in the *Lettres Edifiantes*. It was reserved, however, for the officers commanding the British frigates, the Alceste and Lyra—which had gone out with Lord Amherst to China—to make us more particularly acquainted with these islands and their interesting inhabitants. The natives trace their history back to a period anterior to the Christian era, but they appear to have had no communication with the rest of the world till about A. D. 605, when they were discovered by the Chinese. Gaubil says that L. was not subjugated by China until seven centuries after this event, or about the 14th cent.; and he adds that before that time the principal island was divided into three political communities, whence it is called in some maps 'the Island of the Three kings.'

According to Gaubil, these islands form a sort of chain, or series of little archipelagoes, extending from Kiu-siu, the most southerly of the great islands of Japan, to the island of Formosa. There are in all 36, subject to the same government. To the S of Kiu-siu, there are seven small islands, and a large one called Tanaxima, belonging to the Japanese empire; and to the S of these, eight

others which belong to the king of L., called Ufu Chima, or 'the islands of Ufu.' The principal of this latter group is called Ufu in the country itself, and Ta-tao or 'the Great island,' by the Chinese. These islands are fertile and populous, with the exception of Kikiai, which however, like Ufu, contains forests of fine large cedars. On the SW of these is the Great L., which is about 50 m. long, and from 12 m. to 15 m. broad. The land rises with a gradual ascent from the sea-coast to about 500 ft. above sea-level, and in every part exhibits a pleasing picture of industry. All the rocky parts of this island are composed of a cellular or granular limestone bearing a great resemblance to coral; and the greater part of the island is surrounded by coral reefs. The *wang*, king, or regent resides at its S end, in the neighbourhood of the cap. called Kien-Ching, which has a port named Napa-ching at a distance of 5 m. This place—the SW point of the island—was found by the observations made on board the Alceste, to be in N lat. 26° 14′, and in E long. 127° 52′. The main body of the island extends N by E. To the W of this island there are 10 others, well-peopled and productive, with the exception of Lung-hoang-chu, or 'the Sulphur island,' so called from the quantities of that substance which it affords. On the E side of Formosa there are other 17 islands, all dependent on the L. regency.

The climate of these islands is one of the most propitious in the world. Refreshed by the sea-breezes which blow over them at every period of the year, they are free from the extremes of heat and cold, while there are none of those marshes which are so great a source of disease in warmer latitudes; and such is the combined felicity of soil and climate, that vegetable productions generally found in regions distant from each other grow here side by side. Yet it would appear that these islands do not raise sufficient grain for their own consumption, and often experience the horrors of famine. The orange and the lime, the Indian banyan and the Norwegian fir, the tea-plant and the sugar-cane, all flourish together. Rice, wheat, pease, sweet potatoes, melons, pine-apples, ginger, pepper, camphor, tobacco, grass, hemp, cotton, dye-woods, wood for fuel, silk, wax, and salt, are among the productions of these islands. The animals are oxen, sheep, horses, deer, pigs, cats, and winged game. Almost the whole animal creation here is of diminutive size, but all excellent in their kind; the bullocks seldom weigh more than 350 lbs., but are plump and well-conditioned, and their beef is very fine; goats and pigs are reduced in the same proportion. The insects are grasshoppers, dragon-flies, butterflies, honey-bees, wasps, mosquitoes, and spiders.

The inhabitants are of diminutive stature, the average height of the males not exceeding 5 ft. 2 in. according to Hall, or 5 ft. 5 in. according to Beechey; and the women being of corresponding stature. They have a good deal of the Corean physiognomy, with more mildness, and exhibit nothing of the drowsy and elongated eye of the Chinese; still however, as for the last thousand years or more they have been more or less under the influence of the Chinese religion, government, laws, and customs, they now present many points of agreement, and in fact differ very little from them. Not many years ago, a Lieu-kieu junk, on her voyage to Fo-kien, being driven to Macao, the Chinese of that place eagerly crowded on board, and hailed the crew as the descendants of the ancient Chinese, their dress and mode of pinning up the hair on the top of the head being the old costume of their countrymen before they were conquered and shorn by the Tartars. The narratives of Captain Hall and Mr. M'Leod are well calculated to make an impression on the mind of the European public highly favourable to the character and happy condition of these islanders; and the Chinese and Japanese agree in speaking of them as a cheerful and happy people; yet with all this, it seems evident that in their jealousy of strangers they are perfect Chinese. They have a priesthood of bonzes, who are generally educated in Japan; but have no state religion. Their books on religion, morality, and science are in the Chinese character, though their language is different; but for common purposes the Japanese letters are employed. A British naval officer who visited the Great L. island in October 1850 received a written statement from the regent, giving a brief outline of the relations of these islands to China and to Japan. "Ever since the Ping-han [the title of the former government of L.] was declared an hereditary kingdom under the Ming dynasty, and thus became tributary to China, whenever we convey our tribute to China"—this document proceeds—"we buy there silk-stuffs for official caps, and dresses, medicines, and other articles; this however would not suffice; but as the Tu-kia-ra [in L. pronounced Tuchárá, probably the Satiuma] islands belonging to Japan trade with the neighbouring countries, we procure from them rice, grain, timber, iron, copper, tea, and other things, but scarcely in sufficient quantity. Grain being scarce in our poor country, our daily diet consists of mere potatoes, of which we have not one catty too many. When visited by the calamities of a typhoon or drought, though we should desire to feed only moderately on the wild sago tree, still it would not suffice to appease our hunger; and we must therefore barter our black sugar, grass cloth, &c., for the rice and grain of these islands. We hear the laws of Japan severely prohibit promiscuous trading with other countries; only in the port of Chang-ki [Nagasaki], where officials are stationed to keep a strict watch, a fixed and limited number of ships as well as of goods are admitted, and Chinese and Dutch merchants yearly visit it for trade. The Tu-charese, although belonging to the Japanese territory, yet being near to us are permitted to trade with this place; but if, on their returning home, they should import forbidden goods by smuggling, if detected by the officials they would be severely punished. Should we now trade with you, the Tu-charese will, by Japanese laws, be strictly forbidden from having any dealings with us at all." The regent, as though fearing the worst result if the attempt were to be made, concludes as follows: "Look down in pity, and desist from wishing to trade with us." Hence it appears that the exclusive policy of Japan is relaxed in favour of L.; "but on condition that its 3,000,000 or 4,000,000 inhabitants are to be debarred from the advantage of trading with Europeans, and thus an important market is closed against our merchants. It is impossible," adds our informant, "not to wish most cordially success to the Americans in their expedition against Japan, and I will only add that the committee of the L. naval mission intends to take advantage of the opening prospect for the advancement of Christianity in that remote region, by sending out another missionary immediately to assist Dr. Bettelheim in his labours. Two junks annually leave the port of Napa in the island of L., for Fu-Chu-Fu in China. They arrive in the Min early in November, and leave on their return in June. They carry over the tribute, and money, &c., wherewith to purchase different articles. The privilege of dealing with the Lu-chuans is farmed from the mandarins of the provincial cap. of Fo-kien by 8 or 10 brokers or merchants, who reap from it no small advantage. They transact all their business, obtain the goods

that are wanted, and resell them of course at greatly advanced prices, and pretend to be the only persons in Fu-chu-fu who understand the L. dialect. Last year, 1850-51, they retailed British manufactured goods to the value of 150,000 dollars, consisting of woollens—viz. long ells, Spanish stripes, camlets, and lastings; and cotton shirtings, white and grey yarn, and some printed and fancy goods. They took in exchange copper and gold; the latter, square flat pieces of various standards, but all of low touch. Now this copper and gold comes from Japan, and the question arises where the goods go. My belief, founded on my inquiries and observations at L., is that the greater part goes to the Japan islands, if not to Japan itself; and if this should prove to be correct, it shows that a demand for British goods already exists in that quarter, and that in spite of the rigid exclusive policy of the government it is supplied to a limited extent in this circuitous manner."—The manufactures of the L. consist of paper, grass-cloth, coarse cottons, red pottery, porcelain, lacquered ware, tiles, pipes, hair-pins, wicker-baskets, and two sorts of spirits distilled from grain.

LIEURE, a river of France, in the dep. of Eure, which rises 1 m. ENE of Linns; runs SW; and flows into the Anatelle, on the l. bank, near Charleval, after a course of 12 m.

LIEUREY, a commune and town of France, in the dep. of Eure, cant. and 3 m. WSW of St.-George-du-Vievre. Pop. 2,682. It has manufactories of woollen and silk stuffs, Jacquard looms, and machines. Pop. 2,682.

LIEUSAINT, a village of France, in the dep. of Seine-et-Marne, cant. of Brie-Comte-Robert, 9 m. NW of Melun. Pop. 583.

LIEUTADES, a village of France, in the dep. of Cantal, cant. and 4 m. W of Chaudes-Aigues. Pop. 1,315.

LIEUX (Saint), a village of France, in the dep. of Tarn, cant. and 2 m. E of Realmont. Pop. 530.

LIE'VE, a river of Belgium, which rises in the NE of W. Flanders; flows into E. Flanders; and, 4 m. NW of Ghent, joins the canal from Bruges to Ghent, after a course of 21 m. from NW to SE.

LIE'VES (Ile aux). See Hare Island.

LIEZANSKA, a canton in the NE of Montenegro. Pop. about 12,000.

LIEZELE, a commune and village of Belgium, in the prov. of Antwerp, arrond. of Malines. Pop. 1,049.

LIFF AND BENVIE, a parish in the co. of Forfar, 4 m. W of Dundee. Pop. 3,948. A small part of the p. is in Perthshire.

LIFFA-MATULA, an island in the Molucca group, in N lat. 1° 50′, E long. 126° 30′. It is 25 m. in length, and 6 m. broad.

LIFFEY, or Anna-Liffey, a river of the cos. of Wicklow, Kildare, and Dublin. It popularly claims to have two sources, both in co. Wicklow; but these sources are only 1½ m. distant from each other; and the streams which issue from them form a junction, after a run of only 2 m. each, on the boundary of the parishes in which they respectively rise, and at an elevation above sea-level of 1,256 ft. The stream now flows 5 m. in the direction of NW by W, and then 3½ m. SW to the town of Blessington; it next runs SW, and ultimately N to the head of Dublin-bay at Ringsend. Its entire course, without reckoning sinuosities or minor windings, is about 47 m.; yet so extraordinary is its general sweep, that its source is situated exactly 10½ m. S by W of its embouchure. Its principal tributaries additional to the King's river and the Rye, are the Poddle, the Bradogue, and the Camoe; and it is joined at the commencement of its estuary by the Dodder on the S, and the Tolka on the N. It is affected by the tide over about 3½ m. from its mouth; but is navigable by sea-borne vessels only up to Carlisle-bridge in the city of Dublin.

LIFFOL-LE-PETIT, a village of France, in the dep. of Haute-Marne, cant. and 6 m. NE of St. Blain. Pop. 380.

LIFFORD, the assize town of co. Donegal, and formerly a parl. borough, on the E verge of the co., at the formation of the river Foyle by the rivers Finn and Mourne, 14 m. SSW of Londonderry, and 102 m. NW by N of Dublin. It consists principally of two streets. L. gives the title of Viscount to the family of Hewit. In 1767, James Hewit, Esq., was appointed lord-high-chancellor of Ireland; and respectively in 1768 and 1781, he was created Baron Lifford, and advanced to the dignity of Viscount Lifford. Pop. in 1831, 1,096; in 1841, 752.

LIFFRE', a village of France, in the dep. of Ille-et-Vilaine, 6 m. SW of St. Aubin. Pop. 2,100.

LIFTON, a parish in Devonshire, 3 m. E of Launceston. Area 6,480 acres. Pop. 1,784.

LIFUNE, a river of Lower Guinea, in the SW of Congo, which flows into the Atlantic, in S lat. 8° 15′.

LIGARDES, a village of France, in the dep. of Gers, cant. and 28 m. N of Auch. Pop. 652.

LIGAVEGRA, or Slieve-Russel, a mountain in the p. of Kinawley, 3 m. SE of Swanlinbar, co. Cavan. Its alt. is 1,279 ft. above sea-level.

LIGFORDRUM, a mountain on the border of the ps. of Leckpatrick and Ardstraw, co. Tyrone. Alt. above sea-level 1,348 ft.

LIGGERSDORF, a village of the principality of Hohenzollern-Sigmaringen, SW of Hausen.

LIGHT, a river of Australia, in the co. of Gawler, and NW of the river of that name.—Also a county in the same div. of Australia, bounded on the W by the co. of Gawler, and on the S by that of Adelaide.

LIGHTCLIFFE, a chapelry and hamlet in the p. of Halifax, W. R. of Yorkshire, 3½ m. E of Halifax, on the Manchester and Leeds railway.

LIGHTGRAVE, or Leagrave, a hamlet in the p. of Luton, Bedfordshire, 3 m. NE by E of Dunstable, on the Lea. Pop. in 1841, 411.

LIGHTHORNE, a parish in Warwickshire, 3½ m. N of Kington. Area 1,950 acres. Pop. 384.

LIGHTWOOD, a river of Tasmania, in the co. of Cornwall, which joins the Break-o'-day river, on the E confines of the p. of that name.

LIGINIAC, a commune of France, in the dep. of the Correze, cant. and 4 m. NE of Neuvic. Pop. 1,293.

LIGIST, a town of Styria, in the ldgb. and 13 m. SW of Gratz, on a small river of the same name. It has some iron-works.

LIGITAN ISLANDS, a group of islands in the Celebes sea, off the E coast of the island of Borneo, between Darvel and S. Lucia bays, in N lat. 4° 19′, E long. 118° 33′. The principal island of the group is about 6 m. in length.

LIGNAC, a commune of France, in the dep. of the Indre, cant. and 7 m. SSE of Belabre, and 15 m. SSE of Le Blanc. Pop. 1,635.

LIGNE, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Tournai. Pop. of dep. 1,008. The v. is 15 m. E of Tournai, on the l. bank of the Dendre. Pop. 548. It has a large brewery, a distillery, and a bleachery, and possesses a considerable trade in linen and flax. It formerly bore the title of a principality.—Also a canton and commune of France, in the dep. of the Loire-Inferieure, and arrond. of Ancenis. The cant. comprises 4 com. Pop. in 1831, 7,676; in 1841, 7,490. The town is 11 m. WNW of Ancenis. Pop. 2,266.

LIGNERES-LA-DOUCELLE, a commune of France, in the dep. of the Mayenne, cant. and 6 m.

NW of Couptrain, and 27 m. NW of Mayenne. Pop. 2,757. It has several mineral springs.

LIGNEROLLES, a village of France, in the dep. of the Cote-d'Or, cant. of Montigny, 17 m. ENE of Chatillon-sur-Seine. Pop. 276. It has a forge.

LIGNETTE, a commune of Belgium, in the prov. of Hainault, dep. of Pipaix. Pop. 342.

LIGNEY, a department and commune of Belgium, in the prov. and arrond. of Liege, watered by the Geer. Pop. 355.

LIGNIERES, a canton, commune, and town of France, in the dep. of the Cher, arrond. of Saint-Amand-Mont-Rond. The cant. comprises 11 com. Pop. in 1831, 7,899; in 1841, 8,292. The town is 17 m. W of Saint-Amand-Mont-Rond, on the l. bank of the Arnon. Pop. in 1841, 2,197. It has several saw-mills, and is noted for its pasties. Its trade consists chiefly in cattle. This town was formerly capital of a large seignorial territory. In the vicinity is a lake 21 m. in circumf., which discharges itself into the Arnon and Cher, and abounds with fish.—Also a village in the dep. of the Loir-et-Cher, cant. and 4 m. SW of Morée, and 8 m. NE of Vendome. Pop. 431. It has several forges.—Also a commune of Belgium, in the prov. of Luxemburg, dep. of Roy. Pop. 231. See also LINIERES.

LIGNIERES-CHATELAIN, a town of France, in the dep. of the Somme, cant. and 8 m. WSW of Poix, and 25 m. WSW of Amiens. Pop. 560.

LIGNOL, a commune of France, in the dep. of Morbihan, cant. and 4 m. SW of Guémené, and 15 m. W of Pontivy. Pop. 1,780.

LIGNON, a river of France, in the dep. of the Loire, which has its source in a branch of the Cevennes; runs first NE, then SE, and joins the Loire, on the l. bank, 3 m. NW of Fleurs, after a course of about 30 m. Boen is the chief place on its banks.—Also a river in the dep. of the Upper Loire, which has its source on the W side of the Cevennes; bathes Tence; and passes a little to the E of Issengeaux.

LIGNY, a canton, commune, and town of France, in the dep. of the Meuse, and arrond. of Bar-le-Duc. The cant. comprises 19 com. Pop. in 1831, 11,401; in 1841, 11,234. The town is 11 m. SE of Bar-le-Duc, on the l. bank of the Ornain. Pop. in 1841, 3,107. It is still partly enclosed by old walls, and is generally well-built. It has a fine promenade stretching along the banks of the Ornain. In the parish-church is the tomb of Marshal Luxemburg. It has manufactories of calico and of anvils, a cotton-spinning and a paper-mill, and several tanneries; and carries on a considerable trade in wine, timber, and wool. In the environs are quarries of fine stone.—Also a commune in the dep. of the Nord, cant. and 2 m. NNW of Clary, and 9 m. SE of Cambrai. Pop. in 1841, 1,676.—Also a commune in the dep. of the Saone-et-Loire, cant. of Semur-en-Brionnais. Pop. 1,319.—Also a department and commune of Belgium, in the prov. and arrond. of Namur. Pop. of dep. 992. The v. is 14 m. WNW of Namur, and 6 m. SW of Gembloux, on the Ligne. Pop. 540. A battle between the French and Prussians took place in the environs of this v. on the 16th of June 1815.

LIGNY-LE-CHATEL, a canton, commune, and town of France, in the dep. of the Yonne, arrond. of Auxerre. The cant. comprises 13 com. Pop. in 1831, 7,389; in 1841, 7,471. The town is 12 m. N of Auxerre, on the r. bank of the Serein. Pop. 1,488. It has manufactories of coverlets, and a silk spinning-mill. The locality affords good wine.

LIGONIER, a township of Westmoreland co., in the state of Pennsylvania, U. S., 149 m. W of Harrisburg, in a valley, drained by Loyahanna creek and its branches. The soil consists of calcareous loam. Pop. 2,204.

LIGOR, a small principality, dependent on Siam, on the E coast of the peninsula of Siam, enclosed between the mountains which run along the central part of the peninsula, and the W coast of the gulf of Siam, along which it extends a distance of about 150 m. It comprises the islands of Larchin and Tantalem. The principal rivers by which it is watered are the Patanor, Carnom, and Ligor. Tin is its most valuable production. Its capital, which bears the same name, is 450 m. SW of Siam, on the W coast of the gulf of Siam, to the NW of the island of Tantalem, and on a small river of the same name, in N lat. 8° 18′, E long. 100° 20′. Pop. 5,000. It consists of an assemblage of small houses, built of bamboos and covered with reeds; and contains numerous pyramids and temples, one of the latter of which has a conspicuous gilt spire. It is enclosed with ramparts of brick and mortar, and a wet ditch, that, during the rainy season, communicates with the river, and in 1825 had 14 cannon on its walls. The authority of the present chief of L. extends over Sengora and all the tributary Malay states on both sides of the peninsula. The trade consists chiefly in cotton, tin, black pepper, rattans, &c.

LIGOURE, an ancient district of France, now comprised in the dep. of the Haute-Vienne.

LIGRE′, a commune of France, in the dep. of the Indre-et-Loire, cant. and 2 m. NNW of Richelieu. Pop. 1,194. It affords good wine.

LIGUA, a town of Chili, in the district of Aconcagua, 36 m. N of Quillota, on the S side and 10 m. E of the entrance of a river of the same name into the Southern ocean. The river has its source in the Andes, to the S of the volcano of L., and flows WSW into a bay of the same name, in S lat. 32° 22′ 30″.

LIGUAIRE (SAINT), a village of France, in the dep. of the Deux Sevres, cant. and 2 m. W of Niort. Pop. 630.

LIGUANEA, an island of South Australia, to the SW of Cape Wills, and W of Sleaford bay, in S lat. 35°.

LIGUE CADDE′E. See GRISONS.

LIGUEIL, a canton and commune of France, in the dep. of the Indre-et-Loire, and arrond. of Loches. The cant. comprises 13 com. Pop. in 1831, 9,383; in 1841, 9,762. The town is on the Indre, 11 m. SW of Loches. Pop. 1,767. It has several tanneries.

LIGUEUX, a village of France, in the dep. of the Dordogne, cant. and 6 m. WNW of Savagnac-les-Eglises, and 11 m. NNE of Perigueux. Pop. 350.

LIGUGE, a village of France, in the dep. of the Vienne, cant. and 5 m. S of Poitiers. Pop. 360.

LIGUMY, a town of Russia in Europe, in the gov. and 120 m. NNW of Vilna, district and 21 m. ENE of Chavli.

LIHONS-EN-SANTERRE, a commune and town of France, in the dep. of the Somme, cant. of Chaulnes, 12 m. WSW of Peronne. Pop. 1,248. It has manufactories of hosiery.

LIIM-FJORD. See LYM-FIORD.

LIJAR, a town of Spain, in the prov. and 36 m. NE of Almeria, near the Rio-Almanzir. Pop. 1,126.

LIKA, or LICCA, a river of Military Croatia, which descends from the NE flank of the Vellebitch, and sinks under ground at the foot of Mount Taliba, a little to the NW of Lipovolyé, after a NW course of 34 m.—Also a district forming the extreme S part of Military Croatia, having the Vellebitch range on the W and S, and the Plissevicza range on the E. Its chief town is Goszpich.

LIKAR, a town in the NE of Sumatra, on the river Sinkel, to the SE of Mingan.

LIKARIS, a lake of Greece, in Livadia, to the E of Lake Topolia, from which it is separated by Mount Phaga. It is 6 m. in length, and 3 m. in breadth.

LI-KEANG-FU, a division and town of China, in

the prov. of Yun-nan. The div. comprises 5 districts. The town is 204 m. NW of Yun-nan, in N lat. 26° 51′ 36″, E long. 100° 27′ 20″. There are gold-mines in the surrounding mountains.

LIKHVIN, a town of Russia, in the gov. and 30 m. S of Kaluga, on the l. bank of the Oka. Pop. 1,200.

LILIENFELD, a village in the archd. of Austria, on the r. bank of the Trasen, 15 m. S of Saint-Polten. There is a manufactory of arms here; and a noble Cistercian abbey, founded in 1206 by Leopold VII.

LILIENTHAL, a parish and village of Hanover, in the landr. of Stade, 4 m. NE of Breme, on the Wörpe, an affluent of the Wumme. Pop. 500. There is an observatory here, the astronomical position of which is N lat. 53° 8′ 34″, E long. 8° 53′ 50″.

LI-LING, a district and town of China, in the prov. of Hu-nan, div. of Chan-sha-fu, in N lat. 27° 41′, E long. 113° 16′.

LILLE, or Lisle,—in Flemish and German, Ryssel,—an arrondissement, canton, and town of France, in the dep. of Nord.—The arrond. has an area of 87,439 hectares, and is divided into 11 cants., with a pop. of 309,349 in 1836; and 356,795 in 1846.—The cant. comprises 15 com. Pop. in 1841, 101,993.—The town, which is the cap. of the dep., is situated in N lat. 50° 38′ 44″, E long. 3° 4′ 31″, in a spacious plain, on the canal connecting the Scarpe and Lys, and within 9 m. of the Belgian frontier. By the Northern railway of France it is 65 m. from Calais, and 180 m. from Paris; and by the Brussels and Tournay line, with which it is connected at Mouscron, 93 m. from Brussels. Pop. in 1789, 12,818; in 1836, 72,005; in 1846, 67,775. It is about 1½ m. in length from NW to SE; and ¾ m. in breadth; and is surrounded by walls and bastions, with a pentagonal citadel on its NW side, and a series of strong works, constituting it one of the strongest towns in Europe. Its streets are generally straight and wide; its houses are built chiefly of brick. It has 27 squares and market-places. Among its principal public edifices are the hotel-de-ville, an edifice of the 13th cent.; the churches of Saint-André, Sainte-Catharine, Saint-Etienne, Sainte-Madelaine, Saint-Sauveur, and Saint-Maurice; the hopital-general, capable of accommodating 1,500 patients; the hopital-comtesse, the military hospital, and the mint; there are also several large barracks. L. is the seat of a communal college, of a school of design, an academy of music, a botanic garden, several public societies, and has a public library of 21,000 vols., and a fine gallery of paintings. It possesses a bank, founded in 1836, with a capital of 2,000,000 francs. The canal on which it is seated has several branches leading to different parts of the city.—L. is one of the principal seats of the cotton manufacture in France. Calicoes, Indianas, stockings, and cotton yarn, are the principal produce of its cotton looms and factories. It has also manufactories of table linen, linen thread, lace, woollen cloths, velvets, serges, hats, leather, paper, beet-root sugar, and soap. M. Blanqui states that a considerable portion of the manufacturing pop. of this city dwell in cellars 6 or 8 ft. below the surface, and receiving light and air only by the ladder-descent to them from the streets; that these cellars seldom exceed 16 ft. sq., and 7 ft. from the ground to the roof; and that these dungeons are almost entirely destitute of furniture! There are around the town above 200 wind-mills, which are used chiefly for making oil of rape-seed. L. communicates with Douay and Valenciennes by the canal which joins the Deule to the Scarpe, and which Louis XIV. constructed in 1686.—The origin of this town is ascribed by tradition to Julius Cæsar, who is said to have built a castle on an island in the Deule, whence it derived the name of *Insula*, *Isla*, and eventually of L. The town was surrounded with walls in the 11th cent. Philip Augustus took and fortified it in 1213; but the inhabitants revolting, he laid it in ashes. It was subsequently rebuilt, enlarged, and much improved. Louis XIV. took it from the Spaniards in 1667; but notwithstanding the vast labour and expense bestowed in his reign on its fortifications, under Vauban, it surrendered in 1708, after a long and sanguinary siege, to the Allies under Marlborough and Eugene. At the peace of Utrecht it was restored to France, and was no more attacked till 1792, when the Austrians assailed it with a heavy bombardment, but the garrison, aided by the inhabitants, succeeded in repelling them.

LILLE, a commune and village of Belgium, in the prov. of S. Brabant, cant. of Herenthals. Pop. 1,068.

LILLE-SAINT-HUBERT, a commune and village of Belgium, in the prov. of Limburg, cant. of Brée. Pop. 574.

LILLEBONNE, a canton and town of France, in the dep. of Seine-Inferieure, arrond. of Havre.—The cant., comprising 14 coms., had a pop. of 10,665 in 1841.—The town is 19 m. E of Havre, and 27 m. W of Rouen, on the Bolbec. Pop. in 1841, 3,674. It has large cotton factories, tanneries, and bleacheries. It was the *Juliobona* of the Romans.

LILLEHAMMER, a town of Norway, in the bail. of Christians, on the Miosen-see. Pop. 360.

LILLERS, a town of France, in the dep. of Pas-de-Calais, arrond. and 6 m. WNW of Bethune, on the Nave, an affluent of the Clemance. It has breweries, tanneries, brick and tile works, oil-mills, beet-root factories, and distilleries. Pop. 4,879.

LILLESAND, a port of Norway, in the bail. of Nedenaes, 21 m. SW of Arendal, on the coast of the Skager-Rack, in N lat. 58° 5′, E long. 8° 27′. Its principal exports are herrings, iron, and wood.

LILLESHALL, a parish in Salop, 3 m. SSW of Newport. Area 6,140 acres. Pop. in 1841, 4,650.

LILLEY, a parish of Herts, 4½ m. WSW of Hitchen. Area 1,620 acres. Pop. in 1841, 475.

LILLIESLEAF, a parish of Roxburghshire, 6 m. ESE of Selkirk. Pop. in 1821, 780; in 1841, 771.

LILLING (East and West), two townships in the p. of Sherriff-Hutton, Yorkshire, 9½ m. NNE of York. Area 1,530 acres. Pop. in 1841, 208.

LILLINGSTON-DAYRELL, a parish in Bucks, 4 m. N of Buckingham. Area 2,210 acres. Pop. 187.

LILLINGSTON-LOVELL, a parish of Oxfordshire, but locally in the hund. and co. of Buckingham, 4½ m. NE of Buckingham. Area 1,280 acres. Pop. in 1831, 159; in 1841, 140.

LILLINGTON, a parish in Dorset, 2¾ m. SSW of Sherborne. Area 1,620 acres. Pop. in 1831, 205; in 1841, 191.—Also a parish in Warwickshire, 3¾ m. NNE of Warwick. Area 1,550 acres. Pop. in 1831, 274; in 1841, 272.

LILLO, a town of Spain, in the prov. and 36 m. ESE of Toledo, near the Rio-Riansares. Pop. 3,200.—Also a town and fort of Belgium, in the prov. and 9 m. NNW of Antwerp, on the r. bank of the Scheld, opposite Fort Liesvenshoeck. Pop. 1,100. The fort was constructed in 1684; was ceded to Austria in 1785; and taken by the French in 1794.—Also a commune in the prov. of Limburg, dep. of Houthaelen. Pop. 200.

LILLORS-WITTERZEA, a canton and v. of Belgium, in the prov. of Brabant, arrond. of Nivelles. Pop. 1,109.

LILMITZ, a village of Bohemia, in the circle and 3 m. WNW of Elnbogen.

LILSTOCK, a parish in Somersetshire, 10 m. NW by W of Bridgewater, on the Bristol channel. Area 710 acres. Pop. in 1831, 64; in 1841, 48.

LIM, a river of Bosnia, rising in Mount Baba, near Bielopol, running NNW, and flowing into the Drin, on the r. bank, near Drinsko, after a course of 90 m.

LIMA, or Limia, a river of Spain and Portugal, which rises in Galicia; runs SW and enters the Portuguese prov. of Minho; receives the Cabrao on the r.; turns to the W; passes Ponte-de-Lima, and flows into the Atlantic, after a course of 120 m., near Viana. It was one of the rivers called *Lethæus* by the ancients.

LIMA, a province or department of Peru, lying between the parallels of 10° 30′ and 15° 20′ S lat., and between 74° 20′ and 78° W long.; and bounded on the N and NE by the province of Tarma; on the E by Huancavelica and Huamanga; on the S by Arequipa; and on the W by the Pacific. It is watered by the Chancay, the Rimac, the Mala. and the Rio-Grande, all streams of short course and flowing W. It is subdivided into the 7 districts of Canete, Canta, Chancay, Guarochiri, Iça, Yauyos, and Lima. It has an area of 38,000 sq. m.

Lima, the capital of the above prov. and of Peru, is situated in the valley of the Rimac, in S lat. 12° 3′ 24″, W. long. 77° 8′ 30″ [*Scholtz*], 77° 5′ 5″ [*Humboldt*], 77° 6′ 45″ [*Malaspina*], at an alt. of 462 French ft. (492 English ft.) above sea-level, and 6 m. from the port of Callao on the Pacific. The river, which crosses the city, and separates it from its suburb San Lazaro on its N bank, is very pure and transparent, watering the whole valley, and as it passes through the city supplying small channels which run to most of the houses and water their gardens. A beautiful stone bridge of 6 arches, and 530 ft. long, unites the city with its suburb of San Lazaro. L. is 2 m. long, from E to W; and nearly 1¾ m. broad measured along the river. It is surrounded by brick walls, nearly 7 m. in circuit, and 9 ft. thick at the top, and from 18 to 25 ft. high, with ramparts and bastions, constructed in 1585 and repaired in 1807. At the E end of the city is the castle of Santa-Catalina. The streets are handsome and straight, the city being uniformly laid out in *manzanas* or *quadros*, that is squares, measuring 386 ft. each way, and divided by streets 33½ ft. wide. In 1791 the city with its suburb of El Cercado contained 209 quadros, and 355 streets. Since then, little if any addition has been made to it. The houses are generally only one story high, on account of the frequent earthquakes. Like all the other Spanish cities, L. has a great square in the centre, where all the principal streets terminate. The houses are built chiefly of wood, and some of sun-dried brick; their roofs are flat, and are composed of reeds or canvas mats, which in a country where it never rains, and where earthquakes are frequent, are preferable to tiles or slates. Till of late years few of the windows had either glass or sashes. In the Plaza mayor or great square stand the viceregal and archiepiscopal palaces, the cathedral, the university, the treasury, the arsenal, and the town-hall. The viceroy's palace is now appropriated to the courts of justice and other government offices; the archbishop's palace is occupied by the senate. The second large public square is the Plazuela-de-la-Independencia, in which the public market is held; and wherein stand the palaces of the Inquisition, now a store-house and prison, and the university, once the most important seat of education in S. America. The mint is also situated in this vicinity; and the national library, which in 1841 contained 23,344 vols. The churches and convents are extremely rich; many images are of massy gold decorated with jewels. In 1821 nearly 1½ ton of silver was taken from the churches to supply the exigencies of the state, and, it is alleged, without being apparent. The city contains 57 churches, 16 nunneries, and 25 chapels, 11 public hospitals, and 34 squares or open areas.—The pop. of L. was estimated in 1793 at 52,627; in 1810, at 87,000; of this number above 20,000 were whites, the remainder Negroes, Indians, and Creoles; in 1836 it was returned at 54,628 inclusive of the suburbs. Of this latter pop. the White Creoles were returned at 19,593; Indians, 5,292; people of colour, 24,126; slaves, 4,792; ecclesiastics, 825. In no other place in the world is there greater variety of complexion and physiognomy to be met with than in L. The White Creoles are, with few exceptions, the descendants of Spaniards. The Limenes, or ladies of L., are generally represented as being both physically and intellectually superior to the men. The rich ecclesiastics, proprietors of entailed estates, military and civil officers, physicians, advocates, attorneys, and artists, amount to nearly 19,000 of the pop.; the others are chiefly slaves or domestics. Schools for primary instruction are numerous in L., and upon the whole are tolerably well conducted. The principal public schools are the normal school of Santo Tomas, and the central school of San Lazaro, each of which has between 300 and 350 pupils. A college was founded a few years ago for the sons of the wealthier classes; and there are three Latin schools. The college of Santo Toribio is exclusively appropriated to students of theology; that of San Carlos to students of jurisprudence; that of San Fernando to medicine. In the university of San Marcos the professors' chairs are merely nominal; but honours and degrees are conferred by it. There are no manufactures of any kind; the men, as usual in most cities of Spanish America, are generally devoted to sloth and indolence. Amusements are rare, and literature neglected. Cock-fighting is a favourite amusement of the inhabitants, and bull-fights are frequent. The city is divided into 5 quarters, and each of these into *barrios* each of which is presided over by an alcalde.—Beyond some silver-smelting works, and cigar-making establishments, there is little manufacturing industry in L. As the emporium of Peru, it exports, through Callao, bullion, vicuna and sheep's wool, chinchilla fur, saltpetre, sugar, bark, copper, and tin. In the mint of L. there are annually cast from 2,000,000 to 2,500,000 dollars. The value of a mark of silver in the L. mint is 8 dollars 4 reals; of gold, 144 dollars 4 reals. The standard of gold is 21 carats; of silver, 20 grains.—L. labours under one great disadvantage, sufficient to outweigh the delightfulness of its vicinity and the salubrity of its climate, namely, its exposure to frequent earthquakes. A tremendous visitation of this kind took place in 1586, which is still annually commemorated. Those which followed were in 1609, 1630, 1654, 1678, 1687, and six shocks between that period and 1746. The two greatest earthquakes were those of 1687 and 1746. The former began at 4 in the morning, and destroyed many of the houses; about 6, it returned with redoubled fury, and completely destroyed every house the former shock had left. In 1746, the shocks commenced at half-past 10 in the evening of the 28th of October, and were so violent that in less than three minutes by far the greater part of the city was in ruins. The mischief caused by the concussions of the earth during this terrific convulsion was not equal to that produced by the alternate recess and swell of the ocean. The highest walls and buildings were overwhelmed by the waves, and the inhabitants of the coast nearly all perished. Of 23 ships then in the harbour of Callao, 19 were sunk; and the other 4, one of them a frigate, were carried to a considerable distance inland. The last calamity

of this kind with which L. has been visited, occurred on the 20th March 1828, and although only of 30 or 40 seconds' duration, was of such prodigious violence as to prostrate many buildings, and injure all, including the stupendous churches, their massive walls of from 6 to 9 ft. thick being literally rent from top to bottom. The amount of injury in the city was estimated, by an official survey, at 6,000,000 dollars. About 1,000 persons perished.—The vicinity is productive in maize, barley, beans, vegetables, fruit, sugar, rice, tobacco, grapes, olives, and melons.—The temp. within the city is never under 60°, and seldom rises above 80°. The mean temp. of the year is 73° 3′; of winter, 68° 1′; of summer, 77° 6′. The ordinary daily range is from 3° to 4°. Highest rise of the hygrometer 21°·5. During six months, from April to October, a heavy but not cold mist overhangs the city.—There is a regular line of omnibuses between L. and Callao, the journey occupying 1½ hour. To Miraflores, Chorillos, Lurin, and other places on the coast, the journey is made in a *ballanzin*, or caleche, drawn by 3 horses.

LIMA, a township in Livingston co., in the state of New York, U. S., 213 m. W of Albany, drained by Honesye creek. Pop. 2,176.—Also the cap. of Allen co., in Ohio, 101 m. NW by W of Columbus.—Also a township in Licking co., in Ohio. Pop. 739.—Also a township in Washtenaw co., in Michigan, 51 m. W of Detroit.—Also the cap. of La Grange co., in Iowa, 175 m. N by E of Indianapolis. Pop. 584.—Also an islet off the SE coast of Java.—Also a small stream in the Italian principality of Lucca, an affluent of the Serchio.

LIMACAPAN, an island in the Philippine archipelago, one of the Calamianes group, in N lat. 11° 50′, E long. 120° 7′, to the S of Colion. It is about 8 m. in length.

LIMAGNE, or Alimania, an ancient division of France, in the N of Lower Auvergne. Its cap. was Clermont; of its other towns, Riom and Billom were the principal. It now forms the N part of the dep. of Puy-de-Dome.

LIMALONGES, a village of France, in the dep. of Deux-Sevres, cant. of Sauze, 18 m. ESE of Melle. Pop. 1,426.

LIMANOW, a town of Galicia, 15 m. WNW of Nowi-Sandec, and 18 m. S of Bothnia.

LIMAN-PASHA, an island of Turkey, in the sea of Marmora, between the peninsula of Cyzica, on the E, and the island of Rabbi on the W. It is 5 m. in length.

LIMARI, a river of Chili, which rises in the district of Cuscos, and running W, flows into the Pacific, 33 m. NNW of Maytencillo, after a course of 120 m. The coast at the mouth of this river is steep and rocky. Its principal affluents are the Samo and the Elque.

LIMASAGNA, an island of the Philippines, to the S of Leyte, in N lat. 9° 46′, E long. 123°. It is 6 m. in length.

LIMASOL, or Limesol, a port on the S coast of Cyprus, in N lat. 34° 41′ 15″, E long. 33° 3′ 16″, 38 m. SW of Larnica. It is a long straggling place, and full of ruins and rubbish, but its roadstead is good, and its vicinity fertile and pleasant. Its principal traffic is in wine.

LIMATOLES, a town of Naples, in the Terra-di-Lavoro, on the l. bank of the Volturno, 6 m. NW of Santa-Agata-de-Goti. Pop. 1,500.

LIMAY, a canton and commune of France, in the dep. of Seine-et-Oise, arrond. of Mantes.—The cant. comprises 17 com. Pop. in 1841, 9,136.—The town is 1 m. ENE of Mantes, on the r. bank of the Seine. Pop. 1,296.

LIMBA, a town of Hindostan, in the prov. of Aurungabad, 24 m. NNE of Ahmednugger.

LIMBACH, a village of Saxony, in the circle of Zwickau, 7 m. NW of Chemnitz. Pop. 2,681.—Also a v. of Saxe-Meiningen, 9 m. NNW of Sonnenberg.

LIMBACH (Ober), or Felso-Limbach, a village of Hungary, in the com. of Eisenburg, 48 m. SSW of Guns. Pop. 512.

LIMBACH (Unter), or Also Lendoa, a village of Hungary, in the com. of Salad, 27 m. SW of Szala-Egerszeg, on the l. bank of the Limbach, an affluent of the Kerka. Pop. 753.

LIMBE′, a town of Hayti, 15 m. WSW of Cape Haytien, on a small river of the same name.—Also an island near the NE extremity of Celebes, in N lat. 1° 20′, E long. 125° 10′. It is 12 m. in length.

LIMBER, or Lymbergh (Great), a parish in Lincolnshire, 5 m. N by E of Caistor. Area 5,180 acres. Pop. in 1831, 451; in 1841, 480.

LIMBER (Little), a parish in Lincolnshire, 7 m. N of Caistor. Area 3,860 acres. Pop. 229.

LIMBERG, a village of Illyria, in the gov. of Laybach, circle and 9 m. NNW of Klagenfurt.

LIMBRICK, or Limarick, a village in the p. of Kilkevan, 3½ m. N of Gorey, co. Wexford.

LIMBURG, a district of the Netherlands, now politically divided into Dutch L. and Belgian L., lying between 50° 44′ and 51° 45′ N lat., and 4° 56′ and 6° 10′ E long.; and bounded on the N by the Dutch provs. of N. Brabant and Gelderland; on the E by the Prussian provs. of Cleves-Berg and the Lower Rhine; on the S by the Belgian prov. of Liege; and on the W by the Belgian provs. of S. Brabant and Antwerp, and the Dutch prov. of N. Brabant.

This prov., though Belgic, and as such partaking in the revolution of 1830, was divided between Holland and Belgium by treaty of November 15, 1831, the 4th article of which gives to the king of Holland, either in the quality of grand-duke of Luxemburg, or to be united to Holland, the following portions of Limburg,—viz., on the r. bank of the Meuse, in addition to the ancient Dutch enclaves there, the whole district comprised between the Meuse on the W, the Prussian frontier on the E, the prov. of Liege on the S, and Dutch Guelders on the N; and on the l. bank of the Meuse, the district lying N of a line drawn from the southernmost point of N. Brabant to the Meuse near Stevenswardt. The ancient Dutch enclaves on the l. of the river were assigned to Belgium, except the city of Maestricht, the entire sovereignty of which was given to Holland. The portion of L. thus assigned to Holland included, besides Maestricht, the fortresses of Ruremonde and Venloo. The share falling to Holland by this article amounted to about 525 sq. m., with 160,000 inhabitants in 1831; that assigned to Belgium to 960 sq. m., and 230,000 inhabitants: the entire area being about 1,490 sq. m. But the treaty itself was obstinately rejected by Holland, and the *status quo* continued until 1838, when the treaty was accepted by Holland, and enforced against the will of the Belgians. In 1848, the National assembly held at Frankfort adopted resolutions brought forward by some of the German delegates of L. to the following effect:—"1st, That the political and administrative union of L. with the kingdom of the Netherlands, in its present character, is incompatible with the German federative constitution. 2d, That no part of the constitution which the duchy of L. demanded for itself should be contrary to the general form of constitution to be decreed for all the several states comprised in the German confederation. 3d, That the question of a participation of L. in the national debt of Holland should be recommended to the provisional executive, for the purpose of arriving at a fair settlement, under condition of a final sanction by the German parliament." This declaration, which assumed the complete and indisputable authority of the German federation in L. was met by a proclamation of the governor of the prov., which intimated, that "it is erroneous to suppose that the separation of the duchy from the Netherlands has at once been accomplished by the decree of the Frankfort assembly; that, on the contrary, the king of Holland is bound by the fundamental law of the realm, by his oath, and by treaties, to govern L. according to the laws of the country, and to preserve the integrity of the territory of his kingdom; and that the legal condition of L., which has subsisted for the last eight years, can only be modified with the consent of the king and the approbation of the legislature." The Dutch government contended that by virtue of the treaties which completed the separation of Belgium and Holland, and especially of that of the 19th of April, 1839, no such state as the duchy of Limburg has any separate existence at all. "The prov. of that name was divided, forming part of Holland, and part of Belgium, not as distinct principalities, but as integral portions of each of those kingdoms. The Dutch prov. of L. is therefore governed to all intents and purposes like any other part of Holland The same

law of succession has been established in it by the purchase of the rights of the male heirs, and its inhabitants participate in all the privileges and burdens of Dutch subjects. It is true that the king of Holland consented to join the German confederation for this prov. of L., in exchange for the ceded portion of Luxemburg, reserving, at the same time, the Dutch administration of the prov.: but at that time the obligations of a member of that confederation hardly extended beyond a certain contribution of men and money to the military league; and these contingents have been paid by the Dutch army and the Dutch treasury. The case of the grand-duchy of Luxemburg is wholly different, that being a distinct state, of which the king of Holland is the sovereign; and to this state of Luxemburg the prov. of L. has never been annexed at all, but, on the contrary, to the kingdom of the Netherlands. It follows, therefore, that L. is justly and fully liable to bear its due portion of the national debt of Holland; and this consideration was taken into account when the financial adjustment was made on the separation from Belgium. A wish had been manifested by a certain portion of the inhabitants of L. to disconnect themselves from the Netherlands; but that had arisen from no sympathy for Germany, but rather for Belgium, and, above all, from a desire to shake off an onerous amount of taxation."

Dutch Limburg, or The Duchy of Limburg, has an area of 40·1 German sq. m., with a pop. in 1843 of 195,079; and in 1850, of 206,600. There is a decided preponderance of the Dutch character, language, and manners in the prov.; with a considerable fusion between the Dutch and Belgians on its borders. About 50,000 of the pop. are resident in the towns, of which the most important for commerce and wealth is Maestricht, which is the entrepot of the commerce which finds its way down the Meuse to this city, and thence by canal to Bois-le-Duc, whence the transit to the mouth of the Meuse is very short. Extensive tracts of waste land are now being reclaimed within this prov.; and the average condition of the rural pop. is one of comparative ease and comfort; yet there are nearly 12,000 permanent paupers, and 30,000 receiving casual relief.

Belgian Limburg has an area of 43·96 German sq. m., with a pop. of 171,572 in 1843; and of 185,621 on 1st January, 1849, of whom about 10,000 are of French or Walloon descent. It is divided into the 3 arrondissements of Hasselt, Tongres, and Maesyk; and contains 4 towns, and 194 communes. The S part of the prov. is a rich flat country covered with well-cultivated farms, and neat dwelling-houses. The size of farms is usually from 10 to 60 hectares; 100 hectares is regarded as a very large farm. The rent varies from 40 to 200 francs per hect. The leases are of 3, 6, or 9 years. Cherries, apples, and pears are extensively grown. The prov. contains upwards of 100,000 hect. of uncultivated land of an arid sandy soil. The number of properties is 42,411. It sends 2 senators and 5 representatives to the Belgian chambers. The number of electors in 1840 was 1846.

LIMBURG, or Dolhain-Limburg, a commune and village of Belgium, in the prov. of Liege, arrond. and 4 m. NE of Verviers, on the Vesdre. Pop. 1,992. It is composed of L. or the upper town, and of the v. of Dolhain or the lower town. It has manufactories of fine woollens, cottons, and paper. It was the cap. of Austrian-Limburg.

LIMBURG, a town in the duchy of Nassau, on the l. bank of the Lahn, near its confluence with the Ems, 21 m. N of Wiesbaden. Pop. 3,050. It is the see of a bishop, suffragan of Friburg; and has an Episcopal theological seminary. By the Lahn it conducts some commerce in grain and wool.

LIMBURG (Hohen), a town of Prussia, in the reg. and 21 m. W of Arensberg, on the l. bank of the Lehne. Pop. 1,951 in 1837. It has manufactories of cotton and linen stuffs, and of iron ware, cutlery, and wire.

LIMEHOUSE, a river in the NW of the Mosquito territory, which runs N and flows into the Caribbean sea, after a course of 45 m., a little to the E of the embouchure of the Roman.

LIMEHOUSE, a parish in Middlesex, 3 m. E of St. Paul's, London, on the N bank of the Thames, intersected by an artificial cut between the rivers Lea and Thames. Area 280 acres. Pop. in 1801, 4,678; in 1831, 15,695; in 1841, 21,121. Here are extensive ship-building establishments, and in the immediate vicinity are the West India docks.

LIMEKILNS, a village and port of Fifeshire, in the p. and 3 m. S of Dunfermline. It has a good harbour, and carries on an extensive trade in the shipment of lime, and of coal from the adjoining collieries. Pop. 949.

LIMERAY, a village of France, in the dep. of Indre-et-Loir, cant. and 4 m. NE of Amboise. Pop. 1,129. The Orleans and Tour railway has a station here.

LIMERICK, an inland county of the Irish prov. of Munster; bounded on the N by Clare and Tipperary; on the E by Tipperary; on the S by Cork; and on the W by Kerry. The outline of the co. is proximately a parallelogram, extending E and W, and measuring in greatest length 38¼ m.; in greatest breadth 24¼ m. Its area comprises 526,876 acres of arable land, 121,101 of uncultivated land, 11,575 of continuous plantations, 2,759 of towns, and 18,531 of water; in all, 680,842 acres.

Surface.] The Slievephelim mountains—a continuation of the Keeper group in Tipperary—occupy all the NE corner of the co. The western abutment of the Galtee mountains occupies a space of about 60 sq. m. in the extreme SE; and lifts, as its principal summits, Knocktinise and Slievereagh in the interior, Leaderry on the S boundary, and Galteemore on the E boundary, the last 3,008 ft. above sea-level. The Castle-Oliver hills occupy the S border over a further distance of 5½ m., to the vicinity of Charleville, and have for their chief summit Seafin, alt. above sea-level 1,706 ft. The Mullaghareirk mountains, and congeries and summits which bear other names,—all of a moorish, boggy, and wild upland character, and forming part of the great alpine expanse of 900 sq. m. in area, whose other parts spread away through much of Cork and Kerry,—constitute all the district from 10 m. W of Charleville to the boundary with Kerry on the W, and almost to the margin of the Shannon on the N. Except over about 11 m. in the E, and about the same distance in the S, the co. is thus fortified in all other parts than along the Shannon with a frontier bulwark of mountains. The country included within this vast natural rampart, or the whole of the interior and of the N border of the co., may be regarded as a champaign expanse, composed of a series of rivulet basins, somewhat parallel to one another, and all slowly descending to the Shannon. The lowlands of the co. are rich in such scenery as is most admired by a native of the most characteristic districts of England.

Waters.] The only lakes of either considerable size or interest are Coolapish in the barony of Coonagh, and Gur in that of Small County; even the mere loughlets and ponds are few in number, and unconspicuous in character. The Shannon, though strictly a river over part of its course along the boundary, and but slenderly an estuary over the remainder, is so voluminous, deep, and open, as to impart to L., while an inland co., very nearly all the advantages and characters of a maritime one. The Mulkern, descending from the E portion of the Slievephelim mountains, runs WNW along the whole of the N border, receives great affluence from the Newport approaching it from the Tipperary region of the Keeper mountains, and pours a large volume of water into the Shannon about 3 m. above the city of Limerick. The Goody, the Maig,

the Washpool, and the Deel, are all tributaries of the Shannon.

Geology and minerals.] A formation of clay slate, greywacke, and greywacke slate, constitutes the higher regions of the Slievephelim and the Galtees districts. Old conglomerate, with red, purple, green, and clay slate, constitutes a broad zone round the Galtees division of the preceding formation. Yellow sandstone and sandstone conglomerate constitute a narrow belt round the declivities of the Galtees, and a broader belt round the declivities of the Slievephelim mountains. The coal formation constitutes a great district in the extreme W of the co., nearly identical in area with the W mountains, but extending some miles E. Crystalline greenstone protrusions occupy several different localities, aggregately large though individually small. The floetz limestone formation, in SW continuation of the vast central limestone field of Ireland, is the surface rock in every part of the co. not occupied by these other formations.—The coal of the great coal district occurs, as at Killenaule, in troughs; and, owing to the undulations of the surface, and the rapid dip of the strata, requires to be mined in the same manner as metallic veins. Iron, copper, and lead ores, occur in various places in the E division of the co.; but they do not at present engage the attention of the miner.

Soil and agriculture.] A westward continuation of 'the Golden Vale,' which comes in from Tipperary, and constitutes the greater part of the E half of the great plain of Limerick, is surpassingly rich in soil, and exceeds almost every spot of Great Britain in fertility, and forms an area of 160,000 acres, equally suitable for tillage and grazing. The 'corcasses,' as they are provincially called, extend 15 m. along the Shannon, from the vicinity of the city of Limerick to the embouchure of the Deel; they have a soil of yellow or blue clay, thickly covered with a rich black mould, and are productive of heavier crops of wheat than any other grounds in Ireland.—Much of the upland surface, which in Great Britain would be regarded as too steep to be profitably cultivated, has been reclaimed and tilled. The principal reclaimers of the wild land are small farmers, holding from 20 to 30 acres; and as lime costs from 10s. to 15s. per ton, they cannot procure it in sufficient quantity to achieve either complete reclamation or tolerably profitable culture. The rich low land of the Golden Vale is peculiarly suited for pasture-ground, and can maintain a great quantity of stock.—The number of acres under crops in 1848 was 217,740, viz.: wheat, 31,503; oats, 52,746; barley, bere, and rye, 15,113; pease and beans, 245; potatoes, 39,019; turnips, 10,655; mangel-wurzel, carrots, parsnips, and cabbage, 2,488; flax, 223; meadow and clover, 65,748. Of plantations there were, in 1841, 14,638 acres. The number of farms in 1841, above 1 acre each, was 19,806, on which there was a stock of 17,689 horses and mules, 76,137 horned cattle, 57,542 sheep, 74,140 pigs, 423,837 head of poultry, and 2,323 asses; the estimated value of all which was £805,292. In 1848, on 23,925 holdings, there were 18,011 horses, 4,723 mules and asses, 120,113 cattle, 46,084 sheep, 29,915 pigs, 9,553 goats, and 253,274 poultry.

Manufactures and trade.] An excellent cider is made in various districts, particularly around Adare, Rathkeale, and Croom. Very large quantities of butter are made throughout the co., and though most of the exported portions of it are shipped at Limerick, a considerable proportion from the S districts is sent to Cork. Flour-making, weaving, woolcombing, linen-bleaching, paper-making, tanning, and various other departments of manufacture, possess a considerable aggregate importance.—The natural navigation of the Shannon downward from the city of Limerick, the navigations of the Maig and the Deel respectively 10 and 3 m. in the interior of the co., and the artificial navigation upwards from Limerick to connect the Lower Shannon with Lough Derg, unite to give all the N and even central divisions of the co. an absolute opulence of water-communication both seaward down the Shannon, and landward to the Fergus, to the Upper Shannon, to the Suck, and to the Grand and Royal canals. The principal roads within the co. all meet at the city or radiate from it; and the chief mail-roads are those from the city toward respectively Dublin, Waterford, Cork, Tralee, and Ennis.—The Great Southern and Western railway intersects the SE division of the co., passing the town of Kilmallock.—And the Tipperary and Limerick intersects the NE section.

Divisions and towns.] The co. is divided into the baronies of Owneybeg and Coonagh in the NE, Clanwilliam SW of Owneybeg and W of Coonagh, Small County S of Clanwilliam and Coonagh, Coshlea in the SE, the liberties of Kilmallock NW of Coshlea, Coshma W and NW of the liberties of Kilmallock, Upper Connello W of Coshma, Glenquin in the SW, Shanid in the NW, and Lower Connello, Kenry, Pobblebrien, and the liberties of the city of Limerick, along the N.—The principal towns are Limerick, Rathkeale, and Newcastle.

Statistics.] Pop. of the co., exclusive of the city of L., in 1792, 130,000; in 1821, 218,432; in 1831, 248,801; in 1841, 281,638; in 1851, 201,619, being a decrease of 28 per cent. since 1841. Houses, in 1792, 23,848; in 1821, 35,201; in 1831, 36,981; in 1841, 42,872; in 1851, 32,406. The following statistics are all of 1841, and are also exclusive of the city. Males, 140,561; females, 141,077; families, 46,652. Families residing in first-class houses, 648; in second-class houses, 5,719; in third-class houses, 16,851; in fourth-class houses, 23,434. Families employed in agriculture, 35,875; in manufactures and trade, 6,713; in other pursuits, 4,061. Families dependent chiefly on property and professions, 853. Clergymen of the Established church, 39; Roman Catholic clergymen, 90. In December 1842, the National Board had in full operation within the county 64 schools, attended by 5,128 male and 4,100 female scholars. In September 1848, there were 87 National schools in operation attended by 14,176 children. The courts of assize are held at Limerick; courts of quarter-sessions at Limerick, Bruff, Newcastle, and Rathkeale. Eight members were sent to the Irish parliament from the co. of Limerick, or 2 from the county itself, and 2 from each of the boroughs of Limerick, Askeaton, and Kilmallock; but only 4 members, or those from the county itself, and from the city, are sent to the imperial parliament. Total county-constituency, exclusive of L. city, in 1841, 1,670; in 1849, 1,096.

History.] In times immediately preceding the Anglo-Norman conquest, the territory which now constitutes the co. of L. was part of the kingdom of Thomond or North Munster. Donald O'Brien, king of Thomond, was one of the earliest of the Irish toparchs to offer homage to the English crown, and submit to territorial occupation by English troops; but in 1176, he shook off his alliance, and, till his death in 1194, successfully defied both the power of the English crown and the antagonism of its grantees. At the commencement of the reign of Edward III., the Fitzgerald family, then earls of Desmond, had acquired possession of a large portion of the cos. of Limerick, Kerry, Cork, and Waterford. Thomas, earl of Desmond, in 1468, was attainted for treason, and executed at Drogheda. The estates and titles, however, were restored to the son of Thomas; and they continued to descend in regular succession till, in 1586, they became finally forfeited by Gerald, the 16th earl. The forfeited Desmond estates in L. comprised 96,165 acres; and were distributed in crown grants. At the commencement of the rebellion of 1641, the city of L., and the chief castles within the co., were seized by the insurgents; and thence till the capture of Limerick, in 1651, by the parliamentary forces under Ireton, the greater part of the co. continued completely under the insurgents' power. The forfeitures which followed the close of the rebellion included by far the larger part of the landed property in the co., and occasioned the introduction of a numerous body of new proprietors. The forfeitures, consequent on the Jacobite wars and the establishment of the house of Orange upon the throne, comprised 14,188 acres. The co. of L. is, in many respects, the most interesting and important co. of Munster, not only in reference to the number of its ancient remains, and its picturesque scenery, but also as regards modern improvements, in agriculture, manufactures, and commerce.

LIMERICK, or 'the County of the City of Lim-

erick,' a quondam district of peculiar jurisdiction, bisected at the city of Limerick by the river Shannon, and bounded on the N by the co. of Clare, and on the E, S, and W by the co. of Limerick. Area 16,458 Irish acres, or about 26,600 statute acres, exclusive of the ground occupied by the town. The act 3° and 4° Victoria, c. 108 and 109, totally abolished the rights and jurisdiction of the co. of the city of Limerick, and distributed its territory into the municipal district of the borough of L., and two rural districts incorporated with respectively the barony of Clanwilliam and the barony of Pobblebrien. Pop. in 1831, 66,554.

LIMERICK, a sea-port, parl. borough, and city, the capital of Western Munster, on the river Shannon, 8 m. NE by N of Adare, 51 m. N of Cork, and 94 m. SW by W of Dublin. The town stands upon low ground, at an insulating division of the Shannon, and in the midst of an extensive plain. The island embraced by the stream is 1 m. long, and 700 yds. broad; and has the main volume of the Shannon on its W side, and a lesser volume, called the Abbey or Salmon-weir river, on the E. The suburb of Thomond-gate stands on the W bank of the main stream; the division of the city called English-town, occupies the S end of the island; the division called Irish-town stands on the r. bank of the Abbey river opposite the foot of the island, or the S side of English-town; and the large, modern, and beautiful division called New-town-pery, or abbreviatedly the New town, extends SW, up slightly ascending ground, from contact with Irish-town. The great circumjacent plain has a medium elevation of but a few feet above the level of high water. The old town is "one vast mass of dilapidation, filth, and misery, which nothing but general employment of the people throughout the country can correct; because the unemployed poor are attracted to the large crumbling city, where they can find, at a cheap rate, something like a roof to cover them." The new town is, in almost all respects, a perfect contrast to the old. It extends 1,550 yds. WSW from the NW part of Irish-town, with a mean breadth of 800 yds. Its principal street is a continuation of the thoroughfare from the new bridge; airy, regular, and everywhere well-built. The houses are constructed of brick and a kind of coarse marble quarried in the vicinity; the footpaths are spacious, flagged pavements. In 1775, the number of streets, exclusive of lanes and alleys, was 27; in 1827, 70.—The church of St. Mary, or the cathedral, stands in an open area, on the W side of Irish-town, and on the site of the Castle of O'Brien, king of Thomond. It measures 156 by 114 ft., and has a square embattled tower 120 ft. in height; but it presents a heavy lumpish exterior, and possesses a time-worn, neglected, and dilapidated interior. — There are 5 Protestant churches, 4 parochial and 3 conventual Roman Catholic chapels, and 5 dissenting places of worship, within the city.—Thomond bridge is supposed to have been built about 1210, and was rebuilt since 1838, at a cost of £12,600. Wellesley bridge, connecting the E end of the New town with the co. of Clare, at a point 850 yds below Thomond bridge, is a magnificent structure, and, jointly with a floating-dock for the accommodation of the port, has been completed at a very great cost. —The city jail is situated on the W side of English-town, immediately above the influx of the Abbey river; the co. jail stands on the S outskirts of Irish-town.—The co. court-house, erected in 1808, at the cost of £12,000, is an elegant quadrangular edifice, with a tetrastyle Roman Doric portico.—The lunatic asylum, on the borough boundary, 250 yds. SSE of the co. jail, was built in 1821, at the cost of £29,856. It consists of a large central building, and four long radiating ranges.—A barrack, consisting of three sides of a square, and containing accommodation for 400 men, stands within the remains of King John's castle; and artillery and infantry barracks, for about 1,600 men, are situated in Irish-town. The exchange, built in 1778, has a handsome portico and a commodious hall. The custom-house is a handsome structure, built in 1769, at the cost of £8,000. The chamber-of-commerce was erected in 1805. The assembly-house, on Charlotte-quay, has eventually been converted to the purposes of a theatre. The linen-hall, and the corn and butter markets, are situated in Irish-town.

Manufactures.] In 1838, the steam-engines within the city amounted to 12, and were used as follows: 5 for brewery purposes, 2 for distillery purposes, 1 for grinding paint, and making soda-water, 1 for turning, &c., and 2 for raising water from the Shannon to a reservoir.—L. gloves, during upwards of a cent., were favourably known for the delicacy of their leather and the fineness of their workmanship, but have now ceased to be made; and articles which resemble them in quality, and bear their name, have for a number of years past been manufactured in Cork, and brought thence for sale in L.—L. fishing-hooks have long been celebrated. Large quantities of them are exported to America; and bad imitations of them are made at Sheffield. The manufacture of lace has of late years become extensive and ambitious. It is carried on in three principal manufactories, and affords employment to about 1,700 females, in the various branches of the trade, consisting of tambourers, runners, darners, menders, washers, finishers, framers, muslin-embroiderers, and lace-open-workers. The ages of the workers vary from 8 years to 30 years; the average scale of wages is 3s. 6d. weekly; some earn, however, as much as 7s. The ground-work is made by machinery. One large provision establishment in the city occupies a site of 3 acres in area, and expends at least £200,000 a-year. Extensive and powerful lock-mills, situated contiguous to the city on the banks of the canal, were the first in Ireland to employ machinery for separating bran from flour, and distributing the latter into its various qualities.

Trade.] The general export trade of L. nearly doubled during the 12 years commencing in 1822, and has since been steadily increasing. The corn trade in particular, has very rapidly thriven. The quantity of wheat exported in 1822 was 102,593 barrels; in 1833, 218,915 barrels. The quantity of flour exported in 1824 was 172 cwt.; in 1833, upwards of 37,000 cwt. The quantity of butter exported in 1822 was 42,869 firkins; in 1833, 75,000 firkins. The total of exports in 1822 amounted in estimated value to £479,538; in 1830 to £720,266; in 1832 to £1,005,945; in 1842 to £1,200,000. The customs collected at the port, inclusive of its creeks as far distant as Tralee, amounted in 1833 to £117,798; in 1836 to £146,223; in 1839 to £148,782; in 1841 to £170,552; in 1848 to £201,855. —The amount of portage collected in the city of L. in 1842 was £2,758; in 1848, £4,123.—The number of vessels belonging to the port in 1840 was 65, of aggregately 13,000 tons register, besides 42 small craft of aggregately 1,300 tons. In 1845, the registration exhibited a total of 108 vessels = 14,086 tons, of which 55 were under, and the rest above 100 tons burden. A great traffic up the Lower Shannon to L., and also a considerable traffic down the L. navigation, consists in turf, this article being the chief fuel of the city, and being consumed here to the annual amount of at least about 70,000 tons. The quays commence on the Abbey river above Ball's bridge, and wind $\frac{3}{4}$ m. sinuously along the margin

of that river and of the main stream of the Shannon to Wellesley bridge; they then extend 1,050 yds. farther along the Shannon. A weir for mill-dam purposes stems the main stream of the Shannon immediately above the city jail; and a dock 300 yds. in length, called the Long dock, projects from the Shannon about 100 yds. above the influx of the Abbey river.

The diocese.] The see of L. is alleged to have been founded in the 6th or the 7th cent. The dio. of L. had permanently annexed to it in 1663 the united dio. of Ardfert and Aghadoe; and preserving this great annexation, and consequently including a very large extent of territory, it is the only Irish dio. excepting Meath which was not affected by the act of 1833.—The episcopal palace stands at the W end of Henry-street, in close juxtaposition with the residence of the earl of L. The episcopal incomes from the three sees of L., Ardfert, and Aghadoe, are not distinguishable from one another, but exist in a state of consolidation; and, estimated on an average of 3 years ending on Dec. 31, 1831, they amount to £4,973 net. The dio. of L., exclusive of the united dio. of Ardfert and Aghadoe, comprehends the greater part of the co. of L., and a small part of the co. of Clare. Area 371,425 acres. Pop. in 1831, 228,777. In 1834 the pop. consisted of 11,122 Churchmen, 85 Presbyterians, 191 other Protestant dissenters, and 246,302 Roman Catholics.—The Roman Catholic dio. of L. continues to be unannexed, and in 1838 was divided into 40 parishes. The number of parochial clergy is 38, and of curates or coadjutor clergy 62.

Municipal affairs.] L. is a borough by prescription. The limits of the old municipal borough were those of the quondam co. of the city. The limits of the new municipal borough are quite expansive enough to admit of extension on the W, the N, and the S; they include also all the open as well as the edificed part of King's island; and comprise an area of 2,618 acres. The corporation, under the new arrangement, consists of 10 aldermen and 30 councillors, elected by 5 wards. The revenues of the corporation of the city in 1832, amounted to £4,418; in 1846 to £8,162.—The city sends 2 members to the imperial parliament. Constituency in 1841, 1,893; in 1849, 1,246. Pop. of the city in 1841, 48,391; in 1851, 55,268.

History.] L. is supposed by some writers to have been the *Regia* of Ptolemy. The Danes became masters of it about the middle of the 9th cent. The kings of Thomond adopted L. as the seat of their government. During the reigns of Henry VII., Henry VIII., and Elizabeth, when the country was much agitated, L. was strictly and uniformly loyal. At an early period of the civil wars which began in 1641, the Roman Catholics captured L., and in 1646 the city became the seat of the supreme councils of the Roman Catholics. In 1651 it was regularly invested by the parliamentarian army under Ireton, and taken after an obstinate defence. Immediately after the overthrow of James II. at the battle of the Boyne, the duke of Berwick and General Sarsfield strongly garrisoned L with the best troops of the Irish army, and successfully resisted King William's efforts to take the city. In the autumn of next year, after the capture of Athlone, the battle of Aughrim, and the surrender of Galway, the Jacobite army, under St. Ruth, took post in L. as their last tenable ground in Ireland, and were speedily followed by the army of William, under De Ginckle, to whom it capitulated on 1st October.—The family of Pery receive from L. the title of Earl in the peerage of Ireland. E. S. Pery, Esq., speaker of the Irish house-of-commons from 1771 to 1785, at his retiring from his post was created Viscount Pery of New-Town-Pery. In 1813 the second baron was made Viscount and Earl of L., and in 1815 he was made Baron Foxford in the peerage of Great Britain.

LIMERICK, a township of York co., in the state of Maine, U. S., 76 m. SW of Augustus. It is watered by Little Ossipee river, and is generally fertile. Pop. in 1840, 1,508.—Also a village of Brownville township, Jefferson co., in the state of New York, 172 m. NW of Albany, on Perch river. Pop. 200.—Also a township of Montgomery co., in the state of Pennsylvania, 78 m. E of Harrisburg, bordered on the SW by Schuylkill river. Pop. 1,786.

LIMERLE', a department and commune of Belgium, in the prov. of Luxemburg, arrond. of Marche, watered by the Ourthe. Pop. of dep. 1,056; of com. 385.

LIME ROCK, a village of Smithfield township, Providence co., in the state of Rhode Island, U. S., 10 m. N of Providence.

LIMERZEL, a commune of France, in the prov. of Morbihan, and cant. of Questembert, 20 m. ESE of Vannes. Pop. 1,369.

LIMES, a commune of Belgium, in the prov. of Luxemburg, dep. of Geronville. Pop. 227.

LIMESTONE, a river of New South Wales, in the co. of Bathurst, a tributary of the Belubula river.—Also a creek in the co. of Macquarie, which flows into the river Manning.

LIMESTONE, a county in the N part of the state of Alabama, U. S., comprising an area of 575 sq. m., bordered on the S by Tennessee river, and watered by Elk and Swan rivers, and by Piney and Limestone creeks. Pop. in 1840, 14,374; in 1850, 16,933. Its capital is Athens.—Also a township of Clinton co., in the state of Pennsylvania. Pop. 200.—Also a township of Columbia co., in the same state, 10 m. NW of Danville. Its surface is level, and is watered by Chilisquaque creek and Limestone run. Pop. 646.—Also a township of Warren co., in the same state. Pop. 129.—Also a township of Lycoming co., in the same state. Pop. 800.

LIMESTONE, or CURRADULLA, a creek of New South Wales, in the co. of Argyle.

LIMESTONE PLAINS, a level tract in New South Wales, in the co. of Murray, watered by the Molongo and Queanbeyan rivers.

LIMET, a commune of Belgium, in the prov. of Liege, dep. of Vierset-Barse. Pop. 106.

LIMETZ, a village of France, in the dep. of the Seine-et-Oise, cant. of Bonnieres, 10 m. NW of Mantes, near the l. bank of the Epte. Pop. 880.

LIMEUIL, a commune and town of France, in the dep. of the Dordogne, cant. and 6 m. SE of St. Alvre, on the r. bank of the Dordogne. Pop. 929.

LIMEZY, a commune of France, in the dep. of the Seine-Inferieure, cant. and 4 m. NNW of Pavilly. Pop. 1,410.

LIMINA, a village of Sicily, in the prov. of Messina, district and 11 m. SSE of Castro-reale.

LIMITE, a town of the grand duchy of Tuscany, in the prov. and 15 m. ESE of Florence, on the r. bank of the Arno.

LIMJOUR, a town of Abyssinia, in the Amhara, in the prov. of Maitcha, to the W of Lake Dembea, and 81 m. SW of Gondar.

LIMMAT, a river of Switzerland, which issues from the N extremity of Lake Zurich, at the town of that name; flows NW; passes Baden; and about 5 m. below that town joins the Aar, after a rapid course of about 18 m. Its impetuosity, and the rocky character of its channel, render the navigation of this river extremely difficult. Its principal affluents are the Sihl and Reppisch. Its waters abound with fish.

LIMMEN, a parish of Holland, in the prov. of North Holland, S of Alkmaar. Pop. 480.

LIMMERNALP, a mountain of Switzerland, on the confines of the cantons of Glaris and of the Grisons, between Mount Taedi and Haustock. It gives rise to the Limmernbach.

LIMNEN BIGHT, a bay of North Australia, on the W side of the gulf of Carpentaria, in S lat. 15°. It receives the rivers Roper, Mitchell, and Limnen Bight of Leichhardt. The embouchure of the latter is opposite Maria island.

LIMOEIRO, a comarca and small town of Brazil, in the prov. of Pernambuco, on the N bank of the Capibaribe, 84 m. E of Recife. It consists of only one long street. Pop. of district 10,000.—Also a village in the prov. of Alagoas, and district of Villa-da-Assemblia.

LIMOGES, an arrondissement, canton, and town of France, in the dep. of Haute-Vienne, arrond. of Vienne.—The arrond. has an area of 210,170 hect., with a pop. in 1841 of 40,536, and comprises 9 cants. —The cant. comprises 10 coms. Pop. in 1841, 40,536.—The town is situated on the r. bank of the Vienne, 60 m. SE of Poitiers, 110 m. NE of Bordeaux, in N lat. 45° 49′ 52″, E long. 1° 16′, at an alt. of 777 ft. above sea-level. Pop. in 1836, 29,709; in 1846, 26,924. It is ill-built, being for the most part wood. A number of its streets are crooked, and have a steep ascent, while their narrowness, and the hanging form of the roofs of the houses, render them extremely gloomy; but the upper and modern portion is comparatively well-built. It is not however without handsome edifices, and several of its squares and fountains are greatly admired. The town-house is a modern edifice; and the bishop's residence, with its gardens extending to the banks of the Vienne, are entitled to the traveller's attention. The cathedral is said to have been built by the English. L. carries on a brisk trade with Toulouse and the S of France. Its chief manufactures are cotton and woollen cloths, porcelain, hats, leather, hardware, cutlery, *sabots*, pottery, and paper. It trades also to a large extent in horses and cattle, grain, liqueurs, and brandy. It has a public library of 12.000 vols.; and is the seat of a college, an *académie universitaire*, a normal school, and of the greater and smaller courts of justice connected with the dep. It was the birthplace of the chancellor D'Aguesseau, Pope Clement VI., and the surgeon Dupuytren.

LIMOGNE, or Limonhe, a canton and commune of France, in the dep. of the Lot, arrond. of Cahors. The cant. comprises 12 com. Pop. in 1841. 9,451.—The town is 15 m. ESE of Cahors. Pop. 1,072.

LIMOISE, a village of France, in the dep. of Allier, cant. and 6 m. SE of Lurcy-Levy. Pop. 207.

LIMONE, a town of the Sardinian states, in the prov. of Coni, 18 m. ESE of Vinadio, on the r. bank of the Vermagnana. Pop. 3,000.—Also a town of Austrian Italy, in the prov. and 36 m. NE of Brescia, on the W bank of Lake Garda, on which it has a small port. Pop. 600. It has some trade in oil and fruit, and an important fishery on the lake.

LIMONEST, a village of France, in the dep. of Rhone, 12 m. S of Villefranche. Pop. 745.—The cant. of L. comprised 12 coms., with a pop. of 12,037, in 1841.

LIMONIA, an islet near the W coast of the island of Rhodes, to the NE of Karki, in N lat. 36° 17′ 25″, E long. 27° 42′ 46″. It is about 2½ m. in length, and has a small v. and port on its W side.

LIMOSANI, a town of Naples, in the prov. of Sannio, cant. and 3 m. NE of Castropignano, on the l. bank of the Biferno. Pop. 2,600.

LI-MU-KIANG, a river of China, in the island of Hai-nan. It rises on the N flank of the U-tchi-chan; runs NNE, assuming in succession a variety of names; and flows into the bay of Po-chung-ho, near the town of Hai-khieu-so, after a course of about 120 m.

LIMOURS, a canton, commune, and town of France, in the dep. of Seine-et-Oise, arrond. and 12 m. E of Rambouillet. Pop. of cant., comprising 14 coms., 7,127 in 1841; of town, 960.

LIMOUSIN, or Limosin, an ancient prov. in the centre of France, now parcelled out among the deps. of Correze, Creuse, Dordogne, and Vienne. Its total area was 1,007,080 hect. Its cap. was Limoges. Its surface generally is mountainous, and its soil unfertile.

LIMOUX, an arrondissement, canton, and town of France, in the dep. of Aude.—The arrond. has an area of 177,600 hect.; and comprises 8 cants., with a pop. in 1841 of 75,674.—The cant., comprising 22 coms., had a pop. of 16,352 in 1841.—The town, situated on the l. bank of the Aude, 12 m. SSW of Carcassonne, had a pop. of 7,105 in 1836; and of 7,270 in 1846. It has considerable manufactures of woollens, leather, yarn, and wine.

LIMPENHOE, a parish of Norfolk, 11 m. ESE of Norwich. Area 940 acres. Pop. in 1841, 186.

LIMPIAS, a town and port of Spain, in the prov. and 15 m. ESE of Santander, on the r. bank of the Asson. Pop. 1,000.

LIMPOPO, or Oori, a river of Africa, which rises near Koloveng, in S lat 24° 50′, E long. 25° 10′, about 270 m. SSE of the recently discovered Lake Ngami, and flows NE. In about 22° S lat., and 30° 30′ E long., near Lingwapa, it was found flowing with a considerable current about 4 ft. deep and 250 yds. broad, during the dry season; and its banks, which were 20 ft. high and steep, bore indications that, when in flood, the river fills them. At this point it pursues an ENE direction. The Dutch boers who have spread over this portion of Africa informed Mr. Livingston that the Oori, in its lower course, becomes a magnificent stream, and enters the sea by its own proper mouth a little to the N of Delagoa bay. Mr. Macqueen is of opinion that the mouth of the L. will be found in the low delta between 21° and 21° 31′ S lat., which Captain Owen reported to be intersected by several streams, all of which come from one great river in the interior. From Lingwapa to this point of the coast is a distance of 240 geog. m. almost in a direct line.

LIMPSFIELD, a parish of Surrey, 9½ m. ENE of Reigate. Area 4,040 acres. Pop. 1,344.

LIN, a district and town of China, in the prov. of Shan-se, div. of Fun-chu-fu, in N lat. 38° 4′ 50″, E long. 110° 57′ 50″.

LINAO, a town of the island of Mindana, in the Philippines, about 80 m. NW of Mindanao.

LINARDS, a village of France, in the dep. of Haute-Vienne, cant. and 3 m. WSW of Chateauneuf. Pop. 1,780.

LINARES, a town of Spain, in the prov. and 21 m. NNW of Jaen, in a fertile plain between the Guadalimar and Guadarrizar. Pop. 6,800. Lead, antimony, and copper are mined in the vicinity.—Also a town of Spain, in the prov. and 30 m. SSW of Salamanca. Pop. 1,000.—Also a town of Spain, in the prov. and 38 m. NNW of Seville. Pop. 660. —Also a town of Spain, in the prov. and 27 m. E of Teruel. Pop. 1,100. Lead is wrought in the vicinity.—Also a town of Mexico, in the state of New Leon, 55 m. E of Monterey, near the l. bank of the Rio-Tigre.

LINAS, a commune and village of France, in the dep. of Seine-et-Oise, cant. of Arpajon. Pop. 1,313.

LINCE, a town of Russia, in the gov. of Kiev, 15 m. SE of Lipowice.

LINCELLES, a village of France, in the dep. of Nord, cant. and 3 m. WNW of Tourcoing.

LINCHANCHI, a town of Yucatan, 21 m. N of Merida.

LIN-CHANG, a district and town of China, in the prov. of Ho-nan, div. and 30 m. E of Chang-tih-fu, in N lat. 36° 20′, and E long. 114° 46′, on the r. bank of the Chang-ho.

LINCHDALE, or Linsdale, a parish in Bucks, 1½ m. NNW of Leighton-Buzzard, intersected by the Grand Junction canal and the London and Birming-

ham railway. Area 1,830 acres. Pop. in 1831, 407; in 1841, 883.

LIN-CHING, a district and town of China, in the prov. of Chih-le, div. of Chaou-chu, 210 m. SSW of Pe-king, in N lat. 37° 27′, and E long. 114° 36′.

LINCHMERE, a parish in Sussex, 3 m. SW by W of Haslemere. Area 2,170 acres. Pop. 280.

LIN-CHU, a division and town of China, in the prov. of Hu-nan. The div. comprises 5 districts.

LIN-CHUEN-HEEN, a district and town of China, in the prov. of Keang-se, div. of Fu-chu-fu.

LINCOLN, a city and county in itself, the seat of a see, and the cap. of Lincolnshire, locally situated between the parts of Lindsey and Kesteven, 132 m. N by W of London, on the river Witham, at the E termination of the Foss-dyke navigation, and 48¾ m. distant from Derby by the Derby and L. branch of the Midland cos. railway; 41¾ m. from Hull by the Hull and L. railway; and 91¼ m. from Manchester by the Manchester, Sheffield, and Lincolnshire railway. Area of the whole district under the ancient city jurisdiction, including the county of the city, 17,560 acres. Pop. in 1801, 7,197; in 1831, 11,892; in 1841, 16,172; in 1851, 17,536. The town extends from the Witham, on either side, N and S, by one chief line of streets of considerable length, intersected by shorter cross streets; it is principally situated, however, on the N bank of the river, and on an eminence which rises rather abruptly from its borders. The cathedral stands on the face of this eminence, forming a conspicuous object, even from the hills beyond Buxton in Derbyshire. In reference to the eminence on which it is partly built, the city is locally divided into 'above hill' and 'below hill.' In the former, besides the cathedral, castle, lunatic asylum, and workhouse, are the co. hospital, co. assembly-rooms, the judges'-house, the house-of-industry, and all the public buildings with which the co. at large has any connection. The gentry and clergy in general reside in the upper; the trading part of the pop. in the lower division. The principal shops and inns are also situated in the latter, together with the butchery, the markets, the guild-hall, city jail, and city assembly-rooms. The castle was founded by William the Conqueror, in 1086, about which period, according to Domesday book, the city contained 1,070 mansions, and 950 burgesses. Of this great fortress, the principal remains are the keep, and part of the walls, which enclose a circuit of about 1,790 ft., standing upon vast bulwarks of earth, and sloping gradually down on the outside to a great depth. The ordinary revenue of the corporation is about £5,000. —L. returns 2 members to parliament. The number of electors registered in 1837 was 1,023; in 1848, 1,146. The city is a polling-place, and the principal place of election, for the parts of Lindsey, or the N division of the co.—In 1351, the staple of lead, cloth, and leather, was given to L., but it appears to have anciently been more celebrated for commerce than manufactures. At present, the principal manufactures in which it is engaged are those of leather, tobacco, and ale; but its trade in modern times has chiefly consisted in the export of the agricultural produce of the surrounding country, and the receipt of commodities for home consumption. Large quantities of flour are sent to London and Manchester. By the Foss-dyke there is an extensive inland navigation to the W; and by the Witham, to the E, the town communicates with the sea. Great additional facilities of trade have recently been conferred on L. by the system of railways with which it is now connected. Races are held in September, on one of the city commons about a ½ m. W of the town.

Cathedral and diocese.] The cathedral of L. is regarded by many as the finest Gothic edifice in the empire with respect to exterior. Its length, including buttresses, is 516 ft.; width at W end, 174 ft. There is a double set of transepts, the longest, towards the W, being in exterior length 250 ft.; in width, 66 ft. The vaulting of the nave is 80 ft. from the pavement below. There are three towers,—one central, above 270 ft. high, and two towards the W, of 180 ft. each. In the principal tower is hung the enormous bell called 'Great Tom of Lincoln,' weighing in its present form 5 tons 8 cwt., and measuring in diam. at the rim 6 ft. 10½ in. This huge engine of sound was recast, with the addition of a ton to its weight, in 1835, the former bell being of date 1610. —The dio. of L. was originally very large, containing not only L., Leicester, Huntingdon, Bedford, Buckingham, and part of Hertfordshire, but also those afterwards subject to the bishops of Ely, Peterborough, and Oxford, and those also of Winchester, Salisbury, Bath, Exeter, Worcester, Hereford, Gloucester, and Bristol. Henry I. took the bishopric of Ely out of it, and Henry VIII. those of Peterborough and Oxford; nevertheless, it still continued to exercise the most extensive jurisdiction, and to possess the richest temporalities of any in England. The number of benefices in the dio. returned in 1831 was 1,251; the average gross income of their incumbents, £298. By orders in council, in 1837 and 1839, the archds. of Huntingdon and Bedford were transferred to the dio. of Ely; by a similar order in 1837, the archd. of Buckingham was directed to be transferred to the dio. of Oxford on the next vacancy of the latter see; and by another, the archd. of Leicester was transferred to the dio. of Peterborough, while the archd. of Nottingham, containing the deaneries of Retford, Newark, Southwell, Nottingham, and Bingham, previously in the dio. of York, was added to the dio. of Lincoln. The total number of benefices in this dio. in 1838, without exclusion, was 1,072.—The total amount of the average net yearly income of the see of L., for 3 years ending 31st December 1831, was £4,542. The average net yearly income of the dean and chapter, as a corporation aggregate, during the 3 years ending in 1831, was £6,959.

History.] L. appears to have suffered frequently from invasions of the Danes. In 1110 it was nearly consumed by an accidental fire, and in 1185, much damaged by an earthquake. Henry II., after having been crowned at London, came to L. to have the ceremony repeated,—a clear proof of the high position this city held in the public estimation. In 1201, David, king of Scotland, met King John here, and did him homage. In 1644 the earl of Manchester obtained possession of the lower part of the city, and drove the royalists for shelter into the castle, and into the cathedral, which they fortified. Both these were also taken by storm in the night of the 5th of May, after an obstinate resistance.

LINCOLN, a county in the S part of the state of Maine, U. S., comprising an area of 950 sq. m., bounded on the S by the Atlantic, and watered by Kennebec, Sheepscot, Damariscotta, Muscongus, and George rivers. It has a productive soil, and extensive fisheries. Pop. in 1840, 63,517; in 1850, 74,803. Its chief towns are Wiscasset, Topsham, and Warren.—Also a co. in the W part of the state of N. Carolina, containing a superficies of 1,200 sq. m., bordered on the E by Great Catawba river, and watered by Little Catawba river and its branches, and Dutchman's and Buffalo creeks. Pop. in 1840, 25,160; in 1850, 7,767. Its cap. is Lincolnton.—Also a co. in the NE part of the state of Georgia, containing an area of 220 sq. m., bordered on the NE by the Savannah river, and by Little river on the S; and watered by Fishing and Soap rivers. Pop. in 1840, 5,895; in 1850, 5,998. Its cap. is Lincolnton.—Also a co. in the S part of the state of Tennessee, comprising a superficies of 650 sq. m., drained by Elk river and its branches. Pop. in 1840, 21,493; in 1850, 24,281. Its cap. is Fayetteville.—Also a co. in the central part of the state of Kentucky, containing an area of 432 sq. m.

It consists of an elevated plateau, and is drained by Dick's river and its branches, and the head-streams of Green river. Pop. in 1840, 10,187; in 1850, 9,697. Its cap. is Stanford.—Also a co. in the E part of the state of Missouri, containing a surface of 576 sq. m., drained by Cuivre river and its branches. Pop. in 1840, 7,449; in 1850, 9,422. Its cap. is Troy.—Also a township of Penobscot co., in the state of Maine, 117 m. NNE of Augusta, bounded on the NNE by Penobscot river, and watered by Matanaucook river. Pop. in 1840, 1,121.—Also a township of Grafton co., in the state of New Hampshire, 62 m. N by W of Concord. It has a mountainous surface, and is drained by Pemigewasset river, and its affluent the Merrimac. Pop. 76.—Also a township of Addison co., in the state of Vermont, 55 m. SW of Montpelier. It has a hilly surface, and is watered by New Haven river and a branch of Mud river. Pop. 770.—Also a township of Middlesex co., in the state of Massachusetts, 16 m. W by N of Boston, bounded on the W by Sudbury river, and drained by a branch of Charles river. The surface is hilly, and the soil diversified. Pop. 686.—Also a township of Delaware co., in the state of Ohio, 44 m. N of Columbus. Pop. 549.—Also a village of Macoupin co., in the state of Illinois, 59 m. [illegible] by W of Springfield, near the head of Wood river.—Also a village of Yazoo co., in the state of Massachusetts, 40 m. NW of Jackson, on the E side of Jackson river.

LINCOLN, a county of Upper Canada, in the Niagara district, comprising 7 townships. Pop. in 1848, 17,774. This co. returns a member to the house-of-assembly.

LINCOLN, a small island in the China sea, in the group of the Paracels islands, in N lat. 16° 40′, E long. 112° 40′.—Also a port of South Australia, in Flinders' Land, on the SW side of Spencer's gulf, in S lat. 34° 48′, E long. 135° 44′. The port is good, but the environs are arid and sterile.—Also a town of Tasmania, in the hund. of the same name, and p. of Cadbury, on the Macquarie river.—Also a parish in the co. of Somerset, bounded on the N by Macquarie river; on the W by Ramsbury; on the S by Tierney; and on the E by the Isis.

LINCOLNSHIRE, a maritime county on the E coast of England; bounded on the NW and N by the co. of York, from which it is in a great measure separated by the Humber and its estuary; on the E by the German ocean; on the SE by the cos. of Leicester and Rutland; on the S by those of Northampton and Cambridge; and on the W by the co. of Nottingham. Its general form is semicircular; the circular portion being washed by the sea. It extends between 52° 28′ and 53° 54′ N lat., and between 0° 18′ E and 1° 3′ W long. Its extreme length is about 70 m.; breadth, 45 m.; circumf., 260 m. Its area is variously computed at 2,747 to 2,888 sq. m., or 1,663,850 to 1,758,720 acres; the former being the estimate according to the pop. and other returns; the latter that of the Trigonometrical survey. It has been calculated that about 473,000 acres are enclosed marsh and fen land; 200,000 acres, commons, wastes, and unembanked salt marshes; 268,000, common fields; 25,000, woodlands; and 927,120 enclosed upland. The coast-line of this co. is about 110 m. in length, including the Humber. Excepting at Clea-Ness, near Grimsby, the whole is flat and low, and the distance between high and low water mark is sometimes not less than 2 m. There are many banks called chain-huts, and composed of roots, trunks, and branches of trees, intermixed with leaves of aquatic plants, which are dry at low water. These circumstances prove that the coast has undergone considerable changes. Vast tracts of land have been redeemed from the sea by embankments even from the time of the Roman occupation, when that immense area called the Lincolnshire level was recovered, on the one hand from the upland waters, by the Cardyke, and on the other from the ocean, by the Old Sea dyke and other great banks along the coast. Even at the present day, a scheme of Sir John Rennie's proposes to reclaim no less than 170,000 acres of fertile territory in the level of the Wash.

Natural divisions, &c.] The county is naturally divided into the wolds, the heaths, and the fens. Young computes the wolds at 234,880 acres. They are ridges of hills of no great alt., but from the flatness of a large portion of the co. commanding at times extensive prospects. They stretch from near Barton-on-Humber S to Spilsby, in two parallel lines, averaging nearly 8 m. in breadth. The heaths consist of a range of hills passing from N to S in a straight line, in the meridian of the city of Lincoln. The fens are partly in the district of Kesteven, but chiefly in that of Holland. The greatest division of the fenny country is the extensive tract of land to the E of the wolds, called 'the Marsh,' extending over the greater part of the coast, and varying from 8 to 10 m. in breadth, and proteeted from encroachments of the sea by embankments. Other extensive fens are Deeping fen, near Market-Deeping; Holland fen and West fen, within 6 m. of Boston; East fen, near Wainfleet; an extensive tract in the hund. of Langoe, extending along the river Witham; the Ancholme level, extending along the river of that name for at least 10 m.; and the isle of Axholme, a large space included between the rivers Don and Trent at the NW angle of the co. Of these fens many portions have been brought under cultivation, the water being carried off in ditches, terminating in larger fosses called dykes, some of which are so large as to be navigable by barges. The whole extent of land gained by embankment and draining in this co. has been estimated at 180,000 acres.

Rivers.] The principal rivers are the Trent, the Welland, the Witham, and the Ancholme.--The Trent touches the co. near Newton-upon-Trent, runs along the border of the co. in a N direction, and falls into the upper part of the estuary of the Humber. Vessels of considerable burthen can ascend it to Gainsborough, and steamers and barges to its junction with the Fossdyke navigation, which is further navigated by steamers to Lincoln.—The Welland rises near Sibertoff in Northamptonshire, and bounds the co. as far as Market-Deeping, where, entering the fens, it leaves a portion of its waters and sludge, and divides into two streams, the one branching off to Wisbeach, and the other through an artificial channel to Spalding and Surfleet, where, meeting the Glen, it empties itself into the Fossdyke wash, S of Boston.—The Glen runs to the Welland at Fossdyke, a very winding course.—The Ancholme rises in the Wolds, to the W of Market-Raisen; and after running W for a few m. turns to the N, and runs towards the Humber, passing Brigg or Glanford-bridge. It has been rendered navigable to Bishop's bridge, a distance of 8 m. from its source. It gives off a branch of 5 m. in length, called the Caistor canal.—The Witham rises on the borders of the cos. of Lincoln and Rutland, runs N to Grantham, whence it turns W, and afterwards passing to the E through a depression in the ridge of hills, by a sweep towards the SE reaches Boston, below which it falls into the sea. This river is generally shallow, but it has been deepened to facilitate the escape of the water from the fenny countries through which it passes. From Boston to near Tattershall the channel is entirely artificial. The Bain, a tributary to the Witham, has been rendered artificially navigable to the Witham near Tattershall. Another tributary rises

to the S of Sleaford, whence a navigable cut has been made to the Witham, 3 m. S of Tattershall. Another tributary rises to the S of Sleaford, whence a navigable cut called the Sleaford canal has been made to the Witham. The Ludd rises to the W of Louth, and runs N for 11 m. to Tetney haven. This river has also been rendered navigable by a cut to Louth. There are a number of minor streams, either tributary to those already noticed, falling into the Humber, or directly into the German ocean.

Soils and agriculture.] The soils vary considerably with the strata in their several districts. In the heath division a good sandy loam is common; in the wolds, sand and sandy loam with chalk, or flinty loam on chalk marl. From Binbrook to Caistor, with the exception of Caistormoor, a sandy loam is the principal; and thence sand with an intermixture of argillaceous earth till they change into the rich loam of which Bartonfield principally consists. The North marsh comprises a large extent of rich salt lands; the South consists of stiff, cold, and tenacious clay of inferior value; the intervening land is rich brown loam. The isle of Axholme presents the most fertile soil in England, consisting of black loam and other rich earths. In the fens, peat, deep sandy loam, and rich soapy blue clay are found; and in different other parts of the co. various degrees of sandy and loamy soils are to be met with.—The most singular and beneficial mode of improvement practised in L. is 'warping;' this may be shortly described as permitting the tide to flow over the land at high and letting it off at low water. This deposited soil is of the richest quality, consisting of argillaceous and siliceous earth, with a very large proportion of mucilage. Spring tides are preferred, and so great is the quantity of mud that from 10 to 15 acres have been known to be covered with silt from 1 to 3 ft. in thickness during one spring of 10 or 12 tides. Peat moss of the most sterile character has been by this process covered with soil of the greatest fertility; and swamps which in the memory of parties now living were resorted to for leeches are now, by the effects of warping, converted into firm and fertile fields. Near the mouth of the river the water is muddiest, and the process can there be more easily accomplished; but sluices are seen for nearly 30 m. up the Trent, so that even at that distance from the Humber the water has not entirely lost its fertilizing particles of mud. The expense of warping varies from £15 to £21 an acre.—The agriculture of L. has long been celebrated. There are some large estates, but many farmers work their own ground of from 400 to 500 acres in extent. The land is chiefly freehold, except in the low districts; and leases are not common. No land in the empire produces greater crops of wheat or beans than the marshes in Holland fen. The pasture-lands in these marshes, though not quite so rich as some others in this part of the county, graze very even and smooth, and are excellently adapted for fattening horses; the sheep fed on them are of large size, and produce fleeces of great weight. The grazing lands throughout the co. in general are very extensive. Almost all the division of low lands called 'marsh' has been for ages applied to grazing; and some of it is exceedingly rich, carrying great quantities of feeding stock.—The short-horned Lincolnshire, and the long-horned Leicestershire cattle, are bred here to great advantage, chiefly for the butcher. There are no proper dairy farms, except perhaps a few in the vicinity of the larger towns. Oxen are frequently employed in husbandry. The sheep, chiefly of the large Lincoln and Leicestershire breeds, are said to be nearly 2,500,000. Hogs are numerous, and the breed is improving. The horses are remarkably fine, and are chiefly sold in the markets of Yorkshire. Extensive rabbit-warrens exist. Geese are bred to a large extent, chiefly for the sake of their feathers. Many of the fens, still in a state of waste, serve little other purpose than the breeding and rearing of geese. Wild ducks are numerous, and are taken in decoys from the end of October to Feb. The decoys of L. supply the market of London with wild fowl. It is said that 10 decoys in the West fen during one winter supplied 31,200 birds.—L. is not a manufacturing co. Flax and hemp are dressed and spun at various places, but to no great extent.

Canals.] Besides the extensive artificial navigation of its rivers above noticed, various canals have been cut, and others are projected. The Fossdyke, cut in the reign of Henry I., but supposed to have originally formed a drain cut by the Romans, joins the Trent at Torksey and the Witham at Lincoln; and thus the whole basin of the Trent and Ouse, and by other canals the manufacturing districts of Lancashire, communicate with Boston, one of the principal ports in Lincolnshire. The Grantham canal runs between Grantham and the Trent at Nottingham, by a very circuitous course, 30 m. in length, with a fall of 148 ft. The Alford canal is a short cut from Alford to Anderby creek on the coast.

Roads.] The road from London to Hull enters this co. at Market-Deeping, and runs N by Bourne, Folkingham, Sleaford, Lincoln, and Brigg, to the ferry at Barton-on-Humber. From this road, previous to its entering the co., the Louth and Boston mail-road branches off. The Great North road enters the co. at Stamford, and runs NNW by Grantham into Nottinghamshire. Other roads radiate from Lincoln by Newark to Nottingham, by Wragby and Louth to Saltfleet, and by Market-Raisen to Grimsby. The highway returns for 1839 show an expenditure of £80,664 on 4,620 m. of road within the co.

Railways.] Though for levelness of line and cheapness of construction L. is peculiarly suited for railway intersection, it was among the last to reap the benefits derivable from this new mode of transit. It is now however provided with three great lines of railroad connecting Boston, Lincoln, and Grimsby with each other and with the several great systems of railways to the N, W, and S of the co.

Geological structure.] The strata run nearly in the line of the length of the co. from N to S, in parallel belts, occupied by different formations succeeding each other from W to E. The W skirts of the co. bordering on the Trent are occupied by the red marl strata, which extend into Nottinghamshire and Yorkshire. On the border of the Trent, and in the isle of Axholme, gypsum is abundant in the red marl. E of the red marl runs a belt of lias subjacent to the oolite, and occupying the valley of the Witham between Newark and Grantham. A narrow strip of oolite divides the lias from the low district of the Oxford clay, from the Humber, as far S as Lincoln, whence it spreads to the NW, W, and S. The Oxford clay forms the valley of the Ancholme S to Market-Raisen, whence it spreads to Lincoln, Horncastle, and Spilsby. This formation also constitutes the extensive central valley, called the Ancholme level, separating the wolds, with the adjacent hills, from the higher grounds of the heath formed on the W by the oolite. Along the foot of the wolds the green sand crops out, and forms a lower terrace nearly parallel to the downs, but in part separated by the valleys of the Steeping and the Bain. The chalk extends beneath the alluvium which occupies the whole of the remainder of the co. to the E and S, forming, in the latter direction, part of the great fen country of England.

Population.] The pop. of this co. in 1801 was 205,340; in 1811, 233,628; in 1821, 277,514; in 1831, 311,903; in 1841, 356,226; in 1851, 400,266. The increase per cent. in 50 years, from 1801 to 1851, thus appears to have been 94·62; and the annual rate of increase per cent. 1·34.—The changes recently made by the ecclesiastical commissioners on the diocese of Lincoln, have not affected the county itself. In 1833, the total number of Sunday schools in the county was 543, attended by 31,881 children; of daily schools 1,344, attended by 36,353; of infant schools 71, attended by 1,771.—The deposits in savings' banks within the co., 20th November, 1839, were £376,892: average for each depositor £28; on 20th November, 1849, £501,556; number of depositors 20,920; average of deposit £24.—The poor-rate returns for 3 years to Easter, 1750, show an average expenditure of £14,790 on the poor of this county. In 1803, the expenditure was £100,896: in 1839, £104,100; in 1847, £130,504. The annual value of property assessed to the income tax in 1815 was £2,061,830; in 1843, £2,868,339.

Administrative divisions.] The great civil divisions of the co. are called 'Parts.' The parts of Lindsey extend from the sea to the borders of Nottingham, and from the river Witham to the Humber, comprehending a space nearly equal to half the co. The division of Kesteven forms the SW portion of the co. The parts of Holland are bounded on the N by Lindsey, on the W by Kesteven; and on the S by the cos. of Cambridge and Northampton. The co. is subdivided into 630 parishes, containing, besides the co. of the city of Lincoln, the boroughs of Boston, Grantham, Grimsby, and Stamford, and the market-towns of Alford, Barton-upon-Humber, Bolingbroke, Boston, Bourne, Caistor, Donnington, Epworth, Falkingham, Gainsborough, Glandford-bridge, Grantham, Grimsby, Holbeach, Horncastle, Kirton, Long-Sutton, Louth, Market-Deeping, Market-Raisen, Sleaford, Spalding, Spilsby, Stamford, Swineshead, Tattershall, Wainfleet, and Wragby. The co. is included in the dio. of Lincoln and prov. of Canterbury. Under the reform act this co. returns 4 members to parliament, viz. 2 for the parts of Lindsey, and 2 for the parts of Kesteven and Holland. The number of electors registered for the county in 1837, was 18,241; in 1848, 20,561, viz. 11,398 for the N, and 9,163 for the S division.—The city of Lincoln, and the boroughs of Grantham, Boston, and Stamford, each also return 2 members, and Grimsby 1.—L. is included in the midland circuit. The assizes for the co. are held at Lincoln.

History.] In ancient times this co. formed a portion of the territory of the *Coritani*, and it was included in the Roman prov. *Britannia Prima.* Under the Anglo-Saxon government, it formed a part of the kingdom of Mercia. It suffered much from the inroads of the Danes. It was the scene of the decisive battle in the baronial wars of John and his son. The ecclesiastical edifices in this co. are in general remarkably fine: no co. in the empire contains so large a number of elegant churches.

LINCOLNTON, a village of Lincoln co., in the state of N. Carolina, U. S., 172 m. W by S of Raleigh, on the E side of Little Catawba river. Pop. in 1840, 836.—Also a v. in Lincoln co., in the state of Georgia, 98 m. NE of Milledgeville. Pop. about 75.

LINCOLNVILLE, a township of Waldo co., in the state of Maine, U. S., 10 m. S of Belfast, bordered on the E by Penobscot river. It has a large pond on its SW border, and in its N part is a fine harbour called Duck Trap. Pop. in 1840, 2,048.

LIND, a village of Prussia, in the reg. of Coblenz, circle of Adenau. Pop. 295.

LIND (Ober), a village of Saxe-Meiningen, in the bail. and 2 m. S of Sonnenberg, on the Steinach. Pop. 630.

LINDA, a village, or group of 3 villages distinguished as Middle, Upper, and Lower L., of Prussia, in Upper Lusatia, reg. and 45 m. WNW of Liegnitz. Pop. 1,900.

LINDACH, a village of Bavaria, 9 m. SW of Abensberg.

LINDAU, a town of Bavaria, 25 m. E of Constanz, in N lat. 47° 31′ 44″, built in a superb position on an island in the lake of Constanz, and communicating with the mainland by a wooden bridge 300 ft. in length. Pop. 3,902. It has an active trade in corn, fruit, and cheese.—Also a town in the S of Hanover, on the Ruhme, 10 m. NE of Gottingen. Pop. 1,100. — Also a town of the principality of Anhalt-Kothen, 5 m. N of Zerbst, on the l. bank of the Nuthe. Pop. 920.

LINDE, a village of Prussia, in the reg. of Potsdam. circle of Ruppin. Pop. 194.—Also a village in the reg. of Stettin, circle of Greifenhagen. Pop. 369.—Also a village in the reg. of Stettin, circle of Pyritz. Pop. 173.

LINDE, a river of Mozambique, a branch of the Zambese, which detaches itself from the main stream near Luabo, and flows by a course of about 42 m. into the channel of Mozambique.

LINDE (La), a town of France, in the dep. of Dordogne, 12 m. E of Bergerac, on the r. bank of the Dordogne. Pop. 1,600.

LINDE, or Lindesberg, a town of Sweden, on the NE shore of a small lake of the same name, 24 m. N of Œrebro. Pop. 760.

LINDEBŒUF, a town of France, in the dep. of Seine-Inferieure, cant. and 3 m. N of Yerville. Pop. 660.

LINDEBY, or Lindby, a parish of England, in the co. and 7½ m. NNW of Nottingham. Area 1,190 acres. Pop. in 1831, 332; in 1841, 271.

LINDEN, a village of Hanover, about 2 m. W of the capital, at the foot of the Linderberg. Pop. 1,300.—Also a village of Prussia, in the reg. of Liegnitz, circle of Bunzlau. Pop. 207.—Also a village of Prussia, in the reg. of Liegnitz, circle of Glogau. Pop. 643.

LINDEN (Grossen), a village of Hesse-Darmstadt, in the prov. of Lower Hesse, 6 m. ESE of Wetzlar. Pop. 889.

LINDENA, a village of Prussia, in the reg. of Frankfort, circle of Luckau. Pop. 353.

LINDENAU, a village of Bohemia, in the circle of Leitmeritz, 3 m. WSW of Gabel. Pop. 1,150.—Also a village of Saxe-Meiningen, 2 m. ESE of Heldburg. Pop. 347.—Also a group of 3 villages, distinguished as Great, Little, and New L., in the Prussian reg. of Königsberg, bail. of Tapiau. Conjoined pop. 795.—Also a village of Prussia, in the reg. of Oppeln, circle of Grottkau. Pop. 1,036.—Also a village of Prussia, in the reg. of Liegnitz, circle of Landshut. Pop. 422.

LINDENDORF, a village of Prussia, in the dep. of Gumbinnen, circle of Niederung. Pop. 167.—Also a village in the reg. of Königsberg, bail. of Tapiau. Pop. 332.

LINDENFELS, a town of Hesse-Darmstadt, 22 m. NE of Manheim. Pop. 792.

LINDENHARD, a village of Bavaria, 4 m. N of Pegnitz. Pop. 370.

LINDERN, a parish and village in the grand-duchy of Oldenburg, circle and 12 m. W of Kloppenburg.

LINDESAY, a parish in the co. of Bathurst, in New South Wales, lying between Combul creek on the W, and the Bellubula river on the E.—Also a river of South Australia, which falls into the Murray in S lat. 33° 58′.

LINDESAY (Mount), a mountain of New South Wales, at the head of Tweed river, 55 m. SW of Moreton bay. Alt. 5,700 ft. above sea-level.

LINDESNÆS, or The Naze, a cape forming the S extremity of Norway, in N lat. 57° 58′, E long. 7° 3′.

LINDFIELD, a parish of Sussex, 3 m. E of Cuckfield. Area 5,350 acres. Pop. in 1841, 1,939.

LINDHEIM (Gross), a village of Hesse-Darmstadt, 4 m. SSW of Giessen. Pop. 602.

LINDLEY, a chapelry in the parish of Huddersfield, Yorkshire, 2 m. NW of Huddersfield. Area 2,210 acres. Pop. in 1831, 2,306; in 1841, 2,881.—Also a township in the p. of Otley, W. R. of Yorkshire. Pop. 140.

LINDLEY, a township in Steuben co., in the state of New York, U. S., 25 m. SE of Bath. Pop. 638.

LINDO, an alluvial island formed on the coast of Eastern Africa, at the mouth of the Zambese, by two of its smaller branches.

LINDO, a village on the E coast of the island of Rhodes, 23 m. S of Rhodes. It has a small harbour, and appears to occupy the site of the ancient *Lindos.*

LINDO (Cape), a promontory on the W coast of the island of Cerigo, in N lat. 36° 27′, E long. 40° 34′.

LINDONA, a village of Prussia, in the reg. of Frankfurt, circle of Luckau. Pop. 353.

LINDOSO, a town of Portugal, in the prov. of Entre-Ducro-e-Minho, comarca of Vianha, on the Lima, 57 m. NNE of Oporto. Pop. 580.

LINDOW, a town of the Prussian prov. of Brandenburg, 37 m. NNW of Berlin. Pop. 1,420.

LINDOW (Ober and Unter), two villages of Prussia, in the reg. of Frankfurt, circle of Lebus. Pop. of Ober L. 240; of Unter L. 184.

LINDRIDGE, a parish of Worcestershire, 5½ m. E by N of Tenbury. Area 6,250 acres. Pop. in 1831, 1,802; in 1841, 1,815.

LINDSELL, a parish in Essex, 3½ m. SE of Thaxted, on a branch of the Chelmer. Area 2,530 acres. Pop. in 1831, 381; in 1841, 393.

LINDSEY, a parish in Suffolk, 3¼ m. WNW of Hadleigh. Area 1,850 acres. Pop. in 1841, 290.

LINDY, a small river of Eastern Africa, with a town of the same name near its mouth, in the state of Quiloa. It falls into the Indian sea, in S lat. 9° 59′.

LINESIDE, a township in the parish of Arthuret, co. of Cumberland, 3 m. ESE of Longtown, on the river Line. Pop. in 1831, 137; in 1841, 128.

LINFORD, or Lynford, a parish in Norfolk, 5 m. NNE of Brandon. Area 1,500 acres. Pop. in 1831, 91; in 1841, 105.

LINFORD (Great), a parish in Bucks, 2½ m. SW of Newport-Pagnell, intersected by a branch of the Grand Junction canal. Area 1,810 acres. Pop. in 1831, 420; in 1841, 474.

LINFORD (Little), a parish in Bucks, 2 m. W of Newport-Pagnell, on the river Ouse. Area 550 acres. Pop. in 1831, 55; in 1841, 64.

LING, a district and town of China, in the prov. of Hu-pih, div. of Hang-chu-fu, in N lat. 26° 32′, and E long. 113° 35′.—Also a district and town in the prov. of Shan-tung, and div. of Tse-nan-fu, in N lat. 37° 27′, and E long. 116° 40′.—Also a town of the Corea, in the prov. of Chu-sin, 45 m. SE of Haï-men.

LING, or Lyng, a parish in Norfolk, 6 m. NE by E of East Dereham, on the river Wensum. Area 2,020 acres. Pop. in 1831, 645; in 1841, 601.—Also a parish in Somersetshire, 6 m. SSE of Bridgewater, in the line of the Bridgewater and Taunton canal, and the Bristol and Exeter railway. Area 1,970 acres. Pop. in 1831, 343; in 1841, 422.

LINGA, two of the smaller Shetland isles, one lying off the mainland, in N lat. 60° 27′, opposite Firths Ness; and the other between Yell and Unst, in N lat. 60° 40′.

LINGA SOUND, a bay on the W coast of the island of Stronsa, in N lat. 59°.

LINGAN, a river of Ireland, which runs into the Suir, 2 m. below Carrick-upon-Suir, after a SE course of 12 m.

LIN-GAN-FU, a division and town of China, in the prov. of Yun-nan. The div. comprises 8 districts. The town is in N lat. 23° 37′ 12″, and E long. 103° 4′ 30″.

LIN-GAN-HEEN, a district and town of China, in the prov. of Che-keang, div. of Hang-chu-fu, in N lat. 30° 16′, and E long. 119° 42′.

LINGARTHS, a township in the parish of Almondbury, W. R. of Yorkshire, 3½ m. S of Huddersfield. Pop. in 1831, 758; in 1841, 801.

LINGAYEN, a bay on the W coast of the island of Luçon, in the Philippines, in N lat. 16° 4′.

LING-CHE, a district and town of China, in the prov. of Shan-tung, div. and 18 m. NNW of Tsing-chu-fu, on the l. bank of the Chi-ho, in N lat. 36° 55′, and E long. 118° 32′.

LING-CHUEN-HEEN, a district and town of China, in the prov. of Shan-se, div. of Tsih-chu-fu, in N lat. 35° 42′, and E long. 113° 17′.—Also a district and town, in the prov. of Kwan-se, and div. of Kwei-lin-fu, in N lat. 25° 25′, and E long. 110° 20′.

LINGE′, a village of France, in the dep. of Indre, cant. and 6 m. E of St. Martin-de-Tournon. Pop. 1,700.—Also a river of Holland, in the prov. of Gelderland, which flows into the Meuse, on the r. bank, near Gorcum, after a course of 40 m.

LINGEBATE, a river of Madagascar, which flows into the bay of Antongil, after a SSE course of 102 m.

LINGEN, a parish in Hereford, 4 m. NE of Presteigne, on a branch of the Lugg. Area 2,380 acres. Pop. in 1831, 298; in 1841, 285.

LINGEN, a county of Hanover, in the W part of the gov. of Osnabrück. It is a flat district intersected by the Ems. Its cap., of the same name, is situated on the r. bank of that river. Pop. 2,776. It has manufactories of cottons, gunpowder, and brandy.

LINGEN, or Lingga, an island in the Eastern seas, situated off the NE coast of the island of Sumatra, in S lat. 0° 20′, E long. 104° 40′. It is about 40 m. in length, and 20 m. in breadth; and is of an irregular figure. It has a remarkable mountain in its centre, terminating in a fork, which seamen have distinguished by the appellation of 'the Ass's ears.' The surface is low.

LINGENAU, a town of the Tyrol, in the co. and 9 m. ESE of Bregenz. Pop. 1,700.

LINGFIELD, a parish of Surrey, 6 m. SSE of Godstone. Area 7,440 acres. Pop. 1,866.

LINGHOLM, a small island of the Orkney group, near the W coast of Stronsa, in N lat. 50° 59′.

LING-LING-HEEN, a district and town of China, in the prov. of Hu-nan, div. of Yung-chu-fu.

LING-PAOU-HEEN, a district and town of China, in the prov. of Ho-nan, div. and 15 m. WSW of Shen-chu, on the r. bank of the Hoang-ho, in N lat. 34° 42′, and E long. 110° 50′.

LING-PEIH, a district and town of China, in the prov. of Gan-hwuy, div. of Fung-yang-fu, in N lat. 33° 33′ 26′, and E long. 117° 32′ 47″.

LING-SHAN-HEEN, a district and town of China, in the prov. of Kwang-tung, div. and 60 m. N of Leen-chu-fu, at the foot of a lofty mountain, in N lat. 22° 24′, and E long. 109° 0′ 10″.

LING-SHOW, a district and town of China, in the prov. of Chih-le, div. of Ching-ting-fu, in N lat. 38° 18′, and E long. 114° 31′.

LING-SHWUY, a district and town of China, in the prov. of Kwang-tung, in the SE part of the island of Hai-nan, 108 m. S of Keun-che-fu, on the l. bank of the Ta-ho-choui. Pop. (male) 30,586. It is enclosed by a wall; and contains several temples and a library.—Also a district and town in the prov. of Sze-chuen, div. of Shun-king-fu, in N lat. 30° 23′, and E long. 106° 54′.

LING-TAE, a district and town of China, in the prov. of Kan-suh, div. of Ping-leang-fu, in N lat. 34° 59′, and E long. 107° 23′.

LING-TSING-CHU, a division and town of China, in the prov. of Shan-tung. The div. comprises 3 districts. The town is 75 m. WNW of Tse-nan-fu, on the Yu-ho canal, at the junction of the Wei-ho, in N lat. 36° 57′ 15″, and E long. 115° 55′. It is a large and populous and handsome town, and contains several temples and mosques. Of the former, one dedicated to Fo is an octagon tower, consisting of 9 stories, and rising to the height of 140 ft. The port, which is the entrepot for Pe-king, has an active trade.

LINGUA GROSSA, a town of Sicily, in the Val-

di-Demona, 9 m. W of Taormina, on the NE flank of Mount Etna. Pop. 2,450.

LINGUETTA (Cape), a cape of Albania, at the entrance of the Adriatic, in N lat. 40° 26′ 15″, E long. 19° 14′ 21″.

LINGWOOD, a parish of Norfolk, 9 m. E of Norwich. Area 810 acres. Pop. in 1841, 473.

LINHARES, a town of Portugal, in the prov. of Tras-os-Montes, 19 m. S of Mirandella. Pop. 1,000. —Also a town of Brazil, in the prov. of Porto-Siguro, on the l. bank of Rio Doce.—Also a town of Portugal, in the prov. of Beira, 15 m. WNW of Guarda. Pop. 890.

LINITAN, a small island in the Eastern seas, 5 m. N of Serangan, in S lat. 5° 36′.

LIN-KAOU, a district and town of China, in the prov. of Kwang-tung, and W part of the island of Hai-nan, on the l. bank of the Wen-lan-choui, 45 m. SW of Keun-che-fu, in N lat. 19° 46′ 48″, and E long. 109° 14′ 50″. To the NW of the town is the mountain of Phi-ye-chan, celebrated for a great battle between the Chinese and Li.

LINKENHOLT, a parish of Hants, 8 m. N of Andover. Area 540 acres. Pop. in 1841, 109.

LIN-KEANG-FU, a division and town of China, in the prov. of Keang-se. The div. comprises 4 districts. The town is 54 m. SSW of Nan-chang-fu, on the l. bank of the Yu-ho, in N lat. 27° 57′ 36″, and E long. 115° 27′. The locality is fertile and salubrious, but scantily populated.

LIN-KEU, a district and town of China, in the prov. of Shan-tung, div. of Tsing-chu-fu, in N lat. 36° 35′, and E long. 118° 50′.

LIN-KEW, a district and town of China, in the prov. of Shan-se, div. and 165 m. NE of Tae-tung-fu, on the l. bank of the Tang-ho, in N lat. 39° 28′, and E long. 114° 15′.

LINKINHORNE, a parish of Cornwall, 4½ m. NW of Callington. Area 8,270 acres. Pop. in 1831, 1,159; in 1841, 1,525.

LINKIOPING, or Linköping, a laen of Sweden, nearly corresponding to the ancient prov. of East Gothland, and stretching along the Baltic to the S of Stockholm. Its territorial extent is 4,253 sq. m. Pop. in 1848, 206,625. Its surface is mountainous and thickly studded with lakes. The principal river is the Motala.—Its cap., of the same name, stands on the Stang-aa, near its influx into Lake Roxen, 110 m. SW of Stockholm. It is one of the oldest towns of Sweden; is a bishop's see, and has a cathedral, a college, and 3 churches. Pop. 4,000.

LIN-KWEI-HEEN, a district and town of China, in the prov. of Kwan-se, div. of Kwei-lin-fu.

LINLEY, a parish in Salop, 4 m. NW by N of Bridgnorth. Area 510 acres. Pop. in 1841, 111.

LINLITHGOW, a parish of Linlithgowshire, or West Lothian, extending 4¾ m. due S from Bonside; and 6¼ m. due E from the most westerly bend of the Avon. Area 7,600 Scottish acres. The Avon, beautiful in the features of the deep and tufted glen along which it flows, runs along the W boundary 5 m. L. loch, immediately N of the burgh, and covering about 80 acres, is a fine sheet of water, well-stored with pike, perch, and eels. A silver mine, in the S extremity, is said to have anciently yielded much wealth to the Haddington family. On a tract of ground E of the town, still called Boroughmuir, Edward I. encamped on the night previous to his defeating the troops of Wallace in the battle of Falkirk. A calico printing establishment, a bleachfield, and several grain mills, are situated on the Avon in this p. At the first of these, about 1 m. W of the town, stands the v. of Linlithgow-bridge, chiefly inhabited by calico-printers. The parish is traversed by the Edinburgh and Glasgow railway, the Slamannan railway, and the Union canal. Pop. in 1801, 3,596; in 1831, 4,874; in 1841, 5,950.

The ancient royal burgh of L., the county-town of West Lothian, stands in N lat. 55° 58′ 35″, and in W long. 3° 35′ 50″, 16 m. W of Edinburgh, and 8 m. E of Falkirk. It is pleasantly situated in a hollow along the S side of L.-loch; and mainly consists of a single street running E and W, and measuring altogether ¾ m. in length. A slow process of rebuilding has been going on during upwards of half-a-century; and has, to a considerable extent, modernized this street. Yet it continues to bear many marks of ancient grandeur. The church, one of the most entire and beautiful specimens of Gothic architecture in Scotland, is 182 ft. in length from E to W, and 100 ft. in breadth, including the aisles. Only the E end is now used as a place of worship. Immediately N of the church stands the magnificent ruin of the palace. The eminence which bears it aloft advances almost into the middle of the loch. The palace occupies about an acre of ground, and though heavy in appearance from its almost total want of windows, is still a picturesque and beautiful object. The pile, in its quadrangular and final form, was completed by James VI., and continued to be habitable till January 1746. The Union canal is conducted along the rising ground on the S of the town, at the distance from the High-street of from 70 to 450 yds., and has a small basin less than 100 yds. from the High-street, and near the E end of the town. The Edinburgh and Glasgow railway passes along between the town and the canal. The annual revenue of the burgh, for 1832, was £710; for 1849–50, £766. L. unites with Falkirk, Airdrie, Hamilton, and Lanark, in sending a member to parliament. Constituency in 1832, 115; in 1850, 94. Pop. of the burgh in 1811, 2,557; in 1831, 3,187; in 1851, 4,189. —On the 7th December, 1542, Mary, of affecting memory, whose history invokes so many tears for both her crimes and her sufferings, was born in the palace. In 1545 a parliament met at L. on the 1st of October, and again on the 1st and the 19th of December. In 1552 a provincial council of the clergy was held in the town, to attempt measures for appeasing the popular outcry against the Popish establishment. On the 23d of January, 1569–70, the regent Murray, in passing through the town, was shot, in revenge of a private injury, by Hamilton of Bothwellhaugh. In 1646, when Edinburgh was scourged by the plague, L. afforded refuge to the senatus of the university, and flung open her palace for the session of parliament. L. gave the title of Earl to the family of Livingstone, also earls of Callendar, attainted in 1716.

LINLITHGOW, a lake of Australia-Felix, in the district of Portland bay, and NE angle of the co. of Normanby.

LINLITHGOWSHIRE, or West Lothian, a county of Scotland lying along the S side of the frith of Forth, nearly midway between the German ocean and the frith of Clyde. It is bounded on the N by the frith of Forth; on the SE by the river Almond and its tributary the Briech, which divide it from Edinburghshire; and on the W by Lanarkshire and Stirlingshire. The area, according to Armstrong's map of the Lothians, is only 112 sq. m., or 71,680 statute acres; but, according to Arrowsmith's map of Scotland, it is 121 sq. m., or 77,440 statute acres. The surface, though almost all champaign, nowhere subsides over more than a very small space into flatness. Cairn-maple, the most prominent summit of the line, has an alt. of 1,498 ft. above the level of the sea. Cocklerue attains a height of only 500 ft. The middle and W districts of the county are the most hilly.—The principal streams are the Almond, across

its S division and along its SE boundary, and the Avon 12 m. along its W boundary. Logie-water, a tributary of the Avon, drains much of the W division, through its head-waters, Barbauchlaw-burn and Ballencrieff-water. Brox-burn and several smaller streamlets drain the E division, and run into the Almond. Nether-mill-burn, Dolphinston-burn, and some tiny brooks, run N to the Forth. The only lakes are one on the boundary between Dalmeny and Kirkliston, Lochcoat in Torphichen, Lochend, and chief of all Linlithgow-loch. On the beach at the W extremity of this co., 2,000 acres are left dry at every reflux of the tide, but except at this point, the coast, for the most part, suddenly rises into a ridge adorned by culture and plantations.

Minerals and soil, &c.] L. abounds with coal in a workable state. A coal-mine at Borrowstounness was worked beneath the sea half-way across the frith, and had a principal outlet or shaft half-a-mile from the shore at a moat or quay in 12 ft. depth of water. The average annual coal-produce of the co., about 20 years ago, was 44,000 tons; but it has been greatly increased of late years. Limestone everywhere abounds. Freestone seems to stretch beneath the whole co. A basaltic rock, with many of its pillars in the form of well-defined regular prisms, forms an almost perpendicular breastwork 60 or 70 ft. high, and 750 ft. long, on the S side of Dundas-hill. Ironstone abounds in Borrowstounness, Torphichen, Bathgate, Abercorn, and probably other parishes. Mundic, fullers' earth, potters' clay, brick clay, and red chalk occur.—The co. has all the varieties of soil from bad to the best, which can depress or invigorate husbandry. Of the whole area, according to proximate calculation, 19,900 acres are clay, either of prime carse kind, or otherwise of good quality; 22,700 are clay, on a cold bottom; 9,500 are loam; 9,500 are light gravel and sand; 14,000 are moorland and high rocky ground; 1,500 are moss; and the remaining 460 are occupied by lakes and rivers. Farm-steads are generally in a creditable and neat condition. Farms are, for the most part, from 70 to 200 acres in extent.

Considering its wondrously rich facilities as to coal, useful minerals, and central position, L. is poor in manufactures. A cotton-mill and a flax-mill at Blackburn, some tanneries and shoe-making establishments at Linlithgow, extensive salt-works at Borrowstounness, a soap-making establishment at Queensferry, 520 looms at Bathgate, and 218 at Whitburn, kept in motion by the manufacturers of Glasgow, small ship-building yards, and two or three distilleries and breweries, constitute nearly the whole amount of outward manufacturing display. The traffic in coal is very extensive, and that in freestone and salt is of some importance.—The first turnpike in L. was that from Edinburgh to Queensferry, made in 1751. All the three great roads between Edinburgh and Glasgow, by way respectively of Linlithgow, Bathgate, and Whitburn, and also two other turnpikes, one near the coast and one near the S boundary, run across it from E to W. Both the Union canal and the Edinburgh and Glasgow railway bisect it from E to W.

Towns, &c.] Its sea-ports are Queensferry, Blackness, and Borrowstounness; its royal burghs, Linlithgow and Queensferry. Its other towns and considerable villages are Bathgate, Whitburn, Blackburn, Borrowstounness, Broxburn, and Kirkliston.—The co. returns one member to parliament. Constituency in 1839, 702; in 1850, 512. The land-rental in 1808 was £64,518; the annual value of real property, as assessed in 1815, £97,597; in 1843, £104,629. —The pop., owing probably to the want of large or manufacturing towns, has undergone less proportional increase during the last cent. than in most other districts of Scotland. In 1801 it was 17,844; in 1811, 19,451; in 1821, 22,695; in 1831, 23,291; in 1841, 26,872; in 1851, 29,969, being an increase of 68 per cent. in 50 years; that for all Scotland being 70 per cent.—L. is ecclesiastically divided into 13 parishes.—At the Christian epoch, L. was inhabited by the British tribe of the *Gadeni*. It appears on record as a sheriffdom, or shire, in the reign of Malcolm IV. At the abolition of hereditary jurisdictions in 1747, the Earl of Hopetoun claimed compensation for the sheriffdom of L.

LINN, the vulgar Scotch for a pool or deep reach in the bed of a river. It is evidently derived from the Gaelic *Linne*, which is the Welsh *Llynn*, and perhaps radically the same with the Greek λιμνη.

LINN, a town of Prussia, in the prov. of the Rhine, regency and 10 m. NNW of Düsseldorf, circle and 3 m. E of Krevelt. Pop. 1,000. It contains the ruins of a fine castle, and has several spinning-mills and manufactories of linen.

LINN, a county in the N part of the state of Missouri, U. S., comprising an area of 588 sq. m., drained by Locust and Yellow creeks. Pop. in 1840, 2,245; in 1850, 4,060. Its capital is Linneus.—Also a town on the W part of the territory of Iowa, containing a surface gently undulating of 720 sq. m. It is drained by Buffalo creek and Cedar fork, and is very fertile. Pop. in 1840, 1,373.

LINN, a village of Switzerland, in the cant. of Aargau, circle of Brugg. Pop. 171.

LINNA, an island of Norway, off the coast of North Trondheim, in N lat. 64° 5′.

LINNE, a parish of Holland, in the prov. of Limburg, on the Maas, SW of Roermond. Pop. 590.

LINNEUS, a township of Aroostook co., in the state of Maine, U. S., 8 m. SW of Houlton, drained by a branch of Matawamkeag river. Pop. in 1840, 311.

LINNHE (Loch), an arm of the sea, stretching between the districts of Appin and Morvern in Argyleshire, in a NE direction, from the sound of Mull, as far as Coran ferry, where it takes a N direction, and acquires the name of Loch-Eil. It gives off, on its E side, first Loch-Etive, then Loch-Creran, and farther inward, on the same side, Loch-Leven. The island of Lismore lies in the mouth of Loch-Linnhe; and there are several smaller islands interspersed through it.

LINNICH, a town of Prussia, in the prov. of the Rhine, regency and 20 m. NNW of Aix-la-Chapelle, circle and 5 m. NNW of Juliers, on the Roer. Pop. 1,393. It has several spinning-mills and tanneries.

LINOLA, a town of Spain, in Catalonia, in the prov. and 11 m. ENE of Lerida, and partido of Balaguer, on a height, in the plain of Urgel. Pop. 900. It has several manufactories of saltpetre.

LINOSA. See Algusa.

LIN-SEANG, a district and town of China, in the prov. of Hu-nan, div. and 18 m. NE of Yo-chu-fu, on the r. bank of the Yang-tse-keang, in N lat. 29° 34′, and E long. 113° 13′.

LINSELLES, or Lincelle, a commune of France, in the dep. of the Nord, cant. of Turcoing, 8 m. N of Lille. Pop. in 1841, 3,592. It has a brewery and several oil-mills. Hops and lint are extensively cultivated in the locality.

LIN-SHIH-HEEN, a district and town of China, in the prov. of Shan-se, div. of Ho-chu, in N lat. 36° 53′, and E long. 111° 46′.

LINSMEAU, a commune of Belgium, in the prov. of Brabant, dep. of Noduwez-Linsmeau. Pop. 428.

LINTAO, or Lantao, an island of China, in the Canton river, in N lat. 22° 17′, 5 m. S of Chung-saw-wan, and separated from Hong-Kong by the Lamma channel. It is of very irregular outline.

stretching NE and SW. Towards its centre it attains an alt. of 3,050 ft.

LINTH, a commune of Belgium, in the prov. of Brabant, dep. of Brusseghem. Pop. 370.

LINTH, a river of Switzerland, formed by the junction of the Limmernbach, Sandbach, and Oberstaffelbach, which descend from the Limmernalp and Mount Toedi, at the S extremity of the cant. of Glaris. It flows N through that cant.; crosses the W extremity of Lake Wallenstadt; runs thence between the cant. of St. Gall on the NE, and those of Glaris and Schwytz on the SE; and throws itself into the SE extremity of Lake Zurich. Its principal affluents are the Sernft on the r., and on the l. the Löntsch, the outlet of Lake Klön. It has a total course of 36 m., of which 12 m. are navigable. For the distance of about 3 m. from its egress from Lake Wallenstadt to Mollis, it is enclosed by banks. During the melting of the snows, the waters of this river flow with great impetuosity, and are loaded with stones and sand.

LINTHAL, a district of Switzerland, in the S part of the cant. of Glaris, consisting of the fertile and picturesque valley of the Linth. It contains a v. of the same name, and had a total pop. of 1,745 (Protestants) in 1850.

LINTHORPE, a township in the p. of Middlesborough, N. R. of Yorkshire, 3 m. E by S of Stockton-upon-Tees. Pop. in 1831, 229; in 1841, 246.

LINTHORST, or Leute, a village of Holland, in the prov. of Over-Yssel, cant. and 5 m. SE of Zwolle. Pop. 1,100.

LINTHOUT, a commune of Belgium, in the prov. of Brabant, dep. of Brusseghem. Pop. 370.

LINTHWAITE, a township in the p. of Almondbury, Yorkshire, 4 m. S of Huddersfield. Area 550 acres. Pop. in 1831, 2,852; in 1841, 3,301.

LINTON, a parish and market-town in the co. of Cambridge, 10½ m. SE of Cambridge, on the post-road from Cambridge to Colchester. Area 3,663 acres. Pop. in 1831, 1,678; in 1841, 1,838. The church is a spacious Gothic structure. The town consists of several irregular streets, the principal one being about a ½ m. in length. Tanning and currying of leather are carried on here, and in the vicinity are extensive nurseries and fruit-gardens.—Also a township in the p. of Church-Gresley, co. of Derby, 4½ m. SSE of Burton-on-Trent. Pop. in 1831, 267; in 1841, 253.—Also a parish in Devonshire, 13 m. E by N of Ilfracombe, at the mouth of the Lyn, comprising the vs. of L. and Linmouth. Area 1,530 acres. Pop. in 1831, 792; in 1841, 1,027. The v. of L. is much frequented during the summer season, and several good houses have been erected for the accommodation of visitors. About a ½ m. NW of L. is an extraordinary tract of scenery, called the Valley of stones. The bed of this valley, about 1 m. in length, but not above 100 yds. in width, is bounded by fragments of rocks piled one upon another. The heights on each side are of mountainous magnitude, and the masses form here and there rude natural columns fantastically arranged along the summits.—Also a township in the p. of Bromyard, Hereford, 3 m. SE of Bromyard. Area 2,630 acres. Pop. in 1831, 500; in 1841, 610.—Also a parish in the co. of Hereford, 4 m. E by N of Ross. Area 2,730 acres. Pop. in 1831, 636; in 1841, 750.—Also a parish in Kent, 4 m. S of Maidstone. Area 1,250 acres. Pop. in 1831, 733; in 1841, 900.—Also a township in the p. of Spofforth, Yorkshire, 1¾ m. SW of Wetherby, on the N bank of the Wharfe. Area 1,040 acres. Pop. in 1831, 166; in 1841, 169.—Also a township in the p. of Newton-upon-Ouse, Yorkshire, 10 m. NW of York. Area 2,030 acres. Pop. in 1831, 258; in 1841, 299.—Also a parish in the W. R. of Yorkshire, 7½ m. N of Skipton. The p. comprises the townships of Grassington, Hebden, L., and Threshfield. The town is pleasantly situated on the banks of the Wharfe. The cotton and worsted manufacture is carried on here to some extent. There are also lead-mines in the p. Area of p. 11,110 acres. Pop. in 1831, 2,113; in 1841, 2,060.

LINTON, a parish occupying the NW corner of Peebles-shire, and intersected by Lyne-water, which flows 5¾ m. SE through the interior of the p. Two-thirds of the entire area are strictly upland and pastoral. The p. is famous for its variety of the Cheviot breed of sheep, and has usually on its pastures about 10,000. The v. of L.—or, as it is sometimes called to distinguish it from a namesake in Haddingtonshire, West L.—stands on the l. bank of the Lyne, on the road from the metropolis to Moffat, 16½ m. from Edinburgh. Its pop. is about 400, of whom a large proportion are cotton-weavers. The v. has long been celebrated for its sheep-markets. It gives the title of Baron to the earl of Traquair. Pop. of the p. in 1801, 1,064; in 1831, 1,577; in 1841, 1,515.—Also a parish in the NE of Roxburghshire. Area 6,500 acres. The proportions of arable and of waste grounds are to each other as 19 to 7. Pop. 526.

LINTON, a township of Coshocton co., in the state of Ohio, U. S. Pop. 1,196.

LINTON (East), a large village of East Lothian, in the p. of Prestonkirk, 5½ m. E of Haddington, stretching on the l. bank of the river Tyne, at a fine large bend made by the stream. The mail-road between Edinburgh and London, and the North British railway, pass close to the v. During harvest it has a large weekly market, on Monday, for hiring reapers. Pop. 720. The river Tyne, while sweeping round the S side of the v., falls into a deep linn.

LINTON ISLAND, an island of China, in the Canton river, in N lat. 22° 24′ 30″, 9 m. ENE of Cun-sing-mun harbour, and 4½ m. W of Chung-saw-wan. It is 2½ m. long from E to W, and about 1½ m. broad. Fresh water is found on its S side.

LINTRATHEN, or Glentrathen, a parish in the Grampian district of Forfarshire. It is for the most part a sea of heights from 500 to 1,000 ft. above the level of Strathmore. The river Isla flows for 5½ m. along the W and S boundaries. Pop. 981.

LIN-TSIN, a district and town of China, in the prov. of Shan-se, div. of Pu-chu-fu, in N lat. 35° 10′, E long. 110° 36′.

LIN-TUNG, a district and town of China, in the prov. of Shen-se, div. and 18 m. ENE of Se-gan-fu, in N lat. 34° 20′, E long. 109°.

LINTZ, or Linz, the capital of Upper Austria, situated at the influx of the Traun into the Danube, 98 m. WSW of Vienna, at an alt. of 732 ft. above sea-level. It is a well-built town. The part called the old town consists of only one long street. There are 3 large suburbs, one of which lies on the other side of the Danube, communicating with the rest by a wooden bridge. The houses are in general covered with dark brown shingles, but have in other respects a good appearance. It is a bishop's see, and has a lyceum of 3 faculties, and a gymnasium, with a public library of 44,000 vols., and another library of 10,000 vols. in the Carmelite convent. The church of St. Ignatius is a large and fine building, as is the landhaus or meeting-place of the states, and the theatre. In the great square is a column called the pillar of the Trinity. Pop. in 1845, 31,000. Here is a great woollen manufactory, established by the emperor Joseph, which at one time gave employment, directly or indirectly, to nearly 23,000 individuals in the town and country. It has, however, greatly declined since the commencement of the present cent., with the exception of carpet-weaving. The printing

of woollen table-covers is also a flourishing branch of manufacture. The other manufactures are of gunpowder, leather, and looking-glasses. The navigation of the Danube furnishes employment to a number of people, L. being the place of shipment for the wood, salt, and other products of Upper Austria intended for Vienna; while the Budweis railway will ultimately connect it with Prague, and by means of the Moldau, with the Elbe. The town has 2 annual fairs. In 1800, the castle and many other buildings were destroyed by fire. The environs are fertile, and finely diversified with hill and dale, and the high road runs parallel to the Danube, the banks of which are steep on both sides. The Budweis, L., and Gmunden railway is 41½ m. in length.

LINTZ GREEN, a township in the p. of Chester-le-Street, co.-palatine of Durham, 8 m. SW of Gateshead. Pop. 904.

LINWOOD, a village of Renfrewshire, 3½ m. W of Paisley, built to accommodate the workmen at an extensive cotton-mill erected in the vicinity. Pop. 1,126.—Also a parish in Lincolnshire, 2 m. SSE of Market-Raisen. Area 2,410 acres. Pop. 226.

LIN-WU-HEEN, a district and town of China, in the prov. of Hu-nan, div. of Kwei-yang-chu, in N lat. 25° 22′, E long. 112° 14′.

LINXE, a village of France, in the dep. of Landes, cant. of Castels. Pop. 1,020.

LIN-YEW, a district and town of China, in the prov. of Shen-se, div. and 30 m. NE of Fung-seang-fu, in N lat. 34° 40′, E long. 107° 45′.

LIN-YIH, a district and town of China, in the prov. of Shan-tung, div. of Tse-nan-fu, in N lat. 37° 19′, E long. 117° 14′.

LING-YING-HEEN, a district and town of China, in the prov. of Ho-nan, div. of Heu-chu, in N lat. 33° 51′, E long. 114° 13′.

LIN-YU, a district and town of China, in the prov. of Chih-le, div. of Yung-ping-fu, in N lat. 40° 8′, E long. 119° 10′.

LINZ, a town of Prussia, on the Rhine, 23 m. SSE of Cologne. Pop. 2,620. It has manufactories of vitriol, and some trade in wine, iron, copper, lead, and potash.

LION COVE, a small bay in the straits of Magellan, so named by Wallis, and probably identical with Posadas bay.

LION (Gulf of), a bay of the Mediterranean, on the SE coast of France, and NE coast of Spain, lying between the parallels of 42° 20′ and 43° 35′ N, and between 3° and 6° 20′ E long. Its entrance is marked by the isles of Hyères on the NE, and Cape Creux on the SW. The Orb, the Herault, and the Rhone have their embouchures in this gulf. Its principal ports are Toulon, Marseilles, Cette, Agde, and Collioure. It is the *Sinus Gallicus* or *Mare Leonis* of early geographers.

LIONI, a town of Naples, in the Principato-Ultra. Pop. 4,100.

LION MARIN (Baye de), a bay on the S coast of Kerguelen's land, so called by Alouarn. Kerguelen called it Baye de Gros Ventre.

LIONNE, a river of France, in the dep. of Drome, rising to the S of Bouvente, and flowing N to the Bourne, which it joins after a course of 18 m.

LIONS-D'ANGERS (Le), a town of France, dep. of Maine-et-Loire, on the Oudon, 10 m. NNW of Angers. Pop. 2,750. It has a trade in cattle, wine, and cyder.

LION'S HEAD, Lion Mountain, or Leeuwenberg, a mountain of S. Africa, rising almost immediately behind Cape Town. Its summit is a solid mass of stone rounded and fashioned like a work of art, and resembling from some points of view the dome of St. Paul's. It is 2,160 ft. in height, and has a signal post on the top. It forms part of the Table mountain, from which its upper part is separated by a deep ravine produced by the action of torrents.

LIONS-LA-FORET, a town of France, in the dep. of Eure, 12 m. NNE of Grand-Andelys. Pop. 1,700.

LIPARI ISLANDS, a group of volcanic islands in the Tuscan sea, belonging to Sicily, and situated between the N coast of that island and the Italian continent. They extend from 13° 15′ to 15° 39′ of E long., and from 38° 20′ to 38° 55′ of N lat. The principal are Lipari, Stromboli, Vulcano, Salina, Filicudi, Alicudi, Panaria, Volcanello, Lisca, and Dattolo. Besides these, there are a number of rocks and reefs which cannot properly be called islands, and to which no specific name has been given. The whole group bears evident marks of a volcanic origin; and in several of the islands subterranean fires are still in a state of activity, especially in the islands of Vulcano and Stromboli. Their W coasts are steep and craggy; and nearly all of them have a high isolated rock off their N extremity. The basis of the whole group is hornstone. Four only are inhabited. The collective pop. somewhat exceeds 20,000. Their principal exports are alum, sulphur, nitre, bitumen, and other volcanic products such as pumice-stone, besides oil, and dried fish. Lipari and the larger of the islands are well-cultivated, and produce figs, wine, olives, corn, and fruit, particularly currants and figs. The inhabitants are remarkable for their industry, and for their intrepidity as fishermen, deriving from this source an important part of their subsistence, and even exporting large quantities of fish. They keep up a regular intercourse with Palermo, Messina, and other towns of Sicily. These islands were known to the ancients under the names of *Plotæ*, *Hephestiades*, *Æoliæ*, *Volcaniæ*, and *Insulæ Liparæorum*.

Lipari, the largest of the group to which it gives name, is situated in N lat. 38° 28′, E long. 15° 15′, 20 m. from Melazzo in Sicily, and 40 m. from Cape Vaticano on the Italian continent. It has a superficial extent of about 28 sq. m., and a pop. of 18,000. Almost all parts of the island are in a high state of cultivation; and it produces large quantities of good wine of the kind called malmsey. The other productions are alum, sulphur, pumice-stone, boracic acid, saltpetre, and cinnabar.—Lipari, the chief town of the island, containing two-thirds of the whole pop., is situated on the E side, in N lat. 38° 27′ 56″, E long. 14° 57′ 50″, on a bay which affords tolerably good anchorage. The town is indifferently built, but has a cathedral and a good castle. It is the see of a bishop.

LIPAU, a town of Moravia, 10 m. ENE of Stragnitz, on the l. bank of the Wieliczka. Pop. 800.

LIPCSE (Nemeth), a town of Hungary, in the com. of Liptau, 8 m. ENE of Rosenberg. Pop. 3,216.

LIPENTZA, a river of Servia, which rises 12 m. S of Istrina; runs N; and falls into the Toplitza on the r. bank, after a course of 60 m.

LIPES, a province of Bolivia, to the W of Atacama, watered by the San Juan. It is 60 leagues in length from NW to SE, and 20 m. broad. It is generally of a cold temperature, and is, with the exception of particular parts, unfruitful. It has mines of gold, silver and copper; and contains also mines of red and white copper, the strata of which are intermixed with gold and silver, iron, and loadstone.—The capital of the district, of the same name, and formerly a large and rich town, as its church and other ruins indicate, but now reduced to a miserable state, is situated in S lat. 21° 40′ W long. 68° 16′.

LIPETZK, a town of Russia, in the gov. of Tambov, on the r. bank of the Woronez. It has a water communication with the Euxine. It has woollen manufactories; but its chief establishment is a foundry of cannon for the navy; it has also some other iron works. Pop. 650.

LIPHARD (Saint), a village of France, in the dep. of Loire-Inferieure, cant. and 3 m. S of Herbignac. Pop. 1,160.

LI-PING-FU, a division and town of China, in the prov. of Kwei-chu. The div. comprises 5 dist. —The town is in N lat. 26° 10′, E long. 109°. The surrounding locality produces excellent quinquina, and a species of hemp named ko.

LIPLIAVO, a town of Russia, in the gov. of Poltava, 24 m. WNW of Zolotonocha.

LIPNITZ, a village of Bohemia, in the circle and 24 m. S of Czaslau. Pop. 600.

LIPNITZA, a small town, or two conjoined villages, of Hungary, in the com. of Arva, 47 m. WNW of Kesmark, on the Schwarz.

LIPNO, a town of Poland, in the prov. and 32 m. NW of Plock, on the Meinen. Pop. 3,600.

LIPOUREC, a town of Russia, in the gov. and 96 m. SW of Kiev.

LIPPA, a town of Hungary, on the frontiers of Transylvania, on the l. bank of the Maros, 84 m. N by E of Belgrade. Pop. in 1845, 2,500.

LIPPE, a river of Westphalia, which rises in the SW of the principality of Lippe-Detmold, 3 m. NE of Lippspung; enters Westphalia; and falls into the Rhine above Wesel, after a course of 110 m.

LIPPE-DETMOLD, a principality of Germany, bounded on the NE by Electoral-Hesse; on the NW, W, and S by Prussian Westphalia; and on the E by the kingdom of Hanover. The bail. of Lipperode, separated from the rest, and adjoining the town of Lippstadt, has by treaty of 17th May 1850 been resigned to Prussia in consideration of an annual payment of 9,000 dollars. The area of the whole is 438 sq. m. Pop. in 1828, 76,718; in 1849, 104,674, chiefly Calvinists, except at Lemgo and Lippstadt, where the inhabitants are Lutherans. It is a hilly district almost throughout, especially on the SW, and contains large forests of oak and beech. It is watered by the Ems, the Werra, the Bega, and the Exter. The Weser forms its N boundary, and gives it a facility in the export and import of goods. The principal branches of manufacture are linen and yarn; the exports consist of wool, cattle, thread, and linen. The principality is divided into 7 towns and 11 bailiwicks. Its chief towns are Detmold, Lungo, and Horn. Its government is monarchical and representative, having a diet composed of 7 deputies of the nobles, 7 of the towns, and 7 of the villages, which forms one chamber, and deliberates on legislation and taxation. Its revenue is 490,000 florins.

LIPPEHNE, a town of Prussia, in the reg. and 48 m. NNE of Frankfort. Pop. 2,750.

LIPPENHUICZEN, a village of Holland, in the prov. of Friesland, 17 m. SE of Leeuwarden.

LIPPERODE, a town formerly of Lippe-Detmold, now belonging to Prussia, 2 m. ENE of Lippstadt, on the r. bank of the Lippe. Pop. 600.

LIPPOLDSBERG, a town of Electoral-Hesse, in the circle and 9 m. NE of Hofgeismar, on the r. bank of the Weser.

LIPPSPRING, a town of Prussian Westphalia, on the l. bank of the Lippe, 4 m. N of Paderborn. Pop. 1,521.

LIPPSTADT, a town of Germany, on the river Lippe, 23 m. NNE of Arnsberg. Pop. 4,335. It is regularly built and fortified, and has some manufactories of woollen and linen. Till May 1850, one-half of this town belonged to Lippe-Detmold: the whole is now in the possession of Prussia.

LIPSK, a small town of Russian Lithuania, in the gov. of Minsk, on the r. bank of the Bober, 28 m. WSW of Sluck.—Also a town in the gov. of Grodno, 52 m. SE of Slonim.

LIPSKO, a town of Poland, in the obwod and 27 m. NNE of Opatow.

LIPSO, a small island off the coast of Asia Minor, 6 m. SE of Patmos, in N lat. 37° 18′.

LIPTAU, or Lipto-Varmegye, a palatinate in the N of Hungary, comprising the upper part of the valley of the Waag, bounded by those of Arva, Zyps, Sohl, and Thurotz. It has an area of 42 German sq. m.; and is very mountainous, being traversed by part of the Carpathian chain, and is consequently cold and not very fertile; but it has large forests, and numerous flocks of sheep are reared upon its pastures. It has some gold mines, and abounds in antimony, as well as silver, iron, and precious stones. The pop. in 1837 was 92,880, of whom about one-half were Protestants. The chief town is Szent-Miklos.

LIPTINGEN, a town of Baden, 9 m. NNW of Stockach. Pop. 750.

LIPTRAP (Cape), a promontory on the coast of Van-Diemen's Land, in S lat. 38° 55′, E long. 145° 57′, 24 m. NW by W of Wilson's promontory. It is the extreme of a table-land 350 ft.

LIRE′, a town of France, in the dep. of Maine-et-Loire, 12 m. NW of Beaupreau. Pop. 2,030.

LIRE′ (Vieille and Nouvelle), two small towns of France, in the dep. of the Eure, about 14 m. NW of Verneuil.

LIRI (Cape), a cape on the W coast of Sardinia, 3 m. E of Cape Caccia.

LIRIA, a considerable town of Spain, in the prov. and 18 m. NW of Valencia. It stands between two small hills, and has 2 convents and 3 churches; but the only edifice worthy of notice is the principal church, which is built in a good style of architecture. Pop. in 1845, 8,524, who manufacture linens, soap, and earthenware. This town is of great antiquity, having been known to the Carthaginians and Romans by the name of *Edeta*, when it was the capital of the *Edetani*.

LIS, a small river of Asiatic Russia, which rises in a lake of the same name, and falls into the Yenisei, in N lat. 62° 20′.

LISAS (Punta de), a cape on the W coast of America, in the bay of Panama, in N lat. 8° 10.

LISBELLAW, a village in the p. of Cleenish, co. Fermanagh, 4 m. SE of Enniskillen. Area 15 acres. Pop. in 1831, 242; in 1841, 260.

LISBON [Portuguese *Lisbóa;* French *Lisbonne;* Germ. *Lissabon*], the capital of Portugal, situated in N lat. 38° 42′ 4″, W long. 9° 6′ 0″, 172 m. N of Oporto, and 320 m. WSW of Madrid, on the N or r. bank of the Tagus, which here expands into a fine body of water 9 m. in breadth, and about 9 m. from its mouth. Its appearance at a distance, particularly in crossing the river from the SE, is extremely beautiful and majestic. The great body of water,—the number of ships at anchor in the noble stream,—the city extending in the form of an amphitheatre, along successive elevations, and generally basking in a glowing and pure atmosphere,—the hills in the back-ground, covered with villas, churches, and olive-plantations,—all concur to form a picture perhaps equalled only by the view of Constantinople. But here too, as in the metropolis of Turkey, the *prestige* of the scene vanishes at once on landing, for the interior of the city ill corresponds to its external beauty. Some parts indeed, particularly those lately built, do not disappoint the impression excited at a

distance; but the great majority of the streets are narrow, lined with irregular and ill built houses, and swarming with "dogs of every mongrel breed, lank, lean, and voracious."

General description.] L. lies along the river, in the form of a half-moon, 4 m. in length, and from 1 m. to 1½ m. in breadth. Much of this space, however, is covered with gardens; and much occupied by mere ruins and rubbish. The city is divided into three parts, called Alfama, Bairro-Alto, and Melo; it has also three suburbs, Junqueira, Alcantara, and Campo-Grande, to which may be added Belem, a pleasant town immediately adjoining on the W. The city stands on three, or as some count them, seven hills, the most westerly of which begins at a small river flowing between the city and Belem. Previous to the great earthquake, this part of L. consisted almost entirely of gardens and corn-fields; but the shocks having been less violent here than in the other parts of the town, it has been much resorted to for building, and is now covered with houses. Yet the streets even in this quarter are narrow, irregular, and ill-paved. The second hill, reckoning from the W, is a continuation of the first, being separated from it only by a narrow valley. The prospect from its summit is very fine; but the streets, with the exception of a few of the principal, are here also crowded, narrow, and built without the slightest attention to order. The slope of this hill on the E side brings us to the centre of the city, where the earthquake of 1755 caused a general overthrow, and where a number of good streets have since risen from the ruins. The ground is here level for a considerable extent; and in this quarter are the principal squares, the public walks, and the best edifices. On the bank of the Tagus is a square called Praça-do-Commercio, from its being the residence of a number of merchants, and containing on its E side, the exchange, the custom-house, and the India-house. In front it has the principal quays, which excel in beauty every thing of the kind in London or Paris. This square is 200 yds. long, and 180 yds. broad, and has in its centre a colossal bronze statue of Joseph I. on horseback. The national library is on the W side of this square. Three streets leading from it to the N, join the Praça Rocio, a square of much larger dimensions, being 600 yds. in length, and nearly 500 yds. in breadth, in which the infamous *autos da fé* of the inquisition were celebrated. The third hill on which L. stands begins with the eminence containing the small fort or castle, and extends, with some interruptions, to the E limits of the town. This quarter is very old, and consists of narrow, crowded, irregular, and ill paved streets. The castle occupies the highest ground in the whole city, but is of no importance in a military view. The Salitre leading from the Passeio Publico to the Praça-do-Rato forms a cool and shady promenade in the N part of the city. The streets of L., though less dirty than in former times, have still much to offend an English traveller. They are imperfectly lighted at night; and the police-regulations though good, are very ill executed. There are numerous fountains, but water is not used to clean the streets, and the only scavengers are the dogs! Even in the day, the appearance of L. is cheerless, the Portuguese having little turn for activity either in business or amusement. "Yet without any very visible progress," says a recent writer, "L. is decidedly advancing in comfort and even in luxury. New shops of a more pretending and expensive style are opened at no long intervals, and of confectioners' shops alone there are altogether upwards of 400." No models of architecture are to be found among the private houses or public buildings, though there are many which may be accounted handsome; nor is the interior disposition of the apartments, or even the entrances, deserving of any commendation. The houses are lofty, uniform, and strongly built, in a manner rather singular. The carpenter first raises the skeleton of frame-work, and the mason then fills up the interstices with rubble-stone and brick. The advantage of this mode of procedure is supposed to be that the connection of the walls with the wooden work contributes to resist those slight concussions of earthquakes with which the city is so frequently visited. The first story of each dwelling-house, if not used as a shop, is generally employed as a magazine for merchandise, and sometimes as coach-house and stable. In a house of four stories, the attic is counted the pleasantest floor, and is frequently furnished with a balcony ornamented with gilt iron rails, and provided with silk or linen awnings for the accommodation of the ladies, who sit there on cushions in hot weather, reading, sewing, or amusing themselves. Coolness and ventilation, rather than warmth, are consulted in the distribution of the apartments. Grates and chimney-pieces are almost unknown, and a warm cloak in winter is the usual substitute for a fire.

Edifices.] L. is not one of those capitals which abound in specimens of the arts. Among the houses of the nobility, many are stately, and even splendid; but are built without regard to the rules of art. The same remark applies to the churches, even to those that are most richly ornamented. The number of public buildings in L. is considerable, there being in all 40 parish churches, 99 chapels, 75 convents or monasteries, and various hospitals. There are also 13 squares, great and small. The principal edifices are the patriarchal church or cathedral, situated on an eminence in the NE of the city, a large building with a finely groined roof; the royal monastery of Belem, built in 1500; the convent Do Coraçao de Jesus, the largest structure erected in L. since the earthquake, the convent Da Graca, and the royal hospital in the Rocio. The last vestige of the palace of the inquisition disappeared in 1842. The fate of this building is curious. To the end of Don Miguel's usurpation it was retained as a royal palace; and here occurred the celebrated remonstrance of the European ambassadors, headed by the French envoy, Hyde de Neuville, when Miguel first sprouted forth as a rebel. Shortly after the queen's arrival in Lisbon, in 1833, it was converted into the National treasury; and three years after, about a couple of months before the revolution of September 1836, it was burnt down by fire. It was subsequently sold to the municipality of the city, for the purpose of converting it into an hotel-de-ville; but, owing to a deficiency of money, that design was abandoned; and it was resold for a sixth part of the sum which the sage civic worthies originally paid for it. The government has since erected the National theatre on the spot. The exterior aspect of the building was handsome and modern, being one of the marquis of Pombal's edifices re-constructed in the middle of the last cent. after the earthquake; and exhibiting immense blocks of the splendid freestone which abounds in the public works of L. The English have a Protestant chapel adjacent to their cemetery. Of all the architectural works of L. the greatest is the aqueduct to the NW of the city, partly of Roman, partly of Gothic architecture, and of such solidity, that at the great earthquake it withstood the shock, though the key-stone sunk several inches. See ALCANTARA.

In the subjoined sketch of the Tagus and the environs of the city, the site of Belem castle is marked 1.; the fort of Torre Vilha, B; the convent of San Geronymo, 2; the palace of Nossa Senhora d'Ajuda, *b*; the heights of Almada, D D D; the royal park, *c c*;

the suburb of Junqueira, *d;* the suburb of Alcantara, *e;* the old palace of Necessidades, *f;* Monsanto, one of the highest points near L., *g;* the line of the great aqueduct, *h h;* the point where the aqueduct passes the valley of Alcantara, *i;* the Signal station, G; the Carmelite convent, *j;* the Campo d'Ourique, *l;* the church of the heart of Jesus or the Estrella, *m;* the suburb of Buenos Ayres, *n;* the convent De Graca, *q;* the castle of St. George, *r;* the cathedral, *s;* the Praça-do-Commercio, *t;* the naval arsenal, *u;* the anchorage, F, F, F; Point Cassilhas, F. The part within the line z was wholly destroyed by the great earthquake of 1755.

Public institutions.] Of the public institutions of L., one of the principal is the academy of sciences, founded in 1779 by the duke of Lafoens, and subsequently extended by aid from government. It has an observatory, situated a little to the W of the city, in N lat. 38° 42′ 4″, W long. 9° 8′ 2″, and a mathematical library. A geographical academy was founded in 1799, and was long employed in preparing a complete map of Portugal. The college of nobles, founded in 1761,—the royal marine academy, in 1779,—the Academia real da Marinha, in 1782,—the royal academy of fortification, in 1790,—are all institutions for education, and have sometimes had professors of merit. There are in L. some public libraries, which contain the standard works in Spanish and Portuguese literature, but are deficient in foreign books. The same remark applies to the booksellers' shops. The National library, formed in 1835 from the libraries of the suppressed convents, is said to possess 300,000 vols. The library of the theological seminary of San Vicente has 18,000 vols. The state calendar enumerates, as belonging to L., several collections of natural history, chemical laboratories, and botanical gardens; but these are of very little importance. L. is the seat of the public offices, not only of the government, but of the church. It is well-provided with public charities, and in particular with hospitals. The royal hospital of San Joseph is an excellent institution, in which the sick are carefully attended, without regard to their nation or religion. It is capable of containing upwards of 1,500 patients; and the number of patients admitted in a year amounts frequently to 12,000 or 15,000. The foundling hospital is also on a very large scale.

Population, &c.] Russel estimated the pop. of the city of L. at 230,000, including a great number of foreigners, and 30,000 Galicians; Balbi states it at 260,000 in 1826. The pop. of the city of L. was returned, in 1841, at 241,500. There are more black people seen in L. than in any other city of Europe. The *agoadeiras*, or water-carriers, amount to about 7,000, and are chiefly Galicians. The dress of the middle and higher classes differs little from that of England. The markets of L., particularly those for fruit and fish, are well-supplied. The inhabitants subsist chiefly on butcher-meat, olive oil, goat-cheese, and fish, particularly pilchards, without making much use of vegetables. The bread is generally bad; and in place of it, the common people eat lupins, or rice. Small beans, brocoli, cauliflower, lettuce, and gourds, oranges, grapes, melons, figs, and chestnuts, constitute their vegetable diet.

Trade, manufactures, &c.] Portugal is backward in manufactures; and its cap. makes in this respect no better figure than the provincial towns. L. has, however, manufactories of gold, silver, and brass articles; of cotton, woollen, linen, and silk, thread, stockings, lace, hats, soap, leather, tobacco, and earthenware; but all are on a small scale, and the fabrics in general of indifferent quality.—On the other hand,

the commerce of L. is very considerable, comprising all the colonial, and perhaps three-fourths of the foreign trade of the kingdom at large. The harbour is capacious and safe, and capable of accommodating a far greater number of vessels than it receives. Its quays extend nearly 2½ m. along the river; and there is 20 fath. water in mid-channel of the river. With Spain a great deal of smuggling-trade takes place in sugar, tobacco, and spices. To England the exports are wines known by the names of Lisbon and Carcavellos, oranges, lemons, and other fruits, cork, wood, and some silk and wool; the returns are calicoes, woollens, stockings, watches, trinkets, hardware, copper, lead, and coals. From Ireland the imports are corn, flour, and salted provisions. To the N of Europe L. exports wines, salt, fruits, and some colonial produce; the imports being hemp, flax, iron, timber, deals, stock-fish, pitch, tar, Russian and German linens, and above all, corn.—The port of L. is free to the merchant-ships of every country. Goods and merchandise, of whatever nature and kind, and under whatsoever flag imported, are admitted to be warehoused, paying, if re-exported, a duty of 1 per cent. All goods and merchandise, whatever may be their nature and origin, or the flag under which they shall be imported, are admitted to entry in the custom-houses of L. and Oporto for home-consumption, except live pigs, powder, olive and turnip-seed oil. There are also prohibitions as to flour, and restrictions as to rice, but these do not belong to a navigation law: they are simply protective duties on particular Portuguese colonial and home-productions. The commerce and navigation treaty of 1642, reviewed in 1810, declares "that the most renowned king of Portugal will grant to no nation more ample rights, immunities, and privileges, than he will grant unto the subjects of the king of Great Britain." The following is a return of the revenue of Sete Cazas, or Board-of-Excise, of Lisbon, for the year 1850–51:

	Reis.
Duties from wine,	261,778,435
„ spirits,	15,365,255
„ oil,	44,601,010
„ vinegar,	1,985,460
„ courama,	278,300
„ meat,	294,863,135
„ wood and charcoal,	15,699,170
„ fruits and vegetables,	38,634,545
Excise on beasts of burden,	2,730,090
Excise on inheritances,	48,335,225
Eight per cent. additional,	58,404,655
Five per cent. ditto,	39,580,280
Seizures and transfers,	2,516,425
Amortisation of notes,	75,904,400
Decima on emoluments,	1,390,983
Reposition,	10,560
Total,	902,077,928

Being less by 9,066,834 reis than the receipts of 1849–1850. Of the duties upon wine and spirits, only 8,277,845 reis was upon what was exported, the remainder was the duty levied upon consumption within the city and boundary.

The following is a return of the revenue of the custom-house of L. for the year 1850–51:

		Reis.
1850,	July,	180,301,927
	August,	184,762,277
	September,	215,803,906
	October,	186,591,522
	November,	160,516,319
	December,	144,594,600
1851,	January,	142,474,890
	February,	139,702,288
	March,	180,801,320
	April,	170,038,950
	May,	170,060,653
	June,	146,400,779
Total,		2,022,049,431
Impost for the amortisation of notes,		196,547,694
General total,		2,218,597,125

Being less by 121,369,318 reis than the customs' revenue for 1849–1850, and less by 234,905,299 reis as compared with the receipt of 1848–49. The general total of receipts in the custom-house of Oporto, for the year 1850–1851, including the impost for the amortisation of notes, was 1,815,766,999 reis. There being a diminution in the custom-house of L. of 63,401,335 reis, which ought to have augmented the receipts of Oporto to that amount, by virtue of a decree of August 17, 1849.—The exchange transactions of L. are on a large scale. Accounts are kept in reis and milreis. The milrei is 1,000 reis; and 65 milreis are equal to a pound sterling. The bank of L., founded in 1822, has a capital of about £1,000,000.

Projected railways.] The commissioners appointed to examine the question of railways in Portugal, reported in October 1851, that a railway connecting the S with the N of Europe, Lisbon with Madrid, Paris, and Brussels, "is a line loudly called for by the state of progress, and would act like an electric chain in galvanizing the inanimate body of old Portugal. L., situated between Europe and the New World, as if expressly designed by nature for the emporium of the trade of Europe with India and America, would then," say the commissioners, "behold a great part of the travellers and merchandise, which come from the Pacific, the distant shores of the Atlantic, and the Indian seas, flocking into its magnificent harbour. This great line would bring L. within 16 hours of Madrid, 43 of Paris, and 53 of Brussels. To travel 550 leagues would require little more than two days, or about the same time that is now spent between L. and Coimbra. It would take 57 hours to reach London,—about one-third of the time taken at present by the packet." The commissioners think that there are two lines which would meet these views—one which may be called the northern, the other the eastern. The N line would commence from L. to Porto, through Santarem, and thence to Bragança, traversing Spain by Valladolid, until it joined the line from Madrid and Irun. The E would be commenced from L., along the r. bank of the Tagus, which it would cross between Santarem and Abrantes; and then be continued to the neighbourhood of Badajoz, when it would join the line from Madrid to the frontier. Besides these two lines there is an intermediate one which would have in common with the others the part of the road from L. to Santarem, beyond which it would be carried through Thomar to Coimbra, and thence by the valley of the Mondego through Vizen, until it entered Spain to the N of Almeida. See article PORTUGAL.

Climate.] The climate of L. is very salubrious, and sufficiently pleasant to those who are accustomed to it. In January cold and clear weather often prevails; but in February the temp. becomes mild and pleasant. Snow is extremely rare, and scarcely known to the inhabitants. Ice occasionally appears in the fountains before sunrise, but is quickly thawed by the heat of the day. In consequence of the increasing heat of the sun in February, and the consequent chills of the evening, severe catarrhs are common in that month. After the equinox, heavy rains take place, accompanied with violent storms; and from this period to June is the most changeable season of the year, the weather being alternately rainy and cool, or hot and dry. From mid-summer to the middle of September, rain is extremely uncommon, and every vegetable production becomes completely parched. The heat, which during this period is incessant, though much moderated by the sea-breezes, very commonly rises to 96°, and has been known to reach 104°. About the end of September the first rains arrive; and in October, which may be counted the spring in point of vegetation, the young grass and new leaves appear. In November and December heavy rains, with frequent storms, are experienced; and the little streams are everywhere converted into dangerous torrents. Earthquakes occur only between October and April, and are generally observed to accompany the first rains which follow a tract of dry, sultry weather. The grain is usually in ear in the month of March, and the harvest takes place in May.

Environs and river-approach.] The environs of L., particularly on the E and N sides, to a considerable distance from the town, are covered with large gardens surrounded with very high walls, between which the road leads sometimes for leagues without any

other object being visible. These enclosures are called *quintas;* and are as much parks as gardens, containing generally plantations of cypresses, judas trees, orange and olive trees, sometimes even cornfields and vineyards, with a considerable villa or summer-house. Towards the W the country is not so well cultivated, and there are several naked rocky hills; but in some spots these are extremely fertile, affording the best pastures to the city, and a great variety of natural plants for the botanist.—The mouth of the river from Belem up to L. is little more than 1 m.; but opposite the centre of L. it widens considerably by its l. bank suddenly trending S near the town of Acanada, and forming a bay or reach of about 5 m. in breadth. The mouth of the Tagus is guarded by Fort St. Julian on the N, and Fort Bugio on the S of the bar, or rather in the middle of the entrance into the river, about 4 leagues below L. The sand is so much accumulated to the S of Bugio, that the bar is nearly dry at low water, and at no time of the tide can any but boats and small craft enter the Tagus on that side: the only passage up the river, therefore, lies between the two forts, towards the middle of the channel. Bugio at a distance has the appearance of the English martello-towers. It has bomb-proof quarters, and is constructed in the most solid manner; but the defence of this part of the river would mainly depend upon Fort St. Julian. In every case, a hostile fleet must enter the Tagus within the destructive range of its guns. It is founded on an elevated projecting rock, and has 5 irregular bulwarks, with a ravelin towards the land-side. At present it mounts 86 pieces of artillery, with space for working many more; and it is said to be capable of accommodating 3,000 men in bomb-proof quarters. Unfortunately, it has within its circuit no spring of water, and depends for its supply on the rain collected in tanks. Around the coast, at the entry of the Tagus, and on its N bank, a Portuguese writer enumerates no less than 57 batteries. The chief, beside the two above described, are those of Peniche, Cascaes, Belem, and L. The banks of the river, from the cap. to Fort St. Julian, are high or sloping; and along the whole of the line of road, are studded with towns, villages, and villas. About 1 m. from the latter fort is the town of Oeyras, from which the celebrated marquis of Pombal took his title of count. A little to the W is the town of Carcavellos, which is said to produce the wine that goes by that name in London. All along the coast towards the ridge of Cintra, the country seems, both from its exposure and the nature of the soil, to be well-adapted for vineyards and orchards, though the land is not so fertile as on the other side of the ridge, where water is more abundant, and the vegetable mould deeper. The ridge itself is about 10 m. from the fort; but it rises so abruptly, and displays so bold an outline, that it appears much nearer, and forms a striking object in the landscape. Its numerous bare sharp summits are distinctly traced,—its towering pinnacles, composed of loose blocks of granite, apparently thrown together at different periods, and carelessly piled on each other like the tumulus of some giant, are seen as if within reach,—and the eye surveys at one glance, leaning against the western sky, the whole rugged outline of the mountain, from its commencement in the precipitous eminence crowned with the Convento-da-Penha, till it descends into the sea by the rounder and tamer promontory called by sailors 'the Rock of Lisbon.'

History.] The origin of this city is involved in more than usual obscurity, and has been ascribed by some fond antiquaries to the Grecian Ulysses, from whom its name Olissipa, or Olisipona, is imagined to have been derived. The first inhabitants, according to Pliny, were the ancient Turtuleans, who are supposed to have fallen under the power of Rome after the destruction of Carthage. From inscriptions found in the city, it appears to have been taken possession of by Julius Cæsar, and to have been called by him *Felicitas Juliana.* By the Moors, into whose hands it fell with the rest of the peninsula in 716, its name was changed into Lisiboa, as a sound more congenial to their language than its former appellation. In 798 it was reduced by Alphonso the Chaste, king of Galicia and Asturia; but it passed alternately from the Moors to the Christians, till the former became tributary to Alphonso VI. of Castile, in 1093. Having revolted under Alphonso Henrique, the first Christian king of Portugal, that prince, after many fruitless attempts to reduce the city, received an unexpected reinforcement by the landing of about 14,000 English, French, and Flemish crusaders, under William Long Espe (who had entered the Tagus for supplies to their fleet), and with their assistance he succeeded, after a long and bloody siege of 5 months, in gaining possession of the capital. Its history becomes henceforward involved in that of Portugal; and the only memorable event which requires to be specified in its separate annals as a city, is its almost entire destruction by an earthquake, on the 1st of November 1755. At that period it was about 6 m. in length, surrounded by a single wall, on which were 77 antique towers of inconsiderable strength, 26 gates on the side towards the river, and 17 towards the land. This great convulsion took place on the 1st November, and the shock, though it continued for a short time, was so violent, that almost all the public buildings, and 6,000 of the dwelling-houses, were overturned. The loss of lives was computed at more than 30,000. Nor did the destruction end there; a conflagration kindled by the tapers in the churches, and the fires in private dwellings coming in contact with curtains, timber, and other combustible materials, spread over the city, and destroyed a still greater number of houses than the earthquake. Many years elapsed before L. recovered from this calamity, and the traces of it are yet visible in many parts. In 1807 L. was occupied by a French army. It was afterwards the scene of important operations between the British and French armies, until the latter were finally driven from the Portuguese capital.

LISBON, a township of Lincoln co., in the state of Maine, U. S., 33 m. SSW of Augusta, bordered on the SW by Androscoggin river. Pop. in 1840, 1,532.—Also a township of Grafton co., in the state of New Hampshire, 89 m. NNW of Concord, watered by Great Ammonoosuc river and its branches. Pop. 1,682. The soil on the streams possesses considerable fertility.—Also a township of New London co., in the state of Connecticut, 7 m. N of Norwich, watered by Quinnebaug and Shetucket rivers. The surface is hilly, and the soil generally gravelly loam.—Also a township of St. Lawrence co., in the state of New York, 10 m. W of Canton. It has an undulating surface, and is drained by Grass river. The soil consists of fertile loam. Pop. 3,508.—Also a village of Calcasien p., in the state of Louisiana, on the E side of Calcasien river.

LISBOURG, a commune of France, in the dep. of the Pas-de-Calais, cant. and 4 m. NW of Heuchin, at the source of the Lys. Pop. 1,137.

LISBUNNY, or Lisboney, a parish in co. Tipperary, 1¼ m. E of Nenagh. Area 4,393 acres. Pop. in 1831, 1,442; in 1841, 1,141.

LISBURN, a market and post-town and a parliamentary borough, in cos. Down and Antrim, on the river Lagan, 3½ m. NNE of Hillsborough, 6½ m. SSW of Belfast. The country immediately around L. is one of the most lovely districts in the N of Ireland. The plan or street-arrangement of both the body of the town and its outskirts is unfavourable to pleasing effect; yet L. is often pronounced one of the most handsome towns in Ireland. It owes its effect, however, to cleanliness, to evidences of comfort, to a rapidly sloping site, to the grouping which the buildings in and around the market area present to the main thoroughfares, and to the fine features and happy situation of the public promenade. The parish-church is the cathedral of the dio. of Connor, but is conspicuous chiefly for its spaciousness. The market-house is a large and handsome edifice, with a cupola. The linen-hall, for the sale of brown linen, is a good building. On an island in the Lagan, within the borough limits, are extensive vitriol-works. The linen manufacture appears to have been very early introduced to L. It received a strong impulse at the settlement of immigrants from France, on oc-

casion of the repeal of the edict of Nantes; and it was established in a now celebrated form,—that of damask linen, and the finer kinds of diapers,—about 75 years ago. The bleachyards in the vicinity of L. are among the most extensive in Ireland; there are also large flour-mills. Large quantities of agricultural produce, provisions, and manufactured goods, are sold at the weekly markets; and the general retail trade is very extensive. The Lagan navigation and the Ulster railroad from Belfast to Armagh, afford admirable facilities of communication to L. The borough sends 1 member to the imperial parliament. Number of voters in 1834, 91; in 1849, 164. Area of the co. Antrim section of the town, 204 acres; of the co. Down section, 27 acres. Pop. of the whole in 1831, 5,218; in 1841, 6,284. L. was originally called Linsley-Garvin, probably from its founder, and continued to bear that name, in the corrupted form of Lisnegarvey, till 1641. In consequence of its geographical position, on an important pass of the Lagan, it was regarded as a valuable station between the native Irish and the English of the Pale.

LISBURN, a village of Cumberland co., in the state of Pennsylvania, U. S., 9 m. SW of Harrisburg, on Yellow Breeches creek.

LISBURN, or Blaris, a parish partly in co. Antrim, partly in co. Down. Area 2,827 acres. Pop. in 1831, 13,249; in 1841, 15,015.

LISBURNE (Cape), a headland of Russian America, on the NW coast, in N lat. 69° 5′, E long. 169° 58′. It rises to the height of 849 ft. above sea-level.

LISCA-BIANCA, an islet of the Lipari group, in the Mediterranean, 5 m. E of the island of Panaria. It is of volcanic origin, and is uninhabited.

LISCA-NERA, an uninhabited islet of the Lipari group, in the Mediterranean, near the island of Basiluzzo, and NE of that of Panaria. In the channel which separates Lisca-Bianca and Lisca-Nera, are two submarine orifices, which constantly discharge streams of heated and inflammable gas.

LISCANOR, a village in co. Clare, 2¼ m. WNW of Lehinch, and 4¼ m. W of Ennistymon. Area 24 acres. Pop. in 1831, 506; in 1841, 562.

LISCARD, a township in the p. of Wallazey, Cheshire, 10 m. N of Great Neston, at the mouth of the Mersey. Area 860 acres. Pop. in 1841, 2,873.

LISCARROL, a parish and village in co. Cork, Area 4,028 acres. Pop. in 1831, 2,135; in 1841, 2,249. The v. is 4½ m. NW of Buttevant, and 6½ m. SW of Charleville. Area 36 acres. Pop. 750.

LISCARTON, a parish in co. Meath, 2 m. NW of Navan. Area 1,303 acres. Pop. in 1841, 318.

LISCHAU, a town of Bohemia, in the circle and 8 m. ENE of Budweis, and 29 m. S of Tabor. Pop. 2,283. It has a military school, and several military stores.

LISCHER, a commune of Belgium, in the prov. of Luxemburg, dep. of Thiaumont. Pop. 225.

LISCIA, a town of Naples, in the prov. of Abruzzo-Citra, district and 12 m. SW of Il Vasto, cant. and 2 m. SW of S. Buono. Pop. 1,073.—Also a port on the N coast of Sardinia, in the dio. of Capo Sassari, and prov. of Oziere, 8 m. SE of Port Longo-Sardo, at the mouth of a river of the same name. It is safe and commodious. The river has a course, in a generally NNE direction, of 24 m.

LISCOLMAN, a parish in co. Wicklow, 3½ m. NE of Tullow. Area 2,483 acres. Pop. in 1841, 639.

LISCOMBE, a hamlet in the p. of Soulbury, Buckinghamshire, 3 m. W by N of Leighton-Buzzard.

LISDOWNY, a village in the p. of Aharney, co. Kilkenny, 2¼ m. W of Ballyragget. Pop. 134.

LISEC, a headland of Russia in Europe, on the gulf of Finland, in the gov. of St. Petersburg, NE of Cronstadt.

LISGENAN, Lissquinan, or Grange, a parish in co. Waterford, 4½ m. NE by E of Youghal. Area 5,709 acres. Pop. in 1831, 2,195; in 1841, 2,527.

LISGOOLD, a parish in co. Cork, 5½ m. NNW of Middleton. Area 3,154 acres. Pop. in 1841, 969.

LISIANKA, a town of Russia in Europe, in the gov. and 90 m. SSE of Kiev, district and 13 m. NNW of Zvenigorodka. Pop. 2,500, chiefly Jews.

LISIENSKOI, an island of the North Pacific, WNW of the Sandwich islands, in N lat. 26° 31′, E long. 188° 38′. It is sandy, and is surrounded by reefs.

LISIEUX, an arrondissement, canton, commune, and town of France, in the dep. of Calvados. The arrond. comprises an area of 90,127 hectares, and contains 5 cant. Pop. in 1831, 68,716; in 1836, 69,844; in 1841, 68,313.—The cant. comprises 32 com. Pop. in 1831, 27,197; in 1841, 28,116.—The town is 29 m. E of Caen, and 20 m. S of Harfleur, in a fertile valley, on the r. bank of the Toucques, near the confluence of that river with the Orbec, in N lat. 49° 8′ 50″. Pop. in 1789, 8,988; in 1821, 10,118; in 1831, 10,257; in 1841, 11,378; in 1846, 11,345. It is enclosed by walls; and possesses an ancient cathedral, an episcopal palace, a college, a seminary, a large hospital, a theatre, and 2 printing establishments. The houses are old, and chiefly built of wood, and the streets gloomy. It has manufactories of various kinds of woollen and cotton fabrics, woollen coverlets, cotton lace, horse-cloths, and leather, several spinning and saw-mills, bleacheries and dye-works, extensive potteries, and several distilleries of brandy. The trade—especially in linen, cloth, leather, grain, cattle, fruit, cider, and lint—is considerable. L., the *Civitas Lexoviorum* of the Romans, is of great antiquity, and previous to the introduction of cannon it was considered a place of great strength. It was pillaged in 877 by the Normans, and in 1130 was to a great extent destroyed by the Bretons. In 1203 it was taken by Philip Augustus; in 1415 by the English; again in 1448 by Charles VII.; again by the Protestants in 1571; and lastly in 1589 by Henry IV.

LISII. See Fox-islands.

LISKEARD, or Leskeard, a parish and borough in Cornwall, 17 m. NW by W of Plymouth, on the river Looe. Area of p. 7,740 acres. Pop. in 1801, 2,708; in 1831, 4,042; in 1841, 4,287. Part of the town is situated on rocky eminences, and the rest on the plain at their base. The houses in general are indifferently built, and the streets, from the singular situation of the town, have an appearance of great irregularity, the foundations of some houses being on a level with the chimneys of others. The chief public building besides the church, a spacious Gothic structure, is the town-hall, erected in 1707. The town has been considerably improved of late years, and many handsome houses of recent erection adorn the environs. Serges and blankets are made here to a limited extent, and there are several tanneries and rope-works, besides a paper-mill. The principal business arises from the produce of the tin, copper, and lead mines of the surrounding district. The town has also the advantage of being the market for an extensive agricultural district. The income of the borough in 1839 amounted to £307. Previous to 1831 L. returned 2 members to parliament. The borough, the parl. boundaries of which include the p. of Liskeard, and such parts of the old borough as are without the parish, comprising a total pop. of 6,204 in 1851, now returns one member. Electors registered in 1837, 271; in 1848, 312. L. is one of the polling places for the co. members.

LISKEEVY, a parish 6 m. NNW of Tuam, co. Galway. Area 7,206 acres. Pop. in 1841, 3,118.

LISKO, a town of Galicia, in the ldgb. of Lemberg, circle and 9 m. ESE of Sanok, on the r. bank of the San. Pop. 2,329.

LISLE, a commune of France, in the dep. of the Dordogne and cant. of Brantome, 11 m. NW of Perigueux, on the l. bank of the Bronne. Pop. 1,272. See also Lille and Ile (L').

LISLE, a township of Broome co., in the state of New York, U. S., 133 m. WSW of Albany. It has an undulating surface, and is drained by Toughnioga river and its tributaries. The soil consists of clay and sandy loam. Pop. in 1840, 1,560.

LISLEE, a parish in co. Cork, 6½ m. ESE of Cloghnakilty, co. Cork, containing the towns of Courtmacsherry, Butlerstown, and Meelmane. Area 6,302 acres. Pop. in 1831, 4,939; in 1841, 5,211.

LISLIVANE, a village in the p. of Abbeymahon, co. Cork. Pop. in 1841, 121.

LISMAKEERY, a parish in co. Limerick, 1½ m. SSW of Askeaton. Area 3,032 acres. Pop. in 1831, 1,268; in 1841, 1,056. The surface is part of the valley of the Deel.

LISMALIN, or Lismullen, a parish on the E border of Tipperary, 5 m. NNE of Cloneen. Area 4,241 acres. Pop. in 1831, 1,392; in 1841, 1,417.

LISMATEIGUE, a parish in co. Kilkenny, 4⅓ m. S by W of Knocktopher. Area 1,643 acres. Pop. 545.

LISMORE, an island of the Hebrides, belonging to Argyleshire, situated at the mouth of Loch-Linnhe, about 8 m. from Oban. It is a narrow uneven rocky ridge, about 9 m. long, and from 1 to 2 m. broad, containing about 8,000 acres, and lies entirely upon a limestone rock. The surface is rugged and sprinkled with abrupt projecting rocks; but the soil is a rich black loam, formed from limestone, and extremely fertile. It was anciently the seat of the Bishop of Argyle, who was frequently named *Episcopus Lismoriensis;* and a great part of the cathedral remains, the chancel of which is used as the parish church. There was formerly a Roman Catholic college on this island, but it has been recently removed to Aberdeenshire. L. contained, in 1801, 1,329 inhabitants; in 1831, 1,790; in 1841, 1,399.

LISMORE-AND-APPIN, a united parish in Argyleshire, extending from the SW end of Lismore to the extreme part of Ceanlochbeg 63 m. in length, by 10 m. and in some places 16 m. in breadth. It is intersected by several considerable arms of the sea, and comprehends the districts of Airds, Appin, Duror, Glencreran, Glencoe, and the island of Lismore, besides the district of Kingairloch, which stretches for about 12 m. along the N side of the Linnhe-loch. The extent of sea-coast belonging to the united parishes is not less than 90 m. Pop. of the united parish in 1831, 5,365; in 1841, 4,193.

LISMORE-AND-MOCOLLOP, a united parish partly in co. Cork, but chiefly in co. Waterford. The Waterford section contains the towns of Lismore and Cappoquin, and the villages of Ballyduff and Tallow-bridge. Area of the Cork section, 1,293 acres; of the Waterford section, 62,743 acres. Pop. of the whole in 1831, 18,441; in 1841, 21,552. The summit-line of the Knockmeledown mountains constitutes the N boundary: the river Bride, over all the lower part of its course to its confluence with the Blackwater, traces the S boundary. The principal summits on or closely adjoining the N boundary line have altitudes of 2,069, 2,084, 2,609, 2,149, 2,199, and 1,591 ft.

LISMORE, in the above parish, the seat of a diocese, an ancient city, and formerly a parl. borough, stands on the mail-road from Cork to Waterford, 3¼ m. W by S of Cappoquin, and 111 m. SW by S of Dublin. Its site is a natural platform or terrace upon the steep and rocky banks of the Blackwater, at the point of confluence with that river of the Owenshad, a rapid stream from the Knockmeledown mountains. It was at one time a celebrated city, thickly studded with ecclesiastical structures; it afterwards became a neglected village, with no other traces of its ancient magnificence than the ruins of its cathedral and its castle; and it continued to consist principally of a few hovels till the middle of last cent.; but since that date it has been gradually improved and beautified by its proprietor, the Duke of Devonshire, till it has acquired a tidy, airy, comfortable, and decidedly urban character. L. castle is one of the most magnificent and best preserved of the ancient baronial residences of Ireland; and is seen to great advantage in consequence of its occupying a very elevated site on the verge of a hill, immediately overhanging the Blackwater. In July 1643 it was besieged by a force of upwards of 7,000 foot and 900 horse under General Purcell; but even against this great force it made a successful resistance. In 1645, however, it was taken by Lord Castlehaven. In 1753, at the death of Richard, third earl of Burlington, and fourth earl of Cork, it passed to his daughter, the Lady Charlotte Boyle, who in 1748 had been married to William Cavendish, fourth duke of Devonshire.—The cathedral of L., after having sunk into dilapidation, was about 40 years ago reconstructed from the foundation. The plan of the structure is cruciform; but the present pile consists as yet of only one transept, the exterior entrance, and a very beautiful spire. The ruins or vestiges of 7 ancient churches existed in L. at a comparatively recent date; and other churches besides these are usually alleged to have stood in the city,—making a total, according to some writers, of not fewer than 20 churches.—The retail trade of the town necessarily competes with that of Tallow and Cappoquin, and is of inconsiderable extent. Area of the town, 99 acres. Pop. in 1831, 2,894; in 1841, 3,007. L. gives the title of Viscount in the peerage of Ireland, and that of Baron in the peerage of Great Britain, to the ancient Irish family of O'Callaghan of Shanbally castle in co. Tipperary.

The Diocese.] Soon after the Anglo-Norman conquest, the alleged ancient sees of L. and Ardmore—the latter located near the mouth of the Blackwater—are usually said to have been consolidated under the name of Lismore. The recent Church temporalities act consolidated under one bishop the four dioceses of Lismore, Waterford, Cashel, and Emly, and placed them within the ecclesiastical prov. of Dublin. The episcopal revenues of L. cannot be distinguished from those of Waterford; and those of the two sees amounted in 1831 to £4,323. The dio. comprehends a considerable part of co. Tipperary, and the greater part of co. Waterford. Its area is 451,771 acres. Pop. in 1831, 186,265. Number of parishes, 74. In 1834, the pop. consisted of 5,970 Churchmen, 164 Presbyterians, 382 other Protestant Dissenters, and 209,720 Roman Catholics.—The Roman Catholic dio. of L. is consolidated with that of Waterford.

LISMULLEN, a parish in co. Meath, 1¼ m. NW of the village of Skreen. Area 938 acres. Pop. 150.

LISNADILL, a parish in co. Armagh, 2¾ m. S by E of the city of Armagh. Area 18,556 acres. Pop. in 1831, 7,699; in 1841, 9,895.

LISON, a river of France, which has its source in the dep. of the Jura, to the SE of Salins; flows thence into the dep. of the Doubs; and, after a course, in a generally N direction, of about 24 m., joins the Loire, on the l. bank, 8 m. ESE of Quingey.

LISONE, a river of Switzerland, in the cant. of Tessino, which flows through the Val-d'Agno into Lake Lugano.

LISOWICH, a village of Turkey in Europe, in the prov. of Bosnia, sanj. and SE of Srebernik.

LISNAKILL, a parish in co. Waterford, 4 m. SW of Waterford. Area 2,534 acres. Pop. in 1831, 667; in 1841, 674.

LISNARRICK, a village in the p. of Derryvullen, co. Fermanagh, 2½ m. W of Lowtherstown. Pop. in 1841, 204.

LISNASKEA, a town in the p. of Aghalurcher, co. Fermanagh, 3 m. S by E of Maguire's-Bridge. Pop. in 1831, 430; in 1841, 915.

LISPIDA, a village of Austria, in Lombardy, in the prov. and 12 m. SW of Padua, district and 3 m. N of Monselice, at the foot of the Euganean mountains, and near the W bank of a canal of the same name.

LISPITZ, a town of Moravia, in the circle and 14 m. NW of Znaym.

LISRONAGH, a parish in co. Tipperary, 3¼ m. S of Fethard. Area 3,046 acres. Pop. in 1841, 928.

LISSA, or Lisa, a town of Bohemia, in the circle of Bunzlau, 17 m. SSW of Jung-Bunzlau, and 22 m. ENE of Prague. Pop. 2,714. It has 2 churches, 2 hospitals, and a public library. In the environs is the chapel of St. Wenzel.—Also a village of Prussia, in the prov. of Silesia, regency and 9 m. W of Breslau, circle and 13 m. E of Neumark. Pop. 430. A signal victory was here gained over the Austrians by Frederick II., king of Prussia, on the 22d Nov., 1757.

LISSA, or Issa, an island of the Adriatic, near the coast of Dalmatia, in the circle and 48 m. SW of Spalatro, and 21 m. W of Lesina. Its highest summit is in N lat. 43° 10′, and E long. 16° 11′. Pop. in 1843, 3,702. It is 11 m. in length, and 6 m. in breadth, and is generally mountainous. Its principal productions are wine, oil, almonds, and figs. Bees, sheep, and goats are reared in great numbers by its inhabitants, and near its coasts are productive sardine fisheries. The chief town, named Lissa or San Georgio, is situated on the NE coast, on a gulf which forms one of the best harbours in the Adriatic, and which is defended by several forts. The island was held by the English from 1807 to 1810, and formed one of the principal stations of their cruisers. During this period its pop. rose from 4,000 to 12,000. The government was conducted by an English officer as civil and military governor, with a legislative and judicial council of 12 natives. The harbour, with all the anchorages and roadsteads of the island, is now a declared military harbour, and as such no foreign vessel of war is allowed to enter except under stress of weather.

LISSA, Polnisch-Lissa, or Leszno, a town of Prussia, in the prov. and regency and 44 m. SSW of Posen, circle and 12 m. ENE of Fraustadt. Pop. in 1846, 8,730, of whom 4,000 were Jews. It is chiefly built of wood, and possesses a fine ancient castle, formerly belonging to the Leszczinsky family, and now to the princes of Sulkowsky; 4 churches, a Catholic, a Lutheran, and 2 Calvinist; a gymnasium, and a synagogue. It carries on an active trade in woollen fabrics, leather, furs, iron-ware, tobacco, and wine.

LISSABALLA, a town on the N coast of the island of Ceram, in the Asiatic archipelago.

LISSAC, a village of France, in the dep. of the Correze, cant. and 3 m. SE of Larche, and 6 m. SW of Brives. Pop. 625.—Also a village in the dep. of the Lot, cant. and 3 m. WNW of Figeac, on the r. bank of the Droussu. Pop. 1,240. It has a Benedictine abbey.

LISSAN, a parish, partly in co. Tyrone, and partly in co. Londonderry, 2 m. SW of Moneymore. Area 34,683 acres. Pop. in 1831, 6,163; in 1841, 6,282. Nearly two-thirds of the surface are mountainous ground; and the chief summits are Fir mountain, 1,188 ft., in the Tyrone section, and Slievegallion, 1,750 ft. in the Londonderry section.

LISSBERG, a town of the duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, district and 5 m. SSE of Nidda, and 17 m. NE of Hanau, on the r. bank of the Nidder, and at the foot of the Vogelsberg. Pop. 1,500. It has an ancient castle.

LISSE′, a village of France, in the dep. of the Lot-et-Garonne, cant. and 4 m. N of Mezin.—Also a village of Holland, in the prov. of Holland, cant. and 8 m. NNE of Leyden, and 11 m. SSE of Harlem, and near the lake of that name. Pop. 1,190. Flowers and legumes are extensively cultivated in the environs.

LISSELTIN, or Lislaghtin, a parish in co. Kerry, 5½ m. NW of Listowel. Area 6,882 acres. Pop. in 1831, 2,158; in 1841, 2,221.

LISSEROEUL, a commune of Belgium, in the prov. of Hainault, dep. of Fauroeulx. Pop. 124.

LISSES, a village of France, in the dep. of the Seine-et-Oise, cant. and 3 m. WSW of Corbeil. Pop. 622.

LISSET, a chapelry in the p. of Beeford, E. R. of Yorkshire, 7 m. SSW of Bridlington. Area 1,150 acres. Pop. in 1831, 102; in 1841, 132.

LISSEWEGE, a department and commune of Belgium, in the prov. of West Flanders, arrond. of Bruges. Pop. of dep. 1,413. The village is situated on a canal of the same name, 7 m. N of Bruges. It has a large brewery.

LISSEY-SUR-VINGEANNE, a village of France, in the dep. of the Côte-d'Or, cant. and 3 m. S of Fontaine-Française, on the r. bank of the Vingeanne. Pop. 140. It has several iron-works.

LISSINGTON, a parish in Lincolnshire, 11½ m. NE of Lincoln. Area 1,570 acres. Pop. in 1831, 182; in 1841, 186.

LISSITZ, or Lisyce, a town of Austria, in Moravia, in the circle and 20 m. NNW of Brünn. It has a manufactory of earthenware, alum, and vitriol. Pop. 1,370.

LISSONE, a village of Austria, in Lombardy, in the prov. and 12 m. N of Milan, district and 3 m. N of Monza. Pop. 1,730.

LISSONUFFY, a parish in co. Roscommon, 4¼ m. SE of Strokestown. Area 11,665 acres. Pop. in 1831, 4,599; in 1841, 4,832.

LISSOWICE, a village of Galicia, in the circle and 12 m. S of Stry. It has a saline spring.

LISTER, a village of Norway, in the bail. of Mandal, on the coast, to the W of Cape Lindenaes.

LISTERLING, a parish in co. Kilkenny, 5 m. S of Innistiogue. Area 5,431 acres. Pop. in 1831, 1,551; in 1841, 1,565.

LISTER'S PEAK, a summit of New Holland, in the district of Moreton, near the E coast, at the head of the Brisbane river.

LISTON, a parish in Essex, 3 m. NNW of Sudbury. Area 530 acres. Pop. in 1841, 80.

LISTOWEL, a parish and town in co. Kerry. Area of p. 8,302 acres. Pop. in 1831, 4,977; in 1841, 5,934. The surface is watered by the river Feale, and traversed by the road from Tralee to Limerick by way of Tarbert.—The town stands on the r. bank of the Feale, 6½ m. S by E of Ballylongford. It was long a very poor little place, but has of late been much improved; and now enjoys considerable trade and thoroughfare in consequence of the formation of new roads through the N of Kerry, and of the transit of public conveyances between Tralee and Limerick by way of Tarbert. A fine bridge, with spacious approaches, here spans the Feale. The ruins of L. castle surmount a steep bank of the Feale, and have a very imposing effect. This castle was the last which held out for Lord Kerry against Queen Elizabeth.

LISTRAC, a commune of France, in the dep. of the Gironde, cant. and 4 m. N of Castelnau-de-Medoc. Pop. 1,803.

LISTVENICHNA, or Martchinoselo, a town of Russia in Asia, in the gov. of Irkutsk, district and 180 m. ENE of Nertchinsk, on the r. bank of the Argun.

LISY-SUR-OURCQ, a town of France, in the dep. of the Seine-et-Marne, arrond. and 6 m. NE of Meaux, between the canal of Ourcq and river of that name, and near the junction of the latter with the Marne. Pop. 1,120. It is well-built, and contains the remains of an old castle. It has an oil-mill.

LISZKA (Olasze), a town of Hungary, in the comitat and 24 m. SW of Zemplin, on the r. bank of the Bodrog.

LISZKOWO, a town of Poland, in the woiwodie of Augustowo and obwod of Seyny, 48 m. E of Suwalki, on the l. bank of the Niemen. Pop. 250.

LISZNIOWKA, a town of Russia in Europe, in the gov. of Volhynia, district and 36 m. NE of Kowel.

LITAKIA, a village of the island of Zante, near the shore of the gulf of Kieri.

LITAKOO. See Lattaku.

LITCHAM, a parish and market-town of Norfolk, 7½ m. NNW of Swaffham. Area 2,060 acres. Pop. in 1831, 771; in 1841, 846.

LITCHBOROUGH. See Lichborough.

LITCHFIELD. See Lichfield.

LITCHFIELD, a county in the NW part of the state of Connecticut, U. S., comprising an area of 885 sq. m. It is generally hilly, and is watered by Housatonic river and its branches, and by branches of Naugatuck and Farmington rivers. The soil, consisting of gravelly loam, possesses considerable fertility. Pop. in 1840, 40,448; in 1850, 45,288.—Also a township in the above co., 100 m. NNE of New York, watered by head-branches of Shepang and Naugatuck rivers, and by a large pond. Pop. in 1840, 4,038. The village is pleasantly situated on a hill, and contains 900 inhabitants.—Also a township of Kennebec co., in the state of Maine, 11 m. SSW of Augusta, watered by branches of Cobbescoute river. Pop. 2,293.—Also a township of Hillsboro' co., in the state of New Hampshire, 30 m. S by E of Concord, on the E side of Merrimac river. Pop. 480.—Also a township of Herkimer co., in the state of New York, 8 m. WNW of Albany. It has a hilly surface, and is watered by the head-branches of Unadilla river and other streams. Pop. 1,672.—Also a township of Bradford co., in the state of Pennsylvania, 156 m. N of Harrisburg. The surface is hilly, and is watered by branches of Wepassining creek. The soil consists of gravelly loam. Pop. 817.—Also a township of Medina co., in the state of Ohio, 113 m. NE by N of Columbus. Pop. 787.—Also a township of Hillsdale co., in the state of Michigan. Pop. 691.—Also a village of Grayson co., in the state of Kentucky.

LITHADA (Cape), a headland of Greece, in Livadia, at the NW extremity of the island of Negropont, 6 m. W of a mountain of the same name, in N lat. 38° 52′ 30″, and E long. 22° 55′, and on the NE side of the channel of Talanta. It is the *Cenæum promontorium* of the ancients. Between this cape and Mount Lithada is a village of the same name.—Also a group of islands at the NW entrance of the channel of Talanta, from which the cape is supposed to have derived its name.

LITHAIRE, or Litchaire, a commune of France, in the dep. of the Manche, cant. and 2 m. ESE of La Have-du-Puits. Pop. 2,003.

LI-THANG, a town of Tibet, in the prov. of Kham, 60 m. NE of Ba-thing. It consists of about 200 houses enclosed by a rampart of earth, and is inhabited partly by Tibetians, and partly by Chinese.

LITHERLAND, a township in the p. of Sefton, Lancashire, 4½ m. N of Liverpool, crossed by the Leeds and Liverpool canal. Area 1,050 acres. Pop. in 1831, 780; in 1841, 1,586.

LITHOPOLIS, a village of Bloom township, Fairfield co., in the state of Ohio, U. S., 17 m. SE of Columbus. Pop. in 1840, 250.

LITHUANIA, in German Littauen, an ancient division of Europe, lying between Courland on the N; Russia on the E; Poland on the S; and Prussia on the W. In the 11th cent. this country was tributary to Russia; in the 13th it became a grand-duchy under Ringold. The grand-duke Jagellon having married the Polish princess Hedwig, united his duchy to the crown of Poland about the year 1386. At the first partition of Poland in 1773, a considerable portion of L. was assigned to Russia, and the governments of Mohilev and Polozk or Vitebsk were formed out of the newly acquired territory; while the remainder of L. forming the woiwodies of Vilna, Troki, Polozk, Novogrodek, Brzesc, and Minsk, remained attached to the Polish monarchy. By the partition of 1793, and 1795, Russia further acquired those portions of L. which now form her govs. of Vilna, Grodno, and Minsk; while Prussia acquired that portion now forming her regency of Gumbinnen. The surface of the country is very flat, generally sandy, intersected by vast marshes and bogs, and covered with immense forests abounding in bears, wolves, wild boars, and other animals. Among these the urus or wild ox occurs, but is becoming rare, and seems to diminish both in size and strength. The most common trees are the pine, the oak, and the elm. An immense quantity of pot-ash and pearl-ash is annually drawn from the woods; honey also is collected in great abundance. The pasturage in many parts is excellent; and the cattle is generally of a better breed than in other parts of Russia. There is a good deal of land fit for the culture of wheat; but buck-wheat is raised in preference. Such are the natural riches of Lithuania; but the indolence of the inhabitants prevents them from reaping this abundant harvest. The best lands lie fallow; the hay is allowed to rot on the meadows; and whole forests are at times destroyed by fire.—The Lithuanians seem to be of the same race with the Samogitians, and resemble the Poles and Russians. Their appearance announces extreme poverty. Their usual dress is a coarse shirt, covered by a woollen cloak and drawers, sometimes by merely a sheepskin. Their shoes are made of bark. Their carts are entirely of wood, without a single piece of iron; and even the harness of their horses is often made of the more flexible branches of trees. In Russian L., the landed proprietors of the class of nobility are falling rapidly into poverty. Almost every number of the official journals of the district contains announcements of the sale of the estates of insolvent proprietors. There are many noble families who own only half a dessatine of land or about 2 acres English, without serfs attached to it. To assist these impoverished families as far as possible, the government has resolved to settle them on the crown-lands of the govs. of Simbirsk and Tobolsk. On account of their inability to educate their children, one son from each family is entered in the battalions of the military colonies.

LITHZOV, a town of Russia in Europe, in the gov. of Vilna, district and 54 m. NW of Chavli, and 33 m. N of Telsze, on the r. bank of the Windawa.

LITIA, or Litey, a town of Illyria, in the gov. and 14 m. ENE of Laybach, circle and 18 m. NNW of Neustädtl, on the r. bank of the Save. It has several large tanneries.

LITIZ, a village of Warwick township, Lancaster co., in the state of Pennsylvania, U. S., 45 m. E

by S of Harrisburg, consisting in 1840 of about 80 dwellings.

LITNIEWCE, a town of Russia in Europe, in the gov. of Podolia, district and 17 m. N of Uszyca, and 30 m. ENE of Kamenetz. Pop. 400.

LITRY, a village of France, in the dep. of the Calvados, cant. and 4 m. NW of Balleroy, and 10 m. WSW of Bayeux. Pop. 1,550. In the environs are extensive coal-mines.

LITSCHAU, a frontier town of the archd. of Austria, in the circle and 47 m. NNW of Krems, on the Launetz. Pop. 657. It has a castle, and possesses manufactories of woollen fabrics.

LITTAU, or LITTOWLE, a town of Moravia, in the circle and 10 m. NNE of Olmutz, between two arms of the March, and on the railway to Prague. Pop. 2,280. It has fortified and extensive suburbs. It has manufactories of woollen fabrics and hosiery, and a paper-mill.

LITTER, or CASTLE-HYDE, a parish in co. Cork, 2 m. W by N of Fermoy. Area 5,405 acres. Pop. in 1831, 1,926; in 1841, 1,951.

LITTERAGH. See CORKAGUINEY.

LITTERMORE. See LETTERMORE.

LITTLE, a river of the United States, which forms part of the boundary between North and South Carolina, and falls into the Pedee.—Also a river of the state of Georgia, which flows into the Savannah, 30 m. above Augusta.—Also a river in the state of Kentucky, an affluent of Cumberland river.—Also a river in the state of Indiana, which flows into the Wabash, above Vincennes.

LITTLE, a river of Australia Felix, which falls into the harbour of Port Phillip, to the S of the Werribee river.

LITTLE-BEAVER, a township of Beaver co., in the state of Pennsylvania, U. S., drained by a branch of Little Beaver river. Its surface is undulating, and its soil consisting of calcareous loam generally fertile. Pop. in 1840, 1,254.

LITTLEBOROUGH, a chapelry in the p. and 3½ m. ENE of Rochdale, at the foot of Blackstone Edge, and on the Manchester and Leeds railway.—Also a parish in Nottinghamshire, 7½ m. E by N of East Retford, on the Trent. Area 290 acres. Pop. in 1831, 82; in 1841, 77.

LITTLEBOURNE, a parish in Kent, 4 m. E by S of Canterbury, on a branch of the Stour. Area 2,010 acres. Pop. in 1831, 733; in 1841, 819.

LITTLE-BRITAIN, a township of Lancaster co., in the state of Pennsylvania, U. S., 20 m. SE of Lancaster, watered by Octarara creek and its branches, and by Conewingo creek. Pop. in 1840, 3,042.

LITTLEBURY, a parish in Essex, 2 m. WNW of Saffron-Walden, intersected by the London and Cambridge railway. Area 2,300 acres. Pop. in 1831, 875; in 1841, 822.

LITTLE-COMPTON, a township of Newport co., in the state of Rhode Island, U. S., 38 m. SSE of Providence, at the E entrance of Narraganset Bay. Its surface is diversified, and its soil generally fertile.

LITTLECOT, a chapelry in the p. of Chilton-Folliat, Wilts, 4 m. NW of Hungerford.

LITTLE-CREEK, a hundred of Kent co., in the state of Delaware, U. S. Pop. in 1840, 2,050.—Also a hundred of Sussex co., in the same state. Pop. 2,973.

LITTLEDALE, a chapelry in the p. and co. of Lancaster, 6 m. E by N of Lancaster, on the Lune.

LITTLE-FALLS, a township of Herkimer co., in the state of New York, U. S., 91 m. WNW of Albany. It has a hilly surface, watered by Mohawk river, and intersected by the Utica and Schenectady railroad. Pop. in 1840, 3,881. The village lies on the Mohawk river.—Also a village of Passaic co., in the state of New Jersey, 79 m. NE by N of Trenton, consisting in 1840, of about 50 dwellings.

LITTLEFURZE, a village in the p. of Athlumney, co. Meath, ¾ of a mile E of Navan. Area 8 acres. Pop. in 1841, 204.

LITTLEHAM, a parish in Devonshire, 2 m. S of Bideford, in the vale of the Yeo. Area 1,290 acres. Pop. in 1831, 424; in 1841, 390.

LITTLEHAM-WITH-EXMOUTH, a parish in Devonshire, 9 m. SW by W of Sidmouth, at the mouth of the Axe. Area 2,260 acres. Pop. in 1831, 3,189; in 1841, 3,927.

LITTLE-HAMPTON, a parish of Tasmania, in the co. of Westmoreland, bounded on the W by the Liffey or Pennyroyal creek.

LITTLE-ISLAND, an island in the p. of Ballinakill, co. Waterford, in the Suir, 2½ m. below the city of Waterford. It comprises an area of 180 Irish acres.—Also a parish in the co. and 4 m. E of Cork, insulated by the Lee. Area 1,692 acres. Pop. in 1831, 1,103; in 1841, 1,069.

LITTLE-MAHANOY, a township of Northumberland co., in the state of Pennsylvania, U. S. Pop. in 1840, 213.

LITTLE-OSAGE, a village of Bates co., in the state of Missouri, U. S., 158 m. WSW of Jefferson city, at the junction of Little Osage and Marmeton rivers.

LITTLE-OVER, a township in the p. of Mickle-Over, Derbyshire, 2 m. SW by S of Derby. Pop. in 1831, 412; in 1841, 497.

LITTLE-PINEY, a village of Pulaski co., in the state of Missouri, U. S., 90 m. S of Jefferson city, at the junction of Little Piney and Gasconade rivers.

LITTLE-PLYMOUTH, a village of King and Queen co., in the state of Virginia, U. S., 60 m. E by N of Richmond. Pop. in 1840, about 60.

LITTLEPORT, a parish in Cambridgeshire, 4½ m. NNE of Ely, on the East Anglian railway. Area 16,390 acres. Pop. in 1831, 2,644; in 1841, 3,365.

LITTLE-PRAIRIE, a township of New Madrid co., in the state of Missouri, U. S. Pop. 436.

LITTLE-ROCK, a town in the state of Arkansas, cap. of the co. of Pulaski, 1,065 m. from Washington, on the S bank of Arkansas river, and on a bank 200 ft. above its level, and 300 m. above its mouth. Pop. in 1840, 2,500.

LITTLE-SWAN-PORT, a river of Tasmania, which divides the cos. of Glamorgan and Pembroke, and falls into Oyster bay, by an estuary which forms a beautiful port.

LITTLETON, a parish in Middlesex, 3 m. SE by E of Staines. Area 1,060 acres. Pop. in 1831, 134; in 1841, 111.—Also a parish in Southampton-shire, 3½ m. NW by N of Winchester. Area 1,300 acres. Pop. in 1831, 120; in 1841, 135.

LITTLETON (DREW), a parish and village in Wilts, 7½ m. NW of Chippenham. Area 760 acres. Pop. in 1831, 177; in 1841, 251.

LITTLETON (HIGH), a parish in Somersetshire, 8½ m. SW by W of Bath. Area 1,190 acres. Pop. in 1831, 911; in 1841, 1,116.

LITTLETON (NORTH), a parish in Worcestershire, 3¾ NE by N of Evesham. Area 1,610 acres. Pop. in 1831, 360; in 1841, 296.

LITTLETON-PANNELL, a tything in the p. of West Lavington, Wilts, 5 m. SSW of Devizes. Pop. in 1831, 532; in 1841, 507.

LITTLETON-UPON-SEVERN, a parish in Gloucestershire, 4½ m. SE by E of Chepstow, on the E bank of the Severn. Area 900 acres. Pop. 195.

LITTLETON (SOUTH), a parish in Worcestershire, 3 m. NE of Evesham. Area 900 acres. Pop. in 1831, 110; in 1841, 189.

LITTLETON (West), a parish in Gloucestershire, 5½ m. N by E of Bath. Area 1,050 acres. Pop. in 1831, 128; in 1841, 158.

LITTLINGTON, a parish and village of Cambridgeshire, 3½ m. WNW of Royston. Area 2,880 acres. Pop. in 1831, 622; in 1841, 722.—Also a p. in Sussex, 6½ m. SW by S of Halesham, on the river Cuckmere. Area 570 acres. Pop. in 1841, 140.

LITTON, a parish in Somersetshire, 6 m. NNE of Wells. Area 1,230 acres. Pop. in 1831, 414; in 1841, 430.—Also a hamlet in the p. of Tideswell, Derbyshire, 5 m. NW by N of Bakewell. Pop. in 1831, 866; in 1841, 864.—Also a township in the p. of Arncliffe, Yorkshire, 9¼ m. NNE of Settle. Area 6,850 acres. Pop. in 1831, 102; in 1841, 107.

LITTON (Cheney), a parish in Dorset, 5¾ m. E by S of Bridport. Area 2,330 acres. Pop. 463.

LITTORAL. See Viareggio.

LITTORAL (Hungarian), a district, formerly administratively annexed to Hungary, stretching along the Adriatic, to the E of the gulf of Quarnero, and N of the canal of Morlacca; bounded on the NW by Illyria; on the N by Civil Croatia, from which it is separated by a ridge of the Julian Alps; on the E by Military Croatia. Its principal towns and ports are Fiume and Porto-Re. On the formation of the kingdom of Illyria, in 1815, this district was administratively annexed to it under the name of the circle of Fiume.

LITTORI, a town of Indo-China, in Assam, on an island of the Brahmaputra, 45 m. NE of Guahatti.

LITTRY, a commune and town of France, in the dep. of Calvados, cant. of Balleroy, 10 m. WSW of Bayeux. Pop. 2,128. It contains extensive coalfields.

LITVINOVO, a town of Russia in Europe, in the gov. of Voronej, district and 26 m. ENE of Starobielsk, and 9 m. NNW of Bielovodsk.

LITYN, or Litin, a district and town of Russia in Europe, in the gov. of Podolia. The district is in the N part of the gov., and is traversed by the Bug. It produces corn, timber, and tobacco, in great abundance, and contains large herds of cattle. The town is 13 m. WNW of Winnica, and 90 m. NE of Kamenetz, in a fertile plain. Pop. 3,500.

LITZERSDORF, or Lodos, a town of Hungary, in the comitat of Eisenburg, 23 m. SW of Guns. Pop. 851.

LIU-CHU-FU, a division and town of China, in the prov. of Gan-huwy. The div. comprises 5 districts. The town is 120 m. N of Nan-king, in N lat. 31° 56′ 57″, E long. 117° 15′ 20″. It has a suburb, from which it is separated by a river. It has manufactories of paper. The environs are noted for their fruit, and produce also considerable quantities of tea.

LIUSNE, a river of Sweden, which issues from a small lake of the same name, in the W part of the prefecture of Jamtland, and of the haerad of Herjeadalen, in N lat. 62° 45′, E long. 12° 1′; runs SE into the prefecture of Gefleborg; and, after a course of about 240 m., falls into the gulf of Bothnia, 36 m. N of Gefle. It forms in the latter part of its course several lakes, of which Bergviken and Marman are the principal.

LIUSNEDAL, a parish of Sweden, in the prefecture of Jamtland, and haerad of Herjeadalen, 90 m. SW of Œstersund, and 180 m. NNW of Falun, on the l. bank of the Liusne. Pop. 135. It has large iron-works.

LIVADIA, a river of Greece, in Livadia, formed by the junction of the Lethe and Mnemosyne, which unite a little to the S of Lebadea; runs N past that town; and, after a course of about 18 m., throws itself into Lake Topolias. It is the *Hercyna* of the ancients.

LIVADIA, the modern name of that portion of Greece which lies between Mount Olympus on the N, separating it from Romelia; the Archipelago on the E; the gulfs of Patros and Lepanto on the S; and the Aspro-Potamos, separating it from Albania, on the W. It corresponds to Greece Proper or Hellas; and anciently comprised Thessaly, Acarnania, Etolia, Phocis, Bœotia, and Attica. Under Turkish sway it was divided into the sanjaks of Trikala, Karleha, Lepanto, and Negroponto.

Livadia, or Lebadea, a considerable inland town of Greece, the capital of the foregoing prov., situated to the E of Mount Helicon, on a steep declivity divided by a rugged chasm, 50 m. NW of Athens, and 85 m. SSE of Larissa. Before the town lies a beautiful valley watered by the Hercyna or Ercyne; and behind on a lofty and precipitous corner of the mountain, stand the towers and pinnacles of a castle in ruins. The town itself, though of considerable size, and containing 10,000 inhabitants, has a decayed appearance. Its streets are narrow and ill-paved, and its houses meanly built. It was considerably injured by an inundation of the Hercyna in 1848.

LIVADOSTRO, a village of Greece, on an arm of a bay of the same name, 17 m. NW of Megara, and 24 m. SSE of Lebadea. The bay of L. forms the E part of the gulf of Lepanto. It is 12 m. in breadth at its entrance, and 18 m. in depth. It is the *Alcyonium mare* of the ancients.

LIVAROT, a canton, commune, and town of France, in the dep. of Calvados, and arrond. of Lisieux. The cant. comprises 27 com. Pop. in 1831, 10,240; in 1841, 9,696. The town is 11 m. SSW of Lisieux, and 28 m. SE of Caen, on the r. bank of the Vie. Pop. 1,162. It has a spinning-mill and several tanneries, and carries on an active trade in butter and cheese.

LIVE, a commune of Belgium, in the prov. of Namur, dep. of Live-et-Brumagne. Pop. 102.

LIVE-ET-BRUMAGNE, a department and commune of Belgium, in the prov. and arrond. of Namur, on the Meuse. Pop. of dep. 294. It has a church and a castle.

LIVENS-ESSCHE (Saint), or Essche-Saint-Lievin, a department and commune of Belgium, in the prov. of E. Flanders, arrond. of Audenarde. Pop. of dep. 2,699. The com. is 14 m. ESE of Audenarde.

LIVENSK, a town of Russia, in the gov. and 105 m. SSW of Voronej, district and 18 m. SSW of Birioutch, on the r. bank of the Valoni. Pop. 500.

LIVENZA, a river of Austria, in Lombardy, which has its source near Polcenigo, in the deleg. of Udine, in the district of Sacile; runs SSE into the deleg. of Venice; and, after a rapid and tortuous course of about 51 m., throws itself by several arms into the Adriatic, at Porto-Santo-Margherita, and 30 m. ENE of Venice. This river is navigable to Tremeacque, and about midway in its course has a breadth of 120 ft. It is connected with the Piave by a canal.

LIVERDUN, a village of France, in the dep. of the Meurthe, cant. and 8 m. NE of Domevre-en-Haye, on the l. bank of the Moselle. It was formerly a fortress belonging to the bishops of Toul.

LIVERI, a village of Naples, in the prov. of the Terra-di-Lavoro, district and 3 m. SE of Nola, cant. and 4 m. W of Saviano. Pop. 1,155.

LIVERMERE (Great), a parish in Suffolk, 5 m. NNE of St. Edmund's-Bury. Area 1,580 acres. Pop. in 1831, 336; in 1841, 320.

LIVERMERE (Little), a parish in Suffolk, 5¼ m. NNE of St. Edmund's-Bury. Area 1,500 acres. Pop. in 1831, 185; in 1841, 172.

LIVERMORE, a township of Oxford co., in the

state of Maine, U. S., 30 m. W of Augusta, on both sides of Androscoggin river. Pop. in 1840, 2,745.

LIVERNON, a canton and commune of France, in the dep. of the Lot, arrond. of Figeac. The cant. comprises 17 com. Pop. in 1831, 8,989; in 1841, 8,986. The v. is 11 m. WNW of Figeac, and 27 m. NE of Cahors. In the environs are quarries of freestone and of alabaster.

LIVERPOOL, a parish, parliamentary borough, and seaport, in the hund. of W. Derby, co.-palatine of Lancashire, situated on the E side of the estuary of the Mersey, in N lat. 53° 24′, W long. 2° 58′, distant by railway from Aylesbury 176 m.; Birmingham 90 m.; Bolton 28¼ m.; Bristol 188 m.; Cheltenham 134 m.; Edinburgh 197½ m.; Fleetwood 40 m.; Glasgow 201 m.; Halifax 60½ m.; Hull 130 m.; Lancaster 49 m.; Leeds 75 m.; Lincoln 122¾ m.; London 201 m.; Manchester 31½ m.; Wakefield 78½ m.; Wolverhampton 83 m.; York 104 m.—The limits of the p. and borough previous to the passing of the parliamentary and municipal reform acts, were coextensive, and their area amounted to 1,560 acres. The town however reaching far beyond the borough boundaries on every side except the W, the townships of Kirkdale and Everton, part of the township of West Derby, and of the township or extra-parochial district of Toxteth-park, all of them very populous, were added to the parl. borough by the new boundary act.

Site.] The borough of L. occupies the slopes of a series of small hills on the E bank of the Mersey. At the S extremity is Park-hill, the summit of which is about 1,200 yds. E from the line of the docks, and about 188 ft. high above the old dock sill, to which datum all the heights mentioned here have reference. Nearly N from Park-hill, and about 3,000 yds. E of the line of docks, is the summit of another hill, at the junction of Smithdown lane and Parliament-street. The height is 192 ft., and the lowest point of the valley between the two summits occurs at the crossing of Princes' Park-road, at the height of about 152 ft. Proceeding N from Smithdown-lane, on a line nearly parallel with the river, we arrive at Edge-hill, the summit of which is near to St. Mary's church, and is 228 ft. high. From Edgehill the ground slopes gently N to Kensington, where there is an extensive flat at the height of about 208 ft. It rises slightly at Low-hill, and proceeds in an irregular rise interrupted by gentle knolls to the summit of Everton, in the neighbourhood of the church. This summit is the highest point in L.; it is nearly N from Edge-hill, and is 248 ft. high above the datum. From Everton the ground falls rapidly to the E in the direction of the Brook, and to the N into the valley between Everton and Walton-hill. To the W it also falls, until at the height of 104 ft. it meets the head of a valley formed between Everton and a lower ridge, which, commencing at Kirkdale at about 112 ft. high, and 1,000 yds. E from the river, returns in a S direction with an irregular fall, interrupted by two knolls, the first at Bevington-hill, and the other at the crossing of Plumber-street and Prussia-street, to the site of the old castle of L. in Castle-street, where it terminates at the height of about 50 ft. above the datum. The valley enclosed between the ridges formed by the succession of hills first named, stretching N from Smithdown lane to Everton, and the return ridge which extends from Kirkdale to Castle-street, terminates in a long level tract in Paradise-street, the site of the old pool of L., and receives the drainage of the W slopes of the first ridge and the E slopes of the other. The rise from the valley to Everton is very rapid; but as the valley expands the slopes become less steep, and at about half-way between the bottom of the valley and the summit at Edge-hill, a slight intermediate hill, Brownlow-hill, occurs, between which and the slope of Edge-hill a long flat tract which is the site of the old Moss-lake is included. On the W and S sides of Park-hill, the water flows directly into the river; on the E side, the natural outlets are the Dingles. The E slopes of Edge-hill drain into a brook which runs from the S of Kensington-road by the Botanic gardens to Otterspool. The E slopes of Everton drain into the Brook, and its N slopes into the valley between Everton and Walton.

Origin and increase of the town.] The origin of the name Liverpool is involved in obscurity. Some have derived it from a species of liver-wort found on the sea-shore. With perhaps more probability, the entire name is by others supposed to have been derived from the Welsh words Lle'r-pwll, signifying 'the place on the pool.' The pool, on the borders of which the original town or village stood, occupied the site of the new custom-house. Baxter supposes this to have been the port of the *Sestantii*, mentioned by Ptolemy,—a notion, however, which has generally been rejected. The existence of L. even at the Conquest is doubtful. The conquest of Ireland gave the first stimulus to L. In the beginning of the 16th cent., Leland gives the following description of it:—"Lyrpole, alias Lyverpoole, a paved towne, hath but a chapel. Walton, at 4 miles off, not far from the se, is paroche chirch." Subsequently to this date the town declined, containing in 1565 only 138 houses; and in 1571, is mentioned in a petition to Queen Elizabeth as "her majesty's poor decayed town of L." In this reign, however, a mole was formed to lay up the vessels in during winter; and a quay for the advantageous shipping and unshipping of their cargoes. In 1636 L. was rated at no more than £25, while Chester was charged £26, and Bristol £1,000. In consequence of the increase of the town, in the reign of William III., it was found necessary to make Liverpool a distinct parish from that of Walton-on-the-Hill. In 1709 an act of parliament was obtained for the formation of a wet-dock, which was formed in 1719 on the site of the old pool or haven, and was latterly known as 'the Old dock,' till filled up in 1831. Another act was obtained in 1736 for the enlargement of the old dock, the formation of another called Salthouse dock, and for rendering the harbour more secure. Under a third act, obtained in 1761, a third dock called the St. George's dock was formed, and piers were built to secure the outer harbour. From that period down to the present time the town has been increasing in magnitude, pop., and commercial importance with a rapidity unexampled in the old world. Till within the last half-century, however, the streets were generally narrow and inconvenient, and the buildings totally devoid of architectural beauty; but since that period, no town in this country has received greater improvement, and not one possesses at once so much elegance and commercial accommodation so extensive. Amongst the causes through the instrumentality of which "this quondam village, now fit to be a proud capital for any empire in the world, has started up, like an enchanted palace, even in the memory of living men," in the foremost rank stand the natural conveniences of its harbour. These have been enhanced to an immense extent by the never-ending increase of the docks; by the connection of the port, by means of canals and railways, with every part of the empire; and by the introduction of steam-power in aid of navigation. The natural and superinduced advantages of the surrounding district are next in importance: an extensive field of the most valuable coal, quarries of iron and freestone, mines of salt, and equally inexhaustible mines of British manufacture, on the one hand; on the other, the rich products of Ireland and the Manx fisheries. These have led to their necessary results among a free and industrious people, in the establishment of extensive commercial enterprise and various manufactures. The establishment of steam-vessels induced the Glasgow and Irish merchants to send large quantities of manufactured goods to L. for shipment to all parts of the globe; the Americans for many years carried on a large trade in British goods with China through the port of L.; and the Liverpool merchants have been enabled so effectually to compete with the metropolis in the Birmingham and other markets as to have induced leading firms in London to establish branches at L. At a dinner given by the mayor of L. to Sir R. Peel in 1847, the progress of the town during the last 16 years was thus illustrated by one of its parliamentary representatives: The pop. in 1831 was 205,964; in 1846 it had nearly doubled, being 358,655. The revenue produced by the corporation property in 1831 was £45,968; in 1847,

£59,336. The town dues were in 1831, £49,332; in 1847 they were nearly double, the amount being £97,219. The dock revenue in 1831 was £183,455; and although the rates were reduced 38½ per cent. in 1836, they produced in 1847, £244,435. In 1831, the docks had 111 acres of water-space; in 1847, 180 a., with 14 m. of lineal quay space. The shipping of the port was in 1831, 12,537 vessels; in 1847, 20,889. The tonnage of the port was in 1831, 1,592,436 tons; in 1847, 3,351,539. The cotton imported was in 1831, 793,463 bales; in 1846, 1,134,081 bales. The increase in the number of houses built in L. is great beyond all precedent, to say nothing of the hundreds built beyond the boundaries, and the still greater number built on the Cheshire side of the river. To some extent this extraordinary increase in the number of houses has been the result of the excellent regulation which forbids living in cellars, and so far it is a proof of an improved mode of living rather than of an increase of the pop.; but even after every allowance has been made for that circumstance, the increase is surprising. The following table exhibits the increase of houses from 1838 to 1845:

In 1838	1,052 houses.
1839	997
1840	1,577
1841	1,761
1842	2,027
1843	1,390
1844	2,450
1845	3,728
Total,	14,982

At the period of the parliamentary survey in 1831, the increase of houses in the circuit of the townships adjoining the town was estimated at 700 per annum, while the price of land for building was very high, both in the town and on the outskirts. "As much as 10 guineas a sq. yard," say the commissioners, "has been given in the middle of the town; and the price of building ground in the different directions immediately surrounding the town is from 5s. to 15s. the sq. yard, or from £1,000 to £3,000 per acre. Even as far as 4 m. from L., in very favourable situations, £500 per statute acre is not, we are told, an unfrequent price."

Churches and chapels.] L. in the time of Leland, was a chapelry to Walton, as already noticed. On its erection, in 1699, into a parish, the old parochial chapel was called the church of St. Nicholas, and a new church dedicated to St. Peter was erected. St. Peter's church is a plain but well-built structure, with a tower 108 ft. high, and a peal of ten well-toned bells. St. Nicholas' church was erected in 1774, on the base of the ancient structure. It is a neat Gothic edifice. There are 20 perpetual curacies in the parish; 2 floating-chapels for seamen; 9 Independent and 9 Baptist places of worship; 4 Welsh Calvinist, 1 Society of Friends, 12 Methodist, 1 Sandemanian, 1 Swedenborgian, 1 Universalist, and 2 Unitarian chapels. There are also 2 Scottish kirks, 2 Secession, and 7 Roman Catholic chapels; a Jews' synagogue, and a Hebrew church. The Roman Catholic pop. of L. is now rated at 100,000, and is yearly on the increase. Amongst the churches and chapels, besides those of St. Peter and St. Nicholas, there are many more elegant and highly finished edifices in every style and order of architecture.

Public edifices connected with trade.] The custom-house, erected on the site of the old dock, is an extensive and superb structure in the Ionic style. Three foot-walks for public convenience, connecting the bottom of South Castle street with Park-lane, are carried through the centre. To the right and left of these, short flights of steps lead up to the passages, and four grand staircases leading to the long room, which has a segment ceiling supported by columns and pilasters and surmounted by a beautiful dome 50 ft. in height. This room is 146 ft. in length, and 70 ft. in width. The E wing of this noble edifice is occupied as the general post-office, excise-office, dock-offices, and stamp-office. The basement is vaulted for bonded or other goods. The extreme length of the building from E to W is 466 ft. 8 in.; width 95 ft.; height 66 ft. 10 in. Government agreed to aid in the expense of erecting this edifice, by annual payments of £25,000, to the amount of £150,000, on condition that it should be ceded to them in 20 years. The site, corporate property, was valued at £90,000, and the whole expense estimated at £300,000.—The Exchange is a noble range of buildings, founded in 1803. The expense was defrayed by subscription, and amounted to £110,000. The buildings form three sides of a square, the fourth of which is occupied by the N side of the town-hall. The area extends from N to S 197 ft., and from E to W 178 ft. The three interior fronts have each a fine piazza, 15 ft. wide, intended for shelter to the merchants during bad weather. The E wing contains a news-room, 94 ft. in length, by 51 ft. in width. Immediately over this is the underwriters' room, which is 72 ft. by 36 ft. In the area formed by the exchange buildings and the town-hall, the merchants daily congregate for the transaction of business.—The tobacco-warehouse, a large plain range of brick building, stands on the W side of King's dock, extending the whole length of the quay, and occupying an area of 6¼ acres.—The L. and Manchester railway station, in Lime-street, is an elaborate and imposing edifice occupying the whole of the extensive area between Gloucester-street and Nelson-street, in front of the Lime-street tunnel. The elevation to Lime-street presents a façade of 330 ft. in length, relieved from monotony by rich and varied decorations, consisting chiefly of 36 three-quarter Corinthian columns on rustic pedestals, surmounted by a beautiful entablature. Four large arched gates form a leading feature in the front elevation. The L. and Manchester, and the North-Western railway companies, have all necessary accommodation in the area behind this handsome façade.—The Corn-exchange, in Brunswick-street, (rebuilt 1852,) covers 1,133 sq. yds., having a cast-iron roof and lantern centre, and the front occupied by offices.—St. John's market is a series of market ranges of extraordinary extent, in the centre of the town, erected, in 1820-22, by the corporation, at an expense of £36,813. The length of the range is 183 yds.; breadth 45 yds.; area 8,235 yds., or nearly 2 acres. It is roofed throughout in 5 ranges. The interior displays a hall of immense size, lofty, lighted, and well-ventilated, and divided into 5 avenues by rows of cast-iron pillars 25 ft. high, supporting the conjoined abutments of the roofs. At night the whole interior is brilliantly illuminated.—St. Martin's market, in the vicinity of Maddox-street, and Scotland-road, is also a covered market, handsomer than St. John's, though not so spacious. The dimensions are 213 ft. by 135 ft. The interior is divided into 5 avenues.—St. James's market, at the S end of the town, is a fine brick building, with an area of about 3,000 sq. yds. It fronts Great George-street, and is covered with a lighted and ventilated roof, supported by rows of cast-iron pillars.—There are other markets in various parts of the city. In Murray-street is a new fish hall: there are also markets in Pownal and Cleveland squares, a hay-market at Lime-street, and a pig-market in Great Howard-street. The market-days are Wednesday and Saturday, but markets for provisions are held every lawful day.—St. George's Hall, which is said to be, with the exception of the new houses of parliament, the largest public building in the kingdom, was commenced in 1841, from designs by the late Mr. H. L. Elmes, architect, and does credit to the munificence of the corporation of L., from whose funds the cost of its erection—about £200,000—is defrayed. It is a magnificent example of columnar architecture of the Roman style "carried out"—to use the words of a professional man—"with Greek purity." The vastness of the building may be judged of when we mention that it not only includes a hall exceeding in size that of Westminster, but also two spacious assize-courts, a concert-room capable of accommodating 1,400 persons, a sheriff's court, jury-rooms, and many smaller apartments for public use, besides kitchens and numerous rooms for officers and servants. The extreme length of the edifice is 600 ft., and the E portico, composed of 16 fluted Corinthian columns, 41 ft. in height by 4 ft. 6 in. in diameter, is approached by a flight of steps 200 ft. in length. The S portico, which is intended to be the principal entrance, is composed of 8 Corinthian columns, supporting an entablature filled with emblematical sculpture. The northern entrance leads to the Nisi Prius court, a beautifully proportioned hall of 60 ft. by 50 ft., with a highly enriched arched panelled ceiling, supported by 22 Aberdeen granite columns, with bronze Corinthian capitals. It is now connected with the great hall by an open colonnade, to be filled in with glazed bronze gates ornamented with heraldic devices.—St. George's hall, which forms the centre of the building, is about 180 ft. in length; the extreme width is 100 ft.: and the height from the floor to the crown of the ceiling will be 84 ft. The great vaulted ceiling, of 63 ft. span, which is highly enriched with decorated panelling, is executed with perforated bricks, which are used on account of their lightness as compared with the common brick, and in consequence of their advantages in point of ventilation. If ordinary bricks had been used, the weight of the ceiling would have been 1,000 tons, but its actual weight is only 600. The ceiling is supported by 24 red granite pillars, 31 ft. high, with bronze Corinthian capitals, resting on a stylobate of granite 5 ft. 6 in. in height. The hall is lighted by a great semicircular window at each end, and by five lateral windows, and is intended to be used for musical festivals, concerts, public meetings, dinners, &c. There are 5 noble arched recesses on each side, intended as galleries for the accommodation of spectators when requisite. The Crown court, which is at the southern extremity of the building, is nearly similar in form and architecture to the Nisi Prius court. The concert-room, over the N entrance, is of semicircular form.

Port limits, estuary, and lights.] In an official document, dated 28th November, 1723, the port of L. is stated to extend "from the Redstones in Holyake, at the point of Wirral, southerly, to the foot of the river called Ribble-water, in a direct line N; and so upon the S side of the said river to Hesketh bank, easterly, and to the rivers Asland and Douglas there; and so all along the sea-coasts of Meols and Formby, unto the river Mersey, and all over the rivers Mersey, Irwell, and Weaver." In 1839-40, the limits of the port of Fleetwood were appointed to extend from near

Hesketh bank northwards. In 1850, Runcorn was declared to be no longer a port; and the limits of the port of L. were declared to commence at the termination of the port of Chester, being a place called the Red Stones, in Hoylake, on the Point Wirral, and so along the coast of Cheshire into the river Mersey, and all over the rivers Mersey, Irwell, and Weever, and thence returning along the coast of Lancashire till it meets the termination of the port of Fleetwood, at a place called the Hundred-End water." The 'Red Stones' are some rocks lying between Hilbre island and the extreme point of Wirral, at the mouth of the Dee. 'Hundred-End water' is a stream emptying itself into the Ribble, on its S side, a few miles higher up than Southport. Here, then, we have a port, which, two centuries ago, was described as "the little fishing creek of L.," being then, with Beaumaris and Caernarvon, a mere dependency of the port of Chester, now stretching along the sea-coast from the estuary of the Dee to that of the Ribble, and including within its jurisdiction the whole of three navigable rivers, each the channel for a considerable amount of traffic peculiarly its own.—This highly important port has been ever in great danger of having its navigation seriously injured by the accumulation of silt, forming shifting sandbanks at the mouth of the Mersey; and Captain Denham infers from his observations for 14 years, that a time will arrive when no access to it can exist, unless man set bounds by his ingenuity to the operation of tidal action. It appears from Captain Denham's observations, that the proportion of insoluble matter contained in the Mersey, amounts to 29 cubic inches in the flood, and 33 inches in the ebb, in each cubic yard of water; evincing a preponderance of 1 in 8 in the matter of the ebb, or 48·065 cubic yds. of silt, &c., which is detained by the banks outside the Rock Narrows each tide, with the exception of what the succeeding ebb disturbs, at the exhausted stage of the former ebb. Thus, the ebb of to-day ranges over 64 sq. m., and the next ebb over 44 sq. m.; reducing, by one-third, the first day's layer,—that being the relative proportion of silt held in solution, and deposited over the outer area, at the northern margin of which the cross-set of the Irish channel ebbs, and limits the deposit by sweeping into broad water what may extend so far. Now, the excess of silt on the 730 refluxes of tide that occur in a year, amounts to 35,087,450 cubic yds., capable of spreading a layer, if equally disseminated, of 21 inches thick over the first tide area: one-third, however, is disturbed, and carried over the second tide area; or there is an uniform increase of the banks, and decrease of water in the channels of the estuary of the Mersey, amounting to 7 inches per annum. This deposition of matter is however very unequal, some parts of the coast and banks receiving great accumulation, while others are often taken away. The principal of the numerous and extensive sand-banks which stretch to the N and E of the Mersey and the Dee, and render the entrances to Liverpool difficult and intricate, are the Hoyle and the Burbo sands and flats on the S, and the Jordan flats and Formby bank on the N. The channels are all well-buoyed, and, to assist the mariner in his approaches to this much-frequented place, there are various lighthouses stationed on the shores, and floating light-vessels in the offing and channels. Formby lighthouse was erected, in 1834, on Formby-point, in N lat. 53° 32′ 21″, and W long. 3° 3′ 54″, but the light has been discontinued. Crosby lighthouse has been recently erected about 1½ m. SSW of Formby lighthouse, towards Crosby-point. The light in this tower is elevated 96 ft. above half-tide level. Crosby floating-light is situated S of the limits of Formby shore-light. The Rock lighthouse is situated to the E of the Crosby-floating-light, on the shore, at the S side of the entrance to the narrow gut of the Mersey. Leasowe lighthouse is situated on the shore between the Mersey and the Dee in N lat. 53° 24′ 49″, and W long. 3° 7′ 27″. Bidston lighthouse on Bidston-hill, NE and inland from Leasowe lighthouse, is in N lat. 53° 24′, and W long. 3° 4′. The lantern is 300 ft. above high water, and the light is seen at a distance of 20 m. in clear weather. The Liverpool light-vessel is moored in 7 faths. at the entrance to the Horse and Helbre channels, in N lat. 53° 28′, and W long. 3° 17′.

The docks.] The L. docks, from their number, magnitude, and importance, are entitled to special and prominent notice. The principal are the wet docks, designed chiefly for ships in the foreign trade, with large and heavy cargoes to receive and discharge: in these the ships are afloat at all times of tide, the water being retained by water-gates. The next are the dry docks, or basins, so called because they are left dry at ebb tide: these generally receive vessels employed coastwise. The others are the graving-docks, which admit or exclude the water at pleasure, and in which the ships are laid dry for the purposes of caulking and repair. The docks of L. may be divided into three classes: First, those which are enclosed with walls; second, those which are unenclosed; and third, those which are enclosed with walls and warehouses. The first comprise the Sandon and Wellington docks, not yet completed at the extreme N of the line; the Bramley-Moore, the Nelson, the Stanley, the Collingwood, the Salisbury, the Clarence, the Trafalgar, the Victoria, the Waterloo, and the Prince's docks. The second class runs from the Prince's dock southward, and comprises the older docks of the town,—namely, George's, Canning, Salthouse, King's, Queen's, Union, Coburg, and Brunswick docks. The third class numbers as yet but one specimen. The Albert dock, situated in the district between the Salthouse and King's dock, is the sole dock in the port, constructed upon the model of those in London—surrounded by its own warehouses, worked by its own porters, and denying access within its gate to all who can give no account of their business. At the S end of the town, 3 new docks have been constructed without warehouses. These are the Toxteth, the Harrington, and the Herculaneum docks. In the heart of the town, amid the unenclosed docks, are also the private docks constructed by the late duke of Bridgewater, now the property of the earl of Ellesmere, and called 'the Duke's docks.' There are also 2 small docks, called 'Corporation docks,'—one the Manchester dock, and the other the River-craft dock.—The total water-area of the docks now in existence, (including the Albert dock,) is 120 acres 4,270 yds. The water-space of the intended new docks at the N will be about 64 acres, and at the S 13 acres, making the entire water-space of the docks at L., when the whole shall have been completed, about 198 acres, with an actual working quay-space of more than 13 m., and a grand total of quay-space of 15 m. 784 yds. Fire-proof warehouses are now in the course of erection round the Albert dock; and space has also been left on the quays of the new N docks for the erection of warehouses. It is also intended to have a line of railway running along the docks, and communicating with the L. and Manchester, and North Western railways. Another important feature is the communication about to be formed with the Leeds and L. canal.—The following table will show the water-area of the various docks and basins, including the locks and passages:

	Acres.	Yards.
Prince's basin,	4	1,549
Seacombe basin,	6	1,805
George's basin,	3	1,852
George's ferry basin,	0	1,344
Queen's basin,	5	191
South ferry basin,	0	2,927
Prince's dock,	11	3,889
George's dock,	5	2,593
Canning dock,	4	376
Salthouse dock,	4	3,493
King's dock,	7	3,896
Queen's dock,	10	3,101
Union dock,	2	3,505
Coburg dock,	4	2,198
Clarence dock,	6	273
Clarence half-tide dock,	3	4,500
Clarence graving-dock basin,	0	4,072
Trafalgar dock,	6	2,643
Victoria dock,	5	4,159
Waterloo dock,	6	1,153
Brunswick dock,	12	2,744
Brunswick half-tide basin,	1	3,388
Toxteth dock,	1	467
Albert dock,	7	3,542
Canning half-tide basin,	2	2,688
Intended North docks,	64	
Intended South docks,	13	
Total,	197	4,270

In addition to these, there are the Clarence, Canning, Queen's, and Brunswick graving-docks, the total length at bottom of which is 1,330⅔ yds. When the docks on both sides the river are completed, the total dock-accommodation of the port of L. will be 402 acres!! The length of quay afforded by these capacious basins surpasses the most famous of the river or shore-quays of any other sea-port; and, though their magnificence of prospect is diminished, their utility is increased by their being accumulated

within a moderate compass of ground, rather than extended in one long line. The whole length of the river wall, inclusive of the new N and S works, and exclusive of the openings, by entrances to the docks, &c., is 5 m. 20 yds. The dock-gates are constructed, not only for retaining water in the docks when the tide is out, but also for regulating the depth of water according to the height of the tide, by means of openings and sluices. These gates are managed by 4 men to each pair. As the docks are subject to accumulate the mud brought in with the tide, a dredging-machine, worked by a steam-engine of 10 horses-power, is used to cleanse them. It raises 50 tons of mud per hour, which is carried out into the current of the tide in the river by mud-barges built for that purpose. This method of cleansing docks is of modern invention, and is found to be preferable to any before practised, in point both of cheapness and expedition.—The accommodation is still insufficient for the increasing trade of the town, and the consent of parliament has been obtained for the construction of another dock, to be called the Wapping dock, in the older or S part of the town, in the neighbourhood of the Union and Coburg docks. The docks of L. are estimated in round numbers to have cost £9,067,000 sterling, exclusive of interest upon borrowed money. With interest paid, the cost of the docks to the present time would amount to £13,637,000. The bond debt of the estate in 1850 was £4,410,605. Of the bonds and assignments then outstanding the amount redeemable on demand was £439,993.

Redeemable in	1851	£585,333
,,	1852	585,146
,,	1853	743,568
,,	1854	835,176
,,	1855	722,800
,,	1856	326,408
,,	1857	100,431
,,	1867	only 200

Of the bond debt, the sum of £1,212,712 has been borrowed at 5 per cent., £1,098,257, at 4½ per cent.; £477,928, at 4¼ per cent.; £904,687, at 4 per cent.; £58,630, at 3¾ per. cent.; and £590,840, at 3½ per cent. When the first L. dock act was applied for, in the year 1709, the income which the dock was expected to yield, on an average of the trade of the port for the three years preceding, was £600. By the year 1760, the income of the docks had reached £2,333 a-year; and in 1800 it had still further increased to £23,379 a-year. Between the years 1801 and 1805, both inclusive, the amount of shipping on which dues were paid was 2,377,174 tons. Between 1806 and 1810 the amount had increased to 3,015,062 tons, showing an increase on the 5 years of about 600,000 tons. Between the years 1811 and 1815 the amount decreased to 2,864,210, chiefly owing to the war with America. Between the years 1816 and 1820 it had again increased to 3,854,709, showing an increase of upwards of 900,000 tons. Between 1821 and 1825 the amount of tonnage had increased to 5,148,303 tons, being an increase of 1,300,000 tons. Between 1826 and 1830 it had increased to 6,564,663, being an increase of about 1,400,000 tons. Between 1831 and 1835 it had increased to 8,184,250 tons, being an increase of nearly 1,800,000 tons. Between 1836 and 1840 it had increased to 10,537,202, being an increase of 2,400,000 tons. Between 1841 and 1845 it had increased to 12,945,301, being an increase of 2,400,000; and between 1846 and 1850 it had increased to 16,908,429 tons, being an increase of 3,900,000 tons, or, in round numbers, of 4,000,000 tons! In 1851-2 the amount of tonnage which paid dock-dues was 3,912,506 tons, showing an increase of 1,487,187 tons in 10 years. The mere increase of the tonnage of L. between 1846-50, when compared with that of 1841-45, is greater than the whole tonnage of the port in the 5 years ending in 1820. Between 1820 and 1850 the tonnage of the port had increased from 805,033 tons to 3,536,337 tons, or, taking it at periods of five years, so as to compensate for temporary disturbances, from 3,854,709 tons to 16,908,429. It has been remarked that though the tonnage of the port is four times as great in 1850 as it was in 1820, the income of the dock estate has not increased in proportion. But the reason is, that the dock committee have voluntarily remitted a large portion of the dues which they collected in 1820; and which they have full legal authority to collect again, if it should become needful. In 1848 reductions to the extent of £40,000 a-year were made in the amount of dock dues; in 1844 a reduction of 33 per cent. was made in the tonnage on East India vessels, and of 18 per cent. on the aggregate foreign dues; and in 1836 of about 38½ per cent. on the whole dock rates.

It appears from official returns, that the income of the dock estate, in 1852, amounted to £282,912, whilst it amounted to only £269,020 in 1851. This is an increase of £13,891 in 1852 compared with the income of 1851; of £49,922 compared with that of 1850; of £26,986 compared with that of 1849; of £69,488 compared with that of 1846, the year in which the corn-laws were repealed; and of £105,680 compared with that of 1842, the year in which Sir Robert Peel began his improvements of the old system of monopoly and exclusion. The increase of dock income, from 1842 to 1852, is thus £105,680, independent of about £40,000 a-year of duties remitted in 1848. If this sum is added to the £105,680 of actual increase, it gives the interest of upwards of £3,500,000,—an amount equal to the construction even of the magnificent works formed at L. during the last 10 years. Without the rapid increase of dock revenue which has taken place during the last ten years, the new docks either could not have been constructed, or not have been paid for. Should the increase of the dock revenue, between 1852 and 1862, be in the same ratio as the increase between 1842 and 1852, other new works, rivalling those recently formed, might be constructed, or reductions of rates might be made which would render L. the cheapest of ports, or the debt of the dock estate might be greatly reduced.

This vast estate is governed wholly by local agency. The members of the L. town council form two separate and distinct corporations—the one elected under the provisions of the municipal reform act, by the title of 'the mayor, aldermen, and burgesses of L.;' and the other, constituted under the various dock acts, by the title of 'the trustees of the L. docks.' Although the individuals forming these two corporations are the same, their powers and authorities are entirely distinct. The corporation of L. are the legal depositaries of the property of the trust; but the entire management and control of that property, and of all dock affairs, are vested in a body called the dock committee, composed of 13 members, elected by the town-council out of their own body, and of 8 members elected by the merchants and shipowners of the town, being payers of dock rates.

Shipping and Commerce.] The first event which secured to L. any permanent commercial advantages was the conquest of Ireland in 1172, which brought it immediately into use in the transport of troops, military stores, &c., and the interchange of commodities. Leland states, that at the period of his visit, it was much resorted to by Irish merchants, &c., and that its small port-duties were then deemed attractions to traders. In 1650 only 15 vessels belonged

to the port: in 1710, when the first dock was formed, the number had increased to 84, averaging 70 tons each, and employing 924 seamen. The principal trade of the port of L. at this period was with Ireland, the isle of Man, and the northern states of Europe, independent of the coasting-trade. At this period the extent of tonnage cleared out from L. in British ships, was only 1-42 of that from all the ports in the kingdom. The West Indian and American trade gave a powerful stimulus to L.; and in 1716, the number of ships belonging to its port had increased to 113, navigated by 1,376 seamen. The trade with Scotland for coarse cloths for the West India market was now interrupted by the competition of the Manchester manufacturers, who thus threw into the hands of L. the monopoly of the supply of such goods to the W. Indies. The trade of L. appears to have risen rapidly from 1722 to 1740, by means of the contraband trade with S. America. This was chiefly carried on by supplying Spanish smugglers with goods in Jamaica, where payment was made in specie. This branch of illicit commerce was ultimately checked by the vigilance of the Spanish government, and at length wholly abolished by act of parliament; but the African trade was now partly in the hands of L., so that the suspension of the smuggling was not so severely felt as it might have been. In 1750, 15 ships from L. were employed in the slave-trade; and in 1760, the trade of this port with Guinea and the W. Indies is stated to have exceeded that of London. The exports were chiefly woollen and worsted goods from Manchester and Yorkshire, with Sheffield and Birmingham wares. These were bartered on the coast of Africa for slaves, to be again exchanged in the W. Indies for rum and sugar. In 1764, L. cleared out 74 ships for the coast of Africa, while Bristol cleared out only 32. Since the beginning of the present cent., the port of L. may be considered as perfectly free, for the purposes of commerce, to all the world. To furnish a detailed account of the commerce of L. during the 19th cent., would be to trace the progress of perhaps the most flourishing and certainly one of the most important sea-ports in the world. The changes effected by the opening of communication by railway with Manchester, Glasgow, Leeds, Birmingham, London, and all the important districts of England and Scotland, would demand a long disquisition. The progress of the port, so far as regards its foreign trade, from the first half of the 18th cent. down to 1840, may be traced at a glance from the following account of the annual receipts of customs' duties during that period:—

Years.	Customs.	Years.	Customs.	Years.	Customs.
1733	£92,466	1805	£1,766,370	1832	£3,925,062
1750	215,961	1810	2,675,766	1833	3,733,132
1755	202,367	1815	2,360,967	1834	3,846,306
1760	248,312	1820	1,488,072	1835	4,272,847
1765	269,435	1824	1,984,522	1836	4,450,426
1770	231,994	1826	3,087,651	1837	4,351,496
1775	274,653	1827	3,308,804	1838	4,458,621
1780	188,830	1828	3,180,503	1839	4,234,118
1785	680,928	1829	3,315,041	1840	4,607,326
1795	489,438	1830	3,563,114	1847	3,230,921
1800	1,058,578	1831	3,599,205	1848	3,481,796

The customs duties collected at L. now comprise nearly a fifth—exclusive of London, more than a third—of those collected throughout all England, Ireland, and Scotland. They amount to nearly £1,000,000 more than all Scotland and Ireland; and nearly £1,000,000 more than all the outports of England, excluding London. The following approximation to the supposed annual amount of the commerce of the port of L. in its various branches was presented to the municipal commissioner in 1835:

Total exports of manufactures,		£20,000,000
Viz.—Woollens,	£4,000,000	
Cotton goods and yarn,	12,000,000	
Linens,	1,000,000	
Hardware,	1,200,000	
Earthenware,	350,000	
Silk,	150,000	
Salt and other articles,	1,000,000	
Total imports estimated roughly:		
Irish trade,		5,000,000
Raw cotton,		5,000,000
All other articles,		5,000,000
Total exports and imports,		£35,000,000

A return has just been made, by order of parliament, which shows that L. is now the greatest port in the British empire in the value of its exports and the extent of its foreign commerce. Being the first port in the British empire, it is the first port in the world. New York is the only place out of Great Britain which can at all compare with the extent of its commerce. New York is the Liverpool of America, as L. is the New York of Europe. The trade of those two ports is reciprocal. The raw produce of America, shipped in New York, forms the mass of the imports of L.; the manufactures of England, shipped at L., form the mass of the imports of New York. The two ports are, together, the gates or doors of entry between the Old World and the New. On examining the return just made, it appears that the value of the exports of L. in 1850 amounted to nearly £35,000,000 sterling (£34,891,847), or considerably more than one-half of the total value of the exports of the three kingdoms for that year. This wonderful export-trade of L. is partly the result of the great mineral riches of Lancashire, Cheshire, Staffordshire, Warwickshire, and the W. Riding of Yorkshire; partly of the matchless ingenuity and untiring industry of the populations of those cos.; partly of a multitude of canals and railways, spreading from L. to all parts of England and the richest parts of Wales; partly to L. being the commercial centre of the three kingdoms; and partly to the fact that very nearly £12,000,000 have been expended in L., and more than £12,000,000 in the river Mersey, in converting a stormy estuary and an unsafe anchorage into the most perfect port ever formed by the skill of man. On comparing the respective amounts of the tonnage of L. and London, it appears at first impossible to account for the fact that the shipping of L. is rather less than that of London, while its export-trade is much more than twice as great. The explanation of this fact is, that the vessels employed in carrying the 1,000,000 or 1,500,000 of tons of coal used in London, appear in the London return; while the canal and river-flats, to say nothing of the railway trains, employed in carrying the 1,250,000 of tons of coal used or employed in L., do not. State the case fairly, and the maritime superiority of L. will be found to be as decided as is its commercial. We ought also to add, that while the custom-house returns for 1850 give L. only 3,262,253 tons of shipping, the payment of rates to the L. dock estate in the 12 months ending June 25, 1851, gives 3,737,666 tons, or nearly 500,000 tons more. Comparing the rate of increase of the exports of L. with that of other ports, it appears that L. is not only the first port in the kingdom, but that it is becoming more decidedly the first every year. During the last 5 years the increase of the exports of L. has been from £26,000,000 to nearly £35,000,000, while that of London has been from little less than £11,000,000 to rather more than £14,000,000. The exports of Hull—which is undoubtedly the third port of the kingdom—though still very large, have rather declined, having been £10,875,870 in 1846, and not more than £10,366,610 in 1850. The exports of Glasgow, now the fourth port of the empire, show a fair increase, from

£3,024,343 to £3,768,646. No other port now sends out exports of the value of £2,000,000 a-year, though Southampton comes near to £2,000,000, and Cork passes £1,000,000. [*Liverpool Times.*] The account of entries of shipping into London and L. stands thus for 1850:

	Ships.	Tonnage.
London—British,	6,499	1,376,714
Foreign,	3,415	528,234
Total,	9,914	1,904,948
Liverpool—British,	2,944	954,101
Foreign,	1,587	651,214
Total,	4,531	1,605,315

In the same period the coasting-trade of London amounted in entries to 21,755 vessels, the aggregate tonnage of which was 3,250,908. The L. account for the same time gives 9,873 vessels, the average tonnage of which was 1,404,487.

The imports from the United States are chiefly cotton. The trade of L. in this article is equal to six times the aggregate quantity imported into all other ports in the empire, and is ten times greater than that of London. It is also the mart for the exportation of the same material after having passed through the hands of the manufacturers of Lancashire and the west of Scotland. The total import of cotton into L. during the year 1851-52 was 1,748,899 bales: being an increase of 176,444 bales as compared with 1850-51; and of 16,660 bales as compared with 1849-50. The total export of cotton was 210,978 bales in 1851-52; 199,987 in 1850-51; and 184,050 in 1849-50.—The imports of wool in 1849 were 81,251 bales; in 1850, 79,959 bales; in 1851, 92,529 bales, of which 75,695 were foreign.—A great quantity of American flour is imported.—From the E. Indies there are considerable imports of cotton, sugar, indigo, and spices; and from the W. Indies extensive imports of sugar, rum, coffee, tobacco, &c. L. is the emporium of the mahogany trade, and has always been the great American timber depot. The trade with British N. America, and the various British ports, the Mediterranean, and the Baltic, is of great value and extent. The imports from Petersburg are various, and exceeded by no other port unless it be London. The trade with Ireland is immense, being nearly equal in tonnage to that kept up with every port in Great Britain. The exports to Ireland are chiefly British manufactures, salt, and coal. Amongst the imports are immense quantities of live stock and animal produce; and a very large proportion of the imports of grain from Ireland to Great Britain centres in L. In 1850-51, nearly 300,000 tons of coal were shipped at L. for the United States, Brazil, France, Chili, India, the W. Indies, Spain, Turkey, and many other quarters.

Steam navigation.] L. maintains extensive communication by steam with Ireland, Scotland, Wales, and various parts of the coast; besides a constant traffic with the numerous ferries on the Cheshire shore and elsewhere within the Mersey estuary. The first steamer ever seen in the Mersey was started in 1815. In 1830, 16 steamers were plying to the ferries on the Mersey, 2 to the isle of Man, 3 to ports in the N of England, 6 to Wales, 7 to Scotland, and 36 to Ireland; and since that period the number has been at least doubled, while the number of voyages has been probably quadrupled. Daily intercourse is held with Dublin by mail steam-packets and numerous other steamers; others run to Cork, Belfast, Waterford, Londonderry, Drogheda, Newry, &c., to the isle of Man, Port-Patrick, Whitehaven, Carlisle, Annan, Wigton, Ardrossan, and Glasgow; to Beaumaris, Bangor, Menai-bridge, Bristol, Exeter, Plymouth, Portsmouth, Cowes, and London.—Regular intercourse by steam-packets, as well as sailing vessels, is kept up with all the principal points both of the New and the Old world. The outward passages to New York by what was called the Black ball line of sailing vessels, averaged in 1839 22½ days; the homeward passages, 33 days 17 hours. The voyage between L. and New York was made by the steamer Baltic, in August 1851, in 9 days, 19 hours, and 40 minutes. The average passage of the British mail steamers from L. to New York is 13 days 16 hours; to Boston, 12 days 22 hours.—Two additional lines of steamers are about to be established from L. to Australia, the one by way of New York, Chagres, Panama, and the Pacific ocean; the other by the route of the S. Atlantic and the Indian ocean. These two enterprises will form a complete line of British steam navigation round the globe; and joined to an enterprise already announced, make a treble line of steamers from L. to Australia. The British and N. American royal mail steam company have also a great enterprise in hand. The establishment of steamers from Panama to Australia having created a necessity for a connecting link between Panama and New York, the Cunard company have decided upon running a branch-line of first class steam-ships on that station, in conjunction with the mail steamers from the United States to L. The distance from L. to Chagres, by way of New York, is about 5,300 m.; the railway trip across the isthmus which separates the gulf of Mexico from the Pacific ocean is from 40 to 50 m.; the distance from Panama to Sydney is about 7,000 m.; and the island of Tahiti, in the Pacific, forms a well-situated coaling-place, about half-way from Panama to Australia.—The following are the relative distances from the port of Southampton and that of L. to the principal centres of trade and commerce within the United kingdom:

	From Southampton.	From Liverpool.
To Dundee,	553	272
Glasgow,	482	201
Greenock,	504	223
Dublin,	406	163
Manchester,	268	31
Liverpool,	281	
Leeds,	204	74
Birmingham,	192	98
Bristol,	198	188
Newcastle,	387	194
London,	80	201
Plymouth,	326	316
Sheffield,	172	72

Manufactures.] The manufactures of L. are chiefly connected with ships, ship-stores, and machinery of various kinds. Though situated in the most extensive manufacturing district in the world, L. is not properly speaking a seat of manufactures. Perhaps one chief reason of this is the decided preference, as well as ample opportunity, which the labouring classes have in L. for other than the sedentary and confined employments of factories. There are, however, several extensive sugar refineries, and snuff and tobacco manufactories; with various wind and steam-mills for grinding corn, colours, dyer's wood, &c.; an extensive pottery, glass-staining works, roperies, and iron chain, cable, and anchor manufactories; ship-building yards where steamers and other vessels are built, steam-engine manufactories, iron and brass foundries, breweries, soap manufactories, &c. The Mersey is not noted for ship-building, but L. is one of the greatest ports in the world for their repair. The quantity of soap made in L. is immense. Exclusive of London and L., the whole quantity made in England in 1839 was 104,192,878 lbs. The quantity made in London was 38,885,058 lbs.: that made in L., 49,927,039 lbs. The gross amount of excise duty collected at Liver-

pool in 1839 was £622,935, or fully one-sixteenth of the whole excise-revenue of England, exclusive of that of London; and far beyond that of any other town in the empire: that of Edinburgh, the highest, being only £517,231; Glasgow, £507,399; Bristol, £379,970; Dublin, £354,866. L. is celebrated for the manufacture of watches and time-pieces, and supplies more than any town in the empire except London.

Municipal government.] Under the new municipal act, the borough of L. is divided into 16 wards, and governed by 16 aldermen and 48 councillors, under the usual corporate style. The revenue of the corporation is one of the most opulent in the empire. On an average of 7 years to 1834, the income of the corporation exclusive of the dock estate was £96,308. The amount of corporation debt in November, 1833, amounted to £792,009, much of which bore interest at 4 per cent., and part at 5, and even 6 per cent. The income of the borough for 1840 was £291,974; the expenditure, £291,974. In 1851, the ordinary revenue was £166,704; in 1850, £139,152. The extraordinary income in 1851 was £156,347, of which £66,569 was received on bond; in 1850, £239,148, of which £148,117 was received on bond. The ordinary expenditure in 1851 was £70.495; the extraordinary, £166,704, including £50,311 of surplus income.

Police.] The two forces of the town and dock police have been united in one body under the management of the watch committee; and the extent and resources of this establishment may be estimated from the fact, that it is now upheld at an annual cost of not much less than £40,000.

Court-house, jails, town-hall, &c.] The old assize-court and session-house, used for the business of the borough until the removal of the assizes for W. Derby to L., is a plain stone edifice in the Grecian style of architecture, 174 ft. in length. New assize courts were recently erected near to and at right angles with St. George's hall. They occupy an area of 220 ft. by 100 ft. —The bridewell, situated near the exchange, is a substantial building, with basement and first and second floor.—The borough jail and house-of-correction, built under the personal inspection of Howard, is detached from other buildings, and enclosed with a boundary wall of freestone. It comprises a central building, containing a house for the keeper with a chapel, and 6 detached wings for prisoners. This building is now quite insufficient for the average number of prisoners, and a new prison is being built at Walton.—The town-hall, an elegant structure at the N end of Castle-street, was founded in 1749. It has a well proportioned rustic basement, surmounted by a range of columns and pilasters in the Corinthian style. The whole interior was destroyed by fire in 1796, and was renewed on an improved plan at an expense of £60,000. A colossal sitting figure of Britannia crowns the dome; and below is a circular gallery, affording a fine view of the town.

Franchise.] Liverpool has regularly returned 2 members to parliament since the reign of Edward VI. The right of election, previous to the passing of the reform act, was in the freemen by birth, servitude, or gift. The greatest number polled for 30 years previous to 1831 was 4,401. The following table will show the progress of the constituency from 1832, when the Reform bill came into operation, to the present time:

Year.	Borough voters.	Freemen.	Total.
1832	7,655	3,628	11,283
1835	9,458	3,523	12,981
1838	10,591	3,149	13,740
1841	11,544	4,059	15,603
1844	12,128	3,795	15,923
1847	14,249	3,071	17,320
1850	14,861	3,014	17,875
1851	15,820	2,961	18,781

It will be seen from the above table that the number of household voters has about doubled itself in L. in 20 years, but that there has been a considerable decrease in the number of freemen. In point of political rights there is no difference between the £10 householder and the freeman; and the exemption from town-dues has no influence except with the higher class of freemen. The total number of assessments of all kinds in the borough of Liverpool is 43,525. Of these assessments, 28,629 are on houses of £10 or upwards; but not much more than half the persons rated at those amounts can be induced to qualify themselves as voters by paying their rates.

State of education.] In 1836, a report of the state of education in L., presented by the Manchester Statistical society to the British Association, created no little excitement in L., and led to a vindication of the character of a town which has acquired some reputation for a certain degree of intellectual superiority amongst commercial cities, while the report in question presented, on the contrary, a rather degrading estimate of the progress of civilization amongst the lower order of the pop. The report assumes the pop. of the borough to be 230,000; but it could not be more than 185,000 for the ancient borough, and 220,000 for the new. It states that one-fourth, or 57,500, consist of children between the ages of 5 and 15 who ought to be under education, but that only 27,200 are really under this process; and that therefore 30,300, or more than half of the whole, attend no schools whatever. To this representation of matters it was replied that the children between the ages of 5 and 15 in L. at the period in question could not be estimated at more than 48,000. The Prussian writers on education concur generally that one-sixth of the pop. of a country under the process of education is not too high a proportion. On this principle we have a right to expect that a number not less than 36,660 children should possess the permanent means of a competent education; and the report subsequently admits that 33,183 children are really receiving some sort of instruction. More than 11-16ths, or nearly 3-4ths of the entire British pop. earn their bread by manual labour. The remainder, consisting chiefly of gentry, clergy, professional persons, merchants, and traders, may be safely estimated in L. at 57,200; and we may safely assume that one-fifth of this class—namely 11,440—are constantly to be found at the better order of schools and seminaries. Adding together 9,357 taught in the schools of the Established church, 6,500 in those of the dissenters, and 11,440 in the better order of private seminaries, we have a total of 27,287 confessedly in the progress of a respectable education. Deducting this from 33,183, we have a remainder of 5,896. It is to this number alone that the disgusting details and humiliating descriptions of the Manchester report can be any way applicable. Since 1836, much activity and energy have been displayed in improving the state of education in L. The new collegiate schools in connection with the church of England are conducted on an important scale; and the excellent schools of the Mechanics' institute also, conducted on a similar comprehensive system, may be said to constitute the collegiate schools instituted, patronized by, and connected with the Dissenting churches. The representations of the Manchester statists, however, are borne out by the investigations of the *Morning Chronicle's* 'commissioner,' who, in August 1850, reported that, "besides the schools in connection with the church of England and with the various dissenting bodies, there are 5 Roman Catholic schools, which, according to the statements of their patrons and managers, educate among them 3,070 children. There are also the Corporation schools, educating upwards of 1,200 children; the workhouse schools of the parish of L., and the extra-parochial district of Toxteth park; and the Liverpool Industrial schools, established at Kirkdale, to aid the parish in the work of education, and affording food, lodging, clothing, and instruction in various trades, besides in the elements of a plain education, to an average of 1,150 children. There is also the Royal Hibernian school, which educates 400 children both Catholic and Protestant; the schools for girls and boys in connection with the Liverpool Mechanics' institution; and the Collegiate school,—all of which are establishments of a very superior class, and not confined to the children of mechanics. Adding the whole of these together, and including day-schools and Sunday schools in one total, the educational statistics of L., as accurately as I can make them, will be—

Established Sunday and Day schools,	14,090
Dissenters' ditto,	12,270
Roman Catholic schools,	3,070
Corporation schools,	1,200
Kirkdale ditto,	1,150
Hibernian school,	400
Schools omitted or not otherwise included,	1 000
	33,180

To this total should be added the children of the rich, receiving their education either at home or in private seminaries. That there are more than 5,000 of such children in the private boarding and day schools of the town is not probable. But taking them in round numbers at 5,000, and supposing generally that these figures are correct, and that the children 'due to the school' in L., with a pop. of 350,000, is as one in six, it would follow that upwards of 20,000 children receive no education whatever. This calculation would also presume that the children attending these various schools were all above 4 years of age."

Literary and Scientific institutions.] The L. Royal institution in Colquitt street, formed in 1814, was incorporated by royal charter in 1822. Its object is the promotion of literature, science, and

arts, by the institution of academical schools and public lectures. The building of this institution is a spacious edifice with a neat stone portico. The interior contains numerous apartments, adapted to the various purposes of the institution. The museum occupies the whole of the second and third stories, and contains one of the finest collections out of the metropolis. The Literary, Scientific, and Commercial institution in Anne street was founded in 1835, for the purpose of promoting the instruction and mental recreation of young men engaged in commercial and professional pursuits.—The Medical institution, situated at Mount-pleasant, possesses a lecture-room, library, and museum, &c. The edifice is of an unusual form, constituting one-fourth of the circumf. of a circle 140 ft. in diameter. The order is plain Grecian Ionic.—The Liverpool Mechanics' institute was founded in 1825. In 1835, the foundation-stone of a new building was laid by Lord Brougham. The edifice, in the Ionic style, consists of two wings and a central building, and is of immense size and imposing appearance, occupying, with its areas and courts, nearly a statute acre of land. It contains a theatre for public lectures, which will accommodate upwards of 1,500 auditors, a sculpture-gallery, a museum, a reading-room, and a library containing 10,000 vols. The lower Day-school contains at present 470 pupils under the care of 12 masters. The terms for sons of members are £1 15s. per annum; for others, £2 5s. Excepting classics, there are taught in this school all the branches of a good English education. The High school contains 356 pupils, under the care of 18 masters; terms. 10 guineas per annum. The evening classes, conducted by 26 masters, contain about 650 pupils, to whom instruction is afforded in English grammar, composition, geography, history, writing, arithmetic, the various branches of pure mathematics, navigation, nautical and popular astronomy, mechanical science and its application to the arts, mechanical drawing, architectural drawing, landscape-drawing and practical perspective, ornamental figure drawing and modelling, naval architecture, painting, natural philosophy, the French and German languages, classics, rhetorical delivery, and vocal music. In addition to these, there are public lectures twice a-week, the audiences varying in number from 800 to 1,000.

Libraries, news-rooms, &c.] The Liverpool Athenæum, opened in 1799, was the first institution of the kind in this country, and gave rise to those of London, Bristol, Bath, Manchester, &c. It is a neat stone-building in Church-street, erected at an expense of £4,000, and consisting of a library and news-room. The latter is handsome and commodious, and is well-supplied with periodicals, and the former contains upwards of 20,000 vols. The income of this institution is derived from 500 proprietors who pay annual subscriptions of £2 12s. 6d. each.—The Lyceum, in Boldstreet, is a handsome structure, erected in 1802, by public subscription, at an expense of £11,000. The coffee-room is very spacious, and is furnished, like the Athenæum news-room, with a large collection of London, provincial, and Irish newspapers, magazines, reviews, maps, &c. In the library, a handsome room of a circular form, there are at least 35,000 vols. Other newsrooms are the Union and the Exchange news-rooms, the Underwriters-room, &c.; and besides the extensive libraries already noticed, and numerous circulating and other libraries, there is a law library in South John-street, containing an extensive collection of books belonging to the legal profession.—Several newspapers are published at L.

Recreative and remedial institutions.] The Theatre, on the E side of Williamson-square, was erected in 1772, at an expense of £6,000, since which time it has been enlarged.—The Liver theatre, a minor establishment in Church-street, is tastefully fitted up, and open during winter.—The Royal amphitheatre and circus for equestrian exhibitions, is a spacious and handsome building in Great Charlotte-street, also open during winter.—The Wellington-rooms, in that quarter of the town called Mount Pleasant, were founded in 1815. The stone-front is in the Corinthian style of architecture. The interior consists of an extensive suite of assembly-rooms, with the usual accommodations of card-room, supper-room, &c.—The new Philharmonic hall is perhaps the finest building in the world, devoted exclusively to music; it is situated on Mount Pleasant. The lighting of this hall is unique; within its walls frequent concerts and oratorios take place, and the first performers in the empire are engaged. Lancashire is celebrated for its chorus singers.—Races take place in July at Aintree, about 6 m. NE of L. The new baths, on the W side of George's dock, consist of a handsome range of stone-buildings, erected for the corporation at the expense of £32,859, exclusive of the cost of complicated machinery for the raising and filtration of the water: the interior accommodations are of first-rate class. To the corporation of L. belongs the honour of being the first corporate founders of public baths and washhouses for the poor. The idea was suggested to them by the humble efforts of a poor woman, who observing, during a time of fever, the discomfort caused by the washing and drying of clothes in the miserable rooms in which sick people lay, offered the use of her back kitchen to her neighbours. They gladly availed themselves of the facilities afforded; and in the course of a few months it was regularly used by about 85 families. These operations excited the attention of some benevolent ladies who passed their time in visiting and relieving the poor; and through the aid afforded by them this exemplary woman was enabled to keep up her little establishment; and the women who made use of her back kitchen gladly paid a penny each for the privilege of doing their washing out of their own homes. The corporation of L. took the hint, and in 1842 erected, in Frederick-street, at the S part of the town, at a cost of £3,341, the first baths and washhouses for the poor. The good woman with whom the idea originated was appointed its keeper and superintendent. This experiment having answered the expectations of its founders, a second establishment was projected for the benefit of the poor in the populous districts of the N of Liverpool. This edifice was erected in Paul-street, Liverpool, at a cost of £8,534. Four other washhouses have since been erected. The Zoological and Botanical gardens, in a certain sense also recreative institutions, have been already noticed. —The Infirmary, an elegant and spacious three-storied edifice, with wings and a portico, with massive columns of the Ionic order, and numerous windows, situated in Brownlow-street, was opened in 1824. It is perhaps the most noble edifice in Liverpool. The expense, which was defrayed by public subscription, amounted to £27,800, exclusive of the ground. There are 20 wards, 5 of which, containing 104 beds, are appropriated to surgical cases. The Northern hospital in Leeds-street, for the accommodation of 60 in-patients, is an infirmary on a small scale, in aid of the principal one.—The Lunatic asylum, on the N side of Brownlow hill, erected in 1830, is a neat and appropriate structure. The centre of the buildings retreats from the sides, thus forming them into wings. The expense of erection amounted to £11,000. Amongst other remedial institutions are the S and N dispensaries, the Lock-hospital, the Ophthalmic infirmary, the Apothecaries' hall, the House-of-recovery for fever and other contagious diseases, and the Humane society's institution.—The L. merchant seamen's hospital, a charity intended for the support of decayed seamen of the port, and of their widows and children, is supported partly by the monthly contribution of 6d., which every seaman, sailing from the port, is obliged by act of parliament to pay out of his wages. It has likewise a capital stock of about £37,000 unclaimed prize-money. About 700 persons receive aid from this institution.

Sanitary condition.] Until recently L. possessed the unenviable distinction of being the most unhealthy town in England. Out of her estimated pop. of 280,000, not less than 50,000 inhabited cellars, dark, damp, ill-ventilated and dirty—one-third of them from 5 to 6 ft. below the level of the soil, with no underdrainage, and no place of deposit for filth and offal. Fever is never absent from L. The excess in the number of deaths in L. above the average rate of the country was in one year 10,000. The excess of mortality in that town, in a particular year when Dr. Playfair examined it, above the mortality at Ulverstone in the same co., was 3,611. Besides the obvious causes of insufficient sewerage and drainage, the great mischief of L. is the influx of poor Irish. "It is they," says Dr. Duncan, in a report of 1842, "who inhabit the filthiest and worst ventilated courts and cellars, who congregate the most numerously in dirty lodging-houses, who are the least cleanly in their habits, and the most apathetic about everything that befalls them. It is among the Irish that fever especially commits its ravages, and it is they who object most strongly to be removed to the hospital from their miserable abodes. Nor does the evil stop with themselves. By their example and intercourse with others, they are rapidly lowering the standard of comfort among their English neighbours, communicating their own vicious and apathetic habits, and fast extinguishing all sense of moral dignity, independence, and self-respect." In 1846, the corporation applied for a sanitary act of their own, based on the provisions of Lord Lincoln's bill, and with such alterations only as made their act better adapted to the peculiar requirements of L., especially with regard to the equitable arrangement of local taxation in the several amalgamated townships. Another great distinction made by this bill had reference to the cellars of the town. The bill provided that no cellars should be allowed to be separately occupied if the floor was more than 4 ft. below the level of the adjoining street, if the roofs were less than 3 ft. above the same, and if they were not also provided with sufficient windows, flues, &c. This bill, after considerable opposition, at length passed into a law, and the local powers of the various commissioners merged into the corporation. The act came into operation on the 1st of January, 1847. The providing of public parks and places of recreation for the inhabitants, has also been considered as a matter of duty by the authorities of L. In this respect they have received important aid from Mr. R. V. Yates, a philanthropic Liverpool merchant, who, at great individual expense, has purchased a beautiful park of about 80 acres for the free use of the public, and has drained and laid it out with taste and skill. The corporation followed Mr. Yates in this important movement by purchasing and throwing open to the public the Botanic gardens. They have likewise purchased, for upwards of £80,000, the extensive estate of Newsham-house, on the confines of the borough, which they are about to convert into public pleasure-grounds.

LIVERPOOL, a district and town of New South Wales, in Cumberland co. The district comprises an area of 103,980 acres. The town is 20 m. WSW. of Sydney, on the l. bank of St. George's river, and only 26 ft. above sea-level. Pop. 601. It is neatly built, and contains a church and an hospital. With Richmond, Windsor, and Campbelltown, it returns a member to the legislative council.—Also a river of North Australia, in Arnheim Land, which falls into the sea between Junction bay and Cape Stewart, in

S lat. 12°, and E long. 134° 15′. It is 4 m. wide at its mouth, and so far as it has been traced appears to have a tortuous and shallow channel. Its source is still unknown.

LIVERPOOL, a town of Nova Scotia, capital of Queen's co., on the Mersey, at its entrance into the harbour of the same name. Pop. 4,342. It is well and regularly built, and has a court-house, a jail, 3 churches, an Episcopalian, Congregational, and Methodist, a school, and a black-house. It possesses a flourishing trade in lumber and fish. The harbour is accessible at all seasons, but is barred across its entrance with a depth at high tide of only 15 ft.

LIVERPOOL, a village of Salina township, Onondaga co., in the state of New York, U. S., 136 m. W by N of Albany, on Onondaga lake, and intersected by the Oswego canal. Pop. in 1840, 1,000.—Also a township of Perry co., in the state of Pennsylvania, 29 m. N by W of Liverpool. It has a hilly surface, and is bounded on the E by the Susquehanna. The soil in the valleys consists of calcareous loam. Pop. 763. The village is on the W bank of the Susquehanna. Pop. 451.—Also a township of Columbiana co., in the state of Ohio. Pop. 1,096.—Also a township of Medina co., in the same state, 125 m. NE by N of Columbus. It is watered by Rocky river and its branches, and has a fertile soil. It contains iron-ore and several mineral springs. Pop. 1,500.—Also a village of Lake co., in the state of Indiana, 162 m. NNW of Indianapolis, on the S side of Deep river, a branch of Calumie river.

LIVERPOOL PLAINS, or Corborn Comleroy, a district of New South Wales, bounded on the E and S by the Liverpool range. It has an area of about 10,000,000 acres; and contains the greatest extent of pastoral country in any of the districts of the colony. Its surface is that of an elevated table-land.

LIVERPOOL RANGE, a mountain-range of New South Wales, running E and W between the parallels of 31° 20′ and 32° S, and stretching from the meridian of 149° to that of 152° 20′. It forms the water-shed between the basins of the Hunter and the Manning rivers flowing SE, and that of the Nammoy or Peel flowing NW. It attains an alt. of 2,000 ft. above sea-level between the meridians of 150° and 151°.

LIVERSEDGE, a chapelry in the p. of Birstall, W. R. of Yorkshire, 6½ m. NNE of Huddersfield. Area 1,940 acres. Pop. in 1841, 5,988.

LIVERTON, a parish in the N. R. of Yorkshire, 6½ m. E by N of Guisborough. Area 2,360 acres. Pop. in 1831, 239; in 1841, 2,360.

LIVESEY, a township in the p. of Blackburn, Lancashire, 8½ m. SE by E of Preston. Area 1,890 acres. Pop. in 1831, 1,787; in 1841, 1,996.

LIVET, a commune of France, in the dep. of the Isère, cant. of Bourg-d'Oisans. Pop. 1,214. It has several forges and blast furnaces.

LIVINGSTON, a central county in the state of New York, U. S., comprising an area of 509 sq. m., drained by Genesee river and Canaseraga creek. It has a fertile soil, and contains beds of gypsum and bog-iron, and several salt and sulphur springs. Pop. in 1840, 35,140; in 1850, 40,887. Its cap. is Geneseo.—Also a parish in the SE part of the state of Louisiana, comprising an area of 730 sq. m., bordered on the W by Amite river, on the S by Lake Maurepas, and on the SE by Pontchar train, and watered by several streams. Pop. in 1840, 2,315; in 1850, 3,384. Its cap. is Springfield.—Also a co. in the N part of the state of Kentucky, comprising an area of 330 sq. m., bordered on the W by the Ohio, and on the SW by the Tennessee, and intersected by Cumberland river. Its surface is undulating, and its soil fertile. Pop. in 1840, 9,025; in 1850, 6,578. Its cap. is Smithland.—Also a co. in the NE part of the state of Illinois, comprising an area of 1,026 sq. m., drained by Vermilion river and its branches. Its surface is undulating, and its soil fertile. Pop. in 1840, 759; in 1850, 1,552. Its cap. is Pontiac.—Also a co. in the NW part of the state of Missouri, comprising an area, generally level, of 510 sq. m., watered by Grand river and its branches. It possesses considerable fertility. Pop. in 1840, 4,325; in 1850, 4,249.—Also a township of Columbia co., in the state of New York, 35 m. S of Albany. It has a diversified surface, and is drained by Ancram or Roeliff Jansen's creek, and bounded on the W by the Hudson. The soil consists of clay, loam, and gravel. Pop. in 1840, 2,190.—Also a township of Essex co., in the state of New Jersey, 9 m. NW of Newark. The surface is generally mountainous. It is bounded on the W by Passaic river, and watered by several of its branches. Pop. 1,081.—Also a village of Livingston co., in the state of Michigan, 46 m. WNW of Detroit, on Woodruff creek.—Also a v. of Sumpter co., in the state of Alabama, 68 m. SW of Tuscaloosa, on the N side of Sucarnochee river.

LIVINGSTONE, a parish in the SE division of Linlithgowshire, 14 m. WSW of Edinburgh. It is 6¼ m. in extreme length, and varies from ¾ to 3 m. in breadth. Pop. in 1831, 1,035; in 1841, 1,004.

LIVINGSTONE, a village of New South Wales, in the co. of Camden, at the junction of the Berrima and Mittagong roads.

LIVINHAC-LE-HAUT, a commune and town of France, in the dep. of Aveyron, cant. of Aubin, 21 m. NNE of Villefranche-de-Rouergue. Pop. 1,937. The locality contains several coal-mines.

LIVNO, Heluna, or Hliuno, a town of Turkey in Europe, in Bosnia, in the sanj. of Herzegovine, 13 m. WNW of Douvno, and 19 m. SSW of Keupris, at the foot of Mount Liubaska. Pop. 4,000, chiefly Turks. It is defended by a fortress, and is enclosed by a wall flanked with towers, bordered on the W by a deep ravine here forming the bed of the Bistritza, and crossed by a bridge of 5 arches. The plain of L., bounded on the SW by the chain of the Prologh mountains, and on the S by another parallel but less elevated range, is 45 m. in length, and 3 m. in breadth, and is watered by several streams. It is very fertile, and affords excellent pasturage to large numbers of horses and cattle.

LIVNY, a district and town of Russia in Europe, in the gov. of Orel. The district is in the E part of the gov. It is very fertile. The town is 87 m. ESE of Orel, on the l. bank of the Sosna. Pop. in 1838, 9,380. It is of considerable antiquity, and contains 7 churches and a convent.

LIVONIA, a township of Livingstone co., in the state of New York, U. S., 8 m. E of Geneseo. The surface is undulating, and is drained by the outlet of Hemlock lake. Pop. in 1840, 2,719.—Also a township of Wayne co., in the state of Michigan, 16 m. SW of Detroit. Pop. 1,169.—Also a village of Wayne co., in the same state, 104 m. S of Indianapolis. Pop. about 100.

LIVONIA, a maritime prov. or government in the NW of European Russia; bounded by Esthonia on the N; by the great lake Peipus, separating it from the gov. of St. Petersburg, and by the gov. of Pskov on the E; by the govs. of Vitebsk and Courland on the S; and by the gulf of Livonia or Riga on the W. It has an area of 17,500 sq. m., with a pop. in 1838 of 740,100; in 1846 of 814,100. Its surface presents a vast tract of level country interspersed with numerous marshes, and several hundred lakes great and small, of which those of Ljuban and Wirzjev are of considerable size. The latter lake discharges

itself by the Embach into the W side of Lake Peipus. The principal rivers are the Navast in the NW: the Boulder-Aa intersecting the central portion of the gov.; the Pedez in the SE, a branch of the Dvina; and the Dvina, which divides the gov. of L. on the S from that of Courland, from the junction of the Pedez to that of the Oger. The soil is in some places sandy, but consists in general of a rich loam equally calculated for tillage and pasturage. The export of corn, particularly rye and barley, is considerable; hemp, flax, and lintseed are largely grown for exportation. The forests are an important source of wealth. The cattle are in general small. Dorpat is the only university in L.; Riga the only place of extensive trade. The other chief towns are Pernau, Fellin, Volk, Verro, Wolmar, and Venden. This country was almost unknown to the rest of Europe until the end of the 12th cent., when it was overrun by the Danes. During the 13th and 14th cents. it was governed by the Teutonic knights; in the 16th, the Poles acquired the possession of it. In the 17th, Russia and Sweden contended for it; but in 1660 it was ceded, along with Esthonia, to the latter power; and the cession was confirmed by the peace of Nystadt in 1721.

LIVONIA (Gulf of), a large inlet of the Baltic, skirted on the E and S by the Russian govs. of Esthonia, Livonia, and Courland; and having the islands of Œsel and Mœn lying across its mouth. From the SW point of Œsel, to the coast of Livonia, measured along the parallel of 58°, it is 90 m. in depth. From the mouth of the Dvina to the SE point of Œsel, it is 100 m. in length. It contains the two small islands of Kin and Rouno, and receives all the great rivers of Livonia, with the addition of the Treider-Aa from Courland.

LIVORNO. See Leghorn.

LIVORNO, a town of Sardinia, in Piedmont, capital of a mandamento, in the prov. and 17 m. WSW of Vercelli. Pop. 3,600.

LIVOT, a commune of Belgium, in the prov. of Namur, dep. of Rhisne. Pop. 117.

LIVRADE, a canton, commune, and town of France, in the dep. of the Lot-et-Garonne, arrond. of Villeneuve-sur-Lot. The cant. comprises 7 com. Pop. in 1831, 6,269; in 1841, 5,979. The town is 5 m. WSW of Villenueve-sur-Lot, near the l. bank of the Lot. Pop. in 1841, 3,209. It has manufactories of cloth and leather, and a tile-work. The locality is noted for its prunes.

LIVRADOIS, an ancient district of France, in Lower Auvergne, now comprised in the dep. of the Puy-de-Dome. Its capital was Ambert.

LIVRE-LA-TOUCHE, a commune of France, in the dep. of the Mayenne, cant. and 3 m. NNW of Craon, and 14 m. WNW of Chateau-Gontier. Pop. 1,501.

LIVRON, a commune and town of France, in the dep. of the Drome, cant. and 2 m. NE of Loriol, on the brow of a steep hill, near the confluence of the Drome with the Rhone. Pop. in 1841, 3,730, chiefly Protestants. It possesses silk-mills, manufactories of agricultural implements, marbleworks, an oil-mill, tanneries, and extensive tile and lime-kilns. Wine is cultivated in the locality.

LIVRY, a commune of France, in the dep. of Calvados, cant. and 2 m. NE of Caumont. Pop. 1,317. It has a considerable trade in cattle.—Also a commune in the dep. of the Nievre, cant. and 2 m. SW of Saint-Pierre-le-Moutier, in a fertile plain, on the r. bank of the Allier. Pop. 1,521.—Also a commune in the dep. of the Seine-et-Oise, cant. and 7 m. SE of Gonesse, and 9 m. E of Paris. Pop. 975.

LIVULA, a town of SE. Africa, in the district of Makua, on the N side of the Muzimboa, near the entrance of that river into the channel of Mozambique.

LIVUMA, a river of SE. Africa, in the district of Mukaranga, which has its source in the Ndschessa mountains; runs ESE; and flows into the channel of Mozambique, a little to the N of Cape Delgado.

LIW, a town of Poland, in the gov. of Podlachia, obwodie and 21 m. NNW of Siedlec, and 22 m. ENE of Stanislawow, on the l. bank of the Liwiec. Pop. 800. It has a castle.

LIWIMOWITZ, a village of Austria, in Moravia, in the ldgb. and circle of Brünn. In its vicinity is the gouffre of Mazocha, the greatest natural curiosity in Moravia.

LIXFELD, a village of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, district and 9 m. WNW of Gladenbach.

LIXHE, a department and commune of Belgium, in the prov. and arrond. of Liege, watered by the Meuse. Pop. of dep. 681; of com. 255.

LIXHEIM, a commune and town of France, in the dep. of the Meurthe, cant. and 6 m. W of Phalsbourg, and 5 m. NE of Sarrebourg, on the Briche. Pop. 1,025. It has a Catholic church, a Protestant chapel, and a synagogue. In the environs are a free-stone quarry and a mineral spring. L., which occupies the site of an ancient abbey, was built and fortified by Frederick II., prince palatine, to serve as a retreat for the Lutherans. In 1622 it was ceded to Henry II., duke of Lorraine, and erected by him into a principality in behalf of the bastard of Guise.

LIXURI, a town of the island of Cephalonia, on the W side of the gulf of Argostoli, 4 m. WNW of the town of that name, 5 m. S of Cape Afi, and 5 m. E of Cape Gobo. Pop. 5,000. It is the principal town and the chief commercial entrepot of the island, and has a good port and building-docks.

LIZANT, a village of France, in the dep. of the Vienne, cant. and 5 m. S of Civray, and 13 m. S of Poitiers, near the Charente. Pop. 830.

LIZARD, an island in the S. Pacific, off the NE coast of Australia, 24 m. NE of Cape Flattery, in N lat. 14° 40′ 20″, E long. 145° 23′. It is about 3 m. in length, and forms a lofty peak.

LIZARD POINT, a bold headland on the coast of Cornwall, 23 m. ESE of the Land's End, with two light-houses, the highest of which is in N lat. 49° 57′ 41″, W long. 5° 11′ 5″. It is 15 m. from Falmouth, 50 m. from Plymouth, and 185 m. from Portsmouth. The sailing distance from the L. to Barbadoes is 3,425 m.; to Samana in Hayti, 3,545 m.

LIZE, a commune of Belgium, in the prov. of Liege, dep. of Seraing. Pop. 1,700.

LIZE'E, a commune of Belgium, in the prov. of Hainault, dep. of Ragnies. Pop. 110.

LIZERNE, a commune of Belgium, in the prov. of W. Flanders, dep. of Zuydschote. Pop. 125.

LIZIER (Saint), a canton, commune, and town of France, in the dep. of the Ariege, arrond. of Saint Girons. The cant. comprises 6 com. Pop. in 1831, 12,270; in 1841, 12,799. The town is 1½ m. NW of Saint Girons, on the r. bank of the Salat. Pop. 1,160. It has several paper-mills, a manufactory of cotton and woollen fabrics, several corn and oil-mills, a marble-work, several carding-mills, &c. This town was the capital of the ancient *Consoranni*, and subsequently of the district of Conserans or Couserans. It derived its present name from one of its bishops, who, to the period of the 12th cent., bore the title of bishops of Austria. Previous to the revolution it was named Austrie-la-Montagne.

LIZY, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, and arrond. of Meaux. The cant. comprises 27 com. Pop. in 1831, 13,270; in 1841, 12,774. The town, which is also named Lisy-sur-Ourcq, is 9 m. NE of Meaux, at the confluence of the Ourcq with the Marne. Pop. 1,197. It has an oil-mill and a tannery, and carries on an active trade in grain and wool.

LIZZANELLO, a town of Naples, in the prov. of the Terra d'Otranto, cant. and 5 m. SE of Lecce. Pop. 1,180.

LIZZANO, a town of Naples, in the prov. of the Terra d'Otranto, cant. and 7 m. SSE of S. Georgio. Pop. 1,000.

LLABORCI, a town of Spain, in Catalonia, in the prov. and 41 m. NNE of Lerida, partido of Sort, on the Noguera. Pop. 145.

LLACUNETA, a town of Spain, in Catalonia, in the prov. and 31 m. NE of Terragona, and partido of Vendrell, in a wide valley. Pop. 987. It has a convent. Cotton-spinning forms the chief branch of local industry.

LLADO, a town of Spain, in Catalonia, in the prov. and 14 m. SSE of Gerona. Pop. 1,995. In the environs is a mine of copper.

LLAFERNOC, or Lavernock, a parish in Glamorganshire, 5 m. S of Cardiff, on the coast of the Bristol channel. Pop. in 1831, 77; in 1841, 85.

LLAMAS-DE-LA-RIBERA, a town of Spain, in the prov. and 14 m. WNW of Leon, partido and 17 m. NNE of Astorga, on the l. bank of the Orvigo. Pop. 1,420.

LLAMPHEY, a parish in the co. and 2 m. E by S of Pembroke. Pop. in 1831, 436; in 1841, 407.—Also a hamlet in the p. of St. Bride's Major, Glamorganshire, 5 m. W of Cowbridge.

LLAN, originally the Welsh for a 'yard' or 'enclosure,' and subsequently employed to signify a 'church' or a 'chapel;' but in process of time *capel* became the distinguishing denomination of the last. The names of many Welsh places are compounded of one of these words as a prefix, and the name of some native pastor or saint.

LLAN-ABER, a parish in Merionethshire, 1½ m. NW of Barmouth. It includes the township of Gwern-y-Hywel. Pop. in 1841, 1,709.

LLAN-AFAN, a parish in the co. of Cardigan, 8 m. N of Tregaron. Pop. in 1831, 384; in 1841, 411.

LLAN-AFAN-FAWR, a parish in Breconshire, 6 m. NW of Builth. Pop. in 1841, 975.

LLAN-AFAN-FECHAN, a parish in Breconshire, 5 m. W by S of Builth, on a branch of the Wye. Pop. in 1831, 189; in 1841, 172.

LLANALLGOLF, a chapelry in the p. of Llaneugrad, Anglesey, 6 m. E by N of Llanerchynedd, on the coast of St. George's channel. Pop. 417.

LLAN-AML-LLECH, or Llanhamlach, a parish in Breconshire, 3 m. SE of Brecknock, on the E bank of the Usk, including the hamlet of Llecfaen. Pop. in 1831, 308; in 1841, 324.

LLAN-ANNO, a parish in Radnorshire, 10 m. NW by W of Rhayadergwy. Pop. in 1841, 329.

LLAN-ARMON, a parish in Carnarvonshire, 4 m. NE of Pwllheli. Pop. in 1831, 613; in 1841, 589.—Also a p. in Denbighshire, 5 m. E by S of Ruthin, on the river Alen, including the townships of Creigiog-Isylan, Creigiog-Uwchlan, and Erwyrys. Pop. in 1831, 1,475; in 1841, 1,823.

LLAN-ARMON (Dyffryn-Ceiriog), a parish in Denbighshire, 9 m. ENE of Oswestry, on the river Ceiriog. Pop. in 1831, 307; in 1841, 534.

LLAN-ARMON (Mynydd-Mawr), a parish in Denbighshire, 8 m. N of Llanfyllin, among the mountains, at an elevation of 1,725 ft. Pop. in 1841, 182.

LLANARTH, a parish in the co. of Monmouth, 3 m. NW of Ragland, including the hamlet of Clytha. Area 3,540 acres. Pop. in 1831, 655; in 1841, 669.

LLAN-ARTH (North and South), a parish in the co. of Cardigan, 12 m. NE by E of Lampeter. Pop. in 1831, 2,449; in 1841, 2,421.

LLAN-ARTHNE, or Llan-Arthney, a parish in Carmarthenshire, 8 m. E of Carmarthen, on the river Towy. Pop. in 1831, 1,839; in 1841, 2,171.

LLANAS, a town of Spain, in Catalonia, in the prov. of Gerona, and partido of Figueras, at the foot of Mount Rodas, near the sea-shore. Pop. 2,125 It has a parish-church, an hospital, and a custom-house.

LLAN-ASAPH, or Llan-Asa, a parish in Flintshire, 6½ m. NW of Holywell, and W of the river Dee. Coal and other minerals are wrought here to a considerable extent. There is a signal tower on St. Asaph hill, and at the point of Air, at the mouth of the Dee, is a lighthouse, situated in N lat. 53° 21′ 26″, W long. 3° 19′ 14″, containing two fixed lights. Pop. in 1831, 2,373; in 1841, 2,669.

LLAN-BABO, a parish in Anglesey, 3 m. NW of Llanerchymidd. Pop. in 1831, 174; in 1841, 155.

LLANBADARN-FAWR, a parish in Cardigan shire, 1 m. SE of Aberystwith, and N of the river Reidol, including the townships of Broncastellan, Clarach, Cwmrheidol, Elerch, Melin-dwr, Parcel-Canol. Trefeirig, Uchayn-y-drê, Vainor-Uchaf, Vainor-Issa, and In-y-dre-Issa, the hamlets of Llanbadarn-y-Croydden Isaf, and Uchaf, and the chapelry of Aberystwith. The church is a spacious structure, in the early style of English architecture. A church and bishopric were founded here about the 6th cent. The see was afterwards united to that of St. David's. The p. is very extensive, its average length being about 15 m.; its greatest breadth 8 m. Pop. in 1831, 9,824; in 1841, 11,239.—Also a p. in the co. of Radnor, 8½ m. ENE of New Radnor, on the river Ithon. Pop. in 1831, 491; in 1841, 448.

LLANBADARN-FYNYDD, a parish in the co. of Radnor, 10 m. NE of Rhayadergwy. Pop. 610.

LLANBADARN-ODYN, a parish in Cardiganshire, 3 m. NW by W of Tregaron, on the E bank of the Teifi. Pop. in 1831, 558; in 1841, 504.

LLANBADARN-TREF-EGLWS, or Llanbadarn-Fach, a parish in Cardiganshire, 11 m. NW by N of Lampeter, near the coast. Pop. 1,045.

LLANBADARN-Y-CROYDDYN-ISAF, a hamlet in the p. of Llanbadarn-fawr, Cardiganshire, 3 m. SE of Aberystwith. Pop. in 1841, 883.

LLANBADARN-Y-CROYDDYN-UCHAF, a hamlet in the p. of Llanbadarn-fawr, Cardiganshire. Pop. in 1831, 743; in 1841, 874.

LLANBADARN-Y-GARREG, a parish in Radnorshire, 5 m. SE by E of Builth, on a branch of the Wye. Pop. in 1831, 98; in 1841, 81.

LLANBADOCK, a parish in the co. of Monmouth, about 1 m. S of Usk, on the river Usk. Pop. in 1831, 374; in 1841, 457.

LLANBADRIG, a parish in Anglesey, 4¼ m. W by N of Amlwch, on the coast of the Irish sea, including the township of Cemmaes and Clygyrog. Pop. in 1831, 1,364; in 1841, 1,295.—Also a parish in the co. of Carnarvon, 4¼ m. SW by S of Pwllheli. It is a rocky and uncultivated region, containing about 5 sq. m. Pop. in 1831, 459; in 1841, 524.

LLANBEBLIG, a parish in Carnarvonshire, on the river Seiont, including the borough of Carnarvon, and the townships of Bont Newydd and Treflan. See Carnarvon.

LLANBEDR, a parish in Breconshire, 2 m. NE of Crickhowel, in a romantic vale on the river Grwyney. Pop. in 1831, 359; in 1841, 290.—Also a parish in Merionethshire, 8 m. N by W of Barmouth on the Afron-Astro. Pop. in 1831, 403; in 1841, 404.—Also a chapelry in the p. of Llanmartin, Monmouthshire, 4 m. E of Caerleon.—Also a parish in Radnorshire, 6 m. NW by W of Hay. on a branch of the Wye. Pop. in 1831, 356; in 1841, 348.

LLANBEDR-DYFFRYN-CLWYD, a parish in Denbighshire, 1 m. NE of Ruthin, on the river Clydd. Pop. in 1831, 527; in 1841, 522.

LLANBEDR-FELFREY, or Llampeter-Felfrey, a parish in Pembrokeshire, 3 m. E of Narbeth. Pop. in 1831, 984; in 1841, 1,025.

LLANBEDR-GOCH, a parish in Anglesey, 7 m. SE by E of Llanerchymedd, near Red Wharfe bay. Pop. in 1831, 437; in 1841, 407.

LLANBEDR, or Lampeter-pont-Stephen, a parish and borough in the co. of Cardigan, 28 m. E by N of Cardigan, on a flat tract of ground in the vale of the Teifi. Pop. in 1831, 1,317; in 1841, 1,507.—The town, which consists principally of one long street, has been greatly improved of late years, particularly since the foundation of St. David's college. The church, which is very ancient, is pleasantly situated upon rising ground, a little to the N of the town.—The college of St. David's stands on an elevated spot, on the E side of the town. The edifice, a handsome quadrangular building, was completed and opened for the reception of students, in 1827, at a cost of about £20,000. Of this sum £6,000 were contributed by government, and £1,000 by George IV. It is incorporated by royal charter. It is endowed with 6 livings; and contains a house for the principal, apartments for the visitor and 4 professors, with rooms for about 70 students, besides the chapel, hall, library, &c., with the usual college offices. There is also a detached residence for the vice-principal. The students, like those of St. Bee's and Cowbridge, have the privilege of direct admission into holy orders. The library comprises about 18,000 vols. Since 1830, several scholarships have been attached to the college.—The borough is coextensive with the lordship or manor of L., beyond which the parish stretches considerably in every direction. Under the reform act, L., in conjunction with Cardigan, Adpar, and Aberystwith, returns a member to parliament. Electors registered in 1837, 234; in 1847, 149.—L. is one of the polling-places for the co. member.—The trade is chiefly of a local character, and considerably assisted by numerous fairs. A lead mine in the vicinity contains a large per centage of silver.

LLANBEDR-Y-CENNIN, a parish in Carnarvonshire, 6 m. N by W of Llanrwst, including the townships of Ardda, Dol-y-Garrog, Tal-y-Cafn, and Llanbedr. Pop. in 1831, 476; in 1841, 456.

LLANBERRIS, or Llanperis, a parish in the co. of Carnarvon, 10 m. ESE of Carnarvon. Pop. in 1831, 725; in 1841, 1,024. Copper-mines and slate-quarries afford employment to many persons. The mineral products are conveyed in flats along the lake, after which a railway carries them to Moel-y-Don, on the Menai strait, where they are shipped for exportation. The parish includes the gloomy valley called the pass of Llanberris; and a village has sprung up, principally supported by tourists, who resort to this as the finest scenery in Wales. The pass is bounded on the E by the Glider-Fawr mountain, and on the W by Snowdon. A line of road, carried along the margin of the lower lake to Carnarvon, was continued, in 1831, through the pass of L., to the post-road from Beddgelert to Capel-Curig.

LLANBEULAN, a parish in Anglesey, 10 m. SE of Holyhead. Pop. in 1831, 375; in 1841, 314.

LLANBISTER, a parish and township in Radnorshire, 10½ m. E of Knighton, including the townships of Bronllis, Caroge, Cevenpawl, Cwmlechwedd, Cwmygaist, Gollan, and L. There are several mineral springs in this parish. Pop. in 1841, 1,122.

LLANBLEIDDIAN, or Llanbethian, a parish in Glamorganshire, a ½ m. SW of Cowbridge, on the W bank of the river Cowbridge. Pop. in 1841, 724.

LLANBOIDY (Upper and Lower), a parish in Carmarthenshire, 9 m. NE by E of Narbeth, on a branch of the Taff. Pop. in 1841, 1,789.

LLAN-BRYNNMAIR, a parish in the co. of Montgomery, 10 m. E of Machynnlaeth, on the river Dyfi. Pop. in 1831, 2,040; in 1841, 2,019.

LLAN-CADWALADYR, a parish in Denbighshire, 7 m. W by N of Oswestry, in an elevated site, among the Llanarmon mountains. Pop. in 1841, 234.

LLAN-CARFAN (East and West), a parish in Glamorganshire, 4½ m. SE of Cowbridge, in the vale of Glamorgan, about 3 m. N of the Bristol channel. Pop. in 1831, 734; in 1841, 699.

LLANCILLOE, a parish in Herefordshire, 13 m. SW of Hereford, on the river Monnow, and in the line of the Abergavenny and Hereford railway. Pop. in 1831, 76; in 1841, 84.

LLAN-CIWG, or Llan-Guick, a parish in the co. of Glamorgan, 5½ m. NW by N of Neath, intersected by the Swansea canal. Pop. in 1841, 2,813.

LLANDAFF, a parish and city in the hund. of Kibbor, Glamorganshire, 3 m. NW of Cardiff, and 163 m. W of London, on the S bank of the river Taff, and intersected by the Glamorganshire or Cardiff canal, and the Taff-Vale railway. The parish, besides the city of L., comprises the hamlets of Canton, Ely, Fairwater, and Gabalva. Pop. in 1801, 860; in 1831, 1,299; in 1841, 1,276.—L. has been the seat of a bishop's see from a very remote period. It consists only of one archd., that of Llandaff, comprehending the deaneries of Cowbridge, Llandaff, Newport, Chepstow, Usk, and Abergavenny. The dio. extends over the cos. of Glamorgan and Monmouth. The number of benefices in the dio., in 1831, was 192; average gross income, £189. The average net yearly income of the see for 3 years ending 31st December, 1831, was £924. By order in council means were provided for raising the annual income of the see to £4,200. The average net yearly income of the dean and chapter, as a corporation aggregate, during the 3 years ending in 1831, was £654; the chapter consisting of 13 persons, viz. the bishop, chancellor, treasurer, precentor, and 9 prebendaries. The cathedral, the principal building in L., is an object of considerable interest. The architecture is partly Saxon, with an occasional mixture of Norman; but the prevailing style is that usually denominated Gothic. The length of the body of the church is 300 ft.; the breadth, 80 ft. A good deal has been done recently towards the restoration of this venerable edifice. The parish, which is large and straggling, is almost entirely agricultural. The city, as it is called, contains only a few respectable dwellings, and two or three public-houses. At Gabalva there is a wharf on the Glamorganshire canal, whence some traffic is carried on with Merthyr-Tydvil.

LLANDANWG, a parish in Merionethshire, 2 m. S of Harlech, in a sequestered situation, at the mouth of the river Astro. Pop. in 1841, 746.

LLANDAROG, a parish in Carmarthenshire, 6½ m. E by S of Carmarthen, on the river Gwendraeth-Fawr. Pop. in 1831, 1,037; in 1841, 1,047.

LLAN-DAUDDWR, or Llandowror, a parish in Carmarthenshire, 4 m. NW of Langharne, on the S bank of the river Taff. Pop. in 1841, 392.

LLANDAWK, a parish in Carmarthenshire, 1½ m. W by N of Laugharne. Pop. in 1841, 26.

LLANDDAUSAINT, or Llandoysaint, a parish in Carmarthenshire, 6 m. SE by E of Llangaddog, at the source of the river Usk, containing the hamlets of Bluen-Sawthey, Llandoysaint, and Maes-fynnon. Pop. in 1831, 1,006; in 1841, 942.—Also a p. in Tal-y-Bohin hund. in Anglesey. Pop. in 1841, 524.

LLANDDEINIOL, or Carrog, a parish in Cardiganshire, 6 m. S by E of Aberystwith, on the bay of Cardigan. Pop. in 1831, 254; in 1841, 273.

LLANDDEINIOL-FAB, or Llanddaniel, a parish in Anglesey, 6 m. NE of Newborough. Pop. in 1831, 372; in 1841, 407.

LLANDDETTY, or Llanthetty, a parish in the

co. of Brecon, 7 m. SE of Brecknock, on the river Usk. Pop. in 1831, 579; in 1841, 420.

LLANDDEW, or Llanddewi, a parish in the co. of Brecon, 1½ m. NE of Brecknock, on the river Honddu. Pop. in 1831, 323; in 1841, 317.

LLANDDEWI, a parish in Glamorganshire, 5 m. NE of Penrice. Pop. in 1831, 150; in 1841, 164.

LLANDDEWI-ABERARTH, a parish in Cardiganshire, 13 m. NW of Lampeter, at the mouth of the river Arth, on the coast of Cardigan bay, including the villages of Llanddewi-Aberarth, and Aberaeron. Pop. in 1831, 976; in 1841, 1,066.

LLANDDEWI-ABER-GWESIN, a parish in Breconshire, 14 m. W by N of Builth, at the confluence of the rivers Irven and Gwesin. Pop. in 1831, 146; in 1841, 143.

LLANDDEWI-BREFI, a parish in Cardiganshire, 6½ m. N by E of Lampeter, on the river Teifi, including the townships of Dothie-Camddwr, Dothi-Piscottwr, Gatherly, Gogsyan, Gorwydd, Garth and Istrad, Gwnfil, Llanis, Prisk and Carvan, and the chapelry of Blaen-Penal. Pop. in 1841, 2,591.

LLANDDEWI-FACH, a parish in Radnorshire, 5½ m. WNW of Hay, on the river Machawy. Pop. in 1831, 136; in 1841, 130.

LLANDDEWI-FELFREY, a parish in Pembrokeshire, 2½ m. NE of Narbeth. Pop. in 1841, 788.

LLANDDEWIRCWM, a parish in Breconshire, 2 m. SW of Builth, on the small river Duhawn-wg. Pop. in 1831, 230; in 1841, 244.

LLANDDEWY-YSTRADENNY, a parish in Radnorshire, 9 m. E by N of Rhayader, on the river Arun, containing the townships of Church and Maestre-Rhos-Lowry. Pop. in 1831, 653; in 1841, 693.

LLAN-DDONA, a parish in Anglesey, 3½ m. NW of Beaumaris, on the coast of Redwharfe-bay. Pop. in 1831, 442; in 1841, 506.

LLANDDUYWE, a parish in Merionethshire, 4½ m. N by W of Barmouth, including the hamlets of Is-Graig and Uwch-Graig. Pop. in 1841, 386.

LLANDDWYN, or Llanddwynwen, a parish in Anglesey, 9 m. WNW of Carnarvon, on the W side of Carnarvon-harbour. Pop. in 1841, 283.

LLANDDYFNAN, a parish in Anglesey, 6½ m. W of Beaumaris, near the river Cefni. Pop. in 1831, 678; in 1841, 718.

LLANDECWYN, a parish in Merionethshire, 3 m. SW of Maentwrog, on the S bank of the river Traeth-Bach. Pop. in 1831, 462; in 1841, 386.

LLANDEFAELOG-FACH, a parish in Breconshire, 3 m. N of Brecon, on the river Honddu, including the chapelry of Llanfihangel-fechan. Pop. in 1831, 359; in 1841, 382.

LLANDEFAELOG-FAWR, or Llandevalley (North and South), a parish in Breconshire, 6 m. NE of Brecon. Pop. in 1831, 838; in 1841, 705.

LLANDEFAELOG-TREYR-GREIG, a parish in Breconshire, 5 m. E by N of Brecon, on a branch of the Wye. Pop. in 1831, 47; in 1841, 35.

LLANDEGAI, a parish in Carnarvonshire, 1½ m. E by S of Bangor, on the banks of the river Ogwen. The p. is extremely mountainous, and contains vast quarries of fine roofing-slate, which have been wrought for upwards of 60 years. Pop. in 1831, 2,600; in 1841, 3,010.

LLANDEGFAN, a parish in Anglesey, 2½ m. SW of Beaumaris. Pop. in 1831, 738; in 1841, 812.

LLANDEGLA, a parish in Denbighshire, 7 m. SE of Ruthin, at the source of the river Alen. Pop. in 1831, 378; in 1841, 417.

LLANDEGLEY, a parish in Radnorshire, 11 m. E by S of Rhayader, on the river Arun. Pop. in 1831, 355; in 1841, 424.

LLANDEGVETH, a parish in Monmouthshire, 3½ m. N by W of Caerleon, on a branch of the Usk. Area 720 acres. Pop. in 1831, 105; in 1841, 131.

LLANDEGWNING, a parish in Carnarvonshire, 7½ m. SW by W of Pwllheli. Pop. in 1841, 143.

LLANDEILO, a parish in Pembrokeshire, 8 m. N by W of Narberth, at the source of the river Cleddau. Pop. in 1831, 117; in 1841, 205.

LLANDEILO-ABER-CYWYN, or Llandilo Abercowin, a parish in Carmarthenshire, 8 m. SW of Carmarthen, on the N bank of the river Taff. Pop. in 1831, 90; in 1841, 78.

LLANDEILO-ARFAN, or Llandilor-fane, a parish in Breconshire, 10 m. NW by W of Brecon, on a branch of the Usk. Pop. in 1841, 525.

LLANDEILO-FAWR, or Llandilo-Vawr, a town and parish in Carmarthenshire, 14 m. W by N of Carmarthen, on the river Towy, and in the line of the Llanelly railway. The parish includes the hamlets of Bryn-y-Beirdd, Trecastle, Tregib, Clynammon, Cwmcawlwyd, Manerfabon, Manordeilo Lower and Upper, Pentre Cwm, Tachloyan and Rhiwlas, Tyrescob and Rhos-maen, the chapelry of Taliaris, and the village or town of L. The latter is finely situated on the side of a hill. Here are several woollen manufactories and corn-mills. Tanning is also carried on; and there is a good traffic at the markets and fairs. The town is one of the polling-places for the co. members. There are several chalybeate and calcareous springs in this p., one of which, called Ffynnan Craig Ceffyl, possesses valuable medicinal properties. In this vicinity the last struggles for the independence of Wales, were made by Llewellyn, who was defeated by the forces of Edward I. in 1282. Pop. in 1801, 3,497; in 1831, 5,149; in 1841, 5,471, of whom 1,313 were in the town.

LLANDEILO-GRABAN, a parish in Radnorshire, 6 m. SE of Builth, on the E bank of the Wye. Pop. in 1831, 272; in 1841, 283.

LLANDEILO-TAL-Y-BONT, a parish in Glamorganshire, 10 m. NW of Swansea, on the E bank of the Llwchwr, including the hamlet of Tyr-yr-Brenkin and Briskedwin. The parish is very extensive, and contains much coal. Pop. in 1841, 1,410.

LLANDEINIOLEN, a parish in Carnarvonshire, 4½ m. NE of Carnarvon. Here are extensive slate-quarries, and some mineral springs. Pop. in 1831, 2,610; in 1841, 4,202.

LLANDENNY, a parish in Monmouthshire, 3½ m. NE of Usk. Area 2,470 acres. Pop. in 1831, 404; in 1841, 375.

LLANDERFEL, a parish in Merionethshire, 8 m. SW of Corwen, on the N bank of the Dee. Pop. in 1831, 956; in 1841, 953.

LLANDINABO, a parish in Herefordshire, 6 m. NW by W of Ross. Area 540 acres. Pop. in 1831, 53; in 1841, 62.

LLANDINAM, a parish in Montgomeryshire, 5½ m. NE of Llanidloes, on the E bank of the Severn. Pop. in 1831, 1,105; in 1841, 1,732.

LLANDINGAD, or Llandingat, a parish in Carmarthenshire, 1 m. W of Llandovery, on the W bank of the Towy, including the borough of L., and the hamlets of Forest, Telych, and Ystrad. Pop. in 1831, 2,465; in 1841, 2,345.

LLANDOCH-Juxta-BARRY, a parish in Glamorganshire, 5½ m. SW of Cardiff. Pop. in 1831, 119; in 1841, 133.—Also a parish in Glamorganshire, 1 m. S of Cowbridge. The Talbot family has a noble residence here. Pop. in 1841, 92.

LLANDOGET, a parish in Denbighshire, 2 m. N by E of Llanrwst, on the E bank of the Conwy. Pop. in 1831, 287; in 1841, 222.

LLANDOGO, a parish in Monmouthshire, 6 m. S by E of Monmouth, on the W bank of the Wye. Area 1,620 acres. Pop. in 1831, 646; in 1841, 660

LLANDOVERY, or LLANYMTHEVERYE, a borough in the parish of Llandingat, co. of Carmarthen, 26 m. ENE of Carmarthen, finely situated in a well-watered valley, encircled by hills. Pop. in 1801, 1,395; in 1831, 1,766; in 1841, 1,709.—The town is pleasantly situated on the river Bran, near its junction with the Towy, over which there are here two bridges. Its principal street is broad and enclosed by respectable houses. In the neighbourhood are several elegant villas, occupying romantic situations.—The borough, which is co-extensive with the township, is one of the polling-places for the county members.

LLANDRILLO, a parish and village in Merionethshire, 5 m. SW of Corwen, on the river Dee. Pop. in 1831, 806; in 1841, 875.

LLANDRILLO-YN-RHOS, a parish in Denbighshire, 5 m. NE of Conwy. Pop. in 1841, 1,176.

LLANDRINDOD, or LLAN-Y-DRINDOD, a parish in Radnorshire, 7 m. NNE of Builth. Pop. in 1831, 182; in 1841, 270. Three mineral springs in this p. though rising within a few yards of each other, are totally different in quality and character, being respectively chalybeate, sulphureous, and cathartic. They were known as early as 1696, and began to be visited by persons from a distance in 1726.

LLANDRINIO, a parish in Montgomeryshire, 8 m. NNE of Welshpool, on the N bank of the Severn. Pop. in 1831, 863; in 1841, 881.

LLANDRYGAN, or LLANDRYGARN, a parish in Anglesey, 6 m. ENE of Llangeffni, on the post-road from Holyhead to Bangor. Pop. in 1841, 485.

LLANDUDNO, a parish in Carnarvonshire, 4 m. N by W of Conwy, on the coast of St. George's channel. Pop. in 1831, 662; in 1841, 1,047. Extensive copper-mines are wrought here. The promontory of Gogarth, known to all navigators of the channel, presents a grand precipitous front to the sea on the coast of this parish.

LLANDUDWEN, a parish in Carnarvonshire, 7 m. from Pwllheli. Pop. in 1831, 85; in 1841, 86.

LLANDULAS, a parish in Denbighshire, 2½ m. W of Abergele, on the coast of the Irish sea. Pop. in 1831, 307; in 1841, 514.—Also a parish in Breconshire. Pop. in 1831, 159; in 1841, 141.

LLANDWF, or LLANDOW, a parish in Glamorganshire, 3½ m. W by S of Cowbridge. Pop. in 1831, 138; in 1841, 125.

LLANDWROG (LOWER and UPPER), a parish in Carnarvonshire, 5 m. S by W of Carnarvon. It contains the extensive slate quarries of Pen-y-Bryn, Tal-y-Sarn, and Cil-Gwyn. Pop. in 1841, 2,688.

LLANDYBIE, a parish in Carmarthenshire, 4½ m. S of Llandeilo-Fawr. Pop. in 1841, 2,534.

LLANDYVAILOG, or LLANDEFEILOG, a parish in Carmarthenshire, 5 m. S by E of Carmarthen, including the hamlets of Cilmargh and Ishgoed, Kitploith and Portseyborfawr, Llandyvailog, Molfre, and Iddole. Pop. in 1831, 1,278; in 1841, 1,303.

LLANDYFEISANT, or LLANDEFEYSON, a parish in Carmarthenshire, hund. of Cayo. Pop. in 1831, 230; in 1841, 267.

LLANDYFODWG, or LLADDEVODOG, a parish in Glamorganshire, 5½ m. NE of Bridgend. Pop. in 1831, 309; in 1841, 338.

LLANDYFRIOG, a parish in Cardiganshire, 1½ m. E by N of Newcastle-in-Emlyn, on the N bank of the Teifi. Pop. in 1831, 854; in 1841, 925.

LLANDYFRYDOG, a parish in Anglesey, 2 m. NE of Llanerch-y-Medd, on the river Dulas. Pop. in 1831, 853; in 1841, 721. Many of the inhabitants are employed in the copper-mines of the Parys mountain.

LLANDYGWYDD, a parish in Cardiganshire, 3½ m. S by W of Cardigan. Pop. in 1841, 1,044.

LLANDYLWYF, or LLAN-DELOY, a parish in Pembrokeshire, 7 m. E by N of St. David's. Pop. in 1831, 217; in 1841, 205.

LLANDYRNOG, a parish in Denbighshire, 4 m. E by S of Denbigh, on a branch of the Clydd. Pop. in 1831, 708; in 1841, 645.

LLANDYSIL, a parish and village in the co. of Cardigan, 12 m. SW by W of Lampeter, on the N bank of the Teifi. Pop. in 1841, 2,957.

LLANDYSILIO, a parish in Anglesey, 2 m. W by S of Bangor, on the W bank of the Menai strait, where it is crossed by the celebrated suspension-bridge. Pop. in 1831, 479; in 1841, 871.—Also a parish in Montgomeryshire, 8 m. N by E of Welshpool. Pop. in 1831, 632; in 1841, 876.—Also a parish in Denbighshire, 1¾ m. NW of Llangollen, on the N bank of the Dee. Pop. in 1831, 842; in 1841, 921.—Also a parish in Cardiganshire, 16 m. WNW of Lampeter, on Cardigan bay. Pop. in 1831, 1,430; in 1841, 1,407.—Also a parish, partly in Carmarthenshire, and partly in Pembrokeshire, 4½ m. N of Narberth, on the river Cleddau. Pop. in 1841, 1,060.

LLANDYSSIL, a parish in Montgomeryshire, 2 m. SW of Montgomery. Pop. in 1841, 744.

LLANEDERN, a parish in Glamorganshire, 5 m. NE by N of Cardiff, on the river Rumney. Pop. in 1831, 315; in 1841, 354.

LLANEDWEN, a parish in Anglesey, 2½ m. N of Carnarvon, on the W bank of the Menai straits, over which there is here a ferry. Pop. in 1841, 283.

LLANEDY, a parish in Carmarthenshire, 7 m. NE of Llanelly, crossed by the Llandeilo railway. Pop. in 1831, 1,001; in 1841, 1,098.

LLANEGRYN, a parish in Merionethshire, 3½ m. N of Towyn, bounded on the W by Cardigan bay, including the townships of Peniarth and Rhydyrhin. Pop. in 1831, 764; in 1841, 745.

LLANEGWAD, a parish in Carmarthenshire, 7 m. W of Llandeilo-Fawr, on the river Cothi. Pop. in 1831, 2,214; in 1841, 2,113.

LLANEIGRAD, or LLANEUGRAD, a parish in Anglesey, 7 m. SE by S of Amlwch, including the chapelry of Llanallgo. Pop. in 1841, 715.

LLANELHAIARN, a parish in the co. of Carnarvon, 6 m. N by W of Pwllheli, on Carnarvon bay. Pop. in 1831, 660; in 1841, 660.

LLANELIAN, a parish in Anglesey, 2½ m. E by S of Amlwch, on the coast of the Irish sea, including the chapelry of Rhôs-Peirio. Much copper-ore, from the Parys-mountain, is exported from this place. Pop. in 1831, 1,438; in 1841, 1,439.—Also a parish in Denbigh, 5 m. WSW of Abergele. Pop. in 1831, 604; in 1841, 604.

LLANELIDAN, a parish in Denbighshire, 5 m. SSW of Ruthin, on the river Clydd. Pop. 962.

LLANELIEU, a parish in Breconshire, 5½ m. SW of Hay. Pop. in 1831, 115; in 1841, 103.

LLANELLEN, a parish in Monmouthshire, 2¼ m. S of Abergavenny, on the SW bank of the Usk. Area 2,480 acres. Pop. in 1831, 372; in 1841, 342.

LLANELLTYD, a parish in Merionethshire, 1½ m. NW of Dolgelly, on the river Maw. Pop. 504.

LLANELLY, a parish in Breconshire, 3 m. SE of Crickhowell, including the parcels of Aberbaidan and Maesgwartha. Coal, ironstone, and lime are wrought in this vicinity, and iron is smelted in the Llydach works. Pop. in 1801, 937; in 1831, 4,041; in 1841, 11,155.—Also a parish and parl. borough in the hundred of Carnwallen, Carmarthenshire, 17 m. SW by S of Carmarthen, situated on an estuary formed by the river Loughor and the sea, and intersected by the Llanelly railway. A canal and tramroad enable L. to communicate with Kidwelly; and the Swansea and Loughor railway is designed to communicate by a branch with the L. line, near

Lloughor bridge. The parish, besides the borough of Llanelly, comprises the hamlets of Berwick, Glyn, Hengoed, and Westoac. Pop. in 1801, 2,972; in 1831, 7,646; in 1841, 6,818.—The town, which is irregularly built, has undergone considerable improvement of late years. Under the reform act, L., in conjunction with Carmarthen, returns a member to parliament. Voters registered in 1837, 168. L. has a flourishing and increasing trade. The principal article of export is coal, the working of which employs upwards of 500 persons. The quantity exported to foreign countries, and British settlements abroad, in 1839, was 24,890 tons. The coal, which is of fine quality, is exported to Suez, Mocha, Bombay, Bahia, Constantinople, Odessa, Malta, and Marseilles. Iron, copper-cakes, and sheathing are also exported. Iron furnaces have been established, and there are several copper-works. A small import and export trade is carried on in corn and grain. The gross amount of customs duty collected at this thriving port in 1836 was £1,834; in 1840, £4,714. Four docks have been completed, one of which is a floating basin admitting vessels of from 150 to 180 tons register; another is capable of admitting vessels of 500 tons register. The graving dock of the railway company is admirably constructed. The L. railway traverses a rich mineral district, and possesses numerous branches; its total length is 26 m.

LLANELWETHY, a parish in Radnorshire, ½ m. NE of Builth. Pop. in 1831, 182; in 1841, 197.

LLANENDDWYN, a parish in Merionethshire, 5 m. NNW of Barmouth, at Cardigan bay. Pop. 940.

LLANENGAN, or EINIONFRENIN, a parish in Carnarvonshire, 6 m. SW of Pwllheli. Near the coast are two small islands, called St. Tudwall's. Pop. in 1831, 1,016; in 1841, 1,063.

LLANENGHENEL, or LLANYNHENEDLE, a parish in Anglesey, 4½ m. SW of Holyhead. Pop. 445.

LLANERCHFROCHWELL, or LLANERCHROCHWELL, a township in the p. of Guilsfield, Montgomeryshire, 3 m. NW of Welshpool. Pop. in 1821, 550.

LLANERCH-Y-MEDD, a village of Anglesey, 11 m. E by N of Holyhead, at the source of the river Dulas.

LLANERFYL, a parish in Montgomeryshire, 5 m. NW by W of Llanfair, on the river Banw. Pop. in 1831, 989; in 1841, 1,000.

LLANES, a judicial partido and town of Spain, in Asturias, in the prov. of Oviedo. The part. comprises 46 parishes. The town is 60 m. E of Oviedo, and about a mile from the cape of that name, on the gulf of Gascogny. Pop. 2,086. It has 3 suburbs, from which it is separated by the Carracedo, which is here crossed by a stone-bridge. The streets are clean and well-paved; and the houses regularly and substantially built, many of them of stone and marble. The principal edifices are the parish church, and the palace of the Count de Vega. A fine promenade skirts the sea-shore. Two canals terminate in the harbour, which is defended by batteries, and which is frequented by numerous vessels of small size.

LLANFABON, a parish in Glamorganshire, 5¼ m. N by W of Caerphilly, in the line of the Merthyr Tydvil canal, and the Taff Vale railway, including the hamlets of Garth and Glyn-rumney. Pop. in 1831, 843; in 1841, 1,449.

LLANFACHRETH, a parish in Anglesey, 4 m. E of Holyhead, on a small stream which flows into Holyhead bay. Pop. in 1831, 424; in 1841, 493.—Also a parish in Merionethshire, 3½ m. NNE of Dolgelly. Pop. in 1831, 948; in 1841, 956.

LLANFAELOG, a parish in Anglesey, 8 m. SE of Holyhead, on the coast of St. George's channel. Pop. in 1831, 615; in 1841, 786.

LLANFAELRHYS, a parish in Carnarvonshire, 12 m. SW by W of Pwllheli. Pop. in 1841, 236.

LLANFAES, or LLANVAES, a parish in Anglesey, 1 m. NE of Beaumaris. Pop. in 1841, 268.

LLANFAETHLU, or LLANFAETHLY, a parish in Anglesey, 5 m. NE of Holyhead. Pop. in 1841, 483.

LLANFAGLAN, a parish in Carnarvonshire, 2 m. SW by S of Carnarvon, on the E bank of an estuary formed by the Menai straits. Pop. 205.

LLANFAIR-DYFFRYN-CLWYD, a parish in Denbighshire, 2½ m. SE by S of Ruthin, on a branch of the Clydd. Pop. in 1831, 1,238; in 1841, 1,254.

LLANFAIR-CAEREINION, a parish and market-town in Montgomeryshire, 10 m. NW of Montgomery. Pop. in 1831, 2,687; in 1841, 2,747.

LLANFAIR-AR-Y-BRYNN, a parish in Carmarthenshire, about 1 m. N of Llandovery, including the hamlets of Rhandir-Abbott, Rhandir-Ganol, Rhandir-Issa, and Rhandir-Uchaf. Pop. 1,649.

LLANFAIR-CLYDOGAU, a parish in Cardiganshire, 2½ m. NE of Lampeter. Pop. in 1841, 471.

LLANFAIR-FECHAN, a parish in Carnarvonshire, 7 m. SW by W of Conwy, on the sea-coast. Adjoining this p. are the Lavan sands, covering a surface of 96 sq. m., supposed to have been inundated by the sea in the 6th cent., and never since recovered. Pop. in 1831, 653; in 1841, 747.

LLANFAIR-MATHAFARN-EITHAF, a parish in Anglesey, 7½ m. NW of Beaumaris, on the W side of Redwharfe-bay. Pop. in 1841, 741.

LLANFAIR-IS-GAER, a parish in Carnarvonshire, 2½ m. NE by N of Carnarvon, on the E bank of the Menai straits. Pop. in 1841, 549.

LLANFAIR-JUXTA-HARLECH, a parish in Merionethshire, 1 m. S of Harleigh, on the coast-road from Harleigh to Barmouth. Pop. in 1841, 464.

LLANFAIR-NANTYGOF, a parish in Pembrokeshire, 2 m. SE of Fishguard. Pop. 237.

LLANFAIR-NANTYGWYN, a parish in Pembrokeshire, 6 m. S of Cardigan. Pop. in 1841, 241.

LLANFAIR-ORLLWYN, a parish in Cardiganshire, 4 m. E by N of Newcastle-in-Emlyn, on the N bank of the Teifi. Pop. in 1841, 397.

LLANFAIR-PWLL-GWYNGYLL, a parish in Anglesey, 5 m. SW of Beaumaris, on the W bank of the Menai straits. Pop. in 1841, 617.

LLANFAIR-TALHAIARN, a parish in Denbighshire, 5 m. S by W of Abergele, on the river Elwy. Pop. in 1831, 1,355; in 1841, 1,416.

LLANFAIR-TREHELYGON, a parish in Cardiganshire, 5 m. E of Newcastle-in-Emlyn. Pop. 108.

LLANFAIR-YN-EUBWLL, or LLANFAIR-YN-KWBWLL, a chapelry in the p. of Rhos-Colyn, Anglesey, 5 m. SE of Holyhead. Pop. in 1841, 357.

LLANFAIR-YN-GHORNWY, a chapelry in the p. of Llanddeusaint, Anglesey, 8 m. SW by S of Amlwch. Pop. in 1831, 310; in 1841, 157.

LLANFALLTEG, or LLANVALTEG, a parish partly in Carmarthenshire and partly in Pembrokeshire, 4 m. NE by N of Narberth. Pop. in 1841, 399.

LLANHARAN, a parish in Glamorganshire, 3½ m. NW of Cowbridge. Pop. in 1841, 306.

LLANHARY, a parish in Glamorganshire, 4 m. N of Cowbridge. Pop. in 1831, 208; in 1841, 238.

LLANHENNOCK, a parish in Monmouthshire, 1¾ m. NE by N of Caerleon. Area 1,450 acres. Pop. in 1831, 187; in 1841, 235.

LLANHILETH, or Llanhyddell, a parish in Monmouthshire, 10½ m. W by N of Usk. Area 2,030 acres. Pop. in 1831, 545; in 1841, 662.

LLANHIR, or Llanyear, a parish in Radnorshire, 7 m. SE of Rhayader, on the river Arun. Pop. in 1831, 675; in 1841, 746.

LLANHOWEL, a parish in Pembrokeshire, 4½ m. NE by E of St. David's. Pop. in 1841, 160.

LLANHYCHAN, or Llanychan, a parish in Denbighshire, 2½ m. N of Ruthin, on the river Clydd. Pop. in 1831, 115; in 1841, 111.

LLANIDAN, a parish in Anglesey, 5 m. NE of Carnarvon, including the chapelry of Llanfair-yn-y-Cwmmwd. Pop. in 1831, 969; in 1841, 1,409.

LLANIDLOES, a parish and borough in Montgomeryshire, 19 m. SW by W of Montgomery, on the Severn. The p., besides the borough, comprises the townships of Kilmarham, Manleth, Birthdir, Treflyn, and Cross-Lloybin, including large tracts of waste lands on the slope of Plinlimmon. Pop. in 1801, 2,282; in 1831, 4,189; in 1841, 4,261.—The town is situated in a pleasant vale watered by the Severn, and surrounded nearly on all sides by high hills. It consists of two principal streets crossing each other at right angles, and of several inferior ones. Many of the houses were formerly built with timber frames, the intervals being filled up by laths and mud, and some were roofed with slabs of oak timber cut into the form of slates. New erections, however, of better construction have superseded the older structures, and the town has assumed a more cheerful and agreeable aspect. The town-house is a massy building, erected in the old frame-work style. In the vicinity of the town are several handsome residences. Tourists generally commence their route to the steep Plinlimmon from this place. L. was formerly a contributory borough to Montgomery. It is one of the polling-places for the co. The principal manufacture conducted in the town and vicinity is flannel, which has been extensively carried on from a very remote period. There are several factories for carding and spinning the wool, and fulling mills. In and around the town are several tanyards, flour-mills, and malt-houses.

LLES, a town of Spain, in Catalonia, in the prov. of Lerida, partido and 11 m. NE of Seo-de-Urgel. Pop. 585. The surrounding country is mountainous but fertile, and affords pasturage to large numbers of sheep.

LLEVENNY, a river in Breconshire, which, issuing from the great pool of Langors, joins the Wye near Pipton.

LLIMIANA, a town of Spain, in Catalonia, in the prov. and 39 m. NNE of Lerida, in a mountainous locality. Pop. 806.

LLINFI, a river in Glamorganshire, which rises near the centre of the co., and falls into the Ogmore at St. Bride's Minor.

LLIVIA, a town of Spain, in Catalonia, in the prov. of Gerona, and partido of Ribas, 6 m. NNE of Puycerda, near the sources of the Sègre. Pop. 975. It has a large parish-church, and possesses manufactories of hosiery. This town, the *Julia Libyca* or *Julia Livia* of the ancients, was taken by the Moors in 732.

LLOBREGAT, a river of Spain, which has its source in the Pyrenees, in the prov. of Barcelona, 1½ m. N of Pobla-de-Lillet, runs S across a portion of the prov. of Lerida, re-enters that of Barcelona, receives on the r. the Cardenet and the Noya, and on the l. the Gavarresa and Golarda, and after a total course, in a generally WSW direction, of 105 m., falls into the Mediterranean 60 m. WSW of Barcelona.—Also a river of Spain, which has its source on the French frontier, in the Pyrenees, 1½ m. E of Bellegarde; runs first S, then SE; receives on the r. the Ricardel, Muga, and Manol, and on the l. the Net and Orlina; and after a total course of about 75 m., throws itself into the gulf of Rosai.

LLOMBAY, a town of Spain, in the prov. and 17 m. SW of Valencia, and partido of Carlet, on the r. bank of the Guanes. Pop. 1,450. It has a convent and a chapel, and possesses 2 distilleries of brandy and a manufactory of white lead.

LLORET, a town of Spain, in Catalonia, in the prov. and 27 m. S of Gerona, and partido of Santa-Colomba-de-Farnés, on the Mediterranean. Pop. 2,998. It has a parish-church and an hospital.

LLORITA, a town in the island of Palma, Baleric islands. Pop. 996. It has a parish-church, and a custom-house. Cattle are extensively reared in the environs.

LLOSA-DEL-OBISPO, a town of Spain, in the prov. and 48 m. WNW of Valencia, and partido of Villar-de-Benaduf, or Del-Arzobispo. Pop. 799.

LLOSA-DE-RANES (La), or Llosa, a town of Spain, in the prov. of Valencia, 3 m. N of S. Felipe. Pop. 1,300. Rice, millet, and mulberries are extensively cultivated in the environs.

LLOUGHOR, a river in Glamorganshire, which flows S from the mountains which enclose Llandilo; receives in its course the Ammon, the Cathan, and other tributary streams; is tidal for about 4 m.; and after dividing, for some distance, the cos. of Carmarthen and Glamorgan, falls into the Bristol channel, at Carmarthen bay.

LLOUGHOR, or Loughor, a parish and borough in Glamorganshire, 7 m. W by N of Swansea, on the E bank of the river Lloughor. Pop. 854. Under the reform act, L., in conjunction with Swansea, Neath, Aberavon, and Kenfig, returns a member to parliament. Coal is raised within the borough and exported. There are also zinc works, and a manufactory for pyroligneous acid. Vessels of 200 tons burthen come up to the wharf above the town.

LLOWIS, a parish in Radnorshire, 3 m. W of Hay, on the W bank of the Wye. Pop. in 1841, 390.

LLOYD, an island in the group of New Shetland islands, Southern ocean, to the W of Livingston island, in S lat. 62° 50′, and W long. 61° 30′.

LLOYD'S BAY, a bay on the NE coast of New Holland, between capes Weymouth and Direction, in S lat. 12° 50′, and E long. 143° 20′. It is about 12 m. in length, and 3 m. in breadth.

LLUCHENT, a town of Spain, in the prov. of Valencio, and partido of Gandia, 9 m. E of S. Felipe, on the Albayda. Pop. 998. It has a convent and an hospital.

LLUGWY, a river in Carnarvonshire, which falls into the Conway near Bettws-y-Coed.

LLUMAYOR, a town in the island of Majorca, partido and 19 m. ESE of Palma, and 18 m. WSW of Manacor, in a fine plain extending to the sea. Pop. 7,112. The streets are regularly laid out, and the houses well-built. It contains a parish-church, a convent, and a custom-house, and has manufactories of linen, coarse woollen fabrics, hats, and distilleries of brandy. L. was built in 1300 by Jayme II. The surrounding plain is noted for the battle in which Jayme III. lost, with his life, the crown of Majorca. In the vicinity of this town, on a lofty, isolated eminence, is a college, dependent upon the university of Palma.

LLUMERES, a harbour and roadstead of Spain, in the Asturias, in the prov. of Oviedo, to the SE of Cape Penas, in N lat. 43° 37′, and W long. 7° 19′.

LLYSDINAM, a hamlet in the parish of Llana-

fanfawr, Breconshire, 6 m. NW of Builth. Pop. in 1831, 213; in 1841, 252.

LLYSFAEN, a parish locally in Denbighshire, belonging to the union of Conway, co. of Carnarvon, 3 m. W of Abergele. Pop. in 1841, 679.

LLYSVAEN, or Lisvane, a parish in Glamorganshire, 5 m. N by E of Cardiff. Pop. in 1841, 207.

LLYSWEN, a parish in Breconshire, 6½ m. SW of Hay, on the river Wye. Pop. in 1841, 172.

LLYSWERNI, or Lisworney, a parish in Glamorganshire, 2½ m. E by S of Cowbridge. Pop. in 1831, 189; in 1841, 175.

LLYSYFRAN, or Llys-y-vrane, a parish in Pembrokeshire, 8 m. NE of Haverfordwest. Pop. in 1831, 202; in 1841, 191.

LLYWELL, or Llewyllt, a parish in Breconshire, 12 m. W of Brecon, including the hamlets of Trayan-Hase, Trayan-Mawr, and Ysclydach. Pop. in 1831, 1,699; in 1841, 1,684.

LO (Saint), an arrondissement, canton, commune, and town of France, in the dep. of the Manche. The arrond. comprises an area of 112,796 hect., and contains 9 cant. Pop. in 1831, 99,250; in 1841, 100,008.—The cant. comprises 11 com. Pop. in 1831, 13,480; in 1841, 13,887.—The town is 18 m. ENE of Coutances, and 195 m. W of Paris, on the r. bank of the Vire, which is here crossed by a handsome bridge, at an alt. of 403 ft. above sea-level, and in N lat. 49° 7′, and W long. 14° 12′. Pop. in 1789, 3,774; in 1821, 8,271; in 1831, 8,421; in 1841, 8,951. It is irregularly built, but contains a fine square; an ancient cathedral remarkable for the magnificence of its cloisters, and the richness and elegance of its architecture; and a church, built in 805, and forming a very perfect and highly ornate specimen of Saxon architecture. There are besides several other churches, a town-house, a justiciary-hall, a college, a normal and a mathematical school, a public library, 6 printing establishments, an hospital, a theatre, and a public bathing-establishment. It possesses manufactories of fine cloth, ticking, flannel, serge, dimitty, calico, druggets, tape, lace, woollen shawls, cutlery, &c.; several bleacheries and dye-works, cotton and wool spinning-mills, and several tanneries. The trade, which is considerable, consists chiefly in cattle, horses, fowls, corn, salt butter, cider, honey, wax, iron, and yarn. In the environs are several slate-quarries. This town is supposed by some to be the ancient *Briovera;* by others, its origin is attributed to a church built in the locality in the 6th cent. by a bishop of Coutances.

LOA, a port of Peru, in the intendancy and 420 m. SSW of Arequipa, prov. and 90 m. S of Tarapaca, at the mouth of a river of the same name, which, after a course in a generally SW direction of about 60 m., throws itself into the Pacific, and forms the boundary line between Bolivia and Peru.

LOACHAN. See Laos.

LOAD, or Long-Load, a chapelry in Martock parish, in Somersetshire, 4 m. SSW of Somerton, between the rivers Parret and Yeo.

LOANDO (Saint Paul de), an island and town of SW. Africa, on the Angola coast. The town, which is situated in 8° 55′ S lat., and is the cap. of all the Portuguese settlements in S. Africa, was founded in 1578. It covers a great extent of ground, but is neither walled nor fortified; and its churches and principal public buildings are falling to decay. The white pop. is estimated at 3,000; the number of Negroes is much greater. Provisions are plentiful and cheap; but the water is extremely bad, and must be brought either from a neighbouring river, or from the island of L. Its principal commerce consists in slaves and ivory. This city contains 3 convents, and is the seat of a bishop. The country in the vicinity is parched and sandy.—The island, which is separated from the continent by a narrow strait, is about 18 m. in length, and 1 m. in breadth. The citizens of St. Paul de L. have numerous country-houses and gardens upon it, the air being reckoned salubrious. The harbour is 3½ m. in length, deep and commodious.

LOAN-END, a township in Norham parish, co. of Durham, 4 m. SW of Berwick-upon-Tweed. Area 850 acres. Pop. in 1831, 147; in 1841, 155.

LOANGHILLI, or Loanghiri, a village of Lower Guinea, in the kingdom and 6 m. S of Loango. It is noted as the place of sepulture of the kings of that country.

LOANGO, a district of SW. Africa, which formerly made part of the kingdom of Congo, bounded on the N by Mayomba; on the NE by Congo; on the S by Cacongo; and on the W by the Atlantic. Its length is said to be 250, and its breadth 188 m.; according to other authorities, it extends from N to S only 180 geog. m. Its climate is good; rain seldom falls, but heavy dews support vegetation. During the winter-months of May, June, and July, the nights are cool, but without being chill. The soil is a red stiff clay, exceedingly fertile; but the only grains cultivated by the indolent inhabitants are manioc, maize, and a species of pulse. The mode of culture is slovenly in the extreme; and slight as it is, is confined to little spots like gardens situated round the villages. The rest of the country is covered with luxuriant herbs rising to the height of 8 ft., through which it is almost impossible to force one's way. These shrubs grow, ripen, and wither, without being applied to any use; but the natives sometimes set them on fire, thus producing an extended conflagration over the whole country. Many European vegetables attain here an extraordinary size. The wild animals are chiefly tiger-cats, ounces, and hyænas; the hare and antelope are common, and the Chinese hog is used as a domestic animal. Monkeys are innumerable; also the *termes*, or white ants, a pernicious insect, common to the whole W coast of Africa.—The natives of L. are described as being black, well-made, and of an amiable disposition. Their dress consists of a kind of petticoat, while the upper part of the body is covered with a leopard's skin. The head is covered with a cap made of grass. The petticoats of the women are of straw; on their legs they wear strings of shells, and bracelets of ivory on their arms. They smear their bodies with palm-oil, and a kind of red wood reduced to powder, instead of paint. Polygamy is universally practised. The king receives his revenue in the produce of the country; but his chief wealth is said to consist in the possession of a great number of slaves. The trade consists chiefly of ivory, copper, tin, lead, and slaves.—L. has been usually, but upon what authority we know not, divided into the provinces of Lovangiri, Loangomongo, Chilingo, and Piri.—The cap. is Loango, called by the Negroes Boari or Bouali, situated a little to the SE of the mouth of the Killow, and said to have a pop. of 15,000.—The river L. has its mouth in S lat. 4° 39′, E long. 11° 47′. It is supposed to have a total course of about 60 m.

LOANHEAD, a village in the p. of Lasswade, Mid-Lothian, 5 m. SE of Edinburgh, between Lasswade and Roslin, and about ½ a mile from the l. bank of the North Esk.

LOANHEAD-BY-DENNY, a village in the p. of Denny, Stirlingshire, 5 m. W of Falkirk, and 4 m. NE of Cumbernauld.

LOANO, a town of Sardinia, capital of a mandemento, in the div. of Genoa, prov. and 5 m. N of Albenga, and 7 m. SSW of Finale, in the gulf of Genoa. Pop. 3,000. It has a custom-house. The

adjacent fisheries form the chief object of local industry.

LOARRE, a town of Spain, in Aragon, in the prov. and 19 m. NNW of Huesca, and partido of Jaca. Pop. 380.

LOBAU, an island of the Danube, in the lower circle of the Wienerwalde, 6 m. ESE of Vienna. It is nearly 3 m. in length, and 1½ m. in breadth. After the battle of Aspern, the French army withdrew into this island.

LOBAU, Liebe, or Lobijo, a town of Saxony, in the circle of Lausitz, 12 m. SE of Bautzen, and 18 m. NNW of Zittau, on the l. bank of a river of the same name, and on the Saxon-Silesian railway from Dresden to Zittau. Pop. 2,530. It has manufactories of linen and several bleacheries, and carries on a considerable trade in grain. In the vicinity are several mineral springs. A fine species of quartz, known as the diamond of Lobau, is found in the environs.

LOBAU, Lubau, or Lubawa, a circle and town of Prussia, in the prov. of W. Prussia and circle of Marienwerder. Pop. of circle 21,127. The town is 16 m. SSW of Osterode, and 39 m. ESE of Marienwerder, on the Jasienka and Sandualla. Pop. 2,736. It is enclosed by walls, and has a suburb, a fine castle, a convent, and 2 hospitals, and possesses several distilleries and breweries, and several spinning-mills. Linen and flax form its chief articles of trade.

LOBBERICH, a village of Prussia, in the reg. of Dusseldorf, 7 m. WSW of Kempen. Pop. 1,200, chiefly silk weavers.

LOBBES, a commune and town of Belgium, in the prov. of Hainault, dep. and 10 m. SW of Charleroi, on the l. bank of the Sambre. Pop. 2,274.

LOBBRA, a river of Asiatic Russia, in the gov. of Perm, descending from the Ural chain, and flowing ESE to its junction with the Sosva.

LOBEDA, a village of Saxe-Weimar, on the r. bank of the Saale, 3 m. E of Jena. Pop. 731.

LOBEID, Lobehd, or El-Obeid, the cap. of Kordofan, in N lat. 13° 10′, E long. 30° 10′, 10 days' journey from Khartum. It is composed of several large villages grouped together, and distinguished by the names of their inhabitants. It is reported to have a pop. of upwards of 30,000. The *toguls* or mud huts are round or tail-shaped, with conical roofs composed of reeds. Its general appearance, in dry weather, is dreary and desolate; but in the spring, the richness of the verdure, interspersed with flowers of various and most brilliant colours, gives it an aspect so different that it is difficult to imagine it the same place. Its mud huts require to be renewed almost every year after the rainy season. Business is for the most part carried on in the morning at sunrise, in order to avoid the heat of the day, which is insupportable. Amongst the various branches of traffic here pursued that of selling slaves is the most conspicuous and revolting.

LOBEJUN, a town of Prussian Saxony, 29 m. N by W of Leipsic. Pop. 2,660.

LOBENDAU, a village of Bohemia, in the circle and 36 m. NNE of Leitmeritz. Pop. 1,800, chiefly employed in linen-weaving.

LOBENSTEIN, a town of the principality of Reuss-Lobenstein, in Upper Saxony on the Lemnitz, 26 m. N of Bayreuth. Pop. 4,180.

LOBERA, a town of Spain, in the prov. of Saragossa, 12 m. E of Sanguesa, on the l. bank of the Onsella. Pop. 300.

LOBITH, a small town of Prussian Westphalia, in the duchy of Cleves, on the Rhine.

LOBNITZ, a large village of Prussian Saxony, 20 m. N by E of Leipsic.

LOB-NOV, a town of Chinese Turkestan, in N lat. 40° 50′, stretching between the meridians of 87° 30′ and 89° E.

LOBON, a town of Spain, in the prov. and 18 m. E of Badajoz, near the left bank of the Guadiana. Pop. 1,200.

LOBOS, or Seal Islands, a group of islands, 3 in number, off the coast of the prov. of Lambayeque, in Peru. The northernmost and largest island, known as Lobos-de-Tierra, is 5 m. in length, and 2 m. in greatest breadth. It has good anchorage on its NE side, in 6 fath. water, in S lat. 6° 25′, W long. 80° 52′.—About 10 leagues to the SSE of L.-de-Tierra, are two islets, distinguished as Lobos-de-Fuera, separated by a narrow channel about a cable's length in width, the largest of which is 2 m. in length, by ¾ m. broad, and lies SE and NW. The smaller, lying nearly N and S, is about 1½ m. in length, and nearly 1 m. broad; and forms with the other two snug capacious bays. The best anchorage is in the E bay, off the NE point of the southernmost island, in 8 fathoms water, in S lat. 6° 57′, W long. 80° 44′ [*Captain Peacock*]. These islands abound with seals and sea-birds; and are covered with guano in the sheltered parts. In *Morrell's Four Voyages*, a book published at New York in 1832, is a minute account of these islands, and among other particulars the following passage: "The Indians sometimes visit these islands in large parties on fishing excursions or frolics; and frequently stay three or four weeks. I have always found them to be very civil and accommodating, having frequently received kind offices at their hands, such as presents of fruit, vegetables, &c., from the main. They always bring their fresh water with them in their catamarans, as there is none to be found in the islands, which are covered with sand, rocks, and the dung of aquatic birds; the latter sufficient to load thousands of ships, having been accumulating for untold ages. It is called *guannar* by the Spaniards, and is probably the richest manure in the world."

The Peruvian government issued a decree in 1833 expressly forbidding foreign vessels from fishing, killing seals, or frequenting the coasts of these islands, without license from the state; and when the question was raised by an attempt to seize the Campeadora at Lobos, Lord Palmerston gave it as his opinion that as these islands are and always have been considered to be part of the territory of Peru, it appeared to him that the Peruvian government had a right to prohibit foreign vessels from fishing there. In 1842 another British vessel, the Hibernia, was seized for violating this decree, and in the opinion of her Majesty's government, no redress could be demanded, as she had been arrested and tried for a legal offence. The demand for guano in Europe, of course, enormously increased the importance of these possessions. In 1841 the Peruvian government established a monopoly in the export of guano found on its own territories, and determined that the places of deposit should be protected by armed steamers; and in 1847 a careful survey and report were made on the islands, with an estimate of the quantity of guano existing there, because apprehensions were entertained by the Peruvians that all their manure would be carried off and consumed by foreigners. The L. isles were included in this survey, L.-de-Tierra being supposed to contain 150,200 cubic yds. of the deposit, and L.-de-Fuera 531,436 cubic yds. A semi-official notice, in April 1852, intimates that "by virtue of decrees now in force, no vessel, either under the national or any foreign flag, has a right to go to the Peruvian guano deposits, without first obtaining permission from the Peruvian government, under penalty of confiscation; that foreign vessels furnished with government licenses are allowed to load at the Chincha islands only; that the islands of L.-de-Tierra and L.-de Fuera, as well as those of Guanape, Malabrigo, and other localities N of Callao, where deposits of guano exist, as also some of the deposits in the prov. of Tarapaca, are purposely kept uninhabited and unfrequented by order of the government, in order that the birds may be left undisturbed, and thus a constant increase of the deposits be promoted; that from time immemorial the fishermen of Lambayeque have been accustomed to inhabit the L.-de-Tierra and L.-de-Fuera, but for some years' past the Peruvian government have prohibited their so doing, in consequence of their destroying thousands of birds and bringing away boat-loads of eggs; that since the commencement of the export of guano to Europe, all the deposits belonging to the republic of Peru have been surveyed and measured by orders of the government; and that any attempt to load vessels without the proper license would subject

them to be seized and confiscated." The question as between Great Britain and Peru is now settled by the virtual recognition of the claims of Peru by our government. Lord Malmesbury having explicitly declared that "however advantageous it might be to Great Britain to appropriate these islands, or declare them common property, it is impossible for her Majesty's government to violate international law for national interest;" whilst in other communications from the foreign office the sovereignty of Peru is distinctly admitted. It appears, however, that the accounts of the quantity of guano to be found on the L. islands has been greatly over-rated. This will be more clearly seen from the subjoined statement of the three great guano deposits, as laid down in the surveys instituted by the government of Peru:—

Sections.	Deposits.		
South .	Chipana . . .	280,602 tons	
„ .	Huanillos . .	1,612,505	
„ .	Punta-de-Lobos	1,460,790	
„ .	Pabellon-de-Pica	2,975,050	
„ .	Puerto Inglés .	1,292,510	
			7,621,407
Centre .	Northern island	7,600,000	
„ .	Middle island .	6,450,000	
„ .	Southern island .	4,200,000	
			18,250,000
North .	Lobos-de-Tierra	476,858	
„ .	Lobos-de-Fuera .	265,718	
„ .	Guanape . . .	70,810	
„ .	Ferrol	30,700	
			854,086
	Total tons		27,024,493

This statement shows how small is the quantity of guano to be found on the L. islands compared with the other vast deposits, the right to which has never formed matter of dispute. Were the former to be thrown open to the world, it is by no means improbable that they would be exhausted in 12 months. It is also stated that, in consequence of a considerable portion of this guano being produced by the seals (lobos), some of it is less valuable by 25 per cent. than the produce of the Chincha islands. We believe the Peruvian government may shortly be expected to perceive the necessity of relaxing its regulations with regard to that important article of trade which has recently been discovered on its islands and coasts. "It is evidently in the interest of both parties that the trade should be carried on with as few vexatious restrictions as possible, and that the price should not be immoderately raised by the Peruvian monopoly. The existence of claims to a tenure which it is impossible for Peru to defend by physical force ought to operate as an inducement to that government to avoid all just cause of complaint on the part of foreign nations, all of which have now in their power so easy a means of retaliation. It may be hoped, moreover, that among the countless rocks and islands of the Pacific occasionally visited by British cruisers, other deposits of the same valuable kind may be discovered, and, in that case, measures ought at once to be taken to secure to the Crown the possession of such territories, not forming part of the dominions of any other state."

LOBOS, one of the smaller Canary islands, being little more than a rock, near the N point of Forteventura, in N lat. 28° 45′.—Also a small island on the coast of Mexico, opposite the bay of Tampico, in N lat. 22° 28′.—Also a small island in the Atlantic ocean, off the coast of Cuba.—Also a small island in the Atlantic, near the coast of Africa, in N lat. 21° 25′.—Also a small island at the mouth of the La Plata, 15 m. SW of Cape St. Maria.—Also a cluster of small islands in the S. Pacific, near the coast of Chili, in S lat. 52°.

LOBOSITZ, a town of Bohemia, in the circle and 4 m. WSW of Leitmeritz, on the l. bank of the Elbe. Pop. 1,322.

LOBO-YACU, a small river of Quito, in the prov. of Mainas, which enters the Pastaza.

LOBSANN, a village of France, in the dep. of Bas-Rhin, cant. and 2 m. NW of Soultz-sous-Forets.

LOBSENS, or Lobzeniko, a town of W. Prussia, on the Lobzanka, 57 m. WNW of Thorn. Pop. 2,720.

LOBSTEDT, a village of Saxony, 15 m. SSE of Leipsic, on the right bank of the Pleisse.

LOBURG, a town of Prussian Saxony, 22 m. E of Magdeburg. Pop. 1,950.

LOCAM, a village of France, in the dep. of Cotes-du-Nord, cant. of Mael-Carhaix, 21 m. SW of Guingamp. Pop. 1,100.

LOCANA, a town of the Sardinian states, in Piedmont, on the river Orca, 23 m. NW of Turin. Pop. 5,384.

LOCARNO, one of the Italian bailiwics, ceded to Switzerland by the duke of Milan in 1512, on the NW coast of Lago Maggiore. Its length is about 15 m.; its breadth about 12.—The cap. of the same name, and the chief place of the Swiss cant. of the Ticino, is situated near the lake, 23 m. SW of Chiavenna. Pop. 2,676, Catholics.—Also a town of the Sardinian states, in the division of Novara, 21 m. NE of Biellas, on the r. bank of the Sesia. Pop. 1,600.

LOCCUM, a town of Hanover, 26 m. WNW of the city of Hanover. Pop. 1,500.

LOCHABER, a district of Inverness-shire, bounded on the E by Badenoch; on the S by Athol and Rannoch; on the W by Moidart; and on the N by the lakes and rivers which occupy the Great Caledonian glen. It is perhaps one of the most dreary, mountainous, and barren districts in Scotland. The chief produce of the country is black cattle, for which it has been long famed. The final stand of the wolf in Great Britain was made in the Lochaber mountains, a region in appearance well-calculated for the kennel or retreat of these ferocious animals, where, in 1680, the last fell by the hand of Sir E. Cameron of Lochiel.

LOCH-ACHRAY. See Achray.

LOCH-ALINE. See Aline.

LOCHALSH, a parish on the W coast of Ross-shire, in length about 28 m. The *kyle*, or narrow sea, which separates the island of Skye from the mainland of Scotland, is its W boundary. The superficial area is about 55,000 Scottish acres, of which 1,500 only are under tillage, and about 2,000 under wood. Pop. in 1831; in 1841, 2,597.

LOCHANS, a village in the Rhinns of Galloway, 1½ m. from Stranraer. Pop. 200.

LOCH-ARD. See Ard.

LOCHAR-MOSS, an extensive morass, intermediate between the lower parts of Nithsdale and Annandale, in Dumfries-shire, and distributed among the ps. of Dumfries, Caerlaverock, Tinwald, Torthorwald, Mousewald, and Ruthwell. It stretches N from the Solway frith, in a stripe 10 m. long, and from 2 to 3 m. broad; and, over its whole extent, is nearly a dead level.

LOCHAR-WATER, a small river of Dumfries-shire, cutting Lochar-moss lengthways into nearly equal parts. Before losing itself in the Solway, it forms an estuary, 1½ m. in length, and a ½ m. in mean breadth. The stream is in the last degree sluggish; from head to foot of Lochar-moss—a course, including windings, of at least 12 m.—it has a fall of only 11 ft.

LOCH-AWE. See Awe.

LOCHBROOM, a parish in Ross-shire, bounded by Assynt on the N; Kincardine and Contin on the E; Gailloch on the S; and the Minsh on the W. It is of an irregular figure, and is computed to be 36 m. long, and 20 m. broad. The greater part consists of wild uncultivated mountains and hills. The parish is divided into four districts: namely, the Aird, Lochbroom Proper, the Little Strath, and the Laigh. There is a mountain-lake called Loch-Broom, about 3 m. in length, and 1 in breadth; from which a rapid river called the Broom or Braom descends into the Big-loch. Besides the harbour of Ullapool, the whole coast is indented with numerous safe bays. The islands of Ristal, Tancra, Isle-Martin, Isle-Greenyard, and the Summer-isles, belong to this p. Pop. in 1801, 3,533; in 1831, 4,615; in 1841, 4,799.

LOCHCARRON, a parish in Ross-shire, situated on an arm of the ocean, into which the river Carron falls. It is upwards of 14 m. long, and from 5 to 6 m. broad. Pop. in 1831, 2,136; in 1841, 1,960.

LOCH-CATHERINE. See KATRINE.

LOCHE', a commune of France, in the dep. of the Indre-et-Loire, cant. and 5 m. S of Montresor, on the l. bank of the Indroye. Pop. 1,387.

LOCHEE, a manufacturing village in Forfarshire, 1½ m. NW of Dundee, included within the parliamentary boundaries of that borough.

LOCHEM, a town of Holland, in the prov. of Gelderland, arrond. and 10 m. E of Zutphen, on the l. bank of the Borkel. Pop. 1,550. It has manufactories of aqua-fortis.

LOCHES, a commune of France, in the dep. of the Aube, cant. of Essoyes, 8 m. ESE of Bar-sur-Seine, on the l. bank of the Ource. Pop. 1,039. Wine is extensively cultivated in the environs.—Also an arrondissement, canton, commune, and town of France, in the dep. of the Indre-et-Loire. The arrond. comprises an area of 179,834 hect., and contains 6 cants. Pop. in 1831, 61,548; in 1841, 62,679. The cant. comprises 18 com. Pop. in 1831, 17,072; in 1841, 16,690. The town is on the l. bank of the Indre, which here divides into several branches, 22 m. S of Amboise, and 25 m. SE of Tours. Pop. in 1789, 4,524; in 1821, 4,558; in 1831, 4,774; in 1841, 4,509. It is built amphitheatrally, on a hill, the summit of which is occupied by an ancient fortress. The houses are old, and the streets narrow. The principal building is the castle, a large and formerly strong edifice, converted by Louis XI. into a state-prison. There are besides a communal college, an hospital, and 2 printing establishments. Several fine promenades run along the branches of the river, which are here crossed by bridges, communicating with the small town of Banlieu. The industry of the town consists chiefly in the manufacture of coarse cloth, paper, leather, cordage, and dyed goods. Wine, timber, wool, and cattle, form its chief articles of trade.

LOCH-GAIR. See GAIRLOCH.

LOCHGAU, a town of Würtemberg, in the circle of the Neckar, bail. and 6 m. SSE of Brackenheim, and 9 m. NNW of Louisburg, on the Steinbach. Pop. in 1840, 1,647. An engagement took place here between the French and Austrians on the 3d Nov. 1799.

LOCH-GELLY, a village in the p. of Auchterderran, Fifeshire, 8 m. NW of Kirkcaldy, and 6 m. E of Dunfermline. Pop. 770, chiefly weavers and colliers.

LOCHGILPHEAD, a village in Argyleshire, at the N extremity of Loch-Gilp, having daily communication with Glasgow and Inverary by the steamboats on Loch-Fyne and the Crinan canal. Pop. 1,300.

LOCHGOILHEAD, a parish in Argyleshire, in the district of Cowal, to which that of Kilmorich is joined. The united p. is about 30 m. in length, and from 6 to 20 m. in breadth, and lies along the W coast of Loch-Long. It receives its name from the local situation of the church, at the head of Loch-Goil, a small arm of the sea which runs off in a NW direction from Loch-Long. Pop. in 1841, 1,018.

LOCH-IN-DAAL, an arm of the sea deeply indenting the S side of the island of Islay. It is shallow, but abounds in fish, and is much resorted to by shipping.

LOCHLEE, a large parish in the extreme N of the Grampian district of Forfarshire. Area about 104 sq. m. Everywhere, except over 6½ m. on the E, it is hemmed in by a water-shedding line of mountains. Its whole surface is ruggedly highland, consisting of wild and high mountain-ranges, partially and narrowly cloven asunder by glens. Mount Keen and Mount Battoch, both on the boundary, the former on the N, and the latter on the NE, rise respectively 4,000 and 3,465 ft. above sea-level. Other summits along the boundary and in the interior attain alts. of from 2,000 to 3,000 ft. Only a trifle more than one-fourth of the area is inhabited; all the rest being mountain-wilderness, or the free walk of the wandering flock. All the head-streams of East water, or the N. Esk, rise in the p., and swell the stream to considerable bulk before it passes into Edzell. A little to the S of the centre of the p., and in the course of the river Lee, is a beautiful little lake, 1¼ m. long, and 3 furl. broad, which imposed its own name on the whole p. Pop. in 1841, 622.

LOCH-LINNHE. See LINNHE (LOCH).

LOCHMABEN, a parish in Annandale, Dumfriesshire. Area 10,750 acres. The river Annan, in mazy folds, runs along most of the E boundary; the Kinnel runs diagonally across the N end. The Ale runs 1 m. on the NW boundary. So expansive and almost continuous are the lakes of this p., that the ancient borough, which stands amongst them, appears from the rising grounds which command a view of it to be situated on an island in the midst of a curiously outlined inland sea. The lakes are 8 in number. Nowhere do they at any season exceed 52 ft. in depth; over a great aggregate extent they are shallow; and in many places, from the shore inward, they are thickly overtopped with reeds. Pop. in 1801, 2,053; in 1831, 2,795; in 1841, 2,809. The grand attraction of the p. is the paternal residence of the Bruce. L.-castle, which stands 1 m. from the borough, on the extreme point of a heart-shaped peninsula, juts a considerable way into the S side of the Castle-loch.—The borough of L. is beautifully situated on the immediate banks of nearly encincturing lakes, 4 m. from Lockerby, and 8 m. from Dumfries. The church is a handsome edifice, with a square tower. A considerable manufacture of coarse linen cloth, for sale unbleached in the English market, was at one time carried on here, but has totally disappeared. The only manufacture now is the working of a few stocking-looms. A large trade is driven, both in the town and throughout the p., in the feeding of pigs. A large proportion of the inhabitants farm small crofts, and rear their families as a sort of peddling farmers. L. unites with Dumfries, Annan, Sanquhar, and Kirkcudbright, in sending a member to parliament. Constituency in 1839, 41; in 1848, 32. Pop. in 1831, within the limited royalty assigned by the reform act, 966.

LOCH-NA-GAR, or LOCH-NA-GARAIDH, a lofty mountain of the Grampian ridge, in the p. of Crathy and Braemar, Aberdeenshire. Its elevation is 3,777 ft. above sea-level. The view from its summit extends in one direction to the sea at Aberdeen; in another, towards the vast granite group of Cairngorm, with its well-known summits, viz., Ben-na-muick-dui, Cairngorm, Ben-na-buird, Ben-Aven, rises before us; to the S, in the distance, is the trap-hill named Dundee-law, the trap cones of the Lomonds in Fifeshire, and the porphyry range of the Pentlands near Edinburgh; and towards the W, the wild and alpine country of Athole and Badenoch.

LOCH-NA-GAUL, an inlet of the Atlantic ocean, on the confines of Inverness-shire and Argyle, nearly opposite to the point of Sleat in the island of Skye. There is an excellent road from Arisaig, on the shores of this loch, to Fort-William, with a ferry over the Lochy river.

LOCHRUTTON, a parish in the E division of Kirkcudbrightshire. Area about 7,000 acres. A little E of the centre of the p. is Loch-Rutton, a lake 1 m. in length, and a ½ m. in mean breadth. Pop. in 1831, 650; in 1841, 659.

LOCH-RYAN. See RYAN (LOCH).

LOCHS, a parish in Ross-shire, in the island of Lewis, so named from the great number of small

lakes which are interspersed over its surface. It is about 18 m. in length, exclusive of numerous inlets which extend its line of coast to upwards of 90 m.; the average breadth is about 9 m. A great part of it is a peninsula, called the Forest of Lewis, formed by Loch-Seafort and Loch-Erisort. Pop. in 1801, 1,875; in 1831, 3,067; in 1841, 3,653.

LOCHT, a commune of Belgium, in the prov. of Antwerp, dep. of Konings-Hoyckt. Pop. 225.

LOCHTY, a small river in Fifeshire, which, after an E course of 8 or 9 m., falls into the Orr, a little above its junction with the Leven.

LOCHWINNOCH, a parish in Renfrewshire. Area 19,219 acres, of which 9,000 are cultivated or capable of cultivation; 9,119 are in pasture; 700 are covered by wood; and 300 by water. The highest hills in the co. are situated in the W extremity of this p. One of these heights, called Misty-law, is about 1,240 ft. above the level of the sea; another, the hill of Staik, is a few feet higher. The river Calder, rising on the NW, on the borders of Ayrshire, pursues a winding course towards Castle-Semple loch, which it enters near the v. The bleaching of goods is extensively carried on in this p. A considerable proportion of the pop. are hand-loom weavers employed by Paisley and Glasgow houses. Pop. in 1831, 4,515; in 1841, 4,716.—The v. of L., on the NW side of Castle-Semple loch, consists of a main street a ½ m. long, with some streets crossing it at right angles. It is distant 9½ m. from Paisley. Pop. of v. in 1841, 2,681.

LOCHY, a river of the Glenmore-nan-Albin in Inverness-shire. It issues from the SW end of Loch-Lochy by a new channel artificially cut for it, about 600 yds. SE of the point at which the lake receives the Caledonian canal. Its length of run is about 10 m., generally parallel to the line of the canal, and it falls into Loch-Eil at Fort-William, within a few yards of the embouchure of the Nevis.—Also a small river of Breadalbane, Perthshire, rising on the N side of Benchallin, and flowing into the Dochart a little above the entrance of that river into Loch-Tay, after a course of 15 m. It gives the name of Glenlochy to the vale which it traverses.

LOCHY (Loch), a lake in the district of Lochaber in Inverness-shire, forming one of the chain of lakes which occupy a large portion of Glenmore-nan-Albin, or 'the Great glen of Scotland.' It is about 14 m. long, and not more than 1 m. broad. Its boundaries on either side, throughout its whole extent, are lofty mountains, which rise up sudden and unbroken. From Loch-Lochy to Loch-Linnhe, a long dreary flat moss extends for about 10 m., of which but a small portion has been attempted to be cultivated. Through this moss the river Lochy flows.

LOCKE, a township in Cayuga co., in the state of New York, U. S., 20 m. S of Auburn. Pop. 1,654.

LOCKEHAUS, or Leka, a town of Hungary, in the com. of Eisenburg, 6 m. W of Güns. Pop. 1,100.

LOCKENITZ, a village of Prussian Pomerania, in the reg. and 15 m. W of Stettin. Pop. 360.

LOCKERBY, a neat, stirring, and prosperous little town in the p. of Dryfesdale, Dumfries-shire, on the railroad between Glasgow and Carlisle, 4 m. from Lochmaben, and 12 m. E of Dumfries; and has a station on the line of the Caledonian railway, 26 m. from Carlisle, 74 m. from Edinburgh, and 79 m. from Glasgow. The lamb-fair held here on the 2d of Aug. is the largest in Scotland, from 30,000 to 40,000 lambs being usually on the ground. During winter also, there are, chiefly for the sale of pork, weekly markets. Pop. in 1841, 1,315.

LOCKERLEY, a parish in Southamptonshire, 5½ m. SW of Romsey, intersected by the Salisbury and Southampton canal. Area 1,390 acres. Pop. 558.

LOCKHAY, or Loko, a chapelry in Spondon p., Derbyshire, 4½ m. NE by E of Derby.

LOCKING, a parish in Somersetshire, 6 m. NW of Axbridge, crossed by the Bristol and Exeter railway. Area 980 acres. Pop. in 1841, 166.

LOCKINGE (East and West), a parish in Berks, 2½ m. ESE of Wantage, in the line of the Great Western railway. Area 3,680 acres. Pop. 325.

LOCKINGTON, a parish in Leicestershire, 7 m. NW by N of Loughborough, including the township of Hemington. Area 2,135 acres. Pop. in 1831, 633; in 1841, 617.—Also a p. in the E. R. of Yorkshire, 6 m. NNW of Beverley, including part of the townships of Aike and L. Pop. in 1831, 475; in 1841, 433.—Also a township, partly in the preceding p., and partly in that of Kilnwick. Area 2,780 acres. Pop. in 1831, 559; in 1841, 526.

LOCKPORT, a township of Nicaragua co., in the state of New York, U. S., 277 m. W by N of Albany. It is intersected by a range of hills, and by several streams, some of which flow N to Lake Ontario, and others S to Tonawanda creek. The soil is a compound of calcareous and sandy loam. Pop. in 1840, 9,125. The village is on the Erie canal, and contains 6,500 inhabitants.—Also a village of Williams co., in the state of Ohio, 170 m. NW of Columbus, on the W side of Tiffins river.—Also a village of Wilson co., in the state of Tennessee, 40 m. E by N of Nashville, on the S bank of Cumberland river.—Also a village of Carroll co., in the state of Indiana, 80 m. NNW of Indianapolis, on the N side of Wabash river.—Also a village of Will co., in the state of Illinois, 170 m. NE by N of Springfield, on the Illinois and Michigan canal, 34½ m. from Chicago.

LOCKSTON, or Loxton, a parish in Somersetshire, 3½ m. WNW of Axbridge, on the N bank of the Axe. Area 1,350 acres. Pop. in 1841, 168.

LOCKTON, a chapelry in Middleton p., Yorkshire, 5 m. NE of Pickering. Area 6,610 acres. Pop. in 1831, 312; in 1841, 347.

LOCKWITZ, a village of Saxony, in the circle of Meissen, SE of Dresden. Pop. 1,072.

LOCKWOOD, a township in Almondbury p., W. R. of Yorkshire, 6½ m. SW of Huddersfield. Area 1,670 acres. Pop. in 1831, 3,134; in 1841, 4,182.

LOCKWOOD, a village of Byram township, Sussex co., in the state of New Jersey, 62 m. N of Trenton, on the Lubber run.

LOCKYER, a river of New South Wales, in the co. of Stanley, an affluent of the Brisbane.—Also a mountain, in the co. of Northumberland, 72 m. from Sydney, near the Great North road.

LOCLE (Le), a town of Switzerland, in the cant. and 11 m. NW of Neufchâtel, county and 9 m. WNW of Valengin, and in a valley of the same name, at an alt. of 933 yds. above sea-level. Pop. 8,514. The houses are neat, and generally painted on the outside. It contains an orphans' asylum, an hospital for aged persons, and a public granary; and has extensive manufactories of clocks, of articles in gold, iron, and tortoise-shell, and of lace. In the vicinity is an aqueduct cut out of the solid rock, to give egress to the waters of the Bied, a portion of which descends to some subterranean mills beneath. The valley of L. previous to the 14th cent. was completely desert. In 1303 a small colony was established in it by Jean Droz, an inhabitant of Corcelles; and during the troubles by which Geneva was agitated in 1782 many of the artisans of that town sought an asylum within its confines.

LOCMALO, a commune of France, in the dep. of Morbihan, cant. and 1½ m. E of Guéméné. Pop. 1,401.

LOCMARIA, a commune of France, in the dep. of Finistère, cant. and 5 m. SSW of St. Renan.

Pop. 1,154.—Also a commune in the cant. and 2 m. ESE of Huelgoet, and 23 m. NE of Chateaulin. Pop. 1,185.—Also a commune in the dep. of Morbihan, cant. and on the NE coast of the Belle-Isle-en-Mer. Pop. 1,557. At Arzic or Pont-Blance-de-Locmaria is a small port and pilot-station.

LOCMARIAQUER, a commune of France, in the dep. of Morbihan, cant. and 8 m. S of Auray, and 25 m. SE of Lorient. Pop. 2,187. It has a small port; and in the vicinity, at the mouth of the Crach, is a noted oyster-fishery.

LOCMINE, a canton, commune, and town of France, in the dep. of Morbihan, arrond. of Pontivy. The cant. comprises 7 com. Pop. in 1831, 12,428; in 1841, 13,046.—The town is 14 m. SSE of Pontivy. Pop. in 1841, 1,858.

LOCOAL-MENDON, a commune of France, in the dep. of Morbihan, cant. of Belz, 15 m. ESE of Lorient. Pop. 2,108.

LOCON, a commune of France, in the dep. of the Pas-de-Calais, cant. and 3 m. NNE of Bethune. Pop. 1,751.

LOCOROTONDO, a town of Naples, in the prov. of the Terra-di-Bari, district and 40 m. SSE of Bari. Pop. 4,270.

LOCQUEFFRET, a village of France, in the dep. of Finistere, cant. and 9 m. NE of Playben. Pop. 1,564.

LOCRE, a department and commune of Belgium, in the prov. of West Flanders, and arrond. of Ypres. Pop. 624.

LOCRIS, or LOCRIDE, an administrative prov. of Greece, to the S of the channel of Talanti. Pop. in 1839, 9,522. Its capital is Atalanti.

LOCRONAN, a town of France, in the dep. of Finistere, cant. and 9 m. SW of Châteaulin, and 26 m. SSW of Brest. Pop. 800. It has manufactories of sail-cloth.

LOCSMAND. See LUTCHMANSBURG.

LOCTUDY, a commune of France, in the dep. of Finistere, cant. and 3 m. SE of Pont l'Abbe. Pop. 1,330. It has several lime-kilns.

LOCUST CREEK, a river of Kentucky, which runs into the Licking, in N lat. 38° 4′.

LODDEN, or LODDON, a river of Berks and Hampshire, which rises near Aldershot; flows NNE; and falls into the Thames near Twyford, after a course of 30 m.—Also a river of Herefordshire, which falls into the Frome.

LODDINGTON, a parish in Leicestershire, 5 m. W by N of Appingham. Area 2,010 acres. Pop. in 1831, 164; in 1841, 137.—Also a parish in Northamptonshire, 4 m. W of Kettering. Area 1,020 acres. Pop. in 1831, 218; in 1841, 226.

LODDISWELL, a parish of Devonshire, 3½ m. NNW of Kingsbridge. Area 3,280 acres. Pop. 1,013.

LODDON, a river of Australia Felix, which rises near Mount Alexander, and flows into the Murray near Swan hill. Its native name is the YARRA.

LODDON, a parish and market-town of Norfolk, 10 m. SE of Norwich. Area 2,750 acres. Pop. in 1831, 1,176; in 1841, 1,197.

LODEINOJE-POLE, a town of Russia, in the gov. and 33 m. SSE of Olonetz, on the Svir. Pop. 1,000.

LODERS, a parish of Dorsetshire, 2 m. ENE of Bridport. Area 2,256 acres. Pop. 952.

LODEVE, a town of France, in the dep. of Herault, situated on the Lergue, 29 m. W of Montpelier. Its streets are narrow and ill-built. Pop. 9,909 in 1831; 10,372 in 1846. It has manufactories of cloth, silk stuffs, hats, oil, soap, and wine. During the late war, it supplied a great part of the clothing of the French army. It was the birth-place of Cardinal Fleury.—The arrond. of L. has an area of 122,584 hectares. Pop. in 1841, 55,849. It comprises 5 cantons.

LODI, a township of Seneca co., in the state of New York, U. S., 185 m. W of Albany. It has an undulating surface, bounded on the W by Seneca lake, and intersected by several streams. The soil consists of clay loam. Pop. in 1840, 2,236. The village contains about 400 inhabitants.—Also a township of Bergen co., in the state of New Jersey, 5 m. SW of Hackensack. The surface is level, and is bordered by the Hackensack on the E and SE, and on the W and SW by the Passaic. Pop. 687.—Also a village of Harrisville township, Medina co., in the state of Ohio, 114 m. NE of Columbus. Pop. about 100.—Also a township of Athens co., in the same state, on Shade river. Pop. 754.—Also a township of Washtenaw co., in the state of Michigan, 43 m. W of Detroit. Pop. 1,077. It is very fertile.

LODI-E-CREMA, a province or delegation of Austrian Italy, in the gov. of Milan, surrounded by the grand-duchy of Parma, and the delegations of Pavia, Milan, Bergamo, and Cremona. Its extent is 475 sq. m. Pasturage is here attended to in preference to tillage; and it is in this district that Parmesan cheese is chiefly made. The cattle are black, small, and short horned. The cheese produced by a single cow averages 200 lbs. per ann. Some silk is also grown. Pop. in 1837, 205,329. It is subdivided into 9 *distretto*, and 197 *comune*.—The capital of the same name is situated on the r. bank of the Adda, at an alt. of 68 ft. above sea-level, 19 m. SE of Milan. Pop. in 1846, 15,709. It is regular and well-built; and is the see of a bishop. Its cathedral and numerous convents claim the attention of the traveller. The most remarkable of its churches is that called Dell' Incoronata, built by the architect Bramante, and painted partly in fresco and partly in oil by Callisto, a scholar of Titian. L. is a place of some trade, and has manufactories of silk and porcelain. Its chief export consists in the cheese made in the environs, known as Parmesan or Stracchino. Like most of the towns which at one time maintained themselves in the form of republics, it is surrounded with walls, and is somewhat elevated above the surrounding level. One of the most daring exploits that characterized the commencement of Bonaparte's military career, was performed here in 1796, by forcing with the bayonet the passage of the bridge over the Adda at this place, though defended by 10,000 Austrians. The bridge is about 600 ft. in length, and 20 ft. in breadth.

LODI-VECCHIO, anciently *Laus Pompeii*, a village of Austrian Italy, situated on the river Lambro, 4 m. W of Lodi. It was destroyed in the 12th cent. by the Milanese. Pop. 3,164.

LODOK-KOR-DZOUNG, a town of Tibet, in the W part of the prov. of Ngari.

LODOMERIEN, an ancient duchy, which consisted of a portion of Western Poland, and originally named Wolodimir or Vladimir. It was ceded to Austria in 1772, and, with Galicia, now forms the political division of Galicia and Lodomeria.

LODOS. See LITZERSDORF.

LODOSA, a town of Spain, in the prov. of Navarra, partido and 30 m. SW of Pamplona, on the l. bank of the Ebro, which is here crossed by a stone bridge, and at the foot of a steep rock by which it is commanded on the N. Pop. 2,590. The streets are broad and well-paved, and the houses, consisting of stone and earth, generally well-built. It has a parish-church, a large and handsome edifice, a convent, an hospital, and a custom-house, and contains several distilleries of brandy and several oil-mills. The environs are well-watered by means of two streams led from the Ebro. Near that river are the

remains of an ancient fortress, and of a Roman bridge.

LODRON, or Ladron, a small county in the S extremity of the Tyrol, near Lake Idro. Pop. 1,950.

LODRON, or Lodrone, a town of the Tyrol, in the circle and SW of Roveredo, near the entrance of the Chiese into Lake Idro. Pop. 2,400.

LODS, a village of France, in the dep. of the Doubs, cant. and 7 m. SE of Ornans, and 19 m. SE of Besançon, on the Loue. Pop. 885. It has iron, steel, and tin works.

LODSWORTH, a chapelry in the p. of Easebourne in Sussex, 3 m. WNW of Petworth. Pop. 635.

LODVIKA, a village of Sweden, in the district of Stara-Kopperberg, on a small lake formed by the river Kolbäk.

LODZ, a town of Poland, in the gov. and 72 m. WSW of Warsaw. Pop. 4,380, chiefly employed in linen-weaving.

LOECHES, a village of Spain, in the prov. and 20 m. E of Madrid. Pop. 800. It has pottery-works, and coarse woollens are made at it. The Dominican convent here contains or contained a superb collection of paintings by Rubens, Paul, Veronese, Titian, and other eminent masters.

LOEDINGEN, a village and parish of Norway, in the S part of Hindöen, one of the Lofoden group.

LOEFORT, an island on the coast of Norway, N of the Maelström.

LOEFSTA, a mining-town of Sweden, in the haerad of Oland, 27 m. SE of Gefle. Pop. 1,500, chiefly engaged in iron works.

LOENHURT, a town of Belgium, in the prov. and 16 m. NE of Antwerp. Pop. 1,800.

LOEVENSTEIN, or Lowenstein, a fortress of Holland, in the prov. of Gelderland, at the W point of the island of Bommelwaert, 18 m. ESE of Rotterdam.

LOFANGO, one of the smaller Friendly islands, 5 m. ESE of Niniva.

LOFFINGEN, a town of Baden, 3 m. WSW of Huiffingen. Pop. 1,191.

LOFODEN, or Lofoten Islands, a group on the W coast of Norway, lying between 67° 30′ and 69° 30′ N lat. They consist of 5 large, and several smaller islands, having in all from 3,000 to 4,000 inhabitants. The principal are Andöen, Langöen, and Hindöen. Their coasts are extremely rugged. They contain lofty mountains, covered with perpetual snow, and in some places with glaciers. Their vegetation is confined to a few stunted shrubs, and cryptogamous plants. During the winter they are visited by about 4,000 boats, manned with 20,000 fishermen; and the value of the fish caught, chiefly cod, is estimated at about £12,000. Near the S end of the group is the celebrated whirlpool called the Maelström.

LOFTUS, or Lofthouse, a parish in the N. R. of Yorkshire, 8 m. NE of Guisborough. Area 3,700 acres. Pop., including the hamlet of Wapley, 1,091.

LOFTY (Mount), a mountain of S. Australia, 6 m. SE of Adelaide, in S lat. 34° 58′, E long. 138° 42′. Alt. 2,200 ft. above sea-level. The range to which it belongs skirts the E shore of St. Vincent's gulf for 70 m.

LOESSOE, or Lasöe, an island of Denmark, in the Cattegat, administratively belonging to N. Jutland. It has an area of 45 sq. m., with a pop. of 2,400 inhabitants.

LOGAN, a pastoral rivulet, traversing to the N. Esk a sequestered vale which diagonally cleaves the Pentland-hills in Edinburghshire. The stream is now popularly called Glencross-burn.—Also a river in Lanarkshire, which takes its rise in the hills of Lesmahago, and running E for 8 m., joins the Nethan.

LOGAN, a river of New South Wales, which has its source in Mount Lindesay, in the district of Clarence river, flows through the co. of Stanley, and falls into the South Passage into Moreton bay. Its principal affluents are the Teviot and Albert.—Also a river in the district of Morrumbidgee, an affluent of the river Murray.—Also a lake in the co. of Stanley.

LOGAN, a township of Upper Canada, in the Huron district, comprising an area of 55,551 acres, watered by a branch of the Thames. Pop. 134.

LOGAN, a county in the W part of the state of Virginia, U. S., comprising an area of 2,930 sq. m., generally hilly, and drained by Guyandotte and Coal rivers. Pop. in 1840, 4,309; in 1850, 3,618. Its capital, which bears the same name, is on the E side of Guyandotte river.—Also a county in the SW part of the state of Kentucky, containing a surface of 600 sq. m. It consists of table-land, and is watered by tributaries of Green and Cumberland rivers. Pop. in 1840, 13,615; in 1850, 16,621. Its capital is Russelville.—Also a county near the centre part of the state of Ohio, comprising a surface, generally level, of 425 sq. m. It has a fertile soil, and is watered by Miami river. Pop. in 1840, 14,015; in 1850, 19,207. Its capital is Bellefontaine.—Also a county near the centre of the state of Illinois, containing an area of 529 sq. m., drained by Sugar creek and other branches of Sangamon river. Pop. in 1840, 2,333; in 1850, 5,128. Its capital is Postville.—Also a township of Clinton co., in the state of Pennsylvania, 20 m. NE of Bellefontaine. It has a mountainous surface drained by Big Fishing creek. The soil in the valleys consists of calcareous loam. Pop. in 1840, 1,187.—Also a village of Falls township, Hocking co., in the state of Ohio, 47 m. SE of Columbus, on the N bank of Hockhocking river.—Also a township of Dearborn co., in the state of Indiana, 87 m. SE of Indianapolis. Pop. 1,398.—Also a township of Wayne co., in the state of Missouri. Pop. 605.

LO-GAN, a district and town of China, in the prov. of Keang-se, div. of Fu-chu-fu, in N lat. 27° 20′, and E long. 115° 51′.—Also a district and town of China, in the prov. of Shan-tung, div. and 27 m. N of Tsing-chu-fu, in N lat. 37° 5′, and E long. 118° 38′

LOGAN PEAK, a summit of New South Wales, in the district of Darling Downs.

LOGANSPORT, a village of Cass co., in the state of Indiana, U. S., 72 m. N of Indianapolis, on Wabash river, at the junction of Eel river and of the Wabash and Erie canal. Pop. in 1840, 1,400. The rivers are here crossed by two handsome bridges.

LOGANVILLE, a village of Miami township, Logan co., in the state of Ohio, U. S., 73 m. NW of Columbus, on the E bank of Miami river. Pop. 20.

LOGE (La), a village of France, in the dep. of Nievre, cant. and 6 m. SSW of Nevers. Pop. 980.

LOGELBACH (Le), a hamlet of France, in the dep. of Haut-Rhin, com. of Colmar. Pop. 1,000, chiefly engaged in cotton-spinning.

LOGES (Les), a commune of France, in the dep. of Seine-Inferieure, cant. of Fecamp, 9 m. NNE of Le Havre. Pop. 1,985.

LOGES-MARCHIS (Les), a commune and village of France, in the dep. of Manche, cant. of Saint-Hilaire-du-Harcoult. Pop. 1,496.

LOGGUN, a central kingdom of Nigritia, to the S of Lake Chad, and SE of Bornu. Its cap. is Kernok, in N lat. 11° 7′. It is watered by the river Shary which, near its junction with the lake, is about a ½ m. broad, and "flows in great beauty and majesty past the high walls of the capital." This country,

seen and heard of for the first time to Europeans by Dr. Oudney's mission, presents some superior features. Amid the furious warfare of the surrounding states, the Logguuese have steadily cultivated peace, which by a skilful neutrality they appear to have been able to maintain. They are industrious, and work steadily at the loom, which is considered here as an occupation not degrading to freemen. The cloth, after being thrice steeped in a dye composed of indigo, is laid on the trunk of a large tree, and beaten with wooden mallets till it acquires the most brilliant gloss. They have a metallic currency of iron. They are described as a remarkably handsome and healthy race; their females in particular are far more intelligent than those of any neighbouring nation. The country abounds in provisions of all kinds, and cattle. Unhappily it swarms with flies, bees, mosquitoes, and immense black toads.

LOGHAN, a parish in co. Meath, 3½ m. NW of Kells. Area 8,727 acres. Pop. in 1841, 4,495.

LOGHINOVO, a town of Russia, in the gov. of Perm, 32 m. SE of Yekaterinburg. Pop. 1,200.

LOGIE, anciently called LOGIE-MURDOCH, a parish in Fifeshire, occupying a portion of the SE extremity of the Ochil-hills. Area 3,343 acres. Pop. in 1831, 430; in 1841, 419.—Also a parish lying in the shires of Stirling, Perth, and Clackmannan, exhibiting, though compact in itself, a notable instance of whimsical intricacy and confusion in territorial allotment. In the NE and N it runs up among the Ochil-hills. The high conical hill in this p. called Dumyat, lifts the eye over parts of 12 cos., and feasts it with one of the most extensive prospects in Scotland. Toward the W are the mineral wells of AIRTHREY: which see. The v. of L., or Blair-Logie, stands in the centre of the p., at the entrance to Glendevon, among the Ochil-hills. Pop. 2,200.

LOGIE-ALMOND, a district on the N bank of the river Almond, opposite the p. of Methven, in Perthshire.

LOGIE-BUCHAN, a parish in the district of Buchan, Aberdeenshire. The river Ythan, here navigable at full tide for small sloops, crosses it from W to E, dividing it into nearly equal proportions. Pop. in 1801, 539; in 1841, 713.

LOGIE-COLDSTONE, a parish in the district of Cromar, Aberdeenshire. Pop. in 1831, 910; in 1841, 936. The p. is watered by three rivulets forming Daven-loch, and tributary to the Dee.

LOGIE-EASTER, a parish in the cos. of Ross and Cromarty. The manse and church, situated near the middle of the p., are 5 m. SSW of Tain. Pop. in 1801, 1,031; in 1841, 1,015.

LOGIE-PERT, a parish in the extreme N of the maritime district of Forfarshire. Pop. 1,560.

LOGIERAIT, a village and large and dispersed parish in the N division of Perthshire. The v. lies 8 m. E of Aberfeldy, and 8½ m. N of Dunkeld, on the banks of the Tay, here a noble stream. Pop. of p. in 1831, 3,138; in 1841, 2,959.

LOGISCHIN, a market-town of Russia in Europe, in the gov. of Minsk, district and N of Pinsk. Pop. 833.

LOGNINA, a headland and port of Sicily, on the E coast, in the prov. and district and 6 m. SSW of Syracuse, in N lat. 36° 59′, E long. 15° 15′.

LOGO, a town of Abyssinia, in the kingdom of Tigre, in the S part of the prov. of Baharnegash, to the S of the Seremai river.

LOGO (PORTO). See PORTO LOGO.

LOGOISK, a town of Russia in Europe, in the gov. and 18 m. N of Minsk, district and 20 m. W of Borisov.

LOGRADOR, a town of Brazil, in the prov. of the Rio-Grande-do-Norte, and district of Porto-Alegre.

LOGRONO, a province, judicial partido, and town of Spain, in Old Castile.—The prov. is bounded on the N by the provs. of Navarra and Alava; on the E by the former; on the S by the prov. of Soria; and on the W by that of Burgos. It comprises an area of 134 sq. Spanish leagues, and is divided into 9 partidos, and contains 285 pueblos. Pop. in 1834, 147,718. It is flat in the N, but its southern parts are intersected by ramifications of the Iberian chain. This prov. is one of recent creation.—The partido comprises 39 pueblos.—The town is situated in a fine plain, on the l. bank of the Ebro, which is here crossed by a fine bridge, 57 m. WSW of Pampeluna. Pop. 7,041. It is enclosed by walls, and has two suburbs, a fine square, with fine fountains and promenades, numerous churches and convents, a college, several hospitals, a theatre, and several other charitable and educational institutions. It has distilleries of brandy, several tanneries, and manufactories of candles, of hats, and of playing-cards. This town is supposed to occupy the site of the *Juliobriga* of the ancients. It was taken in 1823 by the French.

LOGRONO, a town of Chili, in the district of Melipila, 36 m. SW of Santiago, on the r. bank of the Maypu.—Also a town in Ecuador, in the dep. of Assuay, 60 m. ESE of Cuenca, on the l. bank of the Pante. It is now in ruins.

LOGROSAN, a judicial partido and town of Spain, in Estremadura, in the prov. of Caceres. The partido comprises 20 pueblos. The town is 81 m. E of Badajoz, in a valley formed by the sierras Pollares and San Cristobal. Pop. 3,050. It has a parish-church, and a custom-house. In the adjacent mountains are mines of silver and of lead.

LOGSTOR, a town of Denmark, in Jutland, in the stift and 28 m. WSW of Aalborg, and 39 m. N of Viborg, on the S coast of the Limfiord. Pop. 400. It has a small port, and carries on a considerable trade. Fishing and navigation form also important branches of local industry.

LOGT, a commune of Belgium, in the prov. of Limburg, dep. of Exel. Pop. 173.

LOGUDORO, a district of Sardinia, and one of its 4 ancient provinces, of which the cap. was Sassari.

LOGUIVY-PLOUGRAS, a village of France, in the dep. of the Côtes-du-Nord, cant. of Plouaret, 16 m. S of Lannion. Pop. 1,800.

LOHARA, a town of Hindostan, in the Nizam's territory of Beyder, 15 m. NNE of Naldrug.

LOHARGONG, a town and military post in British India, in Bundelcund, 40 m. S of Kallinger.

LOHARU, a town of Hindostan, in the district of Chekawatti, 30 m. NW of Narnul.

LOHBURG, a town of Prussian Saxony, in the reg. and 18 m. E of Magdeburg, on the r. bank of the Ehle. Pop. 1,600.

LOHE'AC, a town of France, in the dep. of Ille-et-Vilaine, arrond. and 18 m. NNE of Redon. Pop. 300.

LOHEIA, a considerable city of Yemen, in Arabia, situated on the coast of the Red sea, in N lat. 15° 42′, E long. 42° 43′. It lies at the bottom of a deep bay, protected from the sea by one large island, and a group of smaller ones to the NW. It has no walls, but is defended by towers, several of which will admit cannon. Some of the houses are built of stone; but the greater number are mud huts thatched with grass. The harbour is so shallow that vessels can only anchor at some distance from the town; at low water even laden boats cannot approach it. A considerable trade is carried on from this port in coffee, which, though of inferior quality to that shipped at Mocha and Hodeida, is procured here at a cheaper rate. Indian goods brought direct from India pay a duty of 5 per cent.; but all goods brought

down the Red sea pay 7 per cent. The water at L. is bad, and the surrounding country sandy and barren. About 6 m. from the town is a mountain affording considerable quantities of mineral salt.

LOHJANA, a town of Hindostan, in the district of Kattiwar, 60 m. SW of Cambay.

LOHMEN, a village of Saxony, 12 m. ESE of Dresden. Pop. 750.

LOHNBERG, a village of the duchy of Nassau, 5 m. W of Wetzlar, on the r. bank of the Lahn. Pop. 520.

LOHNHUT, a small town of Belgium, in the prov. of Antwerp, 16 m. NNE of Antwerp.

LO-HO, a river of China, in the prov. of Shen-se, which has its source near the Great Wall; runs in a generally SSE direction; and 15 m. below Tung-chu-fu, falls into the Hoang-ho, a little above the confluence of the Hwei-ho.

LOHR, a town of Bavaria, on the r. bank of the Maine, 35 m. ESE of Frankfort. Pop. 3,200. It has glass, iron, and paper-works, and conducts a trade in timber for fuel.

LOHUGHAUT, a town of Hindostan, in the prov. of Kumaon, 50 m. ESE of Almorah.

LOHURDUNGA, a town of Hindostan, in the prov. of Bahar, district of Chuta-Nagpore, near a pass, in N lat. 23° 28′.

LO-HWUY, a district and town of China, in the prov. of Kwang-tung, and E part of the island of Hai-nan. The town is situated on the E coast of the island, on a small island formed by the embouchure of the Sse-ho, 81 m. S of Keun-che-fu, and in N lat. 19° 10′, E long. 110° 18′. Pop. (male) 31,566. It is enclosed by walls 30 ft. in height, of nearly equal thickness. It is entered by four gates, facing the cardinal points. The streets are paved and run in straight lines, and exhibit many handsome and well-stocked shops. The houses are chiefly two stories in height, and built of brick. The surrounding district is fertile, and produces considerable quantities of rice.

LOIGNAN, a village of France, in the dep. of La Gironde, cant. and 4 m. NW of La Brède. Pop. 1,690.

LOIGNY, a village of France, in the dep. of Eure-et-Loir, cant. and 3 m. SE of Orgères. Pop. 360.

LOING, a river of France, which has its source in the dep. of Yonne; and entering the dep. of Loiret, falls into the Seine between Melun and Montereau, after a NW and N course of 65 m. Its principal affluent is the Ouanne. It feeds the canals of Briare and Loing, the latter of which is a continuation of the former from Montargis to the Seine near Moret.

LOING, a small river of the W division of Ross-shire, which, flowing SW, divides Kintail on its l. bank from Lochalsh on its r., and falls into the head of Loch-Long conjointly with the Elchaig coming from the ESE, after a course of about 9 m.

LOIR-ET-CHER, a department in the central part of France, including the S portion of the old prov. of Orleannais. It is bounded by the dep. of Eure-et-Loire on the N; by Loiret and Cher on the E; by Indre and Indre-et-Loir on the S; and by Indre-et-Loir and Sarthe on the W. Its superficial extent is 625,971 hectares, of which 369,627 were arable in 1834. The face of the country is in general level, sloping towards the SW; but has a barren and monotonous aspect, particularly in the SE part, where it is covered with extensive heaths and marshes. The climate is mild and healthy, except in the dist. of Romorantin, where the exhalations from the marshes are extremely noxious.—The principal rivers that traverse the department are the Loire, the Loir a tributary of the Sarthe, the Cher, the Cosson, and the Beuvron. The soil to the N of the Loire is much more fertile than that on the S of that river, producing abundance of corn, fruit, hemp, legumes, beet-root, and wine. Some of the wines are good; but the larger portion are made into brandy and vinegar. Its pasturages are likewise good, and its forests considerable. The number of sheep in 1839 was about 499,786. The only mineral productions are iron and flint-stones.—The trade of the dep. consists in wood, corn, cattle, wool, wine, brandy, and a few manufactures. The pop. in 1801 was 209,957; in 1821, 227,527; in 1841, 249,462.—The dep. belongs to the diocese of Blois. In jurisdiction it is subject to the *cour royale* of Orleans.—It is divided into the 3 arrondissements of Blois (the cap.), Vendome, and Romorantin. These are subdivided into 23 cantons and 296 communes.

LOIR (Le), a considerable river of France, which rises to the S of Chartres, in the dep. of Eure-et-Loire, and flowing SW and then WSW, falls into the Sarthe, on the l. bank, near the confluence of the Mayenne, 6 m. N of Angers. Its course is upwards of 140 m., and it is navigable 60 m. Its principal affluents are the Ozane and the Braye, on the r.; and the Conie, the Long, and the Meaulne, on the l.

LOIRE, a department of the SE of France, situated between the parallels of 45° 13′ and 46° 17′ N lat.; and bounded on the N by the dep. of Saone-et-Loire; on the E by that of the Rhone; on the SE by the dep. of Isère; on the S by Ardeche and Haute-Loire; on the W by Puy-de-Dome; and on the NW by Allier. It anciently formed that part of Lyonnais called Fiorez. Its main body forms a great valley bounded on the E by the chain of the Cevennes; and on the W by a branch of that chain running S. The Loire intersects this valley from S to N, receiving on the r. the Furand, the Coise, the Gaud, and the Sornin; and on the l., the Bousson, the Mare, the Lignon, the Aix, and the Tessone. The SE extremity of the dep. belongs to the basin of the Rhone. The highest point of surface is the summit of Mont Pila in the Cevennes; alt. 1,364 metres = 4,475 ft.; the lowest, is the embouchure of the canal of Givois, which is 554 ft. above sea-level. Its superficial extent is 476,482 hectares, of which 406,965 hect. are mountainous. Pop. in 1801, 290,903; in 1821, 343,454; in 1841, 434,085; in 1846, 453,786. The climate is mild; and the soil, though stony in the mountainous districts, is in general fertile, producing the famous Cote Rôtie wine, and the white wines of Chateau-Grillat, with abundance of fruit, maize, and hemp. Of wheat little is raised; only 16,437 hect. being under that grain in 1839. The pastures are good. The number of sheep within the dep. in 1839 was 186,327; of cattle and oxen 107,241; of goats, 23,448. About 36,000 hect. are under forests. The dep. contains considerable mines of lead and coal, with quarries of marble, coal, mill-stones, and flint. The iron made in 1839 amounted to 24,186 quintals. The coal extracted in the same year was 11,169,366 quintals, valued at 7,602,696 francs. The principal manufactures are cotton and linen stuffs, and silk ribbons. The weaving of silk goods, especially ribbons, affords employment to 30,000 hands, whose yearly produce is valued at 40,000,000 francs. About 8,000 hands are employed in the fabrication of arms and hardware articles. Flint glass and bottles are extensively manufactured. There are railroads in this dep. from Saint Etienne to Andrezieux, Roanne, and Lyons.—It is divided into the 3 arrondissements of Montbrison, Roanne, and Saint Etienne. These are subdivided into 27 cantons, and 315 communes. The dep. is ecclesiastically comprised in the dio. of the archb. of Lyons.

LOIRE, a hamlet of France, in the dep. of Ardeche, cant. and 6 m. N of Burzet, near the source of the Loire.—Also a village in the dep. of Maine-et-Loire, cant. and 4 m. NNE of Candé. Pop. 1,250. —Also a village in the dep. of Rhone, cant. and 2 m. NW of Saint-Colombe, on the r. bank of the Rhone. Pop. 1,300.

LOIRE (La), the river of the longest course of any in France, has its source in the SE of the kingdom, among the mountains of the Cevennes, in the dep. of Ardeche, in Mont Gerbier-de-Jones, at an alt. of 3,940 ft., and, after flowing more than 500 m. from its source, and probably 700 m. including its windings, falls into the bay of Biscay by a considerable estuary, about 40 m. below Nantes, on the NW shores of France. From its source it flows in a NNW direction as far as Orleans, whence, to its embouchure, it holds a W course. The tide is perceptible in this river as far as Nantes. It becomes navigable at Roanne, only 40 m. NW of Lyons; but the navigation is interrupted during five or six months of the year. In dry seasons it has little water; the sands of its bed shift, and steamers drawing only 6 inches of water cannot pass. Again, too much water prevents vessels of any size passing under the bridges. After the Cher has joined it near Tours, the volume of water is so great that it is navigable at all times to the sea. The basin of this great river comprises nearly one-fourth of the total area of France. A lateral canal to aid the navigation of the river, 123 m. in length, has been constructed from a point opposite the mouth of the Briare canal, to a point opposite the Canal-du-Centre. The great rivers which fall into it are the Allier, the Cher, the Vienne, the Mayenne, the Sarthe, the Sevre, and the Indre. Among its smaller tributaries are the Lignon, Furand, Coise, Gaud, Sornin, Reconce, Aron, Nievre, Nohain, Vrille, Brante, and Authion on the r.; and the Borne, Ance, Lower Lignon, Bebre, Aubois, Cossin, Beuvron, Layon, and Evre, on the l. It communicates with the Seine by the canals of Briare and Orleans; and with the Rhone, through the medium of a canal which joins it with the Saone, thus forming a water-communication between the Atlantic and the Mediterranean through the very heart of the kingdom. The principal towns which it passes in its course are Orleans, Blois, Tours, Saumur, and Nantes. A great part of its course is between artificial dykes. It is evident that originally it spread itself extensively over flats, and was only narrowed in places either by the high lands, or by artificial works. In these flats there sometimes occur very old, narrow, inconvenient bridges, always called Roman bridges, and believed to have been formed when the country was in the possession of that people. These bridges may have withstood the floods of 2,000 years. As civilization and cultivation advanced, the water which spread over the extended flats was shut out by embankments upon a similar principle to sea-walls in England. The tops of those embankments became roads, and they have generally been planted with poplars on each side. They are generally far above the ordinary bed of the L.; and were never known to give way until the great floods of 1846. The present embankments which form the stream into a navigable river, could not have been constructed at any one time; they are the work of ages; and are passed over often without observation,—the river on one side, the land below them on the other.

LOIRE (Haute), a department in the SE of France, situated between the parallels of 44° 44′ and 45° 25′ N lat.; and bounded on the N by the deps. of Puy-de-Dome and Loire; on the E and SE by Ardeche; on the S by Lozère; and on the W by Cantal. It anciently formed that part of Languedoc called Velay. Its superficial extent is 498,560 hectares. The face of the country is extremely mountainous, lying on the N declivity of the Cevennes, and at a considerable elevation. The soil is stony and volcanic, except in the valleys, where it is of tolerable fertility. The climate is warm in summer; but cold and stormy in winter. The principal rivers that traverse the dep. are the Loire, the Allier, the Lignon, and the Alagnon. The Loire traverses the E part of the dep. from S to N; the Allier waters the W part. The highest point is Mont Mezène in the Cevennes. Alt. 1,940 yds. In 1834, there were 226,072 hectares of arable land, 79,432 h. of meadow, 74,030 of woods, and 90,239 of heaths in this dep. The rearing and export of cattle is one of the principal sources of the subsistence of the inhabitants. In 1839 the number of oxen and cattle in the dep. was returned at 110,761; of sheep, 328,270. Corn, however, is raised in a quantity equal to the consumption; but consists chiefly of rye and barley. The other productions are silk, wine, and fruit. Among its minerals are lead, antimony, and coal. The principal manufactures are lace, ribbons, linen, and woollens.—The number of elementary schools in 1840 was 828, attended by 29,171 children in winter, and 10,224 in summer; of communal schools 103, attended by 6,741 pupils in winter.—The dep. forms the dio. of the bishop of Le Puy. It is divided into the three arrondissements of Le Puy, Brioude, and Yssengeaux. These are subdivided into 27 cantons, and 265 communes.

LOIRE-INFERIEURE, a department in the W of France, between the parallels of 46° 50′ and 47° 50′ N, formed of the SE portion of the ancient prov. of Brittany; and bounded by the Atlantic and the deps. of Ille-et-Vilaine, Mayenne, Maine-et-Loire, Vendée, and Morbihan. Its superficial extent is 653,728 hectares. Pop. in 1801. 369,305; in 1821, 433,815; in 1841, 486,806; in 1846, 517,268. The surface, which belongs chiefly to the basin of the Loire, is in general level. Small hills are found in the NE; but nothing deserving the name of a mountain. The coast is low, and sprinkled with a multitude of small lakes. The rivers that traverse it are the Loire, which intersects it from E to W near its centre, its tributaries the Erdre, Sevre-Nantaise, Maine, and Moine; and the Vilaine, which skirts the dep. on the NW. The climate is temperate and mild, but damp; the soil, though in some parts marshy, is in general fertile. In 1834 about 321,600 hect. were arable, and 105,062 under pasture. Nearly one-fifth of the surface consists of heaths and waste. The productions are corn, wine, fruit, different sorts of oil-seeds, flax, and large quantities of wood. From the moist nature of the climate the pastures are good, and the stock of cattle excellent. In 1839 the latter consisted of 241,120 head of cattle, 330,095 sheep, 59,954 pigs, 39,443 horses, 1,187 mules, 4,163 goats. The fisheries, both in the rivers and on the coast, are very productive. The mineral products are iron, coal, granite, kaolin, and salt, all of which are exported to a considerable amount.—Its advantageous situation, at the mouth of the largest river in the kingdom, and the number of its sea-ports, amounting to 14, render the manufacturing industry and commerce of this dep. extensive. The principal articles of manufacture consist of hardware, cotton goods, ropes, paper, glass, and porcelain. By means of the Loire and its tributary streams, it carries on a brisk traffic with the interior; and the foreign trade of Nantes is exceeded by few towns of the kingdom. —The dep. forms the dio. of the bishop of Nantes. It is divided into the 5 arrondissements of Nantes, Savenay, Chateaubriand, Ancenis, and Paimbœuf. These are subdivided into 40 cantons and 206 com-

munes. In 1840, the dep. possessed 472 primary schools, with 21,143 pupils in winter; 186 communal schools, and 16 superior schools.

LOIRET, a department in the central part of France, comprising a portion of the ci-devant Orleannais Propre, the Gatinais, and Dunois, and part of Berry. It lies between the parallels of 45° 13′ and 46° 18′; and is bounded by the deps. of Eure-et-Loir, Seine-et-Oise, and Seine-et-Marne, on the N; by Yonne on the E; by Nievre, Cher, and Loir-et-Cher on the S; and by Loir-et-Cher on the W. Its superficial extent is 667,679 hectares. Pop. in 1801, 286,050; in 1821, 291,294; in 1841, 318,452. The country is level, and is traversed by the Loire, the Loing, the Loiret, the Ouanne, the Bied, and a number of smaller streams. The soil, though in some districts light and sandy, is upon the whole fertile, especially to the N of the Loire, and the climate mild and agreeable. The principal productions are corn, hemp, saffron, and fruit. Large quantities of wine and of cider are likewise raised. The forests are extensive, particularly that of Orleans, which contains 15,000 acres. The live stock in 1839 numbered 29,138 horses, 109,280 asses, 518,510 sheep, and 29,456 pigs. The pilchard and herring fisheries are important; salt is largely made; and there are some extensive iron-foundries. The exports consist of the above-mentioned productions, and of various articles of manufacture, such as woollen and cotton cloth, linen, leather, paper, porcelain, and beet-root sugar.—The dep. forms the dio. of the bishop of Orleans. It is divided into the 4 arronds. of Orleans, Gien, Montargis, and Pithiviers, which are subdivided into 27 cants. and 348 com.

LOIRET, a river of France, in the dep. of the same name, which has its source 3 m. SSE of Orleans, in the park of a castle, hence named the Chateau-de-la-Source; flows past Olivet and St. Mesmin; proceeds W; and, after a total course of about 8 m., joins the Loire, on the l. bank, a little below Orleans. Its principal affluent is the Huy, which it receives on the r. The banks of the L. consist of fine hills, which contain large beds of gravel and of rock crystal. The latter is noted for its purity and the beauty of its colours. The waters of the L. do not freeze.

LOIRON, a canton, commune, and town of France, in the dep. of the Mayenne, arrond. of Laval. The cant. comprises 15 coms. Pop. in 1831, 14,714; in 1841, 15,360. The town is 8 m. W of Laval, and 14 m. ESE of Vitre, on the r. bank of the Oudon. Pop. 1,376. It has extensive manufactories of linen, and carries on an active trade in cattle, linen, and yarn.

LOISACH, a river which has its source in the N part of the Tyrol, in the circle of the Upper Innthal, to the E of Theil; flows thence into the circle of Upper Bavaria; traverses Lake Kochel; and throws itself into the Isar, by the l. bank, near Wolfrathshausen, 15 m. SSW of Munich, after a course, in a generally NNE direction, of about 60 m.

LOISY, or Loizy, a village of France, in the dep. of the Saone-et-Loire, cant. and 2 m. NE of Guiscry, and 11 m. WSW of Louhans, on the r. bank of the Seille. Pop. 1,105.

LOITEN, a parish of Norway, in the dio. of Aggerhuus, and in the SW part of the bail. of Hedemarken. Pop. 2,503.

LOITZ, or Loiz, a town of Prussia, in the prov. of Pomerania, reg. and 24 m. S of Stralsund, circle and 9 m. S of Grimme, on the Peene. Pop. 2,638. Fishing and agriculture form the chief branches of local industry.

LOIWEN, a town of the archduchy of Austria, in the circle of the Mannhartsberg, and 10 m. NW of Krems.

LOIX, a commune of France, in the dep. of the Charente-Inferieure, cant. of Arsen-Ré, in the island of Ré, and 5 m. WNW of St. Martin. Pop. 1,266. It has a port, and extensive salt-works.

LOJA, a judicial partido and town of Spain, in Andalusia, in the prov. of Granada. The partido comprises 5 pueblos. The town is 31 m. WSW of Granada, and 22 m. ENE of Antequera, on the slope of a hill, near the l. bank of the Genil, which is here crossed by a bridge. Pop. 10,055. It contains 3 parish-churches, 4 convents, a school, and numerous public fountains; and has manufactories of common cloth and paper. In the environs are a large salt-work and a copper-foundry. On the summit of a hill above the town are the ruins of a Moorish castle. L. was formerly a place of considerable strength. It was taken from the Moors in 1486.

LOJANO, a town of the Pontifical states, in the legation and 17 m. S of Bologna. Pop. 3,056.

LOJEW, a town of Russia in Europe, in the gov. and 204 m. SW of Minsk, district and 38 m. SSE of Rzeczyca, on the r. bank of the Dnieper.

LOJNITZA, a town of Turkey in Europe, in Servia, in the sanj. of Semendria, 13 m. NNE of Zvornik, and 27 m. WSW of Czabatz, on the r. bank of the Drin.

LOK, a town of Hungary, in the comitat of Saboltsch, 27 m. NW of Nagy-Kallo, and 8 m. SSW of Tokaj, on the l. bank of the Theiss.

LOKA, a village of Styria, in the circle and 9 m. NNE of Cilly and 57 m. S of Gratz. It is noted for its mineral springs.—Also a village and bathing-establishment in Sweden, in the prefecture and 38 m. NW of Œrebro, and p. of Grythytte.—Also a river of Upper Guinea, in the Ashantee territory, which flows into the river Volta.

LOKACZE, a town of Russia in Europe, in the gov. of Volhynia, district and 15 m. SE of Vladimir.

LO-KEANG, a district and town of China, in the prov. of Sze-chuen, div. and 21 m. SW of Meenchu, in N lat. 31° 18′, E long. 104° 36′.—Also a river which has its source in the S part of the prov. of Hunan, on the confines of that of Kwan-se; runs first N; passes the town of Paou-king; then turns E; divides into several arms; and joins the Heng-keang, on the l. bank, between the town of Chang-cha and Lake Tung-ting. It has a total course of about 300 m.

LOKEREN, a department, commune, and town of Belgium, in the prov. of E. Flanders, and arrond. of Termonde. Pop. of dep. 16,289. The town is 8 m. NW of Termonde, and 13 m. ENE of Ghent, on the r. bank of the Durme. Pop. 7,841. It contains a large square, and has manufactories of cotton fabrics, ticking, lace, and hats, several calico-printing mills and bleacheries, several tanneries and rope-works, large salt-refineries, extensive breweries, and oil-mills. Its trade consists chiefly in corn, hemp, flax, oil, and linen.

LOKET. See Elnbogen.

LOKHA, or Lao-he′, a river of Sharra-Mongolia, which descends from the Mingan-ula; runs NE through the N part of the territory of the Ao-Khan, and the S part of that of Uniut; enters the territory of the Kartchin; and, after a course of upwards of 150 m., joins the Sira-muren, on the r. bank.

LOKHVITZA, a town of Russia in Europe, cap. of a district, in the gov. and 90 m. NW of Poltava, and 33 m. SW of Romen, on the r. bank of the Soula Pop., chiefly agriculturists, 4,500. It has 3 churches

LOKIAH, a river of Hindostan, in the prov. o. Bengal. It detaches itself from the Brahmaputra, on the r. bank, near Sagordi; is joined by another branch of that river on the r.; throws off a portion of its waters on the l.; and joins the Bori-ganga, an arm

of the Ganges, to the SE of Dacca, after a course, in a generally SSW direction, of about 60 m.

LOKKEN, or MELDAL, a village of Norway, in the stift and 33 m. SW of Drontheim. Pop. 4,260. It has a productive copper-mine.—Also a fishing-village of Denmark, in Jutland, in the stift of Aalborg, on the W coast. Pop. 350.

LOKNITZ, a river of Germany, which has its source in the grand-duchy of Mecklenburg-Schwerin, 1½ m. SE of Gross-Godens; flows thence in the Prussian circle of Priegnitz; runs first S, then W; and, after a total course of about 36 m., throws itself into the Elde, by the l. bank, 6 m. above the confluence of that river with the Elbe, and 3 m. W of Leuzen.

LOK-NOR. See LOB-NOR.

LOKOHAR, a small town of Hindostan, in the prov. of Bahar and district of Tirhut, 111 m. NE of Patna, near the frontier of Nepal.

LOKRUN, a river of Chinese Tartary, in Sungaria, which has its source in Mount Kutubi; and, after a course, in a NW direction, of about 210 m., falls into Lake Ayak-nor.

LOKTEVKA, a village of Russia in Asia, in the gov. of Tomsk, district and 24 m. SW of Tsharysh, on a small river of the same name, an affluent of the Tsharysh. About 60 m. SW of this v., on the Alei, is a silver-mine of the same name.

LOLAB, a long and narrow valley on the N frontier of Cashmere, in the Green mountains, watered by a small river of the same name, which falls into the Jelum, in N lat. 34° 13′, E long. 74° 17′. At one part the valley expands into an area about 16 m. in circumf., the centre of which appears to have been formerly a lake, and which forms the daily resort of immense numbers of birds.

LOLIF, a commune of France, in the dep. of the Manche, cant. and 3 m. ESE of Sartilly, on the l. bank of the Broise. Pop. 1,085.

LO-LING, a district and town of China, in the prov. of Shan-tung, div. of Wu-ting-fu, in N lat. 37° 48′, E long. 117° 8′.

LOLLARA, a town of Hindostan, in the prov. of Gujerat, 15 m. from the E bank of the Runn, and 42 m. SW of Polton. It consisted in 1809 of about 1,000 houses, and is inhabited chiefly by Rajputs. Cattle are pastured in large numbers in the environs.

LOLLDONG, a defile in Hindostan, in the mountains which separate the prov. of Delhi from Gurwal, between the Ganges and Koh, and about 36 m. SW of Sirinagur. The Rohillahs were here defeated by the English in 1744.

LOLUM, a village of Cashmere, 32 m. N of Sirinagur, in N lat. 34° 26′.

LOLYANA, a town of Hindostan, in Gujerat, 27 m. WNW of Bonagor.

LOM, a river of Bulgaria, rising near Sirischnik, in the sanj. of Sophia, passing Drinovatz, and flowing into the Danube, on the r. bank, after a course of 60 m.—Also a town of Bulgaria, in the sanj. and 21 m. ESE of Widdin, on the r. bank of the Danube, a little above the confluence of the river of the same name. It is surrounded by palisades and a ditch. Pop. 3,000.

LOMA MOUNTAINS, a chain in Upper Guinea, to the NE of Sierra Leone, in the Sulimana territory, intersected by the parallel of 9° 20′.

LOMA (POINT), a headland on the coast of California, at the entrance of the port of San Diego, in N lat. 32° 39′.

LOMANA, a town of Spain, in the prov. of Burgos, 12 m. ESE of Medina.

LOMAZY, a town of Poland, in the woiwodie of Siedlec, 12 m. S of Biala.

LOMB, a parish and village of Norway, in the prov. of Aggerhuus, 150 m. NNW of Christiania Pop. 3,406.

LOMBARDO-VENETIAN or AUSTRO-ITALIAN KINGDOM, a political and administrative division of the Austrian empire, comprising the whole E quarter of Northern Italy, and bounded by the Sardinian dominions and the canton of Ticino on the W; on the NW by the Grisons; on the N by the Tyrol and Carinthia; on the E by Istria, Carniola, and the Adriatic; on the S by the Po, from its confluence with the Ticino till it enters the gulf of Venice. It lies between 9° and 14° E long., and 45° and 47° N lat. Its greatest length, from the frontiers of Carniola on the E, to the canton of Ticino on the W, is 220 m.; its breadth from the Po to Mont Brenner, is 140 m. The following was the administrative division of the REGNO LOMBARDO-VENETO in 1845, with the area in Italian sq. m., and the pop. in 1844, as given in Bianchi's *Geografia Politica dell' Italia:*

	Distretti.	Area.	Population.
I. LOMBARDIA.			
1. Milano,	16	532·59	556,583
2. Sondrio,	7	1,180	92,000
3. Como,	26	827	380,000
4. Bergamo,	18	1,226	350,000
5. Brescia,	17	990	334,000
6. Pavia,	8	304	163,000
7. Lodi-e-Crema,	9	348	212,000
8. Cremona,	9	396	200,000
9. Mantova,	17	685	254,000
II. PROVINCIE VENETE.			
1. Verona,	13	986·28	290,000
2. Vicenza,	13	767·59	300,000
3. Belluno,	8	942	140,000
4. Udine,	21	1,919	400,000
5. Treviso,	10	709·45	270,000
6. Padova,	12	624·84	300,000
7. Rovigo,	8	323	140,000
8. Venezia,	8	740	280,000

Bianchi thus estimates the total area of the Lombardo-Veneto kingdom at 13,259·13 Italian sq. m. of 60 linear m. to a degree; and the pop. at 4,827,599. The same authority assigns to Trentino or Tirolo-Italiano an area of 4,080 Italian sq. m., with a pop. of about 500,000.—The name Lombardy is given by geographers to that portion of N. Italy which is enclosed between the Alps and the N. Apennines, and comprises the W portion of the basin of the Po. They subdivide this region into Upper or Western L., and Lower or Eastern L. The states of Parma and Modena, and the E part of the continental states of Sardinia, are comprised under the appellation Lombardy.

History of Lombardy.] In the 6th cent., when the Langobards conquered Italy, the whole of Upper Italy, nearly corresponding to the *Gallia Cisalpina* of the Romans, was called Lombardy Charlemagne united the Lombardian crown with that of the Frankish empire in 774. During the troubles which agitated the reign of the last kings of the Carlovingian dynasty, the Lombardian cities—at the head of which stood Milan—became very powerful; and, after a long struggle, these republics obtained their independence by the treaty of Constance in 1183. In Milan the influence of the Visconti family rose to such a height that, in 1310, Henry VII. named Mattheus Visconti imperial vicar; and in 1395, Giovanni Galeazzo Visconti was named duke of Milan by Wenceslaus; and Brescia, Bergamo, Padua, Vicenza, and several other towns were annexed to his dukedom. Under Galeazzo's sons, Giovanni Maria, and Giovanni Phillippo, the power of the house of Visconti began to decline. Their sister married Duke Louis of Orleans; and upon Philip Maria's death, the people of Milan having made choice of his natural daughter, Blanca Maria, who was married to Francesco Sforza, for their duchess, France disputed the right to Milan with the house of Sforza. Charles V. supported Francesco Sforza in the duchy, till his death in 1535. After Francesco's death, Charles, in 1540, bestowed Milan, as a vacant fief of the empire, on his own son Philip, and it remained in the Spanish line of Habsburg till 1700. By the treaties of Utrecht and Baden, in 1713-14, Milan was annexed to the possessions of the house of Austria. The duchy of Mantua was also united at the same time with Austria, and remained under the Austrian dominion till the battle of Lodi, when it was formed into the Cisalpine republic, along with the duchy of Modena, the three papal legations of Bologna, Ferrara, and Romagno, some parts of the former republic of Venice, viz., Bergamo, Cremona, and Brescia, and some districts of Switzerland.

After several changes of constitution, the republic was displaced in 1799, in consequence of the victories of the Russians and Austrians in Upper Italy; but it was re-established in 1800, after the battle of Marengo, and recognised by the peace of Luneville in 1802. After the existence of a brief provisionary government, the senate of the new republic assembled at Lyons on the 28th of January 1801, and elected the first consul Buonaparte president of the Italian republic, as it was now called. On the 15th of March 1805, the republic was converted into the kingdom of Italy, of which Napoleon was proclaimed king On the 7th of June, Napoleon reappointed his step-son, Eugene Beauharnois, viceroy of the newly formed kingdom, which was subsequently aggrandized after the peace of Presburg by the addition of all the Venetian provs. which at the peace of Luneville had been ceded to Austria. In 1808, Napoleon added the provs. of Urbino, Ancona, Macerata, Camerino, and the little republic of Ragusa, to the kingdom of Italy; but after the peace of Vienna he again disjoined Dalmatia, Istria, and Ragusa, of which he formed the Illyrian provs., and on the other hand, united the S part of Tyrol with the kingdom of Italy. During the struggle of 1813, till Napoleon's abdication, the viceroy maintained himself in Italy against the Austrians, and the king of Naples, Joachim Murat. At the congress of Vienna, Austria obtained possession of the Lombardo-Venetian kingdom on the 7th of April 1815. The Sardinian part of Milan, the duchy of Modena, and the provs. which had been taken from the States-of-the-Church, were restored; but the Valteline, Bormio, and Chiavenna, were separated from Switzerland, and the whole divided into the two governments of Milan and Venice. The revolutionary movements of 1848 are slightly detailed in the historical paragraph appended to the article ITALY. For a time the Italian insurrection threatened to extinguish the Austrian domination S of the Alps; and in a memorandum laid before the British cabinet, on the 24th of May 1848, it was proposed, on the part of Austria, and as the basis of mediation between that power and her insurrectionary Italian provs., that "Lombardy should cease to belong to Austria, and would be free either to remain independent or to unite herself to any other Italian state she herself might choose. She would take upon herself a proportionate share of the Austrian national debt. The Venetian state would remain under the sovereignty of the emperor; it would have a separate administration, entirely national, settled by the representatives of the country themselves, without the intervention of the imperial government, and represented at the central government of the monarchy by a minister whom it would maintain there, and who would conduct the relations between it and the central government of the empire. The Venetian administration would be presided over by an archduke viceroy, who would reside in Venice as the emperor's lieutenant; the Venetian state would support its own expenses, and contribute to the expenses of the empire (about £200,000 a-year), besides taking a share of the national debt. The Venetian army would be entirely national, as far as its construction is concerned, but subject to the order of the imperial minister of war," &c. Such were the original terms proposed in London under Count Ficquelmont's administration, and rejected by Lord Palmerston on the express ground "that such an arrangement would not be accepted by the Venetians, and could only be brought about by absolute military conquest." No attempt was made to urge them on the Venetians, and Austria subsequently withdrew her rejected offer. Well-informed politicians were at this juncture of opinion that Austria might, without any material diminution of dignity or real power, have sacrificed the Milanese and even the Mantuan territories. "There is nothing which can be called a defensible frontier short of the Mincio. Indeed, so strongly was the late Emperor Francis impressed with the difficulties and perils inseparable from a foreign administration of Lombardy, that it was with great reluctance he was induced in 1815 to allow it to be annexed to his empire. His sagacious prognostications have been fulfilled, and the experiment of an Austrian viceroy in Milan has failed. But the case is wholly different with the Venetian territory. From the moment that the republic of Venice ceased to be able to repel invasion or to preserve its neutrality, it laid bare the frontier of the Austrian dominions in their most vital part. The campaign of 1798 demonstrated that a French army, when it has forced the Adige and passed the lake of Garda, is on the high road to Vienna. The maintenance of that great line of defences by Austria is absolutely essential, not to her supremacy in Italy,—for that we assume her to have abandoned or forfeited,—but to the security of the imperial capital. We are, therefore, morally certain," continues the *Times*, "that though the cabinet of Vienna might be induced to treat, and we think ought to treat, with reference to Lombardy, it will not hear of the sacrifice of the Venetian territory, until it has undergone the last humiliations of defeat by an enemy of vastly superior military power. The Lombard government, if it be wise, ought at once to close with such terms, if they can be obtained. They are under no obligation of honour or policy to treat conjointly with Venice, for Venice instantly proclaimed her own exclusive republic; and if they hold out for more than they have gotten, they run some risk of losing the whole, or they open the door of Italy to a French republican army." The provisional government of Lombardy, flushed with its first successes, unfortunately refused to listen to such counsels; and the consummate generalship of Marshal Radetzky speedily restored the domination of Austria both in the Venetian and Lombardian sections of her empire.

History of Venice.] The ancient republic of Venice was founded when the Westgoths and Huns under Attila, in 452, and the Langobards, in 568, invaded the Roman empire, and particularly the upper part of Italy, which even in the time of the Romans was called *Venetia*. Many of the ancient inhabitants of this district retired to the islands in the lagunes of the Adriatic, especially that of Rialto, where they founded a small democratic republic governed by ten tribunes. In 697 they elected their first doge (dux) Paolucci Anafesto. To the doge was intrusted the executive power; the people retained the legislative power in their own hands; the juridical authority was reposed in the tribunes and nobility. The first seat of the government was Traclea. It was afterwards removed to Malamocco; and in 737 to Rialto, where a populous city quickly rose out of the sea, and became the far-famed Venice. Great commercial privileges were granted to the young republic by Rome and Constantinople; and her wealthy sons, no longer satisfied with the possession of the islands of the lagunes, extended their conquests into Istria and Dalmatia. In the wars with the Arabs in the 9th cent. the Venetians became expert sailors. In 997 the towns of Dalmatia placed themselves under the protection of Venice. The wealth and power of the republic increased during the crusades, and Venice became the richest and most powerful city of Lombardy:

> "Her daughters had their dowers
> From spoils of nations, and the exhaustless East
> Pour'd in her lap all gems in sparkling showers."

But the aristocracy had begun to encroach upon the rights of the people, and the doge to extend his power: and several revolts took place. In 1172 the doge, Vitali Michieli, was assassinated, and the constitution modified; the arbitrary power of the doge was now limited, and the supreme power given to a numerous assembly of the nobility. The commercial power of the republic reached its greatest height under the doge Enrico Dandolo, who, in the crusade of 1202, undertaken by the Venetians and French, conquered Constantinople at the head of the Venetian fleet, and secured the possession of Candia, and several islands of the Archipelago and the Ionian sea. After the re-establishment of the Byzantine empire in 1261, the commercial road to India was transferred from Constantinople to Alexandria, and the Genoese gained great advantages over the Venetians. Still more important in its consequences was the decisive revolution by which the doge, Gradenigo, in 1297, consolidated an hereditary aristocracy, admitting only a fixed number of noble families to a share in the government, It was at this period that the horrible council of 'the Ten'—as it was called—was established. In spite, however, of the abuses and tyrannies of a haughty and all powerful aristocracy, the possessions of Venice on the continent were gradually enlarged, and her rival Genoa was humbled, after a struggle of 130 years for the supremacy in Lombardy. Vicenza, Verona, Bassano, Feltre, Belluno, and Padua in 1402, Friuli in 1421, Brescia, Bergamo, and Cremona in 1428, and the islands of Zante and Cephalonia in 1483, were incorporated with the Venetian territory; and in 1486, after the death of Jacob, the last king of Cyprus, his wife Catherine Cornaro, a Venetian lady, ceded this beautiful country to the republic. The power of Venice had now reached its acme; henceforward it began to decline. The Portuguese in 1498 discovered the way by sea to the E. Indies and the Venetians lost their commerce with that country by Alexandria. The Osmans, who had become masters of Constantinople, gradually wrested from the Venetians all their possessions in the Archipelago, and in the Morea, and also Albania and Negroponte; and though the danger threatened the republic by the league of Cambray in 1508 was averted by skilful negociations, its power had been greatly crippled by that war. The Osmans took Cyprus in 1571, and Candia in 1669. The Morea was reconquered in 1687, but was again given up in the peace of Passarowitz in 1718; the republic, however, preserved Corfu and Dalmatia. From this period Venice ceased to take any part in the great affairs of Europe. By the peace of Campo-Formio, the whole territory on one side of the Adige, with Dalmatia and Cattaro, was given to Austria; that on the other side was incorporated with the Cisalpine republic, which in 1805 obtained also Austrian Venice and Dalmatia, but without the Ionian islands. In 1814, Venice and its territories were joined to the Lombardo-Venetian kingdom of which they now form a government: Istria and some islands on the gulf of Quarnero have been joined to the government of Trieste; and Dalmatia with its islands to the kingdom of Dalmatia. Thus

> 'Venice lost and won,
> Her thirteen hundred years of freedom done,
> Sinks like a sea-weed into whence she rose!"

Physical features.] Lombardy is for the most part a level country. It is, without doubt, one of the finest and most fertile plains on the face of the earth. Its N frontier, however, is covered by the Alps, and their ramifications, amongst which the Splugen, the Orteler, the Croce, the Leguone, and the Monte dell' Oro, present themselves; and in the E part are the Berici and Euganean hills. The soil of the great plain of L. is entirely alluvial, composed of materials which have been deposited by water to an unknown depth. In the tract nearest to the mountains, gravel of considerable size is mixed with the earth; but it

becomes smaller and less in quantity as it recedes from the high lands; so that the whole seems nearly composed of a black and very fertile mould. The high enclosing mountains afford an immense supply of water, which the great lakes at the foot of the Alps serve to economize, and to discharge with a regularity and steadiness highly favourable to the practice of irrigation; it is to this, no less than to the natural richness of its soil, that L. is indebted for its amazing fertility. The richest part of this superlatively rich country is between Lodi and Cremona. On the SE and E it becomes marshy, especially along the coast of the Adriatic. But though the soil is extremely rich, and the irrigation the most perfect that can be conceived, the culture of corn yields place in a great degree to that of pasture. The grass is chiefly clover, which is cut four times a-year. Rice in some places is cultivated with great success; but from the pernicious effect of so much stagnant water upon the health of the inhabitants, the further extension of rice-fields has been prohibited by the government. Field-labour is performed solely by oxen; and manure, contrary to the practice of all other places, applied solely to the grass. The fields are separated by rows of poplars. Towns and villages are numerous, the population immense, the atmosphere cloudless, and the beauty of the country in general all that fertility and cultivation can bestow. See MILAN (DUCHY OF).

Rivers and lakes.] The Po, the great river of Italy, with its numerous arms and branches, waters this noble region. On the l., the Po receives the Ticino, Olona, Lambro, Adda, Oglio, and Mincio; on the r., the Secchia. The Tagliamento, Livenza, Piave, Brenta, Bacchiglione, and Adige, debouch immediately into the sea. At the foot of the Alps several large lakes present themselves, such as the Lago Maggiore, Lago Varese, Lago Lugano, Como, Iseo, Idro, and Garda.—The principal canals are the Naviglio-Grande on the SW; and the Adigetto, the Bianco, Frassine, Tartaro, and Monselice.

Productions.] The total amount of productive land in L. was estimated in 1837 at 3,285,813 Austrian jochs, each joch being equal to 1⅓ English acre. Of these, 1,119,754 jochs were returned as arable land; 539,766 jochs as vineyards; 513,555 as meadows, gardens, and olive-grounds; 405,192 as pasture lands; and 707,546 as forests. The total produce of this land in grain was 8,466,362 metzens, principally of rye and maize; the metzen being equal to $1\frac{7}{10}$ of an English bushel. The estimated value of the whole produce was 138,298,513 florins, or £6,914,925. In the same year, the total productive land in the Venetian territories was returned at 3,024,915 jochs, of which no less than 1,226,526 jochs were in vineyards. The total produce of grain was 7,765,559 metzens; the estimated value of produce 59,942,317 florins, or £2,997,115. In the Valteline, much care is bestowed upon the culture of vines; and, from the circumstance of their vineyards lying E and W, and thus enjoying the sun during the whole day, the wine is said to be peculiarly excellent.—The culture of silk has rapidly increased, especially in the provs. of Brescia, Cremona, Verona, and Mantua. In 1800 the silk collected amounted to 1,800,000 lbs.; at present it is said to be about 7,000,000 lbs. During the last twenty years, the quantity has increased threefold, and the value sixfold. This led to ill-judged speculations, with a view to bring the silk-trade into a few hands, and to maintain prices at an artificial height: false hopes were raised of an almost unlimited advance. The consequence was a tremendous depreciation in the years 1834-35, something similar to what took place in Germany with respect to the wool trade. The weaving of silk has likewise increased in L.; but is of little importance as yet, employing only 2,349 looms, and 3,276 labourers. [*Raumer.*]—The management of bees also generally forms an important part in the rural economy of the Lombardese. Game, as may easily be supposed from the high cultivation we have described, is scarce. In the rivers and lakes fish are abundant.—With regard to minerals, the N part of the Milanese is, after Piedmont, the richest tract in Italy; but its mines have been much neglected. Private iron mines in L. yielded in 1836 77,064 centners of 123 lbs. English each, 9,049 centners of cast iron, and 49,856 centners of coal; the total value being 346,937 florins. The Agordo copper mines in Venice yielded, in the same year, 3,737 centners.—Landed property is principally held by the descendants of the ancient, noble, and sovereign families. The farm-houses are large and massy; and the fertile land is cultivated with the greatest diligence, though at much expense: artificial irrigation being resorted to extensively, particularly in the rice fields. The roads are in excellent order, and are kept in repair without tolls. Between 1824 and 1831, 24,000,000 francs were expended on the formation of cross roads.

Lombardo-Venetian railway.] The railway from Milan to Venice is 271 kilometres, or 167 m. in length. It has 12 stations, viz.: Milan, Treviglio, Chiari, Brescia, Castiglione, Delle Stivere, Verona, Villanuova, Vicenza, Padua, Mesbré, and Venice. The inclination along one-half of the line is very gentle, being in the proportion of 1 ft. to every 1,000; in other parts it increases to between 2 and 3 ft. in 1,000; but the greatest inclination, namely in the passage over the Oglio and the Etsch, is only between 4 and 5 in 1,000. The breadth of the whole line is 10 yds. The whole cost will be 64½ millions of Lombard livres. The bridge which unites Venice and the main land has cost above 4½ millions of Lombard livres. The other principal works on this railway are a tunnel near Vicenza 100 metres long, bridges over the Adda, the Serio, the Oglio, the Mella, the Chisee, the Mincio, the Adige, the Bacchiglione, and the Brescia, besides several viaducts and smaller bridges. The Lombardo-Venetian railway unites the duchy of Milan with the great maritime and commercial state of Venice, and passes through six towns containing between 20,000 and 30,000 inhabitants. Its importance will be greatly increased, however, when the railway between Genoa and Turin and Lake Maggiore have connected it with the Mediterranean, and as well as with the cap. of Austria by the Trieste and Vienna railroad. A prolongation of this great central line has been executed from Milan to Como; and a branch line from Verona to Mantua.

Manufactures.] The industry of this country, though it has much declined, is still considerable. The principal manufactures are silk, glass, and hardware. The glass manufactories at Venice and Murano produce beautiful mirrors, and a great quantity of glass-beads are fabricated at Venice for exportation. Hardware and fire-arms are manufactured at Brescia. The woollen manufactures have much declined of late years. Jewellery and plate are very well wrought in Milan and Venice; the other objects of industry are china, carpets, paper, artificial flowers, pomatums, preserved fruit, mosaics, musical instruments, perfumes, vermicello, maccaroni, and sausages. In 1837, the amount of capital employed in manufactures in L. was 75,011,055 florins; and in Venice 39,680,000 florins. The commerce is tolerably animated. The value of imports into L. in 1841 was £1,668,849; of exports from it, £3,411,377. The value of imports into Venice in 1841 was £1,320,777; of exports, £519,008. In 1840, 444 vessels of a total tonnage of 52,576 tons entered the port of Venice. Of these, 29 vessels, of a total tonnage of 4,130 tons, were from England. See article VENICE.

Population.] The pop. of the Italian portion of Austria, in 1818, was 4,027,614, whereof 1,859,814 belonged to the Venetian provinces. In 1837 it amounted to 4,600,914, being an increase of 14·1 per cent. in 20 years. The rate of increase in L. was about 1 per cent. above that in Venice. In 1840, the pop. of L. was 2,547,976, being at the rate of 307

per English sq. m.; that of Venice was 2,168,553, being at the rate of 232 per sq. m. The joint pop. was 4,716,529. In 1846 the pop. of the prov. of L. was 2,670,833; of that of Venice, 2,257,200; and that of the Italian Tyrol was estimated at 500,000. The mass of the inhabitants are Italians; there are a few Greeks; 66,500 Germans; and 5,600 Jews. "The Lombard dialects are, perhaps, the harshest in all Italy. The sound of the French *u* is generally found in them. It is not merely unknown, but quite unpronounceable beyond the Apennines; and Verri, the able historian of Milan, supposes it was left behind by the Gauls."

Government.] There was a kind of mock constitution given in 1815 to the Lombardo-Venetian states; but they have no legislative power whatever, and the government *de facto* is quite arbitrary. The representation, such as it is, consists in the landed proprietors, the nobility, and citizens who have at least a property of 4,000 scudi in value. The emperor has the right of excluding any one he thinks not worthy of his confidence, and the taxes are imposed by him. At the head of the government stands a viceroy. The kingdom is divided into the two governments of Milan and Venice, in each of which the administration is carried on by a governor and a government-council; but the whole is controlled by the authorities at Vienna. A recent imperial ordinance, fixing the basis of the future administrative government of the Lombardo-Venetian kingdom, contains the following provisions: The territory of the said kingdom will be divided into the respective provs. of Lombardy and Venice. Lieutenants, or statthalters, will be placed at the head of the local administration, the members of which will reside, in proportional numbers, in the cities of Milan and Venice. The statthalters will be immediately responsible to the ministry at Vienna, to whom all appeals against their decisions must be made. An official staff for the service of this body is organized and appointed by the central government. Prefects of police will be appointed for the security of the two chief cities and their neighbourhoods, which officers will be immediately subordinate to the statthalters. The Lombardian province is subdivided into the districts of Milan, Bergamo, Brescia, Como, Cremona, Lodi, Mantua, Pavia, and Sandrio; that of Venice into the districts of Venice, Belluno, Padua, Rovigo, Treviso, Udine, Verona, and Vicenza. The administration of the districts will be conducted in the first instance by delegates sitting at the capital of the district, and subordinated in administrative function to the statthalters, to whom appeals from them must be made. The duties of the former police commissary are transferred to the delegates. The districts are still further partitioned into communes, the administrative affairs of which will be conducted by commissaries standing immediately below the delegates, whose orders they will execute. The presidents of the various official departments are held responsible for all that is done by the officers under them. Each functionary has to take for his guides the written law and the directions of his superior.

Revenue.] The revenues of the ci-devant Venetian republic were computed at 8,240,000 ducats annually, or £1,716,666 sterling; but what the revenues are at present, since it fell under the jurisdiction of Austria, we have no means of ascertaining. The revenues of the duchy of Milan amount to £300,000; that of the other divisions we are unable to state. According to Tegoborsky, L. in 1839 produced a revenue of 19,200,000 florins, and Venice 15,040,000 florins, which amounts in all to £4,400,000. The *Opinione*, a revolutionary journal of Turin, states that of late years the revenue of L. alone amounted to nearly 70,000,000 francs; while the cost of the government for L. was about 11,000,000, and for that of Venice 10,000,000. "Therefore, in deducting from the 130 millions of revenue the 21 millions of outlay, there remain 100 millions to be set down in round numbers in order to meet the interest of the Lombardo-Venetian debt, which latterly amounted to 200,000,000 francs. Lombardo-Venice yielded then a pure revenue of 100,000,000 above the charge of the civil government, but leaving the expense of the garrison, and the small navy which Austria kept there, still chargeable upon them." In estimating one and the other at about 60,000,000, the writer in the *Opinione* goes on to say, "Austria still derived a yearly revenue of 40 millions of francs from Lombardo-Venice. In short, Lombardo-Venice, which embraced but the seventh part of the whole pop. of the empire, furnished alone the third of its revenue, and yet in point of political, civil, and commercial advantages, was behind all the rest. In fact, if all the money were reckoned that Austria derived from Lombardo-Venice in thirty-three years by the regular taxes, by the sale of government property, and by the public debt unnecessarily and fraudulently increased, we should have a sum of no less than fifteen times 100,000,000 f. absorbed in the bottomless gulf of a wasteful administration,—of one which, during 33 years of peace, instead of healing the wounds of former wars, aggravated them beyond remedy, and tripled its public debt. Notwithstanding the wealth that Austria obtained from the territory of Lombardo-Venice, if one demanded what it did in favour of its Italian subjects, it would truly be at a loss to reply. In the first place, foreign commerce cramped by a system of prohibition carried to the height of absurdity; in the second, the commerce of the interior obstructed in all its branches by a custom-house arrangement the most annoying that could be imagined. Moreover, the national industry sacrificed to the monopoly of that of Vienna and Bohemia; property delivered over to the rapacity of usurers; and the liberty of the subject to the caprices of the police."

Religion.] The established religion is the Roman Catholic; but in the Valteline, Chiavenna, and Bormio, most of the people of quality and fortune are Protestants of the Helvetic confession, and have churches in all the principal towns of these parts. In 1840, there were 2,512,000 Roman Catholics, 2,916 Jews, 414 Calvinists, and 170 Lutherans, in Lombardy; and in Venice 2,132,574 Catholics, 4,389 Jews, 385 Schismatic Greeks, 157 Lutherans, 58 United Greeks, and 45 Calvinists. The clergy are governed by a patriarch, 2 archbishops, and 18 bishops.—A national school system was organized in L. soon after 1815; and in the year 1831, the schools for boys amounted to 2,300; for girls, to upwards of 1,200. In nearly 100 of the boys' schools, an extensive course of practical knowledge was taught The universities of the Austro-Italian states are those of Padua and Pavia. The latter had 60 professors, and 1,316 students, in 1836; the former 40 professors, and 1,260 students. The outlay on the two universities amounted in that year to 179,467 florins. See articles AUSTRIA, ITALY, MILAN, TYROL, and VENICE.

LOMBERS, a village and commune of France, in the dep. of Tarn, cant. of Realmont, 8 m. S of Albi. Pop. 1,712.

LOMBES, or LOMBEZ, an arrondissement, canton, and town of France, in the dep. of Gers.—The arrond. has an area of 79,813 hectares, and comprises 4 cants. Pop. in 1846, 42,109.—The cant., comprising 28 coms., had a pop. of 14,000 in 1841.—The town, situated on the l. bank of the Save, 21 m. SE

of Auch, had a pop. in 1841 of 1,677. It has some trade in wheat, cattle, and wool.

LOMBLEM, one of the Sunda chain of islands, situated between the islands of Solor and Pantar, under the parallel of 8° 20′ S. It is an island of considerable dimensions, being in length about 40 m., by 16 m. in greatest breadth; but it has never been explored, and remains nearly unknown.

LOMBOK, an island in the Eastern seas, between the parallels of 8° 12′ and 9° 1′ S, and intersected by the meridian of 116° 15′, about 53 m. in length from N to S, and 45 m. in average breadth. Its native name is Selaparan. The Bugis call it Sassak. Lombok, the name of the S portion, has been extended by Europeans to the whole island. It is separated from the island of Bali by the straits of L., and from Sumbawa by the straits of Allass. It is mountainous, but well covered with wood and verdure. A volcanic peak in the NE quarter of the island has an alt. of 10,800 Dutch, or 11,134 English ft. Deer, wild pigs, and jungle fowl abound. At the town of Amparam, or, as it is sometimes called, Mataran, in the straits of Allass, and at the plantations and villages along the coast, European ships may be amply supplied with refreshments in exchange for fire-arms, ammunition, and dollars. An extensive commerce is carried on by the natives with all the Malay islands, and particularly with Java and Borneo. The principal article of export is rice, of which 20,000 tons are exported in some years. The inhabitants of L. are said to be chiefly emigrants from the neighbouring islands. They call themselves Sassaks, and are Mahommedans; but some years ago were invaded and subjugated by the people of Bali, who are Hindus. They are governed by a Balinese rajah, who receives 150 out of every 800 *ikats* or sheaves of paddy. A Sassak who becomes a Hindu enjoys the privileges of a Balinese, and is exempt from taxation.—Th strait of L. is formed by the island of Bali to the W, and that of L. to the E. Its S entrance is in S lat. 8° 45′, E long. 115° 43′, and is known by a large island called Banditti island, to the W of which there is no passage. The navigation of this strait is dangerous, owing to the rapidity of the tides and the difficulty of finding anchorage.—The strait of Allass, formed by the island of L. to the W, and that of Sumbawa on the E, is reckoned the best and safest E of the island of Java, having anchorage at several towns and villages, where cattle and refreshments of all kinds may be procured.

LOMELLINA, a province of Continental Sardinia, in the division of Novare; bounded on the N by the prov. of Novare; on the E by the Ticino, which separates it from Austrian Lombardy; on the S by the division of Alexandria, from which it is separated by the Po; and on the W by the prov. of Verceil, from which it is separated by the Po and the Sesia. It has an area of 383 Italian sq. m. Pop. in 1834, 112,000. Its surface presents a fine plain sloping S; and is divided into two nearly equal parts by the Agogna, an affluent of the Po. The other streams are the Terdopio on the E; and the Arbogna in the centre. The chief productions are grain, wine, and chestnuts. It is subdivided into 14 mandamento and 70 comune.

LOMMATSCH, a town of Saxony, in the circle of Meissen, on the Jahne, 23 m. NW of Dresden. Pop. 1,300.

LOMME, a village of France, in the dep. of Nord, cant. of Haubourdon, 3 m. W of Lille. Pop. 2,067.

LOMMEL, a town of Belgium, in the prov. of Limburg, 20 m. N of Hasselt. Pop. 2,261.

LOMMERSUM, or Lommersheine, a village of Prussia, in the prov. of the Rhine, regency and 9 m. NNE of Cologne, near the Erft. Pop. 1,050.

LOMMESEGG, a mountain of Norway, in the bail. of Christian, to the E of the Sogne-field.

LOMMIS, a village of Sweden, in the cant. of Thurgau, and bail. of Tobel, 5 m. SE of Frauenfeld, in a valley of the same name. Pop. (chiefly Catholic) 356.

LOMNICA, a river of Galicia, in the circle of Stry, which has its source on the N side of the Carpathian mountains; runs NNE; and throws itself into the Dneister, on the r. bank, 3 m. above Halicz, and after a course of about 48 m.

LOMNITZ, or Lomniz, a town of Bohemia, in the circle of Bidschow, 8 m. N of Gitschin, and 21 m. N of Neu-Bidschow, on the Pohelka. Pop. 2,494. It has manufactories of cloth and cashmere.—Also a market-town of Moravia, in the circle and 17 m. NNW of Brünn, and 3 m. NNE of Tischnowitz. Pop. 1,390, of whom 400 are Jews. It has manufactories of fine cloth.—Also a village of Prussia, in the prov. of Silesia, reg. and 29 m. SSW of Liegnitz, and circle of Hirschberg, on the l. bank of a small river of the same name, near the confluence of the Bober. Pop. 1,130. It has several calico printing-mills.

LOMNITZER SPITZE, a summit of the Carpathian chain, in the N part of Hungary, and in the NW part of the comitat of Zips. It is the highest point in the Tatra range, and rises to the height of 8,133 ft. above sea-level.

LOMO (Viego), a town of Spain, in the prov. and 36 m. N of Avila, and 11 m. W of Arevalo, in a level district, 1½ m. from the l. bank of the Zapardiel. Pop. 330.

LOMOND-HILLS, two beautiful conical trap hills, situated in the shires of Fife and Kinross. The East L., which is in the p. of Falkland in Fifeshire, and is the most regular and beautiful, is generally stated to be about 1,260 ft. above sea-level, and 900 ft. above the valley which separates it from the Ochills; but Mr. Cunningham, in his *Geology of the Lothians*, estimates its alt. at 1,466 ft. The West L., which is in the p. of Portmoak in Kinross-shire, is usually stated to be about 40 ft. higher, but Mr. Cunningham estimates it at 1,721 ft. At its base lies the beautiful and placid Loch-Leven. Between the two principal Lomonds there rises another point which is sometimes distinguished as the Mid-L.

LOMOND (Loch), the queen of Scottish lakes, distant about 20 m. from Glasgow, and 6 m. from Dumbarton, principally in Dumbartonshire, but having a portion of its E shore in Stirlingshire. It is nearly 30 m. long, and at its southern end from 8 to 10 m. broad; at the middle, however, and towards the N extremity, its breadth is greatly diminished,—in some places to less than 1 m. Its depth varies as much as its breadth: the S portion seldom exceeding 60 ft., whilst N of Luss it increases to 200 and 360 ft. Thirty islands of different sizes are scattered over its surface, some of which rise to a considerable height, and most of the larger ones are finely wooded. At the S end of the lake, the Kilpatrick-hills terminate near Kilmaronock; on the W shore are the mountains of Luss and Arrochar; at the upper extremity tower the mountains of Glenfalloch; and on the E shore the great chain of the Grampians terminates in Benlomond. These ranges are intersected by deep glens, and by numerous mountain-streams which pour their waters into the lake. The rivulets Fruin, Luss, Finlas, and Duglass, with many smaller streams, drain the highlands of Dumbartonshire; but the largest river which runs into Loch-L. is the Endrick, which flows into the SE corner of the loch Steam-boats ply upon the lake, and it is now connected with the Clyde by a railway running from Bowling-bay on that river, to the Balloch-ferry at the

S extremity of the lake, not far from where the river Leven issues from its waters. It has been proposed to carry a railway from the head of the loch to Oban, a distance of 46 m.

LOMONT, a commune of France, in the dep. of the Haute-Saone, cant. of Hericourt. Pop. 1,445. It has a manufactory of calico, and a tile-work.

LOMOV (Nijnii), a district and town of Russia in Europe, in the gov. and 63 m. from Penza. Pop. 6,985.

LOMOWATOJE, a town of Russia in Europe, in the gov. of Kiev, district and 17 m. SE of Tcherkasy, on the r. bank of the Dnieper. Pop. 875.

LOMPRET, a department and commune of Belgium, in the prov. of Hainault, arrond. of Charleroi, watered by the Blanche. Pop. 147.

LOMPREZ, a department and commune of Belgium, in the prov. of Luxemburg, arrond. of Neufchateau. Pop. 398.

LOMZA, an obwodie and town of Poland, in the woiwodie of Augustowo, 78 m. SSW of Suwalki, and 84 m. NNE of Warsaw, on a height near the l. bank of the Narew. Pop. 3,300. It has a suburb, and a fine market-place, and contains 3 churches, 3 convents, a college, an arsenal, and a gymnasium. The streets are broad and well-paved, and the houses well-built. Pop. of obwodie 92,000.

LONATE-POZZUOLO, a village of Austria, in Lombardy, in the prov. and 26 m. WNW of Milan, district and 5 m. E of Busto-Arsizio. Pop. 2,375.

LONATO, a town of Austria, in Lombardy, in the gov. of Milan, deleg. and 15 m. ESE of Brescia, and 3 m. SW of the lake of Garda. Pop. in 1845, 5,600. It is built on the summit of Mount Rova, is enclosed by walls, and has a castle, 4 churches, an hospital, and cavalry barracks. It possesses a forge, several silk spinning-mills, and a manufactory of saltpetre; and carries on a considerable trade in silk. This town is one of great antiquity, and was a place of importance so early as the year 1184. During the Thirty years' war it was to a great extent depopulated by the plague. In 1796, a signal victory was here obtained by Napoleon over the Austrians. Pop. of district 19,739.

LONBORG, a parish of Denmark, in Jutland, SE of Ringkiobing.

LONCIN, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. of dep. 435; of com. 260.

LONCOVO, a town of Turkey in Europe, in Albania, in the sanj. and 15 m. WNW of Delvino, on the gulf of Cassopo, an arm of the Ionian sea.

LONDA, a market-town of the duchy of Tuscany, in the cmp. and NE of Florence. Pop. 2,000.

LONDARI, Leondari, or Phalesiae, a town of Greece, in the Morea, in the dio. of Mantinea, 18 m. SSW of Tripolitza. Pop. 1,250.

LONDE (La), a commune of France, in the dep. of the Seine-Inferieure, cant. and 2 m. W of Elbeuf, and 12 m. SW of Rouen, near a forest of the same name. Pop. 1,500.

LONDEK, or Landek, a town of Poland, in the woiwodie and 35 m. N of Kalisch, obwodie and 15 m. W of Konin, on the r. bank of the Warta. Pop. 389.

LONDERZEEL, a department, commune, and town of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 4,163. The town is 11 m. NNW of Brussels, in a flat but fertile locality. Pop. 3,250. It has extensive breweries, several distilleries of gin, and oil-mills, and several tanneries.

LONDINIE'RES, a canton, commune, and town of France, in the dep. of the Seine-Inferieure, and arrond. of Neufchatel-en-Bray. Pop. 985. The cant. comprises 17 coms. Pop. in 1831, 8,255; in 1841, 14,000. The town is 8 m. N of Neufchatel, and 17 m. ESE of Dieppe, on the Eaulne.

LONDON, the capital of England, and the metropolis of the British empire, the seat of its government, and the centre of its commerce, situated on the river Thames, about 60 m. from its mouth. The cities of London and Westminster, the boroughs of Mary-le-bone, Finsbury, Tower-hamlets, Southwark, and Lambeth, and the other adjoining suburban towns, villages, and hamlets, are all here united in one great metropolis, constituting by far the most extensive, concentrated, and important centre of population, wealth, and commerce in the world, and "its true metropolis." Southwark, Lambeth, and some of the minor metropolitan districts, are situated on the S bank of the Thames, in the co. of Surrey; but the great mass of the metropolis stands on the N bank of that river, in the co. of Middlesex. The city of L., strictly so called, forms but the central nucleus of an enormous wilderness of streets, squares, and edifices; and the dome of St. Paul's cathedral, in the centre of the city, stands in N lat. 51° 30′ 47·59″, and W long. 0° 5′ 48·2″. Besides the central city of L., the city of Westminster at the W end, the boroughs of Southwark and Lambeth on the Surrey or S side of the Thames, the borough of Tower-hamlets in the E precincts, the borough of Finsbury in the N precincts, and the borough of Mary-le-bone adjoining Westminster in the NW precincts, the extension of the former limits of what was called L., upon every side, has caused junctions with many large villages now scarcely to be distinguished from, and in fact absorbed in or forming suburbs to and rapidly increasing with it, so that they are now as much a part of L. as Paddington in the borough of Mary-le-bone, or Islington in the borough of Finsbury. In order to contrast the pop. of L. with that of Paris, Mr. Rickman has comprehended a radius of 8 m. around St. Paul's, but not only do continuous or almost continuous lines of houses now extend to a greater distance, connecting L. with numerous additional towns, villages, and hamlets,—as the centre of a circle is connected by radii with series of points within its circumference; but the metropolitan criminal circuit has been extended by the law of 1834, and has now included in it not only the villages in Middlesex whose prisoners were always tried at the Old Bailey sessions, but other towns and villages in Essex, Surrey, and Kent, within the limits of that court itself. The metropolis, in this view, therefore, comprehends, besides the cities and boroughs already noticed, and Kensington, Chelsea, &c., also Tottenham, Edmonton, Hornsey, Highgate, Hampstead, Hayes, Hendon, Wilsden, Brentford, Acton, Chiswick, Isleworth, Fulham, and Hammersmith, in the co. of Middlesex; Battersea, Bermondsey, Camberwell, Clapham, Streatham, Barnes, Putney, Tooting, Wandsworth, Merton, Mortlake, Kew, Wimbledon, and Richmond, in Surrey; Eltham, Charlton, Lee, Lewesham, Greenwich, Woolwich, Plimstead, and Deptford, in Kent; and Barking, E. Ham, Ilford, Low Layton, Walthamston, Wanstead, Chingford, and Woodford, in Essex. In our general description of the metropolis, however, we shall here confine ourselves to the more restricted sense of the term, referring to the special articles, elsewhere contained in this work, for every separate locality here enumerated.

Area.] The extent of the area covered by the buildings, &c., of the metropolis, in a restricted sense of the term, has been variously estimated. Even Mr. Rickman's estimate of a radius from St. Paul's to the parish churches situated within 8 m. of that central object, only involves, as we have seen, a sense of the term *metropolis* somewhat restricted. In a still more limited sense, a radius of about 5 m. from St.

Paul's has been assumed, comprising an area of 9½ or 10 m. in diameter. But as the breadth of the great mass of buildings from N to S is considerably less than the length from E to W, other estimates more strictly confined to and guided by these peculiarities, and within still narrower limits, have been formed, according to which the metropolis extends from Poplar on the E, to Knightsbridge on the W, a length of 7½ m. And as the Regent's canal forms a pretty accurate boundary, (to the exclusion, however, of Portlandtown, Islington, Kingsland, Hackney, &c.,) round the whole of the N half of the metropolis, from Limehouse on the E to Paddington on the W; while, on the other hand, the Grand Surrey canal at Walworth, on the S, forms a limit, which, stretched W to Chelsea-reach, includes within it the whole of the more restricted limits on the S; the average breadth of the metropolis may be estimated from the Regent's canal at the new North road, to the Grand Surrey canal at Walworth, an extent of more than 4 m. The circumf. of this area must at least be 30 m., and the square contents not under 18 m. According to the population returns of 1841, the square area of the metropolis is computed at 31,498 acres, distributed as under:

City,	600
Westminster,	2,500
Southwark,	590
Lambeth,	8,840
Tower hamlets,	8,988
Finsbury,	4,670
St. Mary-le-bone,	5,310
Total,	31,498

Site and elevation.] The immediate site of the metropolis is a spacious and pleasant valley stretching along the banks of the Thames, here forming a bold curve, from the N bank of which the ground rises with a quick ascent, and then more gradually but unequally heightens to the N and W, which are the most elevated quarters. On the S side, the ground, anciently a morass several miles in extent but reclaimed by an artificial embankment, is nearly level. From the vicinity of Tothill-fields on the S, to that of the Tower on the E, where the buildings follow the natural bend of the river, they rise with the elevation of their site in a kind of amphitheatrical form, and are defended from the N winds by the swelling grounds about Islington and Highbury, and the hills of Highgate and Hampstead. Below the Tower, and to the extremity of Middlesex, along the river Lee, in the vicinity of Wapping, Limehouse, Poplar, &c., the ground is in general flat, and the houses are exposed to the E winds. The W and higher parts of the metropolis stand pleasantly open to the genial breezes of that quarter. Like the S or Surrey side, particularly about Lambeth and St. George's-Fields, the whole of Westminster, except the abbey and part of the Horse-ferry-road, lies extremely low, being in fact beneath the level of the highest tide. Properly speaking, there is no such thing as a hill at all, either on the site or in the vicinity of L.: the elevations are all of a very moderate order. The highest level above high-water mark, according to the most accurate measurement, is at the N side of the aqueduct crossing the Regent's canal, which is 102½ ft. above the Thames level. The base of St. Paul's is 52 ft. The centre of the Regent circus is 77 ft. 2 in. in elevation of site; whilst Great George-street, opposite the S end of King-street, is only 5 ft. 6 in.

Houses, value, &c.] "Of the first impression of the city, the houses, and the shops," says Von Raumer, "much might be said to their advantage. Extent and quantity alone are certainly no standard of value and excellence, either in state, arts, or science, yet here, quantity, which surpasses all the capitals of Europe, nay of the world itself, is extremely remarkable and imposing. To this must be added, that in L. quantity is obviously associated with quality; for wealth is evidently flowing from the most varied activity, which claims the utmost exertions both of body and mind to survey and to comprehend."—The number of inhabited houses in the several great divisions of the metropolis, according to the census of 1831, was as under:

	Houses.
City of London, including East L. and West L.,	17,315
Southwark,	22,482
Westminster,	21,893
Finsbury,	29,605
St. Mary-le-bone,	27,888
Lambeth,	29,079
Tower-hamlets,	66,777
	215,039

The proportionate increase in the number of houses, at each decennary enumeration from 1801 to 1831, was as under:

	Increase per cent.
1811,	16·98
1821,	16·19
1831,	19·42

The rate of increase varied in the different districts. The total increase was 63 per cent.; but in the city of L. the number of houses had actually decreased 5·65 per cent. The area of the city having been already full, there was no room for increase, and the improvements effected in widening the streets accounts for the positive decrease. The number of houses rated at £10 and upwards, and the amount of assessed taxes paid in each of the new parl. divisions proposed by the boundary commissioners in 1832, were as under:

	Houses assessed at £10 and upwards.	Amount of assessed taxes paid.
City of London,	14,564	£205,476
City of Westminster,	17,681	303,421
Borough of Southwark,	9,923	51,262
Do. of Lambeth,	16,405	91,069
Do. of Finsbury,	23,266	201,027
Do. of Mary-le-bone,	21,630	282,201
Do. of Tower-hamlets,	23,187	93,151
	126,656	£1,227,607

From which returns the metropolis appears to have contained, in 1832, 28·58 per cent. of the total number of houses valued above £10 per annum in Great Britain, while the inhabitants paid 29·61 per cent. of the whole amount of assessed taxes, exclusive of land-tax. It appears from the census return recently presented to parliament, that the number of inhabited houses in L. in 1841 was 263,737; and in 1851 had increased to 307,722, or at the rate of nearly 17 per cent. (16·6). The number uninhabited in 1841 was 11,324, and in 1851, 16,889, being an increase of 5,565, or 49 per cent.; while the number building at the same period was 4,032 and 4,817 respectively, being an increase of 785, or 19½ per cent. The facts shown are very remarkable illustrations of the rapid growth of some districts, and the decrease, or almost stationary condition of others. In Kensington, for instance, we have 10,962 inhabited houses in 1841, and 17,292 in 1851, showing an increase of 6,330, or about 60 per cent. (at the same time bearing in mind that the rate of increase of all L. is under 17 per cent.); while the number uninhabited in 1841 amounted to 485, and in 1851 to 1,111, being an increase of 626, or upwards of 128 per cent.! The number building was 656 in 1841, and 740 in 1851. If we add the inhabited to the uninhabited, the results will show that the total number of buildings in Kensington in 1841 was 11,447, and 18,403 in 1851, or an increase of 6,956. Again, in the city of L., strictly so called,

that is, exclusive of East and West L., the inhabited houses in 1841 numbered 7,921, and in 1851 only 7,329, being a decrease of 592; while the number uninhabited in 1841 was 573, and in 1851, 1,127,—an increase of 554, or nearly double. If, however, we add these two results together, they will show in 1841, 8,494, and in 1851, 8,454, or the actual decrease of houses in the city to be 40; while, at the same time, the number building was 82 and 17 respectively. But perhaps the most striking circumstance disclosed is the enormous increase which has taken place in Islington during the last ten years. The number of inhabited houses in this district in 1841 was 8,508, and in 1851 they numbered 13,558, being an increase of 7,050 inhabited houses, or 83 per cent. in the ten years (9·817 years, the period between the two censuses not being ten complete years). The number uninhabited in 1841 was 293, and in 1851, 653, or more than double; while 314 were building in 1841, and 539 in 1851. "Like a polypus with a thousand branches," says Lamartine, writing in 1850, "L. vegetates and engrafts, so to speak, on the common trunk of the *city*, quarters on quarters, and towns upon towns. These quarters, some for labour, and others for the middle classes,—some for the choice leisure of the literary classes, and others for the sumptuosities of the aristocracy and for the splendours of the crown,—not only attest the increase of that city which enlarges itself in proportion to its inhabitants, but they testify to the increase of luxury, of art, of riches, and of ease, of all which the characters are to be recognised in the disposition, in the architecture, in the ornaments, in the spaciousness, and in the luxury, sometimes splendid, sometimes modest, of the habitations of man. In the west, two new towns—two towns of hotels and palaces—two towns of kings of civilization, as the ambassador of Carthage would have said—have sprung up. Towards the green and wooded heights of Hampstead, that St. Cloud of L., is a new park, including pastures, woods, waters, and gardens in its grounds, and surrounded by a circle of houses of opulent and varied architecture, of which each represents a building capital that it frightens one to calculate. Beyond the solitude enclosed in the capital, other towns and suburbs have commenced, and are rapidly climbing, step by step, and hillock after hillock, these heights. In these places arise chapels, churches, schools, hospitals, penitentiary prisons on new models, which takes away from them their sinister aspect and signification, and which hold out moral health and correction to the guilty in place of punishment and branding. In these places are to be seen hedges of houses appropriated to all the conditions of life and fortune, but all surrounded by a court or a little garden, which affords the family rural recollections, the breathing of vegetation, and the feeling of nature present even to the very heart of the towns."

M. Darcy, divisional inspector of the *Ponts et Chaussées* in France in 1843, supplied the following comparative particulars relative to the population, extent of the streets, &c., in Paris and in L. in 1841: The total surface of L. was 210,000,000 of sq. metres; its pop., 1,924,000; number of houses, 260,000; extent of streets, 1,126,000 metres; surface of the streets, not including the foot-pavement, 6,000,000 sq. metres; extent of sewers, 639,000 metres. The total surface of Paris was 34,379,016 sq. metres; pop., 1,053,879; number of houses, 20,526; extent of streets, 425,000 metres; surface of streets, exclusive of the foot-pavement, 3,600,000 sq. metres; length of sewers, 135,000 metres; surface of foot-pavement, 888,000 metres. Thus, in L. every inhabitant corresponds to a surface of 100 sq. metres; in Paris to 34 sq. metres. In L. the average of inhabitants for each house was 7½; in Paris 34. In L. the average length for each house corresponds to 40 metres 40 centi-metres; in Paris to a length of street of only 15 metres. These details establish that there is in L. a greater extent of surface not built over; that the houses are not very high, and that almost every family has its own.—The boulevards of Paris is the part where the greatest traffic takes place, and the following are the results of the observations of M. Darcy on this subject:—On the Boulevard-des-Capucines there pass every 24 hours 9,070 horses drawing carriages; Boulevard-des-Italiens, 10,750; Boulevard-Poissonnière, 7,720; Boulevard-St.-Denis, 9,609; Boulevard-des-Filles-du-Calvaire, 5,856; Rue du Faubourg St. Antoine, 4,300; Avenue-des-Champs-Elysées, 8,959. In L., in Pall-Mall, opposite her Majesty's theatre, there pass at least 800 carriages every hour; on London bridge not less than 13,000 every hour. On Westminster bridge the annual traffic amounts to not less than 8,000,000 horses. By this it will be seen that the traffic in Paris does not come up to one-half of what it is in the streets of L. It has recently been ascertained that the number of vehicles which pass daily Bow church, Cheapside, is not less than 13,796, which contain not fewer than 52,092 persons; and that within the same period of time there are not fewer than 67,510 foot-passengers. Of this number of carriages it may be considered that the greatest number in one hour is about 1,103, and of foot-passengers in the same space of time about 5,750, giving a total number of persons who pass Bow church, Cheapside, in and with vehicles and on foot, about 119,602 persons per day.

Divisions.] Independently of its various local and other divisions, to be afterwards noticed, L. may be considered as comprehending three great districts; viz. the West end, the City, and the East end. The West end extends, in its general acceptation, from the vicinity of the Strand, to Brompton, Hyde park, Paddington, and the Regent's park. It contains the seats of the legislature, the government-offices, the court, and the town-residences of the nobility and gentry. The City, including some portions of its surrounding liberties, forms the centre or heart of the metropolis; the seat of its municipal authority, its law-courts, and its active trade and commerce. The East end is an extensive district, intimately connected with the city, in so far as it comprises the warehouses and residences of the commercial and shipping interest, and, in the immediate vicinity of the river, the docks, wharfs, timber-yards, &c. Temple-bar was long esteemed the line of demarcation betwixt traffic and gentility, inasmuch as it separates L. from Westminster; but trade has for many years been creeping beyond this huge barrier; and Charing-cross—a spot where a number of streets diverge, in different directions, at the W extremity of the Strand—is now the proper boundary betwixt the residence of the fashionable and unfashionable world. When you have walked westwards as far as this radiating point, you begin to be struck with the magnificent proportions of the edifices: and as you penetrate onwards, you feel yourself the more astonished and pleased with the elegance of the architecture, the beauty of the large plate-glass windows, and the degree of opulence which the whole outline displays. —The more authentic and formal divisions of the metropolis, however, are those which have arisen from original local separation; and those which are conducive to its ecclesiastical, political, municipal, and police regulations and purposes.

1. *Local divisions.*] Mr. Rickman, in his pop. returns for 1831, divides the metropolis into—London within the walls; London without the walls; the borough of Southwark; the city of Westminster; a district exclusive of these but within the bills of mor-

tality; and a district not within the bills of mortality. Before describing these local divisions, we may here observe that the phrase 'bills of mortality,' is derived from the following circumstances:—L. having frequently suffered from various pestilences, especially plague, notices, called weekly bills of mortality, were kept and published by the parish clerks, as a warning to the court and others to leave the sphere of contagion whenever the plague became more fatal than usual. We may also here remark, in allusion to the phrases, 'London within the walls,' and 'London without the walls,' that they denote a distinction which now exists only in name.

(1.) *L. within the walls.*—The original city-wall is said to have begun at a fort occupying part of the site of the Tower, whence it was carried N through the street now called the Minories, to Aldgate: diverging thence to the W, it crossed Bishopgate churchyard to Cripplegate; then run S to Aldersgate, and thence to the N of Christ's hospital: turning then directly S to Ludgate, it again took a W course to New Bridge-street, and accompanied the line of the Fleet river to its junction with the Thames, where its termination was marked by another fort. The space within the line thus described is the area of the original metropolis, or of 'L. within the walls.' It is bounded on the W, N, and E, by 'L. without the walls,' except for a short space on the E: on the S, it runs along, and is bounded by, the Thames, from Tower-hill to the foot of Ludgate-hill, a distance of 1½ m., in the course of which the river is crossed by the Southwark and London bridges. The circumf. of 'L. within the walls' is rather more than 3 m.; square area, about 399 acres.

(2.) *L. without the walls* is a space of various width extending around the line of ancient demarcation formed by the walls of the ancient city, beginning at the Thames, where it is crossed by Blackfriar's bridge; and running N, E, and SE, round the city, as far as the Town-liberty. The main part of this area extends W to Temple-bar, constituting what was, in the reigns of the Plantagenets, the best part of the town. It occupies about 275 acres, of which 142 are in what is called East L.; and 133 in West L.

(3.) *The borough of Southwark* lies on the S side of the Thames, which is here crossed by Blackfriars, Southwark, and London bridges, and along which the borough extends for a distance of 2 m. It sends a long narrow branch, about 1 m. in length, down the Kent road; and extends S about 1 m., between the parishes of Lambeth and St.-Mary-Butts.

(4.) *The city of Westminster* is a very extensive division of the metropolis. It stretches along the Thames from Chelsea to Temple-stairs, a distance of about 3 m., in the course of which the river is crossed by the Waterloo, Hungerford and Lambeth, Westminster, and Vauxhall bridges. On the N it stretches along Oxford-street; on the W it encircles Hyde-park and Kensington-gardens.

(5.) *The district within the bills of mortality* comprehends Lambeth, S. Lambeth, Vauxhall, Newington-Bath, Bermondsey, Horsley-down, and Rotherhithe, in Surrey; St. Andrews Holborn, St. Giles, St. George's Bloomsbury, part of Pancras, Clerkenwell, Christ-church, and encircles Bethnal-green, St. Luke's, Shoreditch, Whitechapel, St. George's-in-the-East, Shadwell, Limehouse, Islington, Hackney, Stepney, and Stratford-le-Bow, in Middlesex. The district not within the bills of mortality consists of Chelsea, and the parishes of Kensington, St. Mary-le-bone, Paddington, and St. Pancras with part of Highgate.

2. *Parochial divisions.*] The parochial divisions of the city of L. consist of 98 parishes within the walls, and 11 without, besides extra-parochial districts locally connected with them. The borough of Southwark is divided into 6 parishes. The city of Westminster with its liberties is divided into 10 parishes, exclusive of the precincts of the duchy of Lancaster, and certain extra-parochial liberties. In consequence of the great increase of pop., it has been found necessary to divide several of the large out-parishes.

3. *Political divisions.*] These consist of 7 parliamentary boroughs, viz. London, Southwark, Lambeth, Westminster, Mary-le-bone, Finsbury, and Tower-hamlets; to which, in a more extended use of the terms 'metropolitan boroughs,' may be added Greenwich, including Woolwich and Deptford. The City borough boundaries include the whole space contained within the exterior boundaries of the liberties of the city of L., including the Inner temple and the Middle temple.—Southwark borough boundaries include the old borough of Southwark with the mint and manor of Suffolk, the several parishes of Rotherhithe, Bermondsey, and Christ church, and the clink liberty of the parish of St. Saviour, Lambeth.—The borough boundaries of Lambeth include the parish of St. Mary, Newington, the parish of St. Giles, Camberwell, except the manor and hamlet of Dulwich, and the N part of the parish of Lambeth, with the extra-parochial space encompassed by it.—Westminster borough boundaries include the old city and liberties of Westminster, and the duchy liberty.—Mary-le-bone borough boundaries include the several parishes of St. Mary-le-bone, St. Pancras, and Paddington.—Finsbury borough boundaries include the several parishes of St. Luke; St. George-the-Martyr; St. Giles-in-the-Fields; St. George, Bloomsbury: St. Mary, Stoke Newington: and St. Mary, Islington; the several liberties or places of Saffron-hill, Hatton-garden, Ely-rents, Ely-place, the Rolls, Glass-house-yard, and the Charter-house; Lincoln's-inn and Gray's-inn; the parish of St. James and St. John, Clerkenwell, except that part thereof which is situate to the N of the parish of Islington; those parts of the respective parishes of St. Sepulchre and St. Andrew, Holborn, and of Furnival's-inn and Staple-inn respectively, which are situated without the liberty of the city of London.—The Tower-hamlets borough boundaries include the Tower division of Ossulston hund., together with the several divisions of the liberty of the Tower, consisting of 21 Tower-hamlets, under the military jurisdiction of the Tower as a lord-lieutenancy: namely, Hackney, Norton-Falgate, Shoreditch, Spitalfields, Whitechapel, Trinity Minories, East Smithfield, Tower-Extra, Tower-Intra, St. Katherine, Wapping, Ratcliff, Shadwell, Limehouse, Poplar, Blackwall, Bromley, Bow, Old Ford, Mile-end, and Bethnal-green.—Greenwich borough boundaries will be found under article GREENWICH.

4. *Municipal and Police divisions.*] L. with Southwark is divided for municipal purposes into 26 wards. Each of these divisions is in some respects a separate community. In most of the wards there are subdivisions into precincts, chiefly for the purposes of elections. Bridge-ward-without, comprehending nearly the whole of the borough of Southwark, may be said to be but a nominal division, as it is not represented in the court of common council.—Westminster was early divided into wards, under a jurisdiction separate from that of L. The city of Westminster, properly so called, was divided into 9 wards.—Until recently the city was divided, from N to S, into three day-police districts of nearly equal extent. The divisions of the night-watch coincided with the city-wards, and were otherwise totally unconnected with the system of day-police. The city, however, has recently been divided into 6 districts, on the model of the metropolitan police, instituted in 1829, which did not comprehend the city within its limits and divisions. The district under the care of the latter force extends from Highgate on the N, to Tooting on the S; and from Brentside and Brentford-bridge on the W, to the river Lea and Greenwich on the E, excluding the city, but, with this exception, comprehending an area extending from Highgate to Tooting, 10¼ m., and from Brentford to Greenwich, 16 m. The whole district is divided into 17 police divisions, distinguished by the letters of the alphabet. The river Thames constitutes a distinct police division.

Line of streets, squares, &c.] It is much easier to acquire a practical knowledge of the geography of L. than of Paris, which has not the same number of rallying points, except on the Seine. In L. the principal streets follow the course of the Thames from W to E, and the main cross streets run chiefly in a direction from N to S. Entering L. from the W, there are two principal avenues or grand lines of streets: if we enter from the W on the N side of the city, the first street is Oxford-street, which leads through St. Giles', Holborn, Skinner-street, Snow-hill, Newgate-street, Cheapside, Cornhill, and Leadenhall-street, to Whitechapel and Mile-end, on the road into Essex; if we enter by the Bath-road, on the S side of Hyde-park, the streets are Piccadilly, St. James'-street, Pall-mall, Cockspur-street, Charing-cross, Strand, Fleet-street, Ludgate-hill, St. Paul's churchyard, Watling-street, Canon-street, Tower-street, Wapping, Limehouse, &c. The two principal avenues,—the one by Piccadilly and the Strand, —the other by Oxford-street and Holborn,—unite at St. Paul's, whence, as from a common centre, they again separate to form two other great avenues —Cheapside and Watling-street. The longest line of street, though under several different names, which runs from S to N. is the principal street in Southwark, which extends from the country to London bridge, and thence, under the names of King William-street, Gracechurch-street, Bishopsgate-street, Shoreditch, &c., to the N extremity of the city, on the road to Kingsland, Hackney, &c. The longest street in London under one appellation is Oxford-street,—1 m. 2 furl. 19 poles in length.—If the lines of road running E and W, in the higher or more northern part of the metropolis, under the names of New-road, City-road, Hackney-road, &c., be added to those now named, and to the principal cross-lines connecting these with what will in this case be the intermediate line through Oxford-street, we have a general view of what may be termed the skeleton or outline of the metropolis, exclusive of the S part of Westminster, and of Southwark, and Lambeth.—The houses in L. are commonly four stories in height: never less than three. They have for the most part a dingy ancient aspect; and it is only in the W part of the metropolis that they assume anything like a superb outline. The

greater proportion of the dwellings are small. They are mere slips of buildings, containing in most instances only two small rooms on the floor, one behind the other, often with a wide door of communication between, and a wooden stair with balustrades from bottom to top of the house. It is only in the more fashionable districts of the town that the houses have sunk areas with railings; in all the business parts, they stand close upon the pavements, so that trade may be conducted with the utmost facility and convenience. There are, however, even in the business parts of the town, lines or clusters of neat dwellings, as in the parts devoted to retirement there are also seen indications of business. The chief business part of the town, as already observed, is the city, with the E end, or port. "The city," says Von Raumer, "is really immense; and though there may be no point of view so rich and varied as the *Pont-des-Artes* in Paris, or the Linden in Berlin, we are continually presented with new rows and masses of houses, palaces, shops, &c." It is computed that there are about 10,000 streets, rows, places, alleys, lanes, &c.; besides about 100 squares and crescents. "A great and peculiar beauty of London," says the intelligent foreigner above quoted, "are its many squares, in which the large open space is left free for passengers, and the inner part is enclosed with light iron railings, while the bright green sward is laid out with walks, and planted with shrubs. The squares are exceeded only by the parks. Regent's park alone, with its terraces and palaces, is of the utmost extent and magnificence." "In Paris," says the same writer, "things appear, at first sight, more splendid, elegant, ingenious, and attractive than in L.; but that impression is, to the one made here, as a shadow to the substance, as the shining plated ware to the genuine metal, which, in consciousness of its intrinsic value, needs no washing and polishing. Here, behind the dark walls, there is far more wealth,—perhaps, too, indifference to all the petty arts by which the less wealthy endeavours to diffuse around him the appearance of elegance, opulence, and taste. The noise and bustle in the streets, too, is altogether of a different character; in L. it is ever the cry of activity—in Paris, of obtruding and assuming vanity—in Naples, generally that of idleness—in Berlin, that of little children."

Shops.] In the wholesale and retail supply and consumption of the metropolis of a whole 'nation of shopkeepers,' the shops themselves must not be overlooked. Till within the last 60 years, most of the shops were open, like those of butchers, brokers, and potato-dealers at present; in this way provisions, articles of dress, books, jewellery, watches, &c., were exposed for sale. It was not till about 1710 that they began to be enclosed and glazed. The 'Tatler' mentions as an unlicensed novelty in those days, 'private shops that stand upon Corinthian pillars, and whole rows of tin-pots showing themselves through a sash-window.' The era of sash-windows, however, has also come and gone. The metropolitan shop-fronts have again been thrown, to first appearance, altogether open, though in fact they are now completely fenced with walls of purest crystal, that is with plate glass of enormous dimensions, adapted to show goods to the best advantage. The exhibition of goods in the shop windows is one of the greatest wonders of L. "Everything which the appetite can suggest, or the fancy imagine, would appear here to be congregated. In every other city there is an evident meagreness in the quantity and assortments; but here there is the most remarkable abundance, and that not in isolated spots, but along the sides of thoroughfares miles in length. In whatever way you turn your eyes, this extraordinary amount of mercantile wealth is strikingly observable; if you even penetrate into an alley, or what you think an obscure court, there you see it in full force, and on a greater scale than in any provincial town whatsoever. It is equally obvious to the stranger, that there is here a dreadful struggle for business."—There are two sets of principal streets, which, running almost parallel, nearly the whole extent of the metropolis, from E to W, with few exceptions, form a fourfold line of shops: the one lying to the S, near the river, extends from Mile-end to Parliament-street, more than 3 m. in length, including Whitechapel, Leadenhall-street, Cornhill, Cheapside, St. Paul's church-yard, Ludgate-street, Fleet-street, the Strand, and Charing-cross; the other or northern line, extends from Shoreditch-church almost to the end of Oxford-street, a distance of about 4 m. There are, besides, other streets, not in either of these lines, which contain many large shops, such as Fenchurch and Grace-church-streets, in the city, and Cockspur-street, Pall-Mall, St. James's-street, the Hay-market, Piccadilly Bond-street, Regent-street, &c., at the W end. In 1836, the number of shops in L. was estimated at 15,839, and they have since been greatly increased in number as well as in elegance.

Public parks and gardens.] The parks, those "lungs of the metropolis,"—as Lord Chatham most happily characterized them,—constitute one of the most interesting and beautiful features of the metropolis. They are situated at the W end, principally blending peculiarly with the fashionable end of the town. Measures, however, are now taking for the like adornment not only of the E end of the town, by the intended Victoria-park, on a spacious scale, but of the Surrey side or S end also, by the formation of another park on the E side of Kennington-common. The parks of L., in the opinion of Dr. Waagen, even as they now exist, distinguish this city above all others. "Only fancy," says he, "in the midst of the town, the most verdant lawns, of very considerable extent, here and there adorned with picturesque groups of trees, broken by large pieces of water, and, to complete the rural appearance, numbers of sheep and cows feeding on them; then fancy the striking effect of the great masses of architecture, such as the venerable Westminster abbey, for instance, rising in the distance, above this verdant world, and you will have some idea of the charm of these parks."—St. James's-park, so called from St. James's palace, situated on its N boundary, the most ancient of these open grounds, is about 1½ m. in circumf., with avenues forming delightful shady promenades. In the centre is a fine piece of water interspersed with islands, and covered with water-fowl. On each side are spacious lawns, separated from the avenues by iron railings, and dotted with lofty trees and flowering shrubs. On the E side is the Parade, a large gravelled space, on which, about 10 o'clock every morning, the body-guards required for the day are mustered. At the W end is Buckingham palace, situated much too low in reference to the ground to the N, which, rising with a gentle slope, forms the Green-park, a triangular area, with its apex to the W at Hyde-park corner, surrounded by iron railings, and interesting from the varied levels of its verdant surface.—Hyde-park is an extensive piece of ground, containing about 400 acres, part of which is considerably elevated. The whole is intersected with noble roads, and lawns with luxuriant trees, planted singly or in groups; and the long sheet of water called the Serpentine river enriches the scenery of Hyde-park. The great road through the park to Kensington, named Rotten-row, is a fashionable resort for equestrians. The Kensington gardens adjoin Hyde-park on the W.—Regent's-park is a splendid area, separated from Hyde-park by the numerous streets and squares intervening between Oxford-street and the New road. It consists of a circular enclosure of about 450 acres, laid out on the most approved principles of landscape gardening, and enriched in the centre with lakes, plantations, shrubberies, and villas.—The zoological gardens, situated at the N extremity of the Regent's-park, are very extensive.

Palaces and mansions.] Buckingham palace, first occupied as a royal residence by her majesty Queen Victoria, very shortly after her accession, was erected on the site of Buckingham house, an edifice built in 1703, and purchased in 1761 as a town residence for the queen of George III. The site was chosen by George IV., and after various capricious alterations, the new palace was completed in 1831-32, at an expense of £700,000. Much additional expense, however, has been since incurred in the attempt to improve both its exterior aspect and its interior accommodations; but its plan and appearance have been the subject of general censure.—St. James's palace, situated near the SE corner of the Green-park, was erected by Henry VIII. on the site of an hospital for lepers Since the destruction of Whitehall, in 1695, this palace continued to be the town-residence of the English sovereigns till her present majesty occupied Buckingham palace; nevertheless, it presents few external attractions: in fact, its general aspect is so mean that it has been characterized as

"at once the contempt of foreign nations, and the disgrace of our own."—Whitehall palace, which stood at the E end of St. James's-park, was in a great measure destroyed by fire. The portion now remaining is called the Banqueting-house, a tall, square, massive edifice, built by Inigo Jones, by order of James I., to serve as a banqueting-house to his adjoining palace of Whitehall. —Kensington palace is situated in the gardens of the same name, at the W end of Hyde-park. The building is plain, and irregular. —The most important residences of the nobility merit some notice. Apsley house, the residence of the duke of Wellington, at Hyde-park corner, originally built by Lord-chancellor Apsley, has been remodelled under the direction of Sir J. Wyattville, in the Corinthian style.—Gower, or York house, situated in St. James's-park, at the corner of the Green-park, was founded in 1825, and intended for the residence of the late duke of York; it afterwards became the property of the duke of Sutherland. It is a large quadrangular structure in the Corinthian style of architecture.—Northumberland house, near Charing-cross, the town-residence of the duke of Northumberland, has an imposing but not an elegant appearance. It was erected in the reign of James I. The interior is fitted up in a magnificent style, and contains a superb collection of paintings.—Burlington house, in Piccadilly, formerly the residence of the earl of Burlington, is screened by a lofty but not inelegant wall.—Spencer house, in St. James's-place, is a handsome square structure, surrounded with shrubbery, and having a fine front looking toward the Green-park.—Marlborough house, in Pall-Mall, erected for the great duke of Marlborough, "is another instance of great expense but no taste."—Among the other splendid residences of the nobility may be mentioned those of the earl of Chesterfield in S. Audley-street; of the duke of Devonshire in Piccadilly; of the late duke of Manchester in Manchester-square; of the marquis of Anglesea in Burlington-gardens; of the marquis of Hertford in Regent's-park and Piccadilly; of the duke of Buckingham in Pall-Mall; of the duke of Norfolk in St. James's-square; of the marquis of Lansdowne in Berkeley-square; of the duke of Portland in Cavendish-square; of Earl Grosvenor in Upper Grosvenor-street.

Public monuments, statues, &c.] 'The monument' on Fish-street hill, erected in 1671-77, under the superintendence of Sir C. Wren, to commemorate the great fire, is a fluted column of Doric architecture 202 ft. in height. Above the capital is a cippus supporting a gilded blazing urn.—The pedestal of Nelson's column has on its four sides bassi relievi of Nelson's principal engagements. Each of these compartments is 18 ft. square; and the figure of Nelson in each 7 ft. high. The pedestal is raised on a flight of 15 steps, at the angles of which are African lions in a recumbent posture. The shaft is fluted throughout, the base being richly ornamented, the lower torus with a cable, the upper with oak leaves. The capital is taken from the bold and simple example of Mars Ultor, at Rome; and from it rises a circular pedestal, ornamented with a wreath of laurel and lions' heads, and surmounted by a statue of Nelson. The dimensions of this pillar are as follow: Base, 10 ft. high, 104 ft. wide; pedestal, 39 ft. high, 20 ft. 6 in. wide; base of column, 9 ft. high; shaft, 90 ft. high, 12 ft. wide; capital, 14 ft. high; statue, 17 ft. high; pedestal for ditto, 14 ft. Total height, 193 ft. The estimated expense of this column was £30,000.—The chief public statue, in beauty and execution, is thought to be either that of William Pitt, in Hanover-square by Chantrey, or the equestrian statue of Charles I., at Charing-cross, by Le Soeur. Pitt's statue is of bronze, uncoloured, in gigantic proportions. In Berkeley-square is an equestrian figure of George III., executed by Wilton, of gilt bronze, in a Roman habit. In Leicester-square, is an equestrian statue of George I., of gilt bronze, modelled by Buchard. In St. James's-square, Pall-mall, is a figure of William III., by Bacon. In Grosvenor-square is a statue of George I., the work of Van Nort; in Pall-mall-east, an equestrian statue of George III., by Matthew Cotes. At the back of Whitehall stands a bronze statue of James II., cast by Grinlin Gibbons in 1687. In Bloomsbury-square is a statue of Fox in bronze, by Westmacott. In Queen-square, in the same vicinity, is a statue of Queen Charlotte; in Russell-square, a statue of Francis Russell, duke of Bedford, by Westmacott. At the top of Portland-place is a statue in bronze of the late duke of Kent, by Gahagan. The only statue of George IV. is mounted on what looks like the chimney of the station-house at Battlebridge, Islington, and is a mere copy from the well-known one erected in Hanover-street, Edinburgh.—At Burton-crescent is a statue of Major Cartwright, by Clarke of Birmingham. In St. Paul's church-yard is a statue of Anne. In the centre court of St. Thomas's hospital is a pedestrian bronze figure of Edward VI., the work of the celebrated Schumaker. In Palace-yard stands a figure of Canning, of colossal dimensions, the work of Westmacott. The figure of the duke of York, on the column in Waterloo-place, preserves the character and *tout-ensemble* of the man, although placed at an elevation of 130 ft. In the quadrangle of Somerset-place, is a fine statue of George III., by the elder Bacon, in bronze, which partakes much of that calm sculpturesque repose which marks that great sculptor's statue of Lord Chatham, in Guildhall. There is another of George III., by Chantrey, in the council-chamber, Guildhall. The equestrian statue of the duke of Wellington in front of the exchange is one of the noblest works of art in the city.—The gigantic equestrian statue of his grace over the arch at Hyde-park is a work of more questionable taste.—The only other statue that merits notice is the Achilles of Hyde-park, erected in honour of the duke of Wellington's military achievements. The figure is 18 ft. in height, and is the work of Westmacott. The metal was obtained from twelve 24-pounders taken in the battles of Salamanca, Vittoria, Toulouse, and Waterloo. The statue is the copy of a figure found on the Quirinal-hill, at Rome, which was grouped with horses.

Club-houses.] In the west end a number of large and particularly splendid buildings called Club-houses, places of associative resort unknown to our ancestors, have sprung up within the last thirty years. These establishments are of two kinds:—1. Those forming the property of a private individual, who engages to furnish subscribers with certain conveniencies on payment of a certain sum as entrance money, with a specified annual subscription. Of this class the most noted are Brookes's, White's, and Boodle's, in St. James's-street; also Crockford's, but it superadds the character of a gaming-house. 2. Those individually forming the property of a body of subscribers or members, each paying a certain sum at entry, and afterwards annually, to liquidate the general expenses of the concern. This is the most numerous class: the principal are the Carlton, Reform, Athenæum, Clarence, Traveller's, United University, United Service, and Junior United Service. The houses belonging to these clubs, respectively, are among the finest in the W end of London, and may easily be distinguished in and about Pall-Mall and Waterloo-place, to which they may be said to give not only richness of architectural character, but a certain patrician air. The members of these clubs are admitted to the society by ballot; and a committee undertakes the management. These club-houses combine the character of a hotel for day-boarding, and a reading room.

Hotels, taverns, &c.] It is estimated that there are at all times 120,000 strangers resident for a few days only in the metropolis. To accommodate this numerous transient pop. there is a vast number of hotels, taverns, lodging and boarding-houses, and other places of accommodation. In 1836 the metropolis was estimated to contain 207 hotels, 447 taverns, 5,975 public-houses and beer-shops, 557 coffee-houses, and 8,649 gin-palaces.

The Thames with its navigation] The river Thames is the chief source of wealth and greatness to the metropolis. Its course is particularly described in a separate article; all therefore that it is necessary here to observe is, that it is a placid, majestic stream of pure water, rising in the interior of the country, at the distance of 138 m. above L., and entering the sea on the E coast, about 60 m. below it. It comes flowing between low and fertile banks, out of a richly ornamented country on the W; and, arriving at the outmost houses of the metropolis, a short way above Westminster abbey, pursues a winding course between banks thickly clad with dwelling-houses, manufactories, and wharves, for a space of 8 or 9 m., with a breadth of from a third to a quarter of a mile. The tides affect it for 15 or 16 m. above the city; but the salt-water comes no farther than 30 m. below it. Such, however, is the volume and depth of water, that vessels of 700 or 800 tons reach the city on its E quarter. "What a throng of ships," says Von Raumer, "and what restless activity! Here we see and acknowledge that L. is the true metropolis of the world." See article THAMES.

The present number of Thames watermen is about 1,600. Stow, who died in 1605, says that in his time 40,000 watermen were employed on the Thames. This was plainly an over-estimate; but that their number must have been very considerable is obvious, when we consider that, down to the middle of the last century, the cities of London and Westminster had but one bridge—the old London bridge—which was commenced in 1176, and, after standing 625 years, was pulled down in 1832. The want of bridges to keep pace with the increase of the pop. caused the establishment of numerous ferries. It has been computed that in 1760 the ferries across the Thames, taking in its course from Richmond to Greenwich, were 25 times as numerous as they are at present. Westminster-bridge was not finished until 1750, Blackfriars was built in 1769, Battersea in 1771, Vauxhall in 1816, Waterloo in 1817, Southwark in 1819, the present London-bridge in 1831, and Hungerford in 1844. The watermen and lightermen are licensed to row or work 'boats, vessels, and other craft,' in all parts of the river, from New Windsor, Berks, to Yantlet creek (below Gravesend), Kent, and in "all docks, canals, creeks, and harbours of or out of the said river, so far as the tide flows therein."

A rule of the corporation, issued in 1836, specifies the construction and dimensions of the boats to be built after that date for the use of the watermen. A wherry, to carry 8 persons, must be 20½ ft. in length of keel, 4½ ft. breadth in the midships, and of the burden of 21 cwt. A skiff, to carry 4 persons, must be 14 ft. length of keel, 5 ft. breadth in the midships, and of 1 ton burden. The census of 1841 gives the following numbers of those employed in boat-work in the metropolis:

Boat and bargemen and women, .	2,516
Lightermen, ...	1,503
Watermen, ...	1,654
	5,673

The 'boat and bargemen and women' thus enumerated, are, it may be presumed, those employed on the canals which centre in the metropolis; so that deducting these, we have 3,157 as the number of boat, bargemen, lightermen, and watermen belonging to the Thames.

The first steam-boat started on the Thames was the Margery, which, in 1818, commenced plying daily from Wapping to Gravesend and back. The average duration of her voyage to Gravesend was 5½ hours; at present, with favouring wind and tide, the distance, 31 m., is done in 1½ hour. The average tonnage of a steamer running between L. and Greenwich or Woolwich is 70 or 80 tons; for plying between L.-bridge and Westminster, from 40 to 50 tons; one adapted to run to Gravesend, or beyond, 180 tons. The river-steamers generally commence running on Good Friday or Easter Monday, and continue until the 1st of October, or a little later, if the weather be fine. Each steamer carries a captain, a mate, and 3 men as crew, with an engineer, a stoker, and call boy—or eight hands altogether on board. The number daily at work on the river-steamers is thus 552, according to a well-informed writer in the *Morning Chronicle*, to whose papers we are indebted for much valuable information on English statistics generally; so that, including the piermen, the clerks, and the 'odd men,' between 700 and 800 persons are employed in the steam-navigation of the Thames. Calculating each voyage to average 6 m., the extent of steam-navigation on the Thames, performed daily in the season, is 8,280 m. The captains receive from £2 to £3 per week; the mates from 30s. to 35s.; the crew, 25s. each; the call boy, 7s.; the engineer from £2 to £3; and the stokers, 30s. The great support of the boats is from the middle and working class, more especially such of the working class as are enabled to afford the expense of a Sunday excursion on the river, and such of the middle class as reside in the suburbs and proceed by this means of conveyance to their accustomed places of business.

The Bridges.] The bridges have ever been esteemed as holding a high rank amongst the finest objects in L. London-bridge is the lowest road across the Thames except the Thames tunnel. It is a remarkably fine stone structure, designed by the late John Rennie, Esq., and erected at a cost of £2,000,000. It consists of 5 semi-elliptic arches. The centre arch is 152 ft. span, with a rise above water-mark of 29 ft. 6 in. The roadway is 53 ft. wide between the parapets, the footways occupying 9 ft. each. The rise in the road is 1 in 132 The length of the bridge from the extremities of the abutments is 928 ft. The whole is constructed of granite.—Southwark-bridge stands about one-third of a mile above London-bridge. It was founded in 1814, and completed in 1819, under the superintendence of Mr. Rennie. It consists of three arches, the centre one having a span of 240 ft., the others of 210 ft. each. The arches are of iron, resting on piers of solid masonry founded on piles. The whole weight of iron employed in the construction of this bridge is above 5,308 tons. The whole expense of this bridge, including that of forming the approaches, was about £800,000. Blackfriar's-bridge stands about a ¼ m. above Southwark-bridge. It was constructed between 1760 and 1770, on a plan by R. Mylne, at a cost of £90,000. The arches are 9 in number, and of the elliptical form. The central arch has a span of 100 ft., and the whole length of the bridge is 995 ft. The repairs already executed on this bridge have cost no less than about six times the whole original expense of the bridge.—Waterloo-bridge crosses the Thames at its greatest bend, a little to the W of Somerset-house, and opposite the central part of the Strand. The structure is formed of granite, and each pier rests on 320 piles. All the arches are elliptical and of equal size, so that the surface is level. The summit is exactly on a level with the Strand, and 50 ft. above the level of the Thames. The whole length of the structure, including the concealed arches, is 2,890 ft.: the length of the bridge is 1,242 ft.: width within the balustrade, 42 ft.: span of each arch, 120 ft.: thickness of each pier, 20 ft.—The Hungerford and Lambeth bridge is a very elegant chain or suspension bridge, across the river from Hungerford-market to the Lambeth bank. The length, 1,410 ft., is divided as follows:—From each shore to pier, 370 ft.; centre between piers, 670 ft. The viaduct is 23 ft. above high-water mark.—Westminster-bridge is an old-fashioned structure crossing the river to Lambeth from the immediate vicinity of Westminster-hall. The architect was Mons. Labelge, a Frenchman. It is built of Portland stone, and consists of 15 arches, gradually diminishing from the centre to each end, that in the centre being 76 ft. span, those at each end 20 ft. The arches are all semicircular. The length of the whole is 1,223 ft., and the extreme breadth 44 ft.—Vauxhall-bridge crosses the river from the bridge-road above Millbank to the thoroughfare adjoining Vauxhall-gardens. It consists of 9 arches of cast-iron, resting on piers formed by a wooden-frame as a foundation, and faced with Kentish rag-stone and Roman cement. It has a light and elegant appearance, and is 860 ft. in length. The span of each arch is 78 ft., and the height 29 ft. The expense of erection was £150,000.

The Thames tunnel.] A great, and long a hopeless, desideratum has now been triumphantly accomplished; namely, the formation of a ground-thoroughfare for carriages and passengers across the Thames, at a point, below all the bridges, where, from the constant passage of shipping of all descriptions, the erection of a bridge would have been highly inconvenient, if not practically impossible. So early as 1802, the project of cutting a tunnel under the bed of the Thames, between Rotherhithe and Limehouse, was set on foot: even then, however, the idea appears to have been by no means original; for in 1798 an attempt was made to effect a similar undertaking between Gravesend and Essex. Subsequent to 1802, various unsuccessful attempts were made to carry through the great work which has now been completed; but it was not till 1824, when a new joint-stock company was established by act of parliament, that anything effectual was accomplished. Entering the ground by an easy spiral staircase for passengers, and an entrance nearly 200 ft. in diameter, leading to a spiral roadway for carriages, with a gradient of about 1 in 25, forming an inclination less steep than many of the London streets, the tunnel runs from the N shore to the N of Wapping, near the London docks, about 2 m. below London-bridge, crossing about 75 ft. below the surface of the river at high water, by two distinct avenues or arched vaults connected with each other by openings, and comprising each a carriage-way and footpath, the whole structure being 38 ft. in width; 22 ft. 6 in. in height; and 453 ft in length from the shore at Wapping to the shore at Rotherhithe. The ground is arched, so that the tunnel, as a whole, may be said to consist of two cylinders, with a central portion common to both. It issues, on the S side of the river, also by an inclined spiral plane and staircase at Rotherhithe, similar to those on the Wapping side. The engineer who had the high merit of accomplishing this great work is Sir Isambard Brunel.

Population.] In the reign of Henry II., in the middle of the 12th cent., the pop. of the metropolis was 40,000; in that of William and Mary, in 1701, it was 674,000; in that of George III., in 1801, 888,198; in same reign, in 1811, 1,009,546; in that of George IV., in 1821, 1,225,694; in that of William IV., in 1831, 1,474,069, or, with allowances for seamen, &c., after noticed, 1,776,556; in that of Victoria I., on 7th June 1841, 1,948,000; on the 31st March 1851, 2,361,640,—being an increase in less than 10 years of more than 21 per cent. The increase during the same period for England and Wales was rather less than 13 per cent. It is usual to allow an addition of one twenty-fifth part for seamen belonging to registered shipping, for soldiers quartered in the various barracks, and for the transitory pop., always arriving and departing so irregularly as to prevent a proper enumeration being made. "The pop. of L. exceeds that of the grand duchy of Tuscany by 300,000; that of the grand duchy of Baden by upwards of 500,000; and is nearly or about five times the amount of the pop. of Nassau. Ascending the kingdoms that fill more or less prominent rôles on the great stage of the political drama, we get the following results: L. is within 400,000 or 500,000 of half the pop. of Bavaria; exceeds by up-

wards of 100,000 half the pop. of Belgium, and by 400,000 half the pop. of Holland; is equal to the whole pop. of Hanover; exceeds the whole pop. of Westphalia by 450,000; and is considerably more than the whole pop. of Greece. These dry figures suggest a lively idea of the perfection to which we have brought the art of packing, illustrating to the last extremity the economical problem of the greatest possible number in the smallest possible space. Assuming the area of L. to be 19 sq. m., it yields us a pop. on each mile of 130,000 human creatures, performing within that stinted compass all the operations of life and death, mixed up in a fearful melée of passions and interests, luxury and starvation, debauchery and criminality, hard work and idleness; besides an infinity of occupations—useful, ornamental, and mischievous." [*Fraser's Magazine.*] With the exception of Pekin,—and, in what we may call the civilized world, without exception,—L. is the most populous city on the face of the globe; and every year it is adding to its pop. nearly that of a city equal to York, the increase being estimated at 20,530 per annum. "There is, however, a material difference between the manner of increase with the kingdom and with its capital. At almost every successive return for L. the district included has been enlarged; and though, in comparing the results of each return with those of the one preceding, due account be taken of the districts added, the fact of a change in the locality embraced materially affects the basis of comparison. In Captain Grant's work on the bills of mortality, published in 1662, the pop. of L. in 1661 was estimated with some care at 384,000 apart from, and at 460,000 when taken with, Westminster, Lambeth, Stepney, and other outlying but contiguous parishes. Thirty-five years afterwards, in 1696, the total was estimated by Gregory King at 527,000; showing an aggregate increase in that period of about 41 per cent. The first regular enumeration or census, in 1801, gave a total of 888,198. But this included the parish of Chelsea, with a pop. of 11,600—not included in King's estimate. Allowing for the addition, the net increase between 1696 and 1801, a period of 105 years, would appear to have been only 40 per cent. Between 1801 and 1851, a period of only half that length, the recorded increase has amounted to 165 per cent. In part explanation, however, we have the well ascertained fact that the burials annually exceeded the baptisms down to about the year 1790; and that an apparent improvement in the sanitary condition of the metropolis, which then turned the scale, has continued ever since. Thus, whatever additions have been annually made by immigration from the country during the last 60 years have not, as previously, been counterbalanced by an excess of deaths, but have been added to year by year, in an increasing ratio, by an excess of births. The most comprehensive division of the metropolitan district is into the three sections of it lying in the cos. of Middlesex, Surrey, and Kent. In the last ten years the number living in the Middlesex and Surrey sections has risen in nearly the same proportion—21 per cent. In the Kentish section the increase is 29 per cent.,—indicating a rapid growth of the eastern districts S of the Thames." [*Globe.*]

Vital statistics.] The rate of mortality throughout England and Wales, so far as the estimate contained in the reports of the registrar-general can yet decide, at present averages 1 in 46; that of females being 1 in 48·2 only, while that of males is 1 in 45·1. This estimate may serve as an index and criterion whereby the relative import of the following statistical details may be more thoroughly appreciated. In 1700, the rate of mortality in L. was 1 in 26; and it went on for 40 years increasing, till 1741, when it was as high as 1 in 20,—the fearful proportion of a twentieth part of the whole pop. being cut off every year. The number of deaths then far exceeded that of the births and as the facility of communication was then less, and fewer persons came from the country to settle in L. than at present, the pop. materially diminished. From 1744 to 1800, a period of 56 years, the deaths still exceeded the births by 267,000, being an average annual loss of 4,800 lives. The growth of L. in its pop., notwithstanding dire reverses such as these, could only be sustained, of course, by a constant influx, to a greater or smaller extent, from extrinsic sources. From 1801 to 1830, during a space of 30 years, the births exceeded the deaths by 102,975, being an average annual gain of 3,600 lives from this cause alone. The average annual mortality of the metropolis, in 1815, was 1 in 38; at present it is 1 in 44, being considerably below the average of all England and Wales, and standing, by contrast, in a most enviable position in relation to Paris, with its mortality of 1 in 36; Madrid, of 1 in 35; Brussels, 1 in 29; Naples, 1 in 28; Amsterdam, 1 in 25; Rome, 1 in 24; Geneva, 1 in 23; Vienna, 1 in 22! Yet, it appears that 48,000 persons,—nearly as many as the entire pop. of the two cos. of Westmoreland and Rutland, or of the two cities of Oxford and Cambridge, with all the people in two such places as Gravesend and Knaresborough to boot,—die every year; 900 every week; and 130 every day; within the bounds of what is called the metropolis!

Climate.] The temp. of L. ranges from 20° to 81°. The average has been calculated at 51° 9′. The limits of the annual variation appear to be one degree above, and one and-a-half below, the mean. The therm. has been known to fall 6° below zero, and to rise to 94° in the shade; but these are extremely rare occurrences.—The quantity of rain which falls is various, and it is calculated that L. is one of the driest places in England. The average of 4 years at the end of last cent., gives 19 inches: in 1802, 15 inches fell: in 1806, 27.—The metropolis is subject to dense fogs, especially during the months of November and December, rendering it necessary to use lights in shops and warehouses throughout the day.—The most prevalent wind is the SW; the least common is the N, the former being calculated to blow during 112 days, and the latter only during 16 days of the year. The SW appears to prevail chiefly in July and August; the NE in January, March, April, May, and June; the NW occurs most frequently from November to March.—The mean height of the barometer is stated to be 29·9 inches.

Cleansing and sewerage.] Judged by a comparison with some of the provincial cities of Britain, L. appears liable to the charge of being extremely dirty. The streets, with the exception of the narrow crossings here and there, are seldom swept; and Dr. Southwood Smith has made the public aware that the low and filthy districts of L. are the sources of fatal and wide-spreading fevers. The city-sewers extend to about 15 m., but form only a small portion of the whole metropolitan drainage, the extent of which cannot be ascertained. The sewers of the metropolitan districts, comprehending a circle of 10 m. from the post-office, are placed under the management of 7 boards of commissioners, being divided into as many districts. There is "scarcely a house without a cesspool under it, and a large number have two, three, four, and more under them, so that the number of such receptacles in the metropolis may be taken at 300,000. The exposed surface of each cesspool measures, on an average, 9 ft., and the mean depth of the whole is about 6½ ft.,—so that each contains 58½ cubic ft. of fermenting filth of the most poisonous, noisome, and disgusting nature. The exhaling surface of all the cesspools (300,000 × 9) = 2,700,000 ft., or equal to 62 acres nearly; and the total quantity of foul matter contained within them (300,000 × 58½) = 17,550,000 cubic ft., or equal to one enormous elongated stagnant cesspool 50 ft. in width, 6 ft. 6 in. in depth, and extending through L. from the Broadway at Hammersmith to Bow-bridge, a length of 10 m. This, there is reason to believe, is an under-estimate. The cesspool, however, in general forms but one-fourth of the evaporating surface: the house-drain forms half or two-fourths, and the sewer one: but, connected as the sewers and house-drains mutually are, and acted

upon by the winds and barometric conditions, the miasma from the house-drains and sewers of one district may be carried up to another."

Supply of water.] The water used in the metropolis is chiefly supplied by the Thames, and an artificial canal, of less impure but more expensive water, called the New river. The water from the Thames is naturally good and soft, but far from pure, notwithstanding the filtration to which it is subjected. The Artesian well water of L., although derived from the chalk, is a very soft water, containing only 5 grains of carbonate of lime per gallon, while the lime salt in the present supply of the companies is from 13 to 20 grains. Before the New river was brought from its distant bed by the exertions of Sir Hugh Middleton, to supply the increasing wants of the metropolis, the inhabitants depended either on the Thames entirely, or on the numerous springs which arose in the high grounds N and W of the city. The total quantity of water actually used is estimated by the water-companies at 44,383,328 imperial gallons per day. A considerable supply, in various districts, is still obtained from the numerous and peculiarly excellent springs and wells which abound, as water appears to exist under the whole city. "The strata of the soil on which L. is built, succeed each other in the following order:—1, superficial and tertiary deposits; 2, plastic or London clay; 3, sand; 4, chalk; 5, sand; 6, weald or blue clay. Of these, No. 2, or the plastic clay, is impervious to water, and effectually separates the springs in the superficial stratum from those in the sand and chalk formations. No. 6, or the blue clay, is likewise impervious, so that the water preserved in the sand and chalk is prevented from sinking further into the bowels of the earth. These strata curve upwards, terminating in the hills, which, at a greater or less distance, encircle the metropolis. Thus is formed what is commonly called 'the L. chalk basin;' but it is properly the blue clay that forms the basin—the sand and chalk being as it were an enormous sponge, which fills the basin, and the plastic clay a lid or cover, which secures the contents of the basin from coming in contact with any impurities from above. The drainage and sewerage of the city may be altered or expanded to any extent, without penetrating the *operculum* of the plastic clay. A more perfect natural tank for the supply of a great city cannot be conceived. And when its vast extent and the circumstance that L. is nearly in the centre and lowest point of the basin, are taken into account, it will be perceived that the greater part of the rain-offerings of the surrounding country are collected in a reservoir directly beneath the metropolis itself. The entire mass of the chalk-formation and the body of water which its cavities permanently contain, it would be nearly impossible to estimate with any approach to accuracy. It is not so difficult to calculate the annual tribute which it receives from the rain that penetrates the stratum where its surface is exposed. The area of this surface has been estimated at from 1,000 to 1,200 sq. m. 'All the rain that falls upon that surface,' we quote the words of an eminent engineer, 'penetrates through the fissures in the chalk, is diffused through its whole extent, and is more especially carried to the lowest part of the basin, which is under and around the metropolis.' If the average fall of rain on the exposed surface be taken at 21 inches per annum, and one-third allowed for evaporation, it is calculated that the quantity of water penetrating one sq. m. of the exposed surface is equal to 3,208,228 hhds. per annum. So that the quantity poured annually into the natural basin which we have described, must be nearly 4,000,000,000 of hhds., or ten times the highest estimate made of the present consumption of the metropolitan districts. It would need, therefore, a pop. of 20,000,000 supplied on the scale the Londoners are at present, to consume the annual recruitments to the reservoir in the L. chalk basin, its permanent contents remaining untouched. This is, we conceive, a sufficient answer to the fears of those who, while they acknowledge the feasibility of obtaining a present supply by a more general use of Artesian wells, think, or pretend to think, that according as the number and working of these wells increased, that supply would become precarious." [*Daily News.*] The contents of the greater part of the drains, sinks, sewers, and water-closets of 2,300,000 people, after stagnating in the sewers, are poured daily into the waters of the Thames, incessantly agitated by the tides which ascend to Teddington, and carry the matters in the thickest waters below London-bridge, and 1½ m. above Battersea-bridge, twice a-day. The large Chelsea sewers open into the Thames above the point at which the water is taken up from the Thames by the Southwark and Chelsea water companies; but the suction-pipe of the Chelsea company extends into the centre of the stream. The water, it is said, is filtered by all the Thames water companies. From an article in the *Builder* we learn that "the mean difference of level of high water at three stations, during a month's observations, was, Deptford lower than London-bridge 0·25 ft., and higher than Battersea 1·03 ft. The mean difference of the level of the low water at the three stations was, Deptford lower than London-bridge 0·59 ft., and lower than Battersea 1·98 ft.

The greatest range of tide during the month was, at . .	Deptford, .	21·35 ft.
	London-bridge	20·65
	Battersea, .	16·70
The least range of tide during do.	Deptford, .	14·76
	London-bridge,	14·50
	Battersea, .	12·70
The mean range of tide during do.	Deptford, .	17·91
	London-bridge,	17·51
	Battersea, .	14·91
Giving a mean range of tide for the river between Deptford and Battersea of		16·78

This affords fair data for ascertaining the approximate volume of water which ebbs and flows twice a-day, and consequently of the quantity to be contaminated by each individual or family of the entire pop. The area of the river from Deptford dock-yard to Battersea pier is about 1,360 acres; and we have in each acre, according to the average range of tide here stated, 730,937 cubic ft., or 4,554,000 galls., giving a total quantity in the whole area of 6,193,440,000 galls. for a single average tide, or 12,386,880,000 galls. during each 24 hours. Now, allowing that the pop. contaminating this mass of water is 2,000,000, there will be for each individual an average quantity of 6,193 galls., or upwards of 30,000 galls. for each average family of 5 persons. The fact must not be lost sight of, that as the tidal wave is to a certain extent oscillating in estuaries or rivers like the Thames, it cannot be supposed that the whole of the semi-diurnal additions of drainage impurities can pass completely away with each tide; we know, indeed, that they do not; and it becomes a matter of vital importance to ascertain the progressive amount of these accumulating impurities."

Consumpt of liquors, &c.] There is an artificial fluid which almost supplies the place of water itself in L., as the common and hourly means of slaking thirst,—it is 'London porter.' "None so poor," says a recent writer, "none so miserable, in L., but contemns the thin colourless product of the spring, and will have his deep-brown 'stout,' in pot or can, at home or abroad. With the labouring classes the beverage has become a necessary of life; and, indeed, even the most temperate and orderly among them would perhaps as soon want their solid food, as the 'entire' to wash it down." The L. porter is not generally, as often supposed, made with Thames water; that of the Lea river, and of private wells, is chiefly used. An idea of the immense extent to which the brewing of porter is carried on in L., may be formed from the

following comparative statement of quarters of malt consumed by the under-mentioned L. brewers, as given by Brewers'-hall:

	1837.	1842.	1846.
Barclay & Co.,	100,326	114,090	127 535
Hanbury & Co.,	81.440	92.466	112,450
Reid & Co.,	42.700	50,120	67,590
Meux & Co.,	30,623	43,340	57,050
Whitbread & Co.,	47,012	52,098	55,048
Combe & Co.,	40.454	40,484	51.126
Elliot & Co.,	24,150	27,050	33,881
Calvert & Co.,	32,325	30,660	32,724
Hoare & Co.,	32.347	29,607	32,482
Thornes,	16,404	22,022	22.448
Charrington & Co.,	18,842	20,423	23,306
Goding & Co.,	14,023	17,071	19,391
Taylor & Co.,	23,556	19,430	17,905

The quantity of porter annually brewed in 12 of the principal houses is about 1,400,000 barrels. Ale is also brewed, though not to so great an extent: the quantity brewed by 6 of the principal ale brewers is above 80,000 barrels. There are numerous smaller breweries both of ale and porter, and it is impossible to calculate accurately the amount of the produce; but the quantity annually consumed in L has been estimated at 2,000,000 barrels, or 72,000,000 galls.,—each barrel containing 36 galls.! Wines are annually consumed in L to the amount of 65,000 pipes. The quantity of foreign spirits sent out of stock for consumption in L. during 1827 was 1,512,268 galls.; during 1837, 1,270,931 galls. The quantity of British spirits during the former year was 4.602,367 galls.; during the latter, 5,354,388 galls.—The quantity of milk annually consumed in L., the produce of 13,000 cows, is estimated at 10,500,000 galls.

Consumpt of solids.] The quantity of animal food consumed in the metropolis is very great, but cannot be accurately ascertained. The estimate of butchers' meat used in the metropolis, given in the new edition of the *Encyclopædia Britannica*, appears to us not only to afford as near and accurate an approximation as possible —vague, as it necessarily must, after all, be—of the whole quantity consumed about the period on which it is founded, viz., during the 10 years preceding 1837, but also to afford a fair estimate of the average quantity still consumed by each individual. After making proper allowances for offal, the following is the result:

Beef,	1,766,092 lbs.
Mutton,	2,035,788
Veal,	61,191
To this may be added for pork, 1-20th of the weight of mutton,	101,787
	3,964,858
There is also brought to L. a large quantity of bacon-hams, tongues, and other salted meat. A portion also of the offal, as tripe, liver, and other parts, is used as human food, and so are sausages. These may be estimated as equal to 1-10th, or	396,485
	4,361,343

We thus arrive at a weekly consumption of 4,361,343 lbs., or to a daily consumption of 623,049 lbs., being for 1,800.000 persons, 5⅛ ounces per day, or 109 lbs. yearly. The statistical accounts of Paris give, as the annual consumption of each person in that city, 86 lbs.; and at Brussels the estimate is 3 lbs. higher, or 89 lbs. In no other city of Europe, excepting perhaps Hamburg, does the consumption reach so high as in Paris.—The supply of fish is very irregular. At present the number of vessels entered annually at Billingsgate alone is about 4,000. The consumpt of poultry, game, and venison, is also large.—The quantity of corn consumed in the metropolis is as difficult to be ascertained as that of meat. The greater part is sold by corn-factors at Mark-lane, but much also arrives in the form of flour. In 1838, the consumpt of wheat was estimated at 525,407 quarters; and of flour, 515,005 sacks. The present average annual consumpt has by some authorities been rated at 1,600,000 quarters, four-fifths of which are supposed to be made into bread The annual consumpt of butter is said to amount to 24,000,000 lbs.; and of cheese to 36,000,000 lbs.—The supply of vegetables is chiefly drawn from the kitchen-gardens of Kent and Surrey. The extent of these is estimated at 10,000 acres. and the value of the produce annually sold at £700,000. The utmost economy is used in the cultivation of the ground, so as to obtain several crops of different vegetables from the same spot in the course of the year. Fruit is produced in great abundance at the gardens about Kensington, Hammersmith, Brentford, Twickenham. &c., which are said to be not less than 3,000 acres in extent. The value of the fruit annually sold in London is said to be about £450,000; and the whole annual produce of the grounds cultivated to supply the metropolitan markets with fruit and vegetables, has been valued at £1,200,000. The nursery-gardens in the immediate vicinity of L. extend over 1,500 acres.

Lighting.] The whole of the metropolis is well-lighted with gas. All the public lights are paid for from the parish-rates, and, within the city, by the corporation. For lighting L. and its suburbs, there are 18 public gas-works; and 12 public gas-work companies; with £2,800,000 capital employed in works, pipes, tanks, gas-holders, apparatus; and £450,000 yearly revenue. About 180,000 tons of coal are used in the year for making gas, and 1.460,000.000 cubic feet of gas are made in the year. There are 134.300 private burners supplied to about 400,000 consumers; and 30.400 public or street consumers. There are 175 gas-holders, several of them double ones, capable of storing 5,500,000 cubic feet; 880 tons of coal are used in the retorts on the shortest day, in 24 hours; 7,120,000 cubic feet of gas are used in the longest night, say 24th December; about 2,500 persons are employed in the metropolis alone in this branch of manufacture. Between 1826 and 1827 the quantity of gas made and consumed nearly doubled itself in five years; between 1827 and 1837 it doubled itself again. These statistical details present an extraordinary contrast to the nocturnal aspect of the metropolis in 1797, when a foreign visitor remarked that an improvement had taken place, so that "in the room of lanterns in London, we might observe a lamp at the door of every tenth house."

Supply of coal.] It is less than 300 years since coal became of general use as fuel in L.; and on its first introduction, one or two ships were sufficient for the whole trade. It appears by a charter of Edward II. that the coal of Derbyshire was known and in use, especially in L., although its introduction was greatly retarded by the prejudice existing against such fuel as a substitute for wood in cities. Even in the reign of Elizabeth, the burning of stone coal was prohibited during the sitting of parliament, lest the health of the knights of the shire should be thereby affected! In 1615 about 200 ships were equal to its demand. In 1705, about 600 ships were engaged in the L. coal trade. In 1805, 4,856 cargoes, containing about 1,350,000 tons; in 1820, 5,884 cargoes, containing 1,692,992 tons; in 1830, 7,108 cargoes, containing 2,079.275 tons; in 1840, 9,132 cargoes, containing 2,566,899 tons; in 1845, 2.695 ships were employed in carrying 11,987 cargoes, containing 3,403,320 tons; and in 1848. 2,717 ships making 12,267 voyages, and containing 3,418,340 tons. The increase in the importation during the 10 years from 1838 to 1848, was upwards of 90 per cent. By taking 2,700 vessels as the number now employed, such vessels averaging 300 tons burthen, and giving to a vessel of that size a crew of 8 men, it will appear that at the present time 21,600 seamen are employed in the carrying department of the L. coal trade. The corporation of L. have long been interested in the vend and delivery of coal. Previously to the year 1832, when the collection ceased, the mayor of London had been from time immemorial entitled to a poundage duty of 1s. 6d. per ship on Tyne and Sunderland coals, and 1s. per ship on Scotch and Welsh coals. By an act of Geo. III., in 1807, the corporation were empowered to purchase the parcel of land and building called 'the coal exchange,' which had up to that period been in the hands of private individuals, for the purpose of holding a free and public market for the sale of coals brought into the port of L.; and by an act passed in the reign of William IV., the coal exchange was continued, and the change of measure to weight was authorised, that is to say, from the chaldron of 4 vats, or 26½ cwt., to the ton of 20 cwt., now the standard weight. In 1845 the coal trade of L. petitioned the corporation to enlarge or rebuild the coal exchange, which, from the unprecedented increase of the importation, was found totally inadequate for the requirements of the factors, merchants, and others engaged in such trade. The corporation having granted this petition, the new coal exchange is now one of the most interesting public buildings in L. The building has two façades, one in Thames-street, the other in St. Mary's-hill, which, accommodating themselves to the necessities of their restricted *pose*, are quite plain, saving a bold cornice. At the corner, however, where the entrance is most conveniently placed, a tower is introduced with columns of Roman doric at its base, and Ionic above, and the whole is surmounted by a graceful campanile, decorated with panelled pilasters, and terminated with a finial. Upon entering, through a vestibule of considerable elegance, the great rotunda hall of the building, the airiness of the whole structure, lit up as it is by an ample glazed dome, at once surprises and gratifies the eye. Three tiers of galleries, formed of light iron-work, command the area of the hall, and, at the same time, are connected with a series of chambers in the rear. The whole is painted a bright creamy colour, with the exception of the piers, on which ornamental subjects, all illustrative of scenes connected with coal-mining, are executed in encaustic.

Markets.] The metropolitan markets are numerous, there being no less than 16 flesh-markets, and 25 markets for fish, poultry, corn, hay, vegetables, coals, and other particular articles of consumption. The flesh-markets are of various kinds; some for live stock, others for carcasses, in bulk, and others for the retail of meat; some also are for pigs and pork, and others chiefly for fowls.—Smithfield, to the N of Newgate-street, in the city, is the great cattle-market. It is a large open space surrounded by buildings, covered with pens, in numerous subdivisions, to contain cattle for the convenience of the dealers during examination and purchase. The annual value of the animals sold in Smithfield market is estimated at £8,000,000. Situated as it is, in the very heart of the city, Smithfield market has long been felt to be a great and dangerous nuisance, and an act has at last been obtained for its removal. It is proposed to form a new market adjoining the present site, both for live stock and dead meat, with a provision for lairage and slaughterhouses. The cost of this new market is estimated at £467,000. In the year 1725 the total number of cattle sold in a year in Smithfield was 73,691; and of sheep, 555,620. In 1828, about a century afterwards, the number of cattle sold in Smithfield was 155.714, and of sheep and lambs, 1,412,030. In 1849 the numbers had risen to—cattle, 236,975; sheep, 1,417,010.—In 1836 a splendid cattle-market was opened

at Islington. — Newgate market is one of the largest. Meat and vegetables are here dealt in by wholesale. — Leadenhall market is a depot for meat and poultry, and rivals that of Newgate in carcass and cutting butchers. Nearly all the butchers in L. and its vicinity are supplied from Smithfield, Newgate, and Leadenhall markets. — Farringdon market was erected a few years ago, in Farringdon-street, on a commodious plan, to supply the want of Fleet market, removed to form a good avenue. — Hungerford market is also a flesh-market, erected on the site of a former market at Hungerford stairs. — There are various other markets for butcher's meat, &c. — The slack season in all the wholesale markets is in August and September. Christmas, and the three or four weeks subsequent, are the busiest period. The supply of meat to the dead markets is now greatly in excess of what it was when Mr. M'Culloch wrote; but the increase in the 'live' market has hardly been in the same ratio as the increase of the pop. It has been computed that the consumption of meat in Paris, in 1842, was 86 lb. per head; in Brussels, 89 lb. — Billingsgate, on the site of the river, below the custom-house, is still the chief fish-market, as it was long the only one. Indeed, in the time of Ethelred, about the year 1000, it was the only quay for the port of L. Fishmongers, from different parts of the metropolis, and costermongers, or those who hawk inferior fish about the streets, here congregate to transact business with the salesmen, to whom the fish is generally consigned. The corn-market, situated in Mark-lane, is a convenient structure, with an ascent of three steps to a range of lofty Doric columns. Within the iron gates is a paved quadrangle, surrounded by a colonnade; and the whole is lighted from the roof. The corn-factors have desks here on which the samples are shown. The market-days are Monday, Wednesday, and Friday. — Covent-garden, the great vegetable market for the metropolis, is centrically situated to the N of the Strand, with which it is connected by Southampton street. It was rebuilt in 1829-30, and is a handsome erection, of a quadrangular form. The southern range is a potato-market. Vegetables are sold in the wide space between this and the middle range. The middle range is chiefly for the sale of all the finer varieties of fruits and vegetables; and in the northern, oranges, apples, nuts, gooseberries, cherries, &c., are sold in their seasons. Flowers and every kind of horticultural produce, are sold at this market. — The great hay and straw markets are held in Whitechapel, Smithfield, the Borough, Haymarket, and near the Paddington canal. — There is but one annual fair in L., that of St. Bartholomew, which is opened on the 3d of September, and now continues for two days. It was formerly celebrated for extensive sales of cloth and other goods.

Port.] The regulation of the port of L. is intrusted partly to the lord-mayor, as conservator of the river, partly to a committee of the common council, styled the navigation committee; and certain rights upon the river are claimed by the corporation of the Trinity-house. The port, so far as it is under the jurisdiction of the corporation, reaches on the Kent side to Gravesend, and on the Essex side to the boundary-stone a little above Southend; but in the legal acceptation of the term, it extends from the N. Foreland in Kent, and Shoeberry-ness in Essex, to London-bridge. As actually occupied by shipping, it extends from London-bridge to Deptford, a distance of 4 m. It is divided into the upper, middle, and lower pools, with a space below extending to Deptford. The upper pool is about 1,600 yds. in length, and extends from London-bridge to Union-hole; the middle pool, 700 yds. long, extends downwards to Wapping-New-stairs; the lower pool, 1,800 yds. in length, to the Horseferry-tier, near Limehouse; and the space below, extending to Deptford, is about 2,700 yds. long. The average breadth is from 400 to 500 yds. Vessels of any burden can ascend the river to Deptford; the lower pool admits vessels of 400 tons, the upper those of 200; large barges can sail nearly 130 m. above L.-bridge. The tide flows up about 80 m. from the mouth of the Thames, but the water is not salt above Gravesend. Spring-tides rise about 18 or 20 ft.; neap-tides, 12 or 14 ft.

Docks.] Up to the beginning of the present cent. the city of L. had no docks at all. In fact, several interests were in the way. The proprietors of the various wharfs above and below the bridge were against any scheme of dock-building, and various projects for the improvement both of the legal quays and the sufferance wharfs were proposed in opposition. The legal quays were, however, only 1,464 ft. long altogether, and occupied precisely the same positions that they did at the time of the great fire; while the imports of the port had, from 1700 to 1792, increased from £4,785,538 to £12,072,674, and the exports from £5,387,787 to £14,742,516. The wharfs and quays along the banks of the river, now almost exclusively occupied by coasting-vessels, with river and other steamers, having been found utterly inadequate to the general purposes of commerce, a proposal for the formation of docks was made in 1795; plans and estimates, laid before a general meeting of merchants, were unanimously approved of, and in a few hours a subscription of £800,000 was filled up for carrying the same into execution.

The *West India docks* were begun in 1800, and completed in two years. They are situated in the isle of Dogs, across the narrowest part of which they extend, communicating with the river at both ends, — at Blackwall and at Limehouse, — so that vessels homeward-bound, which enter at the former point, avoid the circuitous course up the river. The docks are two in number. The northern one, which extends over 30 acres, and is 24 ft. deep, can accommodate 300 vessels, and is intended for vessels arrived from the W. Indies; the southern one, for loading outward-bound ships, covers 24 acres, and accommodates upwards of 200 vessels. The length of each is 2,600 ft. An open shed, along the whole length of the quays in front of the warehouses, receives the cargoes; and the goods are hoisted up to the different floors by means of cranes. All W. India produce imported into L. must be unloaded here. The canal to the S of the W. India docks was cut to enable vessels to avoid the circuitous navigation. It now forms a third dock, communicating with the others.

The *London docks*, situated between Ratcliffe-highway and the Thames, and forming, it may be said, part of Wapping, were begun in 1802, and completed in 1805. There are two docks, one of 24 and the other of 14 acres, with basins for small craft. The great dock is 29 ft. deep, and is capable of containing 200 sail of merchantmen. Here are extensive and magnificent warehouses, including a tobacco warehouse, adjoining the tobacco dock, covering 5 acres of ground, and capable of containing 24,000 hhds. of tobacco. The vaults under these and the other warehouses are upwards of 18 acres in extent, and can store 66,000 pipes of wine.

The *East India docks*, situated at Blackwall, were founded in 1803, and completed in 1806. They consist of an import basin of 18 acres, an export basin of about 9 acres, and an entrance basin of 2⅝ acres. In front of these docks is a cast-iron wharf, 750 ft. long, and 900 tons weight, for steamers at all times of tide.

St. Katherine's docks, situated between the London docks and the Tower, were executed within 18 months, and opened in 1828. Nearly 11 acres are covered by the wet docks, and 13 by the warehouses and quays. A large part of the trade here carried on, is connected with the commerce to and from India. The water at the entrance to St. Katherine's docks is deeper than at any of the other docks. Vessels of 800 tons burthen can obtain convenient access.

The *Commercial docks*, on the Surrey side of the Thames, at Limehouse-reach, comprise an area of 49 acres, of which 38 are covered with water. The entrance is by a basin near Dog and Duck stairs. These docks consist of 5 distinct basins.

The *Surrey docks*, adjoining the Commercial, form the terminus of the Grand Surrey canal, and consist of an outer dock communicating with the Thames at Rotherhithe, and an inner communicating with the canal. Vessels for sale have been usually placed in these docks.

Docks for ocean steamers were recently projected to be formed between her majesty's dock-yard and Deptford creek, where 16 to 20 ft. of water can be obtained at low water neap-tide, and 39 to 43 ft. at high water ordinary spring-tides; and there is convenient proximity to the railways S of the Thames.

Shipping.] L., in respect to the extent of its shipping, and the activity and value of its commerce in general, both maritime and inland, stands without a rival. In 1701, the number of vessels belonging to the port of L. was 560, carrying 84,882 tons, and 10,065 men. In 1753, the number of vessels that cleared outwards to foreign parts alone was 1,369, carrying 180,250 tons; of these ships 150 were foreign built. In 1796, the number of vessels that entered the port, exclusive of coasting-vessels, was 4,176, carrying 723,985 tons; of these ships 2,169 were foreigners. The number of vessels entering coastwise was 11,176, carrying 1,059,915 tons. The number of vessels belonging to the port itself about the same period was 1,769, carrying 293,063 tons; besides Indiamen carrying 81,160 tons: in all, 374,223 tons. In 1825, 5,732 vessels of 1,060,687 tons aggregate burthen, loaded with the productions of every country in the world, entered the port of L., whilst the foreign commerce of France during the same year employed only a tonnage of 942,000 tons, distributed

among 8,704 vessels. At the same period the foreign commerce of the United States employed only 1,048,000 tons of shipping; that of Prussia only 572,000 tons; that of the Netherlands only 559,000 tons; and that of the immense empire of Russia only 310,000 tons. In Dec. 1835, the aggregate tonnage of the vessels belonging to the port of L. was 566,152 tons, which exceeded the tonnage belonging to the port of New York in 1835 by 162,338 tons, was nearly equal to a third of the tonnage of the entire mercantile navy of the United States in the same year, and fell short of that of France in 1837 by only 130,826 tons. The number of vessels that entered the port of L. from foreign parts in 1835 was 4,837, carrying 929,148 tons; of the ships 3,780 were British, carrying 740,255 tons, all of which, except 174,103 tons, thus belonged to the port itself. The number of coasting vessels was 20,471, carrying 2,764,982 tons. The subjoined table exhibits a comparative view of the shipping trade of L., Liverpool, Newcastle, and Glasgow, for 1849:

	LONDON.		LIVERPOOL.		NEWCASTLE.		GLASGOW.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
I. COASTWISE VOYAGES.

In the above interesting statement, Liverpool suffers by the comparison, because the coastwise imports include the supply of coal which the metropolis receives by sea, while Liverpool receives hers by inland carriage.

The total tonnage of L. is	7,263,530,	of Liverpool	5,798,614
Omitting coastwise inwards,	2,731,519	,,	431,394
There remains, respectively,	4,532,011	,,	5,367,220

The following is an account of the number of vessels, with their tonnage, that entered the port of L. from foreign parts in the years ended January 5, 1850, and 1851:

	1850.		1851.	
	Ships.	Tons.	Ships.	Tons.
British,	6,917	1,444,311	6,497	1,376,233
Foreign,	3,040	443,923	3,413	527,174
Total,	9,957	1,888,234	9,910	1,903,407

The comparative amount of shipping engaged in the import trade, British and Foreign, which entered the port of L., from all quarters, except coastwise, in 1839 and 1849, and the countries whence it arrived, will be seen from the following table:—

I. SHIPS ENTERED FROM FOREIGN PARTS.

COUNTRIES.	1839. BRITISH. Ships.	Tons.	FOREIGN. Ships.	Tons.	1849. BRITISH. Ships.	Tons.	FOREIGN. Ships.	Tons.

The steamer traffic is a very flourishing branch of the general shipping of the port of L., which has sprung up within the last few years. In 1830, the total number of steamers connected with the port did not exceed 50 vessels; in 1840, the river-steamers themselves alone amounted to that number, while the number of ocean-steamers, to almost all quarters of the globe, has increased to such an extent, that they are about to be accommodated with extensive docks for themselves. The view from London-bridge gives, perhaps, the best idea of the extent of the steam-navigation of the river. Looking downwards, the eye is attracted by a forest of funnels belonging to steamers lying off the custom-house, and various quays from that point to St. Katherine's dock, and thence as far as the sight can penetrate: these are chiefly foreign and coasting vessels. The river-steamers are chiefly clustered close under the bridge, both above and below it, on the city side. At some of the other bridges also, there are piers for their accommodation; and numerous convenient and substantial floating piers have recently been erected at various points of the river. The object of the Blackwall railway in assisting to clear the river above Blackwall must have been in some degree successful, for in the year ending August 1851, 2,416,042 passengers had been carried along this short river-line; and in 1852, 2,718,978.

Imports and exports.] The commerce of L. is an epitome of that of the whole world. It is the emporium of the products of all soils, and all climates; and there is always here, in store, ready for distant commerce, or for domestic use, whatever the ingenuity and industry of man in any part of the globe can spare, to exchange for what his own country or skill cannot yield him. "There is a sublimity in commercial accounts," remarks the popular author of *The Thames and its Tributaries*, "when the items are millions of gallons of wine or brandy, millions of hogsheads of sugar, or tens of millions of pounds of tea. The quantity of wine always in bond in the docks averages, it is computed, 5,000,000 of gallons; and the cellarage which contains these would, in earlier ages, have been esteemed a wonder of the world.

The average quantity of pepper in bond is estimated at 10,000,000 of pounds; of tobacco, manufactured, 23,000,000 of pounds, and of tea, at the East India docks, further down the river, 51,000,000 of pounds. The value of the latter alone, at the very lowest calculation, is £5,000,000 sterling. What a pyramid would it make were it piled in a heap! What bushes must have been planted, and flourished, and been stripped of their leaves, to produce it! and what an area it would cover if spread upon the ground! The wine annually brought into London, this huge den of living men, would form a lake where ships o' war might ride; the rum, another; and the brandy a canal to join them together. The tobacco, were it distributed, would provide every man, woman, and child, in our island, with a pound of poisonous weed; and the indigo annually imported would dye Father Thames, in all his course from Coteswold to Gravesend, as blue as the skies above him." Even a slight sketch of the vast commerce of L. would occupy a space totally disproportionate to the limits of this work. No better idea or estimate of the actual amount and increase of the general commerce of the port of L. can be afforded, than what has been already comprehended in the statistical details of the preceding section. Referring, therefore, to that section, for an idea of the quantities, we shall here confine our attention to the value of the imports and exports, with a brief sketch of the progress of the trade, since beginning of last cent. In 1710, the customs of L. amounted to £1,268,095, while those of all the outports were only £346,081. During the reign of George I., trade made little if any progress, owing to the South-sea scheme, the Scottish rebellion, and the Spanish war: but in 1732, it began to revive. Its advances, however, were comparatively slow, till the peace of Aix-la-Chapelle in 1748, after which trade extended with uncommon rapidity. The next check it sustained was occasioned by the American war. But no sooner was peace proclaimed than it proceeded with renewed vigour; for, so early as 1784, the value of exports to America only had increased to £3,397,500,—considerably above the greatest amount in any year before the war; and the net amount of duties levied in the port of L., and paid into the exchequer that year, arose to the vast sum of £4,472,091. From this period, with the exception of a considerable check in 1790, the value of the commerce of L. continued uniformly increasing. In 1796, the exports amounted in value to £18,410,499, and the imports to £14,719,466. The official value of the imports in 1800 was £18,843,172: of the exports £25,428,922, of which £13,272,494 were in British merchandise. Their real value exceeded £68,000,000,—nearly two-thirds of the value of the trade of the whole kingdom. In 1806, the value of the imports and exports was £36,527,000; in 1819, £46,935,000; in 1825 they had increased to £96,936,000; in 1828 to £107,772,805. At present they probably exceed £140,000,000.—Till 1825, the returns of customs' receipts at the port of L. are very imperfect, chiefly in consequence of the destruction of documents in the fire at the custom-house in 1814. The following will show pretty accurately the fluctuations of trade since 1828:

GROSS RECEIPT OF CUSTOMS.

1800	£5,663,704	1830	£10,307,208
1805	6,907,027	1831	9,465,339
1810	8,472,207	1832	9,334,299
1815	7,789,726	1833	8,692,898
1820	7,474,387	1834	10,697,263
1824	7,679,409	1835	11,773,616
1826	10,291,877	1836	12,156,279
1827	10,402,859	1837	11,188,036
1828	10,529,115	1838	11,254,734
1829	10,211,037	1839	11,431,245
1840	11,116,685	1845	11,033,805
1841	11,757,262	1846	10,663,159
1842	11,422,251	1847	11,261,877
1843	11,354,702	1848	11,134,317
1844	11,778,516		

—Of the extent or value of the inland trade, by river, canal, and land-carriage, either import or export, it is impossible to form a just estimate; but it must be very great, as there is not a town or village of any note in the midland districts which does not keep up a constant commercial intercourse with the metropolis; and since the formation of railways this trade has increased to an immense extent.

Manufactures.] The manufactures of L. are very various, and some of them are conducted on a most extensive scale. The S banks of the river are for a considerable extent covered with the manufactories of iron-founders, dyers, soap and oil-makers, glass-makers, distillers, hat-makers, &c. The other principal manufactures consist chiefly of fine goods and articles of elegant use, such as cutlery, jewellery, gold and silver plate, japan ware, cut glass, cabinet work, carriages, &c. The breweries, ship-building yards, oil-cloth and paper-hanging manufactories, vinegar and chemical works, are also on a large scale; but the manufactures that employ the greatest number of men are the silk manufacture in Spitalfields, and the watch manufacture in Clerkenwell, which employs, when trade is brisk, about 700 persons. The retail trade, as already noticed, is immense.

Edifices connected with commerce.] *The Bank of England* is a heavy but magnificent mass of Grecian architecture, fronting Threadneedle-street, Lothbury, Bartholomew-lane, and Prince's-street. Its S front measures 365 ft. in length; the W 440 ft.; the N 410 ft.; and the E 245 ft. The principal front, seen from the corner of Cornhill, consists of a long line of wall, ornamented with fluted pillars, cornices, &c; but the windows are blank, and deaden the general aspect of the building. The telling-room is a scene of extraordinary activity. The bullion-office, the treasury, and the printing-offices, are the most interesting parts of the edifice. There are employed in this most important institution nearly 900 clerks and porters. The salaries and pensions amount to about £220,000, besides house expenses and allowance to directors,—nearly £50,000 more. The Bank of England was established by act of parliament in 1693; original capital, £1,200,000

The Mint, on Tower-hill, is a handsome Grecian structure, adorned with columns and pilasters, and consisting of three stories, having a centre and wings, the centre being surmounted by a pediment, the remainder by a balustrade. The coin of the realm is here manufactured by machinery invented by Bolton, with recent improvements. The average quantity of gold annually coined is between £2,000,000 and £3,000,000 sterling; of silver, about £300,000.

The Royal Exchange, on the N side of Cornhill, facing the Bank, was first erected in 1668, on the site of a former exchange burned in the great fire. On 10th Jan. 1839, this edifice itself was destroyed by fire; and a new exchange has since been erected on the same site, and of great splendour.

The India house, in Leadenhall street, contains the home government offices of the East India company. The front, about 200 ft. in length, is in the Grecian style of architecture, and in the centre is a portico, rising to the full height of the building, supported on six fluted Ionic columns. The grand court-room, the sale-rooms, the library, and the museum, are particularly worthy of notice

The General Post-office, in St. Martin's-le-Grand, is one of the most magnificent of the public edifices. It is of the Ionic order. The basement is of granite, but the building is of brick, faced with Portland stone. It is 400 ft. in length, and 80 ft. in depth. In the centre of the front is a portico, consisting of 6 columns of Portland stone, resting on pedestals of granite. The vestibule, or great hall, occupying the centre, forms a public thoroughfare from St. Martin's-le-Grand to Foster-lane. This hall is 80 ft. long, 60 ft. broad, and 53 ft. in height. On both sides of it are receiving-rooms for newspapers, inland and ship letters, &c., behind which are rooms for the letter-sorters and carriers. At the N extremity is a court-yard where the mail-coaches pull up and depart.

The Custom-house stands in Lower Thames-street, and fronts the river. The river front consists of a central division and two wings, each of which has a central colonnade of the Ionic order, resting on a rustic basement, and supporting an architrave, which in the centre is surmounted by a balustrade, and in the wings by attic stories. The long-room is 190 ft. long, 66 ft. wide, and 55 ft. high. The whole length of the building is 480 ft; breadth 100 ft. The number of clerks, searchers, and other officers belonging to this establishment is about 2,000.

The Trinity-house on Tower-hill, erected in 1793, is constructed

of Portland stone, in the Grecian style, with a rustic basement, and is ornamented with busts and reliefs. The corporation of the Trinity-house is the guardian of the interests of British shipping in general. They examine such children as are educated for the sea in Christ's hospital, and the masters of king's ships; they also appoint pilots for the Thames. settle the rate of pilotage, &c.

Other edifices connected with trade are the excise-office in Broad-street, the Auction-mart in Bartholomew-lane, the Commercial-hall in Mincing-lane, the Corn exchange, Mark-lane; the Stock-exchange, Capel-street, near the Bank; the South Sea house, Threadneedle-street; Goldsmith's-hall, a new and very elegant and large Grecian edifice behind the post-office; Fishmonger-hall, another splendid modern edifice, forming a conspicuous and fine feature in the N approach to L.-bridge. Three of the sides of this building are open to different and commanding points of view.

Railways and stations.] The Blackwall railway, though short, is a very interesting line, forming a communication between the city of London, the East and West India docks, and Blackwall. It was projected in 1828, and opened on 4th July, 1840, from Blackwall to a temporary station at the Minories, a distance of 3 m. 900 yds.; the remainder of the line to Fenchurch-street, a distance of 330 yds., was opened on 2d August, 1841. The whole length of this railway is thus only $3\frac{3}{4}$ m. The trains are propelled to Blackwall by means of 2 stationary engines of 115 horse-power each, worked in shafts sunk into the earth.—The Greenwich railway station is in Tooley-street, near London-bridge. The Croydon railway station is also near London-bridge. The Southampton, or South-western railway station at Nine Elms, Vauxhall, is extensive and commodious, and well-situated for economy and connexion with the Thames. The Great Western railway station is at Paddington. The grand gateway of the North-Western railway station, at Euston-square, exhibits the Grecian Doric style of architecture upon a scale far exceeding even that of the generality of ancient examples. The central edifice presents one of the noblest halls in the world. The London and Birmingham, and the Great Western, railways are connected by the Thames Junction at Wormwood Scrubs, passing under the Paddington canal. The Eastern Counties railway terminus is at Webb's-square, between Bishopsgate-street without, and Shore-ditch church. The Great Northern railway has its noble terminus near King's-cross.

Electric telegraph.] The electric telegraph company is rapidly effecting communication between L. and all the leading ports and towns of the kingdom. Their wires stretch from Glasgow on the N, to Dorchester on the S; from the E coast at Yarmouth to the W at Liverpool. They have brought upwards of 150 towns into instant communication with each other. They have a central office in Lothbury, London, and 5 branch receiving houses in various parts of the metropolis. From the main station at Lothbury their wires (carried in iron pipes under the streets) diverge to every town of importance in the country. In the metropolis alone they have upwards of 60 persons in their employment; and at each of their country stations they have, independently of messengers, not less than 2, and in many cases as many as 10 signal clerks, all of them skilled in manipulating and interpreting the telegraph. The wires which they have set up for the use of the public alone are upwards of 9,800 m. in length, and extend over a distance of 2,060 m.; and, exclusive of those running under ground and through tunnels or rivers, are stretched on no less than 61,800 posts, varying from 16 ft. to 30 ft. in height, and of an average square of 8 inches, with an apparatus of insulators and winders attached to each. As the most trifling derangement of the wires or apparatus will stop the communication, the utmost care and watchfulness is requisite to prevent and detect accidents; and when a derangement does occur it requires the nicest combinations to ascertain the exact point of the mischance, and great ingenuity and outlay to repair it without delay, and in such wise as to maintain the free passage of the electric current during the operation. Accordingly the whole distance is divided into districts, each district having a superintendent, and under him several inspectors, and a staff of workmen, batterymen, and mechanics, more or less numerous, according to the extent over which he presides. Above the dome of its W station, in the Strand, is a ball 6 ft. high, and 16 ft in circumf., painted of a bright red colour, which, dropping simultaneously with the ball on the top of the Greenwich observatory, communicates the standard time of Greenwich and L., by the different lines of railway, to all parts of the kingdom.—The submarine telegraph now communicates with upwards of 200 continental towns, messages being transmitted and answers returned from Berlin, Antwerp, Brussels, or Ghent for a guinea, enabling foreign correspondents and commercial firms, in matters of emergency, to be in daily and hourly communication. A message may be sent from London to Lemberg, the centre of Russia, and an answer had the same day; and communication is ordinarily made between Dover and Paris in about a minute and a half.

Omnibus transit.] The total number of omnibuses traversing the streets of L. is about 3,000. The number of conductors and drivers is about 7,000. The receipts of each vehicle vary from £2 to £4 per day. Estimating the whole 3,000 at £3, it follows that the entire sum expended annually in omnibus hire by the people of L. amounts to no less than £3,285,000, or more than 30s. a-head for every man, woman, and child in the metropolis. The average journey, as regards length, of each omnibus is 6 m.; and that distance is in some cases travelled 12 times a-day. Taking the average as between 45 and 50 m. a-day travelled by each omnibus, we have upwards of 140,000 m. daily, or 50,000,000 m. yearly. And that this estimate in no way exceeds the truth, is proved by the sum annually paid to the excise for 'mileage,' which amounts on an average to £9 each 'buss' per month, or collectively to £324,000 per ann.; and this, at $1\frac{1}{2}$d. per mile (the rate of duty charged), gives 51,840,000 m. as the distance travelled by the entire number of omnibuses every year. On each of its journeys, an omnibus carries on the average 15 persons. This computation, reckoning 10 journeys a-day, gives 450,000 passengers. This vast extent of omnibus transit has been the growth of 20 years. [*Morning Chronicle.*]

Diocese and see.] L. appears to have anciently been the seat of an archbishop, whose jurisdiction extended over all England except the N parts. The total number of benefices in 1838 is stated in a parliamentary return to have been 603; average gross income of incumbents, £418. The revenues of the bishopric, 26° Henry VIII., were valued at £1,207. The average gross yearly income of the see, for 3 years ending 31st Dec. 1831, was £15,133. The average net yearly income of the dean and chapter, or corporation of the cathedral, during the 3 years ending in 1831, was £11,140; the chapter consisting of the dean and 3 canons residentiary. The dean and chapter have houses assigned to them for residences. An income, chiefly arising from £20.000 South sea annuities, is devoted to the repair of the cathedral and other necessary expenses.

Ecclesiastical edifices.] So numerous are the metropolitan churches, and so diversified in style of architecture in some instances, that it would be a most tedious and unsatisfactory task to enter into anything like a particular description of them all, even did our limits permit; we shall therefore confine ourselves to an account of the two chief ecclesiastical edifices, the cathedral of St. Paul's and the abbey of St. Peter's; to a few particulars regarding the next most interesting of the ancient sacred edifices, viz., the Temple church; and to some miscellaneous observations on the number and the architecture of the parish-churches, chapels, &c., in general.

St. Paul's.] After St. Peter's at Rome, the cathedral of St. Paul's in L. is the finest specimen of Italian architecture in the world. It stands at the head of Ludgate-street, between Cheapside and Fleet-street, on the site of an ancient Gothic structure which perished in the great fire of 1666. The first stone of the new structure was laid on the 21st of June 1675, and the whole erection was completed in 35 years, under one architect, Sir Christopher Wren. It is built of Portland stone, in the form of a Latin cross, and measures 514 ft. in length; 286 ft. in breadth; and 370 ft. in height to the topmost pinnacle. Exteriorly, the walls, which have a dark sooty appearance, except where bleached with rain, exhibit a double range of windows. By two rows of massy pillars the church is divided into a nave and side aisles. At the extremities of the great transept are semicircular projections for porticoes; and at the angles of the cross are square projections, which, besides containing staircases, vestries, &c., serve as buttresses of the dome. The W front toward Ludgate-street is extremely noble. The portico forming the grand entrance consists of 12 Corinthian columns, with an upper portico of 8 columns of the composite order, supporting a triangular pediment. Each end of the E front is terminated by an elegant campanile, each terminating in a dome. The N turret contains the belfry; the southern, the clock. At each end of the transept of the church is a semicircular portico, formed of a dome supported by 6 Corinthian columns, with sculptured entablature. The E end of the edifice is semicircular, and ornamented with sculpture. The dome, which is the principal feature of the building, rises from the intersection of the cross; the lower part is surrounded by 32 columns surmounted by a balustrade and range of Attic antes, on which rests the proper dome, surmounted by a lantern with a ball and cross.—The interior is remarkably imposing. The pavement is formed of alternate slabs of black and white marble. The walls are to a certain extent ornamented (?) with marble monuments to illustrious men, chiefly naval heroes. The choir is divided from the body of the church by the organ gallery.

St. Peter's.] The abbey of St. Peter's, Westminster, stands nearly opposite the houses of parliament. The oldest part of the present edifice was erected in the reign of Edward the Confessor, on the site of an older structure. A large part was built by Henry III. Sir Christopher Wren completed the W front by the erection of the towers; and within these few years the exterior has undergone another renovation and extensive repair, and the chapel of Henry VII. has been restored. The length of the abbey is 416 ft.; breadth at the transept, 203 ft.; nave, 102 ft.; height of the W towers, 225 ft. The Gothic arches which separate the nave from the side aisles, are supported by 48 pillars of grey

marble. The exterior of Henry VII.'s chapel, in the later style of architecture, is unusually rich and varied, and is adorned with crocheted turrets, rising from the buttresses, and ornamented with a profusion of sculpture. Along the sides of the nave of this chapel are the stalls of the knights of the bath, constructed of oak with Gothic canopies, and under each seat is the seat of the esquires of whom each knight has three. The roof of the chapel is nearly flat, and is supported on arches between the nave and side aisles, which turn upon 12 Gothic pillars curiously adorned with figures, fruit, and foliage. The whole ceiling is of stone, elaborately carved, with fanwork and pendents.

Temple church.] The Temple church, between White-friars and Essex-street, is one of the most interesting and curious, as well as most singular in structure, of all the churches in the metropolis. The body, or E part of the church, appears to have been built about 1240. The entrance is through a superb Norman porch. The societies of the Inner and Middle Temple have recently restored this edifice to its pristine beauty, justly regarding it as one of the most ancient and beautiful ecclesiastical monuments in England.

A large proportion of the churches of L. were erected by Wren, the architect of St. Paul's; but that noble edifice has perhaps procured for his other works more celebrity than they actually deserve.—In the next age a different mode of design began to be adopted for churches; and those of St. George's, Hanover-square, St Martin's, and St. George's, Bloomsbury, derive classical dignity from their porticoes. The year 1809 is the date from which the metropolitan architecture of the present cent. may be said to begin. The two Grecian orders, Doric and Ionic, were now, for the first time, adopted as the standard mode, and insulated columns took place of engaged ones and pilasters. From this time porticoes became of as general as they were before of rare application. Most of the new churches in L. and the suburbs professing to be Greek, are little better than parodies and travesties of the style. Some of the more recent buildings show a desire to return to the Italian.—The following table was given in the *Congregational Calendar* for 1840:

	Parish and district churches.		Proprietary chapels.		Nonconformist chapels, &c.	
	No.	Sittings.	No.	Sittings.	No.	Sittings.
City of London,	75	47,728	—	—	47	30,589
City of Westminster,	23	27,749	15	13,174	38	21,642
Mary-le-bone,	20	28,762	14	15,934	40	24,008
Finsbury, .	30	33,687	5	4,446	56	34,041
Tower hamlets,	30	39,398	5	3,824	104	52,852
Southwark, .	12	15,753	3	2,927	38	9,952
Lambeth, .	12	20,590	10	8,856	43	23,640
	202	213,467	52	49,161	366	206,725

The progress of church extension has been recently manifested in the metropolis, by the erection of 35 new churches, with sittings for 45,000 persons, one-half of which are free. Amongst dissenting chapels, exclusive of places of worship belonging to the Jews, and various other small sects of Christians, there were recently 72 Independent, 38 Wesleyan Methodist, 30 Calvinistic Methodist, 32 Baptist, 6 Quaker, 16 Presbyterian, and 28 Roman Catholic, chapels.

Cemeteries.] Each of the Established churches is surrounded with a small burying-ground, and many churches have vaults beneath for sepulture. The odious practice of burying in these confined situations is gradually going out of use. Many interments take place in new cemeteries in the environs. These cemeteries, the property of joint-stock companies, are laid out in a neat manner. The oldest established is that at Kensal Green, in the NW environs, on the road to Harrow. Others are at Norwood in the S, Highgate in the N, and Stoke-Newington in the NE environs; several others are in course of establishment.

Religious societies.] Amongst those societies the object of which is the distribution of bibles, tracts, &c., are the Society for the promotion of Christian Knowledge, consisting of members of the Establishment, and the British and Foreign Bible society, composed of all denominations; the Naval and Military bible society; the Merchant seamen's bible society, &c. Amongst those the object of which is the spread of the gospel in this and other European countries, are the London Itinerant society, the Port of London society for promoting religion among seamen, the Port of London and Bethel Union society, the Episcopal Floating Church society, the Village Itinerant society, the British and Foreign seamen's society, the Christian Union, the Hibernian, the Irish Evangelical, and the Baptist Irish societies, the Continental society, &c. Amongst those the object of which is the spread of the gospel in distant lands, there are the Society for propagating the gospel in foreign parts; the Church missionary society, the London, the Wesleyan Methodist, and the Baptist, missionary societies. Exeter-hall, in the Strand, is an elegant structure, most appropriately fitted up, for the purpose of holding the meetings of these various societies, and raising money to carry out their respective objects.

Learned societies.] The meetings of the various learned societies of the metropolis come into full activity the first week in November, and continue so until June. There then meet periodically about 40 societies for reading papers and the discussion of the various matters of literature, science, and art, which they respectively embrace, in addition to those for the delivery of lectures, and which hold occasionally *soirées*. As the parent of the whole stands the Royal society, embracing the whole range of the various departments of mathematics, natural philosophy, and natural history. There are 4 devoted to antiquities: the Society of Antiquaries, established in 1717; the Numismatic society, the British Archæological society, and the Archæological institute of Great Britain. Natural history, in its various departments, is cultivated by 11: the Linnæan, Zoological, Entomological, Horticultural, Royal Botanic, Botanical, Medico-Botanical, Floricultural, Miscroscopical, and now the Pathological society, whilst the Royal Agricultural society also holds monthly meetings for the discussion of the practice and science of that art. The science of medicine has 9 devoted to its especial cultivation: the Westminster, London, South London and North London Medical, with the Medico-Chirurgical, Physical, Hunterian, Harveian and London Homœopathic societies. For the cultivation of chemistry there are 3—the Pharmaceutical and Chemical societies, and the Royal college of Chemistry. The study of the heavens embraces the resources of 2—the Royal Astronomical and Meteorological societies; whilst 3 devote their attention to the earth, its structure and human inhabitants—the Royal Geographical, Geological, and Ethnological societies. Addressed to specific objects there are the Statistical and Royal Asiatic societies; and for the prosecution of literature there are 2—the Royal society of Literature, and Philological society, in addition to 7 which hold no periodical meetings, with the exception of their anniversaries, and are confined to the republication of the works of the earlier writers. These are the Camden, Parker, Cavendish, Ray, Shakspeare, and Sydenham societies, with the Oriental Translation fund. The useful arts and the kindred subjects of architecture and engineering, embrace the services of 3—the Society of Arts, Institution of Civil engineers, and Royal institute of British architects.—At the Royal, London and Russell institutions, lectures of the highest order of merit on different branches of science are given; whilst 16 other institutions, in which lectures on the general branches of literature and science are delivered weekly, are scattered throughout the metropolis and suburbs. Of the above learned societies, 4 only receive national support in the grant of gratuitous accommodation—the Royal, Astronomical, and Geological societies, and Society of Antiquaries; and two royal grants for premiums to the Geographical society and Royal institute of British architects. The revenues vary much, the two highest being the Zoological and Horticultural societies: but the gross amount of the sums annually expended by the members in the prosecution of objects of scientific and intellectual research, may be stated on a moderate estimate as £56,700 dispensed through their means, to which may be added at least £7,000 for the support of the sixteen minor institutions for scientific instruction. To the above may be added the sinecure endowment of Gresham college, where 7 courses of lectures are delivered at the commencement of every term.

British museum.] The buildings devoted to the purposes of this noble institution stand in Great Russell-street, Bloomsbury. As it now exists, the British museum is an edifice, or rather series of edifices, of great magnitude, forming a spacious quadrangle. The façade presents a noble range of Ionic columns, of one uniform and complete design. The basis of the splendid National museum now exhibited here, consists of the collections made by Sir Hans Sloane, and Sir Robert Cotton. The whole expenditure on this great national establishment has already probably exceeded a million. The library of the British museum contains about 450,000 vols., of which at least 200,000 have been presented or bequeathed. The average annual addition to it is about 30,000 vols. The entire annual amount at present allotted to the service of the library, in all its departments, is £23,261; viz. for salaries in the department of MSS., £2,169; in that of printed books, £7,122; and in the reading-room, £904: for purchases in the department of MSS., £1,823, and in that of printed books, £5,000; for bookbinding, £3,500; for printing catalogues, £873; and for proportion of the expense of secretary's department and of ordinary house expenditure, &c., about £1,870. The aggregate of the sums expended in the purchase of printed books, including maps and musical works, for the museum, from its foundation in 1753, to Christmas 1847, was £102,446; and in the purchase of manuscripts, £42,940. The sums expended during the same period, in prints and drawings, amounted to £29,318; in antiquities, coins, and medals, to £125,257; and in specimens of natural history, in all its branches, to £43,599.

National gallery.] The edifice now occupied by the pictures, &c., belonging to this institution, on the N side of Trafalgar-square, is in the Grecian style, and of great length in front, extending across the whole breadth of the square. The gallery is open to the public. A new site and building for the national collection is admitted to be a desideratum.

Metropolitan press.] The first printing press in

England was erected in 1474. The metropolis is still the great luminary of England. Far more works of all descriptions are printed and published in L. than in all England besides. There are at least 5,000 men engaged in the typographical and printing departments alone. From 500,000 to 600,000 copies of quarterly and monthly, and 200,000 copies of weekly, periodicals, exclusive of newspapers, are regularly sold in L. The number of these weekly periodicals is about 50; of quarterly and monthly periodicals, about 120. The number of daily newspapers published, in 1817, was 5 only, those published every other day, 7: others on particular days, 7. At that period the number of weekly provincial newspapers was 142: Scottish papers, 25: Irish, 44: smaller island, 7. This was considered at the time to constitute a prodigious circulation; but the number of daily papers published in the metropolis now is 14, with a daily circulation of about 60,000. There are also 38 papers published twice or thrice a-week, 24 weekly, and others at longer intervals.

Theatres, &c.] Besides the exhibitions, and the parks and gardens, already separately noticed, the chief places of public amusement are the theatres. Among these are the Queen's theatre, or Italian opera house, in the Haymarket, erected in 1818; the theatres Royal, Drury-lane; Covent-garden and Haymarket; the English opera house, or Lyceum, in the Strand; the Surrey theatre; the Victoria, or Coburg; Princes's, Adelphi, Fitzroy, Olympic, and St. James's; also various others of an inferior description. Concerts, oratorios, &c., take place at stated seasons; and there are musical societies, such as the Philharmonic and the Cecilian, the Madrigal club, the Antient concerts, the Vocal concerts, &c.

University of London.] This important institution was incorporated in 1837, with a chancellor, vice-chancellor, and 36 fellows, empowered to confer degrees in arts, law, and medicine. Institutions of competent educational means have the privilege of sending students to this university to graduate. These are now 28 in number, besides 57 medical institutions. The candidate is required, first, to matriculate; that is, he must pass an examination comprising—1. The simple problems of arithmetic and algebra, and the first book of Euclid; 2. The usual branches of natural philosophy as popularly treated; 3. Chemistry; 4. One Greek and Latin book of the easier class, the grammatical structure of the English language, and the history of England to the end of the 17th cent. If he shows a competent knowledge in three out of four of these—the option lying between chemistry and natural philosophy—he may proceed for honours to examinations. Two years afterwards he may present himself for the B. A. examination, in which he is required to show a competent knowledge in all of four branches, including mathematics and natural philosophy, classics, animal physiology, and logic and moral philosophy. Classics includes, besides the usual subjects, French *or* German, and modern English history. Mathematics is on much the same plan as at Cambridge. In logic and moral philosophy the text-books are Whately, Butler, and Paley. In all these subjects the student must pass as well as he must do in any at Oxford or Cambridge. If successful, he may try for honours, and may now select any one or more of the departments. Two years afterwards he may present himself for the M.A. degree, the examination in which is understood to be equivalent to that of B.A. in honours; and may again select any or all of the three branches—classics, mathematics, philosophy.

University college was founded by subscription, in 1825: it has since received various endowments. The edifice, situated in Gower street, is classical and elegant. There are well-arranged lecture and apparatus rooms, a spacious library, and an anatomical theatre. Pupils in law, medical studies, general science, classics and modern languages, are received.

King's college was founded subsequently to the preceding rival institution, and in a similar way. It is patronized by the dignitaries of the church, &c. The edifice adjoins Somerset-house, forming one of its wings fronting the river. It was opened in 1831. The course of education is similar to that of the preceding, only instruction in the Christian religion, and daily worship, are added.

The college of Physicians was established in 1523. The college buildings are situated in Pall-Mall East, and contain a small but neat theatre, a library, reading-room, &c. The college is constituted by a president, elects, and fellows, who license all physicians to practise within the bills of mortality, and grant extra licences to others to practise in the rest of the empire. The fellows can only be appointed by such as have graduated at Oxford or Cambridge.

The college of Surgeons has its place of meeting in Lincoln's-Inn-Fields. The exterior is handsome and classical, with an Ionic portico; in the interior are board and council-rooms, libraries, theatre, &c., and a spacious museum containing John Hunter's celebrated preparations. Without the examination of this college no person can practise surgery in London or Westminster, or in a circuit of 7 m. round the hall. Medical officers for the navy and army, and for the East India service, are examined by this college.

Sion college is more a religious and charitable than an educational institution. It was founded in 1630; and is composed of the clergy of London as fellows, with a president, deans, and assistants, and the bishop of London as visitor. There is a valuable library attached to this institution, of between 35,000 and 40,000 vols., for the use of the studious of the London clergy. The income of this establishment in 1835 was £1,162.

Lectureships.] Besides the courses of lectures delivered at the colleges, and at various scientific and literary societies, &c., lectures on the various branches of medical science are delivered at some of the hospitals afterwards noticed, and at various private establishments; and lectures on anatomy, sculpture, architecture, perspective, and painting, are delivered at the Royal academy, and on music at the Royal academy of music. Mechanics' institutes have been also established in Spitalfields, Rotherhithe, Chancery-lane, &c., where lectures have been delivered on various subjects, chiefly scientific.

Schools.] No succinct and separate estimate, of a satisfactory nature, has yet been made, of the number and species of schools in the metropolis. The principal educational establishments in L., more or less of the nature of charitable institutions, are as under. In the first 12, children are not only educated but maintained; in the remainder, the object is chiefly or exclusively education.

Christ's hospital, or Blue-coat school.
Grey-coat hospital, Westminster.
Green-coat school, Westminster.
Emanuel hospital school, Westminster.
Protestant Dissenters' charity school.
St. Ann's society schools.
Raine's school, St. George's-in-the-East.
Sir John Cass's school.
Bancroft's school, St. Dunstan, Stepney.
Orphan Working school, established 1760.
Charity schools, St Giles', Cripplegate.
School for indigent blind, established 1799.
Westminster school, or St. Peter's college, 1590.
Charter-house school, 1611.
St. Paul's school, 1510.
Merchant Tailors' school, 1561.
St. Olave and St. John's free grammar-school, Southwark.
St. Saviour's free grammar-school, Southwark.
Newcomen's school, Southwark.
Highgate free grammar-school.
Hammersmith school (Latimer's).
British and Foreign society's schools.
National society's schools.
Schools of society for promoting Christian Knowledge, 1669.

In addition to these and numerous other endowed schools, in which many thousands of children are educated and maintained, almost every parish supports a free school by voluntary contribution, whereby alone about 12,000 children are educated. According to the reports of the charity commissioners, the income of endowed schools in the city of L. alone, amounted, at the period of the inquiry terminating in 1835, to £13,082 per ann.; and in Westminster to £4,600 per ann.; besides which, the income of those within the co. of Middlesex, exclusive of the above, amounted to £11,313 These, of course, are exclusive altogether of charity schools supported otherwise than by endowment.—Besides the schools above-named, we may here also particularize the city of L. corporation schools and those in connection with King's college; and several normal institutes.—The L. central school of design, a government school, the first of its kind in this country, was opened 1st July 1837, on the model of the continental schools of design, for the education of apprentices and others, chiefly manufacturing operatives. Other branch schools of design have since been established. Mechanics' institutes exist in various quarters of L., and of the vicinity.

Hospitals.] Amongst the richly endowed and numerous hospitals within the limits of the metropolis, the royal hospitals at Chelsea and Greenwich, with the other charitable institutions connected with them, have already been treated of under articles CHELSEA and GREENWICH: see these articles. Those more commonly called 'the Royal hospitals of London,' are the five named St. Bartholomew's, St. Thomas's, Bridewell, Bethlem, and Christ's hospital, or the Blue-coat school. Though termed 'Royal hospitals,' these noble institutions appear, in fact, to have been founded by the citizens, to clear the streets of vagrants and mendicants; and for this purpose the several hospitals formed parts of one entire system. The reception into none of them was voluntary. The sick were taken to St. Bartholomew's or St. Thomas's to be cured; destitute children were sent to Christ's hospital for education; while the idle and sturdy were set to labour in Bridewell, to which place were also sent such children as were not found "apt to learning" at Christ's hospital, that they might be instructed in some useful trade or occupation. Their separation into distinct and unconnected institutions, the various subsequent benefactions which have been made to some of them, and the changes produced by the lapse of years, have caused an entire departure from the original purposes of these foundations: admission to Christ's hospital, for instance, which was once compulsory, is now a matter of valuable patronage. Modern L. contains, for its nearly 3,000,000 of inhabitants, 13 general hospitals, all of them well appointed with every appliance for the relief of suffering humanity. In this list we include St.

Bartholomew's, St. Thomas's, Guy's, the Westminster, St. George's, the London, the Middlesex, University college, Charing-cross, King's college, the Royal Free, and St. Mary's. The 13 hospitals possess a collective staff of from 140 to 150 physicians and surgeons. Besides the accredited medical staff of each hospital, at least an equal number of qualified medical practitioners are attached to them as resident medical officers, pathologists, registrars, and assistants of various kinds. The poor, and others —for all hospital patients are not poor—seeking relief from this hospital-system amount to no less than 300,000 annually. The largest of the nosocomical establishments, the Royal hospital of St. Bartholomew, succours nearly 5,500 in-patients annually, and its in and out-patients nearly reach 80,000 in the year.

Bridewell.] This hospital is situated in Bridge-street, Blackfriars. Previous to its present foundation, in the reign of Edward VI., Bridewell was a royal palace, wherein dwelt several of our monarchs, including Henry VIII. The buildings consist of a quadrangle, three sides of which are occupied by prisoners, this hospital being a house-of-correction for disorderly persons, idle apprentices, and vagrants. Bridewell and Bethlem are under the same government.

Bethlem.] This hospital, now commonly called Bedlam, was originally founded as a convent, in 1247. The present buildings, in St. George's-fields, near Westminster-bridge, were erected in 1812-14, at a cost of upwards of £120,000. The front is very imposing in its aspect, ornamented with an Ionic portico, and surmounted by a central dome. The entire length of the facade is 697 ft. In the entrance-hall are Cibber's celebrated statues representing raving and melancholy Madness. Both curable and incurable patients are admitted, the latter being restricted to persons who, after a year's treatment in the house, have been discharged as incurable. Insane criminals are also received. The number of this class at present within the walls is 85. Government allows £38 6s. 8d. per ann. for the maintenance of each criminal. The gross annual income of the hospital, on an average of 10 years to 1837, amounted to £16,263.—The metropolitan commission of lunacy comprehends 15 to 20 commissioners, 5 of whom must be physicians, and 2 barristers. They are bound to visit every asylum once at least a quarter, and may go as often as they please, not less than 3 constituting the visitation. The owners of asylums never know on what day they will be visited, and as the commissioners grant no license to houses without being in possession of a ground-plan and sections of the buildings, there cannot be any places of concealment.

Miscellaneous charities.] A mere index and digest of the names, &c., of the endowed charities of a miscellaneous description connected with the metropolis, occupies a very considerable portion of a large folio volume appended to the charity reports. The income of those under the exclusive management of the corporation of the city of L. and its chartered companies alone, amounts to £59,403 per ann., exclusive of others, also under the head of the city alone, amounting to £34,520; and the income of those exclusively connected with the city of Westminster amounts to £11,849 per ann.; while those connected with all the other great districts of the metropolis are so mixed up with the miscellaneous charities of Middlesex and Surrey, that they cannot be readily discriminated. The amount of those comprehending all Middlesex, exclusive of the cities of L. and Westminster,—namely, £33,195 per ann.,—may serve in some measure as a criterion of the value of those belonging under such exclusion to the metropolis, including the Surrey side. These charities consist of benefactions for innumerable purposes.

Mendicancy.] In the metropolis, begging is systematically followed as a means of obtaining a livelihood; nevertheless, although it is alleged that there are 15,000 regular beggars of various kinds in L., fewer signs of absolute mendicancy and misery meet the eye here than in other large towns.—On an area of 115½ sq. m., embracing the whole of the metropolis, with a pop. of 1,943,969 in 1841, the money expended in relief to the poor in the year ending Lady-day 1847, was £634,369; and the rate in the pound of expenditure on the annual value of rateable property was 1s. 5½d.

Police.] The comparative efficiency of the present system of police in the metropolis can only be duly appreciated by contrast with the deplorable insecurity of property and life under which, till a very recent period, society notoriously suffered. The new metropolitan police was instituted in 1829, and fairly embodied in 1830. The whole force is under the management of two commissioners, in direct communication with the secretary-of-state for the home department. The average strength of the whole force, during the 8 years subsequent to its formation, was 3,314 men; to maintain which it was found necessary to recruit annually 1,100 new members. The constables and officers when appointed must be under 35 years of age, of good character, and able to read and write. They wear a blue uniform, and are in general a fine-looking body of men. The river police, consisting of 22 surveyors and 70 constables, with jurisdiction extending over the river and its banks, quays, wharfs, and docks, from Vauxhall to Woolwich, except the city part, on the N bank, between the Temple and the Tower stairs, is under the charge of 3 stipendiary magistrates. The 9 police offices constitute a further provision for the peace of the metropolis.—The gross total receipts on account of the service of the metropolitan police amounted in 1846 to £381,503; the gross total disbursements to £326,925. Of the receipts, £286,976 was derived from receipts on rate-warrants issued during the year, the remaining items being miscellaneous ones of comparatively trifling amount. Of the amount concurrently expended, £8,094 was appropriated to office expenses, including the salaries of 2 commissioners at £1,200 a-year each; £1,705 to law-charges; £281,453 to the pay, clothing, and equipment of the police force; £2,003 to medical expenses; £7,290 to horses, vans, &c.; £12,339 to the expenses of police-stations and station-houses; £9,452 to fuel and light; and £1,073 to miscellaneous charges. The total receipts on account of the service of the metropolitan police courts amounted to £47,960, of which £10,646 was derived from fees and penalties levied at the aforesaid police courts, and paid over to the receiver, whilst the concurrent disbursements amounted to £47,208, of which £33,656 was swallowed up by the salaries of magistrates, clerks, and others. There are 22 police magistrates, each of whom receives a salary of £1,000, and one who receives £1,200.—The total number of persons belonging to the metropolitan police force on the 1st of January 1847, amounted to 4,792, of whom 18 were superintendents, 114 inspectors, 493 sergeants, and 4,166 constables.

Criminal courts.] The lord-mayor sits daily at the mansion-house, and an alderman at Guild-hall, to judge and inflict punishment, by fine or imprisonment, in minor offences. The stipendiary magistrates alluded to in the preceding section, exercise similar powers in their respective offices. These magistrates, as well as those of the city, also examine into crimes of the highest nature, and on finding the charge made probable, commit suspected parties to prison for trial at the jail delivery.—The city-sessions are held 8 times a-year before the lord-mayor, aldermen, and recorder. The recorder, however, is the acting judge. Courts of conservancy of the river, in the nature of courts of criminal judicature, are held periodically by the lord-mayor.—The central criminal court was established in 1834, as an extension of the Old Bailey sessions.

Prisons.] There are 13 prisons which may properly be called London prisons: viz., Newgate, Clerkenwell, Pentonville, Coldbath-fields, Millbank, the Queen's prison, the Tower, Bridewell, Giltspur-street, Whitecross-street, Horsemonger-lane, Brixton, and Tothill-fields.—The Queen's prison—with which the old Marshalsea and Fleet were united by a recent act—was the prison of the Star chamber.—Millbank is the largest prison in England. It is near Vauxhall-bridge, upon the river bank, and is the general depot for convicts waiting to be sent elsewhere. It has no permanent inmates, but it incessantly receives the very worst class of criminals.—Pentonville prison is a 'model' jail, founded upon the American system. The expenses of the management of the model in 1849 were £16,392; the daily average of prisoners being 457; the cost per head, therefore, nearly £36. The cells are comfortably, almost elegantly fitted up, ventilated on the most scientific principle, and kept, by means of warm air, at an agreeable temperature.—The last execution at Tyburn took place on the 7th Nov. 1783; the first before Newgate, in the following month. The change was made at the suggestion of Howard. Newgate was a prison in King John's time, and was rebuilt in 1423. It is still, says Mr. Dixon, one of the worst hot-beds of vice and moral disease in London. The average number of prisoners for the year is about 3,000.—Clerkenwell will hold 300 prisoners, and cost £28,000. It is a house-of-detention, in which the stern system of isolation is carried out with terrible severity. —Coldbath-fields occupies 9 acres of ground, and holds about 1,300 prisoners on an average.—Tothill-fields prison, situated near Buckingham-palace, was built in 1618, but rebuilt in 1836. It is "vast, airy, light, but inexorably safe." This prison holds about 800 prisoners, but has separate sleeping cells for only 270. —Giltspur-street, a filthy prison, opposite to St. Sepulchre's church, is divided into two parts—the compter, and the house-of-correction for the city. It was built in 1791.—Bridewell, in Bridge-street, Blackfriars, originally built by Henry VIII., was a royal palace, "until Bishop Ridley begged it from Edward VI., as a workhouse for the poor, and a home for the vagabond." It is a sort of house-of-correction to the city of L. The number of prisoners is usually about 100.—Whitecross-street is entirely a debtors' prison.—Horsemonger-lane jail, the common jail for Surrey, on the S side of Newington-causeway, was built at the suggestion of Howard.—Brixton jail is in an admirable situation,

tor is unhealthy, and inaccessible to public inspection and control.

Criminal statistics.] Though the system of police in the metropolis be now, in the general estimation, 'very greatly improved,' yet the number of commitments is far greater now than previous to the modern improvements. "Many things have been made crimes within a few years past which were scarcely considered crimes formerly." Were we, therefore, to present any statistical details of the number of commitments under the old system, for comparison or contrast with those of a more recent date, the result would inevitably be fallacious, as "the number of commitments is no criterion of the number of crimes;" a greater number, in certain circumstances, only, perhaps, proving the increased vigilance of the magistracy. Nevertheless, this very vigilance cannot but tend to lessen the number of commitments by preventing crimes. Since the establishment of the new police, crime appears to be on the decrease. The numbers taken into custody were in 1831, 72,824; in 1832, 77,543. These numbers may be compared with those of the subjoined table of committals from 1839 to 1848. In January, 1840, the police district was extended to 155 parishes, hamlets, and liberties, with a pop. of 267,266, which accounts for the apparent increase of that year, while 1845 presents the lowest number. The charges of drunkenness have materially decreased; as in 1831 the numbers were 23,788, while in 1846 the numbers were 17,563. The following table exhibits the proportion of metropolitan offenders of all ages to the pop.:

Years.	Taken into custody.	Estimated pop. of the metropolis.	Number of pop. to one taken into custody.
1839	65,965	1,836,204	one in . . 27
1840	70,717	1,854,940	" . . 26
1841	68,961	1,873,676	" . . 27
1842	65,704	1,892,412	" . . 28
1843	62,477	1,911,148	" . . 30
1844	62,522	1,929,884	" . . 30
1845	59,123	1,948,620	" . . 32
1846	62,834	1,967,356	" . . 31
1847	62,181	1,986,092	" . . 31
1848	64,480	2,004,828	" . . 31

Upon an average for the last ten years, only about 7 per cent. of those who are taken into custody are tried.—The following table will show the proportion of the criminals under 20 to the pop. of the metropolis under the same age:

Years.	No. of persons under 20 yrs. taken into cust.	Estimated pop. under 20 years.	Number of pop. under 20 years to one taken into custody.
1839	13,587	733,487	one in . . 53
1840	14,031	740,971	" . . 52
1841	17,425	748,455	" . . 42
1842	16,987	755,939	" . . 44
1843	16,316	763,423	" . . 46
1844	13,600	770,907	" . . 56
1845	15,128	778,391	" . . 51
1846	15,552	785,875	" . . 50
1847	15,698	793,359	" . . 50
1848	16,917	800,843	" . . 47

Inns of court.] The institution of lawyers as a body is traced to the time of Edward I. To qualify for being called to the bar, 12 terms must be kept in one of the inns of court, and the student be a certain number of years a member of such inn. In the Middle Temple it is 3 years only; at Lincoln's inn it is 5 years. There are about 2,000 barristers and special pleaders at the bar.—*The Temple* consists of a number of buildings, quadrangles, courts, &c., extending, partly within the city of L. and partly without, from Whitefriars nearly to Essex street. It has 2 halls, 2 libraries, a fine church, and gardens on the bank of the Thames. The fellows of the societies of the Inner and Middle Temple have their separate establishments, members, revenues, and regulations; but they possess the church in common; and the chaplain, whose office is valuable and honourable, is called the Master.—*Lincoln's inn* is situated on the W side of Chancery lane, partly in the liberty of the Rolls, and partly in Westminster. This inn forms a great quadrangle, with gardens, and is composed of the gate-house, the hall on the W, a spacious apartment often used by the lord-chancellor as the High court of Chancery, the chapel on the N, several chambers, and other erections.—*Gray's inn* stands on the N side of Holborn, opposite Middle-row, and on the W side of Gray's-inn-lane. The principal entrance is from Holborn; and the premises consist of several spacious courts, a large square opening into Gray's-inn-lane, and two new ranges of building to the N with open gardens.—*New inn*, in Wych-street, adjoining Clement's inn, is an appendage to the Middle Temple, governed by a treasurer and 12 ancients.—*Sergeant's inn*, in Chancery lane, is chiefly occupied by sergeants-at-law. There are various other piles of building still called *inns*, and probably once occupied as preparatory schools of law, or by the attorneys and attendants on the courts.

High courts of Judicature.] *Westminster hall* is at present the principal seat of all the supreme courts of law and equity, under parliament. The hall has long been reputed to be the greatest room in Europe which is not supported by pillars. Its length is 270 ft.; breadth 74 ft.; and height in proportion. The roof is constructed with wonderful art, and elaborately carved. This beautiful Gothic hall is open for the free intercourse and walking to and fro of lawyers, members of the house-of-commons, and others. The fabric forms the central object in a somewhat confused group of offices for the courts-of-law and other structures, on the S side of Palace-yard, Westminster. The four great courts of judicature held at Westminster-hall are the courts of chancery, exchequer, Queen's bench, and common pleas.—*The court of Chancery*, the highest court of judicature in the realm, under parliament, is held in Westminster-hall during term time; out of terms, or during the intervals, at Lincoln's inn; and at the Rolls in Chancery-lane. It was till recently divided into three apartments,—the Lord-chancellor's court, the court of the Vice-chancellor, and the court of the Master-of-the-Rolls; but under the act for expediting the business of the court of chancery, recently passed, two Vice-chancellors have been appointed, and courts erected in Old square, Lincoln's inn, for their accommodation. The principal part of the business of chancery consists in the administration of equity.—The *Court of Exchequer*, anciently called *Camera Scaccarii*, has cognisance of all causes relating to the national revenue, treasury, fines, customs, &c., and has also latterly acquired a jurisdiction in all ordinary questions of common law, concurrently with the Common Pleas.—The *Court of Queen's Bench* is the supreme court of Common law. It is authorized to hear causes for libels, or other misdemeanors, pleas of the Crown, &c., and its jurisdiction extends over all England. It is called Queen's Bench, or King's Bench, because the sovereign sat anciently in person in it, and is still presumed to be present. The judges president are the lord-chief-justice, 4 judges, the marshal and associate to the chief justice, and 2 [illegible] with various other officers and clerks.—The *Court of Common Pleas* is for the trial of matters of civil right throughout England. It consists of 4 judges.—The other chief courts are—the Insolvent Debtors' court, the High court of Admiralty, and the Ecclesiastical courts.

Ecclesiastical courts.] These are held at Doctors' Commons. Besides civil or spiritual matters affecting the church, such as regulating induction to church-preferments, rights of pews, churches, and burial grounds, probates of wills, and granting administration in cases of intestacy; they also take cognisance of blasphemy, heresy, divorces, adultery, fornication, simony, incest, and some other crimes. There are two classes of practitioners in these courts, proctors and advocates. The former must be admitted by a fiat from the archbishop of Canterbury, before the judges will admit them to practice. The advocates are only such as have taken the degree of doctor-of-laws in one of the universities. The chief ecclesiastical courts consist of the court of Arches, of Delegates, of Faculties and Dispensations, and of Prerogatives.—The *Court of Arches* is the highest ecclesiastical court in the realm, forming a court of appeal from the other ecclesiastical courts. The name was derived from its having formerly been kept in Bow-church, Cheapside, originally built on arches, and thence called St. Mary of the Bows or Arches, or St. Mary de Arcubus.—The *Court of Delegates* is the high court for civil affairs connected with the church, to which appeals are now carried from the spiritual courts instead of to Rome, as previous to the Reformation.—The *Court of Faculties and Dispensations* has the power to marry without publication of banns, to instal the son in an ecclesiastical benefice held by the father, and in general to do such acts as in usual course of law could not be done.—The *Court of Prerogatives* is so named from the prerogative here exercised by the archbishop of Canterbury, who, by an especial privilege, can try all disputes concerning the last wills of testators resident within his province.

Corporation of L.] The leading points in the rise of this celebrated corporation are traced in our historical paragraphs on the origin and rise of the city. The corporate territories comprehend the city 'within the walls,' and the city 'without the walls,' extending from St. Sepulchre, St. Luke-Middlesex, and St. Leonard-Shoreditch, on the N, to the Thames, on the S; and from the Tower, and Christ's-Church-Spitalfields, on the E, to the Temple, the Rolls, and St. Andrew-Holborn, on the W. A few small districts, however, are locally within the corporate boundary, without participating in all the liabilities and privileges of the rest of the municipal territory. The corporate limits are divided into 25 wards, and a supernumerary or additional ward, namely, Bridge-ward-Without. Each of the city wards is, in some respects, as already said, a separate community. The aldermen and common councilmen, who are chosen from it, to represent the ward in the city parliament, form a ward council; and they have the control of many of the local affairs of the ward. Their comparative wealth and importance will be seen from a glance at the following list:

Wards.	Amount of Rental. 1771.	1801.	1841.	No. of rated Houses.
Bassieshaw .	£4,858	£9,796	£6,819	130
Limestreet, . .	8,128	6,976	12,750	192

Dowgate,	10,144	12,156	14,897	203
Candlewick,	8,444	8,424	15,067	210
Cordwainer,	8,847	9,288	11,503	315
Vintry,	8,546	9 842	14,480	260
Walbrook,	9,301	11,072	17,421	266

Cripplegate, w. and w.	16,800	17,284	68,999	2,079
Farringdon, without,	72,702	77,368	158,572	3,030
Total,	£457,701	£507,372	£855,724	16,466

The *freemen* of the city are those by whom, and from amongst whom, the common councilmen, aldermen, and mayor of the corporation, are elected. Until within the last few years, no one could become a freeman who had not been admitted into one of the 89 municipal companies or guilds of corporation. None of the guilds are now exclusively composed of persons belonging to the trade from which the company takes its name: in few of them are even the majority so composed.—The *Livery*, which is possessed by most of these companies, consists of a part of their body under the name of 'liverymen,' who enjoy privileges which other freemen do not possess: such are the voters for the mayor, sheriff, chamberlain, &c. The terms of admission to this indirect species of qualification vary from a few pounds to 200 guineas. The number of liverymen in 1850–51 was 7,312..

Common council.] In the various wards within the limits of the city, such householders of the ward as are freemen of the city, being £10 householders, or paying local taxes to the amount of 30s. per annum, meet annually, on St. Thomas's day, in what is called a Wardmote, and elect the common councilmen of the ward.—The *Court of Common council* resembles a house-of-commons annually elected; but differs from it in this respect, that the aldermen, the parallel of the peers, attend and vote with the assembly, which is also presided over by the supreme civic magistrate, the mayor. The title of the court, indeed, is 'The Lord-mayor, Aldermen, and Commons, of the City of London, in Common Council assembled.' The aldermen have an elevated row of seats at one end of the court, which is held in a commodious apartment in Guildhall: their votes are counted with those of the Common council, who are seated on the floor. The mayor, or an alderman as his *locum tenens*, two other aldermen at least, and as many common councilmen as will complete the number of 40, are requisite to constitute the court. The Court of Common council elects the great majority of the most important officers, including the city-clerk. The council has also the exclusive management of the common seal, and thus reserves power over the disposal of the great landed property of the city.

Aldermen.] In each of the city wards, except 2, an alderman is elected for life, at a wardmote, by the same electors who appoint the common councilmen. An alderman, elected, who refuses to serve the office, may be fined in £500, unless he give oath that he is not worth £30,000. The aldermen constitute the bench of magistrates for the city. By rotation, one of them attends in the capacity of justice-of-peace, for a week at a time, at the Guildhall justice-room.—The *Court of Aldermen* consists of the mayor and the 26 aldermen. The sheriffs also attend. This court elects several officers whose functions are, for the most part, connected with the administration of justice, the police, and the prisons. It also tries the validity of the elections of some officers; and in the election of mayor, it possesses the power of selecting one of two nominees of the common hall.

Lord-mayor.] The liverymen in Common-hall, on 29th Sept., annually select 2 of the aldermen who have served the office of sheriff, of whom the court of aldermen selects 1, ordinarily the senior one, for lord-mayor elect. Previous to his installation, on 9th Nov., he must be presented to the lord-chancellor, who signifies the assent of the Crown to his election. On the day on which he enters into office,—usually called 'Lord-mayor's day,'—he proceeds from London to Westminster in procession, in the city state-coach and state-barge, with an extraordinary display of municipal splendour, to be presented to the barons of exchequer, and take the oaths of office. His official income is nearly £8,000, a sum which in general is by no means equal to the expenses which custom has imposed on him. The official residence of the mayor during his year of office is the mansion-house, which is splendidly furnished, and provided with valuable plate and jewelled ornaments. His functions are multifarious, and appear, indeed, to have been accumulated on a single officer, merely on the general principle of placing the chief functionary of the corporation at the head of every department. Much of his time is absorbed in magisterial duties; he presides over the courts of aldermen, common-council, and common-hall; he presides as judge in the court of-hustings; as first commissioner of the central criminal court, conservator of the Thames, admiral of the port, chief commissioner of the lieutenancy of the city, justice of jail-delivery in Newgate, chief commissioner of the river Lea, perpetual coroner and escheator in L. and Southwark,—*et multis aliis.*

Revenues.] The income of the corporation is derived from various sources, such as rents of premises, dues, and market-tolls. The ordinary income of the corporation, calculated chiefly on an average of 3 years ending with 1832, was in round numbers £148,000; the average annual expenditure during the same period was about £133,000.—The corporation has the management of large estates, distinct from the corporate property, for the maintenance and repair of L.-bridge and Blackfriars-bridge. The average income of the Bridge-house estates, calculated, as the corporate property was, to 1832, appears to have exceeded £31,000.

Edifices connected with the corporation.] The *Guild-hall*, an irregular edifice at the N end of King-street, Cheapside, was first erected in 1641, but partly rebuilt in 1699. It contains the principal public offices of the corporation. The hall, which is used for all meetings of the freemen and liverymen, as well as for the city elections and feasts, is 153 ft. in length, 48 ft. in breadth, and 53 ft. in height. The common council chamber contains a valuable collection of paintings.—The *Mansion-house*, or official residence of the lord-mayor, situated at the W end of Cornhill, was built in 1739-53. The principal front is ornamented with a lofty portico, composed of six fluted Corinthian columns. The principal apartment, called the Egyptian-hall, is very large, and is occasionally used for public meetings of the metropolitan merchants and bankers, and for other purposes of a similar description; it is also used for the great dinners of the lord-mayor.—The *Companies' halls* can scarcely be classed with edifices connected with the corporation. Two of the most noticeable have been recorded under the head of 'Edifices connected with commerce.' Many of the other guilds or companies have halls. Merchant Tailors'-hall, belonging to one of the richest guilds in the city, stands in Threadneedle-street. Stationers'-hall is a large plain edifice, in a court out of Ludgate-hill. Mercers'-hall, in Cheapside, was originally the hospital of St. Thomas. Grocers'-hall is a handsome edifice.

Southwark.] The dependency of Southwark, comprehending nearly all the borough, has repeatedly been granted to the city. The lord-mayor acts in Southwark by deputy, and appoints a steward and bailiff.

Westminster.] The government of this city continued under the arbitrary jurisdiction of the monks and abbots till the Reformation. The principal magistrate is the high-steward, usually a nobleman, and chosen by the dean and chapter. His post resembles that of a chancellor to a university, and is held for life. On his death or resignation, the dean takes his place till a chapter be called and a successor elected. The next great officer is the high-bailiff, who is chosen by the high-steward, to whom he pays a considerable sum for the post, which is productive of great emolument from fines and forfeitures. He holds his office for life; has the chief management of the election of members of parliament for Westminster, and the subordination of all the other bailiffs. He summons juries, and in the courts-leet sits next

to the deputy-steward. There are also 16 burgesses and their assistants, who exercise functions in their several wards similar to those of the aldermen of L.

Franchise.] The city of L. was enfranchised 49° Henry III. Previous to the passing of the reform act, the right of voting for the 4 members representing the city, was exclusively vested in the freemen, being liverymen. The greatest number of electors polled within 30 years previous to 1831 was 8,639. Under the reform act, the inhabitant householders at £10 and upwards were of course enfranchised; and the number of electors registered in 1837 and 1850-51 was as under:

	1837-38.	1850-51.
Householders, . .	10,673	13,230
Freemen, being liverymen. .	9,005	7,312
	19,678	20,542

The city still returns 4 members.—The borough of Southwark returns 2 members. The number of electors registered in 1837 was 5,641; in 1847, 8,463. —The borough of Lambeth returns 2 members. The number of electors registered in 1837 was 7,040; in 1847, 13,885.—The city of Westminster returns 2 members. The number of electors registered in 1837 was 15,745; in 1847, 14,125.—Mary-le-bone is a new borough, returning 2 members. The number of electors registered in 1837 was 11,799; in 1847, 16,812.—Finsbury is also a new borough, returning 2 members. The number of electors registered in 1837 was 13,300; in 1847, 15,821. The only other metropolitan borough, except Greenwich, is Tower-hamlets, also a new borough, and returning 2 members. The number of electors registered for this borough in 1837 was 13,318; in 1847, 19,361. The unrepresented metropolitan parishes are Chelsea, with a pop. of 56,538 in 1851; Kensington, with a pop. of 44,053; Hammersmith, with 17,760; and Fulham, with 11,886.

Houses of Parliament.] In November 1834, the house-of-commons, the far-famed and interesting chapel of St. Stephen's, was completely ruined by fire. The Commons afterwards occupied a hall previously appropriated to the Lords, which formed part of the premises occupied by the court-of-requests, till the Union of Great Britain with Ireland. Another apartment adjoining Westminster-hall was appropriated to the use of the Peers. From the time of Simon de Montfort, for three centuries, the Commons held their meetings in the chapter-house of the Benedictines, directly opposite the palace, and adjoining the SE end of the abbey. The Lords were accommodated with an apartment in the palace. The first general meeting of parliament, under that name, within the walls of Westminster palace, was that which assembled to try Richard II., and which deposed him in the same hall which he himself, little more than a year before, had enlarged and adorned. The chapter-house continued to be used for the Commons house of parliament until the destruction of the dwelling part of the palace by fire drove Henry VIII. from Thorney isle to the neighbouring mansion at Whitehall; and St. Stephen's chapel, being no longer used by the king, was some time after the fire given up for the accommodation of the Commons, and so it remained their house of parliamentary meeting until they too were burnt out in 1834. The calamity which swept away the chapel of St. Stephen's was not an unmixed evil, for it swept away also the heterogeneous and unsightly pile of disorderly and shapeless structures with which the bad taste of centuries had incumbered and surrounded the remains of the elegant palace of the Saxon Edward and his Norman successors. It caused the necessity of building for the first time an edifice especially *intended* for the use of parliament, and afforded the opportunity of erecting upon the old time-honoured site, where the representative system had grown up to its full strength and perfection, a structure of magnitude and magnificence, proportionate to the grandeur of its destination, and the greatness of the British nation. It was resolved to invite all the artists of the empire to a free competition for the design, and there was no limitation set to the expense. No less than 90 artists had the spirit to enter into the competition. The design selected was that of Mr. (now Sir) Charles Barry. In prosecution of the works it became necessary to construct an artificial embankment or sea-wall, which being in a sufficiently forward state, the first stone of the building was laid on April 28, 1840. This façade of the river front is composed of four distinct parts; a centre, consisting of two pinnacled towers, flanking what here appear to be the principal apartments, with which they form one central mass; on either side of these is an extensive wing, containing, in the first story over the basement, the libraries and some other apartments of the two houses, and in the upper story, the committee-rooms. These wings, again, are flanked each by a tower-like pavilion, that upon the N end, next to Westminster bridge, containing the Speaker's house, whilst the other, at the S extremity, is appropriated to the residence of the usher of the Black rod. The length of this side of the building is 900 ft.; the height of the towers is 90 ft.; whilst that of the rest of the façade is but 70 ft. The expectation has not been realized of an elegant water-side terrace to a regal edifice. Instead thereof, we have merely a narrow quay of great length but of ordinary meanness. The plain basement has a double row of flat-pointed windows enclosed in square mouldings, and occupying but half the space between the buttresses in this story, the rest of which is without tracery or any adornment. In the towers of this façade there are three stories of windows, but in the other more extensive but less lofty part there are but two; these, however, occupy nearly all the space between the buttresses, which (as well as every portion of the front not filled with glass) are elaborately enriched, terminating in light pinnacles, thickly adorned with crockets. There are but 6 statues in this front. They represent St. Peter and St. Paul, who are the patron saints of the two great metropolitan churches, and the patron saints, St. George of England, St. Andrew of Scotland, St. David of Wales, and St. Patrick of Ireland. These are set up in niches of the towered pavilions at each end of the façade. In the bands of division, between the stories or tiers of windows, are sculptured the arms of the sovereigns of England from William the Conqueror to Queen Victoria. The Victoria tower, a principal feature of the design, is intended to group with the abbey, and give due importance to the parliamentary buildings when contrasted with that enormous structure, as well as to form the royal entrance. Its height will be 300 ft.; its external square at the base, 78 ft. It is proposed that, on occasions of the queen's visit to the house, the state carriages should drive into the tower, turn round the pillar within it to the left, set down at the foot of the royal staircase, and make their exit through the gateway in the S flank.—The principal story is on a level throughout with the old floor of St. Stephen's chapel. The two houses are placed as nearly as possible in the centre of the whole mass of buildings, this being considered the position best adapted for communication with each other, and with their respective offices and accommodations. To give facility for lighting, warming, and ventilating the houses, they are carried up much above the surrounding buildings, and have no rooms or chambers above or beneath them except such as may be necessary for the purposes alluded to. It has been the aim of the architect to reduce the size of both houses within the narrowest possible limits compatible with the required accommodations; and to give them that form and arrangement which afford the greatest number of sittings in the smallest space, and bring the members nearest to each other and to the speaker. The libraries and committee-rooms of each house are placed towards the river, for the convenience of light, and freedom from noise and disturbance. The whole of the official residences have separate external entrances and staircases, and direct communication with the principal floor of the building. To provide against extensive injury from fire, the entire edifice is built upon a fire-proof principle; and all communication with the private residences is shut off by iron doors set in thick party-walls. The adaptation of Westminster hall as a vestibule to the halls of the legislature "is a bold and daring attempt on the part of the architect; and from the mode in which the adaptation is made, eminently successful."

House of Peers.] This hall of legislature is 90 ft. long, by 45 ft. wide and high. On its E and W sides are 6 windows; and in its S or throne end, and N end, are 3 compartments corresponding with the windows in general shape and dimensions, to be filled in with frescoes. The architecture is of a piece with that of the exterior; and ultimately every square foot of surface in this apartment will be covered with carving, colouring, gilding, fresco-painting, or stained glass. The ceiling is flat, and divided longitudinally and transversely, by beams, into 18 compartments, each of which is subdivided into 16 panels, all of them filled in with heraldic emblazonments of the royal badges of the United Kingdom, on a blue ground bordered with red and gold. The beams of the ceiling are of a deep gold colour. The upper part of the walls is of a brownish stone colour. The piers between the windows are occupied by buttressed niches, 18 in all, to be filled with bronze statues. The throne, or rather its canopied screen, is in three compartments, all wrought in solid oak, and relieved by gilding. The throne itself is a sumptuous chair of state carved and gilt, and studded with enamels and crystals. A chair on the dexter side is for the Prince of Wales; and that on the sinister side for the Prince-consort. The Peers' lobby is a fine apartment of about 35 ft. square, with folding-doors, wrought in brass, opening into the house.

House of Commons.] The extreme length of the Commons' apartment from N to S is 84 ft; its width from E to W, is 45 ft.; its height 45 ft. The speaker's chair is at the N end, the bar at the S; five rows of benches rising gradually from the floor are placed at either side, and these are capable of accommodating about 250 or 260 members. The galleries which extend along the E and W sides contain only one row of benches each, and will not suffice for the accommodation of more than 60 members; but a spacious gallery is placed at the S end, where at least 150 members may be seated at their ease, furnishing in the whole room for 450 or perhaps 500 members. Two tones alone pervade the apartment—those of the stone window traceries, and of the oak panelling. A quiet white and dark brown, therefore,

constitute the combined idea of the interior. The roof is lofty, and galleries surround the house. Above these galleries, and rising to the roof, is a row of windows on each side, so continuous as to render the whole of each side of the upper portion of the house one vast window, variegated by Gothic tracery. At the end of the house, opposite the speaker, are three huge openings, with window-tracery, behind which are two galleries, one above the other; this end, therefore, preserving the same character as the windows. These galleries may be considered as outside the house; but below them, and sloping down towards the speaker, is a large gallery containing six rows of seats, and these are, like the side galleries, for members, and communicate with the body of the house. Above the speaker's chair, and of course behind it, is the gallery for the representatives of the press. Behind and above that are two galleries for strangers and for ladies. At the bottom, below the members' gallery, are small pews or pens in which a few members of the house-of-lords may watch the proceedings of the nether house. The whole of the house, except where the white stone-work is seen, is in oak. But an important improvement will be occasioned by the filling the windows, now in white glass, with glass heraldically coloured; and a number of small shields, running round the outside of the galleries, and to be painted with the local arms of represented cities, will add a feature which will tend to relieve the still, colourless aspect of the chamber.

Offices of state.] The chief offices of state are situated in Whitehall-street, and Downing-street, in the environs of the ancient palace of Whitehall, Westminster: in Pall Mall; and in Somerset-house, or palace, Charing-cross. Those in Whitehall-street are the Privy Council office, and Board of Trade; the Treasury chambers; the office of the Home secretary; the Horse guards, or offices of the Commander-in-chief, Secretary at war, &c.; the office of the Paymaster of the Forces; and the Admiralty. Those in Downing-street are the offices of the Secretary of state for Foreign affairs, and for the colonies, and the Official residences of the First lord of the Treasury, and the Chancellor of the Exchequer. The office of Ordnance is situated in Pall Mall. In Somerset-house are the Victualling office, Navy board, Boards of taxes and stamps, Privy seal, signet, and duchy of Cornwall, offices, &c. The State-paper office is in Duke-street, Westminster.—The *Privy Council office*, forming one corner of Downing-street, was erected, in 1826, as part of Sir John Soane's splendid design for rebuilding Whitehall. It is surrounded with Corinthian pillars supporting an entablature and balustrade, above which is an attic story also surmounted by a balustrade. The Council-chamber is a magnificent apartment, rising to the entire height of the edifice, the roof being supported by scaglioline pillars of the Ionic order of architecture. The Privy council here advise the sovereign for the public good, judge of all offences alleged against the government, or hear appeals from the subordinate colonial tribunals, or from the Admiralty. The Lord-president is the fourth great officer of state. A standing committee acts as a Board of Trade. The Cabinet council, consisting of ministers of state, transacts the chief affairs of the state. The building contains offices for clerks, and rooms for the presidents, secretaries, &c.—*The Treasury* is an elegant structure displaying architecture of the Tuscan, Doric, and Ionic orders, and communicating with the Privy Council office by a gallery, and with the official residence of the First lord of the Treasury.—*The Horse guards*, so named from being the station where the Queen's guards do duty on parade, has no peculiar architectural claims to attention.—*The Admiralty office* has an Ionic portico and wings. On the top is the telegraphic establishment, whereby, until the recent establishment of the electric telegraph, correspondence was maintained with the chief naval ports.

The Tower.] This renowned, though not very impregnable, fortress, is situated on the N bank of the Thames, at the E extremity of the city. The White tower appears to have been built by William the Conqueror, and it then formed the principal nucleus, as it still presents the most prominent feature, of the present imposing aggregate of towers and fortifications. The Tower, as it now exists, is a great irregular pile of buildings, surrounded by a ditch, now dry, and separated from the Thames by a platform. The exterior circuit of the ditch is 3,156 ft. The Tower is capable of accommodating upwards of 900 soldiers; but the force usually occupying it does not exceed 500 or 600. The new jewel-office, erected in 1840, is of the Elizabethan style of architecture, and of very massive construction, the walls being upwards of 3 ft. in thickness, and the whole bomb proof in every part. The regalia are placed in the centre of the apartment in a case of plate glass mounted in polished brass, and surrounded by an octagonal enclosure of iron-railing. The room is lit by four windows so constructed as to direct a full blaze of light upon the jewels, which are raised upon pedestals covered with rich purple velvet.

History.] In the Celtic or aboriginal era, previous to the Roman invasion, L. appears to have been the chief city—if, indeed, a collection of mud huts in a swamp, inhabited by aboriginal savages, and surrounded by equally aboriginal forests, can be called a city—of the *Trinobantes*, a tribe of Britons. It was not till the reign of Claudius that the Romans took possession of L. In the time of Nero, according to Tacitus, it had become distinguished for its great concourse of merchants and its commerce.—'*Copia negotiatorum et commeatu valde celebri.*' The Romans appear to have enlarged the precincts and altered the form of L. They erected it into a prefecture; but the inhabitants, though the name of citizens of Rome was conferred on them, were governed by military magistrates annually sent from Rome. Previous to its abandonment by the Romans, L. appears to have increased rapidly in importance as a commercial emporium, if not as a luxurious capital. In the year 359, it had no less than 800 vessels of various sizes employed in the exportation of corn alone. Few if any Roman architectural antiquities now stand above ground in L.; but numerous relics of this people have been found, "beneath the protecting 'paste and cover' of the dust and rubbish which 14 centuries have deposited upon the original floor of this great gathering-place of human beings, and centre of industry and commerce. The modern Londoner dwells at what was a considerable height up in the air to his predecessor of the Roman age,—in general from 15 to 20 ft. overhead of the ancient city."

Saxon era.] L. was taken about the year 477, by the Saxon invaders, under Hengist and Horsa. Ambrosius retook it after the death of Hengist, in 488, and it remained in the hands of the Britons for nearly a century. Afterwards it formed the metropolis of the E. Saxon kingdom. On the introduction of Christianity, Lundenburg, as it was then called, was nominated as the see of a bishop. The first bishop, Melitus, was appointed in 604, and the cathedral was founded in 610, on the site now occupied either by St. Paul's cathedral or Westminster abbey. During the Saxon heptarchy, history relates little respecting this city beyond a series of disasters. Plague ravaged it in 664; and fire in 764, 798, and 801. Nevertheless, "there want not innumerable testimonies out of the Saxon hystories," says Lambarde, "that during al the tyme of their government it bare the bell." After Canute had succeeded in establishing himself securely on his throne, he proceeded to levy an impost of £11,000 on the city, the payment of which is a strong proof of the wealth to which it had then already risen.

Norman era.] William the Conqueror prudently chose to secure the allegiance of L. by erecting the White tower, then the chief rudiment of that since renowned and imposing fortress, the tower of L. The prosperity of the city was checked by the exactions of William II., or Rufus; but more decidedly by devastating fires, and violent hurricanes and extensive inundations. Fitz-Stephen, a monk of Canterbury, gives an interesting picture of the metropolis and its customs in the time of Henry II. The number of conventual churches in the city and its suburbs was 13, besides 126 lesser parochial ones. On the N side were open meadow and pasture-lands, and beyond, a great forest, in whose woody coverts lurked "the stag, the hind, the wild boar, and the bull." Without one of the gates in a certain plain field—Smithfield—on every Friday, "unless it be a solemn festival," was "a great market for horses, whither earls, barons, knights, and citizens repair, to see and to purchase." To this city, he adds, "merchants bring their wares from every nation under heaven. The Arabian sends his gold; the Sabeans, spice and frankincense; the Scythians, armour; Babylon, its oil; Egypt, precious stones; India, purple vestments; Norway and Russia, furs, sables, and ambergrease; and Gaul, its wine. The only plagues are the intemperate drinking of foolish people, and the frequent fires." Richard I. granted several charters, on one of which the corporation have established their claim to the conservatorship of the Thames. In 1176 a bridge of stone was built across the Thames. In 1191, it was ordered that "all houses to be erected in L. hereafter should be built of stone, with party-walls of the same; and should be covered over with slates or tiles, to prevent those dreadful calamities which were frequently and chiefly occasioned by houses built with wood, and thatched with straw or reeds."

Plantagenet era.] In the reign of Edward I. the city was first divided into 24 wards, each of which was then permitted to elect an alderman and common councilmen. In 1348, a terrible plague spread from the East, devastated the continent, and appeared in England. It is chronicled that upwards of 50,000 persons were interred within the precinct of the Charter-house alone, on this occasion, besides many thousands more in the different churchyards and cemeteries within and without the city walls. In 1380, the celebrated rebellion of Wat Tyler occurred.

Lancaster and York era.] In 1406 another plague occurred, in which 30,000 people died. Ten years after this the streets were first lighted with lanterns. In 1460, the earliest historical and explicit notice of the use of bricks in the construction of houses in L. occurs. The middle of the 15th cent. was the period in which the first printing-press was established by William Caxton.

Tudor era.] Soon after Henry VII. came to the throne, in 1485, the inhabitants of L. suffered, in common with the rest of the kingdom, from a severe nondescript epidemic called "the sweating sickness." In the reign of Henry VIII., the city received many improvements. The royal palaces of St. James's and Bridewell were erected; the police was put under improved regulations; nuisances were removed, and streets were widened and paved. The attempts made by Henry to exact money were obstinately and successfully resisted by the citizens. The reign of Edward VI. was chiefly memorable from the erection of the hospitals of St. Thomas, St. Bartholomew, and Christ's, and the conversion of the palace of Bridewell into an hospital. The prosperity of the city advanced during the whole of the reign of Elizabeth. The refugees from the Netherlands being kindly protected and fostered by the government, in return introduced numerous manufactures previously unknown in England, to the great benefit of the whole empire, and especially of L., the chief centre on which the trade turned. In 1594, during the same auspicious reign, the Thames water was first raised for the supply of the city.

Era of the Stuarts, &c.] In 1603, the eventful year of the

succession of James I. of Scotland, the plague appeared in L., and cut off 30,578 persons. The commerce of the city, however, was now in a highly flourishing state; and the citizens were able to contribute to the fleet sent against the Spanish armada 16 ships fully equipped, and manned with 10,000 men. The year 1604 was memorable for the gunpowder plot. In 1613 Sir Hugh Myddleton completed the New river. In 1616 the paving of the sides of the streets with flag-stones was first introduced. In 1618, James issued a proclamation against the further extension of the city, which, however, appears to have been as little attended to as those of his predecessors. The 'great' plague, so called to distinguish it from former visitations of pestilence,—including one in the beginning of the reign of Charles I., which proved fatal to 40,000 persons,—commenced in December 1664, and had not entirely ceased in January 1666. It is supposed to have been brought by infection from Holland, and broke out first in Long Acre. All business was suspended, and even the centre of the exchange and some of the most public streets were overgrown with grass. The return of deaths from plague was 68,950, but it is thought that the actual number was upwards of 100,000, or nearly a third of the whole pop. Since this period the plague has never re-appeared in London as an epidemic.—The great fire, as if it were a dispensation of Providence to cure one evil by another, immediately succeeded the great plague. It broke out on Sunday morning, September 2, 1666, at a house in Pudding-lane, not far from Thames-street, and raged during four days and four nights. Within the walls it consumed about five-sixths of the city, and without the walls about one-fifth as much. The fire extended its ravages over a space measuring upwards of 1 m. in length and a ½ m. in breadth. The city was re-constructed in about 4 years; and the work was well-conducted, for, though some houses have since been destroyed by fire, or otherwise removed to make way for more noble structures, a great part of the public and private edifices still existing were erected at that period. Yet there was still a prejudice against the increase of the city; for in 1674 an act was passed imposing severe penalties on the erection of houses on new foundations. In 1683 the penny-post was established. The revocation of the edict of Nantes, in 1685, however, brought to L. numerous French protestant families about the former period, who introduced the manufacture of silk, and peopled Spitalfields. The year 1703 was remarkable for a terrible storm which raged during the night of the 29th of Nov., and terribly injured the city and the ships in the river.

Hanoverian era.] In 1714 George I. made his public entry into L. In 1722, the Chelsea water-company was formed, for supplying Westminster and the western suburbs with water. In 1763, during the peace of Paris, which followed the accession of George III., the metropolis continued to extend; most of the city gates were removed, and many important improvements were effected. In 1768, commissioners were appointed by parliament to superintend and regulate the stands of hackney-coaches, and the paving, lighting, cleaning, and watching of the streets. Various companies for supplying water and gas were then, and have since been, established. According to an estimate dated December 1785, there were then, "in and near the city of L., 100 almshouses, 20 hospitals and infirmaries, 3 colleges, 10 public prisons, 15 flesh-markets, 1 market for live cattle, 2 for herbs, and 23 for corn, coals, hay, &c.; 15 inns of court, 27 public squares, 49 halls for companies, 8 public or free schools, 131 charity schools, 207 inns, 447 taverns, 551 coffee-houses, 5,975 ale-houses, 1,000 hackney-coaches, 400 hackney-chairs, and 7,000 streets, lanes, courts, and alleys. After the accession of Pitt to the head of the ministry, the advance of improvement became more rapid, and has never since flagged or retrograded. The accession of George IV. to the regency, however, in 1812, was the era whence must be dated the decided commencement of that rapid advance in elegance of design, excellence of workmanship, and enormity of extension, which the metropolis now displays, and still holds forth in future prospect.

LONDON, a district, township, and town of Upper Canada, in the co. of Middlesex. The district is bounded on the S by Lake Erie, and is watered by the rivers Thames and Aux-Sables, and by Otter, Bear, Kettle, and Catfish creeks. It contains 17 townships; and has an area of 999,000 acres, of which 624,650 were occupied in 1848. Pop. in 1842, 31,350; in 1845, 41,241; in 1848, 46,547. The soil is generally fertile, and to a great extent well-cultivated. The township is separated from Westminster by the river Thames, and is watered by the river Medway and Springer's creek, both affluents of the Thames. Pop. in 1842, 3,955.—The town is finely situated at the junction of the two branches of the Thames, 85 m. from Hamilton, 26 m. from Port Stanley, and 17 m. from St. Thomas. Pop. 3,500. It has numerous churches and chapels, a handsome jail and court-house, large barracks, a theatre, and 2 market-buildings.

LONDON, a village of Union township, Madison co., in the state of Ohio, U. S., 27 m. W by S of Columbus. Pop. in 1840, 500.—Also a village of Laurel co., in the state of Kentucky, 94 m. SW of Frankfort, on a branch of Laurel river.—Also a township of Monroe co., in the state of Michigan, 45 m. SW of Detroit. Pop. 425.

LONDON (New), a county in the SE part of the state of Connecticut, U. S., comprising an area of 600 sq. m., bounded on the S by Lond island; on the SE by Pawcatuck river, and on the SW by the Connecticut, and watered by Thames river and its branches. It is generally fertile, and has several excellent harbours. Pop. in 1840, 44,463; in 1850, 51,826. Its chief towns are New London and Norfolk.—Also a township of Merrimac co., in the state of New Hampshire, 30 m. NW of Concord, bordered on the SW by Sunapee lake, and watered by several large ponds. Pop. in 1840, 1,019.—Also a city, port-of-entry, and semi-capital of New London co., in the state of Connecticut, on the Thames, 3 m. from its entrance into Long Island sound, 44 m. SE from Hartford, 52 m. E from New Haven, and 55 m. SW of Providence, in N lat. 41° 24′, 72° 30′ W long. from Greenwich, and 4° 0′ 48″ E from Washington. Pop. in 1810, 3,238: in 1820, 3,330; in 1840, 5,519; and in 1850, 9,006. It occupies the slope of a declivity, and possesses consequently but little regularity. The harbour is the best in the state, and carries on an active trade chiefly with the West Indies and with the Southern states.—Also a village of Verona township, Oneida co., in the state of New York, 117 m. WNW of Albany, on the Erie canal. Pop. in 1840, 200.—Also a township of Chester co., in the state of Pennsylvania, 36 m. SW of Philadelphia. The surface presents a gentle declivity, bounded on the W by Elk creek, and watered by Clay creek. The soil consists of sandy loam. Pop. 1,553.—Also a village of Campbell co., in the state of Virginia, 127 m. W by S of Richmond, on a branch of Staunton river. Pop. about 150.—Also a township of Huron co., in the state of Ohio, 96 m. N of Columbus. Pop. 1,218.—Also a village of Ralls co., in the state of Missouri, 98 m. NNE of Jefferson city, on the S side of Salt river. Pop. 263.

LONDON-BRITAIN, a township of Chester co., in the state of Pennsylvania, U. S., 35 m. SW of Philadelphia. It has an undulating surface, and is watered by White Clay creek. The soil consists of sandy loam. Pop. in 1840, 641.

LONDONDERRY, a maritime county of Ireland, in the N of Ulster; bounded on the N by the Atlantic ocean; on the E by co. Antrim; on the S by co. Tyrone; and on the W by co. Donegal. The outline of the county is proximately triangular, presenting a side of 9¾ m. to the ocean; of 29½ m. to co. Antrim and Lough Neagh; of 31½ m. to co. Tyrone; and of 19½ m. to co. Donegal and Lough Foyle. Its area comprises 318,282 acres of arable land, 180,709 of uncultivated land, 7,718 of continuous plantations, 1,559 of towns, and 10,327 of water,—in all, 518,595 acres.—The surface consists of a band of low country, of about 6½ m. in mean breadth, along Lough Neagh and the Bann, in the E; a narrow band of low coast along the ocean and Lough Foyle, in the N; the lower or terminating part of the valley of the Foyle, tumulated and hilly, around the city of Londonderry, in the W; the valley of the Roe, coming down from a defile among the mountains, and spreading out into beautiful champaign ground in the centre; and a great, far-expanding, and many-featured congeries of mountains, along all the S and athwart the greater part of the interior. The principal mountain-summits on or near the S boundary, are Slievegallion, 3¾ m. NW of Moneymore, 1,730 ft. of alt. above sea-level; Muinard, 1,550 ft., a

height 1¼ m. E of Muinard, 2,064 ft.; Sawel, 2,236 ft.; a height 1¼ m. W of Sawel, 2,037 ft.; Dart mountain, 1,612 ft.; and Slievekirk, 1,225 ft. The principal summits in the interior, between the Bann and the Roe, are Streeve, 1,280 ft.; White mountain, 1,996 ft.; Carntogher, 1,521 ft.; Benbradagh, 1,490 ft.; Donald's-hill, 1,315 ft.; and Benyevenagh, 1,260 ft. The principal summits in the interior, between the Roe and the Foyle, are Mullaghash, 1,518 ft.; and Legavannon, 1,289 ft. The principal summits W of the Foyle are Hollywell-hill and Keelagh, respectively 860 and 645 ft. alt.

Waters.] Lough Neagh is reckoned to belong to the co., over the mean distance of about 1¼ m. from the shore. The political boundary-line with Antrim passes through Loch Beg, and that with Tyrone through the small Lough Fea. The river Bann receives from the interior of the co. the tributary streams of the Moyola, the Clady, the Agivey, and the Macosquin; but cannot be navigated above Coleraine. The majestic Foyle is navigable for large sea-borne vessels to the city of Londonderry, and for river-craft over the whole of its connection with the co. The 'muddy' Roe rises close on the S boundary; flows N to the E side of Lough Foyle; and receives, as its chief tributaries, the Owenbeg, the Owenmore, the Gelvin, the Balteagh, the Castle, and the Curley. The grassy Faghan rises at the base of Sawel mountain; flows NW to the vicinity of the city of Londonderry, and thence to the head of Loch Foyle; it receives, as its chief tributaries, the Glenrandle and the Gubbin rivulets, and is navigable for small craft over scarcely one mile from its embouchure.

Climate.] The mean temp. of the city of Londonderry, as indicated by the mean temp. of six wells in different parts, is 49°, the extreme being 17° and 71°. The range of the barometer is from 28°·6 to 30°·6. The mean annual depth of rain, according to the Memoir of the Ordnance Survey of the parish of Templemore, is 34·2 inches.

Geognostic structure.] The surface rock, of about 450 sq. m., in the W division of the co., is mica-slate; and upwards of two-thirds of this is the talcose variety. Primitive limestone occurs in frequent patches and nodules, throughout the mica-slate district. Yellow sandstone, and sandstone conglomerate, form a belt of from 1 m. to 7½ m. in breadth, S from the E side of Slieve-Gallion down the E side of the valley of the Roe, and also along the head of Lough Foyle to the N environs of Londonderry. A field of carboniferous limestone, about 9 sq. m. in extent, lies on the E side of the yellow sandstone. A great field of overlying trap occupies all the remainder of the co. to the E, constituting part of the vast tabular trap or basalt district of Antrim and Down.

Soils.] The parts of the valley of the Bann, and the shores of Lough Neagh, whose subsoil is hard basalt, have in general a rusty, loose grit soil, without sufficient cohesion or fertility for wheat crops. A district of rich open country, constituting the most extensive tract of good ground in the county, lies W of Lough Neagh and the upper part of the Bann, extending between the basalt and the primary rocks, and S into co. Tyrone. The opulent plain of Moyroe, which extends from the base of Benyevenagh across the opening of the valley of the Roe, consists of a loamy alluvium of considerable fertility and strength. The schistose district between the valley of the Roe and that of the Faghan, is to a great extent moorish. The valley of the river Faghan possesses a considerable resemblance in both structure and soil to the valley of the Roe. The valley of the Foyle consists, in the higher grounds, of silicious soil, occasionally but not often stony, sandy, and meagre; and, in the lower grounds, of light productive clays and loams.

Agriculture.] Small farms are much more numerous than large. The greater part of this co. is held by lease under the Irish society, and the Twelve London companies. In 1841, there were within the rural districts of the co., 7,866 farms of from 1 acre to 5 acres; 8,755 of from 5 to 15 acres; 2,675 of from 15 to 30 acres; and 1,143 of upwards of 30 acres. In the same year, there were within the co. at large, including both rural and civic districts, 15,688 farmers, 25,285 servants and labourers employed in agriculture, 89 ploughmen, 1,398 herds, 6 land-agents, and 74 land-stewards. The number of acres under crop in 1848 was 168,710; viz. under wheat, 6,829 acres; oats, 94,396 acres; barley and rye, 3,960 acres; pease and beans, 1,844 acres; potatoes, 21,159 acres; turnips, 10,513 acres; flax, 9,242 acres; mangle-wurzel, carrots, and cabbage, 1,129 acres; meadow and clover, 19,638 acres. The native garron horse is used in the mountainous districts; it seldom stands higher than 14 hands. Cattle, on the whole, have been very little improved; and a prevailing and not unreasonable opinion is, that on the small farms where grazing cannot be much attended to, the common Irish breed is best suited to the indifferent food it obtains. Sheep-farming is discouraged in some districts; as the common breed of sheep are not easily restrained within the ordinary fences. In 1841, and within the rural districts of the co., the live stock, with their respective estimated value, were 17,418 horses and mules, worth £139,344; 64 asses, £64; 51,392 cattle, £334,048; 18,063 sheep, £19,869; 21,895 pigs, £27,368; and 158,736 poultry, £3,969. Grand total, of value of live stock in the rural districts, £524,662. —The total extent of continuous woods and total number of detached trees, in 1841, comprised a grand total of 11,297 acres of woods.

Manufactures and trade.] The export and import trade may be estimated by reference to the articles Londonderry (City of), Coleraine, and Portrush; yet the exports and imports of Londonderry must be remembered to include a large proportion of the trade of both Tyrone and Donegal. The staple manufacture of the whole co., but emphatically of the valleys of the Roe and the Faghan, is the weaving and bleaching of linen.

Communications.] The only internal navigations are those of the river Foyle into the cos. of Donegal and Tyrone, that of the river Bann to Coleraine, and those of the rivulets Faghan and Roe, a few perches from their mouth.—One line of railway comes northward, by way of Omagh, Newtown-Stewart, Lifford, and down the valley of the Foyle to Londonderry; and another is to run from Londonderry to Coleraine. Much of the benefit of this railway will depend on whether the Bann can be made navigable from Lough Neagh to the ocean. With railways from Belfast and Carrickfergus meeting at Antrim, and running round to where the Bann issues from the lough, large districts will be put into communication with the sea at the N, if only the difficulty of the bar at the mouth of the Bann can be got over. When the Coleraine railway was originated, a grand scheme of reclaiming 20,000 acres of land from Lough Foyle was connected with it. These 20,000 acres, at a rent of £3 per acre, were to yield a revenue of £60,000. Already, however, there has been a government grant of £70,000, and the proprietors are believed to have spent £200,000 of their own. A great sweep was made out over the surface of Lough Foyle to comprehend the 20,000 acres. Then, as it was not supposed that the railway could be strong enough to meet the tides, it was carried nearer inshore, and an embankment was carried over the original line for as far as it went. The railway works proceed, but the embankment has stopped.—The co. surveyor had under his charge, in 1842, about 1,450 m. of road. The principal roads within the county are the mail-road from Londonderry S to Strabane, Omagh, Monaghan, and Dublin; the mail-road from Coleraine S to Maghera, Moneymore, Cookstown, Dungannon, Armagh, and Dublin; the mail-road from Londonderry E to Newtownlimavaddy, Coleraine, Ballymoney, and Belfast; and the direct or stage-coach road from Londonderry to Belfast by way of Dungiven, Maghera, and Toome-bridge.

Divisions and towns.] The co. is politically divided into the NE liberties of Coleraine, on the E side of the Bann; the barony of Coleraine, in the NE of the co.; the barony of Loughinsholin, in the SE of the co.; the barony of Kenaught, in the centre; the barony of Tyrkeeran, in the W; and the NW liberties of Londonderry, on the W side of the Foyle. The principal towns and villages are Port-stewart, Coleraine, Ballinameen, Garvagh, Draperstown, Cas

tle-Dawson, Magherafelt, Innisrush, Portglenone, Newtownlimavaddy, Feeny, and Londonderry.—The S division of the barony of Loughinsholin is in the dio. of Armagh; all the remainder of the co. is in the dio. of Derry.—The county gaol is at Londonderry; and the bridewells are at Newtownlimavaddy, Coleraine, and Magherafelt. The annual amount of property valued for the poor rate is £331,863. The co. sent to the Irish parliament 2 members from its rural districts, 2 from the city of Londonderry, 2 from the borough of Coleraine, and 2 from the borough of Newtownlimavaddy; and it sends to the imperial parliament 2 members from its rural districts, 1 from Londonderry, and 1 from Coleraine. Constituency of the rural districts, in 1841, 1,718; in 1849, 1,017.

Population.] Pop. of the co., in 1792, 125,000; in 1813, 186,181; in 1821, 193,869; in 1831, 222,012; in 1841, 222,174; in 1851, 191,744. Inhabited houses, in 1792, 25,007; in 1813, 31,287; in 1821, 34,691; in 1831, 39,077; in 1841, 38,657; in 1851, 35,610. —The following statistics are all of the year 1841: Males, 106,825; females, 115,349; families, 41,114. First-class inhabited houses, 858; second-class, 9,719; third-class, 11,568; fourth-class, 12,512. Families residing in first-class houses, 1,001; in second-class houses, 10,711. Families employed chiefly in agriculture, 23,089; in manufactures and trade, 15,169; in other pursuits, 2,856. Families dependent chiefly on property and professions, 1,111; on the directing of labour, 16,113; on their own manual labour, 23,389. Females at and above 5 years of age who could read and write, 20,594; who could read but not write, 48,053; who could neither read nor write, 33,458. Males above 4 years of age attending primary schools, 8,865; attending superior schools, 488. Females above 4 years of age attending primary schools, 8,134; attending superior schools, 159. In 1848, there were 159 national schools in operation, attended by 12,783 children.

History.] At the dawn of record, the septs of O'Neill and O'Loughlin possessed the W parts of the territory now constituting the co. of Londonderry; and the tribe of O'Cahan, who were tributary to these septs, held the central and the E parts. The English appear to have early re-acquired full power around Coleraine, and to have wielded it with such effect as to erect the E and central parts of what now constitutes the co. into shire ground. The native Irish maintained entire possession of the country from 1333 till the middle of the 16th cent. The flight of O'Donnel and of the earl of Tyrone in 1607, and the rebellion of Sir Cahir O'Dogherty in 1608, placed the whole of L., in common with five other counties, at the disposal of the Crown. James I. determined, in order to support his power, to make use of the reformed religion as a means of establishing a settlement on the forfeited lands, composed of such English and Scottish Protestants as he could induce to settle amongst a people so turbulent as the natives of this part of the country then were; and with the view to the formation of such an establishment, applied to the city of London, and offered to grant the citizens a great part of the forfeited estates as an inducement for them to undertake the proposed plan of settlement. The citizens, accordingly, undertook the plantation; and James granted them a charter for carrying the same into effect; and although they encountered great difficulty, by reason of the enormous expense which attended the measure, and the opposition they met with, yet they finally succeeded in accomplishing the intended object. A body of 26 men, consisting of a governor, a deputy-governor, and assistants, were appointed by the common-council to manage the estates; and this body, commonly called the Irish society, as constituted by a renewal charter of Charles II., after the Restoration, still exists and exercises its power. Their estates were erected into one co., to be called the co. of Londonderry; and, immediately after the granting of the first charter, were distributed in portions among the different London companies, and into a remainder to belong to the Irish society or general corporation. Four of the companies—the goldsmiths, the haberdashers, the vintners, and the merchant-tailors—have, at various times, sold their proportions in perpetuity; 3 of the companies—the drapers, the mercers, and the grocers—retain their estates in their own possession, and manage them by resident agents; and the remaining 5 companies have underleased their lands. Almost the only events of note since the Protestant colonization occurred during the wars of the revolution, and belong more properly to the history of the city than to that of the county.

LONDONDERRY, a sea-port town, a city, the co. town of Londonderry, and the cap. of the extreme N of Ulster, partly in the parish of Clondermot, but chiefly in the parish of Templemore, co. Londonderry, on the river Foyle, 11½ m. N by E of Strabane, 24¼ m. WSW of Coleraine, 56 m. WNW of Antrim, 69 m. NW by W of Belfast, and 113¾ m. NNW of Dublin.—The site of ancient Derry, and of all the present city within the walls, or of Londonderry-proper, is an oval hill, usually called 'the Island of Derry,' 119 ft. in alt., and 199 acres 3 roods in area, nearly insulated by a majestic sweep of the broad and voluminous Foyle. One suburb, called Waterside, stands on the opposite bank of the river; another suburb, called Edenballymore, and promising speedily to rival 'the Island of Derry' in pop., extends away from the base of the hill down the flat valley of the river toward the Lough; and while the ancient part of the city rises tier above tier till it acuminates in the spire of the cathedral, this principal suburb expands in a brilliant sheet of opulence, prosperity, and urban beauty and pretension. The river Foyle, a fine broad river, makes a noble sweep on one side of the town, and expands immediately below it into a wide estuary, which terminates in the broad waters of Lough Foyle. The walls of L. are now its most ancient remains. They were erected during several years commencing in Nov. 1609. Between 1806 and 1808 they were repaired at the cost of £1,119; but in 1824 the NW bastion was demolished to make room for the erection of a market; and in 1826, the central W bastion was modified for the reception of the beautiful monumental pillar, called Walker's testimonial. The total number of cannons remaining in the city and suburbs is nearly 50.—The original English town of Derry, erected by Sir Henry Docwra, was destroyed by Sir Cahir O'Dogherty in 1608, and the present town may be considered as founded by the Londoners' colonization. The streets within the walls have undergone little alteration in form or alignment since they were originally constructed. A quadrangular area, called the Diamond or Market-place, is situated in the centre of the town, and has the corporation-hall in its own centre; and from the middle of the sides of this, four principal streets go off to the four original gates, thus cutting the town into four quarters. The private residences of every description are now built in a superior style, and some of the shops are spacious and handsome.

Edifices.] The cathedral of Derry stands on the summit of the hill of Derry. Apart from the tower, it measures 114 ft. in length, 66 ft. in breadth, and 46 ft. in height; and the spire ascends to an altitude of 178½ ft. from the ground.—The episcopal palace is a substantial but plain building, erected during the prelacy of Dr. Barnard, almost rebuilt by the Earl of Bristol when bishop, used as a barrack and damaged in 1798, and subsequently repaired by Bishop Knox.—The deanery is a large unadorned brick building, erected in 1833. There are a chapel-of-ease, a Free church, 3 Presbyterian meeting-houses, a Reformed Presbyterian meeting-house, an Independent chapel, a Primitive Wesleyan Methodist chapel, a New Wesleyan Methodist chapel, and a Roman Catholic chapel.—The town-house was built by the corporation on the site of a former structure, and renovated or reconstructed in 1823-6. The upper story contains the common council room, and an assembly-room which measures 75 ft. by 36.—The court-house was built in 1813-17, at an expense of £30,479. Its façade exhibits a tetrastyle portico of the Ionic order.—The jail, erected in 1819-24 at the cost of £33,718, measures 242 ft. along the front, and 400 ft. from the front to the rear.—The district lunatic asylum for the cos. of Londonderry, Tyrone, and Donegal, in the N environs of Edenballymore,

was built in 1827-9, at an expense of £25,678. It presents to the Foyle a façade, consisting of a central building with pavilions, from which extend wings, with airing-sheds, terminating in angular pavilions; it measures 364 ft. along the front, and 190 ft. from the front to the rear.—The custom-house forms a hollow quadrangle, measuring 171 ft. along the front which faces the river, and 80 ft. by 57 ft. in the interior open area.—The linen-hall is supposed to have been built in 1770. It consists of small dilapidated houses, surrounding a court of 147 ft. by 39.—The new barrack, on the E side of the Foyle, was built in 1837, at an expense of £6,000. The free grammar-school, also called Foyle college, is situated near the river, in the N environs of the city. It was founded in 1814, and built at the cost of £12,079. Its business is conducted by a head-master, a second-master, two classical assistants, and a language-master.—The public library and news-room, built in 1825 at the cost of £1,800, is a plain structure.—The wooden bridge across the Foyle at L. was commenced in 1789, and opened for foot-passengers in 1790. It measures 1,068 ft. in length, and 40 ft. in breadth, and cost for its original erection £16,294. The piles of which the piers are composed are from 14 to 18 ft. long, made of oak, and 16½ ft. asunder. On each side of the platform there is a railing 4½ ft. high, and a broad foot-way, provided with gas lamps. At one quarter of the length of the bridge, measured towards its W extremity, a turning-bridge has been constructed in place of the original draw-bridge.—Walker's testimonial, one of the chief ornaments of the city, stands on the central W bastion. It was erected in 1828, at the cost of £4,200, and is a well-proportioned column, surmounted by a statue of the famous clerical governor of L. during its memorable siege. The column is of Portland stone, 6 ft. 9 in. in diam., 66 ft. in height, and resting on a pedestal whose height, steps included, is 15 ft. A spiral staircase ascends the interior of the column.

Institutions, &c.] The diocesan library is tolerably rich in old books of divinity. The library association, or public library and news-room, founded in 1809, was re-established in 1824. The corporation-hall news-room was opened in 1830. The L. literary society was instituted in 1834, for debating and lecturing. The Mechanics' institute was formed in 1829. Gwyn's charitable institution was founded by will of Mr. John Gwyn, who died in 1829, and bequeathed property worth £40,000 for the feeding, clothing, and educating of the poorest male children in the city and precincts of L.—The infirmary and fever hospital stands without the city on the N. It was built in 1810, to replace an old poor-house and infirmary; and measures 90 ft. long, 50 ft. broad, and 50 ft. high.

Manufactures and trade.] At the close of 1843, there were in the city and suburbs, including Edenballymore, 2 flax-mills, 3 distilleries, 2 breweries, 2 founderies, 5 tan-yards, and 2 large and several small rope-walks. The quantity of linen exported from L. in 1818 was 3,844,055 yds. The quantity of linen sold in the linen-hall of L. in 1827 was 1,212,848 yds.; in 1834, 972,088 yds. The trade in eggs very rapidly increased after the introduction of steam navigation; and against 1835, it arose, in amount of exports, to 8,264 boxes. About two-thirds of the quantity are shipped for Liverpool, and the remainder for Glasgow. The dealers expect the eggs to produce from 8d. to 10d. a hundred more in the British markets than in Derry; this is the average profit in summer, but in winter it fluctuates more, and rises to 1s. 2d. The quantity of oats exported in 1828 was 16,981 tons; and in 1836, 11,459 t. The quantity of wheat exported in 1828 was 61 t., and in 1836, 2,255 t. The average annual quantity of butter brought to market, during the 7 years preceding 1833, was 17,800 firkins. In 1835 there was exported corn, meal, and flour to the amount of £120,676; provisions, £275,266; flax and tow, £212,940; linen, 5,035,592 yards, £314,749; eggs, 33,056,000, £55,094; hides and skins, £11,235; besides minor commodities; total, £1,040,918. The salmon-fishery of Lough Foyle and river is very productive; upwards of 82,000 fish are taken annually, the greater part of which is shipped to Liverpool.—There are 8 steamers belonging to the port, which ply to Liverpool, Glasgow, Greenock, and Campbelton, occasionally touching at Portrush for goods and passengers.—The coasting-trade is considerable; an extensive emigration takes place from this port, chiefly to the United States, Canada, and New Brunswick. There is a building-yard on the strand, at which several ships for the East India trade were built, and two steamers, one for the Liverpool and the other for foreign trade. The number and tonnage of sailing vessels registered as belonging to the port in 1848, was 12 under 50 tons, and 23 of 50 tons and upwards; their aggregate tonnage, 6,828: steamers 7, of 1,856 tons. In the cross-channel and coasting-trade, the number and tonnage of sailing vessels that entered the port in 1848 was 620 vessels, 53,849 tons; and of steamers, 298 of 80,773 tons. The number of sailing vessels outwards during the same period was 337 of 23,357 tons; and of steamers, 299 of 81,849 tons. In the British colonial trade the number and tonnage of vessels that entered inwards in 1848 was 17 vessels, 6,797 tons; and outwards, 12 vessels, 4,219 tons. In the foreign trade, the number and tonnage of vessels that entered inwards in 1848 was 48 of 9,704 tons; and outwards, 41 of 12,604 tons. The gross produce of the customs' duties of the port in 1834 was £87,023; in 1838, £94,022; in 1843, £99,265; in 1844, £105,830; in 1848, £104,991. The excise duties of the district in 1834 amounted to £64,458; in 1838 to £74,222; in 1848 to £52,853.—The amount of postage collected in the town of L. was in 1842, £1,755; in 1844, £2,202; in 1846, £2,544: in 1848, £2,762.

Municipal affairs.] The municipal government, since the recent date of municipal reform, is vested in a mayor elected by the corporation, 6 aldermen elected by the borough, and 18 councillors, besides 4 borough magistrates, appointed by the lord-lieutenant. The city is the seat of the assizes for the co., and of courts of quarter-sessions and petty-sessions. The total rent roll of the corporate property in 1831, held by a lease from the Irish society for 61 years, amounted to £2,019. The revenues of the corporation aggregately amounted, during the 20 years 1804—1833, to £174,027. The city sends 1 member to the imperial parliament. Constituency in 1841, 906; in 1849, 568.

Statistics.] Area of the Templemore section of the city, 406 acres; of the Clondermot section, 91 acres. Pop. of the Templemore section in 1831, 10,130; in 1841, 14,530. Houses 2,005. Families employed chiefly in agriculture, 503; in manufactures and trade, 1,612; in other pursuits, 520. Families dependent chiefly on property and professions, 162; on the directing of labour, 1,467; on their own manual labour, 894. Pop. of the Clondermot section in 1841, 666. Houses 105. In 1834, the number of English within the walls was 780; of Irish, 639; of Scotch, 723. The number of English without the walls was 2,091; of Irish, 6,209; of Scotch, 2,172 The number of members of the Established church within the walls was 663; of Presbyterians, 790; of Roman Catholics, 689; and the number of members

of the Established church without the walls was 1,909; of Presbyterians, 2,154; of Roman Catholics, 6,409.

History.] In 1566, the rebellion of the celebrated Shane O'Neil, earl of Tyrone, gave the first occasion for the presence of an English garrison in Derry. At the breaking out of the rebellion in 1641, the insurgents desiderated the surprise and capture of Derry as an object of prime importance; but their plot against the city miscarried: and Derry became the chief place of refuge in the north for the despoiled and alarmed colonists from England and Scotland.—In 1649, Derry and Culmore were besieged by Sir Robert Stewart. The garrison consisted of 800 foot and 180 horse, under the command of Sir Charles Coote. After a siege of 4 months, and when it was reduced to the greatest extremities, Derry was relieved by Owen Roe O'Neil. The third siege of Derry, which occurred in 1689, figures so celebriously in history as completely to eclipse the fame of the city's first and second sieges. James II. having landed in Ireland, at the head of his French allies, very soon afterwards directed his attention to the north, with a view chiefly to the subjugation of L., where the governor, Lundy, in reality a partisan of James, was ready to open the gates, betray the garrison, and sacrifice the cause. The king had actually reached the walls, expecting quiet possession, when the prentice boys—a tumultuous and untractable rabble, for so they were described to his majesty—rushed to their bastions, and fired their cannon upon his troops. When the first sudden agitation had subsided, the resolution of the citizens grew composed and deliberate: they suffered the timid to depart unmolested, and Lundy, by connivance of the new governors, escaped to the ships. Eleven days James continued his assaults with repeated mortifications, and without any prospect of success. Ultimately, and after enduring fearful privations, the town was relieved, and the enemy retired.—Of 7,500 men regimented in Derry, 4,300 only remained to be witnesses of this deliverance; and of these more than 1,000 were incapable of service. The besiegers lost 8,000 men by the sword and by various disorders, in a siege of 105 days.—L. has given titles to the noble families of Ridgeway, Pitt, and Stewart. Robert Stewart, Esq., descendant of a common ancestor with the earl of Galloway, was created Baron Stewart of Londonderry in 1789, Viscount Castlereagh in 1795, earl of Londonderry in 1796, and marquis of Londonderry in 1816. Robert, the second marquis of Londonderry, better known as Lord Castlereagh, figured prominently as a statesman during 26 years; he succeeded his father as marquis of Londonderry in April 1821, and died in Aug. 1822; and he was succeeded by his half-brother, Charles William Vane, the third earl of Londonderry.

LONDONDERRY, a parish of New South Wales, in the co. of Cumberland. Pop. 246.

LONDONDERRY, a township of Rockingham co., in the state of New Hampshire, U. S., 34 m. SSE of Concord, bordered on the NW by the Merrimac, and watered by Beaver river. Pop. in 1840, 1,556.—Also a township of Windham co., in the state of Vermont, 96 m. S of Montpelier, watered by West and Winhall rivers, and Utly brook. Pop. 1,216.—Also a township of Chester co., in the state of Pennsylvania, 35 m. SW of Philadelphia. It has a level surface, and is drained by Doe run, and by the headstreams of Elk and White Clay creeks. The soil consists of sandy loam. Pop. 608.—Also a township of Bedford co., in the same state. It has a mountainous surface, and is drained by Will's creek. Pop. 809.—Also a township of Dauphin co., in the same state, 14 m. SE of Harrisburg. The surface is hilly, and is drained by Spring and Conewago creeks. The soil consists of calcareous loam and gravel. Pop. 1,990.—Also a township of Lebanon co., in the same state, 8 m. SW of Lebanon, bounded on the N by Swatara creek, and watered by Conewago and Quitapahilla creeks, and by Klinger's run. It is hilly in the N and S. The soil consists of calcareous loam and clay. Pop. 1,762.—Also a township of Guernsey co., in the state of Ohio, 95 m. E of Columbus. Pop. 1,606.

LONDON-COLNEY, a chapelry in the ps. of St. Peters and St. Albans, Herefordshire, 3 m. SE of St. Albans, on the NW bank of the Colne, which is here spanned by a bridge of 7 arches.

LONDON-GROVE, a township of Chester co., in the state of Pennsylvania, U. S., 35 m. SW of Philadelphia. The surface is undulating, and is drained by White Clay creek and its branches. The soil consists of calcareous loam. Pop. in 1840, 1,246.

LONDON SHOALS (East and West), two clusters of rocks in the China sea, between Borneo and Cochin-China, in N lat. 9° 55′.

LONDONTHORPE, a parish in Lincolnshire, 3 m. NE by E of Grantham. Area 1,520 acres. Pop. in 1831, 187; in 1841, 182.

LONE, a commune of France, in the dep. of the Cote d'Or, cant. and ¾ m. S of St. Jean-de-Lone, and 23 m. ENE of Beaune. Pop. 1,041.

LONEUX, a commune of Belgium, in the prov. of Liege, dep. of Horion-Hozemont. Pop. 160.

LONG, an island off the SW side of Skull harbour, in the p. of Skull, co. Cork, about 3 furl. from the coast. It is 2 m. in length, and a ½ m. in extreme breadth, and has a coast-guard station. It was formerly called Innisfadda, or the Island of Dogs.

LONG, an island of the Asiatic archipelago, about 40 m. in circumf., off the coast of New Guinea, between the mainland and Mysory island.—Also an island in the strait of Gaspar, between Banka and Billeton islands, in N lat. 2° 50′, E long. 107° 30′.

LONG, a commune of France, in the dep. of the Somme, cant. of Ceilly-le-Haut-Clocher. Pop. in 1841, 1,573.

LONG (Loch), a ramification of the frith of Clyde, extending between the district of Cowal in Argleshire, and Dumbartonshire. It opens from the Clyde nearly opposite Gourock, and, with a breadth of from 2 m. to 6 furl., stretches away about 22 m. into the interior; and at half-distance it sends off, on the W side, and in a NW direction, Loch-Goil: which see. At two points on the Dumbartonshire side, it is distant respectively from the head of the Gairloch only 1¼ m., and from Tarbet on Loch-Lomond only 1¾ m. Its general depth is from 15 to 20 fath., and its tidal current runs at the rate of about 2 m. in the hour.—Also a marine projection from the head of Loch-Alsh in Ross-shire, bending from a N to an E direction, and separating the district of Loch-Alsh from that of Kintail. Its extreme length is about 4 m.; its mean breadth nearly a ½ m. Loch-Duich and it go off in such a manner in opposite directions from the head of Loch-Alsh, as to present on the map nearly the outline of a pair of antlers.

LONGA, a small island in the Skye group of the Hebrides, 1½ m. NE of Scalpa, and 2 m. NNW of Pabba. It is about 1½ m. in circumf., and rises to the height of about 200 ft. above sea-level.

LONGA, an island of Brazil, in the Atlantic, off the coast of the prov. of Porto Seguro, and to the S of Point Gorda, in S lat. 16° 40′.—Also a river in the prov. of Piauhi, which rises to the N of the Rio Poti; passes near Campo-Maior; and, after a course of about 150 m., joins the Parnahiba, on the r. bank, 36 m. above its entrance into the Atlantic. Its principal affluents are the Maratahoan, Sorubim, and Piracruca; the latter two it receives on the r. Its banks are flat, and studded with small lakes, which, however, frequently dry up during periods of prolonged heat.

LONGA, a river of Lower Guinea, in the N of Benguela, which issues from a lake in the country of Libolo, and, which, after a course of about 240 m. throws itself into the Atlantic, a little to the NW of the mouth of the Cuvo, in S lat. 11° 50′.

LONGA, or Rogue, the most northerly of the group of the Querimba islands, in the NW part of the Mozambique channel, and to the SE of Cape Delgado.

LONG-A-COMING, a village of Gloucester and Waterford township, Gloucester co., in the state of New Jersey, U. S., 44 m. SSW of Trenton. Pop. in 1840, 150.

LONGAGES, a commune of France, in the dep. of the Haute-Garonne, cant. of Carbonne, 9 m. SSW of Muret. Pop. 1,038

LONGAMILLA, a village of Chili, in the dep. of Maule, at which the government troops under General Bulnes defeated the insurgents under General Cruz, in a severe battle between the 8th and 11th of December 1851.

LONGANO, a town of Naples, in the prov. of Sannio, cant. and 6 m. S of Isernia, and 24 m. WSW of Campobasso. Pop. 1,280. It has manufactories of cutlery.

LONGARE, a village of Austria, in Lombardy, in the prov. and 4 m. S of Vicenza, on the r. bank of the Bacchiglione. Pop. 675. It has several quarries of fine freestone.

LONGARE'S, a town of Spain, in Aragon, in the prov. and 22 m. SW of Zaragoza, and partido of Almunia-de-Dona-Godina, in an extensive plain. Pop. 1,200.

LONGARONE, a village of Austria, in Lombardy, in the prov. and 11 m. NNE of Belluno, and 60 m. N of Venice, on the r. bank of the Piave. Pop. 2,000.

LONG-DES-BOIS, a commune of Belgium, in the prov. of Hainault, dep. of Leernes. Pop. 260.

LONGBOROUGH-WITH-BANKFEE, a parish in Gloucestershire, 3 m. N by W of Stow-on-the-Wold. Area 2,770 acres. Pop. in 1841, 625.

LONG-DE-BOUT, a commune of Belgium, in the prov. of W. Flanders, dep. of Herseaux. Pop. 361.

LONG-BRANCH, a village of Shrewsbury township, Monmouth co., in the state of New Jersey, U. S., 30 m. S of New York. It is situated on a long peninsular beach in the Atlantic, and is much frequented in summer.

LONGBURGH, a township in the p. of Burgh-on-the-Sands, Cumberland, 6 m. NW of Carlisle, crossed by the Ship canal. Pop. in 1841, 124.

LONGCHAMP, a village of France, in the dep. of the Aube, cant. and 8 m. SE of Bar-sur-Aube, on the Augeon. Pop. 570. It has 2 forges.—Also a village in the dep. of the Cote-d'Or, cant. of Genlis, 13 m. ESE of Dijon. Pop. 426.—Also a department, commune, and village of Belgium, in the prov. and arrond. of Namur. Pop. of dep. 517; of v. 443. —Also a department and commune in the prov. of Luxemburg, arrond. of Neufchateau. Pop. of dep. 879.—Also a commune in the prov. of Liege, dep. of Waremme. Pop. 265.

LONGCHAUMOIS, a commune of France, in the dep. of the Jura, cant. and 6 m. SW of Morez. Pop. 2,001.

LONG-CORRON, a commune of Belgium, in the prov. of Hainault, dep. of Ghlin. Pop. 528.

LONGEAU, a canton and commune of France, in the dep. of the Haute-Marne, and arrond. of Langres. The cant. comprises 29 com. Pop. in 1831, 9,825; in 1841, 9,896. The town is 6 m. S of Langres, on the Vingeanne. Pop. 307.—Also a commune of Belgium, in the prov. of Luxemburg, dep. of Messancy. Pop. 137.

LONGECOMBE, a village of France, in the dep. of the Ain, cant. and 3 m. SW of Hauteville, and 16 m. NNW of Belley. Pop. 600.

LONGCOTT, a chapelry in the p. of Shrivenham, Berks, 3½ m. S by W of Great Farringdon, in the line of the Great Western railway. Pop. 504.

LONGDON, a parish in Staffordshire, 4 m. NW by N of Lichfield, in the line of the Grand Trunk canal. Area 4,860 acres. Pop. in 1831, 1,147; in 1841, 1,183.—Also a township in the p. of Leeke, Staffordshire, 2½ m. W of Leeke. Pop. in 1831, 398; in 1841, 405.—Also a parish in Worcestershire, 3 m. SSW of Upton-on-Severn. Area 3,770 acres. Pop. in 1831, 612; in 1841, 598.

LONGDON-UPON-TERN, a parish in Salop, 3½ m. N by W of Wellington, on the river Tern, and crossed by the Shrewsbury canal. Area 1,300 acres. Pop. in 1831, 109; in 1841, 99.

LONGECOURT, a village of France, in the dep. of the Saone-et-Loire, cant. and 10 m. ENE of Verdun-sur-Saone, near the r. bank of the Doubs. Pop. 750.

LONGES, a commune of France, in the dep. of the Rhone, cant. and 8 m. SW of Sainte Colombe. Pop. 1,433. It has a lead-mine.

LONGESSAIGNE, a village of France, in the dep. of the Rhone, cant. and 6 m. NNW of St. Laurent-de-Chamousset. Pop. 700.

LONGEVILLE, a commune of France, in the dep. of the Meuse, cant. and 4 m. SE of Bar-le-Duc. Pop. 1,475.—Also a commune in the dep. of the Vendée, cant. and 8 m. ESE of Talmont. Pop. 1,357.

LONGEVILLE-LES-SAINT-AVOLD, or LOUVELEN, a commune of France, in the dep. of the Moselle, cant. and 8 m. N of Faulquemont, and 21 m. E of Metz. Pop. in 1841, 2,148. It has several distilleries, and contains a copper-mine.

LONGFAUX, a commune of Belgium, in the prov. of Hainault, dep. of Baudour. Pop. 122.

LONGFIELD, a parish in Kent, 5 m. SE of Dartford. Area 1,050 acres. Pop. in 1841, 128.

LONGFORD, a parish in Derbyshire, 5½ m. SE by S of Ashborne, on a branch of the Dove, comprising the townships of Alkmonton, Hollington, and L., the liberty of Hungry-Bentley, and the hamlet of Rodsley. Area 3,920 acres. Pop. in 1831, 1,233; in 1841, 1,249.—Also a hamlet in the p. of St. Catherine, Gloucestershire. Pop. in 1831, 160.—Also a hamlet in the parish of St. Mary de Lode, Gloucestershire, 3 m. NE of Bath. Area 1,290 acres. Pop. in 1831, 178; in 1841, 239.—Also a parish in Salop, 1½ m. W by S of Newport, crossed by a branch of the Birmingham and Liverpool canal. Area 1,310 acres. Pop. in 1831, 206; in 1841, 209.

LONGFORD, an inland co. of the prov. of Leinster, situated nearly in the centre of Ireland; and bounded on the NW by Leitrim; on the N by Cavan; on the E and S by Westmeath; and on the W by Roscommon. Its outline is nearly oblong, extending from NNE to SSW. Its greatest length is 21 m.; its greatest breadth, 13 m. Its area comprises 191,823 acres of arable land, 58,937 of uncultivated land, 4,610 of continuous plantations, 364 of towns, and 13,675 of water,—in all, 269,409 acres.—The Cairn-Clonhugh hills extend about 10 m. from NE to SW, between Lough-Gouna and the Shannon; and have for their chief summits, Crott in the NE, Edenmore in the centre, and Cairn-Clonhugh in the SW; the first 686, the second 768, and the third 912 ft. of alt. above sea-level. The tract between the SW end of the Cairn-Clonhugh hills and the Shannon, is an open well-cultivated district; the tract between the Cairn-Clonhugh hills and Lough-Gouna forms part of the upper extremity of the great basin of the Erne, and is screened by the flanks of the Cairn-Clonhugh hills rising from 200 to 400 ft. above the level of the lake. The district in the SW, along Loughs Ree and Killymore, is flat and boggy.

Waters.] The Shannon, in consequence of the extent and intricacy of its lacustrine expansions, has a coast-line of contact with the co. of not less than 50 m.; and is navigated, to the commencement of its contact with the co., by barges of from 20 to 30 tons; it communicates, in passenger boats by Lough Ree with Athlone, and by the Royal canal with Dublin. The principal tributaries of the Shannon within Longford or on its boundaries, are the rivulet Rinn in the extreme N; the Camlin, which rises nearly in the extreme E, and flows W a little N of the centre of the county; the Keenagh rivulet, a considerable affluent of the Camlin; and the Inny, which comes

in from Westmeath, and flows to the head of Lough Killymore. The drainage of the small district which lies within the basin of the Erne, is effected by rills to Lough Gouna.—The Royal canal leaves the Shannon, through the mouth of the Camlin, and at an elevation of 139 ft. above sea-level; traverses the county S to the vicinity of Ballymahon, and thence E to Westmeath; it makes an aggregate ascent of 7 locks between the Shannon and Abbeyshruel, and attains at the latter place an elevation of 223 ft. above sea-level. It sends off, from the vicinity of Killashee, a branch of 6 m., to the town of Longford; and it affords to nearly the whole county, daily, a facile communication for both goods and passengers to Dublin.—The lakes on the NW boundary are Drumshambo, Tullagh, Clooncose, Nabellery, Doogary, Gortermone, South Tully, and Beaghmore; those on the N boundary are Gulladoo, Lower, Guinikin, and Gouna,—the last possessing a surface-elevation of 214 ft. above sea-level; those on the E boundary are Kinnail and Glen, possessing an elevation of respectively 212 and 209 ft. above sea-level; and those in the interior are Corglass, Annagh, Gorteen, Killeen, Currygrove, Derragh, Cloonfin, Bannow, Derrymacar, and Derry,—the last possessing a surface-elevation of 127 ft. above sea-level.

Minerals.] The NE district of the co., with a breadth of 10 m., consists of part of the great transition or greywacke and clay slate formation, which extends eastward to the Irish sea, and is supposed to pass under that sea to the great expanse of the same formation in Southern Scotland. A short and narrow belt of old red sandstone occurs on the W edge of the transition district. One tract of about 7¼ m. by 1½ m. along the boundary with the county of Leitrim, another of about 40 sq. m. around the town of Longford, and another of about 16 sq. m. a little NE of Keenagh, consist of yellow sandstone and sandstone conglomerate. All the remainder of the co., amounting to probably a little more than one-half of the entire area, is part of the vast central flœtz limestone plain of Ireland.

Agriculture.] The soil of most of the limestone district, particularly within the basin of the Inny, is a rich vegetable mould, producing heavy crops of grain or fattening pasture; that of the W district is incumbered with bog and flooded with surface water; and that of the N district is to a large extent moorish. Most of the co., excepting the rich vegetable mould portions of the limestone district, is grazing-ground. Large quantities of butter are made by both the farmers and the cottiers. In 1841, there were within the rural districts of the county, 4,396 farms of from 1 acre to 5 acres, 4,880 of from 5 to 15 acres, 1,045 of from 15 to 30 acres, and 411 of upwards of 30 acres. The number of acres under crop in 1848 was 78,405; of which 5,495 were wheat; 39,283 oats; 4,629 barley; 84 pease; 7,240 potatoes; 2,177 turnips; 547 mangel-wurzel, &c.; 104 flax; 18,846 meadow and clover.—In 1841, the live stock, within the rural districts of the co., together with their respective estimated value, were 5,652 horses and mules, £45,216; 1,358 asses, £1,358; 23,064 cattle, £149,916; 13,458 sheep, £14,804; 17,971 pigs, £22,463; and 156,674 poultry, £3,917. Grand total of value of live stock in the rural districts, £237,674. In the same year the live stock, within the civic districts, was valued at £3,856.—The total of acres of continuous woods, within the co. in 1841, was 4,610 acres; total of detached trees, 220,223, equivalent to 1,377 acres.

Manufactures and trade.] The personal statistics of productive industry in 1841, show 78 millers, 7 distillers, 13 cattle-dealers, 20 pig-jobbers, 3,407 spinners of flax, 786 spinners of wool, 5,175 spinners of unspecified classes, 325 weavers of linen, 23 weavers of woollen, 640 weavers of unspecified classes, 478 boot and shoe makers, 470 carpenters, 293 blacksmiths, and 92 nailers.—The navigations of the Shannon and the Royal canal are of great local value. A proposed but not executed line of railway deflects from the Dublin and Enniskillen line at Kells, touches Granard, and terminates at Longford. The projected great North-western line was to run from Sligo, by Newton-Forbes, to Longford, thence to Rathowen, Athboy, and Dublin; with a branch from Longford, through Athlone, to Banagher; and another branch from Longford to Roscommon. The co. surveyor had under his charge, in 1841, 534 m. of road. The principal road through the co. is the mail-road from Dublin to Sligo.

Divisions and towns.] The county is divided into the six baronies of Longford in the NW, Granard in the NE, Ardagh in the centre, Moydoe to the S of Ardagh, Abbeyshruel in the SE, and Rathcline in the SW.—The towns and chief villages are Newtown-Forbes, Drumlish, Longford, Granard, Abbeylara, Ballinalee, Ardagh, Edgeworthstown, Killashee, Barry, Kenagh, Lanesborough, and Ballymahon.

Population.] Pop. in 1792, 50,100; in 1813, 95,917; in 1821, 107,570; in 1831, 112,558; in 1841, 115,491; in 1851, 83,198, being a decrease of 28 per cent. in 10 years. Houses, in 1792, 10,026; in 1813, 16,346; in 1821, 18,987; in 1831, 19,418; in 1841, 19,195; in 1851, 14,679. The following statistics are all of the year 1841: Males, 57,610; females, 57,881; families, 20,579. First-class inhabited houses, 259; second-class, 3,290; third-class, 10,080; fourth-class, 5,566. Families residing in first-class houses, 323; in second-class houses, 3,564. Families employed chiefly in agriculture, 15,363; in manufactures and trade, 3,705; in other pursuits, 1,511. Families dependent chiefly on property and professions, 525; clergymen of the established church, 27; Presbyterian ministers, 7; Roman Catholic clergymen, 31. The number of children attending public schools in 1841 was, in rudimental schools, males 3,113, females 2,752; in superior schools, males 170, females 82; total, 6,117. In 1848, there were 54 national schools in operation, attended by 6,679 children.—The county contains 26 parishes. It is in Ardagh dio., with a small portion in Meath. It returns 2 members to parliament; constituency in 1849, 779. The assizes are held in Longford; and the quarter-sessions there, and at Ballymahon and Granard. The county prison and the county infirmary are in Longford. The net annual value of property rated to the poor in the co. is £170,207; the amount of property valued under the act 6 and 7 William IV., is £150,784. The co. is within the military district of Athlone, having a barrack for cavalry at Longford. The staff of the county militia is stationed at Newtown-Forbes. The head-quarters of the constabulary force, consisting of 231 men, are at Longford.

History.] The territory which now forms the co. of L. was part of the ancient kingdom of Meath. In the 11th year of Queen Elizabeth it was erected into a co. In 1615. the lands of the co. were declared to belong to the Crown by virtue of the act of absentees, and were disposed of to patentees. In 1641, the whole co., with the exception of the castles of Longford and Castle-Forbes, was seized by the O'Farrels; and, after the close of the rebellion, it was nearly confiscated, and distributed among new proprietors.

LONGFORD, a post and market-town, the cap. of the co. of Longford, and formerly a parliamentary borough, in the p. of Templemichael, on the mail-road from Dublin to Sligo, 2½ m. SSE of Newtown-Forbes, 20½ m. N by E of Athlone, and 59½ m. WNW of Dublin. It stands on the river Camlin, amidst a plain which exhibits a chequered series of demesnes, meadows, arable lands, bogs, and swamps. It is well-built, and has a cheerful and prosperous appearance. The portion of the town on the N bank of the river contains the horse barrack, the artillery barrack, the jail, and other public buildings. The church is a handsome and spacious modern structure.

The Roman Catholic chapel serves as the cathedral of the Roman Catholic dio. of Ardagh, and is a new edifice of Grecian architecture. Its front exhibits 6 magnificent Ionic columns, enclosing a spacious portico, and surmounted by a triangular pediment, whose apex and end bear aloft pieces of statuary; its tower is nearly 200 ft. high, and is partly composed of alternate tiers of Corinthian pillars; its interior is divided into 3 aisles, contains 7 marble altars, and sustains the roof by 26 Ionic columns of polished variegated marble. The co. jail is on the semicircular plan. The other existing public buildings are a capacious court-house, a cavalry barrack, an artillery barrack, a workhouse, an infirmary, a market-house, a butter-market, and shambles. Lord Longford has built, at his own expense, shambles, a butter-market, and a new market-house. The corporation sent 2 members to the Irish parliament, but was disfranchised at the Legislative union. Pop. of the Longford section in 1831, 874; in 1841, 839; of the Ardagh section in 1831, 3,642; in 1841, 4,127.—L. has given the title of Earl to the noble families of Aungier and Pakenham. The earldom, as possessed by the former of these families, became extinct at the death of the second earl, in 1704. Thomas Pakenham, Esq., the nephew-in-law of that earl, was created Baron Longford in 1756. The daughter of Edward, second Lord Longford, married the duke of Wellington in 1806, and died in 1831.

LONGFORGAN, a parish stretching in a narrow oblong SE from the Sidlaw hills to the frith of Tay, in the extreme E of Perthshire. Area 8,990 acres. Three summits, Dron, Balle, and Lochtown, all at the NW end of the p., are conspicuous, and have alts. respectively of 667, 992, and 1,172 ft. above sea-level. The village of L. stands 6 m. from Dundee, and 1½ m. from the nearest point of the frith of Tay. Pop. 450. Pop. of p. in 1831, 1,638; in 1841, 1,660.

LONGFORMACUS, a parish in the Lammermoor district of Berwickshire. Area about 33 sq. m. Meikle-Cess-law, in this p., on the boundary with Haddingtonshire, and near the W extremity, is one of the highest of the Lammermoors. Dorrington-Great-law and Dorrington-Little-law, the former 1,145 ft. high, are fine conical hills, visible at a great distance. The village of L. stands on the Dye, 6½ m. W of Dunse, and 7½ m. N of Greenlaw. Pop. in 1831, 425; in 1841, 390.

LONGHAM, a parish in Norfolk, 4 m. NW of E. Dereham. Area 1,560 acres. Pop. in 1841, 333.

LONGHERANO, a village in the duchy of Parma, in the district and 15 m. SSW of the town of that name, and 21 m. WSW of Reggio, near the l. bank of the Parma.

LONGHOPE, a parish in Gloucestershire, 5 m. S by W of Newent. Area 2,970 acres. Pop. 929.

LONGIANO, a village of the Pontifical states, in the legation and 18 m. SE of Forli, and 12 m. NNW of St. Marin.

LONG-ISLAND, the largest group of the Western islands of Scotland, separated from the continent by the broad sound called the Minch, and from the Skye group by the considerable sound called the Little Minch. This group, owing both to its extent and the distinctness of its position, has occasionally monopolized the whole Hebridean name, and by general consent is called the Outer Hebrides. Its popular and prevailing name of Long-Island seems to have arisen from observation of the closely continuous contiguity of the numerous islands which compose it; or probably from a consentaneous belief that they were all formerly united, and have undergone disseverment by the erosion of the weather and the sea. The principal islands, reckoning from the north southward, are Lewis, Harris, N Uist, Benbecula, S. Uist, and Barra. The secondary and minor islands—diminishing from considerable islets to mere rocks—are too numerous to bear separate mention. From the Butt of Lewis on the N, to Barrahead on the S, they extend SSW about 120 m., and they have probably a mean breadth of about 8 m. Many of them are separated only by channels which are dry at low-water, or by very narrow belts of sea which are navigable only by yawls and wherries. Their largest marine bisection is the sound of Harris, between the cognominal island and N. Uist, remarkable for the number of its islets, and the great variation of its currents. The Lewis part of the group, about 40 m. in length, belongs to Ross-shire; all the remainder, to Inverness-shire. Excepting a peninsula of conglomerate E of Stornoway, a hard variety of gneiss, frequently traversed by veins of granite and of trap, composes the whole of the L. group. The general aspect of the country, owing to the total absence of wood, and the prevalence of heath and peat-bogs, is cheerless and desolate; yet the pop. is so positively redundant, that in spite of the appliances of fisheries, a remedy against an altogether undue pressure in the means of subsistence can be found only in emigration. A large proportion of the inhabitants, especially in the S half of the group, are Roman Catholics.

LONG ISLAND, an island of British North America, in Hudson's strait, near the N coast of Labrador, to the NW of Ungava bay, in N lat. 61°, W long. 70° 30′. It is about 12 m. in length from N to S. It is also called Atpatop.—Also an island in the SE part of Hudson's bay, in N lat. 55° 10′, W long. 79° 40′. It is about 36 m. in length, from NE to SW.—Also an island in the bay of Fundy, near the W coast of Nova Scotia, and to the SW of St. Mary's bay, in N lat. 44° 24′, W long. 66° 18′. It is 12 m. in length from NNE to SSW, and about 1½ m. in breadth. In the centre is a small lake, from which 2 rivers flow in opposite directions.—Also an island in the Atlantic, in the state of New York, U. S., and separated from the continent by a channel of the same name, comprising an area of 1,500 sq. m., and intersected from W to E by a chain of hills. Its southern shore is flat and sandy, and possesses several bays and inlets. The N and E are bold and rocky, and have several lighthouses. The soil is well-watered, and in some parts fertile. Pop. in 1820, 56,978; in 1840, 110,406. It comprises 3 counties, viz., King's, Queen's, and Suffolk. Its chief towns are Brooklyn, Jamaica, and Sag-Harbour. From the former a railway runs to Suffolk station, at the E end of the island.

LONG-ISLAND, Yuma, Saometo, or Isabella, an island of the Bahama archipelago, stretching from 22° 51′ to 23° 42′ N lat., between Exuma island on the NW, and the Crooked islands. It is 60 m. in length, and varies in breadth from 1½ m. to 18 m. It is to a great extent well-cultivated, and has extensive salt-works. Pop., including slaves, in 1851, 1,477.

LONG-ISLAND SOUND, an arm of the Atlantic, extending between the island of the same name and the state of Connecticut, U. S., 110 m. in length, and varying from 2 to 20 m. in breadth. It communicates with the Atlantic on the E by a rapid strait, and on the W by East river and New York bay.

LONGJUMEAU, a canton, commune, and town of France, in the dep. of the Seine-et-Oise, and arrond. of Corbeil. The cant. comprises 24 com. Pop. in 1831, 13,079; in 1841, 13,185.—The town is 9 m. NW of Corbeil, and 13 m. S of Paris, on the Yvette. Pop. in 1841, 1,998. It has extensive tanneries, and carries on an active trade in spices, grain, flour, wine, leather, cattle, legumes, and fruit. Bees and roses are extensively cultivated in the environs.

LONG-KEY (North, Middle, and South), a group of islands, 3 in number, in the bay of Honduras, near the coast of Guatimala, and to the SW of the Turneff islands.

LONG-KEY, or Isle of Fortune, an island in the Bahama archipelago to the S of Crooked island, and to the NW of Acklin island, in N lat. 22° 32′; W long. 74° 23′. It forms a narrow strip of land 24 m. in length.

LONG-LAKE, a township of Hamilton co., in the state of New York, U. S., 35 m. N of Lake Pleasant. It contains numerous lakes and streams, and is generally uncultivated. Pop. in 1840, 59.

LONGLIER, a department and commune of Bel-

gium, in the prov. of Luxemburg, arrond. of Neufchâteau. Pop. of dep. 1,211; of com. 109.

LONG-MEADOW, a township of Hampden co., in the state of Massachussetts, U. S., 95 m. WSW of Boston, bounded on the W by the Connecticut. It is generally fertile. Pop. in 1840, 1,270.

LONGNEY, a parish in Gloucestershire, 6 m. SW of Gloucester, on the banks of the Severn. Area 1,070 acres. Pop. in 1831, 453; in 1841, 490.

LONGNI, a canton, commune, and town of France, in the dep. of Orne, arrond. of Mortagne-sur-Huine. The cant. comprises 14 com. Pop. in 1831, 10,594; in 1841, 10,607.—The town is 10 m. E of Mortagne, and 34 m. ENE of Alençon. Pop. in 1841, 2,946. It has a spinning-mill, several iron-works, and manufactories of agricultural implements.

LONGNIDDRY, a village in the p. of Gladsmuir, Haddingtonshire, with a station on the North British railway, 3½ m. from Tranent, and 5½ m. from Haddington. Pop. about 200.

LONGNOR, a parish in Salop, 8 m. S of Shrewsbury. Area 1,200. Pop. in 1831, 244; in 1841, 243.—Also a chapelry and market-town in the p. of Alstonefield, Staffordshire, 8½ m. NE of Leek. Area 850 acres. Pop. in 1831, 429; in 1841, 485.

LONGOBARDI, a town of Naples, in the prov. of Calabria-Citra, district and 12 m. S of Paola, on the Mediterranean. Pop. 1,500.

LONGOBUCO, a town of Naples, in the prov. of Calabria-Citra, district and 12 m. N of Rossano, and 23 m. NE of Cosenza, in a deep valley. Pop. 5,000. It contains 6 churches. In the vicinity is a mine of argentiferous lead.

LONGO-SARDO, a town and port of Sardinia, in the prov. of Ozieri, 60 m. NE of Sassari, and 26 m. N of Tempio, at the W entrance of the strait of Bonifaccio, and near a cape of the same name, on which is a small fort. L. was the *Tibula* of the Romans.

LONGOTOMI, a river of Chili, in the district of Petorca, which has its source at the base of the volcano Ligua; runs W; and throws itself into the Pacific, near a village of the same name, 60 m. N of Valparaiso, and after a course of about 90 m.

LONGPARISH, a parish in Southamptonshire, 3 m. SW of Whitchurch. Area 4,320 acres. Pop. 811.

LONG-POINT, or NORTH FORELAND, an island of Upper Canada, in the district of London, in the N part of Lake Erie. It is nearly 20 m. in length from E to W, and about 1½ m. in medium breadth. A lighthouse has been erected on its E extremity.

LONG-PONT, a village of France, in the dep. of the Aisne, cant. and 7 m. ENE of Villers-Cotterets, on the Siviere. Pop. 160. It has a tile-work, a lime-kiln, and a manufactory of saltpetre.

LONG-PONT, a commune of Belgium, in the prov. of Hainault, dep. of Ghoy. Pop. 127.

LONG-PRÉ', a commune of Belgium, in the prov. of Liege, dep. of Couthuin. Pop. 236.—Also a commune in the prov. of Brabant, dep. of Incourt. Pop. 138.—Also a commune in the prov. of Hainault, dep. of Saint-Amand. Pop. 155.

LONGPRÉ'-LES-CORPS-SAINTS, a village of France, in the dep. of the Somme, cant. and 2 m. NE of Hallencourt, and 8 m. SSE of Abbeville. Pop. 1,140.

LONG-RECIF, or GLOVER'S REEF, a cluster of rocks in the bay of Honduras, near the coast of Guatimala, and to the S of the Turneff islands, in N lat. 16° 50′, W long. 87° 40′.

LONGRIDGE, a chapelry in the p. of Ribchester, co.-palatine of Lancaster, 7½ m. NE of Preston, intersected by the Preston and Longridge railway.

LONG-ROCK, a cluster of rocks about a mile from the coast of co. Down, opposite Ballywalter. It is about ¾ of a mile in extent from N to S.

LONGROY, a village of France, in the dep. of the Seine-Inferieure, cant. and 7 m. SW of Eu. Pop. 288.

LONG-SART, a commune of Belgium, in the prov. of Hainault, dep. of Seneffe. Pop. 282.

LONGSIDE, a parish in Aberdeenshire, to the W of Peterhead, containing an area of about 19 sq. m. Pop. in 1801, 1,825; in 1841, 2,612, of whom 384 were in the village of L.

LONGSTOCK, a parish in Southamptonshire, 1½ m. N of Stockbridge, on the river Test, and crossed by the Andover canal. Area 2,610 acres. Pop. in 1831, 428; in 1841, 497.

LONGSTONE (GREAT), WITH HOLME, a chapelry in the p. of Bakewell, Derbyshire, 3 m. NNW of Bakewell. Pop. in 1831, 506; in 1841, 521.

LONGSTONE (LITTLE), a township in the p. of Bakewell, Derbyshire, 2½ m. NW of Bakewell. Pop. in 1831, 146; in 1841, 174.

LONGSTOW, a parish in Bedfordshire, 2 m. S of Caxton. Area 1,412 acres. Pop. in 1841, 276.

LONGSWAMP, a township of Berks co., in the state of Pennsylvania, U. S., 72 m. E by N of Harrisburg, watered by Little Lehigh river. Its surface is hilly, and its soil consists of calcareous loam. Pop. in 1840, 1,836.

LONGTHORPE, a chapelry in the parish of St. John the Baptist, Northamptonshire, 2 m. W by S of Peterborough, on the N bank of the Nen. Area 1,390 acres. Pop. in 1831, 265; in 1841, 251.

LONGTON, a chapelry in the p. of Penwortham, Lancashire, 5 m. SW of Preston, on the banks of the Ribble. Area 2,970 acres. Pop. in 1841, 1,719.

LONGTOWN, a small market-town in the parish of Arthuret, Cumberland, 8½ m. N by W of Carlisle, on the banks of the Esk, near its confluence with the Liddel. The houses are neat modern erections, and the streets are regular and spacious. The inhabitants are partly employed in hand-loom weaving. Pop. in 1801, 1,335; in 1841, 1,990; in 1851, 2,142.—Also a chapelry in the p. of Clodock, Herefordshire, 14 m. SW of Hereford, on the river Monnow. Pop. in 1831, 938; in 1841, 869.

LONGWITTON, a township in the p. of Hartburn, Northumberland, 8 m. NW of Morpeth. Pop. in 1831, 143; in 1841, 135.

LONGUÉ', a canton, commune, and town of France, in the dep. of the Maine-et-Loire, arrond. of Baugé. The cant. comprises 9 com. Pop. in 1831, 14,964; in 1841, 14,762. The town is 13 m. S of Baugé, at the confluence of the Latan with the Authione. Pop. in 1841, 4,287. It has several tanneries, manufactories of linen, shoes, and of oil, and carries on an active trade in grain, fruit, and hemp. It was formerly divided into two parts, named Longué-en-Franchise, and Longué-hors-Franchise. Leeches are caught in great numbers in the vicinity.

LONGUEIL, a village of France, in the dep. of the Seine-Inferieure, cant. and 5 m. WNW of Offranville. Pop. 1,023.

LONGUEIL, a township of Upper Canada, in the Ottawa district, bounded on the N by the Ottawa river. The soil is cold and damp, and to a great extent unfit for cultivation. Pop. in 1842, 1,122. Its chief town is L'Original.

LONGUE'-SAULX, a commune of Belgium, in the prov. of Hainault, dep. of Eure. Pop. 101.

LONGUEVILLE, a canton, commune, and town of France, in the dep. of the Seine-Inferieure, and arrond. of Dieppe. The cant. comprises 23 com. Pop. in 1831, 8,510; in 1841, 8,428. The town is 11 m. S of Dieppe, and 27 m. N of Rouen, on the Scie. Pop. 544. It has several spinning-mills, manufactories of cotton and linen fabrics, an oil-mill, several lime and brick kilns, &c.—Also a department and commune of Belgium, in the prov. of Bra-

bant, and arrond. of Nivelles. Pop. of dep. 816; of com. 745.

LONGVILLERS, a village of France, in the dep. of Calvados, cant. and 2 m. SE of Villers-Bocage, and 17 m. SW of Caen, near the l. bank of the Orne. Pop. 1,140.—Also a village in the dep. of the Pas-de-Calais, cant. and 5 m. NE of Etaples, on the Dordogne. Pop. 500.

LONGWILY, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Neufchateau. Pop. of dep. 592. It has a mine of sulphureous lead.

LONGWOOD, a chapelry in the p. of Huddersfield, Yorkshire, 2½ m. W of Huddersfield. Area 910 acres. Pop. in 1831, 2,111; in 1841, 2,418.

LONGWOOD, a village in the p. of Clonard, co. Meath. Area 45 acres. Pop. in 1841, 587.

LONGWOOD, a plain in the E part of the island of St. Helena, noted as the place of residence of Napoleon Bonaparte during his exile in that island.

LONGWOOD, a village of Albemarle co., in the state of Virginia, U. S., 97 m. WNW of Richmond. Pop. in 1840, 175.

LONGWORTH, a parish in Berks, 7 m. SE by E of Great Farringdon, including the chapelry of Charney and the hamlet of Draycott-Moore. Area 4,640 acres. Pop. in 1831, 1,034; in 1841, 1,063.—Also a township in the parish of Bolton, Lancashire, 5 m. N by W of Great Bolton. Area 1,590 acres. Pop. in 1831, 179: in 1841, 149.

LONGWY, a canton, commune, and town of France, in the dep. of the Moselle, arrond. of Briey. The cant. comprises 25 com. Pop. in 1831, 14,577; in 1841, 11,527. The town is 23 m. NW of Briey, and 37 m. NW of Metz. Pop. in 1841, 2,430. It consists of an upper and a lower town: the former stands on a steep rock and forms a regular hexagon; the lower town rises amphitheatrally on the side of the rock near the r. bank of the Chiers. The streets of the upper town are straight and spacious, and it has a public square surrounded by handsome buildings, a custom-house, an hospital, and a military prison. It possesses manufactories of calico, carpets, earthenware, wax-work, clocks, jewellery, parchment, leather, and hats, a copper foundery, several tanneries, and a distillery of brandy; and carries on an active trade in ham, lard, and sausages. This town was founded in the 3d cent., and became in the 13th cent. capital of the county of Longwy. In the 17th cent. it was taken and dismantled by the French, and in 1678 was reunited to France by the treaty of Nimeguen. In 1792 it was held for three days by the Prussians, and it again fell into their hands in 1815.

LONIGO, a town of Austrian Lombardy, in the gov. of Venice, delegation and 14 m. SW of Vicenza, on the l. bank of the Gua. Pop. 1,610. It is surrounded by walls and ditches, and contains a Benedictine abbey and several churches.

LONINGEN, an amt or bail. and market-town of Oldenburg, in the duchy of Oldenburg, circle and 15 m. SW of Kloppenburg, on an arm of the Hase. Pop. of p., 5,583; of town, 1,257.

LONLAY-L'ABBAYE, a commune and town of France, in the dep. of the Orne, arrond. and cant., and 5 m. NW of Domfront. Pop. 3,571.

LONMAY, a parish of Aberdeenshire, comprising an area of 24 sq. m., bounded on the N and E by the North sea, and watered on the S and SW by an affluent of the Ugie. Pop. in 1841, 1,614.

LONNERSTADT, a town of Bavaria, in the circle of Upper Franconia, presidial and 3 m. W of Höchstadt, and 20 m. SSW of Bamberg, at the confluence of the Weisach and Aisch. Pop. 300.

LONNEUX, a commune of Belgium, in the prov. of Liege, dep. of Chenée. Pop. 307.

LONSIR, a village of Hindostan, in the prov. of Gujerat, 15 m. NE of Wankareer, on a rocky mountain.

LONS-LE-SAUNIER, an arrondissement, canton, commune, and town of France, in the dep. of the Jura. The arrond. comprises an area of 154,524 hects., and contains 11 cant. Pop. in 1831, 108,620; in 1841, 109,231. The cant. comprises 18 com. Pop. in 1831, 17,397; in 1841, 18,578. The town is 50 m. SW of Besançon, 246 m. SE of Paris, in N lat. 46° 40′ 28″, and E long. 0° 53′ 11″. Pop. in 1789, 6,500; in 1821, 7,796; in 1831, 7,918; in 1841, 8,565. It is situated at the confluence of the Seille, Solman, and Vallière rivers, in the midst of lofty mountains. It is well-built; the streets are straight, spacious, and well-paved; and it contains an extensive parade, in which are a handsome church and several fine fountains. The only other buildings worthy of note, are the communal college, the public library, the museum, and the theatre. The salt-works, to which the town owes its celebrity and name, are in its nether part. It has, besides, manufactories of hosiery and of bonnets, several dye-works, and carries on an active trade in grain, iron, timber, wine, cheese of local manufacture, woodenware, iron-wire, plate-iron, nails, and leather. This town is noted in history so early as 382. Its salt-works were destroyed in 1291 by order of the princes of Burgundy, but were re-established in 1733. After changing hands several times, it was finally taken by the French in 1637.

LONTAR, an island in the N part of the strait of Malacco, near the W coast of Lower Siam, in N lat. 7° 40′, and E long. 99° 3′. It is 21 m. in length from N to S, and 6 m. in medium breadth. It, in common with some of the adjacent islands, is inhabited by Ichthyophagi, called, from their habits, by the Malays, Orang Laut, or 'Men of the sea.' They are said to be mild and inoffensive in disposition.

LONTOIR, a district in the S part of Banda island, in the group of the Molucca islands, Asiatic archipelago. It contains a Dutch fort.

LONTRA, a river of Brazil, in the prov. of Rio-de-Janeiro, and district of Cabo-Frio, and joins the São-João, between the rivers Ipuca and Dourado.

LONWEL, a commune of Belgium, in the prov. of Limburg, dep. of Opglabeek. Pop. 142.

LONYA, a river of Croatia, which has its source 14 m. SSW of Warasdin, at the NE extremity of the comitat of Agram, which it separates from that of Kreutz; flows afterwards into that comitat; runs along the confines of Slavonia; and joins the Save, on the l. bank, at a village of the same name, and after a course, in a generally SSE direction, of 75 m.

LONZAC (Le), a commune of France, in the dep. of the Corrèze, cant. of Treignac, 6 m. SSW of Uzerche. Pop. 2,356.

LONZE'E, a department and commune of Belgium, in the prov. and arrond. of Namur. Pop. of dep., 987; of com., 971.

LOO, a department, commune, and town of Belgium, in the prov. of West Flanders, arrond. of Furnes. Pop. of dep., 1,709. The town is 1½ m. SSE of Furnes, on a canal of the same name. Pop. 1,680.—Also a commune in the prov. of Antwerp, dep. of Broechem. Pop. 126.—Also a com. in the prov. of Brabant, dep. of Dieghem. Pop. 142.—Also a com. in the prov. of Limburg, dep. of Hamont. Pop. 104.—Also a com. in the prov. of East Flanders, dep. of Lovendegem. Pop. 643.

LOOBERGHE, a village of France, in the dep. of the Nord, cant. and 5 m. SE of Bourbourg, near the Canal-de-Bergues. Pop. 1,130.

LOOBROEK, a commune of Belgium, in the prov. of Limburg, dep. of Grand-Brogel. Pop. 105.

LOO-CHOO. See Lieu-Kieu.

LOOCHRISTY, a department, commune, and town of Belgium, in the prov. of West Flanders, arrond. of Ghent. Pop. of dep., 1,386; of com., 968. The town is 6 m. ENE of Ghent, and 14 m. WNW of Dendermonde. It has manufactories of linen, coarse cotton cloth, ginghams, and starch, and several breweries.

LOODHUN, a village in the Punjab, near the r. bank of the Ghara, and 60 m. SE of Multan.

LOOE (East), a chapelry and sea-port, in the p. of St. Martin, Cornwall, 21 m. S by W of Launceston, on the N bank of the river Looe, at its efflux into the English channel; connected with West L. by a narrow and ancient stone-bridge across the Looe, and with Liskeard by the Looe and Liskeard canal. Pop. in 1801, 467; in 1831, 865; in 1841, 926. Two members were returned by this borough till the passing of the reform act, when it was disfranchised. In the reign of Edward III., it was the only sea-port of any importance in Cornwall except Fowey. The inhabitants have been much employed in the pilchard fishery, and had formerly considerable trade with France, Spain, and the Mediterranean. An inconsiderable coasting trade is still carried on. Tin, copper, lead, timber, salt, bark, and fish, are exported. The town is chiefly built on a small flat piece of land bounded by the sea on the S, and the river on the W. It consists of several short and narrow streets or alleys, extremely picturesque in appearance and situation, being surrounded, like West L., by high and steep acclivities, covered with terraced gardens.

LOOE (West), a chapelry, and an ancient borough, in the p. of Talland, Cornwall, 28 m. E by N of Truro, on the W bank of the river Looe, and opposite to East L. Pop. in 1801, 376; in 1831, 593; in 1841, 616. Till the passing of the reform act, when it was disfranchised, it returned 2 members to parliament. The pilchard fishery has been the principal support of the inhabitants. The town chiefly consists of a single street, picturesquely situated, on the side of a hill, with some buildings along the bank of the river. There is a small harbour, defended by a battery of 10 guns, on the beach.

LOOE, or Trelawney, a river in Cornwall, rising near St. Cleer, and flowing S to the British channel, between the towns of East and West Looe; previous to which it is joined by a considerable branch, from which it is sometimes distinguished by the name of East L. river. It is 10 m. in length, for 1¾ m. of which only it is tidal. The Looe and Liskeard canal is an artificial cut, navigable from the sea to Liskeard, a distance of 5 m.

LOOE, or Loe, a river in Cornwall, rising to the W of Penryn, and flowing S by Helstone into the British channel. It is prevented from being tidal by a bank of shingle, thrown up by the sea at the mouth of the valley, converting the inner portion into a beautiful lake, called the Looe pool.

LOOKOUT (Cape), a headland of British North America, on the S side of Hudson's bay, in N lat. 55° 30′, and W long. 85° 10′.

LOOKOUT (Cape), a headland of the state of North Carolina, U. S., at the S extremity of a long island, in the co. of Cartaret, 78 m. SW of Cape Hatteras, in N lat. 34° 34′, and W long. 76° 37′.—Also a headland of the Columbia territory, to the SW of the mouth of the Killamonk, and 69 m. S of that of the Columbia.

LOOKOUT (Point), a headland of New South Wales, at the NE extremity of Stradebrook island, Moreton bay, in the co. of Stanley.—Also a mountain, near the junction of the rivers Darling and Murray.

LOOKOUT, or Desvelos (Point), a headland of Patagonia, on the E coast, between the gulf of George in the N, and Port S. Julian, in S lat. 48° 30′.

LOON, a commune of France, in the dep. of the Nord, cant. and 4 m. N of Gravelines. Pop. 1,634.

LOON (Neder), or Loon-op-Zand, a market-town of Holland, in the prov. of N. Brabant, cant. and 1 m. SE of Ravenstein, and 19 m. ENE of Bois-le-Duc, in a marshy district. Pop. 4,000. It contains 4 churches and a synagogue, and has several spinning-mills. Its trade consists chiefly in corn.

LOONBECK, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain, watered by the Yssche. Pop. 407.

LOONEE, a village of Afghanistan, on the Gomul river, 35 m. W of Dera-Ismail-Khan.—Also a v. of Hindostan, in the prov. of Aurungabad, 11 m. ESE of Punah.

LOONGHEE, a town of Burmah, in the district of Mranmapyee, on the Irawaddi, 16 m. SW of Patanago.

LOOP-HEAD, a headland on the N side of the mouth of the Shannon, in the p. of Kilballyowen, co. Clare. It rises to the height of 232 ft. above sea-level, and has a lighthouse, in N lat. 52° 33′, W long. 9° 56′.

LOOS, or Los, a commune of France, in the dep. of the Nord, cant. and 1½ m. ENE of Haubourdin, and 3 m. SW of Lille. Pop. in 1841, 3,404. Previous to the first French revolution it contained a magnificent abbey, now used as a house-of-detention. It has manufactories of linen, plain and damask, calico, prunella, shoes, carding-combs, white lead and other chemical substances, printed muslins, an oil and several spinning-mills, and a tile-work. See also Losing and Loss.

LOOSDORF, a town of Austria, in the archd. of Austria, and upper circle of the Wienerwald, 12 m. WSW of St. Polten, near the Bielach. Pop. 722. It has a salt-work, a paper-mill, and a manufactory of saffron.

LOOSDRECHT (Neuw), a village of Holland, in the prov. of N. Holland, arrond. and 17 m. SSE of Amsterdam, and 7 m. N of Utrecht. Pop. 2,290.

LOOSDUINEN, a village of Holland, in the prov. of S. Holland, cant. and 5 m. N of Naaldwyk, and 4 m. SW of the Hague. Pop. 1,550.

LOOTENHULLE, a department and commune of Belgium, in the prov. of E. Flanders, and arrond. of Ghent, watered by the Poucke-Beke. Pop. 3,017.

LOOVELL, a commune of Belgium, in the prov. of E. Flanders, dep. of Aeltre. Pop. 195.

LOOZ, a department, commune, and town of Belgium, in the prov. of Limburg, arrond. of Bruges. Pop. of dep. 1,386. The town is 10 m. S of Hasselt. Pop. 968.

LOOZEN, a commune of Belgium, in the prov. of Limburg, dep. of Bocholt. Pop. 166.

LOOZENHOEK, a commune of Belgium, in the prov. of Brabant, dep. of Keerbergen. Pop. 400.

LOPAN, a town of Russia in Europe, in the gov. and district and 29 m. N of Kharkov, on the r. bank of a small river of the same name.

LOPATKA (Cape), a headland of Russia in Asia, at the S extremity of the peninsula of Kamtchatka, in N lat. 51° 0′ 15″, E long. 156° 28′ 30″.

LOPENITZ. See Schlapanitz.

LOPERA, a town of Spain, in Andalusia, in the prov. and 27 m. NW of Jaen, and partido of Andujar, near the Guadalquiver. Pop. 2,179. It has a parish-church, an hospital, a custom-house, a public granary, and a convent. The manufacture of com-

mon cloth, and agriculture, form the chief branches of local industry.

LOPEREC, a commune of France, in the dep. of Finistere, cant. and 7 m. E of Le Faou. Pop. 1,897.

LOPERHET, a commune of France, in the dep. of Finistere, cant. of Daoulas, 9 m. E of Brest. Pop. 1,271.

LOPERSUM, a village of Holland, in the prov. and 13 m. NNE of Groningen. Pop. 1,710.

LOPEZ, or LOPEZ-GONSALVO (CAPE), a headland on the S confines of Upper Guinea, in S lat. 0° 30′, E long. 8° 35′. It is steep and woody, and forms the NW point of an island which encloses on the SW the bay of Nazareth, and which is separated from the continent by only a narrow channel.

LOPHEM, a department and commune of Belgium, in the prov. of W. Flanders, arrond. of Bruges. Pop. of dep. 1,386; of com. 968.

LO-PING, a district and town of China, in the prov. of Keang-se, div. of Faou-chu-fu, in N lat. 28° 57′, E long. 117° 16′.—Also a district and town in the prov. of Shan-se, 18 m. S of Ping-ting, and 72 m. ESE of Tae-yuen-yu, in N lat. 37° 37′ 50″, E long. 113° 45′.

LO-PING-CHU, a district and town of China, in the prov. and 105 m. E of Yun-nan, in N lat. 24° 58′ 48″, E long. 104° 18′ 10″.

LOPINNO, a town of Prussia, in the prov. of Posen, and reg. of Bromberg, circle and 14 m. ESE of Wongrowiz, on a lake. Pop. 605.

LOPO, a mountain of Brazil, in the prov. of Minas-Geraes, and comarca of Sapucahi.

LOQUEFFRET, a commune of France, in the dep. of Finistere, cant. of Pleyben, 15 m. NE of Chateaulin. Pop. 1,861.

LOQUEZ (PORT), a bay of Madagascar, on the NE coast, to the S of Cape Ambro.

LOQUITZ, a river of the duchy of Saxe-Meiningen, in the amt of Saalfeld, an affluent of the Saal.

LOQUIVY-PLOUGRAS, a commune of France, in the dep. of the Cotes-du-Nord, cant. of Plouaret, 18 m. S of Lannion. Pop. 2,541.

LOR, a river of Spain, in Galicia, which has its source in the Cantabrian mountains, near Riocereyja; runs SW; and throws itself into the Sil, on the r. bank, 12 m. SE of Santa-Maria-Monforte-de-Lemus, and after a course of 36 m.

LORA, a river of Afghanistan, which has its source about 50 m. NE of Quetta, and, after a course of about 80 m., in a SW direction, is lost in the desert of Khorasan. Its waters are briny.—Also a district between Ghuzni and Cabul. It is well-watered, and contains several villages.

LORA-DEL-RIO, a judicial partido and town of Spain, in Andalusia, in the prov. of Sevilla. The partido comprises 10 pueblos. The town is 29 m. ENE of Sevilla, and 11 m. NE of Carmona, on the r. bank of the Guadalquivir, and at the foot of the Serra Morena. Pop. 4,590. It has a parish-church, a convent, an hospital, and a public granary; and has manufactories of hats, woollen fabrics, and leather, and numerous oil-mills. The environs afford silk in large quantities, and have several mineral springs. Cattle are also reared in large numbers in the locality.

LORAIN, a county in the N part of the state of Ohio, U. S., comprising an area, generally fertile, of 550 sq. m., watered by two branches of Black river, and by Beaver creek. Pop. in 1840, 18,467; in 1850, 25,757. Its cap. is Elyria.—Also a township of Shelby co., in the same state. Pop. 904.—Also a township of Jefferson co., in the state of New York, 15 m. S of Watertown. It has a hilly surface, and is drained by Sandy creek and its tributaries. The soil consists of clay and sandy loam. Pop. 1,699.

LORANCA-DEL-CAMPO, a town of Spain, in New Castile, in the prov. and 27 m. W of Cuenca, partido and 8 m. S of Huete, at the foot of the Sierra-de-Altamira. Pop. 533.

LORANCA-DE-TAJUNA, a town of Spain, in New Castile, in the prov. and 14 m. S of Guadalajara, and partido of Pastrano, partly on the slope of a hill near the r. bank of the Tajuna, which is here crossed by a stone bridge. Pop. 1,102. It has a parish-church, a custom-house, and an hospital. Charcoal is extensively made in the environs.

LORANCE, a township of Cape Girardeau co., in the state of Missouri, U. S. Pop. 1,543.

LORANGO, a river of Mozambique, in the gov. of Quilimane, which runs SE, and throws itself into the channel of Mozambique, 75 m. NE of Quilimane.

LORANQUILLO, a town of Spain, in Old Castile, in the prov. and 22 m. ENE of Burgos, and partido of Belorado. Pop. 97.

LORBUS, or LERBA, a town of Tunis, 75 m. SE of the town of that name, and 21 m. NE of Keff. It is the *Laribus Colonia* of the ancients.

LORCA, a judicial partido and town of Spain, in the prov. of Murcia. The partido comprises 6 pueblos. The town is 42 m. SW of Murcia, and 46 m. W of Cartagena, on the E flank and at the foot of the Sierra-del-Cano, and near the r. bank of the Sangonera, which is here crossed by a handsome bridge. Pop. 40,469. It is commanded by a fortress of great extent, of Moorish structure, on the adjacent Sierra-de-Murviedro, and which is still in a good state of preservation. The town, judging from traces of its ancient walls which are still to be found, appears to have formerly been of much greater extent. It consists of an upper and a lower town; the former, which was built by the Moors, is miserable in the extreme. Its streets are narrow, tortuous, ill-paved, and often extremely steep. The houses are ill and irregularly built, and of little elevation. The lower or modern town stands on a level tract. Some of its streets are long and spacious, and the greater number of the houses are handsome and uniform. There are besides two suburbs, named Gracia and Christoval. The principal edifices are the collegiate church, a structure of the 16th cent., the Gothic church of Santa Maria, another named Santiago, the town-house, the episcopal palace, and the convent de Murcia. There are several other churches and convents, two hospitals, a college, a school, extensive barracks, and several fine public promenades. The industry of the place consists chiefly in the manufacture of saltpetre, soda, soap, cloth of different kinds, thread, tulle, linen, and in silk-spinning. The trade consists chiefly in silk, soda, and articles of local production. The surrounding country is extremely fertile, and affords considerable quantities of clay, aluminous earth, iron, and galena. L., the *Eliocroca* or *Ilorcis* of the ancients, is of great antiquity, and contains a considerable number of Roman remains. In 1802 it sustained a serious inundation from the bursting of the adjacent reservoirs. In 1823 it was taken by the French.

LORCE, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy, watered by the Embleve. Pop. of dep. 582; of com. 300.

LORCH, a market-town of the duchy of Nassau, in the bail. and 2 m. NW of Rudesheim, and 20 m. WSW of Weisbaden, at the confluence of the Wisperbach with the Rhine. Pop. 1,850. It contains a castle, 2 churches, an ancient Benedictine abbey, in which many of the Hohenstaffen princes are buried, and a mineral spring. The environs afford excellent wine.—Also a market-town of Würtemberg, in the circle of the Jaxt, bail. and 26 m. SW of Ellwangen, on a mountain near the r. bank of the Rems. Pop.

1,774. It has manufactories of pottery, hartshorn, and aquafortis.

LORCH, Lorich, or Laurach, a village of Austria, in the circle of the Traun, near the Ens, 15 m. N of Steyer. It occupies the site of the ancient *Lauriacum*.

LORCHA, a town of Spain, in the prov. of Valencia, partido and 18 m. ESE of San-Felipe-de-Jativa. Pop. 888.

LORCHHAUSEN, a town of the duchy of Nassau, in the bail. of Rüdesheim, on the r. bank of the Rhine, 1½ m. NW of Lorch, and 32 m. SSE of Coblenz. Pop. 400.

LORD AUCKLAND ISLANDS. See Auckland Islands.

LORD CHATHAM ISLAND, an island in the South Pacific, in the group of the Galapagos islands, in S lat. 0° 50′, W long. 89° 30′, ESE of Indefatigable island. It is about 45 m. in length from NE to SW, and is covered with mountains. At its NE extremity is Mount Pitt, an eminence 805 ft. in height.

LORD EDGECUMBE ISLAND, an island in the South Pacific, in the archipelago of Santa Cruz, and to the SE of the island of that name, in S lat. 11° 25′, E long. 166° 28′.

LORD HOOD'S ISLAND. See Hood Island.

LORD HOWE'S ISLAND, a small inhabited island in the South Pacific, to the E of Australia, between Port Jackson and Norfolk island, in S lat. 31° 30′, E long. 159° 4′. It is frequented by great numbers of pigeons, wild geese, and turtles.

LORD HOWE'S, or Ontang Java Islands, a group of islands in the South Pacific, to the NE of the Solomon islands, in S lat. 5° 30′, E long. 159° 20′. They were discovered in 1791 by Capt. Hunter. They are 32 in number, and are all well-wooded. Their inhabitants are copper-coloured, wear the hair gathered into a bunch at the back of the head, and long beards with rows of teeth strung at the extremities. The cartilage of the nose was pierced with a piece of bone or reed, and their arms and thighs were covered with tatooing. Their only clothing consisted of a piece of cloth wrapped round the loins. They appeared a hardy race, and had canoes 40 ft. in length.

LORD MULGRAVE'S ARCHIPELAGO. See Mulgrave.

LORD NORTH'S ISLAND, an island of the N. Pacific, in the Caroline archipelago, in N lat. 3° 8′, and E long. 31° 15′.

LORDELO, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 1½ m. W of Villareal. Pop. 580. It has manufactories of earthenware.

LOREDO, a market-town of Mexico, in the prov. of Tamaulepas, on the Rio-del-Norte.

LOREDO (San Pedro de), a parish and town of Spain, in Asturias, in the prov. of Oviedo. Pop. 1,513. It has a parish church and a custom-house. The rearing of cattle and manufacture of linen form the chief branches of local industry.

LORENA, a district and town of Brazil, in the prov. and comarca and 126 m. NE of São-Paulo, and 135 m. W of Rio-de-Janeiro, on the r. bank of the Parahiba. Pop. 6,000. Coffee and other articles of provision are extensively cultivated in the environs. The rearing of pigs and poultry for the market of Rio-de-Janeiro forms also an important object of local industry. It was formerly named Guaypacaré.

LORENZANA, a town of Spain, in Leon, in the prov. and partido and 11 m. NNW of Leon, and 10 m. NE of Llamas-de-la-Bibera, in the valley of Bernesja. Pop. 245.—Also a town in Galicia, in the prov. and 38 m. NNE of Lugo, and partido of Mondonedo, on the r. bank of the Masena, in a valley of the same name. Pop. 2,872. It has a parish church and a custom-house. In the vicinity is a convent, from which the town and valley have derived their name.—Also a market-town of Tuscany, SE of Pisa. Pop. 800. Wine, olives, and figs are extensively cultivated in the environs.

LORENZANA (San Vincente de), a town of Guatimala, in the state and 30 m. ESE of San-Salvador, near the r. bank of the Lempta.

LORENZEN (Sankt), a market-town of Austria, in the Tyrol, in the circle of the Pusterthal, NE of Brixen, on the Gader. Pop. 2,700.—Also a market town in Illyria, in the gov. of Laybach, and circle of Villach, 10 m. NE of Klagenfurt, on the Geil.

LORENZEN-IN-DER-WUSTE (Sankt), a town of Styria, in the circle and 17 m. W of Marburg, near the r. bank of the Drave. Pop. 800. It has manufactories of glass, and a considerable trade in timber.

LORENZKIRCHEN, a village of Saxony, in the circle of Meissen, E of Strehla. Pop. 312.

LORENZO (San), a village of Sardinia, in the div. of Genoa, on the coast, to the NE of St. Remo.—Also a town of the Pontifical states, in the delegation of Urbino and Pesaro, 23 m. ESE of Urbino, on the Cesano. Pop. 1,050.—Also a town of Naples, in the prov. of Calabria-Ultra, district and 13 m. SE of Reggio, cant. and 8 m. NNE of Mileto, on a mountain. Pop. 1,690. It has 2 Greek churches.—Also a town of Austria, in Illyria, in the gov. and 45 m. SSE of Trieste, and 18 m. WSW of Pisino.—Also a headland of Sardinia, on the E coast of the island of that name, to the N of the mouth of the Flumendosa.

LORENZO (San), an island of Mexico, in the gulf of California, near the E coast of Old California, in N lat. 29° 30′, W long. 113° 25′.

LORENZO (San), a headland of Ecuador, in the dep. of Guayaquil, in N lat. 1° 4′, W long. 80° 50′.

LORENZO (San), an island of the Pacific, near the coast of Peru, in the intendency and 9 m. W of Lima, opposite the port of Callao, in S lat. 12° 3′, W long. 77° 15′. It is about 4 m. in length, and is inhabited by Indians who employ themselves in fishing.

LORENZO (San), a river of La Plata, in the S part of Le Gran Chaco, which has its source in the mountains of Los Yuanes; runs NE; and after a course of about 120 m. throws itself into the Vermejo on the r. bank, 36 m. above the confluence of that river with the Paraguay.

LORENZO (San), or Badia San Lorenzo, a comunita and market-town of Tuscany, to the NE of Prato, on the Sieve. Pop. of comunita, comprising 17 adjacent villages, 10,000.

LORENZO-DE-BORUCAS (San), a town of Guatimala, in the SE part of the state of Costa Rica, near the shore of the Pacific.

LORENZO-DEL-CARDESAR (San), a town of Spain, in the prov. of Baleares and island of Majorca, partido and 6 m. NE of Manacor. Pop. 1,600.

LORENZO-DE-LA-FRONTERA (San), or Santa-Cruz-de-la-Sierra-la-Nueva, a town of Bolivia, in the dep. of Cochabamba, and prov. of Santa-Cruz-de-la-Sierra, 225 m. ENE of Orepesa, and 300 m. E of La Paz. Pop. about 6,000. It is situated in an extensive plain, and is surrounded by a great number of handsome country houses. Within the confines of the town the houses, although of stone, are generally badly built. San-L. was founded in 1594, and erected into a bishopric in 1605.—A town of the same name formerly existed 180 m. to the N of the present.

LORENZO-EN-GROTTE (San), a village of the Pontifical states, in the delegation of Viterbo, 6 m.

SSE of Acquapendente, and 14 m. WSW of Orvieto, on a hill.

LORENZO-MAGGIORE (San), a town of Naples, in the prov. of the Terra-di-Lavoro, district and 17 m. SE of Piedimonte, cant. and 5 m. SE of Cereto. Pop. 1,000. It contains 4 churches, one of them a collegiate.

LORENZO-MARQUEZ. See Delagoa.

LORENZO-EL-REAL, a village of Guatimala, in the dep. of Suchiltepec, near the shore of the Pacific.

LORENZONA, a town of Tuscany, in the prov. and 16 m. SSE of Pisa, vicarial and 12 m. ESE of Leghorn.

LOREO, a district and town of Austria, in Lombardy, in the gov. and delegation and 29 m. SSW of Venice, and 8 m. ENE of Adria, on the E bank of a canal of the same name. Pop. 2,500. It carries on an active trade in timber, silk, osiers, lint, grain, and cattle. The district comprises 4 communes.

LORETO, a town of Naples, in the prov. of Abruzzo-Ultra, 4 m. SE of Civita-di-Penne, and 4 m. NW of Chieti, on the side of a hill. Pop. 4,000. It possesses a royal and 7 parish churches and several convents, and has a large paper-mill and a dye-work.

LORETO, a town and fort of Mexico, in Old California, near the E coast of the peninsula, 258 m. W of Cinaloa, and 1,050 m. NW of Mexico.

LORETO, a village of Bolivia, in the district of Moxos, on the Mamore, to the SE of Trinidad.

LORETO, a parish of Brazil, in the prov. of Para, on the r. bank of the Rio-Negro. Its inhabitants are chiefly of Indian descent.—Also a missionary station, on the l. bank of the Uruguay, 90 m. below the confluence of the Iguaraçu. It formerly contained 1,000 inhabitants, but is now nearly deserted.

LORETTO, or Loreto, a distretto-governativo and town of the Pontifical states, in the delegation and 14 m. NE of Macerata, and 14 m. S of Ancona, on a hill, near the mouth of the Musone. Pop. 1,170. It is surrounded with walls flanked with towers, and deep ditches, but possesses little strength. It has a large square, an episcopal palace, and a cathedral, the last of which contains the Casa-Santa, or house inhabited by the Virgin Mary of Nazareth, which, as tradition reports, was conveyed in 1291, by a band of angels, from Galilee to Dalmatia, and subsequently into Italy. The precious relic occupies a conspicuous situation in the cathedral, and is surrounded with a case of fine marble, ornamented with bas-reliefs, the work of some of the best sculptors of Italy. The Casa contains an image of the Virgin, covered with precious stones. On the invasion of Italy by the French republicans, this church, like others, was despoiled of its treasures; even the image of the Virgin was removed to Paris, but restored in 1802. The town has fallen greatly to decay, from the decrease of its traffic in rosaries, crosses, &c.

LORETTO, a village of Alleghany township, Cambria co., in the state of Pennsylvania, U. S., 145 m. W by N of Harrisburg, on Alleghany mountain. Pop. in 1840, 100.

LORETZ, or Lortze, a river of Switzerland, in the cant. of Zug, which issues from the NE extremity of Lake Egeri; runs first NW, then SW; and falls into Lake Zug at the N extremity; issues thence at Cham; flows NW; and joins the Reuss on the r. bank, on the confines of the cant. of Zug and Zurich, and after a total course of about 15 m.

LOREY, a commune of Belgium, in the prov. of Luxemburg, and dep. of Arville. Pop. 112.

LOREY (Le), a commune of France, in the dep. of the Manche, cant. of Saint-Sauveur-Lendelin. Pop. 1,650.

LORGAN, a village of Persia, in the prov. of Chusistan, to the N of Schuster.

LORGES, a village of France, in the dep. of the Loir-et-Cher, cant. and 5 m. E of Marchenoir, and 20 m. N of Blois. Pop. 520.

LORGUES, a canton, commune, and town of France, in the dep. of the Var, and arrond. of Draguignan. The cant. comprises 4 coms. Pop. in 1831, 9,077; in 1841, 8,115. The town is 7 m. SW of Draguignan, on the Argens. Pop. in 1841, 4,196. It is a small but well-built town, and has a college. It possesses extensive manufactories of cloth, linen, earthenware, and turnery; a tannery, a tile and a gypsum-work; and several distilleries of brandy. Wine is cultivated in the environs.

LORGURKARA, a village in Bhawlpur, 26 m. NE of Subzulcote, and on the road from that place to Khanpur.

LORI, a town of Russia in Asia, in the gov. of Georgia, and district of Somkhete, on the Debega, 51 m. SSW of Tiflis.—Also a sanjak of Turkey in Asia, in the pash. of Akhal-tsikhe.

LORICA, a town of New Grenada, in the dep. of the Cauca, 510 m. N of Popayan, and 102 m. SSW of Carthagena, on the l. bank of the Sinu.

LORIDA, a creek of New South Wales, in the co. of King, which has its source in the Cullarin range, and joins the Narrawa.

LORIENT, or L'Orient, an arrondissement, canton, commune, and town of France, in the dep. of Morbihan. The arrond. comprises an area of 199,531 hect., and contains 10 cants. Pop. in 1831, 128,458; in 1841, 136,446.—The cant. comprises 2 coms. Pop. in 1831, 24,351; in 1841, 29,047.—The town is situated in a level tract, at the confluence of the Scorff and Blavet, and about 1½ m. above the entrance of the latter into the Atlantic; 30 m. WNW of Vannes; 96 m. WSW of Rennes; and 327 m. WSW of Paris. Pop. in 1789, 18,460; in 1821, 17,115; in 1841, 22,054. It is surrounded by good fortifications, and built with great regularity, the streets being long, straight, and wide, and the public squares spacious and handsome. The harbour is large and secure, of easy access, and sufficiently deep to float ships of war. The trade was formerly very flourishing, while the French East India company made it the principal station for their shipping, and the exclusive entrepot of goods imported from India. L. was also declared a free port in 1784, a privilege which, however, was abrogated with all other exclusive privileges at the revolution. It has still some trade, particularly with the French colonies, and is a place of importance on account of its magazines for the use of the royal navy. The principal manufacture is of salt. In 1746, an unsuccessful attempt was made on it by a British armament under the command of General Sinclair and Admiral Lestock.

LORIGNAC, a commune of France, in the dep. of Charente-Inferieure, cant. of Saint-Genis. Pop. 1,296.

LORINCZ (Sankt), a village of Hungary, in the com. of Baranya, 12 m. WSW of Funfkirchen, on the l. bank of the Kaltya.

LORIOL, a canton and town of France, in the dep. of Drome, arrond. and 12 m. SSW of Valence. Pop. of cant. in 1841, 10,518.—The town is situated on the l. bank of the Drome, opposite the village of Livron. Pop. 2,400. It has manufactories of silk goods.

LORME, or Lormes, a town of France, in the dep. of La Nièvre, cant. arrond. and 18 m. SE of Clemecy. Pop. 3,214.

LORMONT, a town of France, in the dep. of La Gironde, cant. and 2 m. SW of Carbon-Blanc. Pop. 1,833.

LORN, a district of Argyleshire, about 30 m. in

length, and 9 m. in breadth; bounded on the E by Breadalbane; on the S by Loch-Etive, which separates it from Knapdale; on the W by the ocean and the sound of Mull; and on the N by Lochaber and Moidart.

LORO, a village of the Papal states, in the deleg. and 9 m. SSW of Macerata.

LOROUX, a town of Albania, in the sanj. and 48 m. SSW of Janina, on the r. bank of the Lurcha.

LOROUX-BOTTEREAU (Le), a town of France, in the dep. of Loire-Inferieure, on the Loire, 12 m. E of Nantes. Pop. 5,012.

LOROUX-DU-DESERT (Le), a village of France, in the dep. of Ille-et-Vilaine, 6 m. ENE of Fougeres. Pop. 1,200.

LORQUI, a village of Spain, in Murcia, on the Segura, near Molina, 45 m. W of Alicant. Pop. 680.

LORQUIN, a canton and town of France, in the dep. of Meurthe, arrond. and 8 m. SW of Sarrebourg. Pop. of cant. in 1841, 18,849; of town 1,346.

LORRACH, a town of Baden, 6 m. NE of Bale, on the l. bank of the Wiesen. Pop. 2,582.

LORRAINE, an ancient province in the NE of France, lying between Champagne on the W, and Alsace on the E, and comprising L. Proper, German L., the Pays du Vosges, the Barrois, the Pays Messin, the Toulois, the Verdunois, French Luxemburg, and the principality of Bouillon. Its cap. was Nancy. It is now divided into the 4 deps. of La Meuse, La Moselle, La Meurthe, and Les Vosges.

LORREY (Le), a village of France, in the dep. of La Manche, cant. and 6 m. ESE of St.-Sauveur-Lendelin, on the l. bank of the Lozon. Pop. 1,580.

LORREZ-LE-BOCAGE, a village of France, in the dep. of Seine-et-Marne, 9 m. ESE of Nemours, on the Lunain. Pop. 750.

LORRHA, a parish in co. Tipperary. Area 16,520 acres, of which 542 acres are in Lough Derg. Pop. in 1831, 3,995; in 1841, 4,742. The villages are L., 3 m. E of Portumna; Ferry, on the Shannon, opposite Portumna; Buhnahautia, on the S border; Newtown, 1½ m. NW of L.; and Upper Kilcross and Lower Kilcross, in the N. Pop. of L. village 312.

LORRIS, a town of France, in the dep. of Loiret, 28 m. E of Orleans. Pop. 1,670.

LORSCH, or Laurisheim, a town of Hesse-Darmstadt, 6 m. E of Worms. Pop. 2,300.

LORUM, a parish in co. Carlow, 2¾ m. SSE of Bagnalstown. Area 5,345 acres. Pop. 1,493.

LOS, a village of France, in the dep. of Nord, cant. and 1 m. ENE of Haubourdin. An ancient abbey here has been converted into a large central house-of-correction.

LOS (Isles De), or Ilhas Dos Idolos, a group of 3 inhabited islands, besides several bare rocks and reefs, 2 m. distant from Tumbo-point, between 9° 25′ and 9° 32′ N lat., and 13° 46′ and 13° 52′ W long., on the W coast of Africa. The westernmost and largest, called Tamara or Futabar, is 5 m. in length, and about 1 m. in breadth. Factory island is 4½ m. in length. Crawford or Rooma island, nearly midway between the other two, is little more than a mile in length. They are of volcanic origin, and formed chiefly of a blue and iron-coloured lava.

LOSAD, a village and district of Transylvania, in the E part of the com. of Hunyad.

LOSADA, a town of Spain, in the prov. and 21 m. E of Villafranca. Pop. 234.

LOS ALAMOS. See Alamos.

LOSAR (El), a town of Spain, in the prov. of Badajoz, 34 m. E of Plasencia. Pop. 2,000.

LOSCH, a town of Moravia, in the circle and 4 m. ENE of Brunn. Pop. 1,300.

LOSCHITZ, a town of Moravia, in the circle and 18 m. NW of Olmütz. Pop. 1,600.

LOSDZEY, a village of Poland, in the obwodie and 12 m. NE of Seigny. Pop. 1,600, of whom a large proportion are Jews.

LOSE CREEK, a river of Kentucky, U. S., which runs into the Ohio, in N lat. 37° 32′.

LOS ESTEROS. See Esteros.

LOSENSTEIN, a village of the archd. of Austria, on the r. bank of the Ens, 9 m. S of Steyer.

LOSETO, a town of Naples, in the Terra-de-Bari, 6 m. S of Bari. Pop. 550.

LO-SHAN, a district and town of China, in the prov. of Ho-nan, div. of Ju-ning-fu, in N lat. 32° 15′, and E long. 114° 24′.

LO-SHANG, a district and town of China, in the prov. of Kwang-tung, div. of Shaou-chu-fu, in N lat. 25° 15′, and E long. 112° 48′.

LO-SHAN-HEEN, a district and town of China, in the prov. of Sze-chuen, div. of Kea-tsing-heën.

LOSHEIM, a village of Rhenish Prussia, in the reg. and 18 m. S of Treves. Pop. 1,104.

LOSIKAR, or Lokar, a town of Tibet, in the Pung-suk-sangho, 250 m. SW of Lhassa.

LOSLAU, or Vodcislawice, a town of Prussian Silesia, 7 m. SW of Rybnik. Pop. 1,300.

LOSONCZ, a town of Hungary, the cap. of the com. of Neograd, on the l. bank of the Tugar, 34 m. SE of Altsohl. Pop. 2,500. It was terribly devastated by the Russian troops in the Hungarian insurrectionary war in 1849.

LOSOVENKA, a town of Russia, in the gov. and 52 m. SSE of Kharkov.

LOSSE, a river of France, which rises in the N of the dep. of Hautes-Pyrenees; flows through Gers and Lot-et-Garonne; and joins the Gelize, after a N course of about 50 m.

LOSSEN, a village of Prussian Silesia, on the Oder, 6 m. SE of Brieg.

LOSSIE, a river of Morayshire, which, passing by the town of Elgin, falls into the sea at Lossiemouth, 26 m. from its source.

LOSSIEMOUTH, a village situated at the mouth of the above river, the seaport of Elgin, from which it is distant about 7 m., and with which it is now connected by railway. The harbour receives vessels of 80 tons burden. Pop. in 1841, 902.

LOSSNITZ, a town of Saxony, in the circle of Erzegebirge, 15 m. SSE of Glancha, and 50 m. SW of Dresden. Pop. 3,300. It has manufactories of woollens and cottons.

LOSSOLO, a town of the Sardinian states, in the division of Nivarre, 3 m. WNW of Gattinara. Pop. 6,200.

LOSTALLO, a village of Switzerland, in the cant. of Grisons, district of Moësa. Pop. with Cabiolo, 363, Catholics.

LOSTOCK, a township in the parish of Bolton, in Lancashire, 3 m. W of Great Bolton. Area 1,170 acres. Pop. in 1831, 606; in 1841, 625.—Also a township in the p. of Great Budworth, in Cheshire, 2 m. NE of Northwich. Area 1,630 acres. Pop. in 1831, 537; in 1841, 574.

LOSTORF, a village of Switzerland, in the cant. and 18 m. NE of Soleure. Pop. in 1850, with Mahran, 1,096. Catholics.

LOSTWITHIEL, a parish and market-town, in Cornwall, 25 m. W by N of Plymouth, and 5 m. S of Bodmin, in the valley of the river Fowey, once navigable to L., but now choked up with sand. Area 120 acres. Pop. in 1801, 743; in 1831, 1,548; in 1841, 1,186. It returned 2 members to parliament till the passing of the reform act, by which it was disfranchised; and was anciently possessed of numerous privileges, such as being the county-town and the sole stannary town in Cornwall. Its trade consists chiefly in importing coal and timber, and

exporting the produce of the tin and copper mines in the vicinity.

LO-SZE, a district and town of China, in the prov. of Yun-nan, div. and 36 m. NW of Yun-nan-fu, in N lat. 25° 23′, and E long. 107° 31′.

LOT, a department in the south of France, lying between the parallels of 44° 13′ and 45° 3′ N; and bounded on the N by the dep. of Corrèze; on the E by the deps. of Cantal and Aveyron; on the S by the dep. of Tarn-et-Garonne; and on the W by the deps. of Lot-et-Garonne and Dordogne. Measured from SW to NE, it has a length of 55 m.; its average breadth is 30 m. Its superficial area is returned at 525,584 hectares. Its E part is covered by ramifications of the Cevennes and Mont Cantal. A branch of the Auvergne mountains, entering on the NW, divides the dep. into two sections, one of which belongs to the basin of the Dordogne which, with its affluents the Cere and the Bave, waters the N part of the dep., the other to the basin of the Lot which waters the S part of the dep., and here receives the Selle or Cele. The S part of the dep. gives birth to some affluents of the Garonne. The most elevated point is the mountain of La Bastide, which has an alt. of 760 metres, or 831 yds.; the mean alt. of the central plateau is 492 yds.—The soil is in general calcareous, and very fertile in the valleys of the Lot and the Dordogne. About 86,000 hect. are mountainous. The chief productions are maize, millet, wine, lint, tobacco, chestnuts, saffron, and fruits. The white mulberry is extensively reared, and a large quantity of silk is produced. About 25,000 hectares are occupied with forests. The live stock in 1839, consisted of 396,604 sheep, 60,963 oxen, 49,929 pigs, 6,921 horses, 5,803 mules, and 5,772 asses. Bees and poultry are also extensively reared. Agriculture is extremely backward.—The mineral productions are few and unimportant in quantity. The produce of the iron-mines in 1839 was valued at only 11,280 francs; and of the quarries of marble and building-stones, at only 93,663 francs. A little coal is wrought. The chief articles of manufacture are coarse cottons and woollens, paper, leather, and articles of wooden turnery. *Patés* of turkeys and truffles are largely made for export, and there is a considerable distillation of brandy. There are nearly 1,000 flour-mills within the dep. Its public revenue in 1840 amounted to 5,082,632 francs. The pop. in 1801 was 377,207; in 1841, 287,739; in 1846, 294,566. The dep. is divided into the 3 arrondissements of Cahors, Figeac, and Gourdon; which in 1841 were subdivided into 27 cants., and 307 coms. It forms the dio. of the bishop of Cahors. In 1834, it sent 5 deputies to the legislature, who were chosen by 1,169 electors. In 1842, it possessed 12 educational establishments of the secondary or higher rank, which were attended by 372 pupils; and in 1840, 383 primary schools.

LOT, a river of France, the *Olitis* or *Oltis* of the Romans, which rises near Blaymard in the dep. of Lozere, on the W flank of the Cevennes; intersects that dep., and Aveyron, the S part of Lot, and the E part of Lot-et-Garonne, and joins the Garonne, on the r. bank, at Aiguillon, after a course from E to W of about 280 m. Its principal affluents, on the r., are the Coulagnes, Truyère, and Salle; on the l., the Dourdou and the Diege.

LOTER, a village of Austria, in the circle and 22 m. SW of Salzburg, on the l. bank of the Saale. Pop. 430.

LOT-ET-GARONNE, a department in the S of France, taking its name from its two principal rivers. It lies between the parallels of 43° 58′ and 44° 45′ N; and is bounded on the N by the dep. of La Dordogne; on the E by that of Lot on the SE by Tarn-et-Garonne; on the S by Gers; on the SW by Landes; and on the W by Gironde. It has an area of 535,374 hectares. Its surface is slightly undulating; but rises in the S into some low hills which are connected with overlying spurs of the Pyrenees. The inclination of the surface is towards the W; and the whole dep. belongs to the basin of the Garonne, which receives within the limits of this dep. the Gers and the Bayse on the l.; and the Lot on the r. The Dropt, another tributary of the Garonne, waters the N part of the dep.—The climate is generally delicious; but is subject to long droughts, and likewise long-continued rains. In summer, the NW winds are sometimes destructively violent.—The plains of the Garonne and the Lot are among the most fertile portions of territory in France; but about two-thirds of the surface are poor in soil and of very inferior fertility, and nearly one-eighth is composed of barren marshy *landes*. The principal agricultural productions are maize, millet, legumes, lint, tobacco, fruit especially prunes, and red and white wines. Large flocks of cattle and sheep are reared; and pigs, goats, and poultry are numerous.—The produce of the mines in 1839 was valued at 100,090 francs; of the quarries, at 392,933 francs.—The manufactures consist of hardware, paper, coarse linens and woollens, leather, tobacco, brandy, and wine. Rosin, turpentine, and dried fruits are largely exported. The territorial revenue is estimated at 20,943,000 francs.—The pop. in 1821 was 330,121; in 1841, 347,073; in 1846, 346,260.—The dep. is divided into 4 arrondissements; viz. Agen, Marmande, Nérac, and Villeneuve; which in 1841 were subdivided into 34 cantons, and 312 communes. It forms the dio. of the bishop of Agen. In 1834, it sent 5 deputies to the legislature, who were chosen by 2,529 electors.

LOTH, a commune of Belgium, in the prov. of Brabant, dep. of Leeuw-Saint-Pierre. Pop. 370.

LOTH, a parish of Sutherlandshire, bounded on the NE by Caithness, and on the E and SE by the Moray frith. The Ord of Caithness, at the NE boundary, rises sheer up from the ocean, and forms a stupendous barrier along the whole march with Caithness. A range of steep hills, whose loftiest summits attain alts. of about 1,900 ft. above sea-level, extends along the inner frontier, in a line nearly parallel with the sea-coast; and, excepting at a point nearly 3 m. from the Ord range, where it is cloven by the fine strath of the Helmsdale, forms over all its extent a water-shedding boundary. The glen of L. is flanked by the most mountainous heights of the parish. The Helmsdale, a large and fine stream, has a course of about 2 m. in the p., and falls into the sea 3 m. from the Ord of Caithness. The villages are Helmsdale and Port-Gower. Pop. in 1801, 1,374; in 1831, 2,234; in 1841, 2,526.

LOTHIAN, a district of Scotland, on the S side of the frith of Forth, anciently of larger limits than those assigned to it by modern usage, but still regarded as commensurate with the three shires of Haddington, Edinburgh, and Linlithgow, which are called respectively East, Mid, and West Lothian. It gives the name of Marquis to the noble family of Kerr of Fernihirst.

LOTHRY, a small river in Fifeshire, which rising in the Balla moss, and running SE for 6 or 7 m., falls into the Leven, below Leslie-house.

LO-TEEN-HEEN, a district and town of China, in the prov. of Hu-pih, div. and 48 m. NE of Hwang-chu-fu, in N lat. 30° 53′, E long. 115° 22′. It has one of the springs, named Loyn, the water of which is used in the preparation of tea.

LO-TSING, a district and town of China, in the prov. of Chih-le, div. of Yung-ping-fu, 138 m. ESE

of Pe-king, on the Lan-ho, 18 m. above its entrance into the gulf of Pe-king.

LO-TSING-CHU, a division and town of China, in the prov. of Kwang-tung. The division comprises only one district, named Tung-gan-heen. The town is 135 m. W of Canton, and 90 m. NNE of Kaou-chu-fu, in N lat. 22° 55′ 12″, and E long. 110° 55′.

LO-TSING-HEEN, a district and town of China, in the prov. of Che-kiang, div. of Wan-chu-fu, in N lat. 28° 10′, and E long. 120° 1′.

LOTTERT, a commune of Belgium, in the prov. of Luxemburg, dep. of Thiamont. Pop. 209.

LOTTIN, a port on the S coast of Walau, one of the Caroline group in the S. Pacific.

LOTUN, a town of Hindostan, in the prov. of Oude, 36 m. N of Goruckpore, on the r. bank of the Tinavey.

LOTYFGHER, a fortress of India, in the prov. of Allahabad, 30 m. ESE of Mirzapore.

LOTZEN, a town of Prussia, in the reg. and 42 m. SSW of Gumbinnen, on the lake of Lowentin. Pop. 1,600.

LOTZWYL, or Lozwyl, a village of Switzerland, in the cant. and 24 m. NE of Bern, on the r. bank of the Langeten. Pop. 1,127. It has manufactories of cotton stuffs.

LOUANNEC, a commune and village of France, in the dep. of Cotes-du-Nord, cant. of Perros-Guirec. Pop. 1,599.

LOUARGAT, a commune and village of France, in the dep. of Cotes-du-Nord, cant. of Belle-Isle-en-Terre. Pop. 4,042.

LOUBARESSE, a village of France, in the dep. of Ardeche, cant. of Vulgorge, 12 m. NW of Joyeuse. Pop. 300.

LOUBEH, a town of Tripoli, near the SE coast of the gulf of Sedra, 120 m. SSW of Bengazi.

LOUBENS, a town of France, in the dep. of Haute-Garonne, cant. and 4 m. NNE of Caraman. Pop. 550.

LOUBE'S (Saint), a commune and town of France, in the dep. of Gironde, cant. of Carbon-Blanc. Pop. 2,474.

LOUBES-BERNAC, a commune and town of France, in the dep. of Lot-et-Garonne, cant. of Durac. Pop. 1,224.

LOUBIA, a village of Syria, in the pash. and 36 m. ESE of Acre.

LOUBIA-JASSON, a village of France, in the dep. of Basses-Pyrenees, cant. and 1 m. S of Arudy. Pop. 1,407.

LOUBIENG, a village of France, in the dep. of Basses-Pyrenees, cant. and 6 m. NW of Lagor. Pop. 1,160.

LOUBIE-SOUBIRON, a village of France, in the dep. of Basses-Pyrenees, cant. and 3 m. NE of Laruns. Pop. 330. Fine marble is quarried in the vicinity.

LOUBISCO, a town of Turkey in Europe, in Rumelia, in the sanj. and 38 m. SSW of Monastir, and 15 m. WSW of Kastoria.

LOUBNAK-CHU, a river of Tibet, which has its source in the SW of the prov. of Wei, and to the S of Lake Yar-brok-younithso, runs E, and unites with the Mon-chu, on the r. bank, a little to the NE of Tamzung, and after a course of about 210 m.

LOUBNAK-LANKENY, a village of Tibet, in the prov. of Wei, 150 m. SSE of Lassa. It is noted for its temple.

LOUBNY, a district and town of Russia in Europe, in the gov. of Poltova. The district, which is situated in the centre of the gov., is level and very fertile, producing corn, legumes, and tobacco in great abundance. It also pastures large numbers of cattle. The town is 90 m. WNW of Poltova, and 24 m. NW of Khorol, on a rising ground on the r. bank of the Soula. Pop. 5,500. It is well-built, and has 3 churches, a convent, a veterinary school, with a botanic garden, &c., and carries on an active trade in cattle. This town was formerly one of great strength, and successfully resisted Charles XII. for a considerable period.

LOUBOU, a state and town of the island of Celebes, in the W part of the SE peninsula, on the gulf of Bony. The state, which is of considerable extent, is well-watered and fertile, and produces large quantities of rice. Gold is found in small quantities in the rivers.

LOUBOUER (Saint), a commune of France, in the dep. of the Landes, cant. of Aire-sur-l'Adour. Pop. 1,248. It affords considerable quantities of wine.

LOUBRESSAC, a commune and town of France, in the dep. of the Lot, cant. and 5 m. W of St. Céré, and 23 m. NNW of Figeac. Pop. 1,576. In the environs is a large marble quarry.

LOUCCOS, or Al-Khos, a river of Marocco, in the prov. of Fez, which has its source in the Little Atlas; runs NW; and after a course of about 120 m. throws itself into the Atlantic, near Al Araish, and 45 m. S of the W entrance of the strait of Gibraltar. It is accessible at high tide to vessels of 150 tons burthen.

LOUDAYE, a district of Java, on the S side of the island, to the E of the territory of Panaraga. It is very mountainous, and is traversed in the NE by the Kadiri. It is scantily populated.

LOUDE, or Loudes, a canton, commune, and village of France, in the dep. of the Haute-Loire, and arrond. of Le Puy. The cant. comprises 9 com. Pop. in 1831, 8,071; in 1841, 7,392.—The village is 8 m. WNW of Le Puy. Pop. 1,346.

LOUDEAC, an arrondissement, canton, commune, and town of France, in the dep. of the Côtes-du-Nord. The arrond. comprises an area of 142,073 hect., and contains 9 cant. Pop. in 1831, 96,604; in 1841, 92,124.—The cant. comprises 6 com. Pop. in 1831, 16,164; in 1841, 15,494.—The town is 26 m. S of St. Brieux. Pop. in 1789, 4,000; in 1821. 6,289; in 1831, 6,736; in 1841, 6,521. It has extensive manufactories of linen and thread and earthenware, several paper-mills, tanneries, tile-works, and iron forges. In the vicinity are several slate quarries. The manufacture of cider forms also an important branch of local industry.

LOUDON, a county in the NE part of the state of Virginia, U. S., watered by Kittoctan and Goose creeks. Area 460 sq. m. Pop. in 1841, 20,431; in 1850, 22,080. Its cap. is Leesburg.—Also a township in Merrimac co., in New Hampshire, 8 m. NE of Concord. Pop. 1,640.—Also a township in Seneca co., in Ohio. Pop. 763.—Also a township in Carroll co., in Ohio. Pop. 966.—Also a township in Monroe co., in Michigan. Pop. 425.

LOUDOUN, a parish in Ayrshire, forming the upper part of the strath of the Irvine-water. Pop. in 1801, 2,503; in 1841, 4,446, of whom 1,362 were in the village of Darvel. A branch of the Campbell family take the title of Earl from this parish.

LOUDUN, an arrondissement, canton, commune, and town of France, in the dep. of the Vienne.—The arrond. comprises an area of 88,383 hect., and contains 4 cant. Pop. in 1831, 35,103; in 1841, 35,364.—The cant. comprises 16 com. Pop. in 1831, 11,547; in 1841, 11,606.—The town is 35 m. NNW of Poitiers, and 45 m. SW of Tours. Pop. in 1789, 5,044; in 1821, 3,562; in 1831, 5,078; and in 1841, 5,028. It has several fine promenades, a communal college, a theatre, and an hospital; and possesses manufactories of common woollen fabrics and common lace, and several saltpetre works. Its trade consists chiefly in

grain, wax, wine, brandy, oil, lint, hemp, and hempseed, truffles, dried fruit, wool, and lace. It was formerly the cap. of a small district named Loudunois, which was given to the counts of Anjou in the year 1000, and subsequently ceded to Louis XI. by the counts of Poitou, into whose hands it had fallen. It was afterwards erected into a duchy. The inhabitants, who were chiefly Protestants, suffered much from the persecution of the bishops of Poitiers. L. is noted for the Protestant synodal meetings which were held here in 1611 and 1612.

LOUE', or LOUVE, a river of France, which rises near Aubonne, in the dep. of Doubs; passes Villafans, Ornans, and Quingey; enters the dep. of Jura, in which it passes Poligny; and joins the Doubs, on the l. bank, 6 m. S of Dole, after a W course of about 60 m.—Also a canton and town of France, in the dep. of Sarthe. The cant., comprising 14 coms., had a pop. of 15,545 in 1841. The town, which stands on the r. bank of the Vegre, 15 m. W of Mans, had a pop. of 1,765. It has manufactories of paper, leather, and coarse linens.

LOUECHE. See LEUK.

LOUETTE-SAINT-DENIS, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. of dep. 315; of com. 306.

LOUETTE-SAINT-PIERRE, a department and commune of Belgium, in the prov. of Luxemburg, arrond. of Dinant. Pop. 383.

LOUFTEMONT, a commune of Belgium, in the prov. of Luxemburg, dep. of Anlier. Pop. 403.

LOUGA, a river of Russia in Europe, which has its source in the gov. and district and 24 m. NW of Novgorod; flows thence into the gov. of St. Petersburg; passes Longa and Yamburg; and after a total course of about 180 m. throws itself into the gulf of Finland, 75 m. WSW of St. Petersburg. A little above its mouth it throws off a branch which flows SW under the name of Rossan and joins the Narova. The L. is navigable in spring, and traverses a well-wooded locality, the timber of which forms one of its chief articles of transit.—Also a district and town in the gov. and 96 m. SSW of St. Petersburg, and 66 m. S of Yamburg, on the river of the same name. Pop. 800. Its trade consists chiefly in timber. The district, which lies in the S of the gov., is flat and woody; and cattle form its chief productions. Pop. 76,980.

LOUGAN, a village of Russia in Europe, in the gov. and 72 m. SW of Orel, district and 18 m. N of Sievsk. on the r. bank of the Ousoja. Pop. 710. It has a church; and in the vicinity is a manufactory of porcelain.

LOUGANSKOI, a village of Russia in Europe, in the gov. and 156 m. E of Yekaterinoslav, district and 18 m. SE of Bakhmont, on the r. bank of the Lougan. It has a cannon foundery.

LOUGEN, a river of Norway, in the bail. of Christiansand, rising in the NW part of the bail.; flowing SSE into the Miosen-see; whence it issues under the name of the Vermen or Warmen, and joins the Glommen at Noes.

LOUGH ALLEN. See ALLEN (LOUGH).

LOUGHBEG, a village in the p. of Barnahely, co. Cork. Pop. in 1841, 250.

LOUGHBOROUGH, a parish and market-town in the co. of Leicester; intersected by the Midland counties railway, and the Loughborough canal, which communicates betwixt the Union canal and the Soar. By railway it is 15 m. from Nottingham, and 32 m. from Rugby. Area of p. 5,460 acres. Pop. in 1801, 4,603; in 1831, 10,969; in 1841, 10,170. Pop. of the town in 1801, 4,546; in 1851, 10,900. The town, in point of pop. and importance, is regarded as the second in the county. It is situated in the midst of a beautiful country; consists of a number of handsome streets; and has undergone considerable improvement of late years. The principal manufactures are those of worsted and cotton hosiery, including mohair; also cotton goods and bobbin net-lace. Barracks have recently been built here. L. is a polling-place, and the principal place of election, for the northern division of the county.

LOUGHBOROUGH, a township in the Midland district of Upper Canada, between Pittsburgh and Portland townships. Pop. in 1842, 1,483.

LOUGHBRACCAN, a parish in co. Meath, 1¼ m. SW of Drumcondra. Area 2,160 acres. Pop. in 1831, 493; in 1841, 659. The lake which gives name to the p. is situated nearly in the centre, and has an area of 25 acres.

LOUGHBRICKLAND, a post-town in the p. of Aghaderg, co. Down, 2 m. SSW of Banbridge. It consists principally of stone houses, and has a cheerful appearance. L. lake lies on the S, and has an area of about 119 acres. Pop. in 1841, 647.

LOUGH-CONN. See CONN (LOUGH).

LOUGHCOOTER, a lake in co. Galway. It extends 2¾ m. SSW; has a surface elevation of 116 ft. above sea-level; lies partly in the p. of Kilbeaconty, but chiefly in that of Beagh; and has an area of 247 acres.

LOUGHCREW, a parish in co. Meath, 2½ m. SE of Oldcastle. Area 5,981 acres. Pop. in 1841, 1,412.

LOUGH DERG. See DERG.

LOUGHGALL, a parish, partly in co. Armagh, containing the town of Charlemont. Area 10,923 acres. Pop. in 1831, 9,576; in 1841, 9,615. L. lake, in the S vicinity of the village of L., and Castle-Dillon lake, on the W boundary, contribute pleasant features to the landscape. The village of L. is 3½ m. SE of Charlemont.

LOUGHGILLY, a parish in co. Armagh, 3½ m. SE of Markethill. Area 16,029 acres. Pop. in 1831, 10,198; in 1841, 9,852. The water area is comprised within the lakes of L., Shaws, and Mullaghmore.

LOUGHGLYNN, a *quoad sacra* parish, containing a village of the same name, in the *quoad civilia* p. of Tibohine, co. Roscommon. Pop. in 1831, 10,124. The lake of L. is nearly an Irish mile in length, and has a surface elevation of 284 ft. above sea-level. The village of L., on the S side of the lake, is 4½ m. NW of Castlerea. Pop. in 1841, 302.

LOUGHGUILE, or LOUGHGEEL, a parish in co. Antrim, 6¼ m. ESE of Ballymoney. Area 29,839 acres. Pop. in 1831, 6,889; in 1841, 6,082.

LOUGHILL, a parish in co. Limerick, 3½ m. ENE of Glinn. Area 5,154 acres. Pop. in 1831, 1,849; in 1841, 2,100. The surface is part of the seaboard of the Shannon's estuary.

LOUGHINISLAND, a parish in co. Down, 4¾ m. WSW of Downpatrick, containing the town of Clough, and the villages of Seaford and Anadorn. Area 12,485 acres. Pop. in 1841, 6,551.

LOUGHLINSTOWN. See LEIGHLINSTOWN.

LOUGH-MASK. See MASK (LOUGH).

LOUGHMOE, or LOUGHMORE-WEST, a parish, containing a village of the same name, in co. Tipperary, 2¾ m. S of Templemore. Area 4,865 acres. Pop. in 1831, 2,527; in 1841, 2,471.

LOUGHOVAIA, a town of Russia, in the gov. and 24 m. SE of Tula, on the r. bank of the Chivorona.

LOUGH-REA, a lake in the ps. of L. and Killeenadeema, co. Galway. Its length is 1½ m.; its extreme breadth 1 m. Area within the two ps. 479 acres. Its surface elevation above sea-level is 270 ft.

LOUGHREA, a parish, containing a town of the same name, in co. Galway. Area 6,436 acres. Pop

in 1831, 7,797; in 1841, 7,152.—The market and post-town of L. stands at the foot of L. lake, on the mail-road from Dublin to Galway, 11 m. NE of Gort, and 18 m. ESE of Galway. The general alignment of the town is straggling and irregular. The public buildings are the parish-church, the Roman Catholic chapels, a monastery, a nunnery, a small barrack for cavalry and infantry, a bridewell, a court-house, a linen and yarn hall, and a workhouse. A large proportion of the agricultural produce of the surrounding country is sold at L., and carried to Galway. Brewing, tanning, the making of narrow linens and coarse diapers, and the various processes and manipulations of ordinary artisanship, are the only manufactures. Pop. in 1831, 6,268; in 1841, 5,458.

LOUGH-RUSBEG, an estuary or elongated bay in the p. of Inniskeel, co. Donegal. It measures 1¼ m. across the entrance; penetrates the land 4¾ m. ESE; and receives one or two streamlets at its head.

LOUGH-RUSMORE, an estuary or elongated bay in the p. of Inniskeel, co. Donegal. It measures 1⅝ m. across the entrance; penetrates the land 4¾ m. ESE; and receives at its head the Owenea and Owencocker rivulets.

LOUGHSHINNY, a small seaport in the p. of Lusk, co. Dublin, at the head of a comparatively good natural harbour, 1¼ m. E of the nearest part of the Dublin and Drogheda railway, and 2 m. N by W of Rush. Pop. in 1841, 198.

LOUGHTON, a parish in Bucks, 3¾ m. NW of Fenny Stratford, on a branch of the Ouse. Area 1,620 acres. Pop. in 1831, 325; in 1841, 361.—Also a parish in Essex, 14 m. NNE of London. Area 3,170 acres. Pop. in 1831, 1,269; in 1841, 1,333.—Also a chapelry in the p. of Chetton, Salop, 8¼ m. NE of Ludlow. Area 1,170 acres. Pop. 113.

LOUGUEZ, a port on the NE coast of Madagascar, in S lat. 12° 50′, E long. 50° 10′.

LOUHANS, an arrondissement, canton, and town of France, in the dep. of Saone-et-Loire.—The arrond. has an area of 124,336 hectares, and comprises 8 cantons, with a pop. of 87,459 in 1841.—The cant., comprising 10 coms., had a pop. of 14,669 in 1841.—The town is situated on the l. bank of the Seille, 21 m. SE of Chalons-sur-Saone. Pop. in 1821, 3,326; in 1841, 3,686. It is ill-built. Its chief trade arises from its being an entrepot between Lyons and Switzerland.

LOUIN, a village of France, in the dep. of Deux-Sevres, cant. and 1 m. NW of Saint Loup. Pop. 1,000.

LOUIS (Saint), a village of France, in the dep. of Bouches-du-Rhone, cant. and 4 m. NNW of Marseilles. Pop. 450.—Also a village in the dep. of Moselle, cant. and 1 m. N of Saint Avold.—Also a village in the dep. of Haut-Rhin, cant. of Huningue. Pop. 1,263.

LOUIS (Saint), a district and town on the S side of the island of Hayti, in N lat. 18° 15′. The town is situated at the head of a bay of the same name, opposite a number of small isles which shelter it on the S towards the ocean. Two roads lead to this place from Port-au-Prince, from which it is 70 m. SW by W.—Also a port on the N coast of Hayti, 5 m. SE of Cape Francais.

LOUIS (Saint), a county of Missouri, U. S., in the E part of the state between the Mississippi on the E, and the Missouri on the NW. Area 550 sq. m. Pop. in 1840, 35,979; in 1850, 105,064.—Its capital, of the same name, is situated on the W bank of the Mississippi, 18 m. by water below the junction of the Missouri, 14 m. above that of the Merrimac, and 1,132 m. by the river, above New Orleans, in N lat. 38° 36′, W long. 89° 56′, 120 m. E of Jefferson, and 808 m. from Washington. The ground on which it stands rises gradually from the first to the second bank of the river. The second bank is about 40 ft. higher than the first, and on it the town is now chiefly built. There are 5 principal streets running parallel with the river. The compact part of the city extends about 1½ m. along the river, but there are extensive suburbs on the N and S. Among the public buildings, the city-hall and the Roman Catholic cathedral are the most conspicuous. The Roman Catholic university is a spacious building. Kemper Episcopalian college is finely situated about 4 m. from the town. There were 14 churches within the town in 1848. St. L. was first established in 1764, by the French from Canada, as a trading-port with the Indians. It is at present in a state of rapid improvement, and fast increasing in pop. and trade. In 1810 its pop. was only 1,600; in 1820, 4,598; in 1830, 6,694; in 1840, 16,469; in 1850, 82,744. Its situation is advantageous and interesting, being more central with regard to the whole territory belonging to the United States, than any other considerable town, and uniting the advantages of the great rivers Mississippi, Missouri, Ohio, and Illinois. The country around, and to the W, for the distance of 15 m., is an extended prairie of a very luxuriant soil.—Mr. Asa Whitney proposes to construct a railroad from St. L., or some other place on the Mississippi river, to the Pacific ocean, terminating either at San Francisco in California, or at the mouth of the Columbia river in Oregon. He solicits the patronage of the national government for this prodigious work; and petitions for the grant of a tract of land equal in extent to 60 m. in width by 2,000 m. in length. His plans were first laid before congress in 1842, and he has since been continually occupied in recommending them to the favourable attention of the government and the people with great ability and zeal. His project is generally considered impracticable, from the fact that of the 2,000 m. of territory which his route across the country must traverse, a large portion consists of desert or of sterile and very elevated mountain-districts, in which can be found no materials of construction, and which would afford no business for the support of the road, were the difficulties of building it overcome. Many intelligent men, however, are convinced of its practicability and expediency.

LOUIS (Saint). See Maranhao.

LOUIS (Saint), an island of Senegambia, in the river Senegal, in N lat. 16° 2′, W long. 16° 33′. It is low and sandy, and only 2,515 yds. in length. The French have their principal fort and trading depot upon it. Pop. in 1841, 12,336, of whom 177 were Europeans, 5,508 free Blacks, and 6,174 slaves.

LOUIS (Saint), a considerable river of North America, which has its source near the head-waters of the Mississippi, and falls into Lake Superior, on the W shore, after a course of 200 m.

LOUIS BAY (Saint), a small compact bay, in the co. of Hancock, on the coast of the state of Mississippi, 18 m. from the Regolets, and 26 m. from the bay of Biloxi.—Also a bay on the E coast of Labrador, in N lat. 52° 25′.

LOUIS (Lake Saint), a lake of Lower Canada, formed at the junction of the Ottawa with the St. Lawrence. It is 12 m. long, by 6 m. broad.

LOUIS (Port), the capital of the island of Mauritius. It stands near the W extremity, on an extensive plain, about 2 m. in length, open to the sea, but encompassed on all the other sides with lofty mountains. Pop. 30,000. Its harbour is a narrow inlet about 1 m. in length, and 500 yds. wide. See Mauritius.

LOUIS-DE-MONTFERBUND (Saint), a village

of France, in the dep. of La Gironde, cant. and 4 m. S of Carbon-Blanc. Pop. 1,050.

LOUISA, a strong sea-port of European Russia, in the gov. of Finland, situated on the N coast of the gulf of Finland, 30 m. ENE of Helsingfors.

LOUISA, a county in the central part or Piedmont district of the state of Virginia, U. S. Area 570 sq. m. Pop. in 1840, 15,433; in 1850, 16,691. —Also a river of Virginia, the head-water of Cole river, a SW branch of Great Kanhaway.—Also a co. in the state of Iowa, towards the SE. Area 442 sq. m. Pop. in 1840, 1,927; in 1850, 5,037.—Also the cap. of Lawrence co., in Kentucky, on the Big Sandy river, 158 m. E of Frankfort.

LOUISA-CHITTO, a river which rises on the borders of S. Carolina, and running a SW course through Georgia, joins the Mississippi just below the Walnut-hills. It is 30 yds. wide at its mouth; and is said to be navigable for canoes 30 or 40 leagues.

LOUISA. See LOANGO.

LOUISBURG, a ruined town of the island of Cape Breton, situated on a point of land on the SE side of the island, in N lat. 45° 54′, W long. 59° 52′. Its harbour is more than a ½ m. in breadth from NW to SE in the narrowest part; and 6 m. in length from NE to SW; and it has 6 or 7 faths. of water in every part of it. The anchorage or mooring is good. In winter, the harbour is entirely frozen, from the close of November till May or June.—L. was taken from the French by the English fleet, under Sir Peter Warren, and our American forces, commanded by Sir William Pepperel, in 1745; but afterwards restored to France by the treaty of Aix-la-Chapelle, in 1748. It was again taken by Admiral Boscawen and Lieutenant-general Amherst, on the 27th of July, 1758, and its fortifications demolished. Its ruins are now covered with turf and moss; and a few fishermen's huts are all that mark what was an important and flourishing city within the last cent.

LOUISBURG, the chief town of Franklin co., N. Carolina, U. S., on Tar river, 23 m. NE of Raleigh. Pop. 500.

LOUISBURG. See HARRISBURG.

LOUISBURGH, a fishing village in Caithness, near the town of Wick.

LOUISE (LA), one of the Seychelles, in S lat. 6° 15′, E long. 53° 25′.

LOUISIADE, an archipelago in the Eastern seas, lying to the SE of New Guinea, and extending about 400 m. in length, by about 160 m. in breadth where broadest. The centre of the archipelago is nearly under 10° S lat., and 152° 25′ E long. Some of these islands are fertile, and inhabited by a warlike race, of a black or very deep copper colour, with woolly hair. The prevalent currents render navigation among them dangerous.

LOUISIANA, a name given by the geographers of last century to an extensive district of North America, the limits of which were never exactly defined; but for purposes of general description might be considered to include the W slope of the great valley drained by the Mississippi and its confluent streams. A line drawn from its source westward, in 47° 42′ N lat. might be considered its N boundary. To the W, the Rocky mountains formed a natural barrier: on the SW the Rio-Bravo defined the limits; and on the S, the gulf of Mexico. Its SE limits appear never to have been defined. The country was first explored by the French, and in 1682 received its name from La Salle in honour of Louis XIV. In 1762 the French crown ceded the whole of L. to Spain; and in 1800 Spain reconveyed the whole again to France, of whom it was purchased by the United States in 1803 for 15,000,000 dollars. On the strength of this cession, the American government, as represented by Mr. Calhoun, claimed right to the whole of Oregon; but there is no evidence to show that L., as originally possessed by France, afterwards transferred to Spain, then retroceded by Spain to France, and ultimately ceded by the latter power to the United States, extended in a W direction beyond the Rocky mountains, or beyond the natural boundary of the high lands separating the waters of the Mississippi from those falling into the Pacific. See OREGON.

LOUISIANA, a portion of the extensive region described above, erected into one of the United States by an act of the American congress in 1812. It is situated between 29° and 33° N lat.; and between the meridians of 88° 40′ and 94° 25′ W; and is bounded on the N by Arkansas and Mississippi; on the E by Mississippi; on the S by the gulf of Mexico; and on the W by Texas. Its boundaries are thus defined by law:—"Beginning at the mouth of the river Sabine; thence by line to be drawn along the middle of said river, including all islands to the 33d parallel of N lat.; thence due N to the northernmost part of the 33d parallel of N lat.; thence along the said parallel of lat. to the river Mississippi; thence down the said river to the river Iberville, and from thence along the middle of the said river, and lakes Maurepas and Pontchartrain, to the gulf of Mexico; thence bounded by the said gulf to the place of beginning, including all islands within 3 leagues of the coast." By a subsequent law of congress, that part of W. Florida lying between the rivers Mississippi, Iberville, and Pearl, and the 31st parallel of N lat., containing about 6,000,400 acres, was annexed to L. The state thus defined is 260 m. in length from E to W, and 240 m. broad from N to S, having an area of 46,431 sq. m., or 29,715,840 acres. The SE part, which is mostly included in the delta of the Mississippi, is flat, and where the surface can be secured from inundation, extremely fertile. From lat. 32° to 31°, the average width of the land annually inundated in this quarter is 20 m.; from lat. 31° to the outlet of Lafourche, a little above 30°, the width of the inundation averages 40 m. Below Lafourche, the whole is submerged. The SW part of the state is generally level prairie, and much of its area very productive; but a large portion consists of swamps on the margin of the gulf. The NW part presents a thick forest, and low alluvial soil upon the rivers; but at a distance from the streams the land is high, broken, and sterile. The Red river here spreads out into a number of channels forming lakes, islands, and swamps, over a space 50 m. in length and 6 m. in breadth.

Rivers.] The lower part of the Mississippi is wholly in this state. The Red river flows through it in a SE direction, and joins the Mississippi 240 m. above New Orleans. The Washita runs in a S direction through the N part of the state, and enters the Red river a little above the influx of the latter with the Mississippi. Bayou-Lafourche and Atchafalaya are large outlets of the Mississippi. The other rivers are the Black, Tensaw, Sabine, Calcasieu, Mermentou, Vermilion, Teche, Pearl, Amite, and Iberville. —To the E of the Mississippi is situated the following chain of lakes, namely, Maurepas, Pontchartrain, and Borgne. Lake Maurepas lies about 20 m. N of New Orleans, and is 12 m. long and 8 m. broad. Lake Pontchartrain, 9 m. to the E of it, immediately behind the city of New Orleans, is 35 m. long, 25 m. broad, and from 10 to 15 ft. deep. Lake Borgne lies still further E; but by a deep bay approaches to within a few miles of the Mississippi, with which it communicates by a canal. The other lakes are Chetimaches, Mermentau, Calcasieu, and Sabine. All these lakes are S of the parallel of 31°.

Climate and productions.] The winters in this state are mild. The summers in the wet and marshy parts are very unhealthy; and the yellow fever often visits New Orleans. The more elevated parts of the state are healthy.—The S half of the country which lies between Pearl river on the E and the Mississippi on the W, as far as the 31st parallel of N lat., an important part of the state, is highly productive in cotton, sugar, rice, corn, and indigo; but the district of Feliciana, extending S from the 31st parallel, between the Mississippi on the W and the Amite on the E, is considered by many as the garden of L. The planters residing in this district are many of them very rich. Their plantations consist of from 300 to 1,000 acres; and some of the most opulent have frequently 300 acres of cotton in one field. The soil is of the richest kind, similar in quality and appearance to the best lands in Kentucky; and the cotton raised here is of a superior quality. The hills when left in a state of nature are covered by thickets of reed cane of luxuriant growth. At the distance of 30 m. E from Baton-Rouge the fine lands commence, and extend to Pearl river. These lands are healthful, and have a pleasant undulating surface. The soil is light and sandy, but highly productive. The N coasts of the lakes Maurepas, Pontchartrain, and Borgne, are generally dry and healthful; the land E and W of Madisonville, along the borders of the lakes, is a sandy plain extending in some places 20 m. from their shores, and nearly as level as the ocean. The bottoms of these lakes are even and sandy, and appear to be a continuation of the inclined plane between the Mississippi and Pearl river. The S banks are low and marshy. The wild lands of this tract are finely timbered with pine, live oak, cypress, magnolia, plum, gum, bay, cotton-wood, ash, willow, and occasionally impervious cane-brakes. The pine of L. and Florida yields more turpentine than the pine of the north; and a considerable part of the inhabitants gain a livelihood by making tar and pitch, which they sell at New Orleans. The beach of the lakes is lined with a species of mussel shells, from which lime of the best quality is produced. The soil in general of this state is found to be highly favourable to the growth of corn, cotton, sugar, indigo, rice, sweet potatoes, pumpkins, plums, cherries, figs, peaches, grape-vines, and most kinds of garden vegetables. The country above Madisonville is peculiarly adapted to the rearing of hogs and cattle, the grass of the prairies constituting their principal food. The sandy and most sterile soil is very useful for the cultivation of peach and mulberry orchards. The 'hummock land'—so called from its appearing in tufts among the lofty pines—often divides swamps, creeks, or rivers from the pine land. The whole of the uplands, remote from the sea in the N parts, is of this kind of land. Its soil is various,—in some places a sand of divers colours,—but generally a mixture of clay and a blackish sand, and in some spots a kind of ochre. On all kinds of this land lies a stratum of black mould, formed of the decayed leaves, &c., of the plants growing upon it. The quantity of land adapted to sugar has been computed at 250,000 acres; the rice lands, at an equal extent; the cotton lands at 2,400,000 acres. In 1840, the agricultural productions of this state were returned at 60 bushels of wheat, 107,353 of oats, 1,812 of rye, 5,952,912 of Indian corn, 834,341 of potatoes, 24,651 tons of hay, 49,283 lbs. of wool, 1,012 lbs. of wax, 119,824 lbs. of tobacco, 3,604,534 lbs. of rice, 152,555,368 lbs. of cotton, and 119,947,720 lbs. of sugar. The live stock in the same year amounted to 99,888 horses and mules, 381,248 oxen, 98,072 sheep, 323,220 pigs. The products of the dairy were valued at 153,069 dollars; of the orchards at 11,769 d.; of timber at 66,106 d.; poultry were returned to the value of 283,559 d. There were made in the same year 2,884 gallons of wine, and 2,233 barrels of tar and pitch.—In 1847, 9,000,000 bushels of Indian corn were raised, 2,200 b. of rye, 135,000 lbs. of tobacco, 4,000,000 lbs. of rice, 275,000,000 lbs. of sugar, and 195,000,000 lbs. of cotton.—The first sugar-mill in L. was erected in 1759. It is stated in Stoddard's *History of Louisiana*, that in 1803, at the transfer of the territory, the delta contained 81 sugar-cane plantations. In that work it is observed, "Some of these planters are affluent, and possess from 30 to 60 slaves. The most wealthy of the class reside above the city, and before the cession several had made crops valued at from 10,000 d. to 16,000 d. Since that period the number of slaves has increased; sugar estates are cultivated on a more extensive scale, and the number of them has greatly multiplied, so that the annual crops of some are now worth from 25,000 d. to 30,000 d. The cane is not raised above the island of Orleans, nor is it believed that the climate will admit of it. No sugar-estates are found more than 100 m. above the city." Such was the condition of the cultivation in 1812. The cane is now cultivated in the S portions of Natchitoches and Tensas parishes, which are 350 m. above New Orleans. In 1830, it was estimated that 35,000 slaves were engaged upon 725 plantations, employing about 100 steam-engines, with a capital of about 50,000,000 d. The machinery was estimated to cost in each plantation 5,000 d.; and the whole worked 22,000 horses, valued at 1,500,000 d., and which were renewed every 7 years at an annual cost of 200,000 d. In 1840, the number of slaves employed had increased to 143,890, and the produce of the plantations was a crop of 119,947 hhds. of 1,000 lbs. each, and 600,000 galls. of molasses. In 1849-50, the crop was 200,000 hhds., which realized 10,000,000 d. The census returns just made up, give the number of slaves in the state of L. at the present time at 230,807, and the capital now employed in the sugar plantations is estimated at the sum of 75,000,000 d.

Exports and imports.] The exports of L., since the country came into the possession of the United States, have been rapidly increasing. The exports in 1840 amounted to 34,236,936 d. in value; in 1850 they amounted to 38,105,350 d.—whereof only 407,073 d. were foreign produce—consisting of cotton, corn, indigo, molasses, masts and spars, planks, gunpowder, rice, sugar, shingles, soap, tallow, timber, bees' wax, &c., which are generally brought to market in planters' crafts, or taken from off the plantation by foreign-bound vessels.—The imports in 1840 amounted to 10,673,190 d.; and the whole amount of capital employed in manufactures was 6,430,699 d. The value of the imports in 1850 was 10,760,499 d., whereof 2,652,570 d. were in foreign vessels.—The principal works of internal improvement in this state are a railroad from New Orleans to Lake Pontchartrain, 4½ m. in length; a railroad from Woodville to Bayou-Sara, 26 m. in length; another from New Orleans to Proctorsville, 27 m. in length; another to Carrolton, 8 m. in length; another from Clinton to Port Hudson, of 24 m.; and one from Alexandria towards Cheyneyville, of 25 m.—The Orleans Bank canal, from New Orleans to Lake Pontchartrain, is 6 m. in length; the Barataria canal, from New Orleans to Berwick bay, is 85 m. in length; the Lake Veret canal, from that lake to Lafourche river, is 8 m.

Population.] The pop. of this state in 1810 was 76,566; in 1820 it had risen to 158,407, being an increase in 10 years of 106·9 per cent.! In 1830 it was returned at 215,789, being an increase of 36·2 per cent. In 1840 it was 352,411, being an increase

of 64·3 per cent.; and in 1850, 523,094, being an increase of 48·4 per cent. Of this last number, 249,947 were slaves. In 1840, the number of slaves was 167,822. The pop. is principally collected in the settlements on the Mississippi. In the upper settlements the inhabitants are principally Canadians; in the middle, Germans; in the lower, French and Spaniards. A few years since, a vast majority of the inhabitants were Roman Catholics. The clergy of this order, however, are not numerous; and the constant introduction of emigrants from the N is effecting a rapid revolution in all the institutions of the country. In journeying from New Orleans to the mouth of the Sabine, we meet with men in every stage of civilization. In New Orleans, and other places on the banks of the Mississippi, the sugar and cotton planters live in splendid edifices, and enjoy all the luxury that wealth can impart; in Attacapas and Opelousas the glare of expensive luxury vanishes, and is followed by substantial independence. In the W parts of Opelousas are found herdsmen and hunters; the cabins are rudely and hastily constructed, and the whole scene recalls to the imagination the primeval state of society.

Government.] The governor of L. is elected for 4 years. The legislature meets biennially. Senators, 32 in number, are chosen for 4 years; and representatives, not less than 70, nor more than 100, are chosen for 2 years. Under the last apportionment, L. now returns 4 members to congress. The right of suffrage is enjoyed by every free white male, 21 years of age, and who has been for 2 years resident in the state. The seat of government since 1849 has been Baton-Rouge.—The supreme court consists of a chief-justice, with a salary of 6,000 d., and 3 associate-justices, with salaries of 5,500 d., who are appointed by the governor and senate for a term of 8 years. The court sits in New Orleans. There are at present 12 district courts.—The state-debt at the close of 1840 amounted to 20,585,000 d. In 1848, it was stated to amount to 16,238,130 d. The interest on the debt is 78,914 d. A law was passed in 1845, declaring that the credit of the state shall not thereafter be lent to any person or corporation, but that outstanding bonds might be replaced by new ones. An yearly sum of 250,000 d. is appropriated to educational purposes. The number of schools in operation in 1849 was 704; the number of children between 6 and 14 at school was 53,716, but 20,262 children did not attend school, and the average period of tuition for the year was only 6 months and 13 days. Louisiana college at Jackson was founded in 1825; Jefferson college at Bringiers, in 1831; Saint Charles college at Grand Coteau, in 1838; Baton-Rouge college, in 1838; and Franklin college at Opelousas, in 1839.

LOUISIANA, a village of Pike co., in the state of Missouri, U. S., 88 m. NE of Jefferson, on the W bank of the Mississippi.

LOUISVILLE, the cap. of Jefferson co., Georgia, U. S., situated on Rocky Comfort creek, an affluent of the Ogeechee, 70 m. from the mouth of the latter stream, and 53 m. E of Milledgeville.—Also a township of St. Lawrence co., in the state of New York. Pop. 1,693.—Also a town of Kentucky, the cap. of Jefferson co., on the Ohio, at the head of the Rapids, in N lat. 38° 8′, W long. 85° 26′, 120 m. below Cincinnati. It is pleasantly situated on an eminence gently descending to a narrow plain along the bank of the river. The principal streets run parallel with the river, which is here 1 m. and 25 rods wide. A canal on the Kentucky side of the Rapids, 2½ m. long, with 4 locks, overcomes a fall of about 22 ft.; and an extensive commerce is now carried on from this town with Natchez, New Orleans, and St. Louis. Large flour mills, iron foundries, and woollen manufactories exist here.—Also the cap. of Clay co., in Ohio, 112 m. E of Springfield.

LOUJA, or Lja, a river of Russia, which rises near Lucya, in the gov. of Vitebsk; and flows into the Outroia, on the r. bank, after a course of 60 m.

LOUKH, a town of Russia, in the gov. and 18 m. SE of Kostroma, on a river of the same name, an affluent of the Kliasma. Pop. 1,000.

LOU-KIEN, a river of China, which runs into the Hoang-ho, on the l. bank, in the prov. of Shan-si, after a course of about 90 m.

LOUKOIANOV, a town of Russia, in the gov. of Nijni-Novgorod, 66 m. E of Ardatov. Pop. 1,200.

LOUKOMIE, a town of Russia, in the gov. of Poltava, 15 m. SSW of Loubny.

LOULANS, a village of France, in the dep. of Haute-Saone, cant. and 3 m. WSW of Montbazon, on the Linotte. Pop. 467.

LOULAY, a village of France, in the dep. of Charente-Inferieure, 24 m. ENE of Rochfort. Pop. 500.

LOULE, a town of Portugal, in Algarva, on a river of the same name, in the comarca of Tavira, 9 m. N of Faro. It is surrounded by ancient walls, and contains nearly 5,000 inhabitants.

LOUND, a township in the p. of Sutton, Nottinghamshire, 3½ m. N by W of E. Retford, on the river Idle. Pop. in 1831, 382; in 1841, 438.—Also a parish in Suffolk, 4½ m. NW of Lowestoft. Area 1,040 acres. Pop. in 1831, 425; in 1841, 412.

LOUND'S ISLE, a small island off the S coast of Australia, belonging to Nuyt's archipelago.

LOUP, a river of France, which rises 4 m. E of Seranon, in the dep. of Var; flows ENE, S, and SE; and falls into the Mediterranean, 3 m. N of Antibes, after a course of 30 m.

LOUP (Riviere du), a river of Missouri, U. S., which joins the Platte in about 41° N lat., and 98° W long., after a course of 250 m.

LOUP (Saint), a town of France, in the dep. of Haute-Saone, 6 m. NW of Luxeuil, on the Seymouse. Pop. 2,530.—Also a large village in the dep. of Deux-Sevres, at the junction of the Thoué and the Cebron, 9 m. NNE of Parthenay. Pop. 1,700.—Also a village of France, in the dep. of Allier, cant. and 6 m. SSW of Neuilly. Pop. 500.—Also a village in the dep. of Bouches-du-Rhone, cant. and 4 m. SSE of Marseilles. Pop. 1,200.

LOUP-DE-LA-SALLE (Saint), a village of France, in the dep. of Saone-et-Loire, cant. and 6 m. NW of Verdun-sur-Saone. Pop. 460.

LOUP-DES-VIGNES (Saint), a village of France, in the dep. of Loiret, cant. of Beaune. Pop. 656.

LOUPIAC, a village of France, in the dep. of Aveyron, cant. and 6 m. W of Asprières. Pop. 660.—Also a village in the dep. of La Gironde, cant. and 1 m. SE of Cadillac. Pop. 1,035.

LOUPPE (La), a canton and town of France, in the dep. of Eure-et-Loir, 24 m. W of Chartres. Pop. of cant. in 1841, 10,840; of town, 1,030.

LOURDES, or Lourde, a town of France, in the dep. of the Upper Pyrenees, 12 m. SW of Tarbes. It has a strong castle, which commands the gorge leading from the valley of Argelas to the higher passes of the Pyrenees.—The cant. of L., comprising 42 coms., had a pop. of 13,308 in 1831; of 13,869 in 1841.

LOURDOUEIX-SAINT-MICHEL, a commune of France, in the dep. of Indre, cant. and 4 m. W of Aigurande. Pop. 1,169.

LOURDOUEIX-SAINT-PIERRE, a commune of France, in the dep. of Creuse, cant. and 7 m. NNW of Borat. Pop. 1,975.

LOURICAL, a town of Portugal, in the prov. of Beira, comarca and 24 m. SSW of Coimbra. Pop 2,900.

LOURINHAA, a town of Portugal, in the prov. of Estremadura, comarca and 12 m. N of Torres-Vedras. Pop. 2,400.

LOURMARIN, a town of France, in the dep. of Vaucluse, cant. and 2 m. N of Cadenet. Pop. 1,640.

LOUROUX-BEÇONNAIS (Le), a canton and town of France, in the dep. of Maine-et-Loire, arrond. of Angers, 12 m. S of Segre. Pop. of cant. in 1841, 8,843; of town, 2,385.

LOURY, a town of France, in the dep. of Loiret, cant. and 4 m. SSE of Neuville-aux-Bois. Pop. 1,254.

LOUTH, a maritime county of Ireland, in the extreme NE of Leinster; bounded on the N by co. Armagh; on the NE by co. Down; on the E by the Irish sea; on the S by co. Meath; and on the W by the cos. of Meath and Monaghan. Its greatest length, in the direction of S by W. is 22½ m.; its greatest breadth, in the direction of W by N, is 14½ m. Its area comprehends 178,972 acres of arable land, 15,603 of uncultivated land, 5,318 of plantations, 1,200 of towns, and 813 of water,—in all, 201,906 acres. It is thus the smallest co. in Ireland; being 19,436 acres smaller than the co. of Carlow, even including the town of Drogheda, or 19,908 if that town were excluded.

Coasts and surface.] The immediate coast of the whole peninsula of Carlingford is low. From the head of Dundalk bay to the mouth of the Boyne, it is nearly all a sandy beach, forming the termination of a low and very slowly sloping expanse of champaign country. The only harbours of any consequence are Carlingford, 3½ m. within Lough Carlingford; Dundalk and Annagassan at the head of Dundalk bay; and Drogheda, 3 m. up the river Boyne. —A range of mountains, whose summits have alts. of from 1,000 to upwards of 1,900 ft., occupies the whole of the Carlingford peninsula, excepting a belt round the shores, and extends into co. Armagh, running SE and NW. This range is cut into two sections by a deep and remarkable ravine, which traverses it from N to S. The chief heights immediately on the E side of the defile are Clermont, Clermont-cairn, and Dorlargy, whose summits have alts. above sea-level of respectively 1,462, 1,674, and 906 ft. The mountain masses SE of the screens of the defile press close upon Lough Carlingford. Their chief summits, down to the town of Carlingford, are Corrakite, 1,869 ft., and Carlingford mountain, 1,935 ft. in height. Toward the SE extremity of the range Slieve-Nagloch and Barnavave have alts. of respectively 1,024 and 1,142 ft. The country W from the head of Dundalk bay is level, and in a state of high cultivation.

Waters.] Lough Carlingford leads up to the Newry canal and all the ramified inland navigation of Ulster. The largest of the numerous rills and streamlets which drain the peninsula of Carlingford bears the name of the Big river, but has a run of only 5 m. The Flurry, Stranarn, Gully, and Greaghan rivulets come in from Armagh. The Fane river comes in from Monaghan, and runs to the head of Dundalk-bay. The Glyde or South Lagan comes in from the boundary between Monaghan and Meath, and runs sinuously to the S side of Dundalk bay. The Dee comes in from Meath, and runs E to a common embouchure with the Glyde at Annagassan. The Boyne, over the whole of its contact with this co., is navigable.—The only lakes within the co. are Newtownbalregan, of 47 acres; and the still smaller lakes Corteal, Kercock, Beaulieu, and Drumcah.

Minerals.] A vast protrusion of crystalline greenstone constitutes the E part of the Carlingford mountains. Granite, flanked on its skirts with transition slates, constitutes the remainder of the range, and a band of carboniferous limestone formation constitutes the low ground at their base both round the shores of Carlingford peninsula, and along the valley of the Castletown. The transition rocks, clay slate, greywacke, and greywacke slate occupy the chief portion of the remainder of the co. Iron and lead ore are the only useful metallic minerals which have been observed.

Agriculture.] The soil of the low limestone districts N of Dundalk and W of Ardee produces heavy crops of wheat. Green crops are cultivated by nearly all the superior class of farmers; wheat is raised in large quantities in the limestone districts; and oats and barley are the prevailing crops on all other arable lands. The mountain-districts are still without agricultural improvement. The number of acres under crops in 1848 was 116,235, viz.: wheat, 20,402; oats 29,085; barley, bere, and rye, 21,165; pease and beans, 4,152; potatoes, 11,956; turnips, 6,921; mangel-wurzel, carrots, parsnips, and cabbage, 878; flax, 227; meadow and clover, 21,449. Of plantations there were in 1841, 6,685 acres. The number of farms in 1841, above 1 acre each, was 7,917; on which there was a stock of 10,623 horses and mules, 16,361 horned cattle, 19,295 sheep, 23,957 pigs, 132,900 head of poultry, and 746 asses, the estimated value of all which was £146,569. In 1848, on 9,765 holdings, there were 11,319 horses, 1,427 mules and asses, 26,993 cattle, 23,259 sheep, 12,743 pigs, 3,467 goats, 122,088 poultry.

Manufactures and trade.] The most accurate means within our reach of affording a comprehensive view of the state of manufactures and trade, consists in the personal statistics of productive industry, as exhibited in the census of 1841. From these statistics—which, however, are exclusive of the town of Drogheda—we find there were within the co., fishermen, 696; brewers, 14; distillers, 6; fishmongers, 57; egg-dealers, 49; cattle-dealers, 20; pig-jobbers, 37; corn-dealers, 16; huxters and provision-dealers, 124; flax-dressers, 50; spinners of flax, 1,675; spinners of wool, 657; spinners of unspecified classes, 2,710; winders and warpers, 115; factory workers, 45; weavers of linen, 332; weavers of woollen, 23; weavers of unspecified classes, 1,566; boot and shoe makers, 645; stone-masons, 309; iron-founders, 15; letter-press printers, 6; chandlers and soap-boilers, 18; net-makers. 39; besides the usual proportion of the ordinary handicraft trades.—The co. enjoys the advantages of the recently completed railway from Drogheda to Dundalk and Newry, and thence N to a junction with the Ulster railway at Portadown. The Dundalk and Enniskillen line crosses the N part of the co. The co.-surveyor has under his charge about 400 m. of road. The principal roads through or within the county are the great N road through Drogheda, Dunleer, Castle-Bellingham, and Dundalk; the roads which radiate from Dundalk and Drogheda; and a road from co. Meath, through Collon, to Castle-Blayney.

Population and statistics.] Pop. in 1792, 57,750; in 1821, 101,011; in 1831, 107,481; in 1841, 111,979; in 1851, 91,045. Houses in 1792, 11,545; in 1821, 18,138; in 1831, 18,834; in 1841, 19,861; in 1851, 17,911. The following statistics are all of 1841; and they exclude the town, but include the barony, of Drogheda. First-class inhabited houses, 460; second-class, 3,312. Families dependent chiefly on agriculture, 13,099; on manufactures and trade, 5,633; chiefly on property and professions, 423; on their own manual labour, 13,051; clergymen of the established church, 21; Roman Catholic clergymen, 37. At the close of 1842, there were connected with the National Board, and in full operation, 62 daily schools, attended by 5,780 male and 4,408 female scholars. In Sept. 1848, there were 77 national schools in operation, attended by 11,129 children. The assizes are held at Dundalk, and quarter-sessions at Dundalk and Ardee. The co. gaol and the infirmary are at Dundalk; the district lunatic asy-

lum, to which L. may send 21 patients, is at Dublin; a bridewell is at Ardee. The annual amount of property valued for the poor-rate, including the town of Drogheda, is £325,867; the annual amount of property valued under the act 6° and 7° Will., cap. 84, exclusive of the town of Drogheda, is £186,830.—Twelve members were sent from this co. to the Irish parliament; but only 3 are sent to the imperial parliament, or 2 from the rural districts, and 1 from Dundalk. The constituency of the rural districts in January 1842 was 1,103; in 1849, 754.—The co. is in Armagh diocese, with a small portion in that of Meath.

Divisions and towns.] The co. is divided into the barony of Lower Dundalk, nearly identical with the Carlingford peninsula; the barony of Upper Dundalk, in the N of the main body of the co.; the barony of Louth, S of Upper Dundalk; the barony of Ardee, S of the barony of Louth; the barony of Ferrard, along the S end of the co.; and the barony and the town of Drogheda, upon part of the river Boyne. The towns and chief villages are Carlingford, Rathcor, Whitestown, Dundalk, Blackrock, Dromiskin, Lurgan-Green, Louth, Mullacrew, and Mansfieldstown, Ardee, Castle-Bellingham, Dromin, Annagassan, Greenmount, Dromgoolestown, and Stabannan, Clogher, Collon, Dunleer, Port, Baltray, and Termonfeckan.

History.] The ancient territory of Orgiel comprehended the present cos. of L., Monaghan, and Armagh, but was afterwards diminished very nearly into identity with the present co of L. L. was conquered by De Courcey between 1179 and 1180; erected into a co. in 1210; and, being then regarded as part of Ulster, formed part of the grant first to De Courcey, and afterwards to De Lacey. It continued steadfastly attached to the English government during the long and turbulent period of the extensive return and maintenance of Irish ascendency. It was not included in Leinster till the time of Elizabeth. The forfeitures which followed the rebellion of 1641, comprehended the greater part of the co.

LOUTH, a parish and borough in Lincolnshire, situated in a rich agricultural vale district at the E foot of the Wolds, on the river Ludd, at its issue into the Louth navigation, which communicates with the sea at the mouth of the Humber, 113 m. N by E of London, and 25 m. ENE of Lincoln. The railway from Hull to Peterborough has a station here, 30¼ m. from Hull, and 68 m. from Peterborough. Area 3,620 acres. Pop. in 1801, 4,358; in 1831, 6,976; in 1841, 8,935; in 1851, 10,467. The church is a beautiful structure in the later style of English architecture, with a tower and spire 288 ft. in height. The house-of-correction for the division stands in an open area of considerable extent, at a short distance from the town. L. is a neat, clean, and well-built town, consisting of a number of streets rather irregularly disposed, but healthfully situated. The principal public buildings, besides the churches, schools, and sessions-house and prison, are the mansion-house or assembly-room, town-hall, theatre, newsrooms and savings'-bank, and markets. The principal traffic outwards by the L. navigation—which was formed in 1761, at an expense of £12,000, and has been very prosperous—is that of corn, for London and the W. R. of York; the inland freight is chiefly coal, most of which comes down the Humber from York. There are numerous wind and steam-mills in the vicinity, as well as paper, bone, and flour-mills. There are also a large soap-work, and a carpet and blanket manufactory.

LOUTH, a parish in co. Louth, containing the towns of Louth and Mullacrew. Area 17,842 acres. Pop. in 1831, 9,721; in 1841, 9,647.—The ancient but decayed town of L. stands on the road from Ardee to Castle-Blayney, 5¼ m. N of Ardee, and 39¾ m. N by W of Dublin. It gives the title of Baron in the peerage of Ireland to a branch of the Plunket family. Pop. in 1831, 613; in 1841, 718.

LOUTH BAY, a large bight in Port Lincoln, on the S coast of Australia.

LOUTH ISLES, two low islands in Spencer's gulf, on the S coast of Australia.

LOUTRAKI, a village of Greece, at the NE end of the bay of Corinth. In the vicinity are 3 hot springs.

LOUVAIN, in Dutch Leuven or Loewen, a large but dilapidated town of Belgium, in S. Brabant, situated on the Dyle, and the canal of Louvain, in N lat. 50° 53′ 26″, E long. 4° 41′ 32″, 15 m. ENE of Brussels. Pop. in 1838, 24,911; in 1848, 23,750. Its walls, which are of brick, have a circuit of nearly 7 m.; but the chief part of the space enclosed is occupied by market-gardens, vineyards, and even cornfields. The streets are tolerably regular, but the houses are ill-built, and there are few public edifices deserving attention. The town-hall is admired as a specimen of Gothic architecture, and is literally covered with elaborate and intricate carving; and the collegiate church of St. Pierre is inferior to few in the Netherlands. The other churches and religious houses are of little note; but the great hopital-des-invalides, capable of containing 2,500 persons, and the buildings of the university, are objects of considerable interest. Many of its public edifices have been allowed to fall to decay. L. owes its chief celebrity to its university, founded originally in 1426; suppressed by the French in October 1797; re-established in 1816; and remodelled in 1830. In the last century it embraced 43 colleges; some of the minor colleges have been cleared away, or converted into hotels and barracks. L. was formerly noted for its extensive manufactories of linen and woollens, which have now declined. The making of woollens and lace, however, still continues to employ a number of the inhabitants; but the great manufacture is beer, for which, especially the kind called *bière blanche*, L. has long been celebrated. It has likewise some trade in corn and hops.—This town is of considerable antiquity; its foundation has been attributed to Julius Cæsar; and there are many exaggerated accounts of its ancient population and splendour. It was taken by the French in 1746 and 1794; and in 1804 its fortifications were destroyed.—The canal of L. runs from this city to Malines, where it rejoins the Dyle. It is navigable for vessels of 150 tons.

LOUVAINES, a town of France, in the dep. of Maine-et-Loire, 20 m. N by W of Angers. Pop. 1,500.

LOUVECIENNES, a village of France, in the dep. of Seine-et-Oise, cant. and 1 m. ESE of Marly. Pop. 730.

LOUVEIGNE, a town of Belgium, in the prov. and 11 m. SE of Liege. Pop. 1,062.

LOUVERNE′, a village of France, in the dep. of La Mayenne, 4 m. NW of Argentré. Pop. 1,268.

LOUVIE-JUZON, a commune of France, in the dep. of Basses-Pyrenees, 9 m. SE of Oleron. Pop. 1,530.

LOUVIERS, a town of France, in the dep. of Eure, 16 m. S of Rouen. It has manufactories of linen and cotton; but it is principally noted for its woollens and cassimers. Pop. in 1831, 9,885; in 1841, 9,998.—The cant. had a pop. of 18,969 in 1841.—The arrond., comprising 5 cant., has an area of 78,041 hectares. Pop. in 1841, 69,240.

LOUVIGNE′-DU-DESERT, a town of France, in the dep. of Ille-et-Vilaine, 33 m. NE of Rennes. Pop. 3,524.

LOUVIGNE′-EN-BAIS, a town of France, in the dep. of Ille-et-Vilaine, 9 m. NW of La Guerche. Pop. 1,200.

LOUVOES, a town of Albania, in the sanj. and 14 m. WNW of Delvino.

LOUVRES, a town of France, in the dep. of Seine-et-Oise, 14 m. NE of Paris. Pop. 939.

LOUZA, a river of Russia, which rises 90 m. E of Nikolsk, in the gov. of Vologda; runs NE and W, passing Lalsk; and joins the Joug, on the l. bank, 18 m. SE of Veliki-Oustioug.

LOUZAA, a small town of Portugal, in the prov. of Beira, 17 m. E by S of Coimbra. Pop. 3,138.

LOUZY, a town of France, in the dep. of Doux-Sevres, cant. and 3 m. NE of Thouars. Pop. 800.

LOVANGO, or Buali, the capital of Loango Proper, on the W coast of Africa; situated in about 4° 38′ S lat. Dapper describes it as a large and well-built place.

LOVAS-BERENY, a town of Hungary, in the com. of Stuhl-Weissenburg, 6 m. NNW of Csakvar.

LOVAT, a river of Russia, which rises 18 m. NE of Nevels, in the gov. of Vitebsk; flows through the govs. of Pskov and Novgorod; and enters Lake Ilmen, on the l. bank, after a course of 210 m.

LOVELL, a township of Oxford co., in the state of Maine, U. S., 63 m. SW of Augusta. Pop. 941.

LOVENDAGHEM, a commune and village of Belgium, in the prov. of E. Flanders, 5 m. NW of Ghent. Pop. 4,701, chiefly linen weavers.

LOVENICH, a village of Rhenish Prussia, in the reg. and 22 m. NNE of Aix-la-Chapelle. Pop. 1,600, chiefly silk and woollen weavers.

LOVERE, a small picturesque town of Austrian Lombardy, in the deleg. of Bergamo, at the N extremity of Lake Iseo. Pop. 4,000. It has two handsome churches.

LOVERSALL, a parish in the W. R. of Yorkshire, 4 m. N by W of Tickhill. Area 2,220 acres. Pop. in 1831, 154; in 1841, 150.

LOVESTON, a parish in Pembrokeshire, 5 m. S by W of Narberth. Pop. in 1831, 180; in 1841, 170.

LOVINGSTON, the capital of Nelson co., in Virginia, U. S., 105 m. W by N of Richmond.

LOVINGTON, a parish in Somersetshire, 2½ m. SW of Castle-Cary. Area 560 acres. Pop. in 1831, 214; in 1841, 239.

LOVO, a village of Hungary, in the com. of Salad, 30 m. SE of Furstenfeld.

LOVRANA, a port of Illyria, in the gov. and 50 m. SE of Trieste, on the gulf of Quarnero. Pop. 500.

LOW ISLANDS, four small islands in Gaspar's strait, in the Indian ocean.

LOW ARCHIPELAGO, or continuous group of islands in the Pacific, intersected by the parallel of 20° S, and the meridian of 140° W.

LOWASHAN, a province of the Birman empire, situated between the 22d and 24th parallels of N lat.; bounded on the N by China, and on the E by Laos; and intersected by the Lukiang river.

LOWDHAM, a parish of Nottinghamshire, 7 m. NE of Nottingham. Area 3,010 acres. Pop. 1,483. —Also a parish in Suffolk, 4 m. N by E of Woodbridge. Pop. returned with Petistree.

LOWELL, a town of Middlesex co., in the state of Massachusetts, U. S., 25 m. NW of Boston, with which it is connected by a railway, on the S side of the Merrimac river, at the junction of Concord river, and just below Pawtucket falls. Pop. in 1830, 6,474; in 1840, 20,796; in 1850, 32,964. This extraordinary progress from a small retired village to a large and handsomely built town, covering 5 sq. m., within 30 years, is chiefly due to its possession of immense water-power, furnished by a canal 60 ft. wide, 8 ft. deep, and 1½ m. long, commencing at the head of Pawtucket falls, and extending to Concord river, with a descent of 31 ft. in that distance. From this main canal, the water is conducted by lateral canals to the various mills and manufactories, which in 1843 were 32 in number, and afforded employment to 6,430 females, and 2,077 males. In 1850, the incorporated companies, including the Lowell Machine shop, were 12 in number, working with a capital of 12,110,000 dollars, employing 48 mills, 310,000 spindles, 7,644 looms, 7,644 females, and 3,629 males. The quantity of manufactures produced by this organization of power was 1,704,996 yds. of cotton goods; 21,291 yds. of woollen goods; 6,500 yds. of carpet; and 40 yds. of rug. The cotton consumed per week was 559,000 lbs.; the wool, 46,000 lbs. Other manufactures are produced in the city in addition to those already specified, valued at 1,500,000 d., and employing a capital of 400,000 d., and about 1,500 hands. The first company incorporated here was the Merrimac manufacturing company, started in 1822, and which commenced operations in the following year. In 1825, the Hamilton manufacturing company was established. The average wages of females, clear of board, per week, is 2 d.; those of males, clear of board, per day, 80 c. The Lowell Machine shop, included in the number of incorporated companies, can furnish, it seems, machinery complete for a mill of 6,000 spindles in 3 months, and a mill can be constructed in the same period. The goods manufactured are sheetings, flannels, drillings, prints, shirtings, Negro-cloth, carpets, rugs, broad-cloths, water-proof woollens, and cassimers. There are also extensive print-works and powder-mills. L. has lately been raised to the dignity of a city by a charter of incorporation, which in Massachusetts can be claimed by any town when the number of its inhabitants amounts to 10,000. It thus appoints its officers; and manages its own affairs as a body corporate and municipal. "The most striking feature of the social system here is the condition of the mill-workers. The corporation has built streets of convenient houses for the accommodation of the workmen; and nine-tenths of these are occupied by the unmarried. These houses are farmed by the corporation to elderly females, whose characters must bear the strictest investigation, and at a rent just paying a low rate of interest for the outlay. They carry on the business under strict rules, which limit the numbers, and determine the accommodation of the inmates, two of whom sleep in one room. Females, whose wages are 12s. per week, pay 6s. 6d. per week for board and lodging; for males, the wages and cost of board are about 15 per cent. higher. The hours of work at the mills leave the females leisure, which some spend in fancy needle-work, so as to increase their income; and all, by arrangements among themselves, have access to good libraries. The amusements are balls, reading-rooms, lectures, and concerts; indeed, all the means of intellectual cultivation are placed within their reach, and full advantage is taken of them. There is an ambition, at the same time, to save money, which they nearly all do. Those in superior situations, such as overlookers, have considerable sums in the savings'-banks established by the companies owning the mills. The workers in each mill put their weekly savings into the concern, from which they receive interest in money, and so having an interest in the well-doing of the mill itself, and a bond of attachment to its proprietors. In this manner the capital of all is constantly at work, and provision is made for a possible slackness." About one-eighth of the pop. is Catholic. The public buildings of L. are a court-house, city-hall, market-house, mechanics' hall, an hospital belonging to the factories, and the edifices of the public schools. The hall of the mechanics' association, erected in 1835, is spacious, and is furnished with a library and reading-room, a chemical and philoso-

phical apparatus, and a mineralogical cabinet. The public schools consist of a high school, 6 grammar-schools, and 30 primary schools. There are 23 churches, 2 banks with an aggregate capital of 1,050,000 d., and a savings' institution with a deposit of 300,000 d.—The Indian name of L. was Wamsit. It received its present name in honour of F. C. Lowell, a citizen of Boston, distinguished by his efforts to introduce the cotton manufacture into the United States.

LOWELL, a township in Penobscot co., Maine, U. S. Pop. 205.—Also a township in Orleans co., in Vermont, 45 m. N of Montpelier. Pop. 431.—Also a village in Washington co., in Ohio.

LOWEMBERG, or LEMBERG, a walled town of Prussian Silesia, on the l. bank of the Bober, 63 m. W of Breslau. Pop. 4,300. It has woollen, linen, and cotton manufactories, and bleaching-works.

LOWEN, a town of Prussian Silesia, on the Neisse, 36 m. SE of Breslau. Pop. 1,525.

LOWENDAL, the largest and most central island of a series extending from the Montebello group towards Barrow island, off the W coast of Australia, in about 20° 34′ S lat.

LOWENSTEIN, a co. of Würtemberg, in the bail. of Weinsberg, long possessed by the ancient family of Lowenstein, divided into the branches of Rochefort and Virneburg, neither of whom were members of the Germanic confederation, having been mediatized in 1806.—Its cap., of the same name, is 6 m. SE of Weinsberg. Pop. 1,047.

LOWENTIN, a lake of Prussia, in the reg. and 45 m. SSW of Gumbinnen. It is about 4 m. in length; and communicates with lakes Kisain and Dargeinen by a small canal.

LOWER, a township of Cape May co., in the state of New Jersey, U. S., bounded on the S by the Atlantic, and on the W by Delaware bay, and drained by Pond, New England, and Cox Hall creeks. It is to a great extent covered with sea-beach and salt marsh. Cape May island and lighthouse are in this township. Pop. in 1840, 1,133.

LOWER ALLOWAYS CREEK, a township of Salem co., in the state of New Jersey, U. S., 9 m. S of Salem. The surface is level; and is drained by Hope, Deep, and Muddy creeks, affluents of the Delaware. Towards the E it possesses a good and well-cultivated soil; the rest consists of marsh meadow. Pop. 1,252.

LOWER CHANCEFORD, a township of York co., in the state of Pennsylvania, U. S., 51 m. SSE of Harrisburg, bounded on the E by the Susquehanna, and on the SW and S by Muddy creek, a branch of the Susquehanna, and watered by Tom's creek and Orson's run. Pop. in 1840, 1,291.

LOWER CHICHESTER, a township of Delaware co., in the state of Pennsylvania, U. S., 20 m. SW of Philadelphia. The surface is level, and is watered by Hook creek, a branch of Naaman's creek. The soil is generally fertile. Pop. in 1840, 666.

LOWER DUBLIN, a township of Philadelphia co., in the state of Pennsylvania, U. S., drained by Pennypack creek and Saw-mill run. It has a finely undulating surface and a fertile soil. Pop. 3,298.

LOWER MACUNGY, a township of Lehigh co., in the state of Pennsylvania, U. S. The surface is flat, and the soil calcareous loam. Pop. 2,156.

LOWER MAHANTANGO, a township of Schuylkill co., in the state of Pennsylvania, U. S., 55 m. NE of Harrisburg, intersected by Broad and Sharp's mountains, and watered by Deep and Swatara creeks. The valleys are fertile; the soil consists of red shale. Pop. in 1840, 1,465.

LOWER MAHONOY, a township of Northumberland co., in the state of Pennsylvania, U. S. Pop. in 1840, 1,199.

LOWER MAKEFIELD, a township of Bucks co., in the state of Pennsylvania, U. S., 24 m. NE of Philadelphia, bordered on the E by the Delaware canal. The surface is undulating; the soil consists of clay and sandy loam. Pop. in 1840, 1,550.

LOWER LOUTRE, a township of Montgomery co., in the state of Missouri, U. S. Pop. 1,307.

LOWER MARLBOROUGH, a village of Calvert co., in the state of Maryland, U. S., 41 m. SW of Annapolis. Pop. in 1840, 100.

LOWER MERION, a township of Montgomery co., in the state of Pennsylvania, U. S., 93 m. E of Harrisburg, watered by Schuylkill river and Mill and Cobb's creeks. The surface is undulating, and the soil a fertile loam. Pop. in 1840, 2,827.

LOWER MIDDLETON, a town of Swatara township, Dauphin co., in the state of Pennsylvania, U. S., at the junction of Swatara and Susquehanna rivers, and of the Pennsylvania and Union canals. Pop. in 1840, 756.

LOWER MOUNT BETHEL, a township of Northampton co., in the state of Pennsylvania, U. S. Pop. in 1840, 2,957.

LOWER NAZARETH, a township of Northampton co., in the state of Pennsylvania, U. S. The surface is level, and is drained by Manookisy creek. The soil consists of calcareous loam. Pop. 1,201.

LOWER OXFORD, a township of Chester co., in the state of Pennsylvania, U. S., 41 m. SW of Philadelphia. The surface is undulating, and is watered by branches of Octarara and Elk creeks. The soil is loamy. Pop. in 1840, 1,222. The village, named Oxford, consists of about 20 dwellings.

LOWER PAXTON, a township of Dauphin co., in the state of Pennsylvania, U. S., 6 m. NE of Harrisburg, watered by Beaver and Paxton's creeks, and bordered on the N by Blue mountain. Pop. 1,337.

LOWER PROVIDENCE, a township of Montgomery co., in the state of Pennsylvania, U. S., drained by Perkiomen and Shippack creeks. The surface is hilly, and the soil chiefly red shale. Pop. in 1840, 1,413

LOWER SALFORD, a township of Montgomery co., in the state of Pennsylvania, U. S., 25 m. NW of Philadelphia. The surface is undulating, and is drained by Perkiomen and Shippack creeks. The soil consists chiefly of red shale and loam. Pop. in 1840, 1,141.

LOWER SANDUSKY, a village of Sandusky township, in the co. and on the W bank of the river of the same name, state of Ohio, U. S., 105 m. N of Columbus. Pop. of township in 1840, 1,117.

LOWER SAUCON, a township of Northampton co., in the state of Pennsylvania, U. S., 99 m. ENE of Harrisburg. The surface is hilly, and is watered by Lehigh river, and Saucon creek and its tributaries. The soil consists of gravel and calcareous loam. Pop. in 1840, 2,710.

LOWER ST. CLAIR, a township of Alleghany co., in the state of Pennsylvania, U. S. It has a hilly surface, bounded on the N by Monongahela and Ohio rivers, and drained by Chartier's creek and Saw-mill run. Pop. in 1840, 4,373.

LOWER SWATARA, a township of Dauphin co., in the state of Pennsylvania, U. S., 5 m. SE of Harrisburg. The surface is hilly, and is bounded on the SW by the Susquehanna, and watered by Spring and other creeks. The soil consists of slate and calcareous loam. Pop. in 1840, 1,258. Harrisburg lies partly in this township.

LOWER SMITHFIELD, a township of Monroe co., in the state of Pennsylvania, U. S. Pop. 1,192.

LOWER WINDSOR, a township of York co., in the state of Pennsylvania, U. S. Pop. in 1840, 1,687.

LOWERTZ, a large village of Switzerland, in the cant. of Schwytz, on a lake of the same name, 4 m. W by N of Schwytz. In 1806, this village was almost overwhelmed by the fall of a part of the Rossberg, a mountain above it, having an alt. of about 5,000 ft., by which also the villages of Goldau, Bussingen, and Rothen were destroyed.

LOWES (Loch of the), a lake in the N extremity of the parish of Ettrick, Selkirkshire. Its name, rendered into English, assumes the form—either pleonastic, or not a little ambitious—of 'the Lake of the lakes.' It extends from S to N about 1 m. in length, is ¼ m. in breadth, and 11 or 12 fath. in depth; and is traversed by the drain-like stream of the nascent Yarrow. A narrow neck of land divides it from the celebrated St. Mary's loch.

LOWESBY, a parish of Leicestershire, 9 m. ENE of Leicester. Area 2,350 acres. Pop. in 1841, 220.

LOWESTOFT, or Lowestoffe, a parish and seaport of Suffolk, 9 m. S of Yarmouth; 44 m. NE by N of Ipswich; and 126 m. NE by N of London; connected with the Eastern Counties railway by a branch from Reedham of 9¼ m. in length, and intersected by the Norwich and L. navigation, by which sea-borne vessels are enabled to reach Norwich and Beccles without breaking bulk or discharging their cargoes into small craft, as formerly, at Yarmouth. Area of p. 1,950 acres. Pop. in 1801, 2,332; in 1831, 4,238; in 1841, 4,647; in 1851, 6,580. The church is a handsome structure, in the later style of English architecture, with a lofty tower and spire, about a ½ m. to the W of the town.—The town is situated upon a lofty eminence on the shore of the German ocean, the extreme E point of England. Its principal street is of considerable length, and from it smaller ones diverge on both sides. The houses have generally a neat appearance, especially those which are constructed on the face of the declivity leading to the beach. The manufacture of china-ware, twine, rope, and sail-cloth, is carried on here; but the chief support of the inhabitants arises from the herring-fishery, in which a large majority of them are engaged. The herrings are prepared and dried in an extensive line of houses at the base of the cliff. L. is much frequented during summer by the votaries of health and pleasure, as the shore is well adapted for bathers. Hot, cold, and medicated baths have also been established here, and elegant residences erected for the convenience of visitors. The coast is protected by two forts and a small battery.—A superb pier, and a harbour, intended both as a harbour of commerce, and of refuge for vessels in bad weather, have been constructed at an expense of upwards of £200,000. It communicates by means of Lake Lothing with the Norwich and L. navigation, already noticed. The number of vessels which entered it in the year 1849-50 was 2,371 = 188,290 tons. On the shore are two lighthouses; the upper one, on the brow of a hill, at the N entrance to the town, in N lat. 52° 29′ 10″, E long. 1° 45′ 14″, is of stone, and has a revolving lantern; the lower is constructed of timber, and can be removed at pleasure. It is anticipated that this port will soon become a principal medium of communication with Denmark, and the projected railway system of Jutland. A Danish authority gives the following table of comparative distances, in Danish miles, between 4 different ports on the Danish coast and the English ports of Hull, L., and London:

From Agger canal to Hull,	89	to Lowestoft	85	to London	112
Hierting roads, .	84	...	75	...	102
Husum harbour,	87	...	73	...	98
Tonning harbour,	86	...	72	...	97

Fast steamers will therefore easily run these distances in the following time in hours:

From Agger to Hull, .	38	to Lowestoft	36	to London	48
Hierting, . .	34	...	30	...	41
Husum, . .	35	...	29	...	39
Tonning, . .	34½	...	28½	...	38½

The train from L. to London takes 7 hours; the post can therefore be carried from Hierting to London by this route in 37 or 38 hours; and as soon as the railway from Copenhagen to Hierting is finished, the whole journey between Copenhagen and the British metropolis will only take 48 hours. The projected Hamburg-Rendsborg-Flensborg line, and the Frederickshaven-Aarhuus line, will also present great facilities of short communication with England.—The town has on different occasions sustained heavy losses by conflagrations. During the civil war it suffered considerably for its attachment to the royal cause.

LOWESWATER, a chapelry in Cumberland, 7 m. S by E of Cockermouth, comprising a beautiful lake of the same name. Area 4,360 acres. Pop. 436.

LOWEVILLE, a village of Madison co., in the state of Alabama, 163 m. NNE of Tuscaloosa, and on the E side of Flint river.

LOWHAREAH, a village of Tunis, anciently called *Aquilaria*, 45 m. ENE of Tunis.

LOW-HILL, a township of Lehigh co., in the state of Pennsylvania, U. S., 88 m. ENE of Harrisburg. It has a hilly surface. The soil consists chiefly of white gravel. Pop. in 1840, 854.

LOWICK, a parish of Northumberland, 7 m. NNE of Wooler. Area 12,740 acres. Pop. in 1831, 1,864; in 1841, 1,941.—Also a parish in Northamptonshire, 2½ m. NW of Thrapston. Area 2,200 acres. Pop. in 1831, 394; in 1841, 430.—Also a chapelry in the p. of Ulverston, in Lancashire, 5 m. N of Ulverston. Area 2,720 acres. Pop. in 1841, 374.

LOWICZ, a town of Poland, 42 m. W of Warsaw, on the r. bank of the Bsura. Pop. 7,100. Its chief industry consists in weaving and tanning; and large cattle fairs are held here.

LOWICZEK, a village of Poland, in the obwodie of Kujaire, 21 m. WSW of Lipno. Pop. 200.

LOWISA, a town of Russian Finland, 21 m. E of Borgo, on a bay in the gulf of Finland. Pop. 2,450.

LOWLAND BAY, a bay on the NE coast of New Zealand, W of Highland point.

LOWLANDS (The), the popular name of all the area of Scotland not included in the Celtic district of the Highlands. Large plains, such as those of the Merse, of E. Lothian, of the Howe-of-Annandale, of Lower Nithsdale, of Kyle, of Strathclyde, of the Howe-of-Fife, and of Strathearn and Strathmore,—and extensive undulating tracts, or gently hilly districts, such as those of the hanging plain of Mid-Lothian, of W.-Lothian, of Wigtonshire, of Cunningham, and of large parts of the shires of Renfrew, Kirkcudbright, Stirling, Fife, Forfar, and Aberdeen,—present in this quarter of Scotland physical aspects totally contrasted to the rugged, hardy, and sterile features of the chief and characteristic portions of the Highlands. But, on the other hand, the very broad belt of mountain-heights which runs from the Cheviots in Northumberland quite across Scotland to the W waters on the coast of Galloway, which sends off through all Peebles-shire and Selkirkshire a broad and far extending spur in the Lammermoor range along the frontiers of Berwickshire and E.-Lothian to the German ocean, and which itself occupies large portions of the counties of Roxburgh, Dumfries, Kirkcudbright, Lanark, Ayr, and Wigton, is far excelled in literally 'lowland' characteristics by many a district in the Highlands, and, in some instances, vies in bold outline, in alpine altitude, and in heathy or rocky wildness, with all the parts of the Highlands except the most savagely or sublimely grand.

LOWLEY POINT, a cape on the W shore of Spencer's gulf, in S. Australia.

LOWMAN, a village of Lewis co., in the state of Virginia, U. S., 307 m. WNW of Richmond, on Hughes river, a branch of Little Kanawha river.

LOWNDES, a co. in the S of the state of Georgia, U. S., watered by Suwannee and Withlacoochee rivers. Area 2,080 sq. m. Pop. in 1840, 5,574; in 1850, 7,714. Its cap. is Troupsville.—Also a co. near the centre of Alabama, skirted by the Alabama river on the N. Area 1,600 sq. m. Pop. in 1840,

19,539; in 1850, 21,913. Its cap. is Haynesville.—Also a co. in the E part of Mississippi. Area 324 sq. m. Pop. in 1840, 14,513; in 1850, 19,547. Its cap. is Columbus.

LOWOSITZ. See Lobositz.

LOW-QUARTER, a township in the p. of Kirkby-Ireleth, Lancashire, 5 m. W of Ulverston, at the mouth of the river Dudden. Area 2,100 acres. Pop. in 1831, 565; in 1841, 644.—Also a township in the p. of Hexham, Northumberland, 2 m. S of Hexham. Pop. in 1831, 544; in 1841, 479.

LOWS (Loch of the), a small lake in the p. of Caputh, in Perthshire, 1½ m. E of Dunkeld, on the road from that town to Blairgowrie. It is one of the chain of small sylvan lakes which stretches along and beautifies the district of Stormont.

LOWSIDE, a township in the p. of Wickham, co.-palatine of Durham, 3 m. SW of Gateshead. Pop. in 1831, 1,184; in 1841, 1,192.

LOWSIDE-QUARTER, a township in the p. of St. Bees, Cumberland, 4 m. S of Whitehaven, on the coast. Pop. in 1831, 229; in 1841, 299.

LOWTHER, a parish in Westmoreland, 4 m. S of Penrith, on the river Lowther. Area 3,090 acres. Pop. in 1831, 494; in 1841, 470.—Lowther-castle, the residence of the earl of Lonsdale, is situated in this parish.

LOWTHORP, a parish in the E. R. of Yorkshire, 4¼ m. NE of Great Driffield. Area 1,960 acres. Pop. in 1831, 138; in 1841, 164. The Scarborough branch of the York and Midland railway has a station here.

LOWTON, a chapelry in the p. of Winwick, Lancashire, 5½ m. S by E of Wigan. Area 1,680 acres. Pop. in 1831, 2,374; in 1841, 2,150.

LOWVILLE, a township in Lewis co., New York, U. S., 137 m. NW of Albany. Pop. 2,047.

LOWYAH, a town of Hindostan, in the prov. of Bahar, in N lat. 26° 36′, 20 m. SE of Bettiyah.

LOXA, a province of Ecuador, in the W part of the dep. of Assuay; bounded on the N by the prov. of Guayaquil; and on the E by that of Jaen. It is an elevated valley in the Andes, of a benign and healthy temp., and fertile in all kinds of grain. Its principal commerce is in woven stuffs of cotton and wool, and also in carpets. Cochineal is found in abundance, and some gold mines are worked; but the principal source of riches is the quinquina bark, which is obtained here in immense quantities.—The cap., of the same name, is situated in S lat. 4°, W long. 79° 24′, at an alt. of 7,000 ft. above sea-level, between two streams which flow from the Andes. It has several convents, and 2 churches. Its inhabitants, amounting to 10,000, consist of Mestizoes, Mulattoes, and people of colour.

LOXA, or Loja, a considerable town of Spain, in the prov. and 30 m. WSW of Granada, situated on the l. bank of the Xenil, in a romantic position, at an opening of the mountains which enclose the plain of Granada. Its streets rise above one another on the side of the mountain; and still higher, upon a rock in the town, is a Moorish castle, which gives the whole scene a highly picturesque appearance. It contains 13,000 inhabitants, and has some saltworks and a copper foundry.

LOXBEAR, a parish in Devonshire, 4 m. NW of Tiverton. Area 1,320 acres. Pop. 144.

LOXHORE, a parish of Devon, 5¼ m. NE of Barnstaple. Area 1,830 acres. Pop. 306.

LOXLEY, a parish in Warwickshire, 8 m. SSW of Warwick. Area 1,620 acres. Pop. 318.

LOYALHANNA, a river of Pennsylvania, U. S., in Westmoreland co., which runs NW into the Kiskimanitas.—Also a township in the same co. Pop. 1,130.

LOYALSOCK CREEK, a river of Pennsylvania, U. S., which rises in Bradford co. and runs SSW, and joins the Susquehanna, 4 m. E of Williamsport.—Also a township of Lycoming co. Pop. 1,107.

LO-YANG, a district and town of China, in the prov. of Kwan-se, div. of Tae-ping-fu, in N lat. 22° 53′, and E long. 107° 31′.

LO-YANG-HEEN, a district and town of China, in the prov. of Ho-nan, div. of Ho-nan-fu. It was formerly capital of the Chinese empire.

LOYAT, a town of France, in the dep. of Morbihan, cant. and 4 m. N of Ploermel. Pop. 2,062.

LOYES, a town of France, in the dep. of the Ain, 24 m. E of Trevoux, near the Rhone. Pop. 1,000.

LOYOLA, a town of Ecuador, in the prov. of Jaen de Bracamoros, on the l. bank of the Veriel, 13 m. SE of Valladolid. It is small, and little else than a village. Its pop. consists mostly of people of colour.—Also a village and celebrated convent of Spain, in the prov. of Guipuscoa, 14 m. SW of Saint-Sebastian, on the r. bank of the Urola. It was the birth-place of St. Ignatius de Loyola, in whose honour the convent was founded.

LOYOLA (San Luis de), a town of the Argentine prov. of Cuyo, 170 m. SE of Mendoza, formerly comprehended within the limits of Chili, but afterwards annexed to Buenos Ayres. It is a small place; but contains a parish-church, a Dominican convent, and a college of Jesuits.

LO-YUEN, a district and town of China, in the prov. of Fo-keën, div. and 36 m. NE of Fu-chu-fu, on the Eastern sea, in N lat. 26° 24′, and E long. 119° 45′.

LO-YUEN-YU, a town of China, in the prov. of Chih-le, in N lat. 40° 19′ 30″, and long. W of Peking 1° 28′ 30″.

LO-YUNG, a district and town of China, in the prov. of Kwan-se, div. of Lew-chu-fu, in N lat. 24° 24′, and E long. 109° 21′.

LOZDZEY, a town of Poland, in the obwodie and 12 m. NE of Seyny. Pop. 1,600, mostly Jews.

LOZE, a river of France, rising near Sombernon, in the arrond. of Dijon, and flowing NW, passing Salmaise; then turning W, and joining the Brenne, on the r. bank, 6 m. NE of Semur, after a course of 30 m.

LOZEIN, a river of France, rising near Lantages; running N, and joining the Seine, on the l. bank, in the dep. of Aube, after a course of 30 m.

LOZERAIN, a river of France, which rises near Sombernon, in the dep. of Cote-d'Or; runs NW, passing Flavigny; and joins the Brenne, on the r. bank, 5 m. NE of Semur, after a course of 21 m.

LOZÈRE, a mountain of France, in the Cevennes, SE of Mende, stretching between the Tarn on the S, and the Lot on the N, and attaining an alt. of 707 toises, or 1,507 yds., above sea-level.

LOZÈRE, a department in the S of France, between the parallels of 44° 7′ and 44° 58′ N; and bounded on the N by the deps. of Cantal and Haute-Loire; on the E by those of Ardeche and Gard; on the S by Gard; and on the SW and W by Aveyron. It has an area of 524,806 hectares. Its surface belongs to the basins of the Loire, the Garonne, and the Rhone; but chiefly to that of the Garonne. It is mountainous throughout, being traversed by various chains and spurs of the Cevennes, among the most remarkable of which are the Lozère and the Mercoire on the E; the Margeride on the N; the Peyrou, Montasset, Faulire, and Prunclière in the W; and the Laigonal on the S. These chains divide the dep. into three districts. That on the NE, belonging to the basin of the Loire, and watered by the Allier, and its affluents, the Langouyra, the Chapeauroux, and the Ance; the second, on the SE, belongs to

the basin of the Rhone, and is watered by the Borne, the Chasseza, the Cèze, the Gardon-d'Alais, and the Gardon-d'Anduze; the third and largest, on the W, forms part of the basin of the Garonne, and is watered by the Truyère, the Lot, and the Tarn.—The climate is severe, especially in winter, when the mountains are covered with snow.—The soil is poor, and divisible into 125,400 h. of mountain-surface, 54,600 of heaths and landes, 95,000 of calcareous soil, 5,600 of gravelly soil; 35,500 of stony soil, and 90,200 of sandy. The forests cover 45,238 hect. Chestnuts and potatoes form chief articles of subsistence to a considerable proportion of the pop. Sheep are extensively reared. On some favoured exposures in the SE, the olive, the vine, and the mulberry are grown.—Lead, iron, and antimony are mined. The chief branches of domestic manufacture are paper, coarse pottery, leather, and parchment. —The pop. of the dep. in 1801 was 126,503; in 1821, 133,934; in 1841, 140,788; in 1846, 143,331.—It is divided into the 3 arrondissements of Mende, Florac, and Marvejols; which were subdivided in 1841 into 24 cantons, and 193 communes. It forms the dio. of the bishop of Mende.

LOZOVAIA, a town of Russia, in the gov. of Kharkov, 9 m. NNE of Kharkov.

LOZOYA, a river of Spain, which rises to the N of Segovia, and entering the prov. of Guadalaxara, joins the Jarama, on the r. bank, near Uceda, after a SE course of 30 m.—Also a town of Spain, in the prov. and 16 m. ESE of Segovia, on the l. bank of the river of the same name. Pop. 516.

LOZVA, a river of Russia, which rises on the E flank of the Ural mountains, in the gov. of Perm, and joins the Tarda, on the l. bank, after a course from NNW to SSE of 210 m.

LOZZO-VALBONA, a town of Austrian Lombardy, in the prov. and 15 m. SW of Padua. Pop. 2,279.

LU, a small town of Piedmont, in the duchy of Montferrat, 9 m. W of Alessandria, near the r. bank of the Grana. Pop. of com. 3,098.

LUA, a small seaport of Oman, in Arabia, 10 m. N of Sohar.—Also a river of the island of Cuba, which runs into the sea 25 m. NE of Cape Cruz.

LUABO, a river of Mozambique, forming the southmost of the branches into which the Zambeze divides itself before entering the Indian ocean. —The same name is given to the alluvial island formed between it and the Zambeze.

LUAN, an island in the Indian archipelago, between Lakor and Banda, about 14 m. in circumf., and inhabited by about 250 families, who reside in 4 villages.—Also a port on the S coast of Mindanao, in the Philippine group, in N lat. 6° 7′.

LUANA (Point), a cape on the SW coast of the island of Jamaica, in N lat. 18° 2′.

LUANCO, a town of Spain, in the prov. of Oviedo, 18 m. N of Oviedo. Pop. 1,800.

LUARCA, a port of Spain, in the prov. and 39 m. WNW of Oviedo, at the mouth of the Rio Negro. It is a well-built town, and its port, which is capable of receiving 40 gun frigates, is defended by batteries. Pop. 2,700.

LUART (Le), a village of France, in the dep. of La Sarthe, cant. and 4 m. SSE of Tuffe. Pop. 790.

LUBACZOW, a town of Galicia, in the circle and 39 m. WNW of Zolkiew. Pop. 3,000.

LUBACZOWKA, a town of Russia, in the gov. of Volhynia, 3 m. SE of Vladimir.

LUBAD, a small town of Asiatic Turkey, on a lake to which it gives name, 7 m. S of Brusah.

LUBAN, one of the Philippine group, 12 m. NW of Mindoro, in N lat. 13° 44′.—Also a town of Russia, in the gov. of Minsk, 24 m. SSE of Sluck, on the r. bank of the Oresa.

LUBAR, a town of Russia, in the gov. of Volhynia, 30 m. ENE of Staro-Konstantinow, on the l. bank of the Slucz.

LUBARTOW, a town of Poland, in the obwodie and 15 m. NNE of Lublin, on the l. bank of the Wieprz. Pop. 1,700.

LUBASZ, a town of Prussia, in the reg. of Bromberg, 3 m. S of Czarnikow. Pop. 210.

LUBASZEWO, a town of Russia, in the gov. of Minsk, 40 m. SW of Pinsk. Pop. 800.

LUBBEKE, a town of Prussian Westphalia, 14 m. W of Minden, on the Muhl. Pop. 2,150.

LUBBEN, or Lubio, a town of Prussia, 50 m. SSE of Berlin, on an insular spot formed by the Spree and the Birste. Pop. 4,370.

LUBBENAU, a town of Prussia, in the reg. of Frankfort, on the Spree, 58 m. N of Dresden. Pop. 315.

LUBEC. See Lubok.

LUBEC, a township and port-of-entry in Washington co., in the state of Maine, U. S., 180 m. ENE of Augusta, at the W entrance of Passamaquoddy bay. It has a good harbour. Pop. 2,307.

LUBECK, in Danish and Swedish, Lybeck, a free city in the N of Germany, adjacent to the duchy of Holstein, in N lat. 53° 52′ 1″, E long. 10° 41′ 5″, 36 m. NE of Hamburg, and 38 m. SE of Kiel, situated chiefly on a long eminence on the banks of the Trave, a navigable river which flows into the Baltic about 14 m. below. The W side of the town is contiguous to the Trave; its E side is traversed by the Wackenitz, which flows from the lake of Schwerin. From its elevated situation, L. is a clean and cheerful place. It is enclosed by ramparts, with 12 bastions, and which are planted with rows of trees, and form a fine promenade for the inhabitants; but the other military defences, which were of great strength, were demolished after the town was surrendered to the French in 1806, and the moat has been filled up. Most of the houses are old-fashioned, though some of those of later erection are built in a good taste. The interior is on the whole more regular than that of most old towns in Germany, being intersected by several broad and straight streets, and divided into 4 quarters. The houses are built of stone, and are in general very lofty. Their basement-stories are often used as magazines or warehouses. L. was formerly a bishop's see, and still has a cathedral and 4 parish-churches, of which that of St. Mary's is a large and elegant building, remarkable for its lofty vault, its astronomical clock, constructed in 1405, the allegorical painting called 'the Dance of Death,' a magnificent organ, and a number of monuments. There are within the city a poor-house, an alms-house, a mint, an operatic theatre, a house-of-correction, an orphan-house, an hospital, a city-school, and a public library of 37,000 vols. The other public buildings and establishments are the armoury, the Calvinist church, the Catholic chapel, and a classical school. The council-house, a Gothic building, has been preserved with great care. Its hall was in former ages the place of meeting for the deputies from the Hanse towns, among which L. had the precedence. The pop. of the city in 1845 was 25,339. The manufactures are on a small scale, but very multifarious, comprising woollens, silk, cotton, gold and silver lace, tobacco, playing-cards, musical instruments, hats, wax candles, starch, soap, vinegar, white lead, copper, and brass wire. The trade of L. was promoted both by its easy access to the Baltic, and by the means of communicating with the neighbouring country afforded by navigable rivers. It is now connected with the Berlin and Hamburg railway by a

branch-line joining that railway at Buchen. Its harbour is properly at Travemunde, where ships drawing more than 10 ft. water discharge part of their cargo. On the inland side it has a partial navigation up the Trave, and that river being joined a little above the town by the Stecknitz, flat-bottomed vessels sail up the latter to the entrance of a small canal which conveys them to the Elbe, and to Hamburg. The trade of L. consists partly in the export of corn, cattle, wool, fish, goose-quills, iron, and timber; partly in the import of articles for the consumption of its inhabitants and its neighbours. It has also an extensive commission and transit-trade. A great wool fair is held in June. In 1836. the arrivals of vessels were 852 = 85.651 tons. Of these 361 = 19,031 tons were Danish, and 37 = 5,921, English. The trade of L. during 1849, as compared with that of the previous year, if we may judge by the shipping returns, shows an increase of about 20 per cent., and this is principally to be found in the increased number of English and L. vessels. The entries inward and outward are about equal. The number of vessels which entered inward in 1849 was 918 vessels against 816 vessels in 1848. Of these 100 were L. against 69 in 1848; 94 were English against only 37 in 1848; 225 were Russian, 218 Swedish, 172 Danish, 44 Norwegian, 29 Netherlands, and the remainder of various flags. In the above are not included steamers and coasting-craft.

The territory of L. was formerly very scattered; but in 1804 a treaty was made for exchanging most of its distant parts for a continuous tract along the Trave. It still, however, comprises several *enclaves* within the Holstein territory. The territory immediately adjacent to the city is surrounded by the territories of Mecklenburg, Holstein, and Oldenburg, and the Baltic. The acquisition on this occasion was insignificant in point of extent, but of considerable importance to the town, as giving it free access, either by land or water, to its port. The superficial extent is about 127 sq. m., and the whole territory is divided into 5 districts, viz., the Burgthor, Holsteinthor, Muhlenthor, Ritzeran, and Travemünde. Pop. in 1838, 47,200; in 1845, 47,197, mostly Lutherans. The annual revenues amount to about £70,000. In 1851, the revenue was 859,040 marcs; the expenditure, 880,074. The gov. is vested in a senate and a house-of-burgesses, who are elected by the corporate companies of the city. Its armed force consists of 940 men.—L. was built on its present site about 1144, and received from the reigning duke of Saxony various privileges, along with a code of regulations called the Lubeck law, which was afterwards adopted by a number of small states and towns. In 1220 L. was declared a free city of the empire; and in 1241 it entered into a treaty with Hamburg, which laid the foundation of the Hanseatic league. When the disastrous campaign of 1806 brought the French arms into the N of Germany, on the defeat of the Prussians at Jena, Blucher threw himself into this city, and did not surrender till after a sanguinary conflict. L. suffered much on this occasion, and was soon after annexed to the French dominions, in 1810. In 1813 it was delivered by the allied troops, and was soon after declared free by the congress of Vienna. It now forms part of the Germanic confederation, and along with the other free towns sends a deputy to the diet. L. has given birth to several men of eminence, particularly Mosheim, the writer on Ecclesiastical History, and Sir Godfrey Kneller, the celebrated painter.

LUBEN, a town of Prussian Silesia, on the Kalterbach, 13 m. NNE of Liegnitz. Pop. 3,520. It has manufactories of woollens, and is celebrated for its biscuits.

LUBENHAM, a parish of Leicestershire, 2 m. W of Market-Harborough. Area 2,400 acres. Pop. 578.

LUBERSAC, a town of France, in the dep. of the Corrèze, 8 m. W of Uzerche, near the l. bank of the Haute-Vezère. Pop. 1,431.

LUBICA, a town of Galicia, in the circle and 30 m. NW of Zolkiew.

LUBIN, a village of Poland, in the obwodie of Kujavie, 21 m. SE of Brzesc. Pop. 340.

LUBIN-DES-JONCHERETS (St.), a commune and town of France, in the dep. of Eure-et-Loire, on the Arve, 12 m. W of Dreux. Pop. 1,540.

LUBINE, a village of France, in the dep. of Vosges, cant. and 4 m. SE of Saales. Pop. 400.

LUBITZ, or Lubs, a town of the grand-duchy of Mecklenburg-Schwerin, on the Elde, 7 m. ENE of Parchim. Pop. 1,874.

LUBLAU, or Lublo, a town of Hungary, in the com. of Zips, near the r. bank of the Poprad, 15 m. NE of Kesmarkt. Pop. 2,100.

LUBLIN, a palatinate of the kingdom of Poland, comprising its SE extremity. It is bounded by Russia, Austrian Galicia, and the palatinates of Sandomir, Masovia, and Podlachia; and comprehends the following circles of that part of the kingdom of Galicia ceded by Austria to the duchy of Warsaw in 1810; namely, Lublin, Chelm, Josefow, and Zamoski. Its area is estimated at 11,975 sq. m., and is divided into the 4 obwodies of Krasnistaw, L., Rubieszow, and Zamosz. Pop. in 1846, 1,008,292.—Its cap., of the same name, stands on the Bistritza, 95 m. SE of Warsaw, and is almost surrounded by lakes and marshes. It is an ill-built assemblage of wooden houses arranged in irregular streets. It is the see of a bishop, and has several churches and convents, a seminary, and a spacious synagogue. It has manufactories of coarse woollens; an active trade in corn and wine; and three great yearly fairs, which last each a month, and are attended by German, Greek, Armenian, Arabian, Russian, Turkish, and other traders.

LUBLINITZ, a town of Prussian Silesia, 79 m. SE of Breslau, on the Malz. Pop. 2,150.

LUBNAIG (Loch), a fine sheet of water in Perthshire. The greater portion of the Scottish lakes are merely expansions of some stream, the waters of which being intercepted at the gorge or lower opening of a glen, spread themselves out and form a lake, in the depths of which the river is for a time apparently lost. Loch-Katrine, Loch-Achry, and Loch-Vennachoir, are thus formed by the southern or principal branch of the Teith, in the several glens through which it takes its course. The N branch of this river—more generally, however, called Balvaig—which joins it previous to reaching Callander, likewise forms during its very devious windings from its source in Dumbartonshire, a series of three lakes: viz., Loch-Doine, Loch-Voel, and Loch-Lubnaig. The last of this chain of lakes is situated at the NE base of Benledi, about 4 m. SW of Callander. It is nearly 5½ m. in length, but is scarcely a ½ m. in breadth at any part. Going from Callander, the traveller approaches the lake through the celebrated pass of Leney.

LUBNY, a town of European Russia, in the gov. of Pultava, on the river Sula, 104 m. SE of Kiev. It is tolerably built; and has four yearly markets, at which a considerable traffic is carried on, chiefly in cattle. Pop. 5,300.

LUBOK, an island in the Sunda archipelago, in S lat. 5° 40′, 70 m. N of Java. It is about 10 m. in length, and well-wooded; and produces rice and cocoa-nuts.

LUBOML, a market-town of Russian Poland, in

the gov. of Volhynia, 38 m. NNW of Vladimir. Pop. 2,815.

LUBOWO, a village of Poland, in the obwodie and 9 m. WSW of Kalwari. Pop. 425.

LUBRIN, a town of Spain, in the prov. and 29 m. NE of Almeria. Pop. 4,815.

LUBTHEEN, a town of Mecklenburg-Schwerin, 10 m. SSW of Haguenau. Pop. 1,500.

LUC, a town of France, in the dep. of Basses-Pyrenees, cant. and 3 m. WSW of Monein, on the Liyon. Pop. 2,800.—Also a com. of Switzerland, in the cant. of Valais, district of Sierre. Pop. 385.

LUC (Le), a town of France, in the dep. of Var, 15 m. SW of Draguignan. Pop. 4,000.

LUCA, a port of Dalmatia, on the E coast of the isle of Guipana, in the Adriatic, 15 m. WNW of Ragusa.

LUCA (Santo), a town of Naples, in Calabria Ultra Ima, 12 m. SSW of Gerace. Pop. 1,260.

LUCALA, a river of Angola, in Southern Africa, which falls into the Coanza at Massangano, after a WSW course of 250 m.—There is a town of the same name 30 m. above the point of junction.

LUCAN, a parish and village in co. Dublin, 6¾ m. W of Dublin. Area 1,122 acres. Pop. 1,139.—The village stands on the r. bank of the Liffey, which is here spanned by a handsome bridge. Pop. in 1841, 563.

LUCAN (Point), a cape on the NW coast of King George Third's archipelago, in N lat. 58° 7′.

LUCANAS, a province of Peru, in the dep. of Ayacucho; bounded on the NW and N by the prov. of Castro-Vireina; on the E and SE by that of Parina-Cochas; and on the SW and W by that of Camana. It is 60 leagues long, and 30 wide. Its situation is elevated among the Cordilleras, and the temp. is cold; but the soil is nevertheless productive in wheat, barley, maize, and in the ravines various fruits are cultivated. It has productive silver-mines, to which it owes its chief importance.—Its cap., of the same name, is in S lat. 14° 58′.

LUCAR, a town of Spain, in the prov. and 36 m. NNW of Almeria. Pop. 1,930.

LUCAR-DE-BARRAMEDA (San), a maritime town of Spain, in the prov. and 48 m. SW of Seville, at the mouth of the Guadalquivir. It has a harbour defended by two castles, but the entrance is dangerous; the roadstead, on the other hand, is very good. This place is called the Key of Seville, as it commands the passage up the river to that place; and all vessels that draw too much water to sail up the Guadalquivir are unloaded here. Its trade in salt, fruit, and particularly in wine and brandy, was at one time large, but has dwindled away. The neighbouring vineyards produce the inferior sherries known as St. L. wines. Its pop. was 18,000 before the ravages of the plague in 1800; its loss at that disastrous period was about 4,000. It was returned in 1845 at 16,775. It was from this place that Columbus, Magalhaens, Torres, and other early navigators, sailed on voyages of discovery to the New world.

LUCAR-DE-GUADIANA (San), a fortified town of Spain, in Andalusia, on a hill near the Guadiana, 75 m. W of Seville. Pop. 2,700.

LUCAR-DE-MAYOR (San), a small town of Spain, in Andalusia, on the Guadiamar, 10 m. W of Seville. Pop. 1,980.

LUCAS, a county in the NW of Ohio, U. S. Area 600 sq. m. Pop. in 1840, 9,382; in 1850, 12,367.

LUCAS, or Luque, a parish of Paraguay, situated on the E bank of the Paraguay, about 6 m. NE of Assumpcion, in S lat. 25° 15′.—It is also the name of numerous settlements in Spanish America, generally consisting of a few families of Indians.

LUCAS (Cape St.), the most southerly point of land in the peninsula of Old California, in N lat. 22° 45′. The cape offers to the rolling swell of the Pacific a lofty barrier of white and grey rocks of volcanic origin and fantastic outline. Its extremity curves suddenly to the E, enclosing a small bay, in which there is good anchorage. The land in its immediate vicinity is sterile.

LUCAYA ISLANDS. See Bahamas.

LUÇAY-LE-MALE, a commune and town of France, in the dep. of Indre, 20 m. NNW of Chateauroux. Pop. 1,886.

LUCAYNENA-DE-LAS-TORRES, a town of Spain, in the prov. and 21 m. ENE of Almeria, at the foot of the Aljamilla mountain. Pop. 1,320.

LUCCA, a duchy of central Italy, now belonging to Tuscany, lying between the parallels of 43° 45′ and 44° 7′; and bounded on the N by Modena; on the E and S by Tuscany; on the W by the gulf of Genoa and the duchy of Massa. Its territorial extent amounts to 322 Italian or geog. sq. m. Its pop. in 1839 was 168,198; in 1848, 173,205. Two-thirds of its territory are supposed to be covered by mountains and defiles; the remainder comprises the central part of the valley of the Serchio. The Apennines cover the N of this little country, and stretch their vanguards down to the sea and the Monte-Giuliano. The principal river is the Serchio, which receives some smaller ones, and is of great utility to the country in supplying numerous canals for irrigation. The climate is severe in the N, and warm but healthy in the centre; in the S and W, where there are stagnant waters, it is damp and unhealthy. Attempts to drain the swamps here have not fully succeeded. The mean temp. is about 11° R.; the heat in summer is about 26° R.; in winter the therm. seldom falls to 0°. The land is in excellent cultivation. All the fields are divided by elms, sycamores, and mulberry-trees, between which the vine is trained in graceful festoons along successive avenues, as was in use amongst the ancient Romans. Along the coast are excellent pasture-lands. The mountains are covered to their very summits with vines, olives, and chestnuts; even the Apennines are not barren here, but are clothed with chestnuts, pines, and larches. Oil and silk are the staple wares. The oil is reckoned the best in Europe, and brings an annual revenue to the state of 200,000 scudi. About 30,000 lbs. of silk are annually produced. There are no manufactures except in the capital, which has always been celebrated for its industry.—The inhabitants are of Italian descent. Their dialect is like that of Tuscany, to the inhabitants of which they also bear a similarity in character, manners, and customs. A large number annually emigrate as labourers, chiefly to the Maremma and Corsica. Under the late archduchess there was a kind of constitution here, and a senate which exercised the legislative power. The duchess was obliged to convene the senate for at least one month in the year. The revenue was estimated at £78,500. The military force was 1,400 men; and there was besides a militia force.—The country is divided into 3 districts, and contains 1 city, and 290 boroughs and villages.

History.] From the middle of the 15th cent. till 1805, L. maintained itself in the form of an independent republic, with an aristocratical government. At the latter period it was erected into a principality, over which Bonaparte placed Pascal Baciocchi, the husband of his sister Elisa. In 1813 Baciocchi was expelled; and in 1815, by act of the congress of Vienna, L. was erected into a duchy, and given as an indemnity to the infanta of Spain, Maria Louisa, widow of the late duke of Parma, and ex-queen of Etruria. An annuity of 500,000 francs was to be paid to the revenues of the principality by the emperor of Austria and the grand-duke of Tuscany, out of the proceeds of certain estates in Bohemia, known as the Bavaro-Palatinate estates; but in the event of the reversion of the duchy of L. to the grand-duke, this annuity was to cease. It was also provided that, in case of his entering upon this reversion, the grand-duke would, as soon as he came into posses-

sion of the principality of L., cede to the duke of Modena the Tuscan districts of Fivizano, Pietra-Banta, and Borga, and the Lucchese districts of Castiglione and Gallicano, as well as those of Minucciano and Monte-Ignose, contiguous to the territory of Massa. In June 1817, a further treaty was concluded between Austria, Spain, France, Great Britain, Prussia, and Russia, to determine the reversion of the duchies of Parma, Piacenza, and Guastalla. These states had been assigned, by article 99 of the treaty of Vienna, as a provision for the archduchess Maria Louisa, ex-empress of France, for her life. The agreement of 1817 determined that after her death they should devolve on that branch of the Spanish Bourbons heretofore settled at L. The right of holding an Austrian garrison in Piacenza was at the same time secured to the emperor, until these reversions shall have fallen in, and no longer. Hence it appears that the ex-empress Maria Louisa had a life-interest in the sovereignty of Parma, and that the interest of the Spanish Bourbons in L. was made also to depend on the contingency of her majesty's death. They were her heirs; but upon their succeeding to her dominions, the territory of L., which they have held since 1815, would lapse to the grand duke of Tuscany. The reigning duke of L., son of the infanta Maria Louisa, in whose behalf, as ex-queen of Etruria, these arrangements were devised, however, somewhat anticipated the natural solution of them by abdicating his own dukedom in 1847, before he came into possession of his dominions in reversion, in favour of the duke of Tuscany, for an annuity of 1,200,000 francs. By this spontaneous act the country of L. at once devolved to Tuscany.

Lucca, the capital of the above duchy, is situated in a fertile plain watered by the Serchio, and surrounded with beautifully cultivated hills, 11 m. NE of Pisa, 19 m. NNE of Leghorn, and 28 m. W of Florence. It has a circuit of about 3 m.; and its ramparts, planted with trees, give it from a distance a pleasing appearance. Its fortifications, though regular, and in good repair, are not of great strength. The streets are narrow, but well-paved with broad and flat stones; and the houses are mostly well-built. The palace of the late reigning princess, situated in a large square surrounded with trees, is more remarkable for its size than elegance of architecture, but contains some valuable paintings. Several of the churches are built of marble of Carrara; the finest of them are the cathedral, and the church of St. Michael. The houses of the higher ranks are nowise remarkable; but in the neighbourhood most of them possess magnificent residences. L. is the seat of the government-offices, and the see of an archbishop. It has a university, a lyceum with a library of 20,000 vols., an academy of arts and sciences, and a seminary for the education of young ladies. The inhabitants, whose number in 1839 was 24,092, are remarked above most Italians for their steadiness and industrious habits. The chief manufactures are of cloth and silk; the trade in the latter article, and in olive oil, is very considerable. The manufacturing of red woollen caps for the Greek market is considerable; and L. has some celebrity for ladies' shoes. —There is a railway from L. to Pisa.—The celebrated baths of L. are in a lovely valley on the Serchio, 15 m. by road N of the city.

LUCE, a river partly of Ayrshire, but chiefly of Wigtonshire. Till within 6½ m. of the sea it consists of two streams, called the Main-water of L. and the Cross-water of L. The united stream runs to the head of Luce bay; and for 1¼ m. before becoming lost in the bay, expands into a small estuary which is dry at low-water.

LUCE-BAY, a large bay, broadly and deeply indenting the most southerly land in Scotland, and converting the S half of Wigtonshire into two peninsulas,—a long and narrow one between this bay and the extremity of the frith of Clyde,—and a broad one between it and Wigton bay. The entrance of the gulf is between the Mull of Galloway on the W, and Burrowhead on the E. Measured in a straight line, direct from point to point, this entrance is 18¾ m. wide; and the length of the bay, measured in a line at right angles with the former to the commencement of the little estuary of Luce-river, is 16½ m. At its head the sea-board is low, and at the efflux of the tide displays a sandy beach of half-a-mile mean breadth; but elsewhere it is, with some small exceptions, bluff, bold, rocky, and occasionally torn with fissures and perforated with caverns.

LUCE (New), a parish and village in Wigtonshire. The v stands at the confluence of Cross-water and Main-water, 5 m. N of Glenluce. Pop. of p. in 1801, 368; in 1831, 628; in 1841, 652.

LUCE (Old), a parish in Wigtonshire, to the S of New Luce. A prime object of interest in this p. is Glenluce abbey. Pop. in 1831, 2,180; in 1841, 2,448.

LUCEA, a large and commodious harbour on the NW coast of the island of Jamaica, 17 m. W of Montego-bay. There is a small town here, and numerous villas are erected in the vicinity.

LUCEAU, a village of France, in the dep. of the Sarthe, 21 m. SW of St. Calais. Pop. 1,362.

LUCENA, a town of Spain, in the prov. and 32 m. SE of Cordova. It has some manufactories of soap, linen, and cloth, besides the adjacent salt-works of Jarales. Pop. in 1845, 16,652.—Also a town in the prov. and 15 m. NW of Castellon-de-la-Plana. Pop. 2,903.

LUCENA (Point), a headland of Brazil, on the coast of the prov. of Parahiba, in N lat. 6° 53′ 35″.

LUCENAY, a canton and commune of France, in the dep. of Saone-et-Loire, arrond. of Autun. Pop. of cant. in 1841, 13,835; of com., which is 7 m. NNW of Autun, 1,113.

LUCENAY-LES-AIX, a commune of France, in the dep. of Nièvre, cant. of Dornes, on the Ouzon, 22 m. SE of Nevers. Pop. 1,475.

LUCENS, or Lobsingen, a village of Switzerland, in the cant. of Vaud, 2 m. NE of Moudon. Pop. in 1850, 892 Protestants.

LUCERA, a town of Naples, in the Capitanata, 9 m. WNW of Foggia. Pop. 12,000. The houses are all tiled, and generally good; but the streets are narrow, ill-paved, and dirty. It is the see of a bishop, and has a royal college and a fine cathedral. The vicinity is rich in vineyards, olive and garden grounds, and parterres. Its antiquity must be great, since Strabo says that *Luceria* had lost much of its splendour in the time of Augustus.

LUCERNA, a small town and citadel of Piedmont, 6 m. S of Pinerolo.

LUCERNE, or Luzern, a canton lying almost in the heart of Switzerland, between the parallels of 46° 47′ and 47° 17′ N; and bounded by the cants. of Soluthurn and Aargau on the N; by Zug, Schwytz, and Unterwalden on the E; and by Bern on the S and W. Its superficial extent is computed at 588 sq. m. Pop. in 1837, 124,521; in 1850, 132,843, of whom 1,563 were Protestants. It is one of the least mountainous portions of Switzerland; the N consisting of large plains interrupted only by small elevations; while the S, though less level, contains only a part of the mountains that border the lake of L., which lies to the S and E of the cant. On the whole, both the soil and climate are more favourable to agriculture than the surrounding cantons. It is watered by a number of rivers, of which the chief are the Reuss, the Emmen, the Entlen, the Wigger, the Wyna, the Sur, and the Eschenbach. It contains several small lakes, such as the Sempach or Sur-see, the Mauen, Reichen, and the Red lake. The inhabitants rear cattle, horses, goats, sheep, and hogs. A small surplus of corn is raised; but the greater part of the corn that comes into the market at Lucerne is from Argovia. Fruit is plentiful, also potatoes, flax, and hemp; but no wine is made within this cant. Several of the towns profit materially by the carrying trade; but the chief branch of industry is dairy husbandry and cattle-rearing.—The gov. is vested in a council of 100, one-half of whom are chosen by the city of L., and the other half by the rest of the cant. The right of election is vested in every male native of the cant., 20 years of age, and holding property to the value of 400 francs. Members of council must hold property to the amount of 4,000 fr. The executive is lodged in a

senate of 36 members chosen from among the council. The court-of-appeal is composed of 12 members chosen from the senate. The public revenue averages 360,000 francs. The only literary institution is the college or high school in the town of L., belonging to the Jesuits. L. is the most powerful and zealous of the Catholic cantons; a papal nuncio has resided at the town ever since the Reformation. The whole canton is divided into the five bailiwicks or districts of L., Entlibuch, Willisau, Sur-see, and Hochdorf; each district is subdivided into 4 quarters.

LUCERNE, the capital of the above canton, is situated on the Reuss, where it issues from the W extremity of the lake of L., at the foot of Mount Pilate, in N lat. 47° 3′ 27″, E long. 8° 18′ 35″, 25 m. SSW of Zurich, and 43 m. ENE of Bern. The town stands on both sides of the river, and its two parts communicate by 4 covered bridges, remarkable for their paintings. It is surrounded by a wall and towers; and contains several handsome edifices, with neat groups of houses on the lake. Of the public buildings, the chief are the town-hall, the cathedral, the watch-tower, the orphan asylum, and the arsenal, in all of which there are several curious antiquities. The churches are of Gothic architecture; and there are in the town several monasteries and convents. The organ of the cathedral contains 3,000 pipes. There are several collections of books, paintings, and curiosities; but the most remarkable object of this kind is the model or map *en relief* of 180 sq. leagues of Switzerland, by General Pfyffer, which has suggested the idea of other models on the same plan. It is 23 ft. by 13 ft. in size, and is composed of 136 square pieces. In the garden of General Pfyffer, near L., a rock has been cut into the form of a recumbent lion, 30 ft. in length, after a model supplied by Thorwaldsen, as a national monument to the memory of the Swiss guards who were massacred at Paris on the 10th of August 1792. The commerce of L. is confined chiefly to its corn-market, which is one of the largest in Switzerland, and its transit-business.

LUCERNE (LAKE OF), or VIER WALDSTATTER-SEE, a lake of Switzerland, between the cantons of Unterwalden, L., Schwytz, and Uri, at an alt. of 1,380 ft. above sea-level. Its length is about 25 m., but its breadth is very unequal. It is very irregular in outline; and its different reaches form in a manner separate lakes, which take particular names from the chief places on their banks, as the lake of L. proper, the lake of Alpnach, the lake of Stanz, and the lake of Uri. Its depth is in some places 900 ft. It is the largest and most romantic lake in the interior of Switzerland. From different spots on the surface of the lake may be seen some of the highest of the Alps, such as the Pilatusberg, Mount-Righi, and the Furca. The river Reuss traverses the lake in its entire length; and a steam-boat plies upon it.

LUCERO (PUNTA DE), a cape on the N coast of Spain, in N lat. 43° 22′, W long. 3° 5′.

LUCEY, a town of Savoy, 15 m. NNW of Chambery, on the Rhone. Pop. 420.

LUCHAT, a village of France, in the dep. of La Vienne, cant. and 6 m. SE of Ile-Jourdain. Pop. 640.

LUCHE′, a town of France, in the dep. of the Sarthe, on the r. bank of the Loir, 7 m. E of La Flèche. Pop. 2,626.

LU-CHE, or LO-CHE, a district and town of China, in the prov. of Sze-chuen, and div. of Tung-chuen-fu.

LUCHEUX, a town of France, in the dep. of Somme, cant. and 4 m. E of Doulens, on the small river Grouches. Pop. 1,100.

LU-CHING-HEEN, a district and town of China, in the prov. of Shan-se, div. of Lu-gan-fu, in N lat. 36° 15′, and E long. 113° 13′.

LUCHOW, a town of Hanover, in the duchy of Luneburg, on the Jetze, 36 m. SE of Luneburg. Pop. 1,343.

LUCHTUNGEN, a village of Prussian Westphalia, in the reg. and 52 m. SSE of Minden, on the r. bank of the Weser. Pop. 1,300.

LU-CHU, a division and town of China, in the prov. of Sze-chuen. The div. comprises 3 districts. The town is in N lat. 28° 56′, and E long. 105° 33′.

LUCIA (SAINT), one of the Caribbee islands, in the W. Indies, 24 m. SE of Martinique, and 21 m. NE of St. Vincent. It is about 27 m. long from N to S, and 13½ m. broad, and has a circumf. of 105 m. Its superficies is 114,400 acres. Its surface is elevated, and exhibits a "chequered scene of sombre forests and fertile valleys, smiling plains and towering precipices, shallow rivers and deep ravines." The principal chain of mountains extends longitudinally over the island, dividing it into windward and leeward districts. This sierra presents a highly varied outline, and is everywhere shrouded in wood. At their greatest points of elevation they bear the distinctive names of Sorciere, Paize-Bouche, and Barabara. The Pitons, or Sugar-loaves, two pyramidal rocks, "feathered from the clouds to the waves with evergreen foliage," on the S side of the bay of Soufriere, one of which has an alt. of 3,200 ft., and the other of 3,000 ft., appear to be unconnected with the other mountains. About 2 m. to the E of the Pitons is the Soufriere, or Sulphureous mountain, with a crater of about 3 acres in extent, crusted over with sulphur, alum, and cinders, at an elevation of 1,000 ft. above sea-level. In the midst of the crater are several hot springs in a state of constant ebullition. There are some fine valleys, with a good soil, and well-watered. The higher grounds are clothed with dense forests, in which the cocoa and fustic abound.—The climate is not healthy. It is principally characterised by its extreme moisture and variableness. It rains almost incessantly in October and November. St. L. has often suffered dreadfully from storms and hurricanes, the most remarkable of which occurred in October 1780. It has also of late years been visited by terrific earthquakes.—The coasts present several commodious bays and harbours with good anchorage, particularly the Little Careenage, in which there is everywhere depth enough of water, and the quality of the bottom is excellent. Thirty ships-of-the-line, it is said, might lie here sheltered from hurricanes, without the trouble of being moored.—There are 9 parishes in the island; 8 in the Capis-terre, or to leeward; and only 1 in the Basse-terre, or to windward. Not more than one-twelfth of the island is under cultivation. The total extent of land under crop and pasture in 1849 was only 9,406 acres, of which 3,147 were employed by the labouring pop. in raising provisions. The number of sugar-estates was 84; and the quantity of land under that crop 3,526 acres. A high road is made round the island, and two others which cross it from E to W, afford facilities to carry the commodities of the plantations to the landing-places.

Exports and imports.] In 1810, the official value of the exports from this island was £43,830; in 1836, £69,040; in 1844, £107,626; in 1849, at only £53,760. The imports in 1810 were valued at £193,743; in 1836, at £60,340; in 1844, at £82,971; in 1849, at only £47,200. The quantity of sugar exported in 1848 was 2,916 tons, value £38,101; in 1849, 3,515 tons, value £46,984. In 1848, 107,512 lbs. of cocoa, valued at £969, and 19,722 lbs. of coffee, valued at £398, were exported.

Population, &c.] The pop. in 1777 was returned at 14,199, of whom 10,752 were slaves. In 1846, it was 21,457; in 1849, 23,688. The total number of

Whites is about 1,100. The number of children at school in 1846 was 440; in 1849, 969. The people are still French in language, manners, and feelings, and the religion is the Romish; so that the island is a British colony in little more than in name. The colony has been without a militia for many years.—The government is vested in a governor and council. The council consists of 7 unofficial, and 5 official members. The revenue in 1842 was £11,351; in 1849, £10,737. The expenditure averages £12,500 per ann. The ecclesiastical establishment consists of 3 Protestant, and 9 Roman Catholic clergymen.

History.] The English first settled in this island in 1637; but in 1638, the Caribbeans, instigated by the French, rose on the English settlers, and drove them from the island. When the civil wars broke out in England, a party of French arrived here, under one Rousselan, who contrived to secure the favour of the Caribbees. All the good fortune of the French, however, ended with the life of Rousselan, who died in 1654, and was succeeded by La Riviere, who, with the rest of the colony, was massacred by the Caribs. Other attempts were made both by the English and French to form a settlement, but from mutual jealousy between the two countries neither were successful, and both courts agreed to consider it neutral, till in the year 1763 it was ceded to France. The English took it in 1779, but restored it in 1783. In 1794 it was again taken by the English. It was restored in 1795; retaken in 1796; restored in 1801; and definitively assigned to England by the treaty of Paris.

LUCIA (Santa), one of the Cape Verd islands, 3½ m. N of Branco, and separated from St. Vincent, on the NW, by a channel about 4 m. wide. It is about 16 m. in length, and 4 m. broad. On the NW it rises into high mountains; on the SW it has a bay offering good anchorage.

LUCIA (Santa), a village of Corsica, in the arrond. of Bastia, 18 m. ENE of Corté. Pop. 650.—Also a village of Corsica, in the arrond. of Sartème, 21 m. SW of Ajaccio. Pop. 510.—Also a village of Corsica, in the arrond. and 4 m. ESE of Corté. Pop. 520.—Also a town of Sicily, 18 m. WSW of Messina. Pop. 4,500.

LUCIA (Santa), a settlement of the La Plata state of Corrientes, on the E bank of the Parana, at the confluence of the Atores, 80 m. SW of Corrientes.—Also a town in the prov. of Buenos Ayres, 30 m. N of Monte Video.—Also a settlement of Brazil, in the prov. of Goyas, on the river Tocantins, 290 m. NNE of Villa-Boa.—Also a river of the prov. of Buenos Ayres, which rises near La Conception-de-Minas, runs SW, and uniting itself with the San Joseph, enters the Plata near Monte Video.—There is another river of the same prov., which enters the Paraguay.—Also a river of Brazil, which rises in the Sierra-Grande, and running NNE, enters the Tocantins.—Also a river of the province and government of Maracaibo, which enters the Apure.—Also a river of East Florida, which runs SE, along the E side of the peninsula, communicates inland with Indian river, and falls into the Bahama channel in N lat. 26° 50′.

LUCIA BAY (Saint), a bay on the E coast of the island of Borneo, in N lat. 4° 20′.

LUCIA-IN-MELAZZO (Santa), a village of Naples, in the prov. of Principato-Citra, cant. and 5 m. NNW of Salerno. Pop. 3,000.

LUCIANA, a village of Spain, in the prov. and 24 m. W of Ciudad-Real, on the r. bank of the Guadiana.

LUCIDO (San), a town of Naples, in Calabria-Citra, cant. and 4 m. S of Pola, on the coast. Pop. 1,630.

LUCIGNANO, a town of Tuscany, 15 m. W of Cortona. Pop. 1,600.—Also a town in the duchy of Lucca, 7 m. NNE of Borgo-a-Mozzano.

LUCILLO, a village of Spain, in the prov. of Leon, 12 m. WSW of Astorga. Pop. 420.

LUCIPARA, or Lusipara, a small barren island in the Eastern seas, near the S coast of the island of Banca, in S lat. 3° 10′

LUCITO, a town of Naples, in the prov. of Sannio, 12 m. WSW of Larino. Pop. of com. 2,560.

LUCK, or Loutsk, a town of Russia, in the gov. of Volhynia, 30 m. NW of Doubno, on the r. bank of the Styr. Pop. 3,650. It is the see of a bishop of the Greek church.

LUCKAU, a small town of the Prussian states, in Lower Lusatia, on the Bersta, 55 m. N of Dresden. Pop. 4,310. It has woollen and linen factories, distilleries, and powder-mills.—Also a village in the duchy of Saxe-Altenburg, on the l. bank of the Schnauder. Pop. 1,228.

LUCKENWALDE, a town of Prussian Saxony, on the Nuthe, 32 m. S of Berlin. Pop. 6,300.

LUCKER, a chapelry of Northumberland, in the p. of Bambrough, 2½ m. SSE of Belford. Pop. 210.

LUCKHAM, a parish of Somersetshire, 4 m. W by S of Minehead. Area 2,470 acres. Pop. 580.

LUCKIDWAR, a fortress of Hindostan, in the prov. of Butan, at the top of a range of mountains on the E bank of the Toresha, in N lat. 26° 50′, E long. 89° 20′.

LUCKINGTON, a parish of Wilts, 7 m. WSW of Malmesbury. Area 2,400 acres. Pop. 329.

LUCKLUM, a village in the duchy of Brunswick, 7 m. ENE of Wolfenbuttel, on the Wabe. Pop. 304.

LUCKNOW, or Lak'hnau, a district of Hindostan, in the prov. of Oude, between the 26th and 27th parallels of N lat. The soil is in general composed of sand, but where well-watered is productive, and yields cotton and all the grains of India except rice. The gardens abound with grapes, mulberries, and oranges.—Also a city of Hindostan, the capital of the prov. of Oude, 174 m. NW of Benares, and 50 m. from Cawnpore, in N lat. 26° 51′, E long. 80° 50′, situated on the S bank of the river Gumti, which is navigable for middling sized boats at all seasons of the year, and falls into the Ganges between Benares and Ghazipore. It is a very ancient city, and was for a long period the residence of the governors or nabobs of Oude. The streets are narrow and very irregular; but there are many stately khans, and handsome mosques and pagodas, scattered about; and the city appeared to Bishop Heber to have more resemblance to some of the smaller European capitals than anything he had seen in India. The SE and newest portion of the city has some good streets and well-built houses. In the vicinity of the city is the dwelling of the British resident and other European inhabitants; and adjoining to the palace is the cantonment of one of the East India company's regiments of native infantry. The gilt domes of the mosques, and the Imambara, which contains a splendid mosque and the mausoleum of Asoph-ud-Dowlah, give it a very gay appearance at a distance; but the situation is bad, and the soil is a white sand, which in the hot weather is driven about by the wind, and pervades everything. There is a bridge of masonry, of 11 arches, across the Gumti. Among the buildings in the city is a large quadrangular pile employed as a menagerie. The pop. is estimated at 200,000. In the vicinity of the city are numerous tombs, both of Hindu and Mahommedan saints.

LUCKPUT-BUNDER, a town of Hindostan, in the prov. of Cutch, 82 m. SE by S of Tatta, situated about 30 m. up the Kori river, or E branch of the Indus, which was only navigable by small vessels until the river was suddenly deepened by an earthquake in 1819. It is defended by a good fort. Pop. 5,000.

LUCKYPORE, or Luckipur, a town of Bengal, in the district of Tipperah, 156 m. ENE of Calcutta, situated a few miles inland from the E bank of the

Megna, with which it communicates by a small river. At this place the East India company had an extensive factory for the manufacture or purchase of *baftahs* and other coarse cotton cloths.

LUCO, a village of Spain, in the prov. and 5 m. N of Vittoria. Pop. 130.—Also a lively little town of Naples, on the W bank of Lake Fucino, in the prov. of Abruzzo-Ultra 2da. Pop. 1,600, nearly the whole of whom are supported by fishing in the lake, the result of which they carry, by Capistrello and Canistro, to Subiaco, and even to Rome. The tench and barbel of Fucino are considered good; there are *scardafe* also, and *lasche*, crabs, and crawfish. The inhabitants of L. are considered by the Marsicans generally as being the finest race among them, strong and healthy, though not handsome.

LUCOLI, a town of Naples, in Abruzzo-Ultra 2da, 6 m. WSW of Aquila. Pop. 1,900.

LUÇON, LUZON, or LUCONIA, the principal of the Philippine islands, in the Eastern seas, on which, in N lat. 14° 36′ 8″, E long. 120° 53′ 30″, stands Manila, the metropolis of the group. Its situation is extremely favourable in a commercial point of view, being placed between the eastern and western continents; having China on the N; the islands of Japan on the NE; the ocean on the E; the other islands of the Philippine group on the S; and to the W, Malacca, Siam, and Cochin-China. Punta-Calaan, at its S extremity, is separated from the isle of Samar by a strait of about 3 leagues broad; and Punta-Cabicunga, at its N extremity, is distant 80 leagues from the island of Formosa. It is formed by two peninsular masses of land united by an isthmus 3 leagues in breadth. The N of these peninsulas is Luçon Proper, the southern receives the name of Camarines. It lies between the parallels of 12° 30′ and 18° 45′, and is of a very irregular figure, but may be estimated to be 420 m. in length from N to S. or from Punta-Calaan to Punta-Cabicunga; but 550 m. if measured along the bend which occurs in about 14° N lat., where a deep bay entering from the N divides the island into two peninsulas. In breadth it varies from 90 m. to 130 m. Its area has been estimated at 57,405 sq. m. The surface is for the most part mountainous, being intersected in its whole length by an elevated ridge, from which other ridges diverge over the whole island. To the N of the parallel of 16°, from Cabo-San-Ildefonso to Punta-San-Vincenti, the whole country is one mass of rocky mountains, and inhabited only by a few wandering tribes. In some places detached mountains, of a conical figure, shoot up in the midst of extensive plains. There are several volcanoes which occasionally break out into dangerous eruptions, inundating and destroying the neighbouring fields with ashes, stones, sand, water, and lava. The Aringuay, in the N prov. of Ylocos, made a terrific eruption at the same time with the volcano of Iolo in Magindanao, in January 1641. The Volcano-de-Taal, within a day's journey of Manilla, often threatens tha: city; and the far-seen Mayon, between Albay and Camarines, still gives signs of activity. Tufa and calcareous reef-stone are the only stone-materials for building. There are also numerous warm springs and small lakes; and the island is occasionally visited by earthquakes. In 1650, an earthquake almost totally destroyed the city of Manila, and shook the island in different parts with terrible convulsions. In 1754, an earthquake occurred by which four towns were completely destroyed. The coast is indented by many bays and commodious harbours; but that of Manila, on the W coast, one of the finest in the world, is the only one frequented by ships of burden. There are several large lakes in the interior, the principal of which is named by the Spaniards Laguna-de-Bay. It is 28 m. in length, by 22 m. in extreme breadth, and is the source of the Pasig or Manila river. It is studded with wooded islands, the largest of which is named Talim. At the village of Los Banos, on the shores of the lake, are hot springs. On the SE, this lake is bounded by high mountains called Montes Caravalles, inhabited by a peaceable race, of mild manners and industrious habits, who employ themselves in making mats, cloth, and different works with the *abaca*, a kind of banana which bears no fruit, and of which the filaments are very strong. On the other side of these mountains are immense plains, traversed by large and deep rivers, but inhabited by savage and implacable tribes who have retained their independence, but carry on a small traffic with the Spaniards in gold, wax, and tobacco, in exchange for cattle. To the S of the lake just described is the Laguna-de-Taal, a lake of a circular form about 12 m. in diam., and which empties itself into the Chinese sea.

The climate is moist; but not so warm as might be expected from its latitude. Hurricanes, or typhons, often commit great devastation; the wet season lasts from June to September, during which period the S wind blows constantly, and the level country is wholly inundated. The climate is esteemed unhealthy to Europeans, particularly if they visit the island when young; but the natives often live to a great age. Cotton, indigo, sugar, tobacco, coffee, &c., and generally all sorts of tropical produce, grow in great abundance; and there is little doubt that were ordinary skill and industry exerted in their culture, the spices of this island might equal those of the Moluccas. The richest fruits of the West as well as the East Indies grow here plentifully, and some that are to be found nowhere else. The mangoes are excellent; the limes and oranges inferior to those of China. The common potato is imported from China and Australia. At the pateros, near the entrance to the Laguna, the natives breed large flocks of ducks for the Manila market. There are 40 different sorts of palm-trees, and excellent cocoas and cassia. In the mountains, wild cinnamon, wild nutmegs, ebony, sandal-wood, together with excellent timber for building and shipping, abound. The best tobacco in the world is grown in the prov. of Cagayan. Cotton is grown in small quantity; and some cocoa-nut oil is made. Among fine cabinet-woods are ebony, *nana* a wood resembling mahogany, *alintatas* a wood of a beautiful yellow colour, and *lanete* a fine white wood.—Among the insects are butterflies, beetles, bugs, scorpions, termites, mosquitoes, and the mantis. The domestic animals are the hog, goat, dog, cat, hen, goose, buffalo, sheep, oxen, and horses. All kinds of cattle abound, and a large fat ox does not cost above 4 pieces of eight. Civet-cats are very common. Ambergris is thrown on the coasts in prodigious quantities.—Gold is found in every part of the island, washed out of the earth by the heavy rains; in the mould of the valleys, where it is carried down by the rivulets; and in the sand and mud of the lakes, brooks, and rivers. The Spaniards obtain, it is said, about 1,000 or 1,500 lbs. weight every year, as a tribute from the inhabitants.

The pop. was estimated in 1818 at 1,376,422. The natives, like all those of the Philippines, are tall and well-made, as compared with the Malays, though slighter and shorter than Europeans, wearing only a kind of shirt, with loose drawers; but the dress of the women is a large mantle, and their black and beautiful hair sometimes reaches the ground. Their complexion is a deep tawny, through which the ruddiness of the blood shows itself on the cheek; and their eyes are dark and lustrous. Their houses are of bamboo framework, filled up with nipa grass, and

covered with palm leaves, and raised on pillars to the height of 8 or 10 ft. Their chief food is rice, which is often eaten with salted fish; many, indulging their natural laziness and indolence of disposition, are altogether dependent upon the fruit of the plantain for subsistence. The interior of the country, as far as it has been penetrated by any European traveller, is covered with thick woods, no habitation nor any appearance of cultivation relieving the dreary prospect of desolation.

The Spaniards, when they arrived in this island, found upon the coast a nation who called themselves Tagalians, or Tagaleze. They are for the most part a well-disposed and tractable people; and, before the arrival of the Spaniards, were distributed into villages, without any king or supreme head, being generally under the dominion of petty chiefs or rajahs. After their conquest by the Spaniards, they were placed under the jurisdiction of a Spanish alcade mayor. Above three-fourths of the pop. still make use of the Tagala language, which, it has latterly been asserted, has little or no similarity to the Malayee. In some parts of the island a people called Negritos are found with Negro features, and most of the characteristics of the African.—Were this island, in addition to the natural advantage of its fine climate and fruitful soil, blessed with a good government, it might with ease support a greatly more numerous population; but agriculture is discouraged; the most important production of the island, tobacco, is made a government monopoly of; foreigners are not allowed to become planters unless they become married to a Spanish or native woman; the whole productions of the island are raised by poor Indian cultivators, each from his own small patch of land; and the inhabitants, indolent and destitute of energy, are despised by their neighbours, the Malay and Sulu pirates, who have long resorted to this and the neighbouring islands for the purpose of procuring a supply of slaves. At several places the natives make a species of cloth, called *medrinaque*, from the plantain-tree; and this manufacture is exported, chiefly to the United States, to the extent of 30,000 pieces annually. The silkworm is reared, and a little silk is also woven by the Indians. Coarse earthenware, hats made from the fibres of cane, mats, cigar-cases or covers, and rope from the fibres of the plantain and also from a species of rush, form the principal articles of native industry. See Manila. The Chinese have been at different times attracted to L. in great numbers by its profitable trade. In 1603, the Spaniards, jealous of their commercial wealth and enterprise, massacred 25,000 of them. In 1639, having again increased to the number of 30,000, they dared to take up arms in their own defence, and a contest ensued in which their numbers were reduced to 7,000. The same feeling of jealousy prompted the expulsion of these industrious people in 1662, 1709, and 1751 successively; but when the public began to suffer from the want of supplies and trade, the measure was complained of, and no governor has since renewed the experiment. — The portion of this island which is occupied by the Spaniards is divided into 15 provinces: viz., Albay, Batangas, Bulacan, Cagayan, Camarines, Cavite, Laguna, Nueva-Ecija, Pampanga, Pangasinan, Tayabas, Tondo, Valangas, Ylocos, and Zambales.—See articles Philippines and Manila.

LUÇON, a town of France, in the dep. of La Vendée, arrond. and 18 m. W of Fontenay-le-Comte, in a fertile but marshy plain, and on a navigable canal which runs S from L., through the marshes of Troissey and Saint-Michel, to Aiguillon bay, a little to the W of the embouchure of the Sevre-Niortaise. The town is well-built, but its streets are narrow. It is the see of a bishop, and has a cathedral. It has linen factories, and porcelain works; and conducts an active trade.

LUCOS, or L'Khos, a river of Marocco, the *Lixus* of the ancients, which rises in the Little Atlas, and, running NW, falls into the Atlantic at El Araish.

LUCOTTA, a small island in the Eastern seas, near the W coast of Sumatra, in N lat. 1° 43′.

LUCRIN, or Licola (Lake), a lake in the Neapolitan territory, 4 m. NW of Puzzuoli, the *Lacus Lucrinus* of the ancients. It nearly disappeared in 1538 in consequence of a subterraneous eruption.

LUCTON, a parish in Herefordshire, 5 m. NW of Leominster. Area 1,180 acres. Pop. 183.

LUCUCHE, a river of Chili, which runs S, and enters the Valdivia.

LUCY-LE-BOIS, a village of France, in the dep. of Yonne, cant. and 4 m. N of Avallon. Pop. 900.

LUCZYNIEC, a town of Russia, in the gov. of Podolia, 21 m. N of Mohilev, on the l. bank of the Nimia. Pop. 800.

LUCYN, or Liutsin, a town of Russia, in the gov. of Vitebsk, 20 m. E of Rzezica, on the Luja. Pop. 300.

LUDAMAR, a country of Central Africa, having on the N and NE the Sahara or Great desert; on the SE, Bambara; on the S, Kaarta; and on the W, Jafnu. The soil is sandy, and the surface is to a large extent covered with forests. The inhabitants are almost entirely strangers to agriculture, and depend for subsistence on the rearing of cattle. Their women weave cloth from goats' hair, and transform the skins of their cattle into saddles, bridles, pouches, &c. Though rigid Mahommedans, they have no mosques, but perform their devotions in an open enclosure of mats. The king administers justice, but seldom inflicts capital punishment. He is distinguished by a finer cloth and larger tent; but in the ordinary intercourse of society his rank seems forgotten. He will be seen eating out of the same bowl, and sleeping in the same bed, with his camel-driver. He defrays his expenses by a tax on his subjects, and upon the merchandise passing through his kingdom.—The chief town is Benowm.

LUDBOROUGH, a parish in Lincolnshire, 25 m. NE of Lincoln. Area 2,250 acres. Pop. 321.

LUDBREGH, a village of Croatia, in the com. and 15 m. NNE of Kreutz, on the l. bank of the Bednya.

LUDBURY (North), a parish of Salop, 2½ m. from Bishop's Castle.

LUDCHURCH, a parish in Pembrokeshire, 2 m. SE of Narberth. Pop. in 1831, 228; in 1841, 220.

LUDD, a village of Palestine, in the pashalik of Gaza, 2 m. NE of Ramleh, the successor of the ancient *Lydda*.

LUDDEN, or Luddenbeg, a parish in co. Limerick, 3 m. NNE of Six-mile-Bridge. Area 1,954 acres. Pop. in 1831, 837; in 1841, 944.

LUDDENDEN, or Luddington, a chapelry in the parish of Halifax, Yorkshire, 3½ m. W by N of Halifax.

LUDDENHAM, a parish in Kent, 2 m. NW of Feversham. Area 990 acres. Pop. in 1841, 235.

LUDDESDOWN, a parish in Kent, 5 m. WSW of Rochester. Area 2,380 acres. Pop. in 1841, 275.

LUDDINGTON, a parish in Lincolnshire, 13 m. W by S of Barton-on-Humber. Area 3,680 acres. Pop. in 1831, 905; in 1841, 982.—Also a hamlet in the p. of Old Stratford, 3 m. SW of Stratford-on-Avon, on the N bank of the Avon. Pop. 127.

LUDDINGTON-IN-THE-BROOK, a parish partly in Huntingdonshire, and partly in Northamptonshire, 5 m. S of Oundle. Area 580 acres. Pop. in 1831, 117; in 1841, 139.

LUDE, a village of France, in the dep. of Marne, cant. and 4 m. W of Verzy. Pop. 600.

LUDE (Le), a town of France, in the dep. of La Sarthe, on the l. bank of the Lour, 12 m. ESE of La Flèche. Pop. 2,250.

LUDENSCHEIDE, a town of Prussia, in the reg. and 23 m. SW of Arnsberg. Pop. 3,810. It has manufactories of steel goods, and of brass and iron ware.

LUDFORD, a parish partly in Herefordshire, and partly in Salop, ½ m. S of Ludlow, on the river Teme. Area 2,920 acres. Pop. in 1831, 284; in 1841, 300.

LUDFORD (Magna and Parva), a parish in Lincolnshire, 6 m. E of Market-Raisen. Area 3,310 acres. Pop. in 1831, 528; in 1841, 670.

LUDGERI (Sankt), a village of the duchy of Brunswick, 1 m. S of Helmstedt.

LUDGERSHALL, a parish in Bucks, 6 m. SE by E of Bicester. Area 2,430 acres. Pop. in 1831, with Tetchworth and Kingswood, 585; in 1841, 566. —Also a parish and market-town in Wilts, 15 m. NE by N of Salisbury. It was disfranchised by the Reform act. Area 1,660 acres. Pop. in 1841, 554.

LUDGVAN, a parish in Cornwall, 2¾ m. NE of Penzance. Area 4,560 acres. Pop. in 1841, 3,190.

LUDHAM, a parish in Norfolk, 12½ m. NE by E of Norwich. The church is a beautiful Gothic structure. Area 2,910 acres. Pop. in 1841, 924.

LUDIANA, or Lud'hyana, a town and fortress of Hindostan, situated on the NW boundary of the prov. of Delhi, and on the S bank of the river Sutledge, in N lat. 30° 49′, E long. 75° 48′. It was for many years the most remote military station which the British possessed in Hindostan, and was considered as a post of defence against the Afghans. For four months in the year the climate of L. is cold, and even ice is produced on the small ponds; but being situated on a sandy plain, the hot winds blow with great violence during the summer months. It is surrounded by a desert of sand; and the cantonments are confined. Barracks have, however, been recently erected for European troops, and a few good houses. The fort is constructed of mud and brick. The town has been extended nearly to the gates of the fort. The bazaar is large and populous. Near the infantry lines is the palace of the defunct king of Cabul, Shah Sujah, surrounded by a high wall, possessing an extensive garden, and two large compounds or enclosures. L. is universally considered one of the hottest stations in the upper provinces of India. During the hot season no verdure is visible, not a sign of vegetation to refresh the eye, and only one point of interest in the distance, the snowy range of the Himalaya mountains, forming the boundary of the horizon.

LUDLOW, a parliamentary borough in Salop, on the S border of the co., 143 m. NW by W of London, and 25 m. S of Shrewsbury, beautifully situated on an eminence at the junction of the Corve with the Teme. Area 280 acres. Pop. in 1801, 3,897; in 1831, 5,253; in 1841, 5,171; in 1851, 5,376. The town is upwards of 1 m. in length, and consists of regular and wide streets, lying in diverging and inclined directions from the highest and most central part of the town. The houses in general are neat, well-built, and better arranged than those of most inland towns of the same antiquity. The Corve runs along the NW, and the Teme along the W and S outskirts of the town. The former is crossed by a bridge of 3 arches; the latter, by 2 bridges. The church, which stands in the highest part of the town, is a beautiful cruciform edifice, in the decorated Gothic style of the latter part of the 15th cent., forming one of the most stately parochial churches in England. The amount of the borough income for 1840 was £968; for 1847, £1,824. The borough, previous to the passing of the reform act, returned 2 members, as it still does. The number of electors registered in 1848 was 426. It is one of the polling-places for the members for the S division of the co. —The glove trade formerly employed 1,000 hands here; but owing to the establishment of marts for articles of cheaper fabrication in Leicestershire and Nottinghamshire, the trade declined, and a few years ago became extinct. There is a small woollen factory; and malt is made to a considerable extent.—L. seems to have been anciently included within the borders of Wales, and to have been the site of a castle belonging to the Welsh princes. In the wars of the Roses, L. castle was chiefly in the possession of the house of York. During the civil war the castle held out under the earl of Bridgewater, for the interest of the king, but ultimately surrendered to the parliament. It is famous for having been the place where Milton's *Masque of Comus* was first performed, in 1631. The remains of the castle are situated on an eminence overhanging the river Corve, and form an important feature in a country rich in picturesque scenery.

LUDLOW, a township of Hampden co., Massachusetts, U. S., 82 m. WSW of Boston. Pop. 1,268. Also a township in Windsor co., in Vermont, 80 m. S of Montpelier, with a village on Black river. Pop. 1,636.

LUDLOWVILLE, a village in Tompkins co., in the state of New York, U. S., 172 m. W by S of Albany. Pop. 500.

LUDNEY. See Grainthorpe.

LUDON, a village of France, in the dep. of Gironde, cant. and 4 m. N of Blanquefort. Pop. 1,000.

LUDWEIS, a village of the archd. of Austria, 26 m. NNW of Krems.

LUDWIGSBURG, a town of Würtemberg, situated on the l. bank of the Neckar, 8 m. N of Stuttgard. It is a well-built place, and has one of the finest palaces in Germany, several churches, an arsenal, a cannon-foundry, and a charitable institution for the education of young children, with which a workhouse and woollen manufactory have been connected. Pop. 6,200. The court was removed to L. in 1727; but in 1733, on the death of the reigning duke, the public offices were brought back to Stuttgard, and L. has since been only the occasional residence of the court.—Also a town of Prussian Pomerania, situated on a bay of the Baltic, 5 m. ENE of Greifswald.

LUDWIGSLUST, a town of the grand-duchy of Mecklenburg-Schwerin, 22 m. SSE of Schwerin, on the Hamburg and Berlin railway. Pop. 5,256.

LUDWIGSTADT, a village of Bavaria, 4 m. SE of Lauenstein. Pop. 600.

LUDWIGSTEIN, a bailiwick of Electoral Hesse, in the circle of Witzenhausen. Pop. 5,108.

LUDWIGSTHAL, a village of Moravia, in the circle and 27 m. WNW of Troppau.—Also a village of Würtemberg, 2 m. NNE of Tuttlingen, on the r. bank of the Danube.

LUDWINOWO, a village of Poland, in the woivode of Augustowo, on the Szeszuppe, 4 m. S of Marianpol. Pop. 312.

LUDWIPOL, a town of Russia, in the gov. of Volhynia, on the l. bank of the Slucz, 30 m. NE of Rowno.

LUDWORTH AND CHIDWORTH, a township in the p. of Glossop, Derbyshire, 9 m. NW of Chapel-en-le-Frith, on the E bank of the river Etherow, and in the line of the Manchester and Sheffield railway. Pop. in 1831, 1,734; in 1841, 1,476.

LUESIA, a town of Spain, in the prov. and 50 m. NNW of Saragossa. Pop. 1,400.

LUETASCH, or Loitasch, a valley of the Tyrol, in the NE part of the circle of the Upper Innthal, It is singularly closed in on all sides by natural or artificial defences.

LUEZAS, a village of Spain, in the prov. and 24 m. SE of Logrono, in the col or pass of Monte Viso. Pop. 260.

LUFFENHAM (North), a parish in Rutlandshire, 5½ m. ENE of Uppingham, on the N bank of the river Chater. Area 1,740 acres. Pop. 478.

LUFFENHAM (South), a parish in Rutlandshire, 7 m. SW by W of Stamford, on a branch of the Chater. Area 1,230 acres. Pop. in 1831, 273; in 1841, 317. The North Midland railway has a station here.

LUFFINCOTT, a parish in Devonshire, 6 m. S by W of Holsworthy, on the E bank of the Tamar. Area 990 acres. Pop. in 1831, 92; in 1841, 93.

LUFTON, a parish in Somersetshire, 3 m. NW by W of Yeovil. Area 280 acres. Pop. in 1841, 21.

LUFUNA, a small river of Congo, in Africa, near the frontier of Angola, which falls into the Atlantic, in S lat. 8° 26′.

LUGA, a town of European Russia, in the gov. of Petersburg, on the river Luga, 97 m. S of St. Petersburg. Pop. 1,800.—The L. flows into the gulf of Finland, after a course of about 150 m.

LUGAGGIA, a commune of the Swiss cant. of Ticino, in the district of Lugano. Pop. 388.

LUGAGNAC, a village of France, in the dep. of Lot, cant. of Limougne, 15 m. ESE of Cahors. Pop. 350.

LUGAGNANO, a village in the duchy of Parma, 9 m. WSW of Borgo-San-Domino, on the l. bank of the Larda.

LU-GAN-FU, a division and town of China, in the prov. of Shan-se. The div. comprises 7 districts. The town is in N lat. 36° 7′ 12″, E long. 113°.

LUGANO, a lake, partly in the S of Switzerland, cant. of Ticino, and partly belonging to Austrian Lombardy, between Lake Maggiore on the W, and Lake Como on the E. It is 16 m. in length, and from 2 to 5 m. in breadth, and of great depth. The elevation of its surface above that of the Mediterranean is computed at 930 ft. It receives the river Agno on the N, and the Cavaigna on the E, and several other small streams; and discharges itself into Lago Maggiore by the river Tresa. It lies between two mountain-ranges, steep and of irregular form, whose craggy sides display a scene of uncommon magnificence, but impress the mind with awful rather than pleasant sensations. In the bay near Lugano, however, the surface slopes down to the edge of the water, discovering that town surrounded by meadows, corn fields, and vineyards, while the Alps, with their snowy peaks, form a grand semicircular boundary to the landscape. It is the *Ceresius lacus* of the Middle ages.

LUGANO, or Lauis, a town of Switzerland, the capital of the cant. of Ticino, 15 m. S of Bellinzona, and 16 m. NW of Como. Pop. in 1850, 5,142, Catholics. It stands on the N side of the lake of Lugano, and has an extensive traffic in silk, with well-frequented fairs, being an entrepot between Italy and Switzerland.

LUGANSKOI, a town of Russia, in the gov. of Ekaterinoslav, 16 m. SE of Bachmut.

LUGAR, a river of Ayrshire, which discharges itself into the river Ayr, near Catrine, after a course of 13 m.

LUGARES (Santos), a village of Buenos Ayres, 10 m. W by N of the city of Buenos Ayres, on the high road to Pilar, chiefly consisting of soldiers' huts. On the 3d of Feb. 1852, the Buenos Ayrean dictator, Rosas, played his last stake upon the plain surrounding this v., and was decisively defeated by the allied forces under Urquiza. Rosas led out his troops on Sunday afternoon from their encampment at Santos L. to a spot distant from it about a league. Here they remained on Monday the 2d, and that evening he formed his line of battle on the edge of a gentle slope, just raised above the surrounding level country. It is computed that he had from 20,000 to 25,000 men of all arms. Most of these, especially the cavalry, were new levies, having been taken from their farms only a few months before; but some few of the infantry, especially the blacks, who fought well, had long been soldiers. He had nearly 100 pieces of artillery, but they were badly managed. His old cavalry, to the number of 13,500 men, had been stationed in detachments along the river bank to the N of the province, and having been taken in detail, had nearly all been cut off or dispersed by Urquiza's troops during their march, so that only about 1,000 crossed the bridge of Márques under General Pacheco a few days before the battle. Rosas' line extended for about 2 m. on the edge of a gentle slope,—cavalry on the wings, infantry in the centre, artillery in front and between the intervals. There was not a tree or house on the field of battle, except a house of brick and mortar, with a tower, called Monte-Caseros, which formed his extreme right, and which he occupied in force, and a round pigeon-house of brick about 70 yds. from it. Urquiza, with a force of from 25,000 to 28,000 men, from Entre Rios, Uruguay, Corrientes, Santa Fé, and Brazil, arrived from the neighbourhood of Moron on the evening of Monday, and bivouacked at a distance of about 2 m. from the enemy. At daylight on Tuesday morning he drew up his men in a line, opposite to Rosas' army, on the edge of an opposite slope, at the distance of about 1 m. He was inferior in artillery, but much superior in the quality and discipline of his troops. The cannonading began at daylight. Urquiza commenced the battle by outflanking with his cavalry Rosas' left, which was turned and routed. While this was going on on Rosas' left, Urquiza's centre and left, composed of Brazilian and Oriental infantry, crossed the valley, and took at the point of the bayonet the two houses which formed the strong positions on Rosas' right, while Urquiza's cavalry on the left completely surrounded the whole of Rosas' right. Thus both his wings were turned. The cavalry fled; the infantry and artillery made a stand for a short time in a new position, but it was only for a very brief space: surrounded on all sides, they surrendered or fled in all directions, and the rout was complete. Rosas was on the tower of the house for some time, and then in the field; at length, seeing all was lost, he took to flight, and, thanks to a very magnificent horse, and the dust and smoke of the battle, succeeded in getting into Buenos Ayres, and off to a steamer, which conveyed him to the British flag-ship, the Centaur, lying about 3 m. off. Such was the issue of the battle of Monte-Caseros, in which, it is said, upwards of 50,000 men were engaged,—a larger number, perhaps, than ever assembled in America on one field since the days of the Aztec princes. The results were the complete dispersion of Rosas' cavalry, the capture of all his infantry and artillery, his own ruin, and the freedom of the Argentine republic. Of this large army it is not thought that more than 200 were killed, and 600 wounded on both sides,—Urquiza having given strict orders to make prisoners, but not to kill except in case of resistance. The victorious troops passed the night in Santos L., and head-quarters were established at Rosas' quinta of Palermo.

LUGDE, or Lude, a small town of Prussian Westphalia, in the principality of Paderborn, on the Emmer, 15 m. N of Brackel. Pop. 3,500.

LUGDUFF, a mountain of co. Wicklow, forming part of the S screen of Glendalough, and part of the N screen of Glenmalure. It has an alt. of 2,148 ft. above sea-level. Its name means 'the mountain of the Black gulf;' and its N side is so precipitous, that a writer, who has no propensity to exaggerate, declares it possible to "take a somerset of 1,500 ft.," from the top of it into the upper lake of Glendalough.

LUGG, a river of Wales, which falls into the Severn at Chepstow.—Also a river of Herefordshire, which rises in Radnorshire, and falls into the Wye, near Hereford, after a course of about 40 m.

LUGGELAW, a beautiful glen in co. Wicklow, 3½ m. NW by N of Roundwood. Lough Tay, possessing a surface-elevation of 807 ft. above sea-level, lies in the bottom of part of the glen; and the enormous alpine mass of naked granite, which forms the mountain of Carrigemanne, climbs tumultuously up from one of the lake's sides.

LUGGIE, a river of Dumbartonshire and Lanarkshire, which joins the Kelvin near Kirkintilloch. The great canal between the Forth and Clyde is carried over it by an aqueduct bridge.—Also a river of Linlithgowshire, a tributary of the Avon.

LUGINO, a town of Russia, in the gov. of Volhynia, 27 m. SW of Owrucz.

LUGNANO, a town of the Papal states, in the deleg. and 24 m. SW of Spoleto. Pop. 1,000.

LUGNAQUILLA, a mountain of co. Wicklow, 7 m. ENE of Baltinglass, alt. 3,039 ft. above sea-level. It can be easily ascended on the SW side.

LUGNEZ, or Lungnez, a jurisdiction in the Swiss cant. of the Grisons, comprising the valley and side-valleys of the Glenner. Pop. in 1850, 292, Catholics.

LUGNY, a town of France, in the dep. of Saone-et-Loire, 10 m. N of Maçon. Pop. 1,167.—Also a village in the dep. of Cote-d'Or, 1 m. NNW of Recay.

LUGO, a province of Spain, formed in 1822 of the NE part of the prov. of Galicia. It is bounded on the N by the Atlantic; on the E by the provs. of Oviedo and Villafranca; on the S by those of Orense and Vigo; and on the W by La Corogne. The Cantabrian chain traverses its centre; the rivers Mino and Sil water its S part. Much of the surface is uncultivated, but offers excellent pastures.—Its chief town, of the same name, stands on an eminence near the l. bank of the Mino, in N lat. 43°, 51 m. E of Santiago. It is neatly built, and is more than 3 m. in circuit; but contains only 7,200 inhabitants. It is of great antiquity, having been the capital of a district under the Romans, who gave it the name of *Lucus Augusti*. It is now a bishop's see, and has a cathedral of Gothic architecture, with several churches and convents. Its ancient walls are in good preservation. It has some small manufactures of woollen.

LUGO, a town of the Papal states, in the leg. of Ferrara, on the river Senio, 15 m. S of Ferrara. Pop. 9,343. It is a place of considerable trade.

LUGOS, or Lugosch, a small town of Hungary, the chief place of the palatinate of Krassova, on the l. bank of the Temes, 35 m. E of Temesvar. On the opposite bank of the river is Olah-Lugos, or Wallashisch-Lugos, with a pop. of 6,000.

LUGRIN, a town of Savoy, in the prov. of Thonon, 4 m. E of Tvian. Pop. 1,100.

LUGROS, a town of Spain, in the prov. and 34 m. E of Grenada. Pop. 670.

LUGTON, a river of Scotland, which issues from Loch Libo in Renfrewshire, and falls into the Garnock.

LUGUMKLOSTER, a town of Denmark, in the duchy and 48 m. NNW of Sleswick, 19 m. W of Apenrade, near the l. bank of the Brede-aae. Pop. 1,200. It has large cattle-fairs.

LUGWARDINE, a parish of Herefordshire, 3 m. E by N of Hereford, on the Lugg. Area 1,950 acres. Pop. 690.

LUHATSCHOWITZ, a village of Moravia, 12 m. ESE of Hradisch. It has sulphurated springs and saline baths.

LUH-CHU, a division and town of China, in the prov. of Shen-se. The div. comprises 3 districts.

LUHE, a village of Bavaria, on the l. bank of a river of the same name, an affluent of the Elbe, and 9 m. N of Nabburg.

LUH-FUNG, a district and town of China, in the prov. of Yun-nan, div. of Yun-nan-fu, in N lat. 25° 12′, E long. 102° 14′.—Also a district and town in the prov. of Kwan-tung, div. of Hwuy-chu-fu, to the E of Hai-fung.

LUH-GAN-CHU, a division and town of China, in the prov. of Gan-hwuy. The div. comprises 2 districts.

LUH-HO, a district and town of China, in the prov. of Keang-su, div. of Keang-ning-fu or Nanking, in N lat. 32° 20′, E long. 118° 50′.

LUH-HWAN-HEEN, a district and town of China, in the prov. of Yun-nan, div. of Wu-ting-chu.

LUH-LEANG-CHU, a district and town of China, in the prov. of Yun-nan, div. of Keuh-tsing-fu, 60 m. E of Yun-nan-fu, on a small lake, in N lat. 25° 8′, E long. 103° 42′.

LUH-YIH, a district and town of China, in the prov. of Ho-nan, div. of Kwei-tih-fu, in N lat. 33° 56′ 50″, E long. 115° 34′ 30″.

LUI, a stream in Aberdeenshire, descending from Benmuicdhu through Glenlui, and the forest of Mar, to the Dee.

LUIGNE, a village of France, in the dep. of Maine-et-Loire, cant. and 6 m. ENE of Thouarce. Pop. 500.

LUINA (Loch). See Avich.

LUINES, a town of France, in the dep. of Indre-et-Loire, 6 m. W of Tours. Pop. 2,000.

LUING, an island off the W coast of Argyleshire, separated on the N from Seil by a strait scarcely 300 yds. wide, and having the islands of Torsay and Shuna off its E side. It is 6½ m. in length, but rarely exceeds 1 m. in breadth. Clay-slate forms the mass of the island; and the quarrying of it, for roofing-slates, employs a number of hands.

LUINO, or Luvino, a small town of Austrian Italy, on the E bank of Lago Maggiore, 15 m. S of Locarno.

LUIS (San), a town of the La Plata confederation, in the prov. and 130 m. SW of Cordova. It is composed of low mud-built huts, and enclosed with a wall of the same material.—There are various inconsiderable settlements of this name in Spanish America.

LUIS (San), a harbour and inlet of Texas, near the W end of Galveston island. The harbour is formed by an island called San Luis, and a neck of the mainland.

LUISA, a river of New Granada, which rises 36 m. W of Ibague; runs SW; and enters the Magdalena, on the l. bank, after a course of 75 m.

LUIS-OBISPO (San), a town of Upper California, 40 m. N of Point Conception, at the mouth of the Rio San Felipe.

LUIS-DE-LA-PAZ (San), a town of Mexico, in the state of Guanaxuato, 36 m. NNW of Queretaro. Pop. 4,500.

LUIS-POTOSI (San). See Potosi.

LUIS REY (San), a village of New California, founded in 1798. It stands in N lat. 32° 45′, on the coast road from San Diego northwards.

LUISTRE, or L'Huitre, a village of France, in

the dep. of L'Aube, cant. of Ramerup, 6 m. NE of Arcis-sur-Aube. Pop. 720.

LUITRE, a commune and village of France, in the dep. of Ille-et-Vilaine, cant. and 6 m. SSE of Fougères. Pop. 1,700.

LUIZ (San). See Maranham.

LUIZ (Sao), a village of Brazil, in the prov. of Minas-Geraes, 5 m. NNE of Paracatu.

LUIZ-ALVES, a river of Brazil, in the prov. of Goyaz, rising in the Serro-do-Duro, and flowing E, through dense forests, to the Tocantins.—Also a river in the prov. of Santa-Catharina, descending from the Serra Bahu, and joining the Tajahi.

LUIZ-BELTRAO (Sao), a village of Brazil, in the prov. of Rio-de-Janeiro, comarca of Rezende, near the l. bank of the Parahiba.

LUIZ-GOMEZ, a mountain-ridge of Brazil, a branch of the Cordilheira Borborema, in the provs. of Parahiba and Rio-Grande-do-Norte, in which the Rio-do-Peixe has its origin.—Also a parish and village of Brazil, in the prov. of Rio-Grande-do-Norte, to the W of the Rio-das-Piranhas, in the district of Porto-Alegre.

LUIZ-DAS-MISSOES (Sao), a village of Brazil, in the prov. of São-Pedro-do-Rio-Grande, comarca of Missoes, on the Rio Piratini.

LUKASZOWKA, a town of Russia, in the gov. and 90 m. SSE of Kiev. Pop. 500.

LUKAWETZ, a town of Bohemia, in the circle and 30 m. SW of Czaslau.

LUKAWITZ, a village of Bohemia, in the circle and 6 m. SE of Chrudim.

LU-KE, a district and town of China, in the prov. of Hu-nan, div. of Shin-chu-fu, in N lat. 28° 15′, E long. 109° 53′.—Also a district and town in the prov. of Keang-se, div. of Keen-chang-fu, in N lat. 27° 33′, E long. 117° 17′.

LU-KEANG, a district and town of China, in the prov. of Gan-hwuy, div. of Lu-chu-fu, 105 m. SW of Nan-king, in N lat. 31° 16′ 49″, E long. 117° 17′ 10″.

LU-KEEN-HO, a river of China, in the prov. of Shan-se, which has its source near the fortress of Yang-fang; runs W; and, after a course of about 90 m., throws itself into the Hoang-ho, on the l. bank, near the town of Ho-ken.

LUKE'S KEYS, two small islands near the coast of Honduras, in N lat. 15° 50′.

LUKEW, a river of Galicia, rising near Przyslupie, and running NNE to the Dneister.

LU-KIANG, a name by which the river Thaleayn is distinguished in its passage through the Chinese prov. of Yun-nan.

LUKKI, a town of Sind, 12 m. SE of Lukkur, in about N lat. 27° 48′.—Also a town of Sind, in about S lat. 26° 14′, near the W bank of the Indus, and adjacent to a pass leading through a range of mountains, connected with the Hala range of Beluchistan.

LUKMANIER, a summit of the Lepontine Alps, in Switzerland, on the frontiers of the cant. of Grisons and that of Ticino. Nearly on the summit of the pass by which the road from Desentes to Bellinzona crosses this mountain, is the hospice of Santa Maria, at an alt. of 5,740 ft. above sea-level.

LUKNIKI, a town of Russia, in the gov. of Wilna, 15 m. ESE of Telsze.

LUKOJANOV, a town of European Russia, in the gov. of Nizni-Novgorod, on the river Teshe, 102 m. S of Nizni-Novgorod.

LUKOMI, a town of Russia, in the gov. and 72 m. NW of Mohilev, near a small lake of the same name.

LUKOW, a town of Poland, in the woiwodie and 18 m. S of Siedlev, on an affluent of the Krzna. Pop. 1,500.

LULEA, a seaport of Sweden, in N. Bothnia, 68 m. WSW of Tornea, in N lat. 65° 36′, E long. 22° 10′, at the mouth of a river of the same name, which rises on the Norwegian frontier, and reaches the gulf after a SE course of about 220 m. Pop. 1,140.

LULEA-LAPPMARK, an extensive district of Swedish Lapland; bounded on the N by Tornea-Lappmark; on the E by W. Bothnia; on the S by Pitea-Lappmark; and on the W by Norway, from which it is separated by the Dofrines chain. It takes its name from the river Lulea, which flows through it. The greatest part of it consists of woods and high mountains. It has mines of silver, lead, and iron; and is divided into two parishes of vast extent, called Jokmok and Gellivara. It is thinly peopled, containing hardly 2,500 inhabitants, though 150 m. in length, and 70 m. in breadth.

LULES (Los), a settlement in the Argentine prov. of Tucuman, 50 m. N of Tucuman.

LULLIAMORE, a parish in co. Kildare, 4 m. NNE of Rathangan. Area 2,656 acres. Pop. 51.

LULLIANA, a village of the Punjab, 20 m. S of Lahore.

LULLINGSTONE, a parish in Kent, 14 m. W by S of Rochester, on the river Darent. Area 1,410 acres. Pop. in 1831, 40; in 1841, 59.

LULLINGTON, a parish in Derbyshire, 6½ m. S of Burton-upon-Trent. Area 3,100 acres. Pop. in 1831, 548; in 1841, 650.—Also a parish in Somersetshire, 3 m. N by E of Frome. Area 840 acres. Pop. in 1831, 145; in 1841, 139.—Also a parish in Sussex, 5 m. SW of Hailsham, on the E bank of the Cuckmere. Area 960 acres. Pop. in 1841, 39.

LULLWORTH (East), a parish in Dorsetshire, 5 m. SW of Wareham. Area 2,860 acres. Pop. in 1831, 345; in 1841, 392. L. castle is a massive structure, forming an exact cube of 80 ft., with a round tower at each corner.

LULLWORTH (West), a chapelry in Dorsetshire, 7½ m. SW of Wareham, on the shore of the English channel. Area 3,240 acres. Pop. in 1831, 360; in 1841, 407.

LULSLEY, a chapelry in the p. of Suckley, Worcestershire, 7 m. W by N of Worcester, on the S bank of the Teme. Area 760 acres. Pop. in 1831, 128; in 1841, 120.

LU-LUNG-HEEN, a district and town of China, in the prov. of Chih-le, div. of Yung-ping-fu.

LUMBERLAND, a township of Sullivan co., in the state of New York, U. S., 129 m. SW of Albany. Pop. 1,205.

LUMBERTON, a town of N. Carolina, U. S., capital of Robeson co., 91 m. S by W of Raleigh.

LUMBERVILLE, a village of Bucks co., in Pennsylvania, U. S., 117 m. E of Harrisburg.

LUMBIER, a town of Spain, in the prov. and 18 m. ESE of Pampeluna, on an island formed by the Irati and the Salazar. Pop. 2,143.

LUMBO, a town of Lower Guinea, in Benguela, 120 m. ENE of Benguela.

LUMBRALES, a town of Spain, in the prov. and 55 m. WSW of Salamanca. Pop. 2,084.

LUMBRERAS, a town of Spain, in the prov. and 4 m. S of Logrono. Pop. 1,300.

LUMELLO, a town of the Sardinian states, the chief place of the district of Lomellina, 44 m. ENE of Turin, on the r. bank of the Agogna. Pop. 2,150.

LUMEZZANE (Val Delle), a district of Austrian Lombardy, in the prov. of Brescia, watered by the Gobbia, an affluent of the Mella. It is a highly fertile region; and contains several villages, whose inhabitants are chiefly supported by the manufacture of fire-arms and military weapons of all kinds.

LUMEZZANE-PIEVE, a town of Austrian Lombardy, 9 m. N of Brescia. Pop. 1,300.

LUMEZZANE-SAN-APOLLONIO, a town of Austrian Lombardy, 9 m. NNE of Brescia. Pop. 1,386.

LUMGHANAT. See AFGHANISTAN.

LUMIAR, a village of Portugal, in the prov. of Estremadura, 3 m. N of Lisbon. Pop. 1,600.

LUMIARES, a village of Portugal, in the prov. of Beira, comarca and 7 m. SSE of Lumego, on the r. bank of the Coura.

LUMIO, a village of Corsica, in the cant. of Monte-Grosso, 4 m. N of Calenzana. Pop. 750.

LUMLEY (GREAT), a chapelry in the p. of Chester-le-Street, co.-palatine of Durham, 5 m. NNE of Durham, on the E bank of the Wear. Area 1,730 acres. Pop. in 1831, 2,301; in 1841, 1,796.

LUMLEY (LITTLE), a township in the p. of Chester-le-Street, co.-palatine of Durham, 6 m. NNE of Durham. Area 750 acres. Pop. in 1831, 393; in 1841, 381. On an eminence on the S bank of the river Wear stands the majestic castle of L.

LUMMEN, a village of Belgium, in the prov. of Limburg, cant. and 4 m. N of Herck. Pop. 659.

LUMNA, a village of Galicia, 27 m. SW of Sambor. Pop. 1,000.

LUMPARLAND, an island in the Baltic, one of the Aland group, in N lat. 60° 7′, to the SE of Aland.

LUMPHANAN, a parish of Aberdeenshire, 24 m. WSW of Aberdeen. Pop. in 1831, 947; in 1841, 964.

LUMPKIN, a county in the N part of the state of Georgia, U. S., watered by the Etowah and Chestalee. Area 700 sq. m. Pop. 5,671 in 1840; in 1850, 8,674. Its cap. is Dahlonega.—Also a village in Stewart co., in the state of Georgia, 137 m. SW of Milledgeville.

LUNA, a river of Ecuador, which rises to the NE of La Conception, runs S, and joins the Putumayo, on the l. bank, in S lat. 1°, after a course of 120 m.

LUNA, a town of Spain, in the prov. and 32 m. N of Saragossa, on the r. bank of the Arva-da-Biel. Pop. 1,300.

LUNA (PUNTA DE), a cape on the N coast of the island of Cuba, in W long. 75° 8′.

LUNAC, a village of France, in the dep. of Aveyron, cant. and 6 m. ENE of Najac. Pop. 500.

LU-NA-CHAN, a mountain of China, in the prov. of Sze-chuen, div. of Ning-yuen-fu, in N lat. 26° 33′, E long. 102° 57′.

LUNAIRE (SAINT), a village of France, in the dep. of Ille-et-Vilaine, cant. of Pleurtuit, on the coast, 12 m. N of Dinan. Pop. 1,000.

LUNAN, a river of Forfarshire, flowing NE to Rescobie-loch; expanding into Balgaves-loch; and terminating at Lunan-bay, in the vicinity of Redcastle, after a course of 17 m.—Also a rivulet of Perthshire, formed by various picturesque rills emptying themselves into the loch of Lows, in the parish of Caputh. After its efflux from that lake, it becomes lost in the circular loch of Butterstone; issuing thence, it runs E and SE, and expands into Loch-Clunie; a mile farther E, it is once more a lake, or is lost in Loch-Drumellie. Running now SE, it falls into the Isla, 2 m. E of Meiklour.—Also a parish on the coast of Forfarshire, bounded on the E by Lunan-bay. Pop. in 1801, 318; in 1831, 298; in 1841, 272.

LUNAN-BAY, a semicircular indentation of the German ocean, on the coast of Forfarshire. Its coast for a mile at each extremity is bold and rocky. It has a fine sandy bottom, and affords safe anchorage in any storm except from the NE and E.

LUNAS, a canton and village of France, in the dep. of Herault, 27 m. N of Beziers. Pop. 1,500.

LUNAY, a village of France, in the dep. of Loir-et-Cher, cant. of Savigny, 6 m. W of Vendome. Pop. 1,600.

LUNCARTY, a village in the Strathmore district of Perthshire, near the Tay, 4 m. N of Perth, with about 230 inhabitants. A bleachfield here has long been reputed the most extensive in Britain. Its grounds comprehend upwards of 130 acres; and four falls of water-power impel 24 sets of beetles. The works bleach about 2,000,000 yds. of linen cloth in the year, and employ upwards of 120 hands.—L. is famous in connection with the decisive overthrow of the Danes, about the year 990, by Kenneth III. The scene of conflict was on the Tay, 2 m. above the confluence of the Almond.

LUND, or LUNDEN, a town of Sweden, in the laen of Malmö, 21 m. E of Copenhagen, 8 m. from the Baltic. Pop. 5,000. It has some woollen manufactories and tanneries. A university was founded here in 1479, which is still attended by above 600 students. It has a botanical garden, an anatomical theatre, a cabinet of curiosities, and a library containing above 40,000 vols. L. has a fine old cathedral, now under progress of restoration.

LUNDEN, a town of Denmark, in the duchy of Holstein, in the N. Ditmarsch, near the mouth of the Eyder, 62 m. NNW of Hamburg. Pop. 400.

LUNDENBURG, or BRZEDSLAW, a town of Moravia, on the river Theya, 36 m. E of Brunn. Pop. 1,500.

LUNDIE, a parish in Forfarshire, skirting the Sidlaw hills. Area 3,258 acres; or with Fowlis-Easter, in Perthshire, 5,202 acres. Pop. of these conjoined districts, in 1831, 778; in 1841, 734.

LUNDU, a river of Borneo, on the W coast. It has a breadth of about a ½ m. at its mouth; and is from 150 to 200 yds. wide opposite the Dyak village of Tungong, situated about 18 m. above its mouth.

LUNDY, an island in the mouth of the Bristol channel, 11 m. NW by N of Hartland point. It is about 3 m. in length and 1 m. in breadth, and comprises nearly 2,000 acres. On account of the lofty rocks with which it is environed, it is inaccessible except by a narrow entrance on the E side, where a small beach admits approach. Towards the N extremity, it rises to the height of 800 ft. above sea-level, and is terminated by a lofty pyramidal rock called the Constable. In 1840 it was sold for 9,400 guineas. There is a lighthouse upon it, in N lat. 51° 10′ 7″, W long. 4° 40′ 15″.

LUNDYE, a river of Afghanistan, rising on the Hindu-Kush, and flowing SW to the river of Cabul, which it joins in N lat. 34° 10′.

LUNE, a river of Westmoreland and Lancaster, which rises on the S slope of Shapfells; runs past Kirby-Lonsdale and Hornby to Lancaster, a distance of 45 m.; and below Lancaster opens into a wide estuary. Its chief tributaries are the Rother, the Leckbeck, the Greta, and the Wenning. It is navigable to Lancaster.—Also a river in the counties of Westmoreland and Durham, which runs into the Tees below Longton.

LUNE, a village of Hanover, 1 m. NNE of Luneburg, near the r. bank of the Ilmenau.

LUNEBURG, a government of Hanover, formerly a principality of the German empire, stretching along the l. bank of the Elbe, between the parallels of 52° 15′ and 53° 3′ N, and forming part of the NW frontier of Hanover. A small part, lying on the r. bank of the Elbe, belongs to Denmark. It has a territorial extent of 4,236 sq. m. Pop. in 1848, 326,427. Its surface belongs to the basin of the Elbe on the N; and to that of the Weser on the S; and is watered by the Aller, the Ilmenau, the Lühe, the Ocker, the Jetze, the Fuhse, the Bohme, and some smaller streams. The central part forms a large heath, which is employed in feeding sheep and in maintaining bees. The latter are reared in such numbers as to produce honey and wax for export to the annual value, it is said, of £30,000. Wherever the soil has

any considerable elevation, it is sandy, and apt to run into heath; but on the banks of the rivers there are many fertile districts. The low grounds produce corn of different kinds, particularly buckwheat; in certain situations hops; and in others excellent pasturage on which horses are reared for export. The manufactures of the province are confined to the products of the country, consisting chiefly of woollens, linen, and wax. L. is governed by its own states, and has its own courts of justice. At Zell, in this prov., there is a court of appeal for the whole Hanoverian states.

LUNEBURG, the capital of the above prov., stands on the Ilmenau, which is here navigable. It has dark and narrow streets, and old-fashioned houses; and is surrounded by walls of no great strength. It has 4 churches, with an equal number of hospitals, an orphan-house, a gymnasium, and a military school in which young men of family and others receive their education. In the market-place stands the palace, a good building; and opposite to it the church of St. Michael, in which many of the ancient dukes of L. are buried. Pop. in 1845, 11,779. Luneburg formerly held a leading rank among the Hanse towns, and still carries on a considerable trade, particularly in horses. It has also a fine salt-spring, from which salt is manufactured and exported in considerable quantities. On the W side of the town is a hill called the Kalkberg, from which lime is procured for exportation to Hamburg, Altona, and Holland. One quarter of the town, called the Sulze, is surrounded by a separate wall, and governed by its own magistrates.

LUNEDALE, a township in the p. of Romaldkirk in Yorkshire, 11 m. NW of Barnard-Castle. Area 21,680 acres. Pop. in 1831, 308; in 1841, 339.

LUNEL, a canton, commune, and town of France, in the dep. of the Herault, and arrond. of Montpellier.—The cant. comprises 11 com. Pop. in 1831, 12,853; in 1841, 13,410.—The town, called also Lunel-la-ville, is 14 m. ENE of Montpellier, and 9 m. N of Aigues-Mortes, on the r. bank of the Vidourle, which is here crossed by a bridge, and near a canal of the same name. Pop. in 1841, 6,385. It has numerous distilleries of brandy and of essences; and carries on an active trade in grain, flour, and dried fruit. Wine in large quantities is cultivated in the environs. The canal of L., to which the town chiefly owes its activity, is 8½ m. in length. It is formed by the waters of the Dardaillon, and connects the Rhone with the Canal-des-Deux-Mers and the Mediterranean. The town of L. was taken and fortified by the Protestants.—Also a village in the dep. of the Aveyron, cant. and 4 m. N of St.-Genies-de-Rivedolt. Pop. 230.—Also a river which has its source in the dep. of the Drome and cant. of Chatillon; flows thence into the dep. of the Hautes-Alpes; and joins the Buech, on the r. bank, 1½ m. N of Serres, after a course in a generally S direction of about 24 m.

LUNEL, a town of Senegambia, in the kingdom of Galam, and 15 m. WNW of Makana.

LUNEL-VIEIL, a town of France, in the dep. of the Herault, cant. and 3 m. W of Lunel, and 13 m. ENE of Montpellier. Pop. 560.

LUNEN, a town of Prussia, in the prov. of Westphalia, reg. and 27 m. NW of Arenberg, circle and 7 m. NNE of Dortmund, at the confluence of the Lippe and Lesick. Pop. in 1837, 1,993. It has manufactories of hosiery, needles, tobacco, and tinware, and several tanneries.

LUNENBURG, a county of Nova-Scotia, on Mahone bay, on the S coast of the prov., facing the Atlantic ocean; bounded on the N by Annapolis and King's co.; on the E by Hants and Halifax; and on the W by Queen's co.—Also a township in the above co., originally colonized by a number of industrious Germans and Swiss, who changed its name from Melagash to the present. It is 35 m. SW by S of Halifax, and contains about 1,200 inhabitants, who still talk German. The style of the houses is Dutch, and their outsides are generally painted red, white, orange, or green. The harbour is about 1 m. in length, with water for large vessels.—Also a county in the S of Virginia, U. S., watered by the Meherin. Area 410 sq. m. Pop. in 1840, 11,055; in 1850, 11,678. Its cap. is Lewistown.—Also a village of Albany co., New York, on the W side of Hudson's river, opposite to the city of Hudson, and 30 m. S of Albany.—Also a township of Worcester co., Massachusetts, 46 m. NW of Boston. Pop. 1,272.—Also a township of Essex co., Vermont, 58 m. ENE of Montpelier. Pop. 1,130.

LUNERAY, a commune of France, in the dep. of the Lower Seine, cant. and 4 m. NW of Basqueville, and 11 m. SW of Dieppe. Pop. 1,630. It has a Protestant chapel, and contains several oil-mills.

LUNEVILLE, a considerable town of France, in the dep. of the Meurthe, near the junction of the Vezouze and the Meurthe, 15 m. SE of Nancy. Pop. in 1836, 12,661; in 1846, 12,164. It is an open town; the streets are regular, and the houses are in general well-built. The principal public edifice is a castle, built towards the beginning of last cent., by Leopold I., duke of Lorraine, and long inhabited by Stanislaus, ex-king of Poland, who made important improvements both on the castle and town, where he instituted an academy, and furnished it with a good library. In the centre of the town is the large and handsome church of St. James, with two elegant towers. The hotel-de-ville, the barracks, the principal hospital, and several other public establishments, are of considerable interest. The town has, on a small scale, manufactories of stockings, lace, muslin, gloves, and pottery.—L. is well known in diplomatic history for the treaty concluded there between Austria and the French republic, on the 9th February, 1801.—The cant. of L. comprises 36 coms. Pop. in 1841, 33,512.—The arrond. of L. has an area of 120,912 hect., and comprises the cants. of L., Baccarat, Bayon, Blamont, and Gerbeviller. Pop. in 1841, 89,179.

LUNG, a river of the cos. of Mayo, Sligo, and Roscommon. It issues from Lough Errit, on the W border of Roscommon; and flows to the S side of Lough Gara, in a prevailingly NE course; but it flows so sinuously as to make an actual run of 20 m. in achieving a real distance of 10. A large proportion of the country upon its banks and within its basin is bog.

LUNGA, an island off the coast of Argyleshire, on the W flank of the sound of Luing. It extends about 2½ m., by ¾ of a mile, N and S; and is separated at its ends by very narrow straits from Ormsa and Scarba. The strait at the S end, between it and Scarba, is obstructed by a rocky islet, and has a tumbling and impetuous tidal current. L. consists of a long irregular hilly ridge, generally less than 500 ft. above sea-level, but occasionally rising to nearly 1,000 ft. From the different eminences of the island, the views are extremely interesting.

LUNGAU, a district of the archd. of Austria, in the prov. of Upper Austria, and SE extremity of the circle of Salzburg. It consists chiefly of a valley, at an elevation of 3,225 ft. above sea-level, and surrounded by lofty mountains. Its chief towns are Mauterndorf and Tamsweg.

LUNG-CHANG, a district and town of China, in the prov. of Sze-chuen, div. of Seu-chu-fu, in N lat. 29° 28′, and E long. 105° 19′.

LUNG-CHU, a district and town of China, in the prov. of Shen-se, div. of Tung-seang-fu, in N lat. 34° 48′, and E long. 106° 57′ 54″.

LUNG-CHUEN, a district and town of China, in the prov. of Kwang-tung, div. of Hwuy-chu-fu, in N lat. 24°, and E long. 114° 52′.—Also a town of the Corea, in the prov. of Hoang-haï, near the NE shore of the Yellow sea, and 66 m. WNW of Hang-chu.

LUNG-CHUEN-HEEN, a district and town of China, in the prov. of Kwan-se, div. of Yu-lin-chu.

LUNG-CHUEN-KIANG, a river which has its source in Tibet, in the prov. of Kam, in N lat. 31°, and E long. 95° 50′; flows through the defile of Singghian-khial into Birmah; passes thence near the mountain of Ming-kwang-chan into the Chinese prov. of Yun-nan; re-enters the Birman empire; and, after a course, in a generally S direction, of about 600 m., joins the Irrawadi, on the l. bank, 135 m. NNE of Ummerapura. It bears, in the upper part of its course, the name of Gakbo-dzangbo-chu.

LUNG-CHUEN-SEUEN-FU-SE, a district and town of China, in the prov. of Yun-nan, in N lat. 24° 18′, E long. 98° 16′.

LUNG-CHU-TING, a division and town of China, in the prov. of Kwan-se, div. and 30 m. W of Tae-ping-fu, in N lat. 22° 22′ 24″, and E long. 12° 39′.

LUNG-GAN, a district and town of China, in the prov. of Kwan-se, div. of Nan-ning-fu, in N lat. 23° 15′, and E long. 107° 20′.

LUNG-GAN-FU, a division and town of China, in the prov. of Sze-chuen. The div. comprises 4 districts. The town is 135 m. NNE of Ching-tu-fu, in N lat. 32° 22′, and E long. 104° 38′ 50″. It is well-fortified, and carries on an active trade. The surrounding mountains are inhabited by people possessing but little civilization.

LUNGERN, a village of Switzerland, in the cant. of Unterwalden, 8 m. SW of Sarnen. Pop. 1,413, Catholics.—In the vicinity is the small lake of L., which has been drained 20 ft. below its original level by boring a tunnel through the Kaiserstuhl, a high ridge stretching across the foot of the lake, and forming a natural dam.

LUNG-KI, a district and town of China, in the prov. of Fo-keën, div. of Chang-chu-fu.

LUNG-KIANG, a river of China, which has its source in the NW part of the prov. of Kwan-se; flows SE past the towns of King-yuen, Liou-chu, and Thsin-chu; and near the latter joins the Hung-kiang, on the l. bank, and after a course of about 300 m.

LUNG-LE, a district and town of China, in the prov. of Kwei-chu, div. and 18 m. SE of Kwei-yang, in N lat. 26° 28′, E long. 102° 48′.

LUNG-LING-TING, a district and town of China, in the prov. of Yun-nan, div. of Yung-chang-fu.

LUNG-MUN, a district and town of China, in the prov. of Chih-le, div. and 36 m. NE of Seuen-hwa-fu, and 78 m. NW of Pe-king, in N lat. 40° 47′ 40″, E long. 115° 37′ 50″.—Also a district and town in the prov. of Kwang-tung, div. of Kwang-chu-fu, and 90 m. NE of Canton, in N lat. 23° 43′ 42″, E long. 113° 3′ 50″.—Also a gorge in the mountains to the S of Keae-chu, in N lat. 35° 40′.

LUNG-NAN, a district and town of China, in the prov. of Keang-se, div. of Kan-chu-fu, 300 m. SSW of Nan-chang-fu, in N lat. 24° 51′ 36″, E long. 114° 36′ 50″.

LUNG-PING-HEEN, a district and town of China, in the prov. of Chih-le, div. of Chaou-chu, 210 m. SSW of Pe-king, in N lat. 37° 25′, E long. 114° 54′.

LUNGRO, a town of Naples, in Calabria-Citra, 6 m. W of Castro-Villari. Pop. 3,500, chiefly of Albanian descent. In the vicinity is a salt-mine.

LUNG-SHAN, a district and town of China, in the prov. of Hu-nan, div. of Yung-shun-fu.

LUNG-SE-HEEN, a district and town of China, in the prov. of Kan-suh, div. of Kung-chang-fu.

LUNG-SHING-TING, a district and town of China, in the prov. of Kwan-se, div. of Kwei-lin-fu.

LUNG-TAN, a town of the Corea, in the prov. of Tseuen-lo, 150 m. from Han-yang.

LUNG-TIH, a district and town of China, in the prov. of Kan-suh, div. and 30 m. WNW of Ping-leang-fu, in N lat. 35° 40′, E long. 106° 10′.

LUNG-TSEUEN, a district and town of China, in the prov. of Keang-se, div. of Kih-gan-fu, 198 m. SSW of Nan-chang-fu, in N lat. 26° 18′, E long. 114° 25′.

LUNG-TSEUEN-HEEN, a district and town of China, in the prov. of Chi-keang, div. of Chu-chu-fu, 66 m. S of Keu-chu-fu, in N lat. 28° 8′, E long. 119° 9′ 7″.—Also a district and town in the prov. of Kwei-chu, div. and 360 m. NW of Shih-tseen-fu.

LUNGUR, a village of Afghanistan, 32 m. SE of Sui-Pul, in N lat. 35° 50′.

LUNGWITZ (Upper and Lower), two contiguous villages of Saxony, 10 m. WSW of Chemnitz. Pop. 5,140. They have hosiery and linen manufactories, and bleacheries.

LUNG-YANG, a district and town of China, in the prov. of Ho-nan, div. of Chang-tih-fu, in N lat. 28° 52′, and E long. 111° 38′.

LUNG-YEN-CHU, a division and town of China, in the prov. of Fo-keen. The div. comprises 2 districts. The town is in N lat. 25° 8′, E long. 117° 8′.

LUNG-YEW, a district and town of China, in the prov. of Chi-keang, div. and 21 m. E of Keu-chu-fu, in N lat. 29° 9′, E long. 119° 18′. In the environs are extensive plantations of tea, oranges, mulberries, and pines, and several quarries.

LUNG-YNG-CHU, a district and town of China, in the prov. of Kwan-se, div. of Tae-ping-fu, in N lat. 22° 56′, E long. 106° 48″.

LUNI, a town of Spain, in the prov. and 28 m. N of Saragossa. Pop. 1,259.

LUNIGIANA, a small territory of Italy, formerly belonging to Tuscany, now to Modena. Area 197 sq. m. Pop. in 1844, 55,220.—In 1847, in virtue of arrangements entered into by the treaty of Vienna, this little prov. was detached from Tuscany, and passed under the administration of the duke of Modena,—an arrangement which afforded little satisfaction at the time to its inhabitants.

LUNINI, a river of Lower Guinea, in the E part of Angola. It separates the district of Mattemba from the territory of Ginga; runs S; and is supposed to join the Coango.

LUNKHOFEN, a parish and village of Switzerland, in the cant. of Aargau, district and 5 m. SE of Bremgarten, and 19 m. ESE of Aarau. Pop. of p. 2,052.

LUNNA, a town of Russia in Europe, in the gov. and 26 m. SE of Grodno, on the l. bank of the Niemen.

LUNNERN, a village of Switzerland, in the cant. and 12 m. SW of Zurich, and bail. of Knonau, on an affluent of the Reuss. It contains several Roman remains.

LUNONE, a river of Corsica, which falls into the sea, a little S of Ajaccio bay.

LUNUGALLA, a mountain of Ceylon, which rises from the table-land of Horton's Plains to an alt. of 7,800 ft. above sea-level.

LUNZ, a town of the archd. of Austria, in the prov. of Lower Austria, and lower circle of the Wienerwalde, 15 m. ESE of Waidhofen, and 41 m. SW of St. Polten.

LUNZENAU, a town of Saxony, in the circle of

Leipzig, 2 m. NE of Penig, on the Mulde. Pop. 2,737.

LUPATA MOUNTAINS, a chain of mountains in Eastern Africa, which is represented by early Portuguese writers as beginning at the upper part of the Zambeze, and extending along nearly the whole of Mozambique and Zanguebar, parallel to the sea, and at the distance of 90 leagues from it.

LUPERANO, a town of Naples, in the prov. of the Terra-d'Otranto, district and 11 m. SE of Tarento, cant. and 8 m. SSW of S. Georgio. Pop.1,000.

LUPERSAC, a town of France, in the dep. of Creuse, 8 m. ENE of Aubisson. Pop. 2,320.

LUPIAC, a commune and town of France, in the dep. of the Gers, cant. and 5 m. ESE of Aignan, and 17 m. NW of Mirande. Pop. 1,426. It has an hospital.

LUPIANA, a town of Spain, in the prov. and 9 m. ESE of Guadalaxara. Pop. 588. Near it, on the summit of a mountain, is an ancient and celebrated monastery dedicated to St. Bartholomew.

LUPICIN (Saint), a village of France, in the dep. of the Jura, cant. and 4 m. NW of Saint-Claude, and 13 m. SE of Orgelet. Pop. 550. It has an extensive trade in timber.

LUPION, a town of Spain, in Andalusia, in the prov. and 18 m. NE of Jaen. Pop. 949.

LUPNYAK, a village of civil Croatia, in the comitat and 30 m. WSW of Warasdin, near the frontier of Styria. It has a coal mine.

LUPO (San), a town of Naples, in the prov. of Sannio, 18 m. S of Campobasso. Pop. 1,800.

LUPOW, a village of Prussia, in the prov. of Pomerania, regency of Cöslin, circle and 17 m. ESE of Stolpe, on a small river of the same name, an affluent of the Baltic. Pop. 300. It has a copper work.

LUPPE, a small river of Saxony, called also the Muhlgraben, which falls into the Saale near Leipsic.

LUPPIT, a parish of Devonshire, 4 m. N by E of Honiton. Area 4,730 acres. Pop. in 1841, 782.

LUPPURG, a town of Bavaria, in the presidial and 1 m. E of Parsberg, and 19 m. NW of Ratisbon, on the r. bank of the Laber. Pop. 438.

LUPSA, a town of Transylvania, in the lower circle of the comitat of Thorenburg, 27 m. NW of Carlsburg, and 38 m. SSW of Klausenburg, on the l. bank of the Arangos. It is enclosed in the comitat of Lower Weisenburg. Pop. 2,800. It contains five Greek churches.

LUPTON, a township in the parish of Kirby-Lonsdale, in Westmoreland, 3 m. W by N of Kirby-Lonsdale. Area 4,970 acres. Pop. in 1841, 285.

LUQUE, a town of Spain, in the prov. and 28 m. SE of Cordova. Pop. 3,752.

LUQUE (La), a village of France, in the dep. of the Landes, cant. and 10 m. W of Tartas, and 23 m. WNW of St. Sever. Pop. 600.

LURAIS, a village of France. in the dep. of the Indre, cant. and 2 m. S of St.-Martin-de-Tournon, on the Creuse. Pop. 1,465.

LURAS, a village of Sardinia, in the prov. and 32 m. NNE of Oziere, district and 5 m. NE of Tempio, on a height. Pop. 1,132.

LURBE, a village of France, in the dep. of the Basses-Pyrenees, cant. and 6 m. S of Oleron, and 19 m. SW of Pau. Pop. 650. It is commanded on the E by a lofty calcareous mountain named Binet. It has several thermal springs.

LURCY-LE-BOURG, a town of France, in the dep. of Nievre, 25 m. SE of Cosny. Pop. 1,200.

LURCY-LEVY, or Lurcy-le-Sauvage, a town of France, in the dep. of Allier, 20 m. NW of Moulins. Pop. 2,940.

LURE, a town of France, in the dep. of Saone, 17 m. E by N of Vesoul. Pop. 3,190. It has a trade in corn, cheese, and leather.—The arrond. of L. has an area of 181,026 hectares. Pop. in 1841, 141,422. It comprises 10 cants.

LURES, a river of New Granada, in the prov. of San-Juan-de-los-Llanos. It runs N, and enters the Meta.

LURGAN, a market-town in the parish of Shankill, co. Armagh, on the E verge of the county, 13 m. NE by E of Armagh, and 17 m. SW of Belfast. The principal street is spacious, well-built, and of comparatively imposing aspect. The linen and muslin manufacture, principally in cambrics, lawns, diapers, and diaper damasks, is so extensively carried on in both the town and its vicinity, as either wholly or partially to employ the greater portion of the pop. The town is connected with all the interior navigations of Ulster; and it now enjoys the eminent advantage of being touched by the Ulster railway, connecting it with Armagh on the one hand and Belfast on the other, and also, by way of Portadown, with Drogheda and Dublin. Pop. in 1831, 2,842; in 1841, 4,677. In 1839, Charles Brownlow, Esq. of Lurgan-castle, was created Baron Lurgan, in the peerage of the United Kingdom.—Also a parish in co. Cavan, containing the town of Virginia. Area 11,327 acres, of which 774 acres are in Lough Ramor, and 148 acres in Lough Nadregeel. Pop. in 1841, 6,557.

LURGANBOY, a village in the p. of Killarnet, co. Leitrim, 1½ m. WNW of Manor-Hamilton. Pop. in 1831, 134; in 1841, 184.

LURGAN-GREEN, a post-village in the p. of Dromiskin, co. Louth, at the head of Dundalk bay, 3 m. N of Castle-Bellingham. Pop. in 1841, 214.

LURGAN-HILLS, a range of heights in cos. Mayo and Sligo, extending from the town of Foxford, NE to the vicinity of Ardnaglass harbour in Sligo. Nearly the whole range is lumpish, heath-clad, and of dreary aspect.

LURGASHALL, a parish of Sussex, 4½ m. NW of Petworth. Area 4,990 acres. Pop. 771.

LURI, a small town of the island of Corsica, in the arrond. and 12 m. N of Bastia. Pop. 1,662.

LURI, a village of the Punjab, 50 m. SE of Attock, in N lat. 33° 30′.

LURIN, a settlement of Peru, in the prov. of Peru, 18 m. S of Lima, about 1,000 paces from the sea-shore, and about 1 m. from the Rio-de-L. Fine gardens and well-cultivated lands impart beauty to the surrounding scenery. The ruins of the temple of Pacchacamac, situated on a hill 558 ft. high, are in the neighbourhood. This temple, which was dedicated to the sun, was destroyed by Pizarro in 1534.
